Mr. Speaker, H.R. 4961 makes a number of miscellaneous changes in the tax laws and in certain public assistance and unemployment compensation programs. Title I consolidates five minor tax bills which were considered individually in hearings by the Subcommittee on Select Revenue Measures and approved by the subcommittee in November. This title includes: First, amendments to section 280A to remove certain restrictions on rentals at fair market value to family members; second, provisions to allow the awarding of litigation costs to taxpayers who prevail in litigation against the United States when the United States had been unreasonable; third, a provision changing the rules under which taxpayers must accrue income and other taxes when the State imposing the tax has shifted the tax assessment date; fourth, amendments to the personal holding company rules relating to lending and finance of businesses; fifth, an additional 2-year delay in the application of the net operating loss rules added by the Tax Reform Act of 1976; and sixth, a provision allowing certain manufacturers to obtain a refund of bus excise taxes imposed under prior law.

Title II incorporates the provisions of H.R. 4942, a bill making changes in unemployment compensation, supplemental security income (SSI), child support enforcement (CSE), and title XX social services programs. H.R. 4942 was the subject of hearings by the Subcommittee on Public Assistance and Unemployment Compensation and was also approved by the subcommittee in November.

Both titles of this bill were favorably reported by the Committee on Ways and Means. Let me explain the provisions of the bill in greater detail.

TITLE I: REVENUE PROVISIONS

Mr. Speaker, section 280A of present law restricts the ability of taxpayers to take deductions in connection with homes and other dwelling units that are used for personal purposes. A taxpayer has used a dwelling unit for personal purposes if the unit was used by the taxpayer or any member of his family or by a coowner or a member of the coowner's family. These personal use rules apply even if the family member using the unit is paying a fair rental value. Under the bill, a taxpayer will not be treated as having used a residence for personal purposes if the unit it rented to another person at fair rental and the person renting the unit is using it as his principal residence. The bill also contains a provision coordinating the application of section 280A with the deductions allowable under section 162(a)(2) and other provisions of the Internal Revenue Code in situations where taxpayers are away from home in pursuit of a trade or business. These amendments take effect in 1982.

The second provision of the bill amends the present law rules relating to the awarding of attorney's fees in tax litigation by substituting a new set of rules to be applied in tax cases. Under the new provision a taxpayer could be awarded reasonable litigation costs up to $50,000 if the position of the United States in the tax litigation was unreasonable. This provision will discourage any possible overreaching by the Internal Revenue Service in its handling of tax litigation. The bill also allows the Tax Court to impose a penalty of up to $5,000 on taxpayers who institute litigation for the purpose of delay or who maintain a frivolous or groundless position before the court. The new provisions generally apply to civil tax proceedings in U.S. courts other than the Tax Court as of October 1, 1981, and to proceedings commenced in the U.S. Tax Court after December 31, 1982.

The third provision of the bill relates to the present law rule that requires accrual basis taxpayers to continue to use the old assessment date when a taxing jurisdiction changes the assessment date for a deductible tax. This present law rule prevents taxpayers from claiming two deductions in a single year. Under the committee bill, accrual method taxpayers will be allowed to use the new assessment date if their first accrual of tax occurs after the change in the assessment date or if they elect to switch to the new date and to establish a suspense account which will prevent deduction of two taxes in a single year.

The fourth change made by the bill relates to the treatment of lending or finance businesses for purposes of the personal holding company tax. Generally, present law imposes a tax on the undistributed personal holding company income of a personal holding company. A corporation actively engaged in a lending or finance business is exempt from the personal holding company tax if the corporation meets a specified minimum business expense requirement. Under the committee bill, the definition of a lending or finance business is modified to include the business of making loans with maturities up to 144 months. This change would be effective starting in 1981. In addition, starting in 1980, the bill increases the qualified business expense requirement for businesses with ordinary gross income in excess of $1 million.

The fifth change made by the committee bill is a 2-year delay in the application of the net operating net loss rules added by the Congress in the Tax Reform Act of 1976. The committee believes that there are a number of technical problems with respect to the provisions added in 1976 and that further study of these provisions is necessary before they can be allowed to take effect.

The sixth amendment made by the committee bill relates to the refunding of bus excise taxes under the Energy Tax Act of 1978. That act provided for refunds of bus excise tax paid after April 19, 1977, and before November 10, 1978. Some taxpayers were unable to meet the procedural requirements necessary to obtain a refund of the excise tax. The bill liberalizes these conditions for eligibility to allow for additional refunds consistent with the intent of the 1978 act. The bill does not provide for the payment of interest on these refunds.

REVENUE EFFECTS

This title of the bill is estimated to reduce fiscal year budget receipts by $69 million in 1982, $169 million in 1983, $198 million in 1984, $239 million in 1985, and $301 million in 1986. The bill is also estimated to result in an increase in fiscal year budget outlays of not more than $5 million as a result of the litigation cost awards provisions.

TITLE II: PUBLIC ASSISTANCE AND UNEMPLOYMENT COMPENSATION PROVISIONS

The public assistance and unemployment compensation provisions in title II eliminate a number of unintended effects created by changes enacted in the reconciliation bill. Some of the provisions are included at the request of the administration; others were developed after consultation with the administration; or are based on information received by the committee during oversight hearings. The provisions result in net budget savings.

The title XX provisions restore, at the administration's request, flexibility to those territories whose social services programs were unintentionally eliminated by the reconciliation bill. Other provisions make technical corrections requested by the administration in the title XX, SSI and child support enforcement program changes enacted by the reconciliation bill.

Title II also substitutes a 1-month prospective accounting period in the SSI program for the retrospective accounting period required under provisions enacted in the Reconciliation Act, modifies provisions in the act that require State child support enforcement agencies to charge a 10-percent fee to non-AFDC families, and establishes new requirements regarding the eligibility of ex-service members for unemployment benefits (UCX).

The objective of these reconciliation provisions was to reduce program costs in these programs. The committee, however, has been informed that the SSI and CSE provisions included in reconciliation will increase rather than decrease costs. The amendments in title II address this problem and produce savings to the Federal Government of $69 million in fiscal year 1982.

The UCX requirements enacted in the reconciliation bill, by providing unemployment benefits only to those who are not acceptable for reenlistment, penalize those individuals who satisfactorily fulfill their military obligation and are therefore offered the opportunity to reenlist but choose to leave the service. The UCX provision in title II will eliminate this penalty and replace the reconciliation bill requirements with new requirements based on prior law. The amendment is identical to a provision previously passed in the House version of the reconciliation bill and is a compromise between a return to previous law and the Reconciliation Act.

Three other unemployment compensation provisions in title II extend for 10 years the authority for States to use for administrative purposes certain funds credited to their individual State unemployment trust funds accounts—so-called Reed Act accounts—and exclude from Federal unemployment compensation taxes wages paid to certain alien farmworkers and to student interns.

Mr. Speaker, I yield 5 minutes to the distinguished chairman of the Subcommittee on Select Revenue Measures, the gentleman from California, Mr. PETE STARK, for an explanation of those provisions in the consideration of H.R. 4961, as considered by his subcommittee.

I also would like to congratulate him on the outstanding job done in that subcommittee.

Mr. STARK. Mr. Speaker, six of the provisions of H.R. 4961 were the subjects of careful review by the Subcommittee on Select Revenue Measures in public hearings and were unanimously approved with minor amendments by both the subcommittee and full comittee by voice vote. The changes are generally noncontroversial and technical in nature and have been drafted largely in consultation with the Treasury Department. Briefly, these changes include the elimination of the so-called family rental tax in certain circumstances, the awarding of reasonable litigation costs to a taxpayer who prevails against the Government if the Government's position was unreasonable, other and minor changes in the tax laws. In addition, the bill makes a limited amendment to the provision in the Energy Tax Act of 1987 repealing the excise tax on intercity buses, to allow certain additional refunds.

Mr. Speaker, I will briefly describe the individual provisions of this legislation.

Section 102 of the bill permits a taxpayer to treat rentals to family members like rentals to unrelated parties if a fair rental is charged and the dwelling unit is to be used as the family member's principal residence. This exception also applies to the rental of a dwelling unit by a co-owner for use as a principal residence if the rental is pursuant to a shared equity financing arrangement. The bill also coordinates the application of code section 280A with the deductions allowable under section 162(a)(2) and other provisions of the Internal Revenue Code by reason of the taxpayer's being away from home in the pursuit of a trade or business.

It should be noted for the record that one group of "businessmen" affected by this provision will be those Members of Congress whose families join the Member in Washington. In terms of this provision, Congressmen will be treated the same—no more and no less—as other businessmen.

Section 103 of the bill generally provides that a prevailing party in a civil tax proceeding brought by or against the United States may be awarded reasonable litigation costs (including attorney's fees) up to $50,000, if the position of the United States in the proceeding was unreasonable. The provisions apply to civil tax proceedings in any U.S. court, including the U.S. Tax Court, and provide the exclusive mechanism through which litigation costs, other than direct costs, may be recovered in tax cases.

The bill also provides that if it appears to the U.S. Tax Court that proceedings have been instituted or maintained by the taxpayer primarily for delay or that the taxpayer's position in the proceedings is frivolous or groundless, then the Tax Court may award damages not in excess of $5,000 to the United States.

Mr. Speaker, I would like to note that I am particularly pleased that the Committee on Ways and Means and the House have decided to move on this provision. I first introduced the concept of Tax Court cost awards as a separate bill, in order to help bring some additional safeguards and protections to the taxpayer against unreasonable actions by the IRS. I hope that this provision will help provide a moderating effect on the enormous police powers of the IRS.

Section 104 addresses a problem which results when a taxing jurisdiction accelerates the assessment date of a tax. Under present law, if a State or locality changes the assessment date for a deductible tax, an accrual basis taxpayer cannot accrue a deduction for the tax on the new assessment date because it might result in two tax deductions in the year of change. Section 104 permits accrual method taxpayers to use the new assessment date

if: (1) Their first accrual of tax occurs after the assessment date was changed that is, new taxpayers who could not obtain two tax deductions anyway; or (2) they elect to switch to the new date and establish a suspense account for the amount that would have accrued using the old accrual date in either the year of change or one of the 2 preceding years, whichever is greatest.

I would like to add, Mr. Speaker, that this provision is particularly important to my own State of California, which has been adversely affected by the differences in assessment dates between the State of California and the Federal Government. I would also like to point out that the need for this corrective amendment was called to my attention by the taxation section of the California AICPA.

Section 105 amends the definition of a lending or finance business for purposes of the personal holding company tax to include the business of making loans with indefinite maturities or maturities of not more than 144 months, effective December 31, 1980. The $1 million cap in the business expense requirement of present law is repealed, effective December 31, 1981. This change brings the tax law into conformity with present business practices.

Section 106 defers for 2 years, until January 1, 1984, the effective date of the limitations on net operating loss carryovers (code section 382) enacted in the Tax Reform Act of 1976. The postponement is necessary because the Ways and Means Committee has not yet had the opportunity to resolve technical problems which have arisen in the 1976 amendments.

Section 107 permits additional refunds of the excise tax on intercity buses, repealed by the Energy Tax Act of 1978, under certain limited conditions. This change affords relief to ultimate purchasers who were deprived of refunds of the excise tax because the importer was financially unable to make an advance refund of the tax in a timely manner.

Mr. Speaker, it is estimated that these provisions in H.R. 4961 will reduce fiscal year budget receipts by $69 million in 1982. In addition, it is estimated that section 3 of the bill will increase budget outlays by less than $5 million per year. This amount is within the budget figures for the present fiscal year.

Mr. Speaker, I urge prompt adoption of H.R. 4961.

Mr. CONABLE. Mr. Speaker, I yield 6 minutes to the gentleman from Louisiana (Mr. MOORE).

Mr. MOORE. Mr. Speaker, all sections of this bill, save one, are acceptable and should become law. But there is one section, section 2405, that should not become law.

By virtue of this bill coming up under suspension, an amendment cannot be offered by myself or others who feel likewise to amend section 2405 out of the bill. It is indeed quite possible that if this section remains in the bill, in the other body the bill itself might never become law since it taints it to that degree.

Section 2405, to which I object, provides unemployment compensation benefits to essentially all ex-servicemen who voluntarily leave the military. This reverses and retreats from the change we made in the reconciliation bill where we prohibited such payments except under certain circumstances.

This reversal or retreat from action we have already taken in the reconciliation bill should be defeated for basically four reasons.

The first reason I offer is the fact that this is bad policy. A serviceman and an employee in the private sector should be treated equally. The same rule should apply to either one. In the private sector when an employee leaves voluntarily a place of employment, he is not qualified for unemployment compensation benefits; yet if section 2405 stays in this bill, we are going to treat the serviceman differently than the private employee by allowing him unemployment compensation benefits when he voluntarily leaves the service.

It is bad policy to create this difference in treatment. When we used to have draftees, I guess one could rationalize the law being that way on the grounds that we were involuntarily plucking a man or woman out of their employment and putting them in the service of their country and perhaps we should do something for them when they leave. We do not have that anymore. Now we have a voluntary military. People go into the military knowing they are going to leave at a certain time. Most of them are preparing for that date. As a matter of fact, most of them use their last days of leave or they use the service training they are getting in service to prepare for when they leave.

There is no necessity in making a payment to these people when they are leaving their employment voluntarily, which we deny private employees.

Mr. STARK. Mr. Speaker, will the gentleman yield?

Mr. MOORE. I yield to the gentleman from California, chairman of the subcommittee, certainly.

Mr. STARK. It seems to me that there is a slight difference. I think this might be a time to bring it out. It is my understanding that in the United States, pretty generally if somebody works in private enterprise and they decide to quit, they can walk off the job, can they not?

Mr. MOORE. They can leave the job anytime they wish. But they leave voluntarily and they do not qualify.

Mr. STARK. Does the gentleman know what happens to a member of the armed services who walks off the job in the midst of his or her enlistment?

Mr. MOORE. I will say to the gentleman if you have a contract with the military, that can be enforced, but if you sign an employment contract, that contract can be enforced as well.

Mr. STARK. Does the gentleman know what the penalty is for desertion?

Mr. MOORE. Under fire it is very severe, but we are not talking about people who are deserting or leaving the military under those conditions.

Mr. STARK. If the gentleman would yield further, I think that that is one major distinction that one should keep in mind for our brave and valiant men and women who serve in the armed services.

Mr. MOORE. I appreciate the chairman of the subcommittee pointing this out. There are penalties for someone leaving employment under a contract and they can be sued for damages. The difference between a civil contract and military contract is one that is very necessary for the Nation's defense. That does not mean we should treat them differently for unemployment compensation. The difference in penalties for abdicating their responsibilities may be different but certainly that should not subscribe them being treated differently for purposes of unemployment compensation.

The second reason the section should be defeated is the fact that it is going to cost the Treasury, according to the Department of Labor, over the next 5 years, $599 million, one-half billion over the next 5 years in increased payments out of the General Treasury which we are going to have to make. That is not budgeted and not there now. This is at the very time that we are trying to balance the budget and struggling to do so.

If we are going to increase payments, if we are going to increase the deficits, I think there are some things in line that many Members may wish to see done before something like this.

Third, this is a bad precedent. When we start retreating and reversing the tough actions we took in the reconciliation bill to save the economy, where is it going to stop? I venture to say that every Member of this distinguished body has one or more things in the reconciliation bill he would like to see undone. If we begin to undo them one at a time, just like this, particularly with a low priority one like this, then by the end of next year we will have completely undone everything we did this year in the reconcili-

ation bill. Then, where will the economy be? It will be no different than it has been right now and will be the very thing that has caused us to take the difficult actions we took this spring in the reconciliation bill.

This is no time to retreat, no time to begin to undo what we have already done.

Fourth and finally, because of these three prior reasons, the administration now is very strongly opposed to this section of the bill and it stated so in the workings of our committee through the Department of Labor and in a recent letter to me from OMB.

I conclude by simply saying this is not an action for veterans or against veterans. I am a veteran and I am a member of the American Legion. I have supported every veterans' bill that has come to the House of Representatives in the 7 years I have been here. But to help veterans, if that is what we want to do, if veterans have got problems, if we are not paying them enough, if veterans' benefits are not good enough, let us adjust that through proper legislation, legislation coming out of the House Armed Services Committee or the Veterans' Affairs Committee, and let us not do it by this backhanded method.

□1610

Let us not do it by weakening the unemployment compensation program by creating unequal employment treatment of private individuals and those who come out of the military and by increasing the deficit of the country at a time we are trying to balance it. This retreat should not be allowed to succeed.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 9 minutes to the gentleman from Tennessee (Mr. FORD), chairman of the Subcommittee on Public Assistance and Unemployment Compensation, who has done a tremendous job in packaging this product.

Mr. FORD of Tennessee. Mr. Speaker, I thank my distinguished chairman of the Committee on Ways and Means for yielding so that I might comment on title II of the bill.

Mr. Speaker, title II of the bill contains amendments to the Federal-State unemployment compensation program, the supplemental security income (SSI) program, the child support enforcement (CSE) program, and the social services program established under title XX of the Social Security Act.

The unemployment compensation amendments were the subject of careful review by the Subcommittee on Public Assistance and Unemployment Compensation. Most of the public assistance amendments were included in the bill at the request of the administration; and the others were developed in consultation with administration officials.

Mr. Speaker, I will briefly describe and explain the individual provisions of title II.

Section 201 extends for 10 years the Reed Act authority which allows States to use for administrative purposes certain excess Federal unemployment compensation funds credited to individual State unemployment trust fund accounts in 1956, 1957, and 1958. In addition, it allows States that have used such funds to pay unemployment benefits to reestablish a Reed Act account. Under current law, authority for States to use the 1956 portion of Reed Act funds for administrative purposes expired on July 1, 1981. Authority to use Reed Act funds credited in 1957 for administrative purposes expires on July 1, 1982; and administrative authority for the 1958 funds expires July 1, 1983.

Extending the Reed Act, and permitting States to reestablish Reed Act accounts, will strengthen the Federal-State unemployment compensation system. States have used Reed Act funds to pay administrative program costs for which Federal grant funds were not available, and many States have utilized funds to finance major capital expenditures, such as the construction of employment security offices. These investments have resulted in substantial cost savings, in terms of reduced expenditures for leasing facilities and improvements in the operations of State unemployment security programs.

Sections 202 and 203 involve exclusions from the Federal Unemployment Tax Act (FUTA). Under present law, employers do not have to pay FUTA taxes on wages paid to certain student interns and to alien farmworkers, commonly called H-2 workers.

Under current law, wages paid to a student under age 22, who is a full-time student enrolled in a work-study, cooperative education, or internship program, are excluded from FUTA if the work performed is an integral part of the student's academic program. Section 202 would remove the age limitation so that student intern wages would be exempt from FUTA regardless of the age of the student.

The exemption in current law pertaining to student interns was enacted in 1970; however, no explanation for the age limitation was given in the materials which accompanied the amendment. Inasmuch as the work performed by a student which is a required component of an integrated work-study curriculum does not involve the kind of employment or the employer-employee relationship that was intended to be covered by the unemployment insurance system, there is no basis for the present age-22 limitation.

H-2 workers may be employed only upon certification by the Department of Labor that U.S. workers will not be adversely affected. The present FUTA exclusion for alien farmworkers expires on December 31, 1981. Section 203 of the bill would extend the present exclusion for 2 years—January 1, 1982, to January 1, 1984.

The reconciliation bill enacted this summer, Mr. Speaker, established new requirements regarding the eligibility for ex-service members for unemployment compensation benefits. Prior to the reconciliation bill, federally funded unemployment benefits were provided to ex-service members, under the UCX program, who had served at least 1 year or more and who were separated from the service under other than dishonorable conditions. The provisions in the reconciliation bill, however, disqualify for unemployment compensation benefits anyone who leaves the military at the end of an enlistment period if he or she was eligible to reenlist.

During hearings on the UCX program held by the Subcommittee on Public Assistance and Unemployment Compensation, widespread concern was expressed about the impact and fairness of this provision. Some 110,000 individuals who have honorably served their Nation in the Armed Forces but are unable to find employment immediately after they leave the service, will be denied unemployment benefits in fiscal 1982 according to administration estimates. By providing unemployment benefits only to those who are not acceptable for reenlistment, the UCX requirements enacted in the reconciliation bill penalize those individuals who satisfactorily fulfill their military obligation and are therefore offered the opportunity to reenlist but chose to leave the service.

Section 204 will eliminate this penalty and replace the UCX requirements enacted in the reconciliation bill with new requirements. UCX eligibility would be limited to ex-service members who have served 2 years or more. A 4-week waiting period between the week in which the individual is separated and the week in which he or she first becomes entitled to benefits would be required, and benefits would be limited to 13 weeks.

Section 204 of the bill is identical to a provision previously adopted by the subcommittee, approved by the Ways and Means Committee and passed in the House version of the reconciliation bill. The provision is a good compromise between a return to previous law and the reconciliation bill. It will substantially reduce UCX program costs as compared to previous law, but will also treat ex-service members with respect and fairness.

Sections 205 through 208 of the bill involves modifications in amendments enacted in the reconciliation bill to the supplemental security income

(SSI) program and the child support enforcement (CSE) program.

Sections 206 and 208 are generally technical in nature and are included in the bill at the request of the administration. They would clarify that the new process for dealing with unnegotiated SSI checks apply to all types of SSI-State supplement checks, and would correct several inaccurate references in the CSE provisions enacted in the reconciliation bill.

Section 205 would substitute a 1-month prospective accounting period in the SSI program for the retrospective accounting period required under provisions in the Reconciliation Act. Section 207 modifies provisions in the act which require State child support enforcement agencies to charge a 10-percent fee to non-AFDC families for services they provide to non-AFDC families.

Under SSI law in effect through March 1982, computation of SSI eligibility and amount of benefits is based on the income and resources for the current calendar quarter. The reconciliation bill, however, requires that, after March 1982, these computations will be on a monthly basis. Benefits, generally, will be determined on a monthly retrospective basis. That is, the amount of SSI benefit for any month will be determined on the basis of the individual's or couple's income, resources, and other circumstances in the preceding month, or at the discretion of the Secretary of Health and Human Services, the second preceding month.

The objective of this change in SSI was to reduce program costs by reducing the number of erroneous payments. Because benefits are computed on the basis of the recipient's actual income in a prior month, rather than projected income, it was assumed that retrospective accounting would reduce errors and thereby reduce SSI costs.

The committee, however, has been informed by the administration and the States that the retrospective accounting procedure will increase, rather than decrease, SSI costs. The Congressional Budget Office estimates that this increase will be $69 million in fiscal 1982. The reason for the increase in costs is that, under retrospective accounting, yearly cost-of-living increases in other Federal benefits which SSI recipients receive will not be counted for SSI purposes for the first 2 months that the increases are actually received. In addition, it is highly questionable as to how much if any savings would be achieved through a reduction in errors.

Section 205 will return SSI to a prospective accounting system, which will allow SSI payments to be adjusted to take account of increases in other Federal benefit programs received by recipients in the first month in which they occur. In addition, a 1-month prospective period would be established which will allow SSI cases to be reviewed more frequently and, as a result, changes in circumstances that affect the payment amount should be detected more quickly.

Section 207 would modify provisions enacted in the reconciliation bill that require all States, in cases involving non-AFDC families, to charge any absent parent who is obligated to pay child support through the State child support enforcement agency a fee equal to 10 percent of the child support payment to cover the agency's administrative costs. The purpose of the fee is to recover the agency's administrative costs.

According to the Council of State Child Support Enforcement Administrators, however, the reconciliation bill provision will cost the Federal Government between $10 and $20 million in lost child support collections, rather than increase collections as was initially estimated.

The primary reason for the anticipated reduction in collections is that the provision requires the absent parent to pay the 10-percent fee after all arrearages are satisfied. In other words, the fee is charged only to those who remain completely current in their child support obligation. This provides an incentive for the absent parent to fall behind in his payments in order to avoid the 10-percent additional cost.

Section 207 reinstates the options in prior law under which the State could recover administrative expenses by charging a fee and retaining a portion of the amount collected. In addition, this section provides States the alternative option of charging the absent parent who owes child support an amount, in addition to the support payment, equal to administrative costs.

Section 209 of the bill contains technical amendments to the title XX social service program provisions enacted in the reconciliation bill. The amendments in section 209 were requested by the administration. Briefly, the amendments would restore flexibility to the Territories unintentionally eliminated by the reconciliation bill regarding their social services programs, would correct several inaccurate references contained in the reconciliation bill, and make conforming amendments regarding title XX and the title IV-E foster care program.

I urge the Members to support this bill.

Mr. MOORE. Mr. Speaker, will the gentleman yield?

Mr. FORD of Tennessee. I yield to the gentleman from Louisiana.

Mr. MOORE. I appreciate the distinguished chairman of our subcommittee yielding.

The gentleman made a comment, and I think I would like to address that comment, on what we are intending to do with the existing law. I do agree with the gentleman that the provision in this bill is an improvement over the law prior to reconciliation. What we are doing with the reconciliation bill, which is now law, is trying to see to it that the only people who are service people who are entitled to unemployment compensation benefits are these who desire to remain in the military, are qualified to remain but are not allowed to because of layoffs or not meeting the MOS anymore, or whatever; that the law—and the gentleman full well knows—gives the military the right for cause to deny anybody from otherwise getting unemployment compensation benefits—that "for cause" meaning people who would not be retained by the service because they were not bright enough, because they were disciplinary problems, or whatever.

I do not think it is fair to characterize the present law, vis-a-vis what is trying to be accomplished in this bill, one of getting unemployment compensation to honorably dischargees and the existing law not doing so. I do not think that is a fair comparison.

Mr. BAILEY of Pennsylvania. Mr. Speaker, will the gentleman yield?

Mr. FORD of Tennessee. I yield to the gentleman from Pennsylvania.

Mr. BAILEY of Pennsylvania. I thank my subcommittee chairman and my full committee chairman, who have done a yoeman's job on this issue.

I would only say, in response to the gentleman from Louisiana, that this change does in fact change or correct an anomaly in the law, and that anomaly was that an individual who in fact had served well, had served honorably, but who was eligible or the service wanted to have back for reenlistment purposes, that individual did not qualify. And it is important, I think, for the gentleman to know that.

Mr. MOORE. Mr. Speaker, will the gentleman yield?

Mr. FORD of Tennessee. I yield to the gentleman from Louisiana.

Mr. MOORE. I appreciate that, and I would say to my good friend, the gentleman from Pennsylvania, that I understand that. The point is that one who is honorable and could stay but desires not to is analogous to a private employee who voluntarily quits and should not receive those benefits.

Mr. BAILEY of Pennsylvania. The gentleman made that argument initially and, of course, we disagree on that.

I just want to say, in response to his remarks, that in fact the anomaly is being corrected by this legislation and perhaps was not quite the way it was explained.

Mr. FORD of Tennessee. May I say further to the gentleman from Lou-

siana, who talked about the cost of the program, the cost of the program prior to the reconciliation bill in fiscal year 1982 is $306 million, in fiscal year 1983 it is $294 million, and it goes on.

The cost of the program under section 204 of this bill is only $130 million, with the savings of $176 million in fiscal year 1982, and, over a 5-year period, a savings of $875 million.

We are talking about a requirement of military service for 2 years rather than 1 year. We are talking about a requirement of a 4-week waiting period which will encourage these ex-service persons to go back into their hometowns, to seek employment, and to obtain employment. If they cannot find employment we believe it is fair to allow them 13 weeks of unemployment compensation.

Mr. MOORE. Will the gentleman yield?

Mr. FORD of Tennessee. I yield to the gentleman from Louisiana.

Mr. MOORE. I do not know of the correctness of the gentleman's figures, but I think what the gentleman is saying is that the section in this bill would save the amount of sums he had indicated over the old law prior to reconciliation.

Mr. FORD of Tennessee. The gentleman has to understand that the Public Assistance and Unemployment Compensation Subcommittee passed ths bill twice. The full Committee on Ways and Means passed this bill twice. This same language was acted upon in the budget reconciliation bill in the House. It was taken out in that mass of confusion with the conferees on the reconciliation bill. This one item was deleted from the bill in the reconciliation conference committee. I think it is high time for us to come back and to correct the mistake which the conferees made as it relates to ex-service members.

□ 1620

Mr. MOORE. But getting back to the item of cost, the gentleman does not disagree that as concerns the reconciliation bill this provision in this bill will cost $499 million over the next 5 years, more than if we stuck with the reconciliation language presently in the law?

Mr. FORD of Tennessee. I think the figures that the gentleman used are figures from the Department of Labor and I am not certain whether we can count on those figures to be correct. The Congressional Budget Office in its figures shows a cost of approximately $300 million and the Labor Department is some $200 million off in their figures.

Therefore, we are only talking about $50 to $70 million per year, over a 5-year period, and we are not talking about $500 million that the gentleman referred to earlier.

Mr. MOORE. Even using the figures the gentleman is using, the Congressional Budget Office, the gentleman is talking about an increased expenditure of this section of the now existing law as for the reconciliation bill.

Mr. FORD of Tennessee. But we are talking about a savings over prior law of $176 million.

In 1983 we are talking about $172 million. In fiscal year 1984 we are talking about $167 million. In 1985, $169 million. In 1986, $181 million, giving us a total savings of $865 million.

Mr. MOORE. As I understand the gentleman's point, it is going to cost, by the gentleman's figures, $300 million, the Department of Labor, $500 million over the next 5 years.

Mr. FORD of Tennessee. I urge passage of this legislation.

Mr. CONABLE. Mr. Speaker, I yield such time as he may consume to the gentleman from Wisconsin (Mr. GUNDERSON).

Mr. GUNDERSON. Mr. Speaker, I rise in strong support of section 202 of the unemployment compensation amendments to H.R. 4961. Due to a quirk in the Internal Revenue Code as it relates to unemployment compensation, teacher internship programs at our colleges and universities are presently in jeopardy.

School districts were first included in unemployment compensation legislation in 1972. In 1973, teacher interns were determined ineligible for unemployment compensation benefits under an exception that prevented individuals who were regularly attending an educational institution from receiving benefits. The work study portion of the statute that prohibits benefits to students under age 22 was not considered at that time.

However, in 1977 the statutes were amended to exclude non-profit organizations and governmental units, from the 1973 exception. By definition, school districts are considered governmental units under the IRS statutes. The work study portion of the statute was now applicable to school districts rather than the 1973 exception.

As a result of this amendment, teacher interns, age 22 and older (as 90 percent of them are), have been found eligible to receive unemployment compensation benefits at the expense of the school district they worked in after completing their internship.

Many school districts have, therefore, terminated their participation in internship programs. In the long run this will impair the quality of instruction our children and grandchildren receive as future teachers are denied an opportunity to work under the guidance of an experienced teacher before entering the teaching profession.

In recognition of the disruptions this quirk in the Code has caused the intern program, I introduced H.R. 3253 to amend section 3306(c)(1))(C) of the Internal Revenue Code by striking "under age 22" from the work study portion of the unemployment compensation statute.

By including similar language in H.R. 4961, the members of the Ways and Means Committee will remove this obstacle to participation in the intern program by local school districts and insure the availability of internship programs to future generations of students.

I urge my colleagues to support this language in H.R. 4961.

Mr. CONABLE. Mr. Speaker, I now yield 5 minutes to the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Speaker, first of all, I want to associate myself with the remarks of the distinguished gentleman from Louisiana (Mr. MOORE), with whom I have joined in supplementary remarks in the committee report on the subject of the one feature of this bill which deserves to be defeated. That is, of course, section 2405, which would allow voluntarily unemployed ex-service members to collect unemployment compensation.

The money to pay unemployment compensation in this bill does not come out of some magic fund paid into by giant multinational corporations. It comes out of general revenues, out of the money that taxpayers have to ante up to run this Government.

I would like to remind Members of this body that that general revenue fund is going to be short about $100 billion in this particular fiscal year.

If we did have unemployment compensation funds we did not know what to do with, we have better uses than giving them to people who are voluntarily out of work. We had to gut our trade adjustment assistance program this year. We have had to reduce unemployment compensation in areas where it is really needed. There is no sense, in my judgment, in providing it where it is not needed.

Providing unemployment compensation to ex-military personnel who could have stayed on active duty made sense when the country had a draft. Then we drafted young men, or we allowed the threat of a draft to encourage their enlistment.

Now we have an all-volunteer military service. There is no draft and no compulsion. When one of our volunteers leaves the service by his or her own choice, that volunteer is voluntarily unemployed. If any State wishes to use the contributions of its employers to pay the claims of these veterans who opt out, it may do so. That state will not do so because it knows it needs its own funds to carry its own employees who are involuntarily unemployed.

If the Department of Defense wants to provide some sort of retirement

bonus, I suppose it could ask us for the authority to appropriate it. It will not, of course, because it wants to keep these people. It does not want to give them an incentive to retire, as this bill gives them, nor does it want us to give them an incentive to retire.

Unemployment compensation is not a prize. It is an emergency sustenance to help people who are out of work through no fault of their own, and so this Congress has no obligation to fund this class of Americans.

The States and the Department of Defense do not want the obligation and yet this bill proposes to use the taxpayers' money from general revenue to fund this unnecessary unemployment compensation.

I am told by the Department of Labor that this bill will cost about $100 million a year—a little less according to the Budget Office. We do not have to spend that $80 million to $100 million annually. We ought to give unemployment compensation benefits to ex-service personnel who are not invited to reenlist. That is the current law. They have become unemployed involuntarily.

But we ought not give benefits to those to whom reenlistment is offered. If they turn the reenlistment down, they are voluntarily unemployed.

Now I do not think that many of our constituents would like their hard-earned tax dollars to go to people who voluntarily left their jobs. The money comes from taxpayers, again I state, and not from employers. We ought to reject this unwise feature of the bill, follow the advice of OMB, and save our hard-pressed taxpayers $100 million a year.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 1 minute to the gentleman from Pennsylvania (Mr. BAILEY).

Mr. BAILEY of Pennsylvania. Mr. Speaker, I just want to thank the chairman of the full committee and the subcommittee chairman for the help that they have given in this effort. It is not because the provisions of this legislation are supported by the American Legion or the Veterans of Foreign Wars, or the Disabled American Veterans, the Reserve Association, and other groups, universally. I think it is a matter of justice whether or not it is a question of a volunteer quit, which it is not.

There is room for open and honest debate about that issue in a philosophic sense, but the point boils down to this: whether or not a young man or woman having problems at home, who have sent their money home, are faced with a reenlistment opportunity, that is, the service wants them, has to subjugate personal needs and wants and environment that is different than a civilian work environment under conditions that are different than civilian or normal contracts of employment, and simply needs some help finding a job when they get home.

We have limited the benefits. We have compromised them. I think it is fair and I hope that the entire Congress will support the veterans' groups and all of our people who sacrifice for the good of our country.

● Mr. MOFFETT. Mr. Speaker, I would like to state my strong support for the proposed changes in veterans' unemployment compensation rules, which were unfairly altered by the Reagan budget bill this past summer. Those rules were changed in order to save money, without regard for the impact on those affected by the changes. Under the new rules, a veteran may only receive unemployment compensation if his or her service record shows that the armed services do not want him or her to reenlist. However, those who have served with sufficient distinction to qualify for reenlistment are barred from receiving unemployment compensation. This is a rather curious way in which to reward those who have served their country well.

The new rules also have the effect of encouraging persons presently in the armed services to do sufficiently poor work to be refused reenlistment. Only then will they be eligible for unemployment compensation after leaving the service. This clearly makes no sense, since we should be striving for better performance, not worse, in the armed services.

It is for these reasons that I strongly support the changes proposed in the legislation before us, H.R. 4961. They are very sensibly constructed, in that they would provide unemployment compensation only to persons who had served at least 2 years, and require a 4 week waiting period between the week of separation from the service and the first week of benefits. In addition, benefits would be limited to 13 weeks. These rules would have the effect of making sure that veterans can get unemployment compensation, but not for an indefinite period of time. They would correct the injustice that has existed since this past summer in an intelligent way. Moreover, the total cost of these changes proves to be quite small, compared to the total Federal budget, to say the least.●

● Mr. KASTENMEIER. Mr. Speaker, I rise in support of H.R. 4961. Section 3 of H.R. 4961 authorizes the awarding of attorneys' fees and other litigation costs in any civil proceeding involving tax matters.

Last Congress, as chairman of the House Judiciary Subcommittee on Courts, Civil Liberties and the Administration of Justice, I helped process the Equal Access to Justice Act (title II, Public Law 96-481). Although that act covered some tax cases, it did not include cases filed in the Tax Court. H.R. 4961 includes tax cases in the Tax Court, as well as those in the district courts and Court of Claims. Therefore, the bill has a potential of reaching more taxpayer litigants than under the Equal Access to Justice Act. Under this bill recovery of attorneys' fees would be authorized to a party who has substantially prevailed with respect to the amount in controversy or with respect to the most significant issue or set of issues presented. The Committee on Ways and Means has also developed other criteria affecting the ability to receive awards, for example: First, that the award not exceed $50,000; second, that administrative remedies be exhausted; and third, that the determination whether the United States was unreasonable and whether the party has prevailed can be made by the court or with the agreement of the parties.

When the Equal Access to Justice Act was being processed last Congress, it was my intent and that of other Members that we should allow the committees with tax jurisdiction the option of developing a separate bill on attorneys' fees. That is one reason why the effective date of that act was delayed 1 year until October 1981. Although H.R. 4961 was not enacted by that date, I am pleased that the Committee on Ways and Means has acted as expeditiously as possible to enact a tax bill expanding the liability of the Government in tax cases when a taxpayer prevails and the Government acted unreasonably.

The bill deserves your support.●

● Mr. SCHULZE. Mr. Speaker, I would like to address those provisions of the bill which will extend to December 31, 1982, the deadline for rebate of Federal excise taxes on the sale of certain buses. Let me stress that these are taxes that Congress has already agreed to refund. This bill is remedial in nature and intended to insure that administrative requirements of the original repealing act do not deny the purchasers of the buses their rightful refund.

When Congress passed the windfall profit tax, it terminated the excise tax on certain buses. As part of this repeal, the statute provided that the IRS would pay out a refund of excise taxes already collected on buses sold between April 20, 1977, and the date of enactment.

Because Congress had bad experience with the automobile excise tax refund, the bus excise tax repealer established a procedure designed to guarantee that the purchaser of the buses, upon whom the real burden of the tax fell, would actually receive the tax refund. This was a laudable goal. However, the administrative requirements were difficult to comply with.

The law specified that the seller of the buses act as financial intermediary by first refunding to the customer the

amount of the excise tax collected. Second, the seller could apply to the IRS to get a rebate of the amounts paid to the customers. While this insured that the customers got the tax rebate, it also set up a system in which the seller had to put his money out for the benefit of the U.S. Government, and hope that he could get it back soon. In essence, the statute contemplated an interest-free loan by the seller to the Government.

Some large-scale sellers of buses were able to get swift response by the IRS or cooperative treatment in setting up simultaneous exchange arrangements. But, as is so frequently the case, the small businessman was not successful in dealing with the IRS.

What this bill proposes is to extend the time period for making the payment to the customers, and to the vendors which have made application for a refund within the time limits of the original law.

Further, the bill contemplates that a simultaneous escrow arrangement or other mechanism satisfactory to the Treasury be used so as to facilitate the refund of these taxes. The beneficiaries would be small bus operators in at least 12 States.●

● Mr. VANDER JAGT. Mr. Speaker, I rise in support of H.R. 4961 which makes a number of changes in tax law. I am pleased to join as a cosponsor of this bill, and wish to commend my colleagues on the Committee on Ways and Means for the bipartisan spirit of cooperation that led to favorable action in the committee.

The most important provision of H.R. 4961, in my estimation, is the section that authorizes the award of attorney fees who prevail in tax cases when the position of the Government is unreasonable. This has been a longstanding legislative goal of mine, and I am pleased to have participated in shaping the particular language included in H.R. 4961.

Early in my congressional career, I introduced a bill that I called the "David and Goliath" legislation—so-called because it permitted individuals to take on the full weight of the Federal Government and be reimbursed for their legal expenses if they won. I am sure that most of my colleagues understand the frustration of many of their constituents who feel very intimidated by the Government, knowing that even if they are proved right the cost and aggravation of their legal defense will severely penalize them. For this reason, my early legislation to reimburse individuals who prevail against the Government was very popular.

Enactment of the Equal Access to Justice Act in 1980 was a great step toward this legislative goal. However, that act could not address the situation in Tax Court cases, so further legislation is necessary to fill this gap. Admittedly, the situation in tax cases is somewhat different from other issues inasmuch as tens of thousands of tax disputes are resolved each year between taxpayers and the Government. The vast majority are resolved at the administrative level, but several thousand are decided in the U.S. Tax Court. Under current law, no taxpayers are entitled to recover their legal fees if they prevail against the Government in Tax Court. In some situations this may encourage a taxpayer to pursue the case in the U.S. District Court where attorney fees can be awarded, rather than in the Tax Court which is better equipped to handle tax cases.

The standard the Ways and Means Committee developed to determine when it would be appropriate for attorney fees to be awarded is a classic compromise. Under the language of H.R. 4961, taxpayers who prevail may be entitled to reimbursement of attorney fees when the position of the Government is determined by the Court to have been unreasonable. Frankly, I am sympathetic to the arguments of many that taxpayers should automatically be entitled to attorney fees if they win in tax cases, just as they would in other legal disputes. The Treasury Department points out, however, that thousands of cases are litigated to clarify interpretations of the Tax Code and the application of the Code to the facts and circumstances of the particular taxpayers involved, with many cases resulting in a give and take on both sides. The Treasury Department sought a standard that would limit reimbursement to cases where the Government acted in bad faith.

The final standard of unreasonableness on the part of the Government appears to be both workable and equitable. The language and accompanying report of H.R. 4961 make it clear that this determination will be made by the Tax Court based primarily on the record of the case, so the taxpayer will not have to be subject to another lengthy legal ordeal after he prevails in his original case. Tax Court judges with extensive experience in tax litigation will in most cases be able to determine with relative ease the situations where the Government's case was unreasonable.

The committee accepted my amendment to limit attorney fee awards to no more than $50,000 to satisfy the concern that very large corporations and very wealthy individuals would potentially be able to recover multimillion-dollar awards for their attorney fees in complex cases litigated over a number of years. I feel most of us would agree that the objective of this legislation is to encourage the little guy—individuals and small businesses—to pursue their case if they feel the Government is being unreasonable and the $50,000 amount should satisfy all but the most complex cases. The dollar limitation was viewed as a more workable solution than the approach taken in the Equal Access to Justice Act which limits the class of person and business entitled to recover attorney fees to spare a taxpayer who prevails against an unreasonable Government position the ordeal of proving yet a third condition, that he is in fact, of a net worth entitled to the award.

Mr. Speaker, I also want to voice my support for a minor provision of H.R. 4961 concerning refunds of the manufacturers excise tax on buses. The Windfall Profit Tax Act of 1978 repealed the excise-tax on buses and established the criteria for certain refunds of taxes already paid. Unfortunately, some purchasers of buses were denied the refund because the act required dealers to make the refund before receiving the funds from the Treasury. Some dealers were financially unable to make those refund payments due to the economic conditions, and the purchasers were denied the payments the Congress intended in the 1978 act. This change takes care of this situation with little loss to the Treasury, about $300,000 in excise taxes that actually should have been refunded earlier.

Mr. Speaker, I urge my colleagues to support H.R. 4961 as reported from the Committee on Ways and Means.●

Mr. CONABLE. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. ROSTENKOWSKI) that the House suspend the rules and pass the bill, H.R. 4961, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The title of the bill was amended so as to read: "A bill to make miscellaneous changes in the tax laws, and for other purposes."

A motion to reconsider was laid on the table.

MISCELLANEOUS PROVISIONS INCLUDING SAFE HARBOR LEASES AND FNMA

Mr. ROSTENKOWSKI. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 4717) to amend the effective date provision of section 403(b)(3) of the Windfall Profit Tax Act of 1980 (Public Law 96-223) to further defer the effective date of certain provisions providing for the recognition as income of LIFO inventory amounts, as amended.

The Clerk read as follows:

H.R. 4717

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. DELAY IN PROVISIONS RECOGNIZING GAIN ON CERTAIN DISPOSITIONS OF LIFO INVENTORIES.

Paragraph (3) of section 403(b) of the Crude Oil Windfall Profit Tax Act of 1980 (relating to effective date for recognition of gain on certain dispositions of LIFO inventories) is amended by striking out "December 31, 1981" and inserting in lieu thereof "December 31, 1982".

SEC. 2. ADJUSTMENTS TO NET OPERATING LOSS CARRYBACK AND CARRYFORWARD RULES FOR FEDERAL NATIONAL MORTGAGE ASSOCIATION.

(a) 10-YEAR CARRYBACK AND 5-YEAR CARRYFORWARD FOR LOSSES OTHER THAN MORTGAGE DISPOSITION LOSSES.—Paragraph (1) of section 172(b) of the Internal Revenue Code of 1954 (relating to net operating loss carrybacks and carryovers) is amended by redesignating subparagraphs (H) and (I) as subparagraphs (I) and (J), respectively, and by inserting after subparagraph (G) the following new subparagraph:

"(H) In the case of a new operating loss of the Federal National Mortgage Association for any taxable year beginning after December 31, 1981—

"(i) such loss, to the extent it exceeds the FNMA mortgage disposition loss (within the meaning of subsection (i)), shall be—

"(I) a net operating loss carryback to each of the 10 taxable years preceding the taxable year of the loss, and

"(II) a net operating loss carryover to each of the 5 taxable years following the taxable year of the loss, and

"(ii) the FNMA mortgage disposition loss shall be—

"(I) a net operating loss carryback to each of the 3 taxable years preceding the taxable year of the loss, and

"(II) a net operating loss carryover to each of the 15 taxable years following the taxable year of the loss."

(b) RULES RELATING TO FNMA MORTGAGE DISPOSITION LOSS.—Section 172 of such Code is amended by redesignating subsections (i) and (j) as subjections (j) and (k), respectively, and by inserting after subsection (h) the following new subsection:

"(i) RULES RELATING TO FNMA MORTGAGE DISPOSITION LOSS.—

"(1) FNMA MORTGAGE DISPOSITION LOSS DEFINED.—

"(A) IN GENERAL.—For purposes of subsection (b)(1)(H) and this subsection, the term 'FNMA mortgage disposition loss' means for any taxable year the excess (if any) of—

"(i) the losses for such year from the sale or exchange of mortgages, securities, and other evidences of indebtedness, over

"(ii) the gains for such year from the sale or exchange of such assets.

"(B) FNMA MORTGAGE DISPOSITION LOSS CANNOT EXCEED THE NET OPERATING LOSS FOR THE YEAR.—The amount of the FNMA mortgage disposition loss for any taxable year shall not be greater than the net operating loss for such year.

"(C) FORECLOSURE TRANSACTIONS NOT INCLUDED.—In applying subparagraph (A), any gain or loss which is attributable to a mortgate foreclosure shall not be taken into account.

"(2) COORDINATION WITH SUBSECTION (B)(2).—In applying paragraph (2) of subsection (b), a FNMA mortgage disposition loss shall be treated in a manner similar to the manner in which a foreign expropriation loss is treated."

(c) CONFORMING AMENDMENTS.—

(1) Subpararaph (A) of section 172(b)(1) of such Code is amended by striking out "(H), (I)" and inserting in lieu thereof "(H), (I), and (J)".

(2) Subparagraph (B) of section 172(b)(1) of such Code is amended by striking out "and (I)" in the second sentence and inserting in lieu thereof "(H), and (J)".

(3) Subparagraph (I) of section 172(b)(1) of such Code, as redesignated by subsection (a), is amended by striking out "subsection (i)" and inserting in lieu thereof "subsection (j)".

(4) Paragraph (3) of section 172(j) of such Code, as redesignated by subsection (b), is amended by striking out "subsection (b)(1)(H)" each place it appears and inserting in lieu thereof "subsection (b)(1)(I)".

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to net operating losses for taxable years beginning after December 31, 1981.

SEC. 3. INFORMATION RETURNS WITH RESPECT TO SAFE HARBOR LEASES.

(a) REQUIREMENT OF RETURNS.—Paragraph (8) of section 168(f) of the Internal Revenue Code of 1954 (relating to special rule for leases) shall not apply with respect to an agreement unless a return, signed by the lessor and lessee and containing the information required to be included in the return pursuant to subsection (b), has been filed with the Internal Revenue Service not later than whichever of the following is the later:

(1) January 31, 1982, or

(2) the 30th day after the date on which the agreement is executed.

(b) INFORMATION REQUIRED.—The information required to be included in the return pursuant to this subsection is as follows:

(1) The name, address, and taxpayer identifying number of the lessor and the lessee (and parent company if a consolidated return is filed);

(2) The district director's office with which the income tax returns of the lessor and lessee are filed;

(3) A description of each individual property with respect to which the election is made;

(4) The date on which the lessee places the property in service, the date on which the lease begins and the term of the lease;

(5) The recovery property class and the ADR midpoint life of the leased property;

(6) The payment terms between the parties to the lease transaction;

(7) Whether the ACRS deductions and the investment tax credit are allowable to the same taxpayer;

(8) The aggregate amount paid to outside parties to arrange or carry out the transaction;

(9) For the lessor only: the unadjusted basis of the property as defined in section 168(d)(1);

(10) For the lessor only: if the lessor is a partnership or a grantor trust, the name, address, and taxpayer identifying number of the partners or the beneficiaries, and the district director's office with which the income tax return of each partner or beneficiary is filed; and

(11) Such other information as may be required by the return or its instructions.

Paragraph (8) shall not apply with respect to any person for any calendar year if it is reasonable to estimate that the aggregate adjusted basis of the property of such person which will be subject to subsection (a) for such year is $1,000,000 or less.

(c) COORDINATION WITH OTHER INFORMATION REQUIREMENTS.—In the case of agreements executed after December 31, 1982, to the extent provided in regulations prescribed by the Secretary of the Treasury or his delegate, the provisions of this section shall be modified to coordinate such provisions with the other information requirements of the Internal Revenue Code of 1954.

(d) CHARACTERIZATION BY PARTIES.—For purposes of this section, any determination as to whether a person is a lessor or lessee or property is leased shall be made on the basis of the characterization of such person or property under the agreement described in subsection (a).

The SPEAKER pro tempore. Is a second demanded?

Mr. CONABLE. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Illinois (Mr. ROSTENKOWSKI) will be recognized for 20 minutes, and the gentleman from New York (Mr. CONABLE) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Illinois (Mr. ROSTENKOWSKI).

GENERAL LEAVE

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill, H.R. 4717, presently under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 4717 has three provisions. These provisions deal with: First, a 1-year deferral of the effective date for LIFO inventory recapture; second, the net operating loss treatment of the Federal National Mortgage Association; and third, the filing of an information return regarding the safe harbor leasing provisions. Let me describe each of these provisions.

LIFO INVENTORY RECAPTURE EFFECTIVE DATE (SECTION 1)

In the Crude Oil Windfall Profit Tax Act of 1980, Congress included a provision which required that a corporation which distributes its LIFO inventory in a partial or complete liquidation must recognize as ordinary income its LIFO reserve, the excess of the inventory's FIFO basis over its LIFO basis. Also, a corporation that sells its LIFO inventory in the course of a 12-month liquidation must recognize the inventory's LIFO reserve as ordinary income. The provision did not require the recognition of the LIFO reserve on corporate liquidations where the adjusted basis of the LIFO

inventory in the hands of the acquiring corporation is carried over from the liquidating corporation.

Congress believed that the LIFO reserve of a corporation's inventory should be subject to tax upon a corporate liquidation unless the LIFO reserve is preserved in the corporation's inventory by virtue of a carryover basis. Otherwise, corporations could convert the tax deferral provided by LIFO into an outright exclusion from tax.

This provision was made effective for distributions and dispositions which are made pursuant to plans of liquidation adopted after December 31, 1981. The delayed effective date was set to allow time for congressional hearings on the effect of the provision. These hearings have not, as yet, been held. Therefore, Mr. Speaker, the Committee on Ways and Means believes that the effective date of these provisions should be delayed for 1 additional year, to December 31, 1982, in order to allow the committee time to hold such hearings to review the merits and the impact of the provision.

NET OPERATING LOSS TREATMENT OF THE FEDERAL NATIONAL MORTGAGE ASSOCIATION (SECTION 2)

The second provision of the bill amends the present treatment of net operating losses in the case of the Federal National Mortgage Association.

Under present law, taxpayers generally may carry back a net operating loss for 3 years and carry forward an NOL for 15 years. Banks and certain other financial institutions are permitted a special 10-year NOL carryover. FNMA is not eligible for the special 10-year NOL carryback, and thus must use the 3-year carryback and 15-year carryover rule.

FNMA typically provides a secondary market for mortgages by borrowing on a short-term basis and investing in long-term mortgages. In this respect, FNMA operates similarly to certain financial institutions which are eligible for the 10-year carryback of net operating losses.

Mr. Speaker, the committee bill provides a 10-year carryback and a 5-year carryover for net operating losses of FNMA. Thus, the carryback period will be lengthened by 7 years and the carryover period will be shortened by 10 years. This treatment is to apply only to that portion of a net operating loss of FNMA that is not derived from its net losses from sales of mortgages, securities, and other evidences of indebtedness. For the portion of the NOL derived from the losses on mortgages, securities and other evidences of indebtedness, the present law 3-year carryback and 15-year carryforward will continue to apply. The bill is effective for NOL's incurred in taxable years beginning after December 31, 1981.

INFORMATION RETURN FOR SAFE HARBOR LEASING TRANSACTIONS (SECTION 3)

The third provision of the bill relates to information reporting requirements for certain leasing transactions.

The accelerated cost recovery system, enacted as part of the Economic Recovery Tax Act of 1981, contains a safe harbor leasing provision, which, in effect, permits corporations to buy and sell investment tax credits and depreciation deductions.

These provisions have been very controversial, to say the least. Their impact, operation, and cost have not been fully assessed. The tax-writing committees of Congress need a base of information upon which to make such an assessment.

Under the committee bill, an information return is required to be filed with the Internal Revenue Service in order for an agreement to qualify as a "lease" under the safe harbor leasing provisions. The return must contain certain specified information, much of which is the same as that required to be filed under temporary Treasury regulations interpreting these provisions. The bill requires that the return must be filed with the national office of the Internal Revenue Service not later than the 30th day after the date the agreement is executed, or January 31, 1982, whichever is later.

Mr. Speaker, the committee believes that these provisions should be adopted this year. I therefore urge my colleagues to vote to suspend the rules and pass the bill, H.R. 4717, as amended.

□ 1630

Mr. Speaker, I yield such time as he may consume to the gentleman from California (Mr. STARK).

Mr. STARK. Mr. Speaker, I wish to make a few comments on section 2 of H.R. 4717 that deals with the carryback of losses incurred by the Federal National Mortgage Association, commonly referred to as Fannie Mae. Under that provision of the bill, Fannie Mae would be allowed to carry back net operating losses over a 10-year period and to carry forward any net operating losses, not used up in the carryback process, for an additional 5 years. These are the carryback and carryforward rules that currently apply to depository institutions. The general rule under current law provides a 3-year carryback period for net operating losses and a 15-year carryforward.

Under an amendment that I sponsored which was agreed to without objection by the committee, any Fannie Mae losses attributable to the sale of mortgages, securities, or other evidences of indebtednesses will not be eligible for the more generous carryback provision. Let me explain the significance of this feature of the provision.

The revenue loss for this provision has been estimated by the staff of the Joint Committee on Taxation at $14 million in fiscal year 1983, offset by a $14 million gain in 1984. This estimate is based on the assumption that interest rates will decline and that Fannie Mae once again will become profitable. Some calender year 1982 losses will be carried back under the provision to permit a refund of $14 million of taxes paid in prior years. By 1983, it is assumed that Fannie Mae will be paying $14 million more in taxes than would be the case under current law because 1982 losses will not be carried forward to that year. Different economic assumptions would result in different estimates of the revenue loss from this provision. The Treasury Department estimate is for $35 million in fiscal year 1982 to be recaptured in subsequent years. If interest rates rise sharply and stay at high levels, the loss could be as much as $500 million and much of it would be a permanent revenue loss.

The estimating procedures that have been used assume that Fannie Mae will not sustain losses by selling mortgages or other securities from its portfolio at prices below book value. Such action on Fannie Mae's part would generate additional ordinary losses. The purpose of my amendment was to assure that such losses, since they would result from Fannie Mae's own actions rather than be the result of impersonal market forces, would not receive more favorable carryback treatment than they do under current law.

During testimony before the committee, David Maxwell, the Chairman of the Board and Chief Executive Officer of Fannie Mae, indicated that they had no intention of selling mortgages at a loss out of their $60 billion portfolio even though limited amounts of such sales had occurred in the past.

Specifically, Mr. David O. Maxwell, Chairman of the Board and CEO of FNMA stated to the Ways and Means Committee, and I quote from the transcript:

> I would like preliminarily to address myself to Mr. Downey's question which he asked of Secretary Chapoton concerning the possible sale of mortgage loans by Fannie Mae. . . .
>
> Fannie Mae has no intention of selling a volume of loans out of its portfolio. Our business plan includes no such arrangement. There are sound reasons, including the incurring of additional losses, why we would not want to do that

Mr. Speaker, because of this commitment—but to insure that future managers of Fannie Mae stand by that commitment, the committee adopted amendment to protect Treasury revenues against the possibility that, as a matter of corporate strategy, Fannie Mae might change its policy in the future and choose to recognize some

portfolio losses in order to gain a refund of prior year taxes.

Mr. CONABLE. Mr. Speaker, I yield myself 5 minutes.

Mr. CONABLE. Mr. Speaker, I support the suspension of rules and passage of H.R. 4717.

H.R. 4717 contains three important income tax provisions. First, it delays until January 1, 1983 the effective date of changes in the tax treatment of LIFO accounting which were enacted as part of the Crude Oil Windfall Profit Tax Act of 1980 and which are scheduled to take effect on January 1, 1982.

LIFO stands for the "last-in, first-out" method of accounting for inventory profits. It is advantageous to use LIFO accounting in inflationary times because it reduces what would otherwise be artificially high nominal profits. Part of LIFO accounting includes the establishment of a reserve account which represents deferred inventory profits.

Under the normal corporate tax rules no gain or loss is recognized in a liquidation where there is an exchange of assets for stock held by the shareholders. The Crude Oil Windfall Profit Tax Act provided that beginning January 1, 1982 that the corporate liquidation of LIFO inventory assets generally will be a taxable transaction. That is, the LIFO reserve will be taxed as ordinary income. H.R. 4717 postpones the effective date of this change until January 1, 1983.

There is concern that this change may have been premature. For example, some persons argue that LIFO reserves are a legitimate tax tool and should not be considered a tax "preference" item, subject to punitive-type treatment. The 1-year delay in the effective date will allow the Congress and the new Treasury Department an opportunity to review this issue.

The second feature of H.R. 4717 I would like to refer to more specifically that provides the Federal National Mortgage Association, known as Fannie Mae with a carryback and carryforward treatment for net operating losses comparable to that accorded other financial institutions with similar roles. In general, a business has a 3-year period over which to carryback net operating losses and a 15-year period over which to carryforward net operating losses. Financial institutions, however, have a 10-year carryback period and only a 5-year carryforward period.

The second section of H.R. 4717 extends to Fannie Mae the same net operating loss carryback and carryforward time period as applies to financial institutions. This change recognizes that Fannie Mae acts for all intents and purposes as a financial institution in maintaining a secondary market for home mortgages in our economy. Therefore, it is fitting to treat Fannie Mae by the same tax rules applicable to financial institutions.

As a matter of fact, Fannie Mae needs the additional liquidity resulting from the carryback provisions, the same as other financial institutions were accorded.

Now, the third section of H.R. 4717 establishes an information-reporting requirement with respect to the Safe Harbor Leasing provisions of the Economic Recovery Tax Act. Recently, Mr. Speaker, I spent some time in the well of the House on a special order trying to put some perspective on the Safe Harbor Leasing provisions. Many people felt that I was defending them at that time. The Safe Harbor Leasing provision has received considerable attention, along with critical commentary. The information reporting makes no judgment about the merits of the leasing tax provisions. The reporting will provide the basic information by which the administration and the Congress may monitor the operation of the new leasing rules. The type of information which must be reported includes the date the equipment is placed in service, the term of the lease, and the treatment of the accelerated depreciation and the investment tax credit. The reporting will provide us with a base line of data for evaluating the new leasing rules. It is entirely appropriate, Mr. Speaker, that we have this information and the Congress in the wise exercise of oversight should pass this provision, along with the other provisions of H.R. 4717 without delay.

Mr. Speaker, I yield 5 minutes to the distinguished gentleman from Ohio (Mr. GRADISON).

Mr. GRADISON. Mr. Speaker, I rise in support of H.R. 4717 to delay the effective date of LIFO recapture.

I have been working for sometime to simplify existing last-in, first-out (LIFO) inventory accounting procedures to encourage their use by small business. LIFO enables a business to pay less tax during inflationary periods when the goods they buy are more expensive. Boosting its operating capital increases a business' chance of surviving these inflationary periods.

The Economic Recovery Tax Act of 1931, included several simplifications designed to enable small business to use LIFO. Many of these simplifications were part of a package I introduced in May as H.R. 3606. That bill was based on recommendations made by Representative NOWAK's access to Capital Subcommittee. However, one provision, the repeal of the unwise and unstudied LIFO recapture proposal, was not included in the tax bill. Mr. JENKINS and I later introduced legislation to delay recapture because a thorough discussion of this complex proposal's repeal was impossible before the provision's scheduled enactment at the end of this year. The delay which we consider here today was approved in our committee by a large bipartisan majority of 29-6. Unless this delay is also approved by this body, this disastrous LIFO recapture proposal will become effective. I oppose LIFO recapture and support a 1-year delay to study its merits for the following reasons:

(1) First and foremost, is that this proposal has never been studied by either of the congressional tax writing committees. Its inclusion in the windfall profit tax bill in 1979 bypassed the House of Representatives entirely. This initiative was added to the windfall profit tax bill as a nongermane amendment on the Senate floor at the insistence of the Treasury Department. The conferees took the unusual step of delaying its enactment 2 years so it could be scrutinized through the proper hearing process. No hearings have yet been held. No business input was solicited in its creation. No accounting expertise was sought. The members of my committee and of this body were not even consulted. Indeed, this fundamental change in tax policy, directly bearing on thousands of domestic businesses and directing their business conduct in unknown directions, was researched, written, and promoted entirely by the Treasury Department with no public input. This precedent is dangerous. I do not think it is asking too much to allow community input and congressional understanding before passing any new tax law. A 1-year delay will allow this to occur.

Second, recapture discriminates unnecessarily against the LIFO method of accounting at a time when Congress and the administration have committed themselves to simplifying the system to encourage its use by small business. How many small businesses can be expected to convert to LIFO when they see such a system accumulates a huge tax debt due in full upon liquidation? This tax debt makes a business far less attractive to potential purchasers. It lowers the price a LIFO businessman can expect for his ongoing business. It penalizes him for using an accepted accounting system that merely sequences the flow of costs through a taxpayer's inventory. It restricts business flexibility and dictates policy abrogating the legislation tax goal of neutrality.

Finally, the Ways and Means Committee has commissioned a broad Treasury study of this specific question of how business inventories should be taxed. That study is not due until December 31, 1981. We cannot wisely legislate with no hearings and before Treasury's policy recommendations are know or studied.

In summary, Mr. Speaker, I believe the premature enactment of LIFO re-

capture would erode the authority of this Chamber. It would build a broad and inconsistent new precedent into the Tax Code and, to put it plainly, it is a sloppy way to legislate. I hope the distinguished Members of this body will join with our committee in supporting delay so that hearings can be held at the earliest possible moment.

Thank you Mr. Speaker.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield such time as he may consume to the gentleman from Georgia (Mr. JENKINS).

Mr. JENKINS. Mr. Speaker, I urge my colleagues to support H.R. 4717, which contains legislation I introduced to defer for 1 year the effective date of the LIFO recapture provision that was added to the Internal Revenue Code by section 403(c) of the Crude Oil Windfall Profit Tax Act of 1980.

This provision materially alters the rules relating to the treatment of inventories in corporate liquidations occurring after December 31, 1981. I would point out to my colleagues that there were no hearings held on the issue in either the House Ways and Means Committee or the Senate Finance Committee prior to enactment. Therefore, the matter did not receive the consideration which would normally be considered appropriate prior to enactment of such a broad tax policy change. The provision was adopted as a floor amendment in the Senate. Our conferees, evidently troubled by the lack of prior review, succeeded in delaying the effective date of the provision, in order that hearings could be held and an assessment made of the implications.

In the intervening months, we have enacted the Economic Recovery Tax Act of 1981. A provision of this act directs the Secretary of the Treasury to undertake a study of tax accounting methods for inventories, and LIFO accounting in particular. The study is due by December 31, 1982, which would coincide with the deferred effective date included in this legislation.

I think it is appropriate that we postpone this provision, in order that we might hold hearings, reflect on the matter, and make a fully informed judgment.

Mr. ROSTENKOWSKI. Mr. Speaker, I have no further requests for time.

Mr. CONABLE. Mr. Speaker, I have no further requests for time.

The SPEAKER. The question is on the motion offered by the gentleman from Illinois (Mr. ROSTENKOWSKI) that the House suspend the rules and pass the bill, H.R. 4717, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The title was amended so as to read: "A bill to delay for 1 year the effective date of certain provisions recognizing gain on certain dispositions of LIFO inventories, to make adjustments in the net operating loss carryback and carryforward rules for the Federal National Mortgage Association, and to require information returns with respect to safe harbor leases."

A motion to reconsider was laid on the table.

AMENDING RULES OF THE HOUSE OF REPRESENTATIVES TO INCREASE OUTSIDE EARNED INCOME

Mr. MURTHA. Mr. Speaker, I have at the desk a resolution and I ask for its immediate consideration.

The SPEAKER. The Clerk will report the resolution.

The Clerk read the resolution, as follows:

H. RES. 305

Resolved, That clause 1 of Rule XLVII of the Rules of the House of Representatives is amended by striking out "15" both times it appears therein and by inserting in lieu thereof "30".

SEC. 2. Clause 2 of Rule XLVII of the Rules of the House of Representatives is amended to read as follows:

"2. For purposes of clause 1, honoraria shall be attributable to the calendar year in which payment is received.".

SEC. 3. The amendments made by this resolution shall take effect on January 1, 1981.

Mr. MURTHA (during the reading). Mr. Speaker, I ask unanimous consent that the resolution be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The resolution was agreed to.

A motion to reconsider was laid on the table.

CRATER LAKE NATIONAL PARK BOUNDARY

Mr. SEIBERLING. Mr. Speaker, I move to suspend the rules and pass the Senate bill (S. 1119) to correct the boundary of Crater Lake National Park in the State of Oregon, and for other purposes, as amended.

The Clerk read as follows:

S. 1119

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the first section of the Act entitled, "An Act reserving from the public lands in the State of Oregon, as a public park for the benefit of the people of the United States, and for the protection and preservation of the game, fish, timber, and all other natural objects therein, a tract of land herein described, and so forth", approved May 22, 1902 (32 Stat. 202), as amended, is further amended by revising the second sentence thereof to read as follows: "The boundary of the park shall encompass the lands, waters, and interests therein within the area generally depicted on the map entitled, 'Crater Lake National Park, Oregon', numbered 106-80-001-A, and dated March 1981, which shall be on file and available for public inspection in the office of the National Park Service, Department of the Interior.".

(b) Lands, water, and interests therein excluded from the boundary of Crater Lake National Park by subsection (a) are hereby made a part of the Rogue River National Forest, and the boundary of such national forest is revised accordingly.

(c) The Secretary of the Interior is authorized and directed to promptly instigate studies and investigations as to the status and trends of change of the water quality of Crater Lake, and to immediately implement such actions as may be necessary to assure the retention of the lake's natural pristine water quality. Within two years of the effective date of this provision, and biennially thereafter for a period of ten years, the Secretary shall report the results of such studies and investigations, and any implementation actions instigated, to the appropriate committees of the Congress.

SEC. 2. (a) In accordance with section 3(c) of the Wilderness Act (78 Stat. 890, 892; 16 U.S.C. 1132(c)), certain lands in the Cumberland Island National Seashore, Georgia, which comprise about eight thousand eight hundred and forty acres, and which are depicted on the map entitled "Wilderness Plan, Cumberland Island National Seashore, Georgia", dated November 1981, and numbered 640-20038E, are hereby designated as wilderness and therefor, as components of the National Wilderness Preservation System. Certain other lands in the Seashore, which comprise about eleven thousand seven hundred and eighteen acres, and which are designated on such map as "Potential Wilderness", are, effective upon publication in the Federal Register of a notice by the Secretary of the Interior that all uses thereon prohibited by the Wilderness Act have ceased, designated wilderness. Such notice shall be published with respect to any tract within such eleven thousand seven hundred and eighteen acre area after the Secretary has determined that such uses have ceased on that tract. The map and a description of the boundaries of the areas designated by this section as wilderness shall be on file and available for public inspection in the office of the Director of the National Park Service, Department of the Interior, and in the office of the Superintendent of the Cumberland Island National Seashore.

(b) Within six months after the enactment of this Act, a map and a description of the boundaries of the Cumberland Island Wilderness shall be filed with the Energy and Natural Resources Committee of the United States Senate and with the Interior and Insular Affairs Committee of the United States House of Representatives. Such map and description shall have the same force and effect as if included in this Act, except that correction of clerical and typographical errors in such map and description may be made.

(c) The wilderness area designated by this section shall be known as the Cumberland Island Wilderness. Subject to valid existing rights, the wilderness area shall be administratered by the Secretary of the Interior in accordance with the applicable provisions of the Wilderness Act governing areas designated by that Act as wilderness areas, except that any reference in such provisions to the effective date of the Wilderness Act shall be deemed to be a reference to the effective date of this Act, and where appropriate, any reference in that Act to the Secre-

tary of Agriculture shall be deemed to be a reference to the Secretary of the Interior.

The SPEAKER. Pursuant to the rule, a second is not required on this motion.

The gentleman from Ohio (Mr. SEIBERLING) will be recognized for 20 minutes, and the gentleman from Alaska (Mr. YOUNG) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Ohio (Mr. SEIBERLING).

Mr. SEIBERLING. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, S. 1119 was authored by our distinguished colleague in the other body, the senior Senator from Oregon, Mr. HATFIELD. Section 1 proposes to delete 480 acres from the boundary of Crater Lake National Park, Oreg., and return this land to the jurisdiction of the U.S. Forest Service. Included within the 480 acres is an existing timber sale of 39 acres. Additionally, about 58 acres of the area was clearcut prior to inclusion in the park. The bill also requires a study of the water quality of Crater Lake. A companion bill was introduced in the House by our colleague from Oregon, DENNY SMITH.

Section 2 would designate certain lands as wilderness and potential wilderness additions at Cumberland Island National Seashore, Ga. About 8,840 acres would be designated wilderness and about 11,718 acres would be designated potential wilderness; most of which is intertidal area owned by the State of Georgia.

With regard to section 1; the act approved December 19, 1980 (94 Stat. 3255; Public Law 96-533), amended the basic act establishing Crater Lake National Park (32 Stat. 202) by transferring some 22,890 acres from adjacent national forests to Crater Lake National Park. The purpose of these additions was threefold: First, to include certain national forest lands which had been identified by the Forest Service for designation as wilderness; second, to improve the park boundary by more closely following topographical features of the land area; and third, to add to the park key natural features of the land area, including springs and geological formations.

The boundary adopted included a small parcel of timber on the west boundary which was scheduled to be cut under a contract entered into in 1976. Timber harvesting is not permitted within Crater Lake National Park. Accordingly, this legislation would remove from the park about 480 acres, of which 39 acres are scheduled to be harvested and 58 acres were cut during 1960-66. The new boundary line will conform the boundary to that which was intended by all parties when the 1980 legislation was considered. I wish to express my thanks and appreciation to our colleague DENNY SMITH for his assistance in perfecting this portion of the bill.

With regard to section 2; the act establishing the Cumberland Island National Seashore, established in 1972, called for a study of the seashore to determine if certain lands should be preserved as wilderness under the provisions of the Wilderness Act. The bill (H.R. 4713) to designate wilderness was introduced by our distinguished colleague Bo GINN on May 19, 1981. The legislation will preserve as wilderness, outstanding examples of southern coastal island ecology. Potential wilderness additions are included, to be designated wilderness upon completion of acquisition or expiration of authorized retained rights.

Hearings were held by the subcommittee on public lands and national parks on October 16, 1981 and the bill, as amended, was passed by the Committee on Interior and Insular Affairs by unanimous voice vote on December 10, 1981.

I commend the diligence, patience, and hard work of our colleague from Georgia, Bo GINN, in bringing about a sensitive and constructive long range solution to preserving the fragile coastal ecology at Cumberland Island National Seashore while maintaining open access to the outstanding historical features of the Seashore.

□ 1650

Mr. YOUNG of Alaska. Mr. Speaker, I yield whatever time he may consume to the gentleman from Oregon (Mr. SMITH).

Mr. SMITH of Oregon. Mr. Speaker, I rise to express my strong support for S. 1119, legislation which is intended to correct an oversight in drawing the boundary of Crater Lake National Park in my home State of Oregon.

In 1980, Congress enacted public Law 96-533, which revised the boundary of Crater Lake National Park. This act transferred approximately 22,890 acres from adjacent national forests to the boundary of the park. However, of this land included in the park boundaries, 480 acres were scheduled for timber harvesting, or were previously harvested, and were never intended to have been included in the park.

There were three reasons for the legislation to change the boundaries of the Crater Lake National Park. First, the additional acreage included certain national forest lands which had been identified by the Forest Service for designation as wilderness; second, to improve the park boundary by more closely following topographical features of the land area; and third, to add to the park key natural features of the land area, including springs and geological formations.

Personnel from the Park Service and Forest Service examined the area, and based on the above criteria, drew the boundary line. However, as I previously stated, it was discovered that the line included a small parcel of land on the west boundary of the park which was scheduled for a cut under a contract entered into in 1976. I have been informed that the field personnel of the National Park Service were not aware that there was an outstanding timber sale in the lands added to Crater Lake National Park. I do not believe it was the intent of Congress to prohibit the exercise of valid contractual rights to cut timber in this area. For this reason, I sponsored the House version of this legislation which would remove 480 acres from the park since the harvesting of timber is not allowed in national parks.

There is also a provision in the bill that directs the National Park Service to promptly initiate monitoring and study efforts to address the water clarity of Crater Lake. The water of Crater Lake has long been considered to be some of the deepest and purest water in the world. The lake itself constitutes the principal reason for Crater Lake having been set aside as a national park back in 1902. Yet according to the National Park Service, recent research data has indicated that the water clarity of Crater Lake has reduced 25 percent in the last 13 years. Not only is the water clarity reduction very dramatic, but it also has taken place over a very short period of time. We do not know the cause and we do not know the trend and rate of change. Perhaps the cause is natural; perhaps it is not. But this is a potentially serious matter and prompt research action should be taken.

I urge my colleagues to support passage of this legislation which will rectify a boundary situation which was never intended to exist, as well as emphasize the necessity for a study of the water clarity of Crater Lake in Oregon.

Mr. YOUNG of Alaska. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, as the ranking Republican member of the Subcommittee on Public Lands and National Parks, I support passage of the bill now under consideration, S. 1119, which deals with two existing units of our national park system—Crater Lake National Park in Oregon, and Cumberland Island National Seashore in Georgia. To my knowledge, this bill is totally noncontroversial.

I want to particularly commend two of my colleagues on the committee for their leadership and work on this bill: Congressman SEIBERLING, the chairman of the subcommittee; and Congressman DENNY SMITH, in whose district Crater Lake National Park lies, who brought the Crater Lake bill itself before us and who further identified an important issue which the bill ad-

dresses in terms of the water quality study of Crater Lake itself.

Subsections 1(a) and 1(b) of this bill were already passed by the Senate and do nothing more than make a minor adjustment in the boundary of Crater Lake National Park. Thousands of acres were added to the park by the Congress last year from adjacent national forest lands. In the process, a small parcel of land was included in the park which had on it an unexercised timber contract. This bill deletes 480 acres within which that contract area was included and puts it back into Forest Service jurisdiction so that the timber contract can be exercised.

Subsection 1(c) of the bill requires the National Park Service to conduct investigations as to the status and trends of change of the water quality of Crater Lake. Crater Lake has long been known to constitute one of the deepest and most pure natural bodies of water in the world. Yet recent data indicate that water clarity has reduced 25 percent since 1968. Should this type of change be verified by further study, and correlate with unnatural processes or influences, immediate actions would need to be taken. This provision is intended to determine the present water quality condition, to document over time both magnitude and trend of any change, if any, and to direct that appropriate preventive or mitigative actions be taken, as necessary, to assure the retention of the natural pristine water quality of the lake. The study results are to be reported to the appropriate committees of the Congress—authorizing and appropriations—biennially for a 10-year period, so as to assure congressional and public knowledge with regard to this concern. The National Park Service will be responsible for all of the provisions of this subsection, but may be assisted by the technical expertise of others.

Mr. Speaker, section 2 of the bill deals with the designation of wilderness on certain lands within the Cumberland Island National Seashore in Georgia. This proposal has gone through a lengthy process of development and refinement, and I believe that all who have been involved with it are basically pleased with this final result. The bill constitutes a further step to reduce the impact and influence of man and his activities on the natural landscape of the island, and much of the acreage which is designated in this bill as potential wilderness will change to pure wilderness status with the passage of time and the disappearance of facilities and activities which are contrary to wilderness.

The National Park Service is expected to set an example by conducting all of its activities within the wilderness and potential wilderness areas in a manner as compatible to wilderness as is possible.

Mr. Speaker, I believe this is a good bill. It is simple and has also been noncontroversial, and I urge my colleagues to support it.

Mr. SEIBERLING. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER. The question is on the motion offered by the gentleman from Ohio (Mr. SEIBERLING) that the House suspend the rules and pass the Senate bill, S. 1119, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the Senate bill, as amended, was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks in the RECORD on the Senate bill just considered.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

AUTHORIZING SECRETARY OF ARMY TO ACQUIRE MINERAL INTERESTS OWNED BY OSAGE TRIBE OF INDIANS

Mr. UDALL. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 4926) to authorize the Secretary of the Army to acquire, by purchase or condemnation, such interest in oil, gas, coal, and other minerals owned or controlled by the Osage Tribe of Indians as are needed for Skiatook Lake, Okla., and for other purposes, as amended.

The Clerk read as follows:

H.R. 4926

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Congress finds that—

(1) Under the Act of June 28, 1906 (34 Stat. 539; Public Law 59-321), the Osage Tribal Council is vested with authority to administer the Osage mineral estate and that such authority includes authority to agree upon compensation to be paid the Osage Tribe of Indians for the subordination to be acquired under the terms of this Act.

(2) The Osage Tribal Council and the United States Corps of Engineers have agreed that $7,400,000 should be paid to the Osage Tribe of Indians as compensation for the acquisition of the subordination of the oil, gas, coal, and other minerals owned by the Osage Tribe as is necessary for the construction of works relating to the Skiatook Lake and the operation and maintenance of such lake.

SEC. 2. (a) Immediately upon the payment of $7,400,000, as provided in subsection (b) of this section, there hereby vests in the United States a subordination of such interests in oil, gas, coal, and other minerals owned by the Osage Tribe of Indians or held in trust by the United States for the benefit of the tribe as are necessary for the construction of works relating to Skiatook Lake and the operation and maintenance of such lake as a part of the project for improvement of the Verdigris River and tributaries, Oklahoma and Kansas, authorized by section 203 of the Flood Control Act of 1962 (76 Stat. 1180; Public Law 87-874). The nature of the subordination and the conditions and restrictions for oil and gas operations within the project area are set forth in the agreement between the Osage Tribe of Indians and the Secretary of the Army as set out in a resolution of the Osage Tribal Council numbered 25-651, dated December 3, 1981, together with appendices "A (Public Use Areas)"; "A (Reservoir Areas)"; "B-1"; and "B-2".

(b) The payment of $7,400,000 for such subordination shall be made by the Secretary of the Army to the Secretary of the Interior, on behalf of the Osage Tribe of Indians.

(c) The Secretary of the Army is authorized to acquire, by purchase or condemnation, a subordination of any interest in oil, gas, coal, and other minerals leased by, or on behalf of, the Osage Tribe of Indians as are necessary for the Skiatook Lake project referred to in subsection (a) of this section.

SEC. 3. The Secretary of the Interior, upon payment by the Secretary of the Army of the amount authorized by section 1 of this Act, is authorized to disburse such payment to the Osage Tribe of Indians in accordance with applicable law.

SEC. 4. Funds paid to the Osage Tribe of Indians under the provisions of this Act shall not be subject to the payment of attorney fees.

The SPEAKER. Pursuant to the rule, a second is not required on this motion.

The gentleman from Arizona (Mr. UDALL) will be recognized for 20 minutes, and the gentleman from Nebraska (Mr. BEREUTER) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Arizona (Mr. UDALL).

GENERAL LEAVE

Mr. UDALL. Mr. Speaker, I ask unanimous consent to revise and extend my own remarks, and that all Members may have 5 legislative days in which to extend their remarks on the bill under consideration.

The SPEAKER. Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. UDALL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 4926 provides that a subordination of the Osage Tribe's mineral interests will vest in the United States immediately upon payment of $7.4 million by the Secretary of the Army to the Secretary of the Interior on behalf of the Osage Tribe of Indians.

As written the bill embodies the terms of a negotiated agreement between the Osage Tribal Council and the U.S. Army Corps of Engineers.

The subordination of these mineral interests of the Osage Tribe of Indians

of Oklahoma is necessary in order to accommodate the construction of the Skiatook Dam, a component of a flood control project on the Verdigris River and its tributaries in Oklahoma and Kansas. As planned the Skiatook Lake will inundate approximately 12,000 acres, the subsurface interest of which is owned by the Osage Tribe. The Corps of Engineers has embarked upon construction of the Skiatook project as authorized by the act of October 23, 1962, as amended with the understanding that it could condemn or subordinate the tribe's mineral interests. However, a 1976 Federal court decision held that the treaty rights of an Indian tribe could not be abrogated by implication but only by express congressional language. The general condemnation authority of the corps was held not to be such express language. Since the mineral interests of the Osage Tribe is derived from various treaties and acts of Congress, the corps must get express congressional authority in order to acquire such mineral interests.

The present bill, as reported by the Committee on Interior and Insular Affairs accepts as a fair and reasonable value for the subordination of the tribe's mineral interests the $7.4 million price agreed to by the Osage Tribal Council and the Corps of Engineers and it is the committee's understanding that such funds are available to the Secretary of the Army under prior authorization and thus do not require enactment of additional budget authority.

Prompt action is needed on this bill because since the dam has already been built, flooding may occur on these 12,000 acres. Flooding of the area without this legislation will expose the United States to financial liability substantially greater than the $7.4 million due the Osage Tribe under the bill.

I urge passage of this bill.

The SPEAKER pro tempore (Mr. BINGHAM). The Chair recognizes the gentleman from Nebraska (Mr. BEREUTER).

Mr. BEREUTER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 4926.

The purpose of this bill is to solve an unexpected problem that is delaying completion of the Skiatook flood control project on the Verdigris River in eastern Oklahoma.

As the sponsors of the bill have pointed out, the problem is that without specific congressional authority, the Corps of Engineers cannot obtain the necessary subordination of mineral rights that are owned or controlled by the Osage Indian Tribe and which lie under 12,000 acres to be inundated by Skiatook Lake.

If those rights cannot be obtained very soon, the United States risks substantial liability if heavy winter rains cause flooding of producing oil and gas wells in the area behind Skiatook Dam.

H.R. 4926 will provide a quick solution to this problem. The bill embodies the terms of an agreement negotiated by the Osage Tribal Council and the Corps of Engineers. That agreement provides for the subordination of the tribe's mineral interests upon payment of $7.4 million by the Secretary of the Army to the Secretary of the Interior on behalf of the Osage Tribe. These funds are available to the Secretary of the Army under a separate authorization.

Mr. Speaker, I am aware of no significant opposition to this legislation. The Public Works Committee has waived its jurisdiction over it. The Oklahoma delegation, both in the House and Senate, is firmly in support. The Departments of the Army and Interior, with OMB approval, support enactment, and the Osage Tribal Council is in full support.

In view of the noncontroversial nature of the bill and the broad support for its enactment, I am pleased to join the chairman of my committee and the Oklahoma delegation in urging the House to suspend the rules and pass H.R. 4926 without delay.

Mr. Speaker, I reserve the balance of my time.

Mr. UDALL. Mr. Speaker, I yield 4 minutes to the gentleman from New Jersey (Mr. ROE).

Mr. ROE. Mr. Speaker, I rise in support of H.R. 4926, a bill to subordinate certain mineral interests of the Osage Tribe of Indians of Oklahoma to the purposes of the Skiatook Lake project of the U.S. Army Corps of Engineers.

This bill was referred jointly to the Committees on Interior and Insular Affairs and Public Works and Transportation. Its purpose is to allow the Skiatook Lake project to proceed to completion while providing a means for the resolution of questions associated with the mineral interests of the Osage Tribe. Under the Osage Allotment Act of 1906, the mineral rights to the reservation lands were retained in tribal ownership. These lands have been one of the Nation's major oil and gas fields. Some of these lands will be inundated by the Skiatook project. However, the Corps of Engineers condemnation authority is not sufficient to permit it to acquire the interests needed for the project. The 1976 court decision in United States against Winnebago Tribe of Nebraska held that the abrogation of a treaty right of an Indian tribe may not be done by Congress by implication, but must be accomplished by specific legislation. Hence the general acquisition authorities of the corps are not adequate.

H.R. 4926, as reported by the Committee on Interior and Insular Affairs, embodies the terms of an agreement between the Corps of Engineers and the Osage Tribal Council. It provides for the subordination of the tribe's mineral interests to take effect upon payment to the Secretary of the Interior, on behalf of the Osage Indian Tribe, of $7.4 million.

Mr. Speaker, our Committee on Public Works and Transportation has not had an opportunity to hold hearings and markup on this bill because of the press of other business, especially the Water Pollution Control Act amendments on which we just reached agreement with the Senate conferees. However, we have examined the reported bill carefully, and concur in the action taken by the Interior Committee. Because of the need for quick action on this legislation, we offer no objection to its consideration by the House.

I urge passage of the bill.

□ 1700

Mr. HAMMERSCHMIDT. Mr. Speaker, will the gentleman yield?

Mr. ROE. I yield to my good friend from Arkansas, the Honorable JOHN PAUL HAMMERSCHMIDT.

Mr. HAMMERSCHMIDT. Mr. Speaker, I rise in support of H.R. 4926. This bill provides legislative approval of an agreement which the Corps of Engineers and the Osage Tribal Council have reached regarding mineral rights on tribal lands and a Corps of Engineers project which is currently under construction.

This legislation has been reported by the Committee on Interior and Insular Affairs. While it is, of course, equally under the jurisdiction of the Committee on Public Works and Transportation, the committee has chosen not to conduct hearings and markup of the bill. We are able, in this specific case, to allow the legislation to go forward for several reasons:

Hearings have been held on this subject in both the House and Senate.

The leadership of the Interior Committee has kept the Committee on Public Works informed as to the progress of the legislation.

The Interior Committee leadership has specifically requested that the Public Works Committee support their action.

The Corps of Engineers appears to have no opposition to this legislation and will be able to proceed with their project after this legislation is enacted.

Funds will be available for the Corps of Engineers to transfer to the Department of the Interior for disbursement to the Osage Tribe.

Mr. Speaker, on behalf of Mr. CLAUSEN, the ranking member of the full committee and myself as ranking

member of the Water Resources Subcommittee, the minority has no objection to the consideration here today of H.R. 4926.

Mr. ROE. Mr. Speaker, I yield back the balance of my time.

Mr. UDALL. Mr. Speaker, I yield such time as he may consume to the gentleman from Oklahoma (Mr. SYNAR).

Mr. SYNAR. Mr. Speaker, I want to take just a moment to reemphasize the remarks of my colleague and good friend from Oklahoma (Mr. JONES).

The Skiatook project is located in my congressional district. During my 3 years in office, I have worked to balance the joint responsibilities of seeing this much needed project completed while, at the same time, respecting the legitimate claims and concerns of the members of the Osage Tribe. The legislation we have before us today achieves that goal.

As the gentleman from Oklahoma (Mr. JONES) has stated, this legislation is the product of extensive negotiation between the Osage Tribal Council and the Corps of Engineers. It is satisfactory to both parties—no small feat, I might add. It was hammered out in extended sessions between the representatives of the corps and the very able and knowledgeable legal counsel of the tribe. I can assure my colleagues that the Osage Tribal Council and their legal counsel can more than hold their own in negotiations with the Corps of Engineers or anyone else. They tell me that this legislation represents an equitable compensation for lost mineral rights and the fairest of guidelines for continued development of the oil and gas reserves in the area. I am confident that such is the case.

I would also emphasize the necessity for this project. The water needs of my district, and particularly of the area of the district in which Skiatook is located are significant. While we in eastern Oklahoma have been fortunate in that several manmade reservoirs have been constructed in previous years, recently completed studies by the corp point out that we will experience serious water problems in the 1990's. Skiatook Reservoir will assist in meeting the mid- and long-term water needs of the area.

I thank my colleagues for their attention and urge the passage of this legislation.

Mr. UDALL. Mr. Speaker, I yield such time as he may consume to the gentleman from Oklahoma (Mr. JONES).

Mr. JONES of Oklahoma. Mr. Speaker, I wish to thank the distinguished chairman and ranking Republican member of the Interior and Insular Affairs Committee as well as the chairman and ranking Republican of the Public Works and Transportation Committee for their support of this effort.

Mr. Speaker, I rise in support of H.R. 4926, a bill which Mr. SYNAR and I introduced that affects the northeast section of Oklahoma. This bill is needed to complete the project by the Corps of Engineers known as the Skiatook Lake.

The proposed lake is located in Osage County, Okla., one of the major oil and gas fields in the United States for nearly 100 years. The mineral rights in question are held in trust by the Secretary of Interior on behalf of the Osage Tribe of Oklahoma. The Justice Department has indicated that special considerations must be given to the corps project because it is located on trust lands. An earlier court ruling, U.S. against Winnebago, held that the United States was without authority to condemn lands acquired by the Winnebago Indian Treaty and held in trust by the United States without a clear expression of congressional intent to authorize the condemnation. The Justice Department's opinion is the U.S. against Winnebago would apply equally to the Osage Tribes situation. It is for this reason that we are seeking the enactment of this legislation.

This bill is the result of much hard work on the part of the Osage Tribal Council and the Corps of Engineers. At issue was whether the tribe would be able to continue to retrieve their vast mineral resources at the same time that the corps was able to provide flood protection and a water supply to this area of Oklahoma. The agreement that has been reached recognizes the importance of both the water and the mineral resources, and this is fortunate.

The Osage Tribe has agreed to subordinate their mineral rights to the surface rights of that land so that the Skiatook Lake can be completed. The corps will allow the tribe to continue their drilling operations in the area, and will compensate the Osage mineral estate for the subordination of their mineral rights. This compensation will amount to $7.4 million. Both parties reached this agreement prior to the introduction of the House bill, and both parties requested the introduction and passage of this legislation. Mr. SYNAR and I have been happy to assist the corps and the Osage Tribe in reaching their mutual goals.

I would like to personally thank the chairman of the House Interior Committee for his rapid action on this legislation. As I explained to the distinguished chairman, we need to move quickly on this bill since the corps project is over halfway completed and there is a risk that the area could be flooded. Such flooding could result in water pollution from the existing oil wells. Also, the corps would be liable for any damages to those wells. In order to avoid this unnecessary complication, expeditious action is needed.

In conjunction with the thanks to the chairman, I would also like to express my gratitude to the gentleman from Michigan (Mr. KILDEE), who chaired the hearings on the Osage bill, and to the gentleman from Montana (Mr. WILLIAMS), who brought the bill up in committee. Finally, I would like to thank the chairmen of the subcommittee and the full Committee on Public Works and Transportation, Mr. ROE and Mr. HOWARD, in conjunction with the ranking minority members. Mr. CLAUSEN and Mr. HAMMERSCHMIDT, for agreeing to defer to the work done by the Interior Committee on this legislation. The bill was jointly referred to their committee and I appreciate their accepting the work done by the Interior Committee as sufficient for their purposes. Lastly, I thank the leadership for agreeing to schedule this bill on the Suspension Calendar today.

This is a noncontroversial bill that will help northeastern Oklahoma, and I urge my colleagues to support the legislation.

● Mr. ROE. Mr. Speaker, I rise in support of the bill, H.R. 4926, which would subordinate legal interests of the Osage Tribe of Indians to the purposes of the Skiatook Lake project. The Skiatook project, being constructed by the Corps of Engineers, was authorized by the Flood Control Act of 1962. It will serve the purposes of flood control, water quality, water supply, recreation, and fish and wildlife management. The project will inundate lands in which the Osage Indian Tribe holds mineral rights deriving from the Osage Allotment Act of 1906. The lands in which the mineral rights were retained have been one of the Nation's major oil and gas fields.

Construction of the project necessitates the subordination of the mineral rights to the purposes of the project. Because the mineral rights were established by treaty, a specific act of Congress is required to accomplish the subordination.

This bill was referred jointly to the Committees on Interior and Insular Affairs, and Public Works and Transportation. Our committee has not yet had an opportunity to conduct formal hearings and markup on the bill. We have, however, reviewed the bill as reported by the Interior Committee with great care, and have no objection to it. In view of the urgent need to pass this legislation quickly, we interpose no objection to its consideration by the House.●

Mr. UDALL. Mr. Speaker, I yield back the balance of my time.

Mr. BEREUTER. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by

the gentleman from Arizona (Mr. UDALL) that the House suspend the rules and pass the bill, H.R. 4926, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

FLORIDA WILDERNESS ACT OF 1982

Mr. SEIBERLING. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 9) to designate components of the National Wilderness Preservation System in the State of Florida, as amended.

The Clerk read as follows:

H.R. 9

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Florida Wilderness Act of 1982".

WILDERNESS DESIGNATION

SECTION 1. In furtherance of the purposes of the Wilderness Act (16 U.S.C. 1131 et seq.) the following lands are hereby designated as wilderness, and therefore, as components of the National Wilderness Preservation System—

(1) certain lands in the Apalachicola National Forest, Florida, which comprise approximately one thousand one hundred and seventy acres, are generally depicted on a map entitled "Bradwell Bay Wilderness Addition—Proposed", dated February 1980, and which are hereby incorporated in and shall be deemed a part of, the Bradwell Bay Wilderness as designated by Public Law 93-622;

(2) certain lands in the Apalachicola National Forest, Florida, which comprise approximately seven thousand eight hundred acres, are generally depicted on a map entitled "Mud Swamp/New River Wilderness—Proposed", dated February 1980, and shall be known as the Mud Swamp/New River Wilderness;

(3) certain lands in the Osceola National Forest, Florida, which comprise approximately thirteen thousand six hundred acres, as generally depicted on a map entitled "Big Gum Swamp Wilderness—Proposed", dated March 1980, and shall be known as the Big Gum Swamp Wilderness;

(4) certain lands in the Ocala National Forest, Florida, which comprise approximately seven thousand seven hundred acres, as generally depicted on a map entitled "Alexander Springs & Billies Bay Wilderness—Proposed", dated March 1980, and shall be known as the Alexander Springs Wilderness: *Provided, however,* That the Secretary of Agriculture shall not prohibit existing motorboat use on Alexander Springs Creek;

(5) certain lands in the Ocala National Forest, Florida, which comprise approximately thirteen thousand two hundred and sixty acres, as generally depicted on a map entitled "Juniper Prairie Wilderness—Proposed", dated November 1981, and shall be known as the Juniper Prairie Wilderness;

(6) certain lands in the Ocala National Forest, Florida, which comprise approximately two thousand five hundred acres, as generally depicted on a map entitled "Little Lake George Wilderness—Proposed", dated March 1980, and shall be known as the Little Lake George Wilderness; and

(7) certain lands in the Ocala National Forest, Florida, which comprise approximately three thousand one hundred and twenty acres, as generally depicted on a map entitled "Alexander Springs and Billies Bay Wilderness—Proposed", dated March 1980, and shall be known as the Billies Bay Wilderness.

MAPS AND DESCRIPTIONS

SEC. 2. As soon as practicable after the provisions of section 1 of this Act take effect, the Secretary of Agriculture shall file maps and legal descriptions of each wilderness area designated by such section with the Committee on Interior and Insular Affairs and the Committee on Agriculture of the House of Representatives and the Committee on Energy and Natural Resources of the United States Senate, and each such map and legal description shall have the same force and effect as if included in this Act: *Provided, however,* That correction of clerical and typographical errors in such legal descriptions and maps may be made. Each such map and legal description shall be on file and available for public inspection in the office of the Chief, United States Forest Service, Department of Agriculture.

ADMINISTRATION OF WILDERNESS

SEC. 3. Subject to valid existing rights, each wilderness area designated by this Act shall be administered by the Secretary of Agriculture in accordance with the provisions of the Wilderness Act governing areas designated by that Act as wilderness: *Provided,* That any reference in such provisions to the effective date of the Wilderness Act shall be deemed to be a reference to the effective date of the relevant provisions of this Act.

SEC. 4. (a)(1) The Department of the Interior shall not issue phosphate leases in the Osecola National Forest, Florida, unless and until the President transmits a recommendation to the Congress that phosphate leasing be permitted in a specified area in the Osceola National Forest. Notice of such transmittal shall be published in the Federal Register. No recommendation of the President under this section may be transmitted to the Congress before ninety days after publication in the Federal Register of notice of his intention to submit such recommendation.

(2) FINDINGS.—A recommendation may be transmitted to the Congress under subsection (a) if the President finds that, based on the information available to him—

(i) there is a clear and present national need for the phosphate resulting from a domestic shortage of phosphate reserves, and

(ii) such national need outweighs the overall public values of the public lands involved, including the wilderness area designated in section 1(3) of this Act, and the temporary adverse environmental impacts which are likely to result from the activity.

(3) REPORT.—Together with his recommendation, the President shall submit to the Congress—

(i) a report setting forth in detail the relevant factual background and the reasons for his findings and recommendation;

(ii) a statement of the conditions and stipulations which would govern the activity; and

(iii) in any case in which an enivironmental impact statement is required under the National Environmental Policy Act of 1969, a statement which complies with the requirements of section 102(2)(C) of such Act. In the case of any recommendation for which an environmental impact statement is not required under section 102(2)(C) of the National Environmental Policy Act of 1969, the President may, if he deems it desirable, include such a statement in his transmittal to the Congress.

(4) DISAPPROVAL.—Any recommendation under this section shall take effect after ninety days of continuous session of Congress have passed since the date of receipt by both Houses of such recommendation unless a concurrent resolution disapproving such recommendation is approved. Any recommendation of the President submitted to Congress under subsection (a) shall be considered received by both Houses for purposes of this section on the first day on which both are in session occurring after such recommendation is submitted.

(5) NINETY-DAY COMPUTATION.—For purposes of this section—

(i) continuity of session of Congress is broken only by an adjournment sine die; and

(ii) the days on which either House is not in session because of an adjournment of more than three days to a day certain are excluded in the computation of the ninety-day calendar period.

(b) Within sixty days of the date of enactment of this Act, the Secretary of the Interior shall with respect to those individuals and companies (hereinafter referred to as "applicants") which have applied for phosphate preference right leases by applications numbered:

BLM-A-080538, 080539, 080540, 080544, 080545, 080546, 080547, 080548, 080549, 080093, 080297, 080298, 080299, 080801, 080975, 079903, 079904, 079905, 079906, 079907, 079956, 079957, 079958, 079959, 079992, 080004, 080027, 080028, 080048, 080067, 080069, 080070, 080632, 080634, 080638; ES-0980, 0981, 0982, 0983, 3181, and 3208,

determine if any of those individuals or companies have made a discovery or discoveries of valuable deposits in accordance with the regulations and policies in effect as of the date of the filing of the applications.

(c) Within one year of the date of enactment of this Act, the Secretary, in consultation with the applicants, shall determine the present fair maket value of leases which would be issued, absent the leasing prohibition of subsection (a) of this section, for those applications for which the Secretary has determined that a valuable deposit discovery or discoveries exist. The determination of fair market value shall be based on the replacement cost of the phosphate rock, taking into account comparable sales of phosphate rock in the Eastern United States, costs of compliance with all applicable Federal, State, and local laws and regulations including reclamation and restoration of the land (including wetlands) and other costs normally incurred in the mining of phosphate. In the event the Secretary and any or all of the applicants cannot agree on fair market value within one year of the date of enactment of this Act, the Secretary and the applicant or applicants concerned shall submit the determination of fair market value to binding arbitration by a board of arbitration conducted in accordance with the rules of the American Arbitration Association. Each member of the board of arbitration shall be selected through utilization of the procedures of the American Arbitration Association: Provided,

That such board shall consist of not less than three arbitrators unless the Secretary and the applicant mutually agree to a lesser number.

(d)(1) Within three months of the date of enactment of this Act the Secretary of the Interior shall enter into negotiations to, and shall within three years of the date of enactment of this Act, for those lease applications for which he has determined a valuable deposit discovery or discoveries exist, at the lease applicant's option:

(A) exchange the preference right lease applications for mineral leases subject to the provisions of the Mineral Leasing Act (30 U.S.C. 181 et seq., as amended) or the Mineral Leasing Act for Acquired Lands (30 U.S.C. 351, 352, 354, 359), but without competitive bidding, upon voluntary surrender and relinquishment by the lease applicant of such preference right lease applications and all right to lease the land covered by such applications; or

(B) extend to the applicant, its successors, and assigns a monetary credit to be used for bidding rights, bonus, rental, or royalty payments on any mineral lease competitively won or otherwise held by the applicant, its successors and assigns; or

(C) suspend the issuance of phosphate preference right leases until such time as the President pursuant to subsection (A) transmits a recommendation to the Congress permitting the Secretary to issue a phosphate preference right lease to such lease applicant and Congress has not acted within ninety days as provided in said subsection; or

(D) exercise any combination of the options enumerated in (A) through (C) above.

(2) All options authorized pursuant to this subsection shall be based on the fair market value of the prospective leases as determined through agreement or binding arbitration pursuant to subsection (c) of this section. In determining fair market value the Secretary may contract with an applicant to perform any necessary exploratory drilling or other evaluation work and may compensate the applicant therefor through payment of money or in any subsequent exchange under this Act. In lieu of the options in (A) through (D) above, the Secretary may, at his option only, offer to purchase the preference right to the applicant's lease.

(3) Any leases to be issued by the Secretary pursuant to subsection (d)(1)(A) of this section and the preference right lease applications to be exchanged therefor shall be of substantially equal value, or if they are not, the values may be equalized by the payment of money to the Secretary or the applicant so long as the payment does not exceed 25 per centum of the value of the leases to be issued by the Secretary. The Secretary shall try to reduce the amount of the payment of money to as small an amount as possible. Upon completion of each negotiation for an exchange, the Secretary shall notify the Committee on Interior and Insular Affairs of the United States House of Representatives and the Committee on Energy and Natural Resources of the United States Senate of the details of such negotiation and exchange.

(e) In the event the applicant selects the exchange option of subsection (d)(1)(A) and the applicant and the Secretary are unable to agree on an exchange within three years of the date of enactment of this Act (or at such time prior thereto mutually agreed upon by the Secretary and the applicant concerned), the exchange shall be submitted to binding arbitration and development of an exchange proposal by a board of arbitration in accordance with the rules of the American Arbitration Association. Each member of the board of arbitrators shall be selected through utilization of the procedures of the American Arbitration Association: *Provided*, That such board shall consist of not less than there are arbitrators, unless the Secretary and the applicant mutually agree to a lesser number. The decision of the board of arbitration shall be binding on the applicant and the Secretary, and the exchange proposed by the board shall be implemented by the applicant and the Secretary. At any point prior to the consummation of the exchange, the Secretary and the applicant may mutually agree to terminate the exchange in favor of the monetary credit or purchase options of subsection (d).

(f) The designation of the Big Gum Swamp wilderness shall in no way be construed to diminish, abate, impair, or modify any rights which may be vested in the applicants on the date of enactment of this Act for Federal phosphate preference right leases applicable to any lands within the Big Gum Swamp wilderness area designated by this Act. The fair market or exchange value of any such rights as may exist shall be determined without reference to any restrictions on access or use which may result from designation of the areas as wilderness.

(g) Notwithstanding any provision of this section to the contrary, the Secretary and the applicant may mutually agree to extend any of the time limitations in this section.

(h) Effective October 1, 1982 there are hereby authorized to be appropriated such sums as are necessary to carry out the purposes of this Act: *Provided*, That any payments made pursuant to this Act shall be effective only to such extent or in such amounts as are provided in advance in appropriation Acts: *Provided, however*, that until the necessary sums are appropriated or an exchange agreement is executed with the holder of a phosphate lease application specified in section 4(b), such legal rights as such holder may have under such application shall remain in full force and effect.

The SPEAKER pro tempore. Is a second demanded?

Mr. YOUNG of Alaska. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Ohio (Mr. SEIBERLING) will be recognized for 20 minutes, and the gentleman from Alaska (Mr. YOUNG) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Ohio (Mr. SEIBERLING).

Mr. SEIBERLING. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in strong support of H.R. 9, which implements the RARE II wilderness recommendations for Florida and bans phosphate leasing and mining in the Osceola National Forest unless and until the President, at some future date, determines mining is needed in the national interest based on a clear and present national need for the Osceola phosphate reserves. H.R. 9 is supported by the entire Florida delegation and including Senators CHILES and HAWKINS and the State administration as well.

The wilderness proposals of the bill contain some modifications of the original RARE II submissions in order to accommodate the concerns of the administration, the Florida delegation, and other interested parties. With one minor exception, they are the same as were contained in legislation which passed the House in the 96th Congress, and I believe they are noncontroversial.

The other major issue addressed by H.R. 9 deals with the question of phosphate leasing in the Osceola National Forest. Once again, H.R. 9 closely parallels last year's bill and bans the issuance of phosphate leases unless and until the President determines mining is in the national interest. This ban is supported by the entire Florida delegation, the State of Florida, and numerous units of State and local government. Just last month, the subcommittee received a letter from Gov. Bob Graham, accompanied by a lengthy and well-researched backup report, which reiterates the State's strong opposition to phosphate leasing in the Osceola. In a nutshell, the State's report stresses that phosphate mining reclamation techniques are still in their infancy and that the State adamantly opposes using the Osceola National Forest as the test area for this unproven technology.

I might add the Osceola phosphate reserve represents less than 1 percent of the entire phosphate reserves in the State of Florida. Of course, there are similar reserves in other States.

Briefly, H.R. 9 deals with the phosphate issue in the following manner:

First, as requested by the State and the congressional delegation, it bans the issuance of phosphate leases in that national forest.

However, it provides that if at some future time the President finds that there is a need for phosphate due to domestic shortage of reserves, leasing could take place in the Osceola unless Congress disapproves of the recommendation by concurrent resolution within 90 days. Quite frankly, this amendment was offered without advance notice and was not given the consideration I would have liked. However, in view of the huge reserves of phosphate on private lands in Florida as well as other States the provision is not likely to be utilized for many decades and was, therefore, accepted in the interest of getting the bill reported expeditiously to the House.

In these circumstances I do not consider this provision to be a model or a precedent for future legislation.

Second, the bill sets up a mechanism for determining the fair market value of leases which would be issued to the

four lease applicants if it were not for the leasing prohibition.

If the Secretary and the applicants run into difficulty in determining fair market value, the issue is referred to binding arbitration under procedures similar to those contained in last year's Superfund bill and the Amateur Sports Act of 1978. The American Arbitration Association, which would implement the arbitration, has reviewed H.R. 9 and has found it satisfactory as far as their role is concerned.

Third, using the fair market value determination, the bill directs the Secretary of the Interior to negotiate with the applicants to acquire their rights to a lease by exchange, bidding or royalty credits, suspension of lease issuance until some later date, or, at the Secretary's option only, by purchase. It is anticipated that the acquisition will probably occur through exchange, and the bill therefore provides for binding arbitration in the event exchange negotiations bog down.

Fourth, the bill is designated to end years of delay and uncertainty by reaching a fair market value determination of the applicant's rights within 1 year, with subsequent acquisition of those rights within 3 years.

Finally, the bill insures that the values of the applicants lease rights will in no way be diminished or impaired by the designation of the Big Gum Swamp Wilderness.

I would also like to comment on one other amendment. At the end of the bill there is a provision which was put in at the request of the Budget Committee which provides that any payments that are made pursuant to the act shall be effective only to such extent or in such amounts as are provided in advance in appropriation acts.

In addition, there is an additional amendment, additional proviso that says that until such sums are appropriated or an exchange agreement is executed with the holder of phosphate lease applications as specified in the bill, such legal rights as the holder may have under such application shall remain in full force and effect.

In offering this proviso, it should be clearly understood that the proviso in no way overrules the leasing ban imposed by subsection 4(a). The proviso merely insures that the lease applicant's right to be fairly compensated for such lease rights as they may possess will not be impaired or diminished by any delay or failure by the Congress to authorize appropriate amounts of compensation in a timely manner.

As is often the case, the bill represents a compromise which is not entirely satisfactory to some of the parties concerned. Some may believe that the bill is overly generous in recognizing the applicants' right to a lease and subsequent compensation. Such parties might prefer to challenge lease issuance on the ground that the applicants have not made a "valuable discovery" and are therefore not entitled to leases. While they may have a legitimate case, such a course would likely throw the issue into the courts for many years to come, resulting in continued uncertainty and controversy. I believe the uncertainty and controversy have gone on long enough, and that a legislated compromise is preferable.

On the other hand, I am aware that some of the companies and the administration believe reclamation technology is proven to the point where it may be appropriate to proceed with phosphate mining in the Osceola. This approach would essentially lead to using the Osceola National Forest as a guinea pig for developing reclamation technology. Its proponents also argue that it would create needed jobs, enhance revenue to local units of government, and produce badly needed phosphate. While I understand this position, I would simply note that those most directly affected by the proposed mining; namely, the State of Florida and local units of government, strongly oppose mining. If there is any doubt about this opposition, I would refer my colleagues to recent strongly worded editorials roundly condemning mining which appeared in virtually every major newspaper in Florida, and would note the October 29, 1981, letter we received from Governor Graham of Florida which is published in the committee report on H.R. 9. given this position, can there be any doubt that lease issuance would be followed by litigation and continued controversy?

I would also point out that recent studies conducted for phospate producers in Florida indicate that Florida's phosphate reserves are not dwindling and are sufficient to supply projected domestic needs and export demands for more than 100 years using existing mining technology. Indeed, according to industry estimates, the Osceola phosphate deposits comprise less than 1 percent of the known reserves in the State of Florida.

In closing, I would like to summarize by quoting from the statement filed by the counsel for one of the lease applicants, the Pittsburgh & Midway Coal Mining Co., during our recent hearing on H.R. 9, as I believe it frames the issue nicely:

> P & M does not believe that the issuance of these leases will solve all of the problems associated with these leases because the State of Florida and several local environmental groups are strongly opposed to mining in the Osceola National Forest. Therefore, P & M believes that legislation authorizing the exchange of these phosphate lease rights for other minerals, where the local public and environmental concerns are not so strong, is an equitable solution. Such legislation would compensate P & M for the long delays in the issuance of these leases and resolve the local social-political problems concerning mining in the Osceola National Forest.

I concur with Pittsburgh & Midway's assessment. I urge my colleagues to support this important legislation.

Mr. Speaker, I yield 5 minutes to the distinguished dean of the Florida delegation, our much-admired colleague from Florida (Mr. FUQUA).

□ 1710

Mr. FUQUA. Mr. Speaker, I rise in strong support for H.R. 9, the Florida Wilderness Act. I am the original sponsor of this bill and I am pleased to be able to report that H.R. 9 has now been cosponsored by the entire Florida House delegation. This bill is truly important to Florida.

Let me first discuss the wilderness designations in the act. H.R. 9 expands the Bradwell Bay Wilderness in the Apalachicola National Forest by 1,170 acres. Additionally, it creates the Mud Swamp/New River Wilderness Area to be composed of 7,800 acres. In the Osceola National Forest, it creates the Big Gum Swamp Wilderness to be composed of 13,600 acres.

This legislation also established four wilderness areas in the Ocala National Forest which lies in the congressional district ably represented by my friend and colleague, BILL CHAPPELL. I heartily endorse these provisions.

Of particular significance are the provisions of H.R. 9 terminating phosphate lease rights in the Osceola National Forest. This small, 157,000-acre forest is located in the Second Congressional District, which I represent. Presently four companies have lease rights to mine 52,000 acres of the forest—a full one-third of the entire national forest.

The Osceola is enjoyed for boating, camping, fishing, swimming, hiking, and hunting. All of these uses would have to be curtailed for 30 or more years while we mine the phosphate. There is a possibility, because of limitations in technology, that some of the uses would have to be abandoned entirely. All of this disturbance to mine phosphate we do not need.

Right now the United States exports 59 percent of the phosphate we mine. This simple fact should lay to rest any claims that we need the phosphate for national security reasons. We do not. We are exporting phosphate now and should continue to do same for the foreseeable future. Research reports indicate that we have proven phosphate reserves in Florida to last for at least another 200 years and, with improved extraction techniques, perhaps longer. It would be sheer folly to strip mine the Osceola.

Some have claimed that Florida does not want its national forest mined and wants to shift the burden of mining to other States. This is totally false. Florida is responsible for 80 percent of the

phosphate mined in the United States today and will continue to be the leader in phosphate well into the 21st century. Florida is not a mineral-rich State. We are, however, doing our fair share to meet national and international needs.

There is phosphate located in the Osceola National Forest and one day, in the distant future, we may need it. H.R. 9 provides a mechanism for swift congressional review of the need to mine and Congress could permit mining to proceed. Certainly, if it is ever needed, no one would logically oppose the mining. It does not make sense, however, to mine now or anytime soon.

As my colleagues know, I am not one to oppose mining when it is deemed to be in our best interest. I feel in this case, however, that we must stand up and be counted. We should not agree to mining our national forests for minerals we do not need. That is senseless mining—mining only for the sake of mining—and should be opposed. Mining should not be done at any cost. Our precious natural heritage is too important for that.

Mr. Speaker, this bill is important to me and the people I represent. The fact that the entire Florida delegation is cosponsoring this effort indicates how widespread the support for the bill is throughout Florida. H.R. 9 received bipartisan support in the Interior and Insular Affairs Committee and every effort has been made to accommodate concerns from members of both parties.

The time to act is now and I urge my colleagues to vote in favor of H.R. 9.

Mr. SEIBERLING. Mr. Speaker, I reserve the balance of my time.

Mr. YOUNG of Alaska. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, as the chairman of the Public Lands and National Parks Subcommittee has explained, H.R. 9 is essentially a straightforward bill. It establishes seven new wilderness areas on national forest land in the State of Florida totaling approximately 49,150 acres. The only controversial portion of the bill is the ban on phosphate leasing in the Osceola National Forest in Florida.

The committee did, however, approve an amendment allowing the President to recommend such leasing upon finding that a clear and present national need for phosphate exists resulting from a domestic shortage. He must submit his recommendation to Congress which would then have 90 days to disapprove his actions by passage of a concurrent resolution.

The minority members of the Interior Committee were concerned, Mr. Speaker, that we may otherwise be locking up permanently a valuable mineral deposit. With this provision, we wish to emphasize the need to retain some flexibility in making a final decision of when and how to develop this resource.

In information provided to us by the Department of the Interior, estimates of the amount of phosphate in the Osceola totals 100 million tons with a current market value of $3 billion. While in terms of simple percentages this may not seem like a significant amount, we do believe that it could be critical to the needs of our farmers at some future but not too distant time.

The decision not to mine at this time also involves a loss of revenue to the Federal Treasury as a result of lost mineral receipts. The Department estimates that at a production rate of 5 million tons a year over 20 years, mining this resource would return $98 million in constant 1981 dollars to the Federal Government over the life of the mine. The State of Florida and the local counties would also realize substantial revenues from their share of the receipts.

As pointed out by the gentleman from Idaho (Mr. CRAIG) in his minority views in the committee report, we should be careful in passing legislation of this type that we do not overlook the impact on the Treasury, and the precedent our actions are setting.

The fact that the lease applications will be exchanged for leases elsewhere does not alter this fact. If the valid preference rights are exchanged for other leases, possibly in the East but more likely in the West, the Federal Government, as well as the State in which the new leaseholds are located, will lose substantial bonus revenues. These losses will result because the leases received in exchange for the Florida phosphate leases will have to contain proven reserves and would normally be leased competitively with bonuses based on the fair market value of the resources. It is impossible to calculate the precise revenue loss that will result from issuing the exchange leases noncompetitively; however, it will be substantial. In addition to bonus moneys, there will also be a loss in revenues and jobs which would be generated in Florida and elsewhere if the phosphate resources were mined and developed.

For these reasons, the bill is not cost free even though it may appear that way on the surface. Our amendment, inserted in section 4(1)(a) of the bill, helps meet some of these concerns but not all of them. Given, however, willingness of the chairman to accept our amendment and the overwhelming support of the Florida delegation, I will not oppose the bill.

Thank you, Mr. Speaker.

Mr. MARLENEE. Mr. Speaker, will the gentleman yield?

Mr. YOUNG of Alaska. I yield to the gentleman from Montana.

Mr. MARLENEE. I thank the gentleman for yielding.

Mr. Speaker, I am not going to speak in opposition to this bill. However, I am going to voice a concern about the way it was referred and handled. It was referred to the Agriculture Committee. We did not have a sufficient amount of time to address the legislation, and I think that shows some gross neglect on the part of someone here. In the future, I would hope that we would have more time for consideration on issues such as this which dramatically could impact and affect agriculture in this country.

Mr. SEIBERLING. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. YOUNG of Alaska. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Ohio (Mr. SEIBERLING) that the House suspend the rules and pass the bill, H.R. 9, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

CZECHOSLOVAKIAN CLAIMS SETTLEMENT ACT OF 1981

Mr. BINGHAM. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 5125) to provide for the final settlement of certain claims against Czechoslovakia, and for other purposes, as amended.

The Clerk read as follows:

H.R. 5125

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Czechoslovakian Claims Settlement Act of 1981".

APPROVAL OF AGREEMENT

SEC. 2. (a) The Congress hereby approves the Agreement between the Government of the United States of America and the Government of the Czechoslovak Socialist Republic on the Settlement of Certain Outstanding Claims and Financial Issues, initiated at Prague, Czechoslovakia on November 6, 1981.

(b) The President may, without further approval by the Congress, execute such technical revisions of the Agreement approved by subsection (a) of this section as in his judgment may from time to time be re-

quired to facilitate the implementation of that Agreement. Nothing in this subsection shall be construed to authorize any revision of that Agreement to reduce any amount to be paid by the Government of the Czechoslovak Socialist Republic to the United States Government under the Agreement, or to defer the payment of any such amount.

DEFINITIONS

SEC. 3. For the purposes of this Act—

(1) "Agreement" means the Agreement on the Settlement of Certain Outstanding Claims and Financial Issues approved by section 2(a) of this Act;

(2) "national of the United States" has the meaning given such term by section 401(1) of the International Claims Settlement Act of 1949;

(3) "Commission" means the Foreign Claims Settlement Commission of the United States;

(4) "Fund" means the Czechoslovakian Claims Fund established by section 402(b) of the International Claims Settlement Act of 1949;

(5) "Secretary" means the Secretary of the Treasury; and

(6) "property" means any property, right, or interest.

THE FUND

SEC. 4. (a) The Secretary shall cover into the Fund the amount paid by the Government of the Czechoslovak Socialist Republic in settlement and discharge of claims of nationals of the United States pursuant to article 1(1) of the Agreement, and shall deduct from that amount $500,000 for reimbursement to the United States Government for expenses incurred by the Department of the Treasury and the Commission in the administration of this Act and title IV of the International Claims Settlement Act of 1949. The amount so deducted shall be covered into the Treasury to the credit of miscellaneous receipts. The deduction required by this subsection shall be made in lieu of the deduction provided in section 402(e) of the International Claims Settlement Act of 1949.

(b) The Secretary shall establish three accounts in the Fund into which the amount covered into the Fund pursuant to subsection (a) of this section, less the deduction required by that subsection, shall be covered as follows:

(1) An account into which $72,500,000 shall be covered, to be available for payment in accordance with section 8 of this Act on account of awards certified pursuant to section 410 of the International Claims Settlement Act of 1949.

(2) An account into which $1,500,000 shall be covered, to be available for payment in accordance with section 8 of this Act on account of awards determined pursuant to section 5 of this Act.

(3) An account into which the remainder of amounts in the Fund shall be covered, to be available for payment in accordance with section 8 of this Act on account of awards determined pursuant to section 6 of this Act.

DETERMINATION OF CERTAIN CLAIMS

SEC. 5. (a) The Commission shall receive and determine, in accordance with applicable substantive law, including international law, the validity and amount of claims by nationals of the United States against the Government of the Czechoslovak Socialist Republic for losses resulting from the nationalization or other taking of property owned at the time by nationals of the United States, which nationalization or other taking occurred between August 8, 1958, and the date on which the Agreement enters into force. In making the determination with respect to the validity and amount of any such claim and the value of the property taken the Commission is authorized to accept the fair or proved value of such property as of the time when the property taken was last operated, used, managed, or controlled by the national or nationals of the United States asserting the claim, regardless of whether such time is prior to the actual date of nationalization or other taking by the Government of the Czechoslovak Socialist Republic.

(b) The Commission shall certify to the Secretary the amount of any award determined pursuant to subsection (a).

DETERMINATION OF OTHER CLAIMS

SEC. 6. (a)(1) The Congress finds that—

(A) in the case of certain persons holding claims against the Czechoslovakian Government who became nationals of the United States by February 26, 1948, the date on which the current Communist Government of Czechoslovakia assumed power, under generally accepted principles of international law the properties of those persons were taken by the Communist Government because the actions by the previous Government of Eduard Benes against those properties were accompanied by promises of compensation which the Communist Government repudiated; and

(B) while the Commission had the authority to deny those claims described in subparagraph (A) on the basis that the properties involved had been taken by the Benes Government while the claimants were not yet nationals of the United States, the effect of that denial is to withhold compensation to persons who have been United States citizens for many years and whose expropriated property has benefited the Communist Government of Czechoslovakia no less than properties expropriated more directly and clearly by the Communist Government.

(2)(A) It is therefore the purpose of this section, in accordance with the intent of the Congress in enacting title IV of the International Claims Settlement Act of 1949 and in the interests of equity, to make ex gratia payments to the claimants described in paragraph (1) of this subsection.

(B) The Congress reaffirms the principle and practice of the United States to seek compensation from foreign governments on behalf only of persons who were nationals of the United States at the time they sustained losses by the nationalization or other taking of their property by those foreign governments. In making payments under this section, the Congress does not establish any precedent for future claims payments.

(b) The Commission shall reopen and redetermine the validity and amount of any claim against the Government of Czechoslovakia which was filed with the Commission in accordance with the provisions of title IV of the International Claims Settlement Act of 1949, which was based on property found by the Commission to have been nationalized or taken by the Government of Czechoslovakia on or after January 1, 1945, and before February 26, 1948, and which was denied by the Commission because such property was not owned by a person who was a national of the United States on the date of such nationalization or taking. The provisions of section 405 of the International Claims Settlement Act of 1949 requiring that the property upon which a claim is based must have been owned by a national of the United States on the date of nationalization or other taking by the Government of Czechoslovakia shall be deemed to be met if such property was owned on such date by a person who became a national of the United States on or before February 26, 1948. The Commission shall certify to the Secretary the amount of any award determined pursuant to this subsection.

PROCEDURES

SEC. 7. (a) The provisions of sections 401, 403, 405, 406, 407, 408, 409, 414, 415, and 416 of the International Claims Settlement Act of 1949, to the extent that such provisions are not inconsistent with this Act, together with such regulations as the Commission may prescribe, shall apply with respect to any claim determined pursuant to section 5(a) of this Act or redetermined pursuant to section 6(b) of this Act.

(b) Not later than sixty days after the date of the enactment of this Act, the Commission shall establish and publish in the Federal Register a period of time within which claims described in section 5 of the Act must be filed with the Commission, and the date for the completion of the Commission's affairs in connection with the determination of those such claims and claims described in section 6 of this Act. Such filing period shall be not more than one year after the date of such publication in the Federal Register, and such completion date shall be not more than two years after the final date for the filing of claims under section 5. No person holding a claim to which section 6 of this Act applies shall be required to refile that claim before the Commission makes the redetermination required by that section.

PAYMENT OF AWARDS

SEC. 8. (a) As soon as practicable after the date of the enactment of this Act, the Secretary shall make payments from amounts in the account established pursuant to section 4(b)(1) of this Act on the unpaid balance of each award certified by the Commission pursuant to section 410 of the International Claims Settlement Act of 1949.

(b) As soon as practicable after the Commission has completed the certification of awards pursuant to section 5(b) of this Act, the Secretary shall make payments on account of each such award from the amounts in the account established pursuant to section 4(b)(2) of this Act.

(c) As soon as practicable after the Commission has completed the certification of awards pursuant to section 6(b) of this Act, the Secretary shall make payments on account of each such award from the amounts in the account established pursuant to section 4(b)(3) of this Act.

(d) In the event that—

(1) the amounts in the account established pursuant to section 4(b)(2) of this Act exceed the aggregate total of all awards certified by the Commission pursuant to section 5(b) of this Act, or

(2) the amounts in the account established pursuant to section 4(b)(3) of this Act exceed the aggregate total of all awards certified by the Commission pursuant to section 6(b) of this Act,

the Secretary shall cover such excess amounts into the account established pursuant to section 4(b)(1) of this Act. The Secretary shall make payments pursuant to subsection (a) of this section, from such excess amounts, on the unpaid balance of awards certified by the Commission pursuant to

section 410 of the International Claims Settlement Act of 1949.

(e) Payments under this section shall be made on the unpaid balance of each award which bear to such unpaid balance the same proportion as the total amount in the account in the Fund from which the payments are made bears to the aggregate unpaid balance of all awards payable from the account. Payments under this section, and applications for such payments shall be made in accordance with such regulations as the Secretary may prescribe.

(f) In the event that—

(1) the Secretary is unable, within three years after the date of the establishment of the account prescribed by section 4(b)(1) of this Act, to locate any person entitled to receive payment under this section on account of an award certified by the Commission pursuant to section 410 of the International Claims Settlement Act of 1949 or to locate any lawful heirs, successors, or legal representatives of that person, or if no valid application for payment is made by or on behalf of that person within six months after the Secretary has located that person or that person's heirs, successors, or legal representatives; or

(2) within six months after the Commission has completed the certification of awards pursuant to sections 5(b) and 6(b) of this Act, no valid application for payment is made by or on behalf of any person entitled to receive payment under this section on account of an award certified by the Commission pursuant to either such section,

the Secretary shall give notive by publication in the Federal Register and in such other publications as the Secretary may determine that, unless valid application for payment is made within sixty days after the date of such publication, that person's award under title IV of the International Claims Settlement Act of 1949 or this Act, as the case may be, and that person's right to receive payment on account of such award, shall lapse. Upon the expiration of such sixty-day period that person's award and right to receive payment shall lapse, and the amounts payable to that person shall be paid pro rata by the Secretary on account of all other awards under title IV of the International Claims Settlement Act of 1949 or this Act, as the case may be.

INVESTMENT OF FUNDS

SEC. 9. The Secretary shall invest and hold in separate accounts the amounts held respectively in the accounts established by section 4 of this Act. Such investment shall be in public debt securities with maturities suitable for the needs of the separate accounts and bearing interest at rates determined by the Secretary, taking into consideration the average market yield on outstanding marketable obligations of the United States of comparable maturities. The interest earned on the amounts in each account established by section 4 of this Act shall be used to make payments, in accordance with section 8(e) of this Act, on awards payable from that account.

IMPLEMENTATION OF AGREEMENT

SEC. 10. (a) If, within sixty days after the date of the enactment of this Act—

(1) the Government of the Czechoslovak Socialist Republic does not make the payments to the United States Government described in article 6(2) of the Agreement, or

(2) the Czechoslovak Government does not receive the gold provided in article 6(1) of the Agreement,

the provisions of this Act shall cease to be effective, and the provisions of the Agreement may not be implemented unless the Congress approves the Agreement after the end of that sixty-day period.

(b) The sixty-day period for implementation of the Agreement required by subsection (a) shall be extended by an additional period of thirty calendar days if, before the expiration of that sixty-day period, the Secretary of State certifies in writing that such extension is consistent with the purposes of this Act and reports that certification to the Speaker of the House of Representatives and to the Chairman of the Committee on Foreign Relations of the Senate, together with a detailed statement of the reasons for the extension. If at the end of that additional thirty-day period the events set forth in paragraphs (1) and (2) of subsection (a) have occurred, the provisions of this Act shall cease to be effective and the provisions of the Agreement may not be implemented unless the Congress approves the Agreement after the end of that thirty-day period or unless the Congress, before the expiration of that thirty-day period, authorizes by joint resolution a further extension of time for implementation of the Agreement. Such joint resolution shall be considered in the Senate in accordance with the provisions of section 601(b) of the International Security Assistance and Arms Export Control Act of 1976, and in the House of Representatives a motion to proceed to the consideration of such joint resolution after it has been reported by the appropriate committee shall be treated as highly privileged.

SOCIAL SECURITY AGREEMENT

SEC. 11. The Secretary of State shall conduct a detailed review of the exchange of letters between the United States and Czechoslovakia providing for reciprocal social security payments to residents of the two countries. Such review should include an examination of the extent to which Czechoslovakia is complying with the spirit and provisions of the letters, a comparison of the benefits being realized by residents of Czechoslovakia and of the United States under the letters, and an evaluation of the basis of differences in such benefits. The Secretary of State, in consultation with the Department of Health and Human Services, shall report to the Congress, not later than six months after the date of the enactment of this Act, the results of such review, together with any recommendations for legislation or changes in the agreement made by the letters that may be necessary to achieve greater comparability and equity of benefits for the residents of the two countries. Such report should include specific assessments of the feasibility, likely effects, and advisability of terminating United States social security payments to residents of Czechoslovakia in response to inequities and incomparabilities of benefits payments under the exchange of letters.

The SPEAKER pro tempore. Is a second demanded?

Mr. LAGOMARSINO. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from New York (Mr. BINGHAM) will be recognized for 20 minutes, and the gentleman from California (Mr. LAGOMARSINO) will be recognized for 20 minutes.

The Chair recognizes the gentleman from New York (Mr. BINGHAM).

Mr. BINGHAM. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, let me begin by saying that the purpose and effect of this bill (H.R. 5125) is to benefit Americans who have long been denied economic justice. It would benefit Americans who fled the Nazi invasion of their homeland—the Czechoslavakia—rather than submit to, or become accomplices of, that regime. They came to this country as refugees, and became citizens by February 1948, when the Communists took over Czechoslavakia. Some served in our Armed Forces in World War II and subsequent wars. They, of course, left their property behind, where it was eventially expropriated by the Communist regime either dieectly, or by Communist repudiation of promises of compensation made by previous governments.

These people have been waiting now more than 30 years to be compensated for that property. They are obviously elderly. Some are sick and poor.

This bill, at long last, will provide some measure of compensation for these Americans. It gives concongressional approval of an agreement reached by this administration under which Czechoslavakia will, among other things, pay $81.5 million up front—immmediately—in cash to compensate these Americans.

Now, this bill raises issues about Czechoslovakia and our current and most equitable way of distributing the claims funds. It raises issues of compensating the U.S. Government, and returning gold to Czechoslovakia. But as we discuss those issues, as we will this afternoon, the main thing in our minds should be the 30 years that these people have waited to be compensated for all their worldly possessions left behind and eventually taken without compensation.

The needs of these Americans is why the Committee on Foreign Affairs expedited action on this legislation; and why the administration wants this bill if at all possible in this session of Congress—before we go home for Christmas. We have put the bill on suspension because its purpose and fundamental effect is absolutely noncontroversial—namely the compensation of Americans who have waited so long to be paid a debt by a Communist government.

I want, if I may, at this point, to read excerpts from just one of many letters I have received which illustrates what I have been saying. I will not mention the lady's name, so as not to subject her to any unwanted publicity, but any Member can see this letter at the desk and verify its authenticity.

It is typical of many that have come in.

An 85-year-old lady writes that she hopes the Congress will be able to act. She obviously has not very much time to wait longer. She says, in part:

I am one of many or few people to whom the money belongs. It is many years since 1946 or 1948 when America took the gold over. I have received many announcements from Washington, but they are only promises.

And so on.

This lady and others like her are the reason this bill is before us today on suspension, and the committee is presenting it with the hope that the Senate will accept it and it will be enacted this week.

Now, as to the details, under the agreement that would be approved by this legislation, the United States would receive the following from Czechoslovakia: $81.5 million, as I have mentioned, for payment of U.S. private property claims; $8 million for some surplus army equipment Czechoslovakia bought in 1946, but never paid for; and $1 million in U.S. bank accounts that have been frozen in Czechoslovakia.

That comes to a total of $90.5 million. Czechoslovakia also agrees to negotiate a settlement of defaulted Czech bonds owned by Americans.

In return for that, and simultaneously, the United States will release to Czechoslovakia gold which that country claims and which is now valued at about $108 million.

The committee feels that is an acceptable agreement on several grounds.

First, it is a much better offer than the one made by Czechoslovakia in 1974, which the Congress rejected when it enacted section 408 of the Trade Act of 1974. The offer in 1974 was only $20 million to be paid over close to 10 years. As part of that agreement, Czechoslovakia would also have gotten some trade concessions from the United States, and I want to emphasize that there are no such trade benefits from this legislation—H.R. 5125. On the contrary, in negotiating the current agreement, the administration, in consultation with the Foreign Affairs Committee and the Ways and Means and Finance Committees, has made it absolutely clear that this settlement in no way commits us to proceeding to grant most-favored-nation status to Czechoslovakia, or any other trade concessions.

Second, this is an acceptable agreement because it is equivalent to the only alternative course that might be available to us to compensate the claimants—namely, liquidating that gold, investing the proceeds, and using the interest to pay the claimants. We have no authority under international law to take the gold, as some have suggested. In fact, it is controlled by us jointly with the British and French under an international agreement—the Tripartite Commission for the Restitution of Monetary Gold. But we might sell it and use interest on the amounts realized to pay the claimants. Indeed, I and Senator MOYNIHAN and others have sponsored legislation that would have done just that if an equivalent agreement had not been reached by negotiation. This agreement is just that—an equivalent; $81.5 million paid to the claimants now—immediately—is roughly equivalent to what they would receive in trickles over 10 years or more from interest earned on the Czech gold if we chose to liquidate that gold. Obviously for aging claimants who have already waited so long, there is every advantage to taking the $81.5 million now through enactment of this legislation.

The agreement approved by this legislation also clears the way for the release of some $130 million in Czech gold held by the United Kingdom. I would emphasize, however, that from that amount must be deducted the claims of British citizens against Czechoslovakia, which are now being negotiated.

The committee faced the greatest problems with this legislation in attempting to arrive at the most equitable distribution of the $81.5 million. After extensive hearings on earlier legislation in the 96th Congress, and further hearings in this Congress, and after listening to claimants and attorneys on all sides, as well as the Treasury and State Departments, and the Foreign Claims Settlement Commission, this is what we decided and what is in this bill—as amended by my motion suspending the rules:

First and foremost, $72.5 million for the U.S. claimants with claims certified by the Foreign Claims Settlement Commission under the 1958 claims review program established by Congress. That amount will pay them 100 percent of the principal amount of their claims, which is $64.1 million, plus $8.4 million in interest. Such a level of payment is virtually unprecedented in the history of U.S. claims settlements. Typically, we have had to settle for about 40 cents on the dollar. Admittedly, these people have waited longer than others, and will not receive all the interest to which they are entitled. But they are getting the most generous payment in U.S. claims history, and the fullest amount that it would be possible to extract from Czechoslovakia.

Second, as a matter of equity, $7 million in payments to a group the committee felt were denied certified claims on a legal technicality, but who fully meet Congress intent in enacting the 1958 claims program that everyone should be paid who lost property to the Communist government and who was a citizen of the United States when that government took over in 1948. This group—the so-called Benes claimants—were citizens by that time, and the committee feels strongly that they deserve to be paid something from this settlement, albeit much less in proportion to their claims than the certified claimants.

Finally, the $1.5 million is reserved for U.S. citizens whose property may have been taken after 1958—when the claims program was closed—and whose claims remain to be adjudicated.

Despite the unprecedented size of this settlement, there are still more claims than funds to pay them. The committee has done its very best to provide for the distribution of the funds in the fullest and fairest possible manner, considering the dictates both of law and equity. We believe we have arrived at a good distribution, and I will be glad to answer any questions that might arise about it.

In contrast to earlier agreements reached between the United States and Czechoslovakia which have been rejected by Congress as inadequate, this agreement is the product of very close and constant consultation between the negotiators in the executive branch and the concerned committees of the Congress. The negotiators took no major step without having satisfied themselves of congressional support, and gave foremost attention to the need to get any final agreement approved by Congress. I think we and the claimants owe a great debt of thanks, and vote of confidence and congratulations, to Ambassador Rozanne Ridgway for a suberb job of negotiating with the Czechs and of communicating and coordinating with the Congress. The increased value of the gold, and the specter of legislation to liquidate it in the near future to pay the claimants if a comparable and equitable negotiated settlement could not be reached, gave her the leverage she needed to reach this agreement. The credit, however, of having made the best of that leverage must go to her and her negotiating team.

Mr. Speaker, I would note that this legislation contains a deadline for implementation of the agreement once Congress has approved it. That deadline is 60 days from enactment of this legislation, which can be extended an additional 30 days by the Secretary of State. It is essential that there be no further delay in settling this situation after more than 30 years, and the committee feels this deadline is necessary to assure timely payment to the claimants.

Finally, Mr. Speaker, the bill directs the Secretary of State to investigate and report back to the Congress on possible inequities under an agreement between Czechoslovakia and the United States to honor the social security and pension rights of each other's

citizens. There appears to be a very serious problem of people in the United States failing to receive pension payments to which they are entitled from Czechoslovakia, while at the same time the United States pays out millions of dollars every month in social security benefits to U.S. citizens and Czech nationals living in Czechoslovakia. That problem could not be resolved in this legislation, but H.R. 5125 calls for a study and report to Congress which could serve as the basis for future remedial action, if feasible and necessary.

The version of this bill, H.R. 5125, that is at the desk, and that I have moved be passed under suspension of the rules, contains two changes in what was reported by the Committee on Foreign Affairs and what is printed and available on the floor. I have taken the liberty of making these changes after some discussion with the floor managers in the other body, which has already passed a similar bill. I make them in the shape, and with some expectation, that they will make it possible for the Senate to adopt this bill, once the House has passed it, without need for a conference, which could not be held until next year. In brief, the changes increase the amount reserved for payment to certified U.S. award holders by $3 million; and reduce the amount reserved for so-called Benes claimants by an identical amount; and restore section 408 of the Trade Act of 1974, which would have been repealed by H.R. 5125 as reported. These changes would bring this bill closer to that passed by the Senate. At the appropriate time, I will ask unanimous consent to take up the Senate bill (S. 1946) and substitute the House text.

Mr. Speaker, I urge that the House pass H.R. 5125.

□ 1720

Mr. FRENZEL. Mr. Speaker, will the gentleman yield?

Mr. BINGHAM. Mr. Speaker, I am glad to yield to the gentleman from Minnesota, who I know has a problem with the inclusion of the so-called Benes claimants.

Mr. FRENZEL. I thank the gentleman for yielding.

I thank the gentleman also for his description of the bill and the amendment. It is the amendment on which I seek clarification.

I understand that the gentleman increased the certified holders and decreased the Benes holders by 3 million each.

Mr. BINGHAM. That is right.

Mr. FRENZEL. And the gentleman is deleting the repeal of section 408 of the Trade Act.

The third item on the gentleman's explanation sheet is a certain technical amendment. I do not think I need to know the technical amendment, but I would like to ask the distinguished chairman if he has made any modifications in section 9, which is the section that has also been criticized by members of our committee and by certain members of the other body.

Mr. BINGHAM. The answer to the gentleman is "no."

Mr. FRENZEL. And the technical amendments are technical with no substance?

Mr. BINGHAM. That is correct.

Mr. FRENZEL. I thank the gentleman.

Mr. BINGHAM. Mr. Speaker, I yield such time as he may consume to the gentleman from Wisconsin (Mr. ZABLOCKI).

Mr. ZABLOCKI. Mr. Speaker, I rise in support of the bill before the House, H.R. 5125, which would approve the settlement of U.S. claims against Czechoslovakia.

First. I would like to commend the chairmen of the Subcommittees on Europe and the Middle East and International Economic Policy and Trade, Mr. BINGHAM and Mr. HAMILTON, and on the Republican side Mr. LAGOMARSINO and Mrs. FENWICK, for bringing to the floor an excellent bill which provides a reasonable solution to the various conflicting interests in this matter.

Second. I would like to thank the chairman of the Committee on Ways and Means, Mr. ROSTENKOWSKI, and of its Subcommittee on Trade, Mr. GIBBONS, and the minority leadership on the committee, for their cooperation in expediting consideration of this legislation. The Committee on Ways and Means, which has had a longstanding interest in this issue, agreed to waive sequential referral of H.R. 5125 in order that it would be brought to the House floor prior to adjournment. In recognition of the interest and jurisdiction of the Committee on Ways and Means in this issue, I would like to draw the Members' attention to the exchange of letters between myself and Chairman ROSTENKOWSKI which is found on pages 11 and 23 of the committee report.

In closing, let me emphasize that this legislation authorizes a settlement which benefits U.S. citizens first, and only secondarily Czechoslovakia to the extent that it resolves a longstanding irritant in United States-Czechoslovakian relations.

I urge the Members to support the bill.

Mr. BINGHAM. Mr. Speaker, I yield such time as he may consume to the gentleman from Indiana (Mr. HAMILTON).

Mr. HAMILTON. Mr. Speaker, I rise in support of H.R. 5125, a bill to provide for final settlement of claims by our citizens against the Government of Czechoslovakia.

It is a sure, sound and equitable way to redress the injustices suffered by many American claimants.

The bill implements an agreement between our Government and the Government of Czechoslovakia. Gold taken into custody by the Allied Forces will be returned to Czechoslovakia in exchange for a cash payment of $81.5 million. The bill, as amended in committee, divides the $81.5 million this way: $72.5 million for the certified award holders, these claimants filed by 1958 and were U.S. citizens when their property was seized; $7 million for the Benes group of claimants, these claimants had their property nationalized by the Benes government (1946–48) but they were not U.S. citizens at that time. However, they had become citizens before 1948 when the communist government took over and refused to recognize the Benes government's pledge to compensate these people; $1.5 million for the post-1958 claimants, those claimants who had their property seized after the 1958 claims filing deadline; $500,000 to the Treasury for administrative expenses. Let me state some of my reasons for supporting the legislation:

First, the proposed settlement is unprecedented in the history of U.S. claims agreements with Communist governments. U.S. nationals would receive more than 100 percent of the principal amount of their claims;

Second, the large cash settlement offers the elderly claimants a large sum of money now, while most are still alive and can enjoy it;

Third, settlement of the long pending claims issue by negotiations clears away a long-standing irritant in United States-Czechoslovakia relations, and may lead to an expansion of trade or other steps toward better relations. Without overcoming this obstacle to improved relations, the United States would have little prospect for any improvement of that relationship;

Fourth, the Congress can take a large share of credit for this very favorable settlement. A legislative initiative taken by Congress during our last session to seize the gold, invest it, and pay claimants with the proceeds seems to have provided the administration with the motivation and drive to secure the largest possible cash settlement payable as soon as possible for the award holders. This legislative initiative helped convince the Government of Czechoslovakia that Members of Congress were dead serious in wanting fair, immediate, and final compensation for the claimants. The two previous agreements were rejected as inadequate, a proposal in 1963 of $2 million and in 1974 of $20 million. The agreement we have this time is for $81.5 million, a considerably larger sum;

Fifth, the amendments that have been added by the committee are fair to the different categories of claimants. It seems to me that the bill strikes a balanced and equitable approach to the distribution of the settlement amount;

Sixth, the bill sets a time limit to implementation of the agreement. There is a 60-day deadline to insure expeditious implementation of the settlement. That 60-day period can only be extended for an additional 30 days if the Secretary of State certifies in writing to Congress that such an extension in time is needed. The committee felt that there cannot be any slippage at this point. The agreement must be implemented immediately so that our citizens who have waited 35 years can finally be compensated.

I commend the negotiating team from the Departments of State and Treasury under the capable and effective leadership of Ambassador Rozanne Ridgway. They have worked hard to achieve this settlement. They have consulted closely with Congress throughout the negotiations. The Congress can do its part now by acting quickly to approve the settlement thereby providing fair and prompt compensation to these people.

I urge my colleagues to support H.R. 5125.

Mr. BINGHAM. I thank the gentleman for his remarks and I would like to thank him also for his splendid support as chairman of the Subcommittee on Europe and the Middle East throughout the consideration of this bill. I join in his commendation for Ambassador Ridgway and those in the administration responsible for the negotiations, as I said in my opening remarks.

Mr. LAGOMARSINO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 5125, which gives congressional approval to an agreement reached by the Governments of the United States and Czechoslovakia to settle the outstanding claims between our two countries.

I know some of my colleagues may be concerned about the statement issued by OMB urging amendments to this bill to make it more acceptable. At the same time, the Department of State is urging prompt passage of this bill to avoid any chance that the Polish situation would disintegrate and Eastern Europe would be thrown into such turmoil that the Czech Government might renege on its agreement. I should also advise my colleagues that it is my understanding that the OMB statement is not to be construed as a veto message. Based on that understanding, I am compelled to support this legislation. I believe the lack of agreement on claims against Czechoslovakia has gone on for too long. Some claimants have already died, and others are well advanced in years. It would be unfair to have succeeded in negotiating an acceptable agreement and then reject it at the last moment.

Where previous agreements to settle Czech claims have fallen far short of a satisfactory solution, this one, I believe, addresses the concerns of the U.S. Government as well as the certified claimants. I had previously joined Chairman BINGHAM in sponsoring legislation which would have provided relief for Czech claimants if no agreement were reached in negotiations with the Czech Government. I believe the threat of that legislation was responsible, in part, for the agreement we have today. For the chairman's initiative in that regard, all those concerned with this issue owe him a debt of gratitude.

Another provision of this legislation includes authorization for the Foreign Claim Settlement Commission to adjudicate additional claims against Czechoslovakia resulting from expropriation of property during the Benes regime of 1945–48. As the chairman pointed out, the payment to the Benes claimants is to be made ex gratia and will not represent a precedent for other foreign claims settlement cases. There should be no misunderstanding on that point.

Also, the fact that the payments will be made to the certified claimants in one lump sum is a significant improvement over previous arrangements which would have allowed a payout over a period of years. I am very pleased that many aging recipients will finally be able to enjoy their just claims after so long a struggle.

I urge my colleagues to support H.R. 5125 and write an end to this saga of some 30-plus years.

□ 1730

Mr. Speaker, I yield 5 minutes to the gentleman from New York (Mr. GILMAN).

Mr. GILMAN. Mr. Speaker, I rise in support of H.R. 5125, the Czechoslovakian Claims Settlement Act of 1981.

This important legislation will give congressional approval to an agreement between the United States and Czechoslovakia reached on November 6 of this year to settle expropriation claims of U.S. citizens and for other purposes.

I wish to commend the efforts of my colleagues, the gentleman from New York (Mr. BINGHAM) and the gentleman from California (Mr. LAGOMARSINO), chairman and ranking minority member respectively of the Subcommittee on Economic Policy and Trade, for their leadership on this issue. As a member of the subcommittee and a cosponsor of some of the past legislation on this issue, I believe that it is important to recognize the significant role the subcommittee has played in resolving this difficult question.

Since the enactment of legislation in 1958, the U.S. Government has tried to resolve the various claims against Czechoslovakia for property that was taken without compensation from 1945 to 1958. Several Czechoslovakian settlement offers have been received over the years and rejected as grossly inadequate. The major leverage the United States has had in these negotiations is the possession of some 8.2 metric tons of gold taken from the Germans after World War II and claimed by Czechoslovakia. With the rise in gold prices and increasing pressure from Congress through legislation I have cosponsored to liquidate the gold to pay claims, the United States was finally able to reach the current settlement authorized by H.R. 5125.

I am somewhat disappointed that the agreement reached does not fully compensate with full principal and interest those citizens who have suffered the loss of their assets for as many as 37 years. Nonetheless, I believe when you consider that the last agreement which was negotiated in 1974 and rejected by the Congress was for less than one-fifth of this settlement, this is the best deal we can achieve. The settlement does provide an immediate payment of some $81.5 million and the unfreezing of certain official U.S. Government accounts. This represents a settlement in excess of 100 percent of the principal as opposed to past foreign settlements which averaged about 40 cents on the dollar.

The many U.S. citizens who have claims against Czechoslovakia have suffered greatly for many decades as their entire worth in some cases was taken from them. Most are now in their older years. Some have unfortunately died without ever seeing a resolution of this issue. I welcome this settlement so that those needy, elderly claimants and the heirs of those who have died will have an immediate return and use of their assets.

Accordingly, I urge my colleagues to join with me in support of H.R. 5125.

Mr. LAGOMARSINO. Mr. Speaker, I yield 5 minutes to the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Speaker, I oppose H.R. 5125, a bill providing for settlement of certain claims made against Czechoslovakia for the nationalization of property following World War II. As has been outlined by some of the previous speakers, the agreement implemented by this bill represents the largest reparations payment, as a percentage of principal, in the history of such claims settlements.

As a matter of fact, I want to join with others who have congratulated Ambassador Ridgeway for her extraor-

dinary prowess in negotiating, and being able to bring home, such a fine settlement.

However, the chairman of the Committee on Foreign Affairs, the distinguished gentleman from Wisconsin, pointed out that the Ways and Means Committee by letter did waive its jurisdiction. I think it is fair that the House hear the last paragraph in that letter. Mr. ROSTENKOWSKI writes:

In agreeing to waive referral, I want to point out that reimbursement to questionable claimants, ones that have been repeatedly rejected in this case and elsewhere under current claims procedures, sets an unfortunate precedent that may present difficulties in the future for the Ways and Means Committee, especially during its review of most favored nation treatment waivers.

That letter states the problem with this bill, Mr. Speaker. It is that the bill recognizes a class of claimants which is not allowed under the act of 1949, which is the governing act, nor under the Foreign Settlement Claims Commission decision. That Commission was established in 1958.

The so-called Benes claimants are a group who were Czechoslovakian citizens in 1945 or 1946 when the property was first seized. By 1948 they were American citizens. At that point the current Government of Czechoslovakia took power and took the assets. These people hired clever lawyers and have pressed their claim ever since and now they are being given status as claimants.

That would be all right if they were given status on their own if there were extra money to pay them. Unfortunately, the money this bill gives them must come: First, the taxpayers who are supposed to get 5 percent of the total claim, but are denied that under this bill; and second, from legitimate claimants who qualify under the act of 1949 and who were recognized by the Claims Settlement Commission of 1958.

Now, that is the gist of my argument with this bill. It is also fair to say that the administration opposes both section 6, the Benes claimants, and section 9. I understand that Members of the other body oppose these sections too. I hope they will be excised when this bill goes over to the Senate.

Although I am relieved that a longstanding claims dispute between the United States and Czechoslovakia finally has been resolved, I cannot support the implementing bill. My objection centers on the fact that the bill as reported goes beyond the negotiated settlement in a manner as unprecedented as the amount of payment.

Section 6 of the bill legitimizes a particular category of claimants who would otherwise not qualify to participate in the settlement, and provides for ex gratia payments to them out of the funds intended for properly certified claimants. This special treatment for a narrow category of claimants not only establishes a bad precedent for future claims settlements but also represents inequitable treatment for other claimants in similar circumstances who were required, and will be in the future, to meet the statutory criteria that has governed the description of claimants for more than 30 years.

The settlement which we are considering today was negotiated by the Department of State under guidelines set out in the International Claims Settlement Act of 1949. That statute requires that the property upon which a claim is based must have been owned by a national of the United States on the date of expropriation or other taking. The category of claimants covered by section 6 had property taken by the government of Eduard Benes between 1945 and 1948 with promises of compensation. None of these claimants were U.S. citizens at the time. At the time of the Communist takeover on February 26, 1948, the property transferred to the control of the new government. Meanwhile, some of these claimants had become U.S. citizens and now are seeking to redefine the date of expropriation. Others who became citizens accepted the requirements of the 1949 act and did not press their claims.

Mr. Speaker, in 1946 the Paris Reparations Agreement earmarked for Czechoslovakia over 18 tons of gold which had been looted by the Nazis from countries throughout Europe. This gold has been held in international escrow by a tripartite commission of the United States, the United Kingdom, and France. Until the pending agreement, settlement of outstanding U.S. claims has prevented the gold from being turned over to Czechoslovakia.

In the Trade Act of 1974, we denied permission for the administration to go through with a completed negotiation which they had begun on this case. The $8½ million in reparations is a significantly better settlement than that which was achieved in 1974; although in the meantime we may have lost a good deal in terms of trade and relationships with the Government of Czechoslovakia.

Comparable agreements have been reached with Poland for 39 percent; Romania, 37 percent; Yugoslavia, 36 percent; Hungary, 42 percent, and China, 41 percent.

In numerous instances with respect to these earlier agreements, claimants surfaced who could not meet the criteria of the 1949 act. Many of us have heard from constituents that claim they were U.S. citizens when their property was expropriated because later Communist governments, who gained control of the property, refused to pay compensation. Yet the guidelines of the 1949 act were followed, and these claimants were excluded from any settlement payments. Future claimants, of course, will once again be subject to the old citizenship requirements.

The Ways and Means Committee is especially concerned about the precedent this bill sets with respect to noncitizen claimants, because similar claimants come forward each year during the annual review of MFN agreements with nonmarket economics. They usually ask that MFN treatment for a particular country be withdrawn until their claims are satisfied. This causes a great deal of uncertainty for U.S. businesses in those countries and others who depended on the continued favored market treatment that MFN provides.

Here is a settlement that is over 100 percent which speaks, I think, volumes for the effective negotiation ability of Ambassador Ridgeway and her associates in the State Department.

Nevertheless, this bill, although it tries to follow the intent of that negotiation, fails and is deficient because it recognizes this unfair class of claimants which is not otherwise qualified.

Now, you may want to give some money to them, as the committee does, because they are old, or they are nice people, or they have seniority, or they are obese, or for some other reason. The committee, however, is not supposed to be a welfare department. It is supposed to recognize legitimate claims and deny unworthy ones. It is not supposed to give away other people's money according to its own whim.

In my judgment, the bill will give credence to a variety of groups of claimants, both based on citizenship and otherwise, who feel that they should get a special arrangement.

I think the precedent will be disruptive and, therefore, I urge my colleagues to defeat H.R. 5125.

Mr. LAGOMARSINO. Mr. Speaker, I yield 2 minutes to the gentleman from Illinois (Mr. DERWINSKI).

Mr. DERWINSKI. Mr. Speaker, I want the Members to know that I have studied this measure very carefully. I have prepared a very thoughtful, scholarly, historic analysis of this issue. Since I have permission to revise and extend, the Members can read it in tomorrow's RECORD.

Mr. Speaker, this measure was made necessary by the conclusion of negotiations which resulted in an agreement initialed in Prague on November 6. I must first raise the objection of an unnecessarily fast track on this bill.

I am reminded of the agreement with the Government of Hungary under which we returned the Crown of St. Stephen to that country. That arrangement, I believe, was less than satisfactory. More importantly, the administration at that time did not con-

sult with Hungarian American leaders and obtain their input on the issue.

My question, therefore, is whether Czechoslovak Americans were properly consulted with respect to the return to Czechoslovakia of the impounded gold and if their views and overall concerns were any part of the negotiations with the Czechoslovak authorities?

I believe that when the Czechoslovak gold was seized, a provision should have been made to use it to compensate those who suffered in Communist jails in Czechoslovakia. However, under this agreement we are considering now, we are limiting compensation to loss of nationalized property. I do not think this is the full compensation. However it is my hope that it may lead to an easing of the treatment of dissidents and others who do not accept the Communist line of the Czechoslovak Government.

These views are not intended as blind opposition, but to provide a cautionary note which I wish the House would take into consideration. I wish that we could have been given the time to study this agreement closely with the special constituencies involved so that we would not have a repeat, as I have noted, of the controversial decision when the Crown of St. Stephen was returned.

The most important point, nevertheless, is whether anything in this agreement would produce any internal liberalization in Czechoslovakia, less oppression, and better treatment of the citizens of that country.

□ 11740

Mr. LAGOMARSINO. Mr. Speaker, I yield such time as he may consume to the gentleman from Illinois (Mr. HYDE).

Mr. HYDE. Mr. Speaker, I object to this legislation, I understand the purpose. It says the legitimate claims of American citizens against the Czechoslovak Government. But I have many Czech refugees from the Communist tyranny in Czechoslovakia who object to that Government, which they insist, and I share that insistence, does not represent the people of Czechoslovakia, from receiving any of this money, this $100 million in gold. They say it is the people's money, the people of Czechoslovakia, not the Communist government which does not represent them, but is a satellite of the Soviet Union.

So for this reason, despite the fact that we have claimants who will profit to the extent that they will have their legitimate claims satisfied, I cannot support this legislation.

● Mr. BONKER. Mr. Speaker, I endorse H.R. 5125 and the statement made by my chairman, the gentleman from New York, concerning this bill. As a member of the subcommittee and a sponsor of the bill, I am pleased that the committee accepted my amendment to provide another $5 million for the principal certified claimants. This is the best we can do. We should act expeditiously, without any further delay, and pass this legislation. I also want to commend Roz Ridgway for a job well done.●

● Mr. OTTINGER. Mr. Speaker, as a Member of Congress with a long and active interest in settling the expropriation claims of U.S. citizens against Czechoslovakia, I rise in support of H.R. 5125, the Czechoslovakian Claims Settlement Act of 1981. I want to commend my good friend, the chairman of the Foreign Affairs Subcommittee on International Economic Policy and Trade Mr. BINGHAM, for his leadership on this issue. I also wish to express my thanks to Ambassador Ridgway who so ably handled the delicate negotiations with Prague which led to the agreement which Congress is being asked to approve today.

The issue of compensating U.S. nationals for property seized by the Czech Government has dragged on for over 30 years. I have communicated personally with many of the aging claimants and their families, and understand their frustration and disappointment that this matter has gone unresolved for so long. That is why I introduced H.R. 2352 in March 1981, which called for a fair negotiated settlement with the Czechs and required:

First, liquidation of the Czech gold located in the Federal Reserve Bank in New York;

Second, investment of the gold's proceeds; and

Third, repayment of the American awardholders from the investment interest. The bill would have returned the principle amount of the proceeds of the gold to Czechoslovakia only after all U.S. claimants were paid in full.

While my bill was pending in the Foreign Affairs Committee, negotiations resumed between our Government and Czechoslovakia in an effort to resolve these claims and other financial problems. Such an agreement was reached and initialed by both Governments in Prague on November 6, 1981.

This agreement, which is being submitted for our approval today, requires Czechoslovakia to make an immediate lump-sum payment of $81.5 million to compensate U.S. claimants for expropriated property; to unblock certain official U.S. Government accounts in Czechoslovakian banks; and to pay the United States certain sums owed under the terms of the 1946 United States-Czechoslovak Credit Agreement on the Purchase of Surplus Property of the U.S. Army.

I concur with the House Foreign Affairs Committee that this agreement "is the most generous settlement that can reasonably be obtained now or in the forseeable future, and one which compares favorably with any practicable alternative means of compensating U.S. claimants * * *." I am delighted with this agreement for several reasons:

First. This agreement is an enormous improvement over the terms of past agreements submitted to Congress.

Second. This negotiated settlement provides in excess of 100 percent of the principal amount of certified U.S. claims, and thus is virtually unprecedented in the history of U.S. claims negotiations.

Third. I am impressed by the immediacy of payment contained in this agreement. Czechoslovakia will pay the full $81.5 million in a single lump sum. The bill requires the United States and Czechoslovakia to exchange the gold for the lump-sum settlement within 60 days of the bill's enactment, thus providing for expeditious distribution to claimants.

I must say that I am disappointed that claimants will be paid only a fraction of the interest to which they are entitled. I agree, however, with the Foreign Affairs Committee's assessment that: "As a practical matter * * * there is no chance that Czechoslovakia would pay more than the $81.5 million they have offered in this settlement." I am concerned that rejecting this settlement on the basis of the limited interest payments it provides will only prolong negotiations for an unendurable period of time, particularly for those claimants who have been suffering without compensation for 30 years.

I am delighted that this matter is on the verge of being resolved. I hope my efforts and those of my colleagues to focus attention on the plight of thousands of elderly claimants and their families have helped contribute to this settlement. I urge my colleagues to support H.R. 5125, so that we may finally resolve this dispute and provide relief to these deserved awardholders.●

Mr. LAGOMARSINO. Mr. Speaker, I have no further requests for time.

Mr. BINGHAM. Mr. Speaker, I have no further requests for time.

The SPEAKER. The question is on the motion offered by the gentleman from New York (Mr. BINGHAM) that the House suspend the rules and pass the bill, H.R. 5125, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

Mr. BINGHAM. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 1946) to provide for the final settlement of certain claims against Czecho-

slovakia, and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1946

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Czechoslovakian Claims Settlement Act of 1981".

APPROVAL OF AGREEMENT

SEC. 2. (a) The agreement between the Government of the United States of America and the Government of the Czechoslovak Socialist Republic on the settlement of certain outstanding claims and financial issues, initialed at Prague on November 6, 1981, is hereby approved by the Congress.

(b) The President may, without further approval by the Congress, execute such technical revisions of the agreement approved by subsection (a) of this section as in his judgment may from time to time be required to facilitate its implementation. Nothing in this subsection shall be construed to authorize any revision of such agreement to reduce any amount to be paid by the Government of the Czechoslovak Socialist Republic to the United States Government thereunder, or to defer the payment thereof.

DEFINITIONS

SEC. 3. For the purposes of this Act—

(1) "agreement" means the agreement on the settlement of certain outstanding claims and financial issues approved by section 2(a) of this Act;

(2) "national of the United States" has the meaning given such term by section 401(1) of the International Claims Settlement Act of 1949;

(3) "Commission" means the Foreign Claims Settlement Commission of the United States;

(4) "Fund" means the Czechoslovakian Claims Fund established by section 402(b) of the International Claims Settlement Act of 1949; and

(5) "Secretary" means the Secretary of the Treasury.

THE FUND

SEC. 4. (a) The Secretary shall cover into the Fund the amount paid by the Government of the Czechoslovak Socialist Republic in settlement and discharge of claims of nationals of the United States pursuant to article 1(1) of the agreement, and shall deduct therefrom $500,000 for reimbursement to the United States Government for expenses incurred by the Department of the Treasury and the Commission in the administration of this Act and title IV of the International Claims Settlement Act of 1949. The amount so deducted shall be covered into the Treasury to the credit of miscellaneous receipts. The deduction required by this subsection shall be made in lieu of the deduction provided in section 402(e) of the International Claims Settlement Act of 1949.

(b) The Secretary shall establish two accounts in the Fund into which the amount covered into the Fund pursuant to subsection (a) of this section, less the deduction provided for in such subsection, shall be covered as follows:

(1) An account into which not less than $79,500,000 shall be covered, to be available for payment in accordance with section 7 of this Act on account of awards certified pursuant to section 410 of the International Claims Settlement Act of 1949.

(2) An account into which $1,500,000 shall be covered, to be available for payment in accordance with section 7 of this Act on account of awards certified pursuant to section 6(c) of this Act.

(c)(1) Until such time as the Secretary makes payments on awards pursuant to section 7 of this Act, the Secretary shall invest any amounts covered into the accounts established pursuant to subsection (b) of this section in public debt securities which produce maximum short-term interest on income.

(2)(A) The income from the investment pursuant to paragraph (1) of this subsection of amounts in the account established pursuant to subsection (b)(1) of this section shall be credited to and form part of that account and shall be available for payment in accordance with section 7(b) of this Act.

(b) The income from the investment pursuant to paragraph (1) of this subsection of amounts in the account established pursuant to subsection (b)(2) of this section shall be credited to and form part of such account, to be available for payment in accordance with section 7(c)(1) of this Act.

DETERMINATION OF CLAIMS

SEC. 5. The Commission is authorized to receive and determine, in accordance with applicable substantive law, including international law, the validity and amount of claims by nationals of the United States against the Government of the Czechoslovak Socialist Republic for losses resulting from the nationalization or other taking of property, including any rights or interests therein, owned at the time by nationals of the United States, which nationalization or other taking occurred between August 8, 1958, and the date on which the agreement enters into force. In making the determination with respect to the validity and amount of such claims and the value of properties, rights, or interests taken, the Commission is authorized to accept the fair or proved value of such property, right, or interest as of a time when the property or business interest taken was last operated, used, managed, or controlled by the national or nationals of the United States asserting a claim, regardless of whether such time is prior to the actual date of nationalization or other taking by the Czechoslovak Socialist Republic.

PROCEDURES AND CERTIFICATION OF CLAIMS

SEC. 6. (a) To the extent that they are not inconsistent with this Act, the provisions of sections 401, 403, 405, 406, 407, 408, 409, 414, 415, and 416 of the International Claims Settlement Act of 1949 shall be applicable with respect to claims determined by the Commission pursuant to section 5 of this Act, together with such regulations as the Commission may prescribe.

(b) Not later than sixty days after the date of the enactment of this Act, the Commission shall establish and publish in the Federal Register a period of time within which claims described in section 5 of this Act must be filed with the Commission, and the date for the completion of the Commission's affairs in connection with the determination of such claims. Such filing period shall not be greater than one year from the date of such publication in the Federal Register, and such completion date shall not be more than two years after the final date for the filing of such claims.

(c) The Commission shall certify to the Secretary any awards determined under section 5 of this Act, for payment on account by the Secretary in accordance with section 7 of this Act.

PAYMENTS OF AWARDS

SEC. 7. (a) In accordance with the provisions of this section, the Secretary shall make payments, out of the amounts available under section 4 of this Act, including accumulated interest, on account of awards certified by the Commission pursuant to section 410 of the International Claims Settlement Act of 1949 or pursuant to section 6(c) of this Act.

(b) As soon as practicable after the date of the enactment of this Act, the Secretary shall make pro rata payments from amounts in the account established pursuant to section 4(b)(1) of this Act, including accumulated interest, on the unpaid balance of each award certified by the Commission pursuant to section 410 of the International Claims Settlement Act of 1949.

(c)(1) As soon as practicable after the certification of any awards by the Commission pursuant to section 6(c) of this Act, the Secretary shall make payments on account of each such award from the amounts, including accumulated interest, in the account established pursuant to section 4(b)(2) of this Act.

(2) In the event that the amounts in the account established pursuant to section 4(b)(2) of this Act exceed the aggregate total of all awards certified by the Commission pursuant to section 6(c) of this Act, the Secretary shall cover such excess amounts into the account established pursuant to section 4(b)(1) of this Act, to be available for payments pursuant to subsection (b) of this section on the unpaid balance of awards certified by the Commission pursuant to section 410 of the International Claims Settlement Act of 1949.

(d) Payments under this section shall be made in accordance with section 413(a)(2) of the International Claims Settlement Act of 1949. Such payments, and applications therefor, shall be made in accordance with such regulations as the Secretary may prescribe.

(e) In the event that—

(1) the Secretary is unable, within three years after the date of the establishment of the account prescribed by section 4(b)(1) of this Act, to locate any of the persons entitled to receive payment under this section on account of awards certified by the Commission pursuant to section 410 of the International Claims Settlement Act of 1949 or their lawful heirs, successors, or legal representatives or, having been located, no valid application for payment is made by or on behalf of such persons within six months after their having been located; or

(2) no valid application for payment is made by or on behalf of any of the persons entitled to receive payment under this section on account of awards certified by the Commission pursuant to section 6(c) of this Act within six months after the completion by the Commission of the determination and certification of claims pursuant to sections 5 and 6 of this Act,

the Secretary shall give notice by publication in the Federal Register, and in such other publications as the Secretary may de-

termine, to the effect that, unless valid application for payment is made within sixty days of the date of such publication, such person's award pursuant to title IV of the International Claims Settlement Act of 1949 or this Act, as the case may be, and right to receive payment shall lapse, and upon the expiration of such sixty-day period such award and right to receive payment shall lapse, and the amounts payable to such person shall be paid pro rata on account of all other awards payable out of the same account as the lapsed award would have been paid pursuant to section 410 of title IV of the International Claims Settlement Act of 1949, or this Act, as the case may be.

IMPLEMENTATION OF AGREEMENT

SEC. 8. (a). If, within sixty days after the date of the enactment of this Act, the Government of the Czechoslovak Socialist Republic does not make the payment to the United States Government provided for in article 1 of the agreement, the provisions of this Act shall cease to be effective, and the provisions of the agreement may not be implemented unless the Congress approves the agreement after the end of that sixty-day period.

(b) The President shall have the authority to waive the provisions of this section for a period not to exceed thirty days: *Provided*, That he supplies to Congress, in writing, his reasons for so doing.

SOCIAL SECURITY AGREEMENT

SEC. 9. The Secretary of State shall conduct a detailed review of the exchange of letters between the United States and Czechoslovakia providing for reciprocal social security payments to residents of the two countries. Such review should include the extent to which Czechoslovakia is complying with the spirit and provisions of the letters, a comparison of the benefits being realized by residents of Czechoslovakia and of the United States under the letters, and an evaluation of the basis of differences in such benefits. The Secretary of State, in consultation with the Secretary of Health and Human Services, shall report to the Congress, not later than six months after the date of the enactment of this Act, the results of such review, together with any recommendations for legislation or changes in the agreement made by the letters that may be necessary to achieve greater comparability and equity of benefits for the residents of the two countries. Such report should include specific assessments of the feasibility, likely effects, and advisability of terminating United States social security payments to residents of Czechoslovakia in response to inequities and incomparabilities of benefits payments under the exchange of letters.

MOTION OFFERED BY MR. BINGHAM

Mr. BINGHAM. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BINGHAM moves to strike out all after the enacting clause of the Senate bill S. 1946, and to insert in lieu thereof the provisions contained in the bill, H.R. 5125, as passed by the House.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read a third time, and passed.

A motion to reconsider was laid on the table.

A similar House bill (H.R. 5125) was laid on the table.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 4331) entitled "An act to amend the Omnibus Reconciliation Act of 1981 to restore minimum benefits under the Social Security Act."

The message also announced that the Senate had passed a joint resolution of the following title, in which the concurrence of the House is requested:

S.J. Res. 136. Joint resolution to validate the effectiveness of a plan for the use or distribution of funds appropriated to pay a judgment awarded to the San Carlos Tribe of Arizona.

PERMISSION TO FILE CONFERENCE REPORT ON H.R. 4559, FOREIGN ASSISTANCE AND RELATED PROGRAMS APPROPRIATIONS, 1982

Mr. LONG of Maryland. Mr. Speaker, I ask unanimous consent that the managers may have until midnight tonight to file a conference report on the bill (H.R. 4559) making appropriations for foreign assistance and related programs for the fiscal year ending September 30, 1982, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Maryland?

There was no objection.

MAKING IN ORDER FOR SPEAKER TO RECOGNIZE MOTIONS FOR SUSPENSION OF THE RULES ON TOMORROW

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that it shall be in order tomorrow for the Speaker to recognize motions for suspension of the rules.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

AUTHORIZING SPEAKER TO DECLARE RECESSES OF THE HOUSE ON TOMORROW

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that it shall be in order tomorrow for the Speaker to declare recesses of the House, subject to the call of the Chair.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

REQUEST TO VACATE PROCEEDINGS WHEREBY HOUSE RESOLUTION 305 WAS AGREED TO

Mr. WALKER. Mr. Speaker, I ask unanimous consent to vacate proceedings whereby House Resolution 305 was agreed to.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

Mr. ROUSSELOT. Mr. Speaker, I object.

The SPEAKER. Objection is heard.

SECOND REGULAR SESSION OF NINETY-SEVENTH CONGRESS

Mr. FOLEY. Mr. Speaker, I send to the desk a joint resolution (H.J. Res. 377) and ask unanimous consent for its immediate consideration.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

There is no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 377

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the second regular session of the Ninety-seventh Congress shall begin at 12 o'clock meridian on Monday, January 25, 1982.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. For the information of Members, that means when the House adjourns sine die, it will be adjourning to reconvene on January 25, so the House may have the knowledge at this time.

The President will be addressing the Congress on the evening of January 26.

PERMISSION FOR COMMITTEE ON THE JUDICIARY TO FILE REPORTS ON H.R. 5106, H.R. 4353, H.R. 5116, AND H.R. 4935 DURING ADJOURNMENT

Mr. DANIELSON. I ask unanimous consent that the Committee on the Judiciary be permitted to file reports on the following bills during the adjournment:

H.R. 5106. To amend the Clayton Act to modify the amount of damages payable to foreign states and instrumentalities of foreign states which sue for violations of the antitrust laws;

H.R. 4353. To amend the Bankruptcy Act in regard to certain fees charged;

H.R. 5116. To amend the Bankruptcy Act in regard to certain fees charged; and

H.R. 4935. To amend title 11, United States Code, to correct technical amendments and to clarify and make substantive changes with respect to securities and commodities.

The minority has heretofore been consulted and agreed.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

EXTENDING DATE FOR REPORTING ON WARTIME RELOCATION AND INTERNMENT OF CIVILIANS

Mr. DANIELSON. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 5021) to extend the date for the submission to the Congress of the report of the Commission on Wartime Relocation and Internment of Civilians.

The Clerk read as follows:

H.R. 5021

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 4(c) of the Commission on Wartime Relocation and Internment of Civilians Act (94 Stat. 965; 50 U.S.C. app. 1981 note) is amended by striking out "the date which" and all that follows through "Act" and inserting in lieu thereof "December 31, 1982".

The SPEAKER. Pursuant to the rule, a second is not required on this motion.

The gentleman from California (Mr. DANIELSON) will be recognized for 20 minutes, and the gentleman from California (Mr. MOORHEAD) will be recognized for 20 minutes.

The Chair recognizes the gentleman from California (Mr. DANIELSON).

GENERAL LEAVE

Mr. DANIELSON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks with respect to this bill.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. DANIELSON. Mr. Speaker, the bill, H.R. 5021, would amend the law creating the Commission on Wartime Relocation and Internment of Civilians by providing that it shall submit its report of findings and recommendations to Congress not later than December 31, 1982.

The Commission on Wartime Relocation and Internment of Civilians was established pursuant to Public Law 96-317. The Commission is headed by Joan Z. Bernstein and is composed of nine members. It has compiled an extensive historical record concerning the detention of persons of Japanese ancestry during World War II, and over 700 witnesses appeared before the Commission at hearings across the country. The Commission now must analyze this information and testimony and arrive at its recommendations. At the subcommittee hearing held on the bill on November 20, 1981, the testimony emphasized that the additional time provided in this bill is necessary for the work and deliberation of the Commission which must be completed in order for it to report to Congress.

Section 4(c) of Public Law 96-317 now provides that the report of findings and recommendations to Congress is to be submitted no later than 1 year after the date of the first meeting of the Commission. Due to delays in naming members and staff of the Commission, the first meeting was not held until January 23, 1981. As I have stated, this bill would amend the law to provide that the final report to the Congress shall be submitted no later than December 31, 1982, and the committee found that this period of time is necessary to permit the Commission to adequately perform the duties imposed upon it by the Congress.

The Commission on Wartime Relocation and Internment of Civilians must review the history of the evacuation and relocation of Japanese and Japanese Americans from the west coast in 1942 and their detention in the relocation centers of the War Relocation Authority. It must also look at the historic record involving the evacuation of Aleuts from the Pribilof and some of the Aleutian Islands during World War II. At its hearings, it received testimony from those who were evacuated and relocated; from the surviving Government officials involved in these actions during the war; and from qualified professionals such as military historians, sociologists, and psychologists. On the basis of these materials, the Commission has the responsibility of reporting to Congress.

The Commission must review historical records on the evacuation and detention of persons of Japanese ancestry and these are voluminous. For instance, there are special collections at UCLA and University of California at Berkeley as well as collections at the National Archives and other Government depositories. This is a major task.

Gathering the facts concerning the evacuation of Aleuts from the Aleutian Islands during World War II has proven to be a difficult task. Locating Department of the Interior records after the passage of 35 years has been difficult and time consuming. The Commission's physical distance from Alaska only complicates this research task.

To date, a major part of the Commission's work has related to hearings across the country on the historical facts, and personal experiences of those civilians who were interned or detained by the Government during World War II. Hearings have been held in Washington, D.C., and in Chicago and New York, as well as in Anchorage, Alaska, and in the Aleutians. On the west coast, the hearings were held in Los Angeles, San Francisco, and Seattle. With these hearings almost at an end, the Commission has held hearings on 20 days and heard more than 700 witnesses. In addition. numerous lengthy submissions have been received from organized groups with particular arguments to make to the Commission.

All of the work of the Commission which I have outlined had to be done before the Commissioners could begin the most vital part of their work, that of analyzing the information gathered by the Commission and beginning the careful discussion and argument necessary to formulating the Commission's report and recommendations to Congress.

The additional time provided in this bill is absolutely required to enable the Commission to complete its work and formulate a report for the Congress.

Mr. MOORHEAD. Mr. Speaker, during the 96th Congress we enacted legislation providing for a Commission on Wartime Relocation and Internment of Civilians. The purpose of this legislation is to have the Commission review the Executive Order 9066 issued by President Roosevelt, which led to the confinement of Japanese Americans and permanent resident aliens of Japanese ancestry during World War II. More particularly, the Commission would study the facts and circumstances surrounding the Executive order, study its impact, and make recommendations on appropriate remedies.

Public Law 96-317 directed that the Commission file its report 1 year after its first full meeting. That meeting was held in February of 1981, which requires that a final report be filed by February 1982. So that a thorough going, quality report can be made on this important issue the Commission asks for deadline extension to December 31, 1982, approximately 10 months.

Since we do not want a "rush to judgment," I support this legislation. We have to give the Commission enough time to finish its work. Moreover, H.R. 5021 does not require any further funding to complete its mission.

I firmly believe that this needed extension of time is the wisest course of action we can take and ask my colleagues to vote for it.

Mr. McCLORY. Mr. Speaker, will the gentleman yield?

Mr. MOORHEAD. I yield to the gentleman from Illinois.

Mr. McCLORY. I thank the gentleman for yielding.

Mr. Speaker, in testimony before the Administrative Law Subcommittee Congressman DAN LUNGREN testified that the Commission on Wartime Relocation needed a 10-month extension to file its report, now due in February of 1982. Our subcommittee reported

this bill with the understanding that the Commission required no additional funds to go along with the extension of time.

Briefly, the mandate of the Commission is to study and review the facts and the impact of President Roosevelt's Executive Order 9066 which led to the relocation and internment of 120,000 Japanese Americans during the early part of World War II.

I support the work of the Commission as the best method available for providing fair and impartial alternatives to Congress so that the issue may be resolved. Our committee specifically rejected a comprehensive claims program as unrealistic—cost estimates have ranged as high as $3 billion.

If the Commission needs 10 more months to provide a practical and realistic solution to this most difficult problem, I support such an extension.

□ 1750

Mr. DANIELSON. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER. The question is on the motion offered by the gentleman from California (Mr. DANIELSON) that the House suspend the rules and pass the bill, H.R. 5021.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

FEDERAL TORT CLAIMS PROVISIONS

Mr. DANIELSON. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3799) to amend title 28, United States Code, to provide that the Federal tort claims provisions of that title are the exclusive remedy in medical malpractice actions and proceedings resulting from federally authorized National Guard training activities, and for other purposes, as amended.

H.R. 3799

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 2671 of title 28, United States Code, is amended—

(1) in the second paragraph, by inserting "members of the National Guard while engaged in training or duty under section 316, 502, 503, 504, or 505 of title 32," after "naval forces of the United States,"; and

(2) in the third paragraph by inserting "or a member of the National Guard as defined in section 101(3) of title 32" immediately after "United States".

SEC. 2. Section 1089(a) of title 10, United States Code, is amended by inserting "the National Guard while engaged in training or duty under section 316, 502, 503, 504, or 505 of title 32," after "armed forces,".

SEC. 3. Section 334 of title 32, United States Code, and the item relating to such section in the section analysis of chapter 3 of such title, are repealed.

SEC. 4. The amendments made by this Act and the repeal made by section 3 of this Act shall apply only with respect to claims arising on or after the date of the enactment of this Act.

The SPEAKER. Is a second demanded?

Mr. MOORHEAD. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER. The gentleman from California (Mr. DANIELSON) will be recognized for 20 minutes, and the gentleman from California (Mr. MOORHEAD) will be recognized for 20 minutes.

The Chair recognizes the gentleman from California (Mr. DANIELSON).

GENERAL LEAVE

Mr. DANIELSON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks with respect to this bill.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. DANIELSON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the bill, H.R. 3799, as amended, would extend the Federal tort claims provisions of title 28, United States Code, to acts or omissions of members of the National Guard, and would provide that the remedy under those provisions shall be exclusive in medical malpractice actions involving members of the National Guard.

The National Guard is a Reserve component of the Armed Forces. As such, it has been assigned important responsibilities as a Reserve force in the event it is called upon in an emergency. To assure our national defense, it must continuously engage in federally prescribed training and demonstrate a high degree of readiness. The Federal Government provides the funds to pay for training of Guard personnel and the equipment necessary for Guard operation and training. Except when federalized, the Guard is under the direct orders of State governments. For this reason, its activities have not been covered by the Tort Claims Act even though the Army and Air National Guard have similar roles in Defense planning and training as do the Army Reserve and the Air Force Reserve. This bill amends the tort claims provisions of title 28 to provide the National Guard the same coverage under the Tort Claims Act as now exists for the Armed Forces and its other Reserve components.

The bill, with the subcommittee amendments, provides for amendments to title 28 to accomplish this purpose and makes the necessary amendments to the provisions concerning medical personnel in title 10. This includes the repeal of section 334 of title 32 which presently indemnifies National Guard medical personnel for liability incident to Federal training activity.

In the 97th Congress, the Senate Armed Services Committee adopted an amendment to S. 815, the Department of Defense authorization for fiscal 1982, which established Federal liability for damages arising out of the acts or omissions of National Guard personnel during Federal training in the same manner and to the same extent that the United States would be liable in any other action brought against the United States under the Federal tort claims provisions of title 28. The Senate passed S. 815 as amended on May 14, 1981. The House-passed bill (H.R. 3519) did not include similar provisions, and the Senate receded to the House on the issue in conference. On July 23, 1981, the Senate Judiciary Subcommittee on Agency Administration held hearings on the National Guard tort provisions of S. 815, and on S. 267, a bill identical to S. 1858.

On June 4, 1981, Mr. Kastenmeier introduced H.R. 3799 for himself and Mr. Montgomery. The bill was referred jointly to the Committees on the Judiciary and Armed Services. On October 13, 1981, and October 29, 1981, the Subcommittee on Administrative Law and Governmental Relations of the House Judiciary Committee held hearings on H.R. 3799. On October 29, the subcommittee considered and adopted an amendment in the nature of a substitute for H.R. 3799 and favorably recommended the bill, as amended to the full Judiciary Committee. The Judiciary Committee reported H.R. 3799, as amended, to the House by unanimous voice vote on December 8, 1981, and the report was filed on December 10, 1981.

By letter dated November 3, 1981, to Hon. Peter W. Rodino, Jr., chairman of the House Judiciary Committee, Hon. Melvin Price, chairman of the House Armed Services Committee indicated the support of the Armed Services Committee for the action of the subcommittee. The letter further expressed the intent of the Armed Services Committee not to hold hearings on the subject, and to support the bill as reported by the Judiciary Committee on the floor. The complete text of the letter is reprinted in the appendix to the committee report.

Testimony and materials supplied to the subcommittee in the course of the hearings indicate that there is substantial risk of personal liability by National Guard personnel engaged in Federal training activity. National Guard representatives from every State except Arkansas and West Virginia reported to the National Guard Association on litigation against Na-

tional Guard personnel in their States since 1960. The information supplied to the subcommittee by the National Guard Association indicates that there are 956 known instances of claims against National Guard personnel since 1960. Of those, less than 10 percent, or 94 claims, were actionable against the Federal Government under the current Federal tort claims provisions of title 28. In only 339, or 35 percent of the cases, were claimants reported to have filed a claim under the National Guard Claims Act. A total of 859, or 89.85 percent, of reported claims involved motor vehicles. While information is not complete for the entire reporting period, all 48 reporting States included data for 1975 to present. During that period, 360 claims were reported to have been settled for an aggregate sum of $914,536.02. Available information from those States reporting indicates that since 1960, a total of 431 claims have been settled for an aggregated amount of $1,165,691.25.

Information supplied by the Army Claims Service indicates that between 1977 and October 1981, approximately 1,689 claims involving Army National Guard personnel have been filed under the National Guard Claims Act, and have been settled for the approximate aggregate amount of $2,807,239. Motor vehicle claims accounted for 89 percent of Army National Guard claims reported by the Army Claims Service from 1978 to October 1981. The Air Force Claims Service reports a total of 651 claims involving Air National Guard personnel from 1973 to October 1981. Of those 462 have been settled for an aggregated $3,397,555. The Air Force does not have a category for motor vehicle claims.

The statistical information before the committee indicates that a substantial number of claims arise every year as a result of federally prescribed National Guard training and that the preponderance of these claims involve motor vehicles. Moreover, as the information from the National Guard Association indicates, the individual National Guard member is subject to personal liability for damages arising out of Federal training activity.

The subcommittee also received testimony on the organizational structure and the role of the National Guard. The Department of Justice pointed out in its testimony relating to H.R. 3799, that article I, section 8, clause 16, of the Constitution, reserves to States the power to appoint officers of the militia and the authority to train the militia according to the discipline prescribed by Congress. Because the Federal Government does not command the National Guard during Federal training, the Department of Justice opposed the bill in that it would provide for liability on the part of the Federal Government for the acts or omissions of National Guard personnel during that training. However, as was pointed out in testimony before the subcommittee, the primary role of the modern National Guard is to provide a well-trained and integral Reserve Force for our Nation's defense, and the Federal Government does exercise a great deal of control over the Federal training activities of the National Guard.

The same Department of Defense regulations that govern Army and Air Force Reserve training activities govern the Federal training activities of the National Guard. Army and Air Force officers are assigned to each State National Guard organization. They conduct inspections, monitor and assist in training activities and approve promotion of National Guard personnel. In addition, they coordinate National Guard training with the needs of the Army and Air Force. The Federal Government not only prescribes the duration and type of National Guard training, it pays National Guard personnel for Federal training, it provides workman's compensation to National Guard personnel for injuries sustained during Federal training and it provides the equipment used by National Guard personnel during training. Thus, while actual command during Federal training activities is maintained by the States as a matter of law, as a matter of policy, it is appropriate that the Federal liability for damages arising out of the acts or omissions of National Guard personnel during Federal training be equivalent to Federal liability for the acts or omissions of Air Force and Army Reserve personnel which arise out of their identical training.

The bill, as amended by the subcommittee, merely amends the definition of the phrases "employee of the Government" and "acting within the scope of his office or employment" as they are used in the tort claims provisions of title 28 to include National Guard personnel engaged in Federal training. It is the intent of the committee that coverage under these provisions be the same for National Guard personnel as it is for members of the Army and Air Force Reserves. (See 43 Comp. Gen. 412, B-148324 (1963).) (inactive duty training extends from the time of first muster until the end of scheduled inactive duty training for the day and does not include travel to and from home and headquarters). This decision of the Comptroller General is reprinted in the appendix of the committee report. It is well settled that claims for injuries to servicemen that "arise out of or are in the course of activity incident to service" may not be brought under the Federal tort claims provisions of title 28, see, *Feres* v. *United States*, 340 U.S. 135, 71 S. Ct. 153, 95 L. Ed. 152 (1950). It is the intent of the committee that the rule of the *Feres* case apply to the acts or omissions of National Guard personnel.

The amendments made by this bill to the tort claims provisions of title 28, and specifically to the definitions contained in section 2671 of that title, only concern the application of the Federal tort claims provisions of that title. They do not change or modify the application of any other laws governing Federal employees such as the Ethics in Government Act of 1978, as amended.

The Congressional Budget Office, in its letter of December 10, 1981, advised the committee that it is expected that passage of this legislation will result in additional outlays of $681,000 in fiscal year 1982, $721,000 in fiscal year 1983, $757,000 in fiscal year 1984, $792,000 in fiscal year 1985, and $823,000 in fiscal year 1986. This estimate is based on figures provided by the U.S. Army and Air Force Claims Service as well as information from the States of New York and California.

Mr. Speaker, I reserve the balance of my time.

Mr. MOORHEAD. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, from the time of the American Revolution to the present, the National Guard has stood side by side with the regular forces in our country's defense. Today, 50 percent of deployable combat forces for the United States comes from the Army National Guard, while the Air National Guard provides 40 percent of deployable combat aircraft. This sums up the vital role that the Guard plays in national defense. I am particularly proud of the California National Guard. They serve not by their words but by their deeds and their commitment.

Except when called to special duty by the Governor of a State, the reservist and National Guard personnel are indistinguishable. Federal control over the Guard is complete. It includes pay, regulations, training, and equipment.

Recruitment, morale and readiness in the National Guard have suffered because Guard personnel are not classified as "Federal employees" even when engaged in Federal activity. Individual Guard personnel are therefore beyond the coverage of the Federal Tort Claims Act and open to personal suit in connection with any aspect of their training. Reservists are protected under the FTCA and can perform their duties without the thought of personal suits.

H.R. 3799 would remedy this by bringing the National Guard under the protection of the Federal Tort Claims Act. This action is long overdue and I urge my colleagues to vote for the bill.

Mr. McCLORY. Mr. Speaker, will the gentleman yield?

Mr. MOORHEAD. I yield to the gentleman from Illinois.

Mr. McCLORY. Mr. Speaker, authority to establish a National Guard is derived from the Constitution. Article I, section 8 empowers Congress to organize, arm, and discipline the State militia. Today the militia is composed of the Army and the Air National Guard. Every State in the Union is represented.

Since World War II the Guard has assumed more and more of a Federal role. Virtually all activity of the National Guard is federally prescribed and funded. The same Department of Defense regulations that govern the Army and Air Force Reserve training activities also govern the training activities of the National Guard. Regular Army and Air Force officers are assigned to each State National Guard organization. They conduct inspections, monitor and assist in training activities and approve the promotion of Guard personnel. Finally, the Federal Government pays for Federal training and provides workmen's compensation for injuries sustained during training in addition to providing equipment used during training. However, there is one exception, when a State Governor calls the Guard into duty for certain crises such as disaster assistance or law enforcement there is no Federal control.

As a matter of national defense then, the Guard and the reservist are indistinguishable. Unlike reservists, National Guard personnel are not classified as Federal employees. Therefore, they are not entitled to protection under the Federal Tort Claims Act. Where reservists are held harmless, Guard personnel are threatened with suits which could result in individual liability. Needless to say, this poses a threat to a vital segment of our national defense. H.R. 3799 would remove that threat.

This legislation would bring the Guard within the coverage of the Federal Tort Claims Act when engaged in Federal activities. The law would not apply when they were engaged in State affairs such as law enforcement or disaster assistance.

I strongly support H.R. 3799 and urge my colleagues to vote for it.

Mr. DANIELSON. Mr. Speaker, we are honored to have with us today the gentleman from Mississippi (Mr. MONTGOMERY), and I yield such time as he may consume to the gentleman.

Mr. MONTGOMERY. Mr. Speaker, I would like to commend the gentleman from California (Mr. DANIELSON), for bringing this important piece of legislation and also thank Mr. MOORHEAD on the minority side for his support of this bill.

Mr. Speaker, as a member of the Armed Services Committee to which H.R. 3799 was jointly referred, I rise in strong support of that bill, which would establish Federal coverage for National Guard personnel during Federal training in the same manner as other reservists are covered under similar circumstances.

Mr. Speaker, this legislation is long overdue as is indicated in the statistical information concerning the number of claims which arise each year as a result of federally prescribed National Guard training. In addition, testimony of record shows clearly that individual National Guard members are subject to personal liability for damages arising out of Federal training activity, which just should not be the case.

From the very beginning of the total-force concept, the Department of Defense has included the National Guard as a significant component of our Reserve Forces to be mobilized in time of national emergency or war. Indeed, the same Department of Defense regulations that govern Army and Air Force Reserve activities govern the Federal training activities of the National Guard. Active duty military personnel oversee National Guard training and integrate the training program with the requirements of the Army and Air Force. The U.S. Government provides the guardsmen with their pay checks for Federal training and, as just about everyone is aware, provides equipment used by the National Guard in training activities.

Mr. Speaker, while in Federal training the National Guard is clearly an arm of our military forces and should be covered under the provisions of the Federal Tort Claims Act, as would be an Army or Air Force reservist under exactly the same circumstances.

I wish to commend the distinguished chairman of the Judiciary Committee, as well as the chairman of the Subcommittee on Administrative Law and Government Relations, for their prompt action in reporting this legislation to the floor of the House. I joined in the introduction of H.R. 3799, the bill before us today, in the firm belief that in the interest of equality, coverage for liabilities incurred while undergoing Federal training should also embrace our National Guard personnel.

Mr. Speaker, I urge my colleagues to join in supporting this legislation as truly being in the best interest of our national security.

● Mr. PRICE. Mr. Speaker, I am happy to join the Judiciary Committee on the floor today in strong support of H.R. 3799, the National Guard Federal tort claims bill.

Although the legislation was jointly referred to the Judiciary Committee and the Armed Services Committee, we in the Armed Services Committee did not find it necessary to hold hearings or formally report on the legislation in view of the outstanding manner in which the Judiciary Subcommittee on Administrative Law and Government Relations conducted its review of the bill. It was clear that the subcommittee touched every base and protected the interests of the Armed Services Committee in reporting the legislation. In my letter to the distinguished chairman of the Judiciary Committee dated November 3, 1981, I expressed those views and wish to thank the committee for making that correspondence a part of the record.

Mr. Speaker, the excellent report on H.R. 3799 covers completely the need for enacting this bill. I wish only to emphasize that the National Guard is a reserve component warmly embraced by the Department of Defense in the total-force concept. The Guard is subject to call in time of national emergency or war. It trains annually under Federal guidance and receives its pay from the Federal payroll during such training. Thus, I strongly urge my colleagues to support this legislation which bring equality in liability coverage to all Reserve Forces.●

● Mr. KASTENMEIER. Mr. Speaker, I rise in support of H.R. 3799. As a cosponsor of this legislation along with the gentleman from Mississippi (Mr. MONTGOMERY), I am pleased that the bill has been reported favorably to this body.

This bill has been referred to as the National Guard Torts Claims Act, and its purpose is to extend coverage under the Federal Torts Claims Act to the National Guard while engaged in training or duty authorized by title 32, United States Code. In addition, the bill would add National Guard medical personnel to the categories covered by section 1089 of title 10, United States Code. This would make the Torts Claims Act the exclusive remedy in actions arising out of alleged medical malpractice during training or duty under title 32. Members of the National Guard are by definition part of the organized militia of the several States and territories. In that capacity they may be ordered to active duty by the Governor in case of natural disaster or to provide military aid to the civil authorities. At such times the personnel of the National Guard are entitled to pay, allowances, medical care, protection from liability for personal injury, death, or property damage, and any other benefits which the laws of the appropriate State provide. In such capacity, they, of course, would not be engaged in duty or training under title 32, and therefore, while engaged in State-ordered duties, would not be within the purview of this legislation.

The main purpose of this bill is to bring the National Guard, while in Federal duty, under the coverage of the Federal Torts Claims Act in order to put them on equal footing with the Active and Reserve military in this regard. I recognize the dual status of

the Guard. It is not the intention of this legislation to affect the Guard's rights or responsibilities while under the control and direction of the States, and the bill is drafted to make this point clear.

Currently, members of the National Guard are not afforded Federal protection against individual liability for acts committed in the line of Federal duty. Unlike their counterparts in the Active and Reserve military, who are protected under the Federal Torts Claims Act, members of the National Guard are exposed to civil suits against them in an individual capacity which too often can have very unfortunate results. Not only do we find cases of National Guard members having their homes, businesses, or other personal property seized as a result of a judgment arising out of their National Guard activities, but we also find deserving claimants against National Guard activities left with no adequate remedy because the individual guardsman has no personal resources to satisfy a claim.

The National Guard is a very important component of our national defense, and should not be treated differently than other members of the military in this regard. This unequal status is damaging to morale and affects the training of the individuals and the units. As a matter of national policy, a person who has been injured, or sustained damage or loss of property as a result of National Guard activity should have the same judicial remedy available as if the violator had been a member of the Armed Forces on active duty or a member of the Reserves. Members of the National Guard should have the same legal protections while in the performance of official Federal duty granted Active and Reserve military in the same capacity. This bill provides that equity.

I urge your support for H.R. 3799.●

● Mr. ROBERTS of South Dakota. Mr. Speaker, I rise in support of H.R. 3799, which extends the Federal tort claims provisions of title 28, United States Code, to acts or omissions of members of the National Guard. Under the act, the members would be held harmless during Federal duty except in cases of medical malpractice.

From the time of the American Revolution to the present, the National Guard has stood side by side with the regular forces in our country's defense. The South Dakota Air National Guard and Army National Guard are part of today's Guard that provides nearly 50 percent of our deployable combat forces.

When the Guard is called to special duty by the Governor of the State, the Guard and Reserves are indistinguishable. Pay, regulations, training, and equipment are all under the control of the Federal Government. Yet, we have not provided the same protections for the Guard as we have for other personnel.

H.R. 3799 remedies this situation, and brings the Guard under the protections of the Federal Tort Claims Act, during the call to active Federal duty. This protection is for our citizens, as well as Guard personnel, and I fully support this legislation.●

Mr. DANIELSON. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER. The question is on the motion offered by the gentleman from California (Mr. DANIELSON) that the House suspend the rules and pass the bill, H.R. 3799, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The title was amended so as to read: "A bill to extend the Federal tort claims provisions of title 28, United States Code, to acts or omissions of members of the National Guard, and to provide that the remedy under those provisions shall be exclusive in medical malpractice actions involving members of the National Guard."

A motion to reconsider was laid on the table.

CONFERENCE REPORT ON S. 1196, INTERNATIONAL SECURITY AND DEVELOPMENT COOPERATION ACT OF 1981

Mr. ZABLOCKI submitted the following conference report and statement on the Senate bill (S. 1196) to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act to authorize appropriations for development and security assistance programs for the fiscal year 1982, to authorize appropriations for the Peace Corps for the fiscal year 1982, and for other purposes:

CONFERENCE REPORT (H. REPT. No. 97-413)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1196) to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act to authorize appropriations for development and security assistance programs for the fiscal year 1982, to authorize appropriations for the Peace Corps for the fiscal year 1982, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House to the text of the bill and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the House amendment insert the following:

SHORT TITLE

SECTION *1. This Act may be cited as the "International Security and Development Cooperation Act of 1981".*

TITLE I—MILITARY SALES AND RELATED PROGRAMS

REPORTS TO THE CONGRESS

SEC. *101. (a)(1) Section 3(d)(1) of the Arms Export Control Act is amended—*

(A) in the text preceding subparagraph (A) by striking out "to a transfer of a defense article, or related training or other defense service, sold under this Act and may not give his consent to such a transfer under section 505(a)(1) or 505(a)(4) of the Foreign Assistance Act of 1961" and inserting in lieu thereof ", or under section 505(a)(1) or 505(a)(4) of the Foreign Assistance Act of 1961, to a transfer of any major defense equipment valued (in terms of its original acquisition cost) at $14,000,000 or more, or any defense article or related training or other defense service valued (in terms of its original acquisition cost) at $50,000,000 or more,";

(B) by amending subparagraph (B) to read as follows:

"(B) a description of the article or service proposed to be transferred, including its acquisition cost,";

(C) in subparagraph (C) by striking out "defense article or related training or other defense service" and inserting in lieu thereof "article or service"; and

(D) in the last sentence by striking out "defense articles, or related training or other defense services," and inserting in lieu thereof "articles or services".

(2) Section 3(d)(3) of such Act is amended by striking out all that follows "The President may not give his consent" through "section 38 of this Act," and inserting in lieu thereof "to the transfer of any major defense equipment valued (in terms of its original acquisition cost) at $14,000,000 or more, or of any defense article or defense service valued (in terms of its original acquisition cost) at $50,000,000 or more, the export of which has been licensed or approved under section 38 of this Act,".

(3) Section 3(d)(4) of such Act is amended—

(A) by inserting "or" at the end of subparagraph (B);

(B) by striking out "; or" at the end of subparagraph (C) and inserting in lieu thereof a period; and

(C) by striking out subparagraph (D).

(b)(1) Section 28(a) of such Act is amended by striking out "five" and inserting in lieu thereof "fifteen".

(2) Section 28(b) of such Act is amended by striking out "the issuance of a letter of offer in accordance with such request would be subject to the requirements of section 36(b) of this Act" and inserting in lieu thereof "the request involves a proposed sale of major defense equipment for $7,000,000 or more or of any other defense articles or defense services for $25,000,000 or more".

(c) The first sentence of section 36(b)(1) of such Act is amended—

(1) by striking out "$25,000,000" and inserting in lieu thereof "$50,000,000"; and

(2) by striking out "$7,000,000" and inserting in lieu thereof "$14,000,000".

(d) Section 36(c) of such Act is amended in the first sentence of paragraph (1)—

(1) by striking out "$7,000,000" and inserting in lieu thereof "$14,000,000"; and

(2) by striking out "$25,000,000" and inserting in lieu thereof "$50,000,000".

(e) Section 36(d) of such Act is amended by striking out "(c)" and inserting in lieu thereof "(c)(1)".

PROPOSED TRANSFERS OR SALES TO THE NORTH ATLANTIC TREATY ORGANIZATION, JAPAN, AUSTRALIA, OR NEW ZEALAND

SEC. 102. (a) Section 3(d)(2) of the Arms Export Control Act is amended—

(1) by striking out "(2) Unless" and inserting in lieu thereof "(2)(A) Except as provided in subparagraph (B), unless"; and

(2) by adding at the end thereof the following:

"(B) In the case of a proposed transfer to the North Atlantic Treaty Organization, or any member country of such Organization, Japan, Australia, or New Zealand, unless the President states in the certification submitted pursuant to paragraph (1) of this subsection that an emergency exists which requires that consent to the proposed transfer become effective immediately in the national security interests of the United States, such consent shall not become effective until fifteen calendar days after the date of such submission and such consent shall become effective then only if the Congress does not adopt, within such fifteen-day period, a concurrent resolution disapproving the proposed transfer.".

(b)(1) Section 36(b)(1) of such Act is amended in the fifth sentence by striking out "if the Congress, within thirty calendar days after receiving such certification," and inserting in lieu thereof the following: ", with respect to a proposed sale to the North Atlantic Treaty Organization, any member country of such Organization, Japan, Australia, or New Zealand, if the Congress, within fifteen calendar days after receiving such certification, or with respect to a proposed sale to any other country or organization, if the Congress within thirty calendar days after receiving such certification,".

(2) Section 36(b)(2) of such act is amended by inserting before the period at the end thereof a comma and the following: "except that for purposes of consideration of any resolution with respect to the North Atlantic Treaty Organization, any member country of such Organization, Japan, Australia, or New Zealand, it shall be in order in the Senate to move to discharge a committee to which such resolution was referred if such committee has not reported such resolution at the end of five calendar days after its introduction".

PERSONNEL PERFORMING DEFENSE SERVICES

SEC. 103. Section 21(c)(2) of the Arms Export Control Act is amended to read as follows:

"(2) Within forty-eight hours of the existence of, or a change in status of significant hostilities or terrorist acts or a series of such acts, which may endanger American lives or property, involving a country in which United States personnel are performing defense services pursuant to this Act or the Foreign Assistance Act of 1961, the President shall submit to the Speaker of the House of Representatives and to the President pro tempore of the Senate a report, in writing, classified if necessary, setting forth—

"(A) the identity of such country;

"(B) a description of such hostilities or terrorist acts; and

"(C) the number of members of the United States Armed Forces and the number of United States civilian personnel that may be endangered by such hostilities or terrorist acts.".

CHARGES FOR USE AND NONRECURRING RESEARCH, DEVELOPMENT, AND PRODUCTION COSTS

SEC. 104. Section 21(e)(2) of the Arms Export Control Act is amended by inserting "standardization with the Armed Forces of Japan, Australia, or New Zealand in furtherance of the mutual defense treaties between the United States and those countries," immediately after "standardization,".

FOREIGN MILITARY SALES AUTHORIZATION AND AGGREGATE CEILINGS

SEC. 105. (a) Section 31(a) of the Arms Export Control Act is amended by striking out "$500,000,000 for the fiscal year 1981" and inserting in lieu thereof "$800,000,000 for the fiscal year 1982 and $800,000,000 for the fiscal year 1983".

(b) Section 31(b) of such Act is amended to read as follows:

"(b)(1) The total amount of credits (or participations in credits) extended under section 23 of this Act shall not exceed $800,000,000 for the fiscal year 1982 and $800,000,000 for the fiscal year 1983.

"(2) The total principal amount of loans guaranteed under section 24(a) of this Act shall not exceed $3,269,525,000 for the fiscal year 1982 and $3,269,525,000 for the fiscal year 1983.

"(3) Of the aggregate total of credits (or participations in credits) under section 23 of this Act, and of the total principal amount of loans guaranteed under section 24(a) of this Act, not less than $1,400,000,000 of the fiscal year 1982 and not less than $1,400,000,000 for the fiscal year 1983 shall be available only for Israel, of which not less than $550,000,000 for each such year shall be available as credits under section 23 of this Act.

"(4) Of the amount available under paragraph (2) of this subsection for loan guaranties under section 24(a) of this Act, not less than $280,000,000 for fiscal year 1982 and not less than $280,000,000 for the fiscal year 1983 shall be available only for Greece.

"(5) The principal amount of loans guaranteed under section 24(a) of this Act for the fiscal year 1982 and for the fiscal year 1983 with respect to Egypt, Greece, Sudan, Somalia, and Turkey shall (if and to the extent each such country so desires) be repaid in not more than twenty years, following a grace period of ten years on repayment of principal.

"(6) Of the total amount of credits (or participations in credits) extended under section 23 of this Act for the fiscal years 1982 and 1983, not less than $200,000,000 for each such year shall be available only for Egypt, and Egypt shall be released from its contractual liability to repay the United States Government with respect to such credits and participations in credits.

"(7) Of the total amount of credits (or participations in credits) extended under section 23 of this Act for the fiscal years 1982 and 1983, not less than $50,000,000 for each such year shall be available only for the Sudan, and the Sudan shall be released from its contractual liability to repay the United States Government with respect to such credits and participations in credits.".

(c) Section 31(c) of such Act is amended—

(1) in the first sentence by striking out "fiscal year 1981" and inserting in lieu thereof "fiscal year 1982 and for the fiscal year 1983";

(2) in the last sentence by striking out "$500,000,000" and inserting in lieu thereof "$550,000,000"; and

(3) in the last sentence by inserting "each" immediately before "such year".

REPEAL OF CEILING ON COMMERCIAL SALES

SEC. 106. Section 38(b)(3) of the Arms Export Control Act is repealed.

PERIODIC REVIEW OF ITEMS ON THE MUNITIONS LIST

SEC. 107. Section 38 of the Arms Export Control Act is amended by adding at the end thereof the following new subsection:

"(f) The President shall periodically review the items on the United States Munitions List to determine what items, if any, no longer warrant export controls under this section. The results of such reviews shall be reported to the Speaker of the House of Representatives and to the Committee on Foreign Relations and the Committee on Banking, Housing, and Urban Affairs of the Senate. Such a report shall be submitted at least 30 days before any item is removed from the Munitions List and shall describe the nature of any controls to be imposed on that item under the Export Administration Act of 1979.".

SPECIAL DEFENSE ACQUISITION FUND

SEC. 108. (a) The Arms Export Control Act is amended by adding at the end thereof the following new chapter:

"CHAPTER 5—SPECIAL DEFENSE ACQUISITION FUND

"SEC. 51. SPECIAL DEFENSE ACQUISITION FUND.—(a)(1) Under the direction of the President and in consultation with the Secretary of State, the Secretary of Defense shall establish a Special Defense Acquisition Fund (hereafter in this chapter referred to as the 'Fund'), to be used as a revolving fund separate from other accounts, under the control of the Department of Defense, to finance the acquisition of defense articles and defense service in anticipation of their transfer pursuant to this Act, the Foreign Assistance Act of 1961, or as otherwise authorized by law, to eligible foreign countries and international organizations, and may acquire such articles and services with the funds in the Fund as he may determine. Acquisition under this chapter of items for which the initial issue quantity requirements for United States Armed Forces have not been fulfilled and are not under current procurement contract shall be emphasized when compatible with security assistance requirements for the transfer of such items.

"(2) Nothing in this chapter may be construed to limit or impair any responsibilities conferred upon the Secretary of State or the Secretary of Defense under this Act or the Foreign Assistance Act of 1961.

"(b) The Fund shall consist of—

"(1) collections from sales made under letters of offer issued pursuant to section 21(a)(1) of this Act representing the actual value of defense articles not intended to be replaced in stock,

"(2) collections from sales representing the value of asset use charges (including contractor rental payments for United States Government-owned plant and production equipment) and charges for the proportionate recoupment of nonrecurring research, development, and production costs, and

"(3) collections from sales made under letters of offer (or transfers made under the Foreign Assistance Act of 1961) of defense articles and defense services acquired under this chapter, representing the value of such items calculated in accordance with paragraph (2) or (3) of section 21(a) or section 22 of this Act or section 644(m) of the Foreign Assistance Act of 1961, as appropriate,

together with such funds as may be authorized and appropriated or otherwise made available for the purposes of the Fund.

"(c)(1) The size of the Fund may not exceed such dollar amount as is prescribed

in section 138(g) of title 10, United States Code. For purposes of this limitation, the size of the Fund is the amounts in the Fund plus the value (in terms of acquisition cost) of the defense articles acquired under this chapter which have not been transferred from the Fund in accordance with this chapter.

"(2) Amounts in the Fund shall be available for obligation in any fiscal year only to such extent or in such amounts as are provided in advance in appropriate Acts.

SEC. 52. USE AND TRANSFER OF ITEMS PROCURED BY THE FUND.—(a) No defense article or defense service acquired by the Secretary of Defense under this chapter may be transferred to any foreign country or international organization unless such transfer is authorized by this Act, the Foreign Assistance Act of 1961, or other law.

"(b) The President may authorize the temporary use by the United States Armed Forces of defense articles and defense services acquired under this chapter prior to their transfer to a foreign country or international organization, if such is necessary to meet national defense requirements and the United States Armed Forces bear the costs of operation and maintenance of such articles or services while in their use and the costs of restoration or replacement upon the termination of such use.

"(c) Except as provided in subsection (b) of this section, the Fund may be used to pay for storage, maintenance, and other costs related to the preservation and preparation for transfer of defense articles and defense services acquired under this chapter prior to their transfer, as well as the administrative costs of the Department of Defense incurred in the acquisition of such items to the extent not reimbursed pursuant to section 43(b) of this Act.

SEC. 53. ANNUAL REPORTS TO CONGRESS.—(a) Not later than December 31 of each year, the President shall submit to the Congress a comprehensive report on acquisition of defense articles and defense services under this chapter. Each such report shall include—

"(1) a description of each contract for the acquisition of defense articles or defense services under this chapter which was entered into during the preceding fiscal year;

"(2) a description of each contract for the acquisition of defense articles or defense services under this chapter which the President anticipates will be entered into during the current fiscal year;

"(3) a description of each defense article or defense service acquired under this chapter which was transferred to a foreign country or international organization during the preceding fiscal year; and

"(4) an evaluation of the impact of the utilization of the authority of this chapter on United States defense production and the readiness of the United States Armed Forces.

"(b) As part of the annual written report to the Congress required by section 139(a) of title 10, United States Code, regarding procurement schedules for each weapon system for which funding authorization is required, the President shall provide a report estimating the likely procurements to be made through the Fund.".

(b) Section 138 of title 10, United States Code, is amended by adding immediately following subsection (f) the following new subsection:

"(g) The size of the Special Defense Acquisition Fund established pursuant to chapter 5 of the Arms Export Control Act may not exceed $300,000,000 in fiscal year 1982 and may not exceed $600,000,000 in fiscal year 1983 or any fiscal year thereafter.".

LEASING OF DEFENSE ARTICLES

SEC. 109. (a) The Arms Export Control Act, as amended by section 108 of this Act, is further amended by adding at the end thereof the following new chapter:

"CHAPTER 6—LEASES OF DEFENSE ARTICLES

"SEC. 61. LEASING AUTHORITY.—(a) President may lease defense articles in the stocks of the Department of Defense to an eligible foreign country or international organization if—

"(1) he determines that there are compelling foreign policy and national security reasons for providing such articles on a lease basis rather than on a sales basis under this Act;

"(2) he determines that the articles are not for the time needed for public use; and

"(3) the country or international organization has agreed to pay in United States dollars all costs incurred by the United States Government in leasing such articles, including reimbursement for depreciation of such articles while leased, the costs of restoration or replacement if the articles are damaged while leased, and the replacement cost (less any depreciation in the value) of the articles if the articles are lost or destroyed while leased.

The requirement of paragraph (3) shall not apply to leases entered into for purposes of cooperative research or development, military exercises, or communications or electronics interface projects, or to any defense article which has passed three-quarters of its normal service life.

"(b) Each lease agreement under this section shall be for a fixed duration of not to exceed five years and shall provide that, at any time during the duration of the lease, the President may terminate the lease and require the immediate return of the leased articles.

"(c) Defense articles in the stocks of the Department of Defense may be leased or loaned to a foreign country or international organization only under the authority of this chapter or chapter 2 of part II of the Foreign Assistance Act of 1961, and may not be leased to a foreign country or international organization under the authority of section 2667 of title 10, United States Code.

"SEC. 62. REPORTS TO THE CONGRESS.—(a) Not less than 30 days before entering into or renewing any agreement with a foreign country or international organization to lease any defense article under this chapter, or to loan any defense article under chapter 2 part II of the Foreign Assistance Act of 1961, for a period of one year or longer, the President shall transmit to the Speaker of the House of Representatives, and to the chairman of the Committee on Foreign Relations of the Senate and the chairman of the Committee on Armed Services of the Senate, a written certification which specifies—

"(1) the country or international organization to which the defense article is to be leased or loaned;

"(2) the type, quantity, and value (in terms of replacement cost) of the defense article to be leased or loaned;

"(3) the terms and duration of the lease or loan; and

"(4) a justification for the lease or loan, including an explanation of why the defense article is being leased or loaned rather than sold under this Act.

"(b) The President may waive the requirements of this section (and in the case of an agreement described in section 63, may waive the provisions of that section) if he determines, and immediately reports to the Congress, that an emergency exists which requires that the lease or loan be entered into immediately in the national security interests of the United States.

"SEC. 63. LEGISLATIVE REVIEW.—(a)(1) In the case of any agreement involving the lease under his chapter, or the loan under chapter 2 of part II of the Foreign Assistance Act of 1961, to any foreign country or international organization for a period of one year or longer of any defense articles which are either (i) major defense equipment valued (in terms of its replacement cost less any depreciation in its value) at $14,000,000 or more, or (ii) defense articles valued (in terms of their replacement cost less any depreciation in their value) at $50,000 or more, the agreement may not be entered into or renewed if the Congress, within 30 calendar days after receiving the certification with respect to that proposed agreement pursuant to section 62(a), adopts a concurrent resolution stating that it objects to the proposed lease or loan.

"(2) This section shall not apply with respect to a loan or lease to the North Atlantic Treaty Organization, any member country of that Organization, Japan, Australia, or New Zealand.

"(b) Any resolution under subsection (a) shall be considered in the Senate in accordance with the provisions of section 601(b) of the International Security Assistance and Arms Export Control Act of 1976.

"(c) For the purpose of expediting the consideration and adoption of concurrent resolutions under subsection (a), a motion to proceed to the consideration of any such resolution after it has been reported by the appropriate committee shall be treated as highly privileged in the House of Representatives.

"SEC. 64. APPLICATION OF OTHER PROVISIONS OF LAW. Any reference to sales of defense articles under this Act in any provision of law restricting the countries or organizations to which such sales may be made shall be deemed to include a reference to leases of defense articles under this chapter.".

(b) Such Act is further amended—

(1) in section 2(b)—

(A) by inserting ", leases," immediately after "sales" both places it appears,

(B) by inserting "whether there shall be a lease to a country," immediately after "thereof,", and

(C) by inserting ", lease," immediately after "sale" the second place it appears;

(2) in section 3(a)—

(A) in the text preceding paragraph (1) by inserting "or leased" immediately after "sold", and

(B) in paragraph (4) by inserting "or lease" immediately after "purchase"; and

(3) in section 4 by inserting "or leased" immediately after "sold" in the first sentence.

(c) Paragraph (5) of section 503(b) of the Foreign Assistance Act of 1961 is amended to read as follows:

"(5) the loan agreement provides that (A) if the defense article is damaged while on loan, the country or international organization to which it was loaned will reimburse the United States for the cost of restoring or replacing the defense article, and (B) if the defense article is lost or destroyed while on loan, the country or international organization to which it was loaned will pay to the United States an amount equal to the re-

placement cost (less any depreciation in the value) of the defense article.".

(d)(1) Section 109 of the International Security and Development Cooperation Act of 1980 is repealed.

(2) Section 36(a) of the Arms Export Control Act is amended—

(A) by inserting "and" at the end of paragraph (9) and inserting in lieu thereof a period; and

(C) by striking out paragraph (10).

MILITARY ASSISTANCE

SEC. 110. (a) Section 504(a) of the Foreign Assistance Act of 1961 is amended to read as follows:

"(a)(1) There are authorized to be appropriated to the President to carry out the purposes of this chapter not to exceed $238,500,000 for the fiscal year 1982 and not to exceed $238,500,000 for the fiscal year 1983.

"(2) Amounts appropriated under this subsection are authorized to remain available until expended.".

(b) Section 506(a) of such Act is amended by striking out "$50,000,000" and inserting in lieu thereof "$75,000,000".

(c) Section 503(a)(3) of such Act is amended by striking out "specified in section 504(a)(1) of this Act, within the dollar limitations of that section," and inserting in lieu thereof "country,".

(d) Section 516 of such Act is repealed.

STOCKPILING OF DEFENSE ARTICLES FOR FOREIGN COUNTRIES

SEC. 111. Section 514(b)(2) of the Foreign Assistance Act of 1961 is amended by striking out "$85,000,000 for the fiscal year 1981" and inserting in lieu thereof "$130,000,000 for the fiscal year 1982 and $125,000,000 for the fiscal year 1983".

INTERNATIONAL MILITARY ASSISTANCE AND SALES PROGRAM MANAGEMENT

SEC. 112. Section 515 of the Foreign Assistance Act of 1961 is amended to read as follows:

"SEC. 515. OVERSEAS MANAGEMENT OF ASSISTANCE AND SALES PROGRAMS.—(a) In order to carry out his responsibilities for the management of international security assistance programs conducted under this chapter, chapter 5 of this part, and the Arms Export Control Act, the President may assign members of the Armed Forces of the United States to a foreign country to perform one or more of the following functions:

"(1) equipment and services case management;

"(2) training management;

"(3) program monitoring;

"(4) evaluation and planning of the host government's military capabilities and requirements;

"(5) administrative support;

"(6) promoting rationalization, standardization, interoperability, and other defense cooperation measures among members of the North Atlantic Treaty Organization and with the Armed Forces of Japan, Australia, and New Zealand; and

"(7) liaison functions exclusive of advisory and training assistance.

"(b) Advisory and training assistance conducted by military personnel assigned under this section shall be kept to an absolute minimum. It is the sense of the Congress that advising and training assistance in countries to which military personnel are assigned under this section shall be provided primarily by other personnel who are not assigned under this section and who are detailed for limited periods to perform specific tasks.

"(c)(1) The number of members of the Armed Forces assigned to a foreign country under this section may not exceed six unless specifically authorized by the Congress. The President may waive this limitation if he determines and reports to the Committee on Foreign Relations of the Senate and the Committee on Foreign Affairs of the House of Representatives, 30 days prior to the introduction of the additional military personnel, that United States national interests require that more than six members of the Armed Forces be assigned under this section to carry out international security assistance programs in a country not specified in this paragraph. For the fiscal year 1982 and the fiscal year 1983, Indonesia, the Republic of Korea, the Philippines, Thailand, Egypt, Jordan, Morocco, Saudi Arabia, Greece, Portugal, Spain, and Turkey are authorized to have military personnel strengths larger than six under this section to carry out international security assistance programs.

"(2) The total number of members of the Armed Forces assigned under this section to a foreign country in a fiscal year may not exceed the number justified to the Congress for that country in the congressional presentation materials for that fiscal year, unless the Committee on Foreign Relations of the Senate and the Committee on Foreign Affairs of the House of Representatives are notified 30 days in advance of the introduction of the additional military personnel.

"(d) Effective October 1, 1982, the entire costs (including salaries of the United States military personnel) of overseas management of international security assistance programs under this section shall be charged to or reimbursed from funds made available to carry out this chapter, other than any such costs which are either paid directly for such defense services under section 21(a) of the Arms Export Control Act or reimbursed from charges for services collected from foreign governments pursuant to section 21(e) and section 43(b) of that Act.

"(e) Members of the Armed Forces assigned to a foreign country under this section shall serve under the direction and supervision of the Chief of the United States Diplomatic Mission to that country.

"(f) The President shall continue to instruct United States diplomatic and military personnel in the United States missions abroad that they should not encourage, promote, or influence the purchase by any foreign country of United States-made military equipment, unless they are specifically instructed to do so by an appropriate official of the executive branch.".

INTERNATIONAL MILITARY EDUCATION AND TRAINING

SEC. 113. Section 542 of the Foreign Assistance Act of 1961 is amended by striking out "$34,000,000 for the fiscal year 1981" and inserting in lieu thereof "$42,000,000 for the fiscal year 1982 and $42,000,000 for the fiscal year 1983".

PEACEKEEPING OPERATIONS

SEC. 114. (a) Section 552(a) of the Foreign Assistance Act of 1961 is amended by striking out "$25,000,000 for the fiscal year 1981" and inserting in lieu thereof "$19,000,000 for the fiscal year 1982 and $19,000,000 for the fiscal year 1983".

(b) Section 552(c) of such Act is amended by striking out "(1)" and all that follows through "may not be transferred" and inserting in lieu thereof "the total amount so transferred in any fiscal year may not exceed $15,000,000".

FOREIGN INTIMIDATION AND HARASSMENT OF INDIVIDUALS IN THE UNITED STATES

SEC. 115. Chaper 1 of the Arms Export Control Act is amended by adding at the end thereof the following new section:

SEC. 6. FOREIGN INTIMIDATION AND HARASSMENT OF INDIVIDUALS IN THE UNITED STATES.—No letters of offer may be issued, no credits or guarantees may be extended, and no export licenses may be issued under this Act with respect to any country determined by the President to be engaged in a consistent pattern of acts of intimidation or harassment directed against individuals in the United States. The President shall report any such determination promptly to the Speaker of the House of Representatives and to the chairman of the Committee on Foreign Relations of the Senate.".

TITLE II—ECONOMIC SUPPORT FUND

AUTHORIZATION OF APPROPRIATIONS

SEC. 201. Section 531(b)(1) of the Foreign Assistance Act of 1961 is amended by striking out "for the fiscal year 1981, $2,065,300,000" and inserting in lieu thereof "$2,623,500,000 for the fiscal year 1982 and $2,723,500,000 for the fiscal year 1983".

PROVISIONS RELATING TO USE OF FUNDS

SEC. 202. Chapter 4 of part II of the Foreign Assistance Act of 1961 is amended by striking out sections 532 and 533 and inserting in lieu thereof the following new sections:

"SEC. 532. MIDDLE EAST PROGRAMS.—(a)(1) Of the funds authorized to be appropriated to carry out this chapter for the fiscal year 1982 and for the fiscal year 1983, not less than $785,000,000 for each such year shall be available only for Israel and not less than $750,000,000 for each such year shall be available only for Egypt. Amounts made available for Israel and Egypt for the fiscal year 1982 pursuant to this paragraph shall be in addition to the amounts made available to those countries pursuant to paragraph (4) of this subsection.

"(2) All of the funds made available to Israel and to Egypt under this chapter for the fiscal years 1982 and 1983 shall be provided on a grant basis.

"(3) The total amount of funds allocated for Israel under this chapter for the fiscal year 1982 and for the fiscal year 1983 may be made available as a cash transfer. In exercising the authority of this paragraph, the President shall ensure that the level of cash transfers made to Israel does not cause an adverse impact on the total amount of nonmilitary exports from the United States to Israel.

"(4) In addition to the amounts requested for Israel and Egypt under this chapter for the fiscal year 1982, $21,000,000 shall be made available for Israel for the fiscal year 1982 and $21,000,000 shall be made available for Egypt for the fiscal year 1982 in order to replace the funds which were authorized and appropriated for those countries in the fiscal year 1981 but which were reprogrammed in order to provide assistance for Liberia and El Salvador.

"(5) Of the amounts provided to Egypt under this chapter for the fiscal year 1982 and for the fiscal year 1983, up to $50,000,000 for each such year may be used under title XII of chapter 2 of part I of this Act in building agricultural extension services in Egypt for the small farmer in order to upgrade the skills of the agricultural faculty in provincial universities, improve the agricultural curriculum offered and the equipment available in provincial universi-

ties, and establish a provincial university extension service with an outreach program which can directly reach the Egyptian small farmer.

"(b)(1) Of the funds authorized to be appropriated to carry out this chapter for the fiscal year 1982 and for the fiscal year 1983, $11,000,000 for each such year may be used for special requirements in the Middle East, including regional cooperative projects of a scientific and technological nature in accordance with paragraph (2) of this subsection, other regional programs, development programs on the West Bank and in Gaza, population programs, project development and support, and programs of participant training.

"(2) It is the sense of the Congress that, in order to continue to build the structure of peace in the Middle East, the United States should finance, and where appropriate participate in, cooperative projects of a scientific and technological nature involving Israel and Egypt and other Middle East countries wishing to participate. These cooperative projects should include projects in the fields of agriculture, health, energy, the environment, education, water resources, and the social sciences. Of the funds available under paragraph (1) of this subsection for the fiscal year 1982 and for the fiscal year 1983, $4,000,000 for each such year may be used in accordance with this paragraph for scientific and technological projects which will promote regional cooperation among Israel and Egypt and other Middle East countries.

"(3) The President may obligate funds under paragraph (1) of this subsection only if, in accordance with the established prenotification procedures under section 634A of this Act, he transmits a report to the Committee on Foreign Affairs and the Committee on Appropriations of the House of Representatives, and to the Committee on Foreign Relations and the Committee on Appropriations of the Senate, at least 15 days prior to such obligation. This report shall set forth—

"(A) the name of the proposed recipient of such funds,

"(B) the amount of funds to be made available to such recipient, and

"(C) the purpose for which such funds are to be made available.

"(4) At the end of the fiscal year 1981, at the end of the fiscal year 1982, and the end of the fiscal year 1983, the President shall report to the Congress on the use of funds under this chaper during that fiscal year for special requirements in the Middle East.

"(c) None of the funds appropriated to carry out this chapter for the fiscal year 1982 or the fiscal year 1983 may be made available to Syria.

"(d) It is the sense of the Congress that, of the funds authorized to be appropriated to carry out this chapter, $7,000,000 for the fiscal year 1982 and $7,000,000 or more for the fiscal year 1983 should be made available for Lebanon for relief and rehabilitation programs of international and private voluntary agencies and other not-for-profit United States organizations operating in Lebanon.

"SEC. 533. EASTERN MEDITERRANEAN PROGRAMS.—(a) Not less than two-thirds of the funds made available to Turkey under this chapter for each of the fiscal years 1982 and 1983 shall be provided on a grant basis.

"(b) Of the funds authorized to be appropriated to carry out this chapter for the fiscal year 1982 and for the fiscal year 1983, $15,000,000 for each such year shall be available only for Cyprus. Of that amount, $5,000,000 for the fiscal year 1982 and $10,000,000 for the fiscal year 1983 shall be for scholarship programs to bring Cypriots to the United States for education.

"SEC. 534. Prohibition on Use of Funds for Nuclear Facilities.—Funds available to carry out this chapter for the fiscal year 1982 and for the fiscal year 1983 may not be used to finance the construction of, the operation or maintenance of, or the supplying of fuel for, any nuclear facility in a foreign country unless the President certifies to the Congress that use of funds for such purpose is indispensable to the achievement of nonproliferation objectives which are uniquely significant and of paramount importance to the United States.

"SEC. 535. EMERGENCY ASSISTANCE.—(a) Of the funds appropriated to carry out this chapter, up to $75,000,000 for the fiscal year 1982 and up to $75,000,000 for the fiscal year 1983 may be made available for emergency use under this chapter when the national interests of the United States urgently require economic support to promote economic or political stability.

"(b) Notwithstanding any provision of this chapter or of an appropriations Act (including a joint resolution making continuing appropriations) which earmarks funds available to carry out this chapter for a specific country or purpose, up to 5 percent of each amount so earmarked may be used to carry out this section.

"SEC. 536. SPECIAL REQUIREMENTS FUND.—Of the amounts appropriated to carry out this chapter, up to $75,000,000 for the fiscal year 1982 may be made available as a special requirements fund, except that such funds may not be obligated unless the Committee on Foreign Relations of the Senate, the Committee on Foreign Affairs of the House of Representatives, and the Committee on Appropriations of each House of the Congress are notified fifteen days in advance of such obligation.

"SEC. 537. TUNISIA.—Of the funds authorized to be appropriated to carry out this chapter for the fiscal years 1982 and 1983, not less than $5,000,000 for each such year shall be available for Tunisia.

"SEC. 538. COSTA RICA.—Of the funds authorized to be appropriated to carry out this chapter for the fiscal years 1982 and 1983, not less than $15,000,000 for each such year shall be available only for Costa Rica for the purposes of economic assistance.

"SEC. 539. NICARAGUA.—Of the funds authorized to be appropriated to carry out this chapter, $20,000,000 for the fiscal year 1982 and $20,000,000 for the fiscal year 1983 shall be available only for Nicaragua.".

ACQUISITION OF AGRICULTURAL COMMODITIES AND RELATED PRODUCTS UNDER COMMODITY IMPORT PROGRAMS

SEC. 203. The Congress directs the President to allocate at least 15 percent of the funds which are made available each fiscal year under this title for commodity import programs for use in financing the purchase of agricultural commodities and agricultural-related products which are of United States-origin.

TITLE III—DEVELOPMENT ASSISTANCE

AGRICULTURE, RURAL DEVELOPMENT, AND NUTRITION

SEC. 301. (a) The first sentence of section 103(a)(2) of the Foreign Assistance Act of 1961 is amended by striking out "$713,500,000 for the fiscal year 1981" and inserting in lieu thereof "$700,000,000 for the fiscal year 1982 and $700,000,000 for the fiscal year 1983, of which up to $1,000,000 for each such fiscal year shall be available only to carry out section 316 of the International Security and Development Cooperation Act of 1980".

(b)(1) It is the sense of the Congress that the United States should strongly support the efforts of developing countries to improve infant feeding practices, in particular through the promotion of breast feeding. As a demonstration of that support, the President is authorized to use up to $5,000,000 of the funds made available for the fiscal year 1982 to carry out the purpose of sections 103 and 104(c) of the Foreign Assistance Act of 1961 in order to assist developing countries establish or improve programs to encourage improved infant feeding practices. In carrying out this paragraph, the Agency for International Development should provide funds for necessary research to obtain better information on the precise nature and magnitude of problems relating to infant feeding practices, including the use of infant formula, in developing countries.

(2) The President shall, as part of the congressional presentation documentation for the fiscal years 1983 and 1984, include information relevant to the implementation of this subsection, including—

(A) a description of actions taken by the Agency for International Development to promote breastfeeding and to improve supplemental infant feeding practices in developing countries through funds made available in this subsection and through its regular programs in the fields of health, nutrition, and population activities;

(B) summary of the results of studies authorized by this subsection on the nature and magnitude of problems in developing countries related to infant feeding practices; and

(C) a summary of reports by member countries of the World Health Organization on their actions to implement the International Code of Marketing of Breast Milk Substitutes.

(c) Section 103 of such Act is amended by adding at the end thereof the following new subsection.

"(g) In order to carry out the purposes of this section, the President may continue to participate in and may provide, on such terms and conditions as he may determine, up to $180,000,000 to the International Fund for Agricultural Development. There are authorized to be appropriated to the President for the purposes of this subsection $180,000,000, except that not more than $40,500,000 may be appropriated under this subsection for the fiscal year 1982. Amounts appropriated under this subsection are authorized to remain available until expended.".

POPULATION AND HEALTH

SEC. 302. (a) Section 104(g) of the Foreign Assistance Act of 1961 is amended by striking out the first sentence and inserting in lieu thereof the following: "There are authorized to be appropriated to the President, in addition to funds otherwise available for such purposes—

"(1) $211,000,000 for the fiscal year 1982 and $211,000,000 for the fiscal year 1983 to carry out subsection (b) of this section; and

"(2) $133,405,000 for the fiscal year 1982 and $133,405,000 for the fiscal year 1983 to carry out subsection (c) of this section.

Of the funds appropriated for each of the fiscal years 1982 and 1983 to carry out subsection (b) of this section, not less than 16 percent or $38,000,000, whichever amount is

less, shall be available only for the United Nations Fund for Population Activities.".

(b) Section 104(f) of such Act is amended by adding at the end thereof the following:

"(3) None of the funds made available to carry out this part may be used to pay for any biomedical research which relates, in whole or in part, to methods of, or the performance of, abortions or involuntary sterilization as a means of family planning.".

EDUCATION AND HUMAN RESOURCES DEVELOPMENT

SEC. 303. (a) The second sentence of section 105(a) of the Foreign Assistance Act of 1961 is amended by striking out "$101,000,000 for the fiscal year 1981" and inserting in lieu thereof "$103,600,000 for the fiscal year 1982 and $103,600,000 for the fiscal year 1983".

(b) Such section is further amended by adding at the end thereof the following: "For each of the fiscal years 1982 and 1983, the President shall use not less than $4,000,000 of the funds made available for the purposes of this section to finance scholarships for undergraduate or professional education in the United States for South African students who are disadvantaged by virtue of legal restrictions on their ability to get an adequate undergraduate or professional education, except that up to $1,000,000 of the funds made available for each such fiscal year under chapter 4 of part II of this Act for southern African regional programs may be used to finance such scholarships in lieu of an equal amount under this section.".

ENERGY, PRIVATE VOLUNTARY ORGANIZATIONS, AND SELECTED DEVELOPMENT ACTIVITIES

SEC. 304. (a) Section 106(d)(3) of the Foreign Assistance Act of 1961 is amended by inserting immediately before the semicolon at the end thereof the following: "and programs of disaster preparedness, including the prediction of and contingency planning for natural disasters abroad".

(b) Section 106(e)(1) of such Act is amended by striking out "$140,000,000 for the fiscal year 1981" and inserting in lieu thereof "$147,200,000 for the fiscal year 1982 and $147,200,000 for the fiscal year 1983".

UNITED NATIONS DECADE FOR WOMEN

SEC. 305. Section 113 of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following new subsection:

"(c) Not less than $500,000 of the funds made available under this chapter for the fiscal year 1982 shall be expended on international programs which support the original goals of the United Nations Decade for Women.".

HUMAN RIGHTS

SEC. 306. The first sentence of section 116(e) of the Foreign Assistance Act of 1961 is amended by striking out "the fiscal year 1981" and inserting in lieu thereof "each of the fiscal years 1982 and 1983".

ENVIRONMENT AND NATURAL RESOURCES

SEC. 307. Section 118 of the Foreign Assistance Act of 1961 is amended to read as follows:

"SEC. 118. ENVIRONMENT AND NATURAL RESOURCES.—(a) The Congress finds that if current trends in the degradation of natural resources in developing countries continue, they will severely undermine the best efforts to meet basic human needs, to achieve sustained economic growth, and to prevent international tension and conflict. The Congress also finds that the world faces enormous, urgent, and complex problems, with respect to natural resources, which require new forms of cooperation between the United States and developing countries to prevent such problems from becoming unmanageable. It is, therefore, in the economic and security interests of the United States to provide leadership both in thoroughly reassessing policies relating to natural resources and the environment, and in cooperating extensively with developing countries in order to achieve environmentally sound development.

"(b) In order to address the serious problems described in subsection (a), the President is authorized to furnish assistance under this part for developing and strengthening the capacity of developing countries to protect and manage their environment and natural resources. Special efforts shall be made to maintain and where possible to restore the land, vegetation, water, wildlife, and other resources upon which depend economic growth and human well-being, especially of the poor.

"(c)(1) The President, in implementing programs and projects under this chapter, shall take fully into account the impact of such programs and projects upon the environment and natural resources of developing countries. Subject to such procedures as the President considers appropriate, the President shall require all agencies and officials responsible for programs or projects under this chapter—

"(A) to prepare and take fully into account an environmental impact statement for any program or project under this chapter significantly affecting the environment of the global commons outside the jurisdiction of any country, the environment of the United States, or other aspects of the environment which the President may specify; and

"(B) to prepare and take fully into account an environmental assessment of any proposed program or project under this chapter significantly affecting the environment of any foreign country.

Such agencies and officials should, where appropriate, use local technical resources in preparing environmental impact statements and environmental assessments pursuant to this subsection.

"(2) The President may establish exceptions from the requirements of this subsection for emergency conditions and for cases in which compliance with those requirements would be seriously detrimental to the foreign policy interests of the United States.

"(d)(1) In enacting section 103(b)(3) of this Act the Congress recognized the importance of forests and tree cover to the developing countries. The Congress is particularly concerned about the continuing and accelerating alteration, destruction, and loss of tropical forest in developing countries. Tropical forests constitute a major world resource. There destruction and loss pose a serious threat to development and the environment in developing countries. Tropical forest destruction and loss result in shortages of wood, especially wood for fuel; siltation of lakes, reservoirs and irrigation systems; floods; destruction of indigenous peoples; extinction of plant and animal species; reduced capacity for food production; and loss of genetic resources; and can result in decertification and in destabilization of the earth's climate. Properly managed tropical forests provide a sustained source of fiber and other commodities essential to the economic growth of developing countries.

"(2) The concerns expressed in paragraph (1) and the recommendations of the United States Interagency Task Force on Tropical Forests shall be considered by the President—

"(A) in formulating and carrying out programs and policies with respect to developing countries, including those relating to bilateral and multilateral assistance and those relating to private sector activities, and

"(B) in seeking opportunities to coordinate public and private development and investment activities which affect forests in developing countries.

"(3) It is the sense of the Congress that the President should instruct the representatives of the United States to the United Nations and to other appropriate international organizations to urge—

"(A) that higher priority be given in the programs of these organizations to the problems of tropical forest alteration and loss, and

"(B) that there be improved cooperation and coordination among these organizations with respect to tropical forest activities.".

SAHEL DEVELOPMENT PROGRAM—IMPLEMENTATION

SEC. 308. (a) Section 121(c) of the Foreign Assistance Act of 1961 is amended in the third sentence by striking out "$88,442,000 for the fiscal year 1981" and inserting in lieu thereof "$86,558,000 for the fiscal year 1982 and $86,558,000 for the fiscal year 1983".

(b) Section 121 of such Act is amended by adding at the end thereof the following new subsection:

"(d) Funds available to carry out this section (including foreign currencies acquired with funds appropriated to carry out this section) may not be made available to any foreign government for disbursement unless the Administrator of the Agency for International Development determines that the foreign government will maintain a system of accounts with respect to those funds which will provide adequate identification of and control over the receipt and expenditure of those funds.".

PRIVATE AND VOLUNTARY ORGANIZATIONS

SEC. 309. Section 123 of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following new subsections:

"(f) For each of the fiscal years 1982, 1983, and 1984, funds in an amount not less than twelve percent of the aggregate amount appropriated for that fiscal year to carry out sections 103(a), 104(b), 104(c), 105, 106, 121, and 491 of this Act shall be made available for the activities of private and voluntary organizations, and the President shall seek to channel funds in an amount not less than sixteen percent of such aggregate amount for the activities of private and voluntary organizations.

"(g) After December 31, 1984, funds made available to carry out section 103(a), 104(b), 104(c), 105, 106, 121, or 491 of this Act may not be made available for programs of any United States private and voluntary organization which does not obtain at least 20 percent of its total annual financial support for its international activities from sources other than the United States Government, except that this restriction does not apply with respect to programs which, as of that date, are receiving financial support from the agency primarily responsible for administering this part. The Administrator of the agency primarily responsible for administering this part may, on a case-by-case basis, waive the restriction established by this subsection, after taking into account the effectiveness of the overseas development activi-

ties of the organization, its level of volunteer support, its financial viability and stability, and the degree of its dependence for its financial support on the agency primarily responsible for administering this part.".

HOUSING GUARANTY PROGRAMS

SEC. 310. (a) Section 222(a) of the Foreign Assistance Act of 1961 is amended—

(1) in the second sentence by striking out "$1,555,000,000" and inserting in lieu thereof "$1,718,000,000"; and

(2) in the third sentence by striking out "September 30, 1982" and inserting in lieu thereof "September 30, 1984".

(b) Section 223(b) of such Act is amended by adding at the end thereof the following: "All of the foregoing fees referred to in this section together with earnings thereon and other income arising from guaranty operations under this title shall be held in a revolving fund account maintained in the Treasury of the United States. All funds in such account may be invested in obligations of the United States. Any interest or other receipts derived from such investments shall be credited to such account and may be used for the purposes cited in this section.".

INTERNATIONAL ORGANIZATIONS AND PROGRAMS

SEC. 311. (a) Section 301 of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following new subsection:

"(h) The President is authorized to permit the United States to participate in and to use any of the funds made available under this part after the date of enactment of this subsection for the purpose of furnishing assistance (on such terms and conditions as the President may determine) to the International Food Policy Research Institute.".

(b) Section 302(a)(1) of such Act is amended by striking out "$233,350,000 for the fiscal year 1981" and inserting in lieu thereof "$218,600,000 for the fiscal year 1982 and $218,600,000 for the fiscal year 1983. Of the funds appropriated under this paragraph for each of the fiscal years 1982 and 1983, (A) not less than 19.6 percent or $45,000,000, whichever amount is less, shall be available only for the United States Children's Fund, (B) not less than 59.5 percent or $134,500,000, whichever amount is less, shall be available only for the United Nations Development Fund, (C) not less than 4.4 percent or $10,000,000, whichever amount is less, shall be available only for the United Nations Environment Fund, (D) not less than .159 percent or $400,000, whichever amount is less, shall be available only for the United Nations Trust Fund for Southern Africa, and (E) not less than .196 percent or $500,000, whichever amount is less, shall be available only for the United Nations Institute for Training and Research".

TRADE AND DEVELOPMENT PROGRAM

SEC. 312. (a) The section caption of section 661 of the Foreign Assistance Act of 1961 is amended by striking out "REIMBURSABLE DEVELOPMENT PROGRAMS" and inserting in lieu thereof "TRADE AND DEVELOPMENT PROGRAM".

(b) Such section 661 is further amended—

(1) by inserting "(a)" immediately before "The President";

(2) in the first sentence by striking out "to use $4,000,000 of the funds made available for the fiscal year 1981 for the purposes of this Act"; and

(3) by adding at the end thereof the following new subsection:

"(b) There are authorized to the appropriated to the President for purposes of this section, in addition to funds otherwise available for such purposes, $6,907,000 for the fiscal year 1982 and $6,907,000 for the fiscal year 1983. Amounts appropriated under this subsection are authorized to remain available until expended.".

AFRICAN DEVELOPMENT FOUNDATION

SEC. 313. Section 510 of the International Security and Development Cooperation Act of 1980 is amended—

(1) by striking out "for the fiscal year 1981"; and

(2) by striking out "$2,000,000" and inserting in lieu thereof "not less than $2,000,000 for the fiscal year 1982 and up to $2,000,000 for the fiscal year 1983"

TITLE IV—FOOD FOR PEACE PROGRAMS

REPEAL OF OBSOLETE FOREIGN CURRENCY PROVISIONS

SEC. 401. The Agricultural Trade Development and Assistance Act of 1954 is amended—

(1) in section 101, by striking out "for foreign currencies" and inserting in lieu thereof ", to the extent that sales for dollars under the terms applicable to such sales are not possible, for foreign currencies on credit terms and on terms which permit conversion to dollars at the exchange rate applicable to the sales agreement";

(2) by amending section 103(b) to read as follows:

"(b) except where the President determines that it would be inconsistent with the objectives of this Act, determine the amount of foreign currencies needed for the uses specified in subsections (a), (b), (e), and (h) of section 104 and in title III, and the agreements for credit sales shall provide for payment of such amounts in dollars or in foreign currencies upon delivery of the agricultural commodities; and such payment may be considered as an advance payment of the earliest installments;";

(3) in section 103(d), by striking out "(1)" and by striking out ", or (2) for the purpose only of sales of agricultural commodities for foreign currencies under title I of this Act, any country or area dominated by a Communist government";

(4) in section 103(l), by striking out "obtain commitments from friendly" and all that follows through "United States of America, and";

(5) in section 104—

(A) in the text preceding subsection (a), by striking out "this title" and inserting in lieu thereof "agreements for such sales entered into prior to January 1, 1972,"; and

(B) in paragraph (3) of the proviso following subsection (k), by striking out "(except as provided in subsection (c) of this section),";

(6) in section 106(a)—

(A) by inserting "(1)" after "(a)"; and

(B) by adding at the end thereof the following:

"(2) Payment by any friendly country for commodities purchased for foreign currencies on credit terms and on terms which permit conversion to dollars shall be upon terms no less favorable to the United States than those for development loans made under section 122 of the Foreign Assistance Act of 1961.";

(7) by repealing section 108; and

(8) by repealing section 109(b).

EMERGENCY OR EXTRAORDINARY RELIEF REQUIREMENTS

SEC. 402. Section 104(d) of the Agricultural Trade Development and Assistance Act of 1954 is amended by stiking out "$5,000,000" and inserting in lieu thereof "$10,000,000".

SELF-HELP MEASURES TO INCREASE AGRICULTURAL PRODUCTION; VERIFICATION OF SELF-HELP PROVISIONS

SEC. 403. (a) Section 109(a) of the Agricultural Trade Development and Assistance Act of 1954 is amended—

(1) by inserting in paragraph (3) immediately before the semicolon ", and reducing illiteracy among the rural poor";

(2) by striking out the period at the end of paragraph (10) and inserting in lieu thereof "; and"; and

(3) by inserting the following new paragraph immediately after paragraph (10):

"(11) carrying out programs to improve the health of the rural poor.".

(b) Section 109 of the Agricultural Trade Development and Assistance Act of 1954 is amended by adding at the end thereof a new subsection as follows:

"(d)(1) In each agreement entered into under this title and in each amendment to such an agreement, the economic development and self-help measures which the recipient country agrees to undertake shall be described (A) to the maximum extent feasible, in specific and measurable terms, and (B) in a manner which ensures that the needy people in the recipient country will be the major beneficiaries of the self-help measures pursuant to each agreement.

"(2) The President shall, to the maximum extent feasible, take appropriate steps to assure that, in each agreement entered into under this title and in each amendment to such an agreement, the self-help measures agreed to are additional to the measures that the recipient country otherwise would have undertaken irrespective of that agreement or amendment.

"(3) The President shall take all appropriate steps to determine whether the economic development and self-help provisions of each agreement entered into under this title, and of each amendment to such an agreement, are being fully carried out.".

(c) The amendments made by this section shall not be effective if the Agriculture and Food Act of 1981 is enacted (either before or after the enactment of this Act) and contains the same amendments.

TITLE II MINIMUM

Sec. 404. Section 201(b)(3) of the Agricultural Trade Development and Assistance Act of 1954 is amended by striking out "1,400,000 metric tons" and inserting in lieu thereof "1,200,000 metric tons for nonemergency programs".

TITLE V—OTHER ASSISTANCE PROGRAMS

AMERICAN SCHOOLS AND HOSPITALS ABROAD

SEC. 501. Section 214(c) of the Foreign Assistance Act of 1961 is amended by striking out "$30,000,000 for the fiscal year 1981" and inserting in lieu thereof "$20,000,000 for the fiscal year 1982 and $20,000,000 for the fiscal year 1983".

INTERNATIONAL NARCOTICS CONTROL

SEC. 502. (a)(1) Section 481(d) of the Foreign Assistance Act of 1961 is amended to read as follows:

"(d)(1) The Secretary of State shall inform the Secretary of Health and Human Services of the use or intended use by any country or international organization of any herbicide to eradicate marihuana in a program receiving assistance under this chapter.

"(2) The Secretary of Health and Human Services shall monitor the impact on the health of persons who may use or consume marihuana of the spraying of a herbicide to eradicate such marihuana in a program re-

ceiving assistance under this chapter, and if the Secretary determines that such persons are exposed to amounts of such herbicide which are harmful to their health, the Secretary shall prepare and transmit a report to the Congress setting forth such determination together with any recommendations the Secretary may have.

"(3) Of the funds authorized to be appropriated for the fiscal year 1982 under section 482, the President is urged to use not less than $100,000 to develop a substance that clearly and readily warns persons who may use or consume marihuana that it has been sprayed with the herbicide paraquat or other herbicide harmful to the health of such persons.

"(4) If the Secretary of Agriculture determines that a substance has been developed that clearly and readily warns persons who may use or consume marihuana that it has been sprayed with the herbicide paraquat or other herbicide harmful to the health of such persons, such substance shall be used in conjunction with the spraying of paraquat or such other herbicide in any program receiving assistance under this chapter.".

(2) Assistance provided from funds appropriated, before the enactment of this Act, to carry out section 481 of the Foreign Assistance Act of 1961 may be made available for purposes prohibited by subsection (d) of such section as in effect immediately before the enactment of this subsection.

(3) Funds appropriated for the fiscal year 1980 to carry out section 481 of the Foreign Assistance Act of 1961 which were obligated for assistance for the Republic of Columbia may be used for purposes other than those set forth in section 482(a)(2) of that Act as in effect immediately before the enactment of the International Security and Development Cooperation Act of 1980.

(4) Paragraphs (2) and (3) of this subsection shall apply only to the extent provided in advance in an appropriations Act. For such purpose, the funds described in those paragraphs are authorized to be made available for the purposes specified in those paragraphs.

(b) Section 481 of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following new subsection:

"(3) Not later than February 1 of each year, the President shall transmit to the Speaker of the House of Representatives, and to the Committee on Foreign Relations of the Senate, a report on the status of the United States policy to establish and encourage an international strategy to prevent the illicit production of and to interdict and intercept trafficking in narcotics.".

(c) Section 482(a) of such Act is amended to read as follows:

"(a)(1) To carry out the purposes of section 481, there are authorized to be appropriated to the President $37,700,000 for the fiscal year 1982 and $37,700,000 for the fiscal year 1983.

"(2) Amounts appropriated under this subsection are authorized to remain available until expended.".

INTERNATIONAL DISASTER ASSISTANCE

SEC. 503. Section 492(a) of the Foreign Assistance Act of 1961 is amended by striking out "$25,000,000 for the fiscal year 1981" and inserting in lieu thereof "$27,000,000 for the fiscal year 1982 and $27,000,000 for the fiscal year 1983".

ASSISTANCE FOR DISPLACED PERSONS IN CENTRAL AMERICA

SEC. 504. Chapter 9 of part I of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following new section:

"SEC. 495I. ASSISTANCE FOR DISPLACED PERSONS IN CENTRAL AMERICA.—(a)(1) The Congress recognizes that prompt United States assistance is necessary to help meet the basic human needs of persons displaced by strife in El Salvador. Therefore, the President is authorized to furnish assistance, on such terms and conditions as he may determine, to help alleviate the suffering of these displaced persons. Assistance provided under this section shall be for humanitarian purposes, with emphasis on the provision of food, medicine, medical care, and shelter and, where possible, implementation of other relief and rehabilitation activities. The Congress encourages the use, where appropriate, of the services of private and voluntary organizations and international relief agencies in the provision of assistance under this section.

"(2) The Congress understands that the country of Belize has expressed interest and willingness in the resettlement in its territory of Haitian nationals who desire to settle in Belize. Therefore, the President is authorized to furnish assistance, on such terms and conditions as he may determine, to assist the Government of Belize in the resettlement of Haitian nationals in the national territory of Belize.

"(b) There are authorized to be appropriated to the President for the purposes of this section, in addition to amounts otherwise available for such purposes, $5,000,000 for the fiscal year 1982 and $5,000,000 for the fiscal year 1983. Amounts appropriated under this section are authorized to remain available until expended.

"(c) Assistance under this section shall be provided in accordance with the policies and utilizing the general authorities provided in section 491.".

TITLE VI—PEACE CORPS

ESTABLISHMENT AS AN INDEPENDENT AGENCY

SEC. 601. (a) The Peace Corps Act (22 U.S.C. 2501 et seq.) is amended by inserting the following new section 2A immediately after section 2:

"PEACE CORPS AS AN INDEPENDENT AGENCY

"SEC. 2A. Effective on the date of the enactment of the International Security and Development Cooperation Act of 1981, the Peace Corps shall be an independent agency within the executive branch and shall not be an agency within the ACTION Agency or any other department or agency of the United States.".

(b) There are transferred to the Director of the Peace Corps all functions relating to the Peace Corps which were vested in the Director of the ACTION Agency on the day before the date of the enactment of this Act.

(c)(1) All personnel, assets, liabilities, contracts, property, records, and unexpected balance of appropriations, authorizations, allocations, and other funds as are determined by the Director of the Office of Management and Budget, after consultation with the Comptroller General of the United States, the Director of the Peace Corps, and the Director of the ACTION Agency, to be employed, held, used, or assumed primarily in connection with any function relating to the Peace Corps before the date of the enactment of this Act are transferred to the Peace Corps. The transfer of unexpended balances pursuant to the preceding sentence shall be subject to section 202 of the Budget and Accounting Procedures Act of 1950 (31 U.S.C. 581c).

(2)(A) The transfer pursuant to this subsection of full-time personnel (except special Government employees) and part-time personnel holding permanent positions shall not cause any employee to be separated or reduced in rank, class, grade, or compensation, or otherwise suffer a loss of employment benefits for one year after—

(i) the date on which the Director of the Office of Management and Budget submits the report required by subsection (f)(1) of this section, or

(ii) the effective date of the transfer of such employee.

whichever occurs later.

(B) The personnel transferred pursuant to this subsection shall, to the maximum extent feasible, be assigned to such related functions and organizational units in the Peace Corps as such personnel were assigned to immediately before the date of the enactment of this Act.

(C) Collective-bargaining agreements in effect on the date of the enactment of this Act covering personnel transferred pursuant to this subsection or employed on such date of enactment by the Peace Corps shall continue to be recognized by the Peace Corps until the termination date of such agreements or until such agreements are modified in accordance with applicable procedures.

(3) Under such regulations as the President may prescribe, each person who, immediately before the date of the enactment of this Act, does not hold an appointment under section 7(a)(2) of the Peace Corps Act and who is determined under paragraph (1) of this subsection to be employed primarily in connection with any function relating to the Peace Corps shall, effective on the date of the enactment of this Act, and notwithstanding subparagraph (B) of section 7(a)(2) of the Peace Corps Act, be appointed a member of the Foreign Service under section 7(a)(2) of the Peace Corps Act, and be appointed or assigned to an appropriate class of the Foreign Service, except that—

(A) any person who, immediately before such date of enactment, holds a career or career-conditional appointment shall not, without the consent of such person, be so appointed until three years after such date of enactment, during which period any such person not consenting to be so appointed may continue to hold such career or career-conditional appointment; and

(B) each person so appointed who, immediately before such date of enactment held a career or career-conditional appointment at grade GS-8 or lower of the General Schedule established by section 5332 of title 5, United States Code, shall be appointed a member of the Foreign Service for the duration of operations under the Peace Corps Act.

Each person appointed under this paragraph shall receive basic compensation at the rate of such person's class determined by the President to be appropriate, except that the rate of basic compensation received by such person immediately before the effective date of such person's appointment under this paragraph shall not be reduced as a result of the provisions of this paragraph.

(d)(1) Section 4(b) of the Peace Corps Act (22 U.S.C. 2503(b)) is amended by striking out "such agency or officer of the United States Government as he shall direct. The head of any such agency or any such officer" and inserting in lieu thereof "the Director of the Peace Corps. The Director of the Peace Corps".

(2) The Director of the Peace Corps shall continue to exercise all the functions under the Peace Corps Act or any other law or authority which the Director was performing on December 14, 1981.

(e)(1) Section 3 of the Peace Corps Act (22 U.S.C. 2502) is amended by repealing subsections (d), (e), and (f) and by redesignating subsection (g) as subsection (d).

(2) The amendment made by paragraph (1) of this subsection shall not alter or affect (A) the validity of any action taken before the date of the enactment of this Act under those provisions of law repealed by that amendment, or (B) the liability of any person for any payment described in section 3(f) of the Peace Corps Act as in effect immediately before the date of the enactment of this Act.

(f)(1) Not later than the thirtieth day after the date of the enactment of this Act, or February 15, 1982, whichever occurs later, the Director of the Office of Management and Budget, after consultation with the Director of the Peace Corps and the Director of the ACTION Agency, shall submit to the appropriate committees of the Congress and to the Comptroller General a report on the steps taken to implement the provisions of this title, including descriptions of the dispositions of administrative matters, including matters relating to personnel, assets, liabilities, contracts, property, records, and unexpended balances or appropriations, authorizations, allocations, and other funds employed, used, held, available, or to be made available in connection with functions or activities relating to the Peace Corps.

(2) Not later than the forty-fifth day after the date of the enactment of this Act, or March 1, 1982, whichever occurs later, the Comptroller General shall submit to the appropriate committees of the Congress a report stating whether, in the judgment of the Comptroller General, determinations made by the Director of the Office of Management and Budget under subsection (c)(1) of this section were equitable.

(g) References in any statute, reorganization plan, Executive order, regulation, or other official document or proceeding to the ACTION Agency or the Director of the ACTION Agency with respect to functions or activities relating to the Peace Corps shall be deemed to refer to the Peace Corps or the Director of the Peace Corps, respectively.

AUTHORIZATION OF APPROPRIATIONS

SEC. 602. (a) Section 3(b) of the Peace Corps Act (22 U.S.C. 2502(b)) is amended by striking out "fiscal year 1981 not to exceed $118,000,000" and inserting in lieu thereof "the fiscal year 1982 not to exceed $105,000,000 and for the fiscal year 1983 not to exceed $105,000,000".

(b) Section 3(c) of such Act is amended by striking out "fiscal year 1981" and inserting in lieu thereof "each fiscal year".

INTEGRATION OF DISABLED PEOPLE

SEC. 603. Section 3 of the Peace Corps Act (22 U.S.C. 2502) is amended by adding at the end thereof the following new subsection:

"(h) In recognition of the fact that there are over 400,000,000 disabled people in the world, 95 percent of whom are among the poorest of the poor, the Peace Corps shall be administered so as to give particular attention to programs, projects, and activities which tend to integrate disabled people into the national economies of developing countries, thus improving their status and assisting the total development effort.".

RESTORATION OF CERTAIN AUTHORITIES FORMERLY CONTAINED IN THE FOREIGN SERVICE ACT

SEC. 604. (a) Section 10 of the Peace Corps Act (22 U.S.C. 2509) is amended by adding at the end thereof the following new subsections:

"(i) The Director of the Peace Corps shall have the same authority as is available to the Secretary of State under section 26(a) of the State Department Basic Authorities Act of 1956. For purposes of this subsection, the reference in such section 26(a) to a principal officer of the Foreign Service shall be deemed to be a reference to a Peace Corps representative and the reference in such section to a member of the Foreign Service shall be deemed to be a reference to a person employed, appointed, or assigned under this Act.

"(j) The provisions of section 30 of the State Department Basic Authorities Act of 1956 shall apply to volunteers and persons employed, appointed, or assigned under this Act. For purposes of this subsection, references to the Secretary in subsection (b) of such section shall be deemed to be references to the Director of the Peace Corps, references to the Secretary in subsection (f) of such section shall be deemed to be references to the President, and the reference in subsection (g) of such section to a principal representative of the United States shall be deemed to be a reference to a Peace Corps representative.".

(b) Section 5(h) of such Act is amended by striking out the last two sentences.

(c) To the extent that the authorities provided by the amendments made by subsection (a) are authorities which are not applicable with respect to the Peace Corps immediately before the enactment of this Act and which require the expenditure of funds, those authorities may not be exercised using any funds appropriated after February 15, 1981, and before the date of the enactment of this Act.

MISCELLANEOUS-CONFORMING AMENDMENTS

SEC. 605. (a) Section 9 of the Peace Corps Act (22 U.S.C. 2508) is amended by striking out "section 10(a)(4)" in the second sentence and inserting in lieu thereof "section 10(a)(5)".

(b) Section 18 of such Act (22 U.S.C. 2517) is repealed.

READJUSTMENT ALLOWANCE

SEC. 606. The first sentence of section 5(c) of the Peace Corps Act (22 U.S.C. 2504(c)) is amended by striking out "not to exceed $125" and inserting in lieu thereof "not less than $125".

TITLE VII—MISCELLANEOUS PROVISIONS

ADVANCE ACQUISITION OF PROPERTY

SEC. 701. Section 608(a) of the Foreign Assistance Act of 1961 is amended—

(1) in the first sentence—

(A) by inserting ", or (if a substantial savings would occur) other property already owned by an agency of the United States Government," immediately after "excess personal property", and

(B) by inserting "or supplementary to" immediately after "in lieu of"; and

(2) in the second sentence by inserting "any property available from an agency of the United States Government," immediately before "or other property".

CONSTRUCTION OF PRODUCTIVE ENTERPRISES IN EGYPT

SEC. 702. The first sentence of section 620(k) of the Foreign Assistance Act of 1961 is amended by striking out "for fiscal year 1977, fiscal year 1980, or fiscal year 1981".

COMPENSATION FOR PARTICIPATING AGENCY EMPLOYEES

SEC. 703. The first sentence of section 625(d) of the Foreign Assistance Act of 1961 is amended by striking out "together with allowances and benefits under that Act" and inserting in lieu thereof "or under chapter 53 of title 5, United States Code, or at any other rate authorized by law, together with allowances and benefits under the Foreign Service Act of 1980".

NOTIFICATION OF PROGRAM CHANGES

SEC. 704. Section 634A of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following: "Whenever a proposed reprogramming exceeds $1,000,000 and the total amount proposed for obligation for a country under this Act in a fiscal year exceeds by more than $5,000,000 the amount specified for that country in the report required by section 653(a) of this Act, notifications of such proposed reprogrammings shall specify—

"(1) the nature and purpose of such proposed obligation, and

"(2) to the extent possible at the time of the proposed obligation, the country for which such funds would otherwise have been obligated.".

INSPECTOR GENERAL

SEC. 705. (a) The Inspector General Act of 1978 is amended—

(1) in paragraph (1) of section 2, by inserting "the Agency for International Development," immediately after "Department of Transportation,";

(2) in section 11—

(A) in paragraph (1), by inserting "the Agency for International Development," immediately after "Administrator of"; and

(B) in paragraph (2), by inserting "the Agency for International Development," immediately after "Transportation or"; and

(3) by inserting immediately after section 8 the following new section 8A:

"SPECIAL PROVISIONS RELATING TO THE AGENCY FOR INTERNATIONAL DEVELOPMENT

"SEC. 8A. (a) In addition to the other duties and responsibilities specified in this Act, the Inspector General of the Agency for International Development—

"(1) shall supervise, direct, and control all security activities relating to the programs and operations of that Agency, subject to the supervision of the Administrator of that Agency; and

"(2) to the extent requested by the Director of the United States International Development Cooperation Agency (after consultation with the Administrator of the Agency for International Development), shall supervise, direct, and control all audit, investigative, and security activities relating to programs and operations within the United States International Development Cooperation Agency.

"(b) In addition to the Assistant Inspectors General provided for in section 3(d) of this Act, the Inspector General of the Agency for International Development shall, in accordance with applicable laws and regulations governing the civil service, appoint an Assistant Inspector General for Security who shall have the responsibility for supervising the performance of security activities relating to programs and operations of the Agency for International Development.

"(c) The semiannual reports required to be submitted to the Administrator of the Agency for International Development pursuant to section 5(b) of this Act shall also be submitted to the Director of the United States International Development Cooperation Agency.

"(d) In addition to the officers and employees provided for in section 6(a)(6) of this Act, members of the Foreign Service

may, at the request of the Inspector General of the Agency for International Development, be assigned as employees of the Inspector General. Members of the Foreign Service so assigned shall be responsible solely to the Inspector General, and the Inspector General (or his or her designee) shall prepare the performance evaluation reports for such members.

"(e) In establishing and staffing field offices pursuant to section 6(c) of this Act, the Administrator of the Agency for International Development shall not be bound by overseas personnel ceilings established under the Monitoring Overseas Direct Employment policy.

"(f) The reference in section 7(a) of this Act to an employee of the establishment shall, with respect to the Inspector General of the Agency for International Development, be construed to include an employee of or under the United States International Development Cooperation Agency.

"(g) The Inspector General of the Agency for International Development shall be in addition to the officers provided for in section 624(a) of the Foreign Assistance Act of 1961.

"(h) As used in this Act, the term 'Agency for International Development' includes any successor agency primarily responsible for administering part I of the Foreign Assistance Act of 1961.".

(b)(1) Section 624(g) of the Foreign Assistance Act of 1961 is repealed.

(2) Section 239(e) of such Act is amended by striking out "Auditor General" each of the three places it appears and inserting in lieu thereof "Inspector General".

(3) Section 5316 of title 5, United States Code, is amended by striking out "Auditor General of the Agency for International Development" and inserting in lieu thereof "Inspector General, Agency for International Development".

(c) The individual holding the position of Inspector General of the Agency for International Development on the date of enactment of this section shall not be required to be reappointed by reason of the enactment of this section.

OPERATING EXPENSES

SEC. 706. Section 667(a) of the Foreign Assistance Act of 1961 is amended—

(1) by striking out ", for the fiscal year 1981"; and

(2) in paragraph (1) by striking out "293,800,000" and inserting in lieu thereof "$335,600,000 for the fiscal year 1982 and $335,600,000 for the fiscal year 1983".

TECHNICAL AMENDMENT

SEC. 707. The last sentence of section 620(f) of the Foreign Assistance Act of 1961 is amended to read as follows: "For the purposes of this subsection, the phrase 'Communist country' includes specifically, but is not limited to, the following countries:

"Czechoslovak Socialist Republic.
"Democratic People's Republic of Korea.
"Estonia.
"German Democratic Republic.
"Hungarian People's Republic.
"Latvia.
"Lithuania.
"Mongolian People's Republic.
"People's Republic of Albania.
"People's Republic of Bulgaria.
"People's Republic of China.
"Polish People's Republic.
"Republic of Cuba.
"Socialist Federal Republic of Yugoslavia.
"Socialist Republic of Romania.
"Socialist Republic of Vietnam.
"Tibet.
"Union of Soviet Socialist Republics (including its captive constituent republics).".

EMERGENCY HUMANITARIAN HELP FOR THE PEOPLE OF POLAND

SEC. 708. (a) The people of Poland, with whom the people of the United States have a longstanding friendship, now face serious domestic food shortages which will be worsened by large-scale loss of the livestock this winter if feed supplies do not arrive quickly. Therefore, the President is urged, for urgent humanitarian reasons, to use existing authorities promptly in order to provide to the people of Poland, under as favorable terms as possible, feed grains from Commodity Credit Corporation stocks or other appropriate commodities.

(b) For the longer term, the President is encouraged to pursue discussions with other Western countries about a multilateral effort to help the people of Poland achieve self-sustaining economic recovery in the years ahead.

(c) Chapter 4 of part II of the Foreign Assistance Act of 1961, as amended by section 202 of this Act, is further amended by adding at the end thereof the following new section:

"SEC. 540. POLAND.—Notwithstanding any other provision of law, $5,000,000 of the amount authorized to be appropriated to carry out this chapter for the fiscal year 1982 shall be available only for Poland for the purchase, transportation, and distribution of food and medical supplies through private and voluntary agencies where appropriate.".

USE OF CERTAIN POLISH CURRENCIES

SEC. 709. (a) Notwithstanding section 1415 of the Supplemental Appropriation Act, 1953, section 508 of the General Government Matters, Department of Commerce, and Related Agencies Appropriation Act, 1962, or any other provision of law, the currencies or credits received by the United States from the April 1981 sale and from the October 1981 sale of United States Government-held surplus dairy products to Poland shall, to such extent as may be provided in advance in an appropriation Act, be used by the President in Poland to serve United States interests, including use for activities of common benefit to the people of the United States and the people of Poland, such as joint programs in energy, agriculture, education, science, health, and culture, or for humanitarian activities.

(b) Notwithstanding any other provision of law, the availability or expenditure of such foreign currencies or credits shall not affect or reduce appropriations otherwise available for the purposes described in subsection (a).

FINDINGS REGARDING GLOBAL SECURITY

SEC. 710. (a) The Congress finds that the security of the United States and other countries is increasingly affected by a broad range of global problems including shortages or potential shortages of food, oil, water, wood, and other basic mineral and natural resources; desperate poverty; sickness; population pressures; environmental deterioration, including soil erosion and water pollution; and large-scale and destabilizing refugee problems.

(b) The Congress finds that hunger, disease, and extreme poverty are among the most critical of these global problems. As ever greater numbers of people perceive the disparity between their own continuing deprivation and the prosperity of others, and judge their predicament to be neither just nor inevitable, it becomes increasingly likely that there will be unrest and violence with consequent disruption of the flow of essential materials, adverse effects on the world economy, decreased likelihood of cooperative efforts toward meeting the other critical problems threatening national and global security, and increased likelihood of confrontation between nations which possess nuclear arms.

Therefore, the Congress finds that the Nation's understanding of global and national security must be broad enough to include the problems cited in this section, and that adequate protection of the security of the United States requires effective action on these global problems, and in particular on the problems of hunger, disease, and extreme poverty.

WORLD FOOD SECURITY RESERVES

SEC. 711. (a) The Congress finds that—

(1) the Congress recently passed and the President signed into law an Act which provides for establishment of a United States food security reserve of up to four million metric tons of wheat to be used for emergency food assistance;

(2) the food import needs of developing countries will increase over the next ten years; and

(3) other grain exporting countries could take additional steps to assure continuity of food assistance during food crisis years.

(b) The president shall encourage other grain exporting countries to establish their own food security reserves or take other measures that complement the United States food security reserve.

(c) The President shall report to the Speaker of the House of Representatives and the Committee on Foreign Relations of the Senate within one year after the enactment of this Act on the actions he has taken and the response of other countries to these proposals.

FINDINGS AND DECLARATION OF POLICY REGARDING WORLD HUNGER

SEC. 712. The Congress, affirming the value of human life, finds and declares that the elimination of hunger and its causes is of fundamental moral significance and, further, that it is the political, economic, and security interests of the United States. Therefore, the Congress declares that the elimination of hunger and its causes shall be a primary objective of United States relations with the developing countries.

REAFFIRMATION OF SUPPORT FOR HUMAN RIGHTS PROVISIONS

SEC. 713. (a) The Congress reaffirms its support for the various statutory provisions which have been enacted in order to promote internationally recognized human rights.

(b) It is the sense of the Congress that a strong commitment to the defense of human rights should continue to be a central feature of United States foreign policy.

IMMIGRANT VISAS FOR TAIWAN

SEC. 714. The approval referred to in the first sentence of section 202(b) of the Immigration and Nationality Act shall be considered to have been granted with respect to Taiwan (China).

LEBANON

SEC. 715. It is the sense of the Congress that the Government of the United States should continue to support diplomatic efforts to resolve the current crisis in Lebanon, and to pursue a comprehensive and co-

ordinated policy in Lebanon guided by the following principles:

(1) maintenance of an effective cease-fire throughout Lebanon;

(2) resolution of the issue of the Syrian missiles deployed in Lebanon;

(3) freedom, security, and opportunity for the Christian and all other Lebanese communities, including the Moslem, Druze, Armenian, and Jewish communities in Lebanon;

(4) reaffirmation of the historic United States-Lebanon relationship and strengthening the longstanding commitment of the United States to the independence, sovereignty, and territorial integrity of Lebanon, without partition, free from terrorism and violence, and free to determine its future without Soviet or other outside interference;

(5) generous international support for relief, rehabilitation, and humanitarian assistance for Lebanon, particularly for those Lebanese citizens who have suffered from the terrorism and violence of recent events;

(6) restoration of Lebanon's sovereignty free from outside domination or occupation; and

(7) support for a free and open national election.

USE OF CHEMICAL AND TOXIN WEAPONS

SEC. 716. (a) The Congress condemns the use of, and the provision for use of, chemical agents and toxin weapons against the peoples of Laos, Kampuchea, or Afghanistan.

(b) It is the sense of the Congress that the President should, acting through the Permanent Representative of the United States to the United Nations and all other appropriate diplomatic agents, seek definite measures to bring to an end actions by any party or government in using, and providing for use, chemical agents or toxin weapons against the people of Laos, Kampuchea, and Afghanistan, in violation of the spirit and the provisions of—

(1) the Convention on the Prohibition of the Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on Their Destruction (done at Washington, London, and Moscow on April 10, 1972);

(2) the Protocol for the Prohibition of the Use in War of Asphyxiating, Poisonous or Other Gases, and of Bacteriological Methods of Warfare (signed at Geneva on June 17, 1925); and

(3) customary international law.

(c) It is further the sense of Congress that the President should—

(1) allocate the highest possible priority to the development of further evidence clarifying the nature and origins of the chemical agents and toxin weapons being used against the peoples of Laos, Kampuchea, and Afghanistan; and

(2) vigorously seek a satisfactory explanation from the Government of the Soviet Union regarding the strong circumstantial and presumptive evidence of its role in the use, or provision for use, of such weapons.

(d) The Congress reiterates the concern expressed in House Resolution 644 (96th Congress), adopted by the House of Representatives on May 19, 1980, regarding the outbreak of pulmonary anthrax near Sverdlosk on April 3, 1979, and expresses its disappointment that the Soviet Union has failed adequately to respond to requests for data explaining this incident as provided in the Convention on the Prohibition of the Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on Their Destruction.

(e) It is further the sense of Congress that the negotiation of a treaty prohibiting the development, production, and stockpiling of chemical weapons, with reliable verification provisions, should be given a high priority by the United States Government and by all foreign governments.

FINANCIAL OBLIGATIONS OF THE SOVIET UNION TO THE UNITED NATIONS

SEC. 717. (a) The Congress finds and declares that—

(1) the financing of the United Nations is the collective responsibility of all member nations;

(2) the International Court of Justice has determined that the expenses of the United Nations incurred in its peacekeeping operations are properly included as a part of the regular expenses of the United Nations;

(3) peacekeeping operations are vital to the mission of the United Nations and must be adequately financed if such operations are to continue; and

(4) the Government of the Union of Soviet Socialist Republics is currently $180,000,000 in arrears on its payments to the United Nations, primarily as a result of its refusal to pay for the peacekeeping operations of the United Nations.

(b) It is the sense of the Congress that the President, acting through the Permanent Representative of the United States to the United Nations, should undertake a diplomatic initiative to obtain payment by the Government of the Union of Soviet Socialist Republics of all its outstanding financial obligations to the United Nations, including its assessments with respect to the peacekeeping operations of the United Nations.

CONDEMNATION OF LIBYA FOR ITS SUPPORT OF INTERNATIONAL TERRORIST MOVEMENTS

SEC. 718. (a) The Congress condemns the Libyan Government for its support of international terrorist movements, its efforts to obstruct positive movement toward the peaceful resolution of problems in the Middle East region, and its actions to destabilize and control governments of neighboring states in Africa.

(b) The Congress believes that the President should conduct an immediate review of concrete steps the United States could take, individually and in concert with its allies, to bring economic and political pressure on Libya to cease such activities, and should submit a report on that review to the Congress within one hundred eighty days after the date of enactment of this Act. Such a review should include the possibility of tariffs on or prohibitions against the import of crude oil from Libya.

UNITED STATES CITIZENS ACTING IN THE SERVICE OF INTERNATIONAL TERRORISM

SEC. 719. (a) It is the sense of the Congress that the spread of international terrorism poses a grave and growing danger for world peace and for the national security of the United States. As a part of its vigorous opposition to the activities of international terrorist leaders and the increase of international terrorism, the United States should take all steps necessary to ensure that no United States citizen is acting in the service of terrorism or of the proponents of terrorism.

(b) Not later than six months after the enactment of this Act, the President shall submit to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate a report which includes—

(1) a description of all legislation, currently in force, and of all administrative remedies, presently available, which can be employed to prevent the involvement, service, or participation by United States citizens in activities in support of international terrorism or terrorist leaders;

(2) an assessment of the adequacy of such legislation and remedies, and of the enforcement resources available to carry out such measures, to prevent the involvement, service, or participation by United States citizens in activities in support of international terrorism or terrorist leaders; and

(3) a description of available legislative and administrative alternatives, together with an assessment of their potential impact and effectiveness, which could be enacted or employed to put an end to the participation by United States citizens in activities in support of international terrorism or terrorist leaders.

NONALIGNED COUNTRIES

SEC. 720. (a) In considering whether to provide assistance, make sales, extend credits, or guarantee loans under the provisions of the Foreign Assistance Act of 1961, as amended, or the Arms Export Control Act, to any country represented at the Meeting of the Ministers of Foreign Affairs and Heads of Delegations of the Non-Aligned Countries to the 36th General Session of the General Assembly of the United Nations on September 25 and 28, 1981, the President shall take into account whether such country has disassociated itself from the communique issued following the meeting.

(b) Within thirty days after the date of enactment of this section, the President shall submit a report to the Speaker of the House of Representatives and the Committee on Foreign Relations of the Senate on the countries which have dissociated themselves from the nonaligned countries communique and on their methods of dissociation.

PROMOTING THE DEVELOPMENT OF THE HAITIAN PEOPLE AND PROVIDING FOR ORDERLY EMIGRATION FROM HAITI

SEC. 721. (a)(1) It is the sense of the Congress that up to $15,000,000 of the funds available for the fiscal year 1982 to carry out chapter 1 of part I of the Foreign Assistance Act of 1961 should be made available for development assistance for Haiti, subject to the limitation in subsection (b) of this section.

(2) To the maximum extent practicable, assistance for Haiti for the fiscal year 1982 under chapter 1 of part I of the Foreign Assistance Act of 1961 should be provided through private and voluntary organizations.

(b) Funds available for the fiscal year 1982 to carry out chapter 1 of part I or chapter 2 or chapter 5 of part II of the Foreign Assistance Act of 1961 may be expended for Haiti, and credits and guarantees extended for the fiscal year 1982 under the Arms Export Control Act may be approved for use for Haiti, only if the President determines that the Government of Haiti—

(1) is cooperating with the United States in halting illegal emigration from Haiti;

(2) is not aiding, abetting, or otherwise supporting illegal emigration from Haiti;

(3) has provided assurances that it will cooperate fully in implementing United States development assistance programs in Haiti (including programs for prior fiscal years); and

(4) is not engaged in a consistent pattern of gross violations of internationally recognized human rights.

(c) Six months after the date of enactment of this Act, the President shall prepare and transmit to the Congress a report on the extent to which the actions of the Govern-

ment of Haiti are consistent with paragraphs (1), (2), (3), and (4) of subsection (b) of this section.

(d) Notwithstanding the limitations of section 660 of the Foreign Assistance Act of 1961, funds made available under such Act for the fiscal year 1982 and for the fiscal year 1983 may be used for programs with Haiti to assist in halting significant illegal emigration from Haiti to the United States.

COMPREHENSIVE ANALYSIS OF FOREIGN ASSISTANCE

SEC. 722. (a) It is the sense of Congress that at a time when major retrenchments and reappraisals are being made in domestic programs, it is also logical that, while maintaining past international commitments, the magnitude and direction of future foreign assistance programs should also be reviewed. As part of such a review process, the President is requested to provide a comprehensive report to the Congress on his approach to foreign assistance. Such report shall include an analysis and recommendations on the following issues:

(1) the relationship between foreign assistance and defense expenditures as means of conducting foreign policy;

(2) the appropriate mix between military and economic assistance;

(3) the strengths and weaknesses, and appropriate mix, of bilateral and multilateral assistance programs;

(4) the relevance of the basic human needs approach to current aid policy;

(5) the performance of other aid donors, and the benefits they derive from their programs;

(6) criteria for determining the appropriate size and composition of country programs;

(7) the appropriateness of the current mix of grants and loans, and the possibility of combining them with new or existing guarantee, insurance, and export credit programs;

(8) specific means to more actively engage the private sector in assistance programs; and

(9) the usefulness of current functional categories in constructing the development assistance budget.

(b) The Congress requests that the President provide to the Congress a preliminary report by March 31, 1982, and a final report by June 30, 1982, with respect to the issues referred to in subsection (a).

EXTERNAL DEBT BURDENS OF EGYPT, ISRAEL, AND TURKEY

SEC. 723. The Congress finds that the Governments of Egypt, Israel, and Turkey each have an enormous external debt burden which may be made more difficult by virtue of financing provided for those governments under various United States assistance programs. In order to assist the Congress in examining United States assistance for these countries, the President shall report to the Speaker of the House of Representatives and to the chairman of the Committee on Foreign Relations of the Senate, not later than 120 days after the date of enactment of this Act and not later than one year after the date of enactment of this Act, regarding economic conditions prevailing in Egypt, Israel, and Turkey which may affect their respective ability to meet their international debt obligations and to stabilize their economies. These reports shall also analyze the impact on Egypt's economy of Arab sanctions against Egypt.

NICARAGUA

SEC. 724. (a) In furnishing assistance under this Act to the Government of Nicaragua, the President shall take into account the extent to which that Government has engaged in violations of internationally recognized human rights (including the right to organize and operate labor unions free from political oppression, the right to freedom of the press, and the right to freedom of religion) and shall encourage the Government of Nicaragua to respect those rights.

(b) In furnishing assistance under this Act to the Government of Nicaragua, the President shall take into account the extent to which that Government has fulfilled its pledge of July 1979 to the member states of the Organization of American States—

(1) to establish full respect for human rights in Nicaragua in accordance with the United Nations Universal Declaration of the Rights and Duties of Man and the Charter on Human Rights of the Organization of American States;

(2) to allow the free movement in Nicaragua of the Inter-American Commission on Human Rights; and

(3) to establish the framework for free and democratic elections so that the people of Nicaragua may elect their representatives to city councils, to constitutional assembly, and to Nicaragua's highest-ranking authorities, with such framework to include, but not be limited to, the full and complete opportunity for political activity of the Nicaraguan people.

(c) Assistance to the Government of Nicaragua under this Act shall be terminated if the President determines and reports to the Congress that the Government of Nicaragua cooperates with or harbors any international terrorist orgainzation or is aiding, abetting, or supporting acts of violence or terrorism in other countries, or that Soviet, Cuban, or other foreign combat military forces are stationed or situated within the borders of Nicaragua and the presence of such forces constitutes a threat to the national security of the United States or to any Latin American ally of the United States.

(d) Any agreement between the United States and the Government of Nicaragua regarding the use of funds appropriated to carry out this Act, which are to be made available in the form of loans, shall specifically require that to the maximum extent possible such loan funds, and any local currency generated in conjunction therewith, shall be used for assistance to the private sector. Local currency loan programs in Nicaragua shall be monitored and audited in accordance with section 624(g) of the Foreign Assistance Act of 1961.

(e) For each six-month period in which any funds are expended under this Act for Nicaragua, the President shall submit to the Speaker of the House of Representatives, and the chairman of the Committee on Foreign Relations of the Senate, a report accounting fully and in itemized detail for the amounts obligated and actually expended in Nicaragua.

ASSISTANCE AND SALES FOR ARGENTINA

SEC. 725 (a) Section 620B of the Foreign Assistance Act of 1961 is repealed.

(b) Notwithstanding any other provision of law, assistance may be provided to Argentina under chapter 2, 4, 5, or 6 of part II of the Foreign Assistance Act of 1961, credits (including participations in credits) may be extended and loans may be guaranteed with respect to Argentina under the Arms Export Control Act, defense articles and defense services may be sold to Argentina under the Arms Export Control Act, and export licenses may be issued to or for the Government of Argentina under section 38 of the Arms Export Control Act only if the President has submitted to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate a detailed report certifying that—

(1) the Government of Argentina has made significant progress in complying with internationally recognized principles of human rights; and

(2) the provision of such assistance, credits, loan guaranties, defense articles, defense services, or export licenses is in the national interests of the United States.

(c) The Congress welcomes the actions of the Government of Argentina to adjudicate numerous cases of those detained under the National Executive Power of the Argentine Government, and the Congress hopes that progress will continue, especially with regard to providing information on citizens listed as "disappeared" and prisoners remaining at the disposition of the National Executive Power. In the process of making the determination required in paragraph (1) of subsection (b), among other things, the President shall consider—

(1) efforts by the Government of Argentina to provide information on citizens identified as "disappeared"; and

(2) efforts by the Government of Argentina to release or bring to justice those prisoners held at the disposition of the National Executive Power (PEN).

REPEAL OF LIMITATIONS ON ASSISTANCE, SALES, AND SALES CREDITS FOR CHILE

SEC. 726. (a) Section 406 of the International Security Assistance and Arms Export Control Act of 1976 (22 U.S.C. 2370 note) is repealed.

(b) Notwithstanding any other provision of law—

(1) no assistance may be furnished under chapter 2, 4, 5, or 6 of part II of the Foreign Assistance Act of 1961 to Chile;

(2) no sale of defense articles or services may be made under the Arms Export Control Act to Chile;

(3) no credits (including participation in credits) may be extended and no loan may be guaranteed under the Arms Export Control Act with respect to Chile; and

(4) no export licenses may be issued under section 38 of the Arms Export Control Act to or for the Government of Chile;

unless and until the President submits to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate a detailed report certifying—

(A) that the Government of Chile has made significant progress in complying with internationally recognized principles of human rights;

(B) that the provision of such assistance, articles or services is in the national interest of the United States; and

(C) that the Government of Chile is not aiding or abetting international terrorism, and has taken appropriate steps to cooperate to bring to justice by all legal means available in the United States or Chile those indicted by a United States grand jury in connection with the murders of Orlando Letelier and Ronni Moffitt.

ASSISTANCE FOR EL SALVADOR

SEC. 727. (a) It is the sense of the Congress that assistance furnished to the Government of El Salvador, both economic and military, should be used to encourage—

(1) full observance of internationally recognized human rights in accordance with

sections 116 and 502B of the Foreign Assistance Act of 1961;

(2) full respect for all other fundamental human rights, including the right of freedom of speech and of the press, the right to organize and operate free labor unions, and the right to freedom of religion;

(3) continued progress in implementing essential economic and political reforms, including land reform and support for the private sector;

(4) a complete and timely investigation of the deaths of all United States citizens killed in El Salvador since October 1979;

(5) an end to extremist violence and the establishment of a unified command and control of all government security forces in this effort;

(6) free, fair, and open elections at the earliest date; and

(7) increased professional capability of the Salvadoran Armed Forces in order to establish a peaceful and secure environment in which economic development and reform and the democratic processes can be fully implemented, thereby permitting a phased withdrawal of United States military training and advisory personnel at the earliest possible date.

(b) It is the sense of the Congress that the United States economic assistance to El Salvador should put emphasis on revitalizing the private sector and supporting the free market system. The Congress recognizes that the lack of foreign exchange to buy imported raw materials and intermediate goods is a major impediment to the ability of the Salvadoran economy to provide jobs. The Congress also recognizes that the funds budgeted for economic assistance are only a fraction of the foreign exchange needed and United States economic aid should be used, wherever possible, to stimulate private sector lending. Therefore, the Congress urges the President to set aside a portion of the economic support funds to provide guarantees to private United States banks willing to give credits to the Salvadoran private sector.

RESTRICTIONS ON MILITARY ASSISTANCE AND SALES TO EL SALVADOR

SEC. 728. (a)(1) The Congress finds that peaceful and democratic development in Central America is in the interest of the United States and of the community of American States generally, that the recent civil strife in El Salvador has caused great human suffering and disruption to the economy of that country, and that substantial assistance to El Salvador is necessary to help alleviate that suffering and to promote economic recovery within a peaceful and democratic process. Moreover, the Congress recognizes that the efforts of the Government of El Salvador to achieve these goals are affected by the activities of forces beyond its control.

(2) Taking note of the substantial progress made by the Government of El Salvador in land and banking reforms, the Congress declares it should be the policy of the United States to encourage and support the Government of El Salvador in the implementation of these reforms.

(3) The United States also welcomes the continuing efforts of President Duarte and his supporters in the Government of El Salvador to establish greater control over the activities of members of the armed forces and government security forces. The Congress finds that it is in the interest of the United States to cooperate with the Duarte government in putting an end to violence in El Salvador by extremist elements among both the insurgents and the security forces, and in establishing a unified command and control of all government forces.

(4) The United States supports the holding of free, fair, and open elections in El Salvador at the earliest date. The Congress notes the progress being made by the Duarte government in this area, as evidenced by the appointment of an electoral commission.

(b) In fiscal years 1982 and 1983, funds may be obligated for assistance for El Salvador under chapter 2 or 5 of part II of the Foreign Assistance Act of 1961, letters of offer may be issued and credits and guarantees may be extended for El Salvador under the Arms Export Control Act, and members of the Armed Forces may be assigned or detailed to El Salvador to carry out functions under the Foreign Assistance Act of 1961 or the Arms Export Control Act, only if not later than 30 days after the date of enactment of this Act and every one hundred and eighty days thereafter, the President makes a certification in accordance with subsection (d).

(c) If the President does not make such a certification at any of the specified times then the President shall immediately—

(1) suspend all expenditures of funds and other deliveries of assistance for El Salvador which were obligated under chapters 2 and 5 of part II of the Foreign Assistance Act of 1961 after the date of enactment of this Act;

(2) withhold all approvals for use of credits and guarantees for El Salvador which were extended under the Arms Export Control Act after the date of enactment of this Act;

(3) suspend all deliveries of defense articles, defense services, and design and construction services to El Salvador which were sold under the Arms Export Control Act after the date of enactment of this Act; and

(4) order the prompt withdrawal from El Salvador of all members of the Armed Forces performing defense services, conducting international military education and training activities, or performing management functions under section 515 of the Foreign Assistance Act of 1961.

Any suspension of assistance pursuant to paragraphs (1) through (4) of this subsection shall remain in effect during fiscal year 1982 and during fiscal year 1983 until such time as the President makes a certification in accordance with subsection (d).

(d) The certification required by subsection (b) is a certification by the President to the Speaker of the House of Representatives and to the chairman of the Committee on Foreign Relations of the Senate of a determination that the Government of El Salvador—

(1) is making a concerted and significant effort to comply with internationally recognized human rights;

(2) is achieving substantial control over all elements of its own armed forces, so as to bring to an end the indiscriminate torture and murder of Salvadoran citizens by these forces;

(3) is making continued progress in implementing essential economic and political reforms, including the land reform program;

(4) is committed to the holding of free elections at an early date and to that end has demonstrated its good faith efforts to begin discussions with all major political factions in El Salvador which have declared their willingness to find and implement an equitable political solution to the conflict, with such solution to involve a commitment to—

(A) a renouncement of further military or paramilitary activity; and

(B) the electoral process with internationally recognized observers.

Each such certification shall discuss fully and completely the justification for making each of the determinations required by paragraphs (1) through (4).

(e) On making the first certification under subsection (b) of this section, the President shall also certify to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate that he has determined that the Government of El Salvador has made good faith efforts both to investigate the murders of the six United States citizens in El Salvador in December 1980 and January 1981 and to bring to justice those responsible for those murders.

REPORTING REQUIREMENT RELATING TO EL SALVADOR

SEC. 729. (a) Not later than ninety days after the date of enactment of this section, the President shall prepare and transmit to the Speaker of the House of Representatives and to the chairman of the Committee on Foreign Relations of the Senate a report setting forth—

(1) the viewpoints of all major parties to the conflict in El Salvador and of the influential actors in the Salvadoran political system regarding the potential for and interest in negotiations, elections, and a settlement of the conflict; and

(2) the views of democratic Latin American nations, Canada, the Organization of American States, and European allies of the United States regarding a negotiated settlement to such conflict.

(b) It is the sense of the Congress that the President shall, as soon as possible, send a special envoy or use other appropriate means to consult with and gather information from appropriate representatives of the parties to the Salvadoran conflict, democratic governments of Latin America, Canada, and European allies of the United States regarding the attainment of a negotiated settlement in El Salvador.

RESTRICTIONS ON AID TO EL SALVADOR

SEC. 730. None of the funds authorized to the appropriated by this Act may be made available for the provision of assistance to El Salvador for the purpose of planning for compensation, or for the purpose of compensation, for the confiscation, nationalization, acquisition, or expropriation of any agricultural or banking enterprise, or of the properties or stock shares which may be pertaining thereto.

EL SALVADORAN REFUGEES

SEC. 731. It is the sense of the Congress that the administration should continue to review, on a case-by-case basis, petitions for extended voluntary departure made by citizens of El Salvador who claim that they are subject to persecution in their homeland, and should take full account of the civil strife in El Salvador in making decisions on such petitions.

CONSOLIDATED REPORTS: ARMS EXPORT CONTROL ACT

SEC. 732. Section 25 of the Arms Export Control Act is amended to read as follows:

"SEC. 25. ANNUAL ESTIMATE AND JUSTIFICATION FOR SALES PROGRAM.—(a) No later than February 1 of each year, the President shall transmit to the Congress, as a part of the annual presentation materials for security assistance programs proposed for the next fiscal year, a report which sets forth—

"(1) an Arms Sales Proposal covering all sales and licensed commercial exports under this Act of major weapons or weapons-related defense equipment for $7,000,000 or more, or of any other weapons or weapons-related defense equipment for $25,000,000 or more,

which are considered eligible for approval during the current calendar year, together with an indication of which sales and licensed commercial exports are deemed most likely actually to result in the issuance of a letter of offer or of an export license during such year;

"(2) an estimate of the total amount of sales and licensed commercial exports expected to be made to each foreign nation from the United States;

"(3) the United States national security considerations involved in expected sales or licensed commercial exports to each country, an analysis of the relationship between anticipated sales to each country and arms control efforts concerning such country and an analysis of the impact of such anticipated sales on the stability of the region that includes such country;

"(4) an estimate with regard to the international volume of arms traffic to and from nations purchasing arms as set forth in paragraphs (1) and (2) of this subsection, together with best estimates of the sale and delivery of weapons and weapons-related defense equipment by all major arms suppliers to all major recipient countries during the preceding fiscal year;

"(5) an estimate of the aggregate dollar value and quantity of defense articles and defense services, military education and training, grant military assistance, and credits and guarantees, to be furnished by the United States to each foreign country and international organization in the next fiscal year;

"(6) an analysis and description of the services performed during the preceding fiscal year by officers and employees of the United States Government carrying out functions on a full-time basis under this Act for which reimbursement is provided under section 43(b) or section 21(a) of this Act, including the number of personnel involved in performing such services;

"(7) the total amount of funds in the reserve under section 24(c) at the end of the fiscal year immediately preceding the fiscal year in which a report under this section is made, together with an assessment of the adequacy of such total amount of funds as a reserve for the payment of claims under guaranties issued pursuant to section 24 in view of the current debt servicing capacity of borrowing countries, as reported to the Congress pursuant to section 634(a)(5) of the Foreign Assistance Act of 1961;

"(8) a list of all countries with respect to which findings made by the President pursuant to section 3(a)(1) of this Act are in effect on the date of such transmission;

"(9) the progress made under the program of the Republic of Korea to modernize its armed forces, the role of the United States in mutual security efforts in the Republic of Korea and the military balance between the People's Republic of Korea and the Republic of Korea;

"(10) the amount and nature of Soviet military assistance to the armed forces of Cuba during the preceding fiscal year and the military capabilities of those armed forces;

"(11) the status of each loan and each contract of guaranty or insurance theretofore made under the Foreign Assistance Act of 1961, predecessor Acts, or any Act authorizing international security assistance, with respect to which there remains outstanding any unpaid obligation or potential liability; the status of each extension of credit for the procurement of defense articles or defense services, and of each contract of guaranty in connection with any such procurement, theretofore made under the Arms Export Control Act with respect to which there remains outstanding any unpaid obligation or potential liability; and

"(12) such other information as the President may deem necessary.

"(b) Not later than thirty days following the receipt of a request made by the Committee on Foreign Relations of the Senate or the Committee on Foreign affairs of the House of Representatives for additional information with repsect to any information submitted pursuant to subsection (a), the President shall submit such information to such committee.

"(c) The President shall make every effort to submit all of the information required by subsection (a) or (b) wholy in unclassified form. Whenever the President submits any such information in classified form, he shall submit such classified information in an addendum and shall also submit simultaneously a detailed summary, in unclassified form, of such classified information.".

CONSOLIDATED REPORTS: FOREIGN ASSISTANCE ACT OF 1961

SEC. 733. Section 634(a) of the Foreign Assistance Act of 1961 is amended—

(1) by amending the first sentence to read as follows: "In order that the Congress and the American people may be better and more currently informed regarding American foreign policy and the effectiveness of assistance provided by the United States Government to other countries and to international organizations, the Chairman of the Development Coordination Committee shall prepare and transmit to the Congress, no later than February 1 of each year, as a part of the annual presentation materials for foreign assistance, a report as described in this subsection. This report shall include—";

(2) in paragraph (1)(B), by striking out "the progressive developing countries are making toward achieving those objectives which are indicative of improved well-being of the poor majority, which objectives shall include but not be limited to";

(3) in paragraph (2)—

(A) by striking out "and" at the end of subparagraph (D);

(B) by adding "and" at the end of subparagraph (E);

(C) by adding at the end thereof the following:

"(F) of any contract in excess of $100,000 administered by the Agency for International Development which was entered into in the preceding fiscal year without competitive selection procedures, and the reasons for doing so;";

(4) by amending paragraph (4) to read as follows:

"(4) the status of each sale of agricultural commodities on credit terms theretofore made under the Agricultural Trade Development and Assistance Act of 1954 with respect to which there remains outstanding any unpaid obligation; and the status of each transaction with respect to which a loan, contract or guarantee of insurance, or extension of credit (or participation therein) was theretofore made under the Export-Import Bank Act of 1945 with respect to which there remains outstanding any unpaid obligation or potential liability; except that such report shall include individually only any loan, contract, sale, extension of credit, or other transactions listed in this paragraph which is in excess of $1,000,000;";

(5) in paragraph (7), by striking out "and" after the semicolon; and

(6) by striking out paragraph (8) and inserting in lieu thereof the following new paragraphs:

"(8) the amount of all foreign currencies acquired without payment of dollars on hand of each foreign country as of September 30 of the preceding fiscal year;

"(9) the Development Coordination Committee's operations pursuant to section 640B(f) of this Act;

"(10) the aggregate dollar value and quantity of grant military assistance, military education and training, and any other defense articles and services furnished under this Act by the United States to each foreign country and international organization for the preceding fiscal year;

"(11) information concerning the activities of the Minority Resource Center during the preceding fiscal year; and

"(12) other information appropriate to the conduct of the foreign assistance program of the United States Government.".

REPEALS

SEC. 734. (a) The following provisions of the following Acts are repealed:

(1) The Foreign Assistance Act of 1961: Sections 125(b), 301(b), 301(e)(3), 302(a)(3), 451(b), 481(c)(2), 495D(e), 495H(c)(2), 513, 601(e)(2), 613(c), 620(b), 620(i), 620(m), 640B(g), 657, 659, and 668, and the second sentence of section 542.

(2) The International Security and Development Cooperation Act of 1980: Sections 108, 313(b), 603, 713, 714, 720, and 721.

(3) The International Development Cooperation Act of 1979: Sections 124, 504(b), 506, 507(b), 508(b), and 509(c).

(4) The Special International Security Assistance Act of 1979: Sections 4(e)(2), 7(b), 8(c), and 9.

(5) The International Development and Food Assistance Act of 1978: Sections 117(b)(2), 122(b), 201, 303, and 603(a)(1).

(6) The International Development and Food Assistance Act of 1977: Sections 132(a), 133(c)(6), and 214.

(7) Section 213 of the International Development and Food Assistance Act of 1975.

(8) The Foreign Assistance Act of 1974: Sections 3, 25, 26, 27, 43, 49, 50(c), and 51(c).

(9) The Foreign Assistance Act of 1973: Sections 36(e), 37, and 38.

(10) The Arms Export Control Act: Section 43(c), and the fifth paragraph of section 1.

(11) The International Security Assistance Act of 1979: Sections 6(b), 20(a), 25, and 28.

(12) The International Security Assistance Act of 1978: Sections 15(b), 23(d), 23(e)(2), 24(c), 25, and 27.

(13) The International Security Assistance Act of 1977: Sections 14, 22, 24(c), 25, and 28(a)(2).

(14) Section 507 of the International Security Assistance and Arms Export Control Act of 1976.

(15) Section 7 of the Act entitled "An Act to amend the Foreign Military Sales Act, and for other purposes", approved January 12, 1971 (22 U.S.C. 2410a).

(b) Section 620(s)(1) of the Foreign Assistance Act of 1961 is amended—

(1) in subparagraph (A) by inserting "and" after the semicolon;

(2) in subparagraph (B)—

(A) by inserting "or other" after "foreign exchange", and

(B) by striking out "; and " and inserting in lieu thereof a period; and

(3) by repealing subparagraph (C).

(c) Except as otherwise explicitly provided by their terms, amendments to the Foreign Assistance Act of 1961 and the Arms Export

Control Act which are applicable only to a single fiscal or calendar year or which require reports or other actions on a nonrecurring basis shall be deemed to have expired and shall be removed from law upon the expiration of the applicable time periods for the fulfillment of the required actions.

REPORT ON NUCLEAR ACTIVITIES

SEC. 735. Beginning with the fiscal year 1983 and for each fiscal year thereafter, the President shall prepare and transmit to the Congress, as part of the presentation materials for foreign assistance programs proposed for that fiscal year, a classified report describing the nuclear programs and related activities of any country for which a waiver of section 669 or 670 of the Foreign Assistance Act of 1961 is in effect, including an assessment of—

(1) the extent and effectiveness of International Atomic Energy Agency safeguards at that country's nuclear facilities; and

(2) the capability, actions, and intentions of the government of that country with respect to the manufacture or acquisition of a nuclear explosive device.

ASSISTANCE TO PAKISTAN

SEC. 736. Chapter 1 of part III of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following:

"SEC. 620E. ASSISTANCE TO PAKISTAN.—(a) The Congress recognizes that Soviet forces occupying Afghanistan pose a security threat to Pakistan. The Congress also recognizes that an independent and democratic Pakistan with continued friendly ties with the United States is in the interest of both nations. The Congress finds that United States assistance will help Pakistan maintain its independence. Assistance to Pakistan is intended to benefit the people of Pakistan by helping them meet the burdens imposed by the presence of Soviet forces in Afghanistan and by promoting economic development. In authorizing assistance to Pakistan, it is the intent of Congress to promote the expeditious restoration of full civil liberties and representative government in Pakistan. The Congress further recognizes that it is in the mutual interest of Pakistan and the United States to avoid the profoundly destablilizing effects of the proliferation of nuclear explosive devices or the capacity to manufacture or otherwise acquire nuclear devices.

"(b) The United States reaffirms the commitment made in its 1959 bilateral agreement with Pakistan relating to aggression from a Communist or Communist-dominated state.

"(c) Security assistance for Pakistan shall be made available in order to assist Pakistan in dealing with the threat to its security posed by the Soviet presence in Afghanistan. The United States will take appropriate steps to ensure that defense articles provided by the United States to Pakistan are used for defensive purposes.

"(d) The President may waive the prohibitions of section 669 of this Act at any time during the period beginning on the date of enactment of this section and ending on September 30, 1987, to provide assistance to Pakistan during that period if he determines that to do so is in the national interest of the United States.".

PROHIBITIONS RELATING TO NUCLEAR TRANSFERS AND NUCLEAR DETONATIONS

SEC. 737. (a) The Congress finds that any transfer of a nuclear explosive device to a non-nuclear-weapon state or, in the case of a non-nuclear-weapon state, any receipt or detonation of a nuclear explosive device would cause grave damage to bilateral relations between the United States and that country.

(b) Section 669(b)(2) of the Foreign Assistance Act of 1961 is amended to read as follows:

"(2)(A) A certification under paragraph (1) of this subsection shall take effect on the date on which the certification is received by the Congress. However, if, within 30 calendar days after receiving this certification, the Congress adopts a concurrent resolution stating in substance that the Congress disapproves the furnishing of assistance pursuant to the certification, then upon the adoption of that resolution the certification shall cease to be effective and all deliveries of assistance furnished under the authority of that certification shall be suspended immediately.

"(B) Any concurrent resolution under this paragraph shall be considered in the Senate in accordance with the provisions of section 601(b) of the International Security Assistance and Arms Export Corntrol Act of 1976.

"(C) For the purpose of expediting the consideration and adoption of concurrent resolutions under this paragraph, a motion to proceed to the consideration of any such resolution after it has been reported by the appropriate committee shall be treated as highly privileged in the House of Representatives.".

(c) Section 670 of such Act is amended to read as follows:

"SEC. 670. NUCLEAR REPROCESSING TRANSFERS, TRANSFERS OF NUCLEAR EXPLOSIVE DEVICES, AND NUCLEAR DETONATIONS.—(a)(1) Except as provided in paragraph (2) of this subsection, no funds authorized to be appropriated by this Act or the Arms Export Control Act may be used for the purpose of providing economic assistance (including assistance under chapter 4 of part II), providing military assistance or grant military education and training, providing assistance under chapter 6 of part II, or extending military credits or making guarantees, to any country which on or after the date of enactment of the International Security Assistance Act of 1977 delivers nuclear reprocessing equipment, materials, or technology to any other country or receives such equipment, materials, or technology from any other country (except for the transfer of reprocessing technology associated with the investigation, under international evaluation programs in which the United States participates, of technologies which are alternatives to pure plutonium reprocessing).

"(2) Nothwithstanding paragraph (1) of this subsection, the President may furnish assistance which would otherwise be prohibited under that paragraph if he determines and certifies in writing to the Speaker of the House of Representatives and the Committee on Foreign Relations of the Senate that the termination of such assistance would be seriously prejudicial to the achievement of United States nonproliferation objectives or otherwise jeopardize the common defense and security. The President shall transmit with such certification a statement setting forth the specific reasons therefor.

"(3)(A) A certification under paragraph (2) of this subsection shall take effect on the date on which the certification is received by the Congress. However, if, within 30 calendar days after receiving this certification, the Congress adopts a concurrent resolution stating in substance that the Congress disapproves the furnishing of assistance pursuant to the certification, then upon the adoption of that resolution the certification shall cease to be effective and all deliveries of assistance furnished under the authority of that certification shall be suspended immediately.

"(B) Any concurrent resolution under this paragraph shall be considered in the Senate in accordance with the provisions of section 601(b) of the International Security Assistance and Arms Export Control Act of 1976.

"(C) For the purpose of expediting the consideration and adoption of concurrent resolutions under this paragraph, a motion to proceed to the consideration of any such resolution after it has been reported by the appropriate committee shall be treated as highly privileged in the House of Representatives.

"(b)(1) Except as provided in paragraphs (2) and (3) of this subsection, no funds authorized to be appropriated by this Act or the Arms Export Control Act may be used for the purpose of providing economic assistance (including assistance under chapter 4 of part II), providing military assistance or grant military education and training, providing assistance under chapter 6 of part II, or extending military credits or making guarantees, to any country which on or after the date of enactment of the International Security Assistance Act of 1977—

"(A) transfers a nuclear explosive device to a non-nuclear-weapon state, or

"(B) is a non-nuclear-weapon state and either—

"(i) receives a nuclear explosive device, or

"(ii) detonates a nuclear explosive device.

"(2)(A) Notwithstanding paragraph (1) of this subsection, the President may, for a period of not more than 30 days of continuous session, furnish assistance which would otherwise be prohibited under paragraph (1) of this subsection if, before furnishing such assistance, the President transmits to the Speaker of the House of Representatives, and to the Chairman of the Committee on Foreign Relations of the Senate, a certification that he has determined that an immediate termination of assistance to that country would be detrimental to the national security of the United States. Not more than one such certification may be transmitted for a country with respect to the same detonation, transfer, or receipt of a nuclear explosive device.

"(B) If the President transmits a certification to the Congress under subparagraph (A), a joint resolution which would permit the President to exercise the waiver authority of paragraph (3) of this subsection shall, if introduced in either House within 30 days of continuous session after the Congress receives this certification, be considered in the Senate and House of Representatives in accordance with subparagraphs (C) and (D) of this paragraph.

"(C) Any joint resolution under this paragraph shall be considered in the Senate in accordance with the provisions of section 601(b) of the International Security Assistance and Arms Export Control Act of 1976.

"(D) For the purpose of expediting the consideration and adoption of joint resolutions under this paragraph, a motion to proceed to the consideration of such a joint resolution after it has been reported by the appropriate committee shall be treated as highly privileged in the House of Representatives.

"(E) For purposes of this paragraph, the term 'joint resolution' means a joint resolution the matter after the resolving clause of which is as follows: 'That the Congress having received on a certification by the President under section 670(b)(2) of the Foreign Assistance Act of 1961 with respect

to , the Congress hereby authorizes the President to exercise the waiver authority contained in section 670(b)(3) of that Act.', with the date of receipt of the certification inserted in the first blank and the name of the country inserted in the second blank.

"(3) Notwithstanding paragraph (1) of this subsection, if the Congress enacts a joint resolution under paragraph (2) of this subsection, the President may furnish assistance which would otherwise be prohibited under paragraph (1) if he determines and certifies in writing to the Speaker of the House of Representatives and the Committee on Foreign Relations of the Senate that the termination of such assistance would be seriously prejudicial to the achievement of United States nonproliferation objectives or otherwise jeopardize the common defense and security. The President shall transmit with such certification a statement setting forth the specific reasons therefor.

"(4) For purposes of this subsection, continuity of session is broken only by an adjournment of Congress sine die and the days on which either House is not in session because of an adjournment of more than three days to a day certain are excluded in the computation of any period of time in which Congress is in continuous session.

"(5) As used in this subsection, the term 'non-nuclear-weapon state' means any country which is not a nuclear-weapon state, as defined in article IX(3) of the Treaty on the Non-Proliferation of Nuclear Weapons.".

And the House agree to the same.

AMENDMENT TO TITLE

That the Senate recede from its disagreement to the amendment of the House to the title of the bill, and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the House amendment to the title of the bill, insert the following: "An Act to authorize appropriations for the fiscal years 1982 and 1983 for international security and development assistance and for the Peace Corps, to establish the Peace Corps as an autonomous agency, and for other purposes.".

And the House agree to the same.

CLEMENT J. ZABLOCKI,
DANTE B. FASCELL,
LEE H. HAMILTON,
JONATHAN B. BINGHAM,
STEPHEN J. SOLARZ,
DON BONKER,
DAN MICA,
MICHAEL D. BARNES,
HOWARD WOLPE,
DAVID R. BOWEN,
WM. S. BROOMFIELD,
EDWARD J. DERWINSKI,
PAUL FINDLEY,
LARRY WINN, Jr.,
ROBERT J. LAGOMARSINO,
Managers on the Part of the House.

For the consideration of all provisions except title VI of the Senate bill and title IV of the House amendment (relating to the Food for Peace Program, Public Law 480):

CHARLES H. PERCY,
S. I. HAYAKAWA,
RICHARD G. LUGAR,
CHARLES McC. MATHIAS, Jr.,
CLAIBORNE PELL,
JOSEPH R. BIDEN, Jr.,
JOHN GLENN,
PAUL S. SARBANES,

Mr. Cranston in lieu of Mr. Biden as an additional conferee solely for the consideration of those provisions dealing with the Peace Corps:

ALAN CRANSTON,

For the consideration of title VI of the Senate bill and title IV of the House amendment (relating to the Food for Peace Program, Public Law 480):

JESSE HELMS,
ROBERT DOLE,
S. I. HAYAKAWA,
RICHARD G. LUGAR,
WALTER D. HUDDLESTON,
PATRICK J. LEAHY,
EDWARD ZORINSKY,
Managers on the Part of the Senate.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1196) to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act to authorize appropriations for development and security assistance programs for the fiscal year 1982, to authorize appropriations for the Peace Corps for the fiscal year 1982, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The House amendment to the text of the bill struck out all of the Senate bill after the enacting clause and inserted a substitute text.

The Senate recedes from its disagreement to the amendment of the House to the text of the bill with an amendment which is a substitute for the Senate bill and the House amendment. The differences between the Senate bill, the House amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached in the committee of conference, and minor drafting and clarifying changes.

AUTHORIZATION OF APPROPRIATIONS FOR FISCAL YEARS 1982 AND 1983

The amounts contained in the conference substitute compared to the amounts requested by the executive branch and recommended by the House and Senate follow:

AUTHORIZATION OF APPROPRIATIONS FOR FISCAL YEARS 1982 AND 1983

[By fiscal year; in thousands of dollars]

Title	1982 executive request (September)	1982 Senate bill	1982 House amendment	1983 House amendment	1982 conference substitute	1983 conference substitute

AUTHORIZATION OF APPROPRIATIONS FOR FISCAL YEARS 1982 AND 1983—Continued

[By fiscal year; in thousands of dollars]

Title	1982 executive request (September)	1982 Senate bill	1982 House amendment	1983 House amendment	1982 conference substitute	1983 conference substitute
VII—Operating expenses: (IDCA/AID)	317,000	330,972	343,632	374,215	335,600	335,600
Grand total	5,727,854	5,826,497 [3] —67,600	6,176,883 ([3])	[3] 6,416,730	5,901,070	5,960,570
		5,758,897	5,727,854			

[1] FMS guarantees are not authorizations of appropriations. The figures in parentheses represent the principal amount of loans which can be extended under the FMS guarantee program.
[2] Plus up to $139.5 million after fiscal year 1982.
[3] Senate bill had a floor amendment reducing the total by $67.6 million. House amendment had a floor amendment limiting the aggregate for fiscal 1982 to $5,727,854 and for fiscal 1983 to not more than the President's budget.

2-Year Authorization

The committee of conference, in authorizing appropriations for fiscal year 1983, recognizes that the President has not yet made his legislative and budgetary requests for that year. The committee of conference does not intend to preclude such requests. The Committees on Foreign Affairs of the House and Foreign Relations of the Senate will give full consideration to any additional recommendations by the executive branch.

Title I—Military and Related Assistance and Sales—Funding and Related Issues

The authorization figures in the bill are compromises between Senate and House figures. The Senate bill authorizes, for fiscal year 1982, $990.9 million in FMS direct credits, $3,085.5 million in FMS guarantees, $31.4 million in grant military assistance, $47.7 million in grant military education and training, and $19 million in peacekeeping operations assistance. The House amendment authorizes, for fiscal year 1982, $550 million in FMS direct credits, $3,269.525 million in FMS guarantees, $304.375 million in grant military assistance, $47.7 million in grant military education and training, and $19 million in peacekeeping operations assistance. In addition, the House amendment authorizes $150 million for the special defense acquisition fund, funds for which the Senate authorized not for appropriation but as a revolving fund. The conference substitute sets funding levels as follows: $800 million for FMS direct credits, $3,269.525 million in FMS guarantees, $238.5 million in grant military assistance, $42 million in grant military education and training, and $19 million in peacekeeping operations assistance, and is the same as the Senate position concerning the special defense acquisition fund.

For fiscal year 1983, the conference agreed to continue levels established for fiscal year 1982.

Military assistance financing

The Senate bill (secs. 105 and 110) amends section 31 of the Arms Export Control Act and section 504(a) of the Foreign Assistance Act to authorize $990.9 million in FMS direct credits ($500 million earmarked for Israel) for which repayment would be forgiven ($31.4 million in grant military assistance) and an additional $3,085.5 million in FMS guarantees.

The House amendment (secs. 103 and 108) amends section 31 of the Arms Export Control Act and section 504(a) of the Foreign Assistance Act to authorize $550 million in FMS direct credits (all earmarked for Israel with $500 million repayment forgiven), $304.375 million in grant military assistance and $3,269.525 million in FMS guarantees.

The conference substitute is a compromise whereby $800 million in FMS direct credits, repayment forgiven, are provided for Egypt ($200 million), Israel ($550 million), and Sudan ($50 million). The substitute compromise provides $238.5 grant military assistance and $3,269.525 million in FMS guarantees.

Military assistance special requirements fund

The House amendment (sec. 108) authorizes grant military assistance that includes $25 million under the grant military assistance account for a special requirements fund.

The Senate bill does not contain a comparable provision.

The conference substitute authorizes special requirements MAP funds as part of the overall MAP authorization.

Zaire reduction

The House amendment recommends a military assistance level for Zaire of $4 million.

The Senate bill does not contain a comparable provision.

The conference substitute is a compromise whereby $6.0 million is recommended for Zaire.

Fiscal year 1983 authorizations

The House amendment (secs. 103, 106, 108, 111, 112) authorizes for appropriation military assistance and related assistance for fiscal year 1983 totaling $1,076.12

The Senate bill does not contain a comparable provision.

The conference substitute is a compromise that authorizes assistance totaling $1,099.5 million for fiscal year 1983.

Drawdown authority

The Senate bill (sec. 110(b)) amends section 506(a) of the Foreign Assistance Act of 1961 to increase the Presidential authority to draw down Department of Defense stocks in emergency situations from $50 million to $100 million.

The House amendment does not contain a comparable provision.

The conference substitute is the same as the Senate provision with an amendment that sets the drawdown level at $75 million.

Military assistance windup

The House amendment (sec. 108(b)) repeals section 516 of the Foreign Assistance Act of 1961 that terminates grant military assistance authority to any country 5 years after the last fiscal year authorization of grant military assistance to that country.

The Senate bill does not contain a comparable provision.

The conference substitute is the same as the House provision. Repeal of this 5-year limitation is necessary due to approval by the committee of conference of a special requirements fund, the use of which obviously cannot be confined to specific countries for specific periods of time.

Reports to Congress

(a) The Senate/bill (sec. 102) reduces the congressional prenotification period on third-country arms transfers, and government-to-government arms sales, and for NATO, Australia, Japan, and New Zealand from 30 to 15 days.

The House amendment (sec. 101 (a), (c), and (d)) exempts NATO, Australia, Japan, and New Zealand from legislative veto over such transfers but retains a congressional prenotification requirement.

The conference substitute is the same as the Senate provision. The committee of conference intends that the 20-day, informal, prenotification requirement for NATO, Japan, Australia, and New Zealand be eliminated. Congress will also have an opportunity to review next year the advisability of eliminating the legislative veto for transfers to such countries.

(b) The House amendment (sec. 101(b)) increases from 5 to 15 days the deadline for submission of price and availability reports and retains $7 million/$25 million ceilings for these reports.

The Senate bill (sec. 712) eliminates price and availability reports.

The conference substitute is the same as the House provision.

Personnel performing defense services

The Senate bill (sec. 103) amends section 21(c)(2) of the Arms Export Control Act to require more stringent reporting on hostilities or terrorist acts which might endanger American lives or property where U.S. personnel are performing defense services overseas.

The House amendment does not contain a comparable provision.

The conference substitute is the same as the Senate provision with an amendment to include only significant hostilities or terrorist acts or a series of such hostilities or acts under the reporting requirements of this section of the Arms Export Control Act. This change from the Senate language was included to avoid multiple reporting requirements but the compromise is intended to require reports at a lower threshold than under existing law.

Foreign military sales authorization and ceiling

Greece earmark

The House amendment (sec. 103(b)) amends section 31 of the Arms Export Control Act to earmark $280 million in FMS financing for each fiscal year 1982 and 1983.

The Senate bill does not contain a comparable provision.

The conference substitute is the same as the House provision. The decision of the conferees is not intended to preclude the possibility of adjustments for Greece in fiscal year 1983.

Favorable repayment terms

The House amendment (sec. 103(d)) contains a provision to provide long-term repayment (30 years with a 10-year grace period on repayment of principal) for Egypt, Greece, and Turkey.

The Senate bill (sec. 105(d)) provides such long-term repayment terms for those countries and for Sudan and Somalia.

The conference substitute is the same as the Senate provision.

MUNITIONS LIST REVIEW

The House amendment (sec. 104) amends section 38 of the Arms Export Control Act to require periodic munitions list review to determine what items no longer warrant export controls.

The Senate bill does not contain a comparable provision.

The conference substitute is the same as the House provision. It is the intention of the conferees that the provision not be used to circumvent controls for certain countries otherwise ineligible to purchase U.S. defense articles or services because of U.S.-imposed restrictions on international embargoes which the United States upholds. The conferees further expect that the munitions list should be reviewed at least annually.

CHARGES FOR ADMINISTRATIVE SERVICES

The House amendment (sec. 105) amended section 43(b) of the Arms Export Control Act to allow representational activities expenses to be charged to FMS sales.

The Senate bill does not contain a comparable provision.

The conference sutstitute is the same as the Senate position.

COMMERCIAL CEILING

The Senate bill (sec. 106) repealed section 38(b)(3) of the Arms Export Control Act which established a $100 million ceiling for commercial exports.

The House amendment does not contain a comparable provision.

The conference substitute is the same as the Senate provision.

AGENTS FEES

The Senate bill (sec. 107) amends section 39 of the Arms Export Control Act to eliminate a report requirement on political contributions, gifts, commissions, and fees paid in connection with FMS sales while retaining the President's discretion to regulate with respect to such payments.

The House amendment does not contain a comparable provision.

The conference substitute is the same as the House position. The conferees believe that there will be adequate opportunity to review the desirability of modifying section 39 of the Arms Export Control Act pending congressional modifications of the Foreign Corrupt Practices Act.

SPECIAL DEFENSE ACQUISITION FUND (SDAF)

Method and amount of authorization

The Senate bill (sec. 108) establishes a revolving fund that would use collections from FMS sales and limits the size of the fund to $350 million in fiscal year 1982 and $700 million in fiscal year 1983. The purpose of establishing this fund is to limit any adverse effects which might result from a drawdown from U.S. military stocks in those situations which require the United States to furnish military assistance under emergency circumstances to meet foreign crises.

The House amendment (sec. 106) authorizes direct appropriations for the special defense acquisition fund (SDAF) and authorizes $150 million for each fiscal year 1982 and 1983 for the procurement of defense articles.

The conference substitute is the same as the Senate provision with an amendment to limit the fund to $300 million in fiscal year 1982 and $600 million in fiscal year 1983 and thereafter. The $600 million is a ceiling on the amounts in the fund plus the value (in terms of acquisition cost) of the defense articles acquired by the fund which have not been transferred under the terms of the laws governing the SDAF.

Legislative vehicle for ceiling

The Senate bill (sec. 108) establishes ceilings on the size of the SDAF in Department of Defense legislation (title 10 of the U.S.C.) and requires legislation in appropriations acts.

The House amendment (sec. 106) authorizes funds for the SDAF in the Arms Export Control Act.

The conference substitute is the same as the Senate provision.

Report

The Senate bill (sec. 108) requires annual reports estimating likely procurements by the fund.

The House amendment (sec. 106) requires a comprehensive report on acquisitions by the fund, including descriptions of items procured by the fund, future requirements of the fund, and an evaluation of the SDAF's impact on U.S. readiness.

The conference substitute is the same as the House provision, except that a report would also be provided to the Armed Services Committee.

LEASES

The House amendment (sec. 107) amends the Arms Export Control Act to add a new chapter 6 requiring that foreign leasing be conducted under the Arms Export Control Act or the Foreign Assistance Act. The new chapter requires a Presidential determination of compelling foreign policy and national security reasons to lease rather than sell; it requires full costing for leases with certain specified exceptions; it requires reports on all leases for 1 year or more; and it provides for possible legislative veto for leases valued at over $14 million for major defense equipment and $50 million for other defense equipment.

The Senate bill (sec. 109) retains foreign leasing authority under 10 U.S.C. 2667. It thereby retains the ability for military departments to lease when they consider it advantageous to the United States. The Senate provision contains no comparable costing provision. It requires reports on leases valued at over $14 million for major defense equipment and over $50 million for other defense property for 1 year or more and contains no congressional veto provision.

The conference substitute is the same as the House provision.

STOCKPILES

The House amendment (sec. 109) amends section 514 (b)(2) of the Foreign Assistance Act to authorize additions to war reserve stockpiles overseas of $100 million for fiscal year 1982 and $125 million for fiscal year 1983.

The Senate bill (sec. 111) authorizes additions of $160 million for fiscal year 1982.

The conference substitute is a compromise that authorizes $130 million in stockpile additions for fiscal year 1982 and $125 million in additions for fiscal year 1983. The committee of conference are concerned that, while the United States is making additions to war reserve stocks in Korea, Korea is transferring to other countries similar types of war reserve material manufactured by its own defense industries for which its military units continue to have requirements.

OVERSEAS MANAGEMENT

The Senate bill (sec. 112) amends section 515 of the Foreign Assistance Act to authorize assignment of U.S. Armed Forces personnel overseas to perform necessary management and other functions related to security assistance programs and stated that the total number so assigned may not exceed numbers justified to Congress.

The House amendment (sec. 110) amends section 515 of the Foreign Assistance Act to authorize assignment of U.S. Armed Forces personnel overseas to perform identified functions, to retain the current 6-man limitation on countries not authorized for larger security assistance management teams, to authorize larger-than-six-man teams in 12 specific countries, and to retain the requirement in current law with respect to encouragement, promotion, or influence of arms sales by U.S. diplomatic and military personnel.

The conference substitute is the same as the House provision.

PEACEKEEPING OPERATIONS

Sinai force

The House amendment (sec. 112(b)) amends section 551 of the Foreign Assistance Act to prohibit use of peacekeeping authority for the Sinai peacekeeping force.

The Senate bill does not contain a comparable provision.

The conference substitute is the same as the Senate position. Congressional action to authorize U.S. participation in the Sinai peacekeeping force is anticipated in the near future.

Transfer between accounts

The House amendment (sec. 112(c)) amends section 552(c) of the Foreign Assistance Act, effective October 1, 1981, to remove the prohibition in current law on the transfer of earmarked economic support fund moneys into the peacekeeping operations account and to place a $15 million ceiling on the total amount of such funds that may be transferred into account.

The Senate bill does not contain a comparable provision.

The conference substitute is the same as the House provision.

FOREIGN INTIMIDATION AND HARASSMENT

The House amendment (sec. 116) adds a new section 6 to the Arms Export Control Act that would allow FMS financing and sales and commercial exports to foreign countries only if the President certifies that the governing authorities of such countries are not engaged in a consistent pattern of acts of intimidation or harassment directed against individuals in the United States.

The Senate bill does not contain a comparable provision.

The conference substitute is the same as the House provision with an amendment to require Presidential determination only when a country is engaged in a consistent pattern of acts of intimidation or harassment directed against individuals in the United States.

TITLE II—ESF DIFFERENCES

MONEY ISSUES

Total authorization level

Fiscal year 1982

The Senate bill (sec. 201(a)) authorizes $2,548,500,000 for economic support fund (ESF) programs for fiscal year 1982.

The House amendment (sec. 201) authorizes $2,688 million for the same purposes.

The conference substitute authorizes $2,623,500,000, which is the amount recommended to be appropriated by the Senate Appropriations Committee. The committee of conference notes that the House amendment provides for assistance levels under this title for Morocco, Kenya, and Somalia which are higher than the President's request. The committee urges the President to provide such assistance should funds be available.

Fiscal year 1983

The House amendment (sec. 201) authorizes $2,738 million for ESF programs for fiscal year 1983.

The Senate bill does not contain a similar provision.

The conference substitute authorizes $2,723,500,000.

Earmarks

Turkey

The Senate bill (sec. 201(b)) earmarks $300 million of the funds authorized for ESF for Turkey for fiscal year 1982.

The House amendment does not contain a similar provision but the House Foreign Affairs Committee report recommends that $300 million in the total ESF authorization level be available for Turkey for fiscal years 1982 and 1983.

The conference substitute is the same as the House position. The committee of conference agreed in general to earmark funds only when those country levels were in excess of the President's request.

Cyprus

The Senate bill (sec. 201(b)) earmarks $10 million of the ESF authorization for Cyprus for fiscal year 1982 for refugee relief, reconstruction, and educational exchange programs.

The House amendment (sec. 202) earmarks $15 million for Cyprus, of which $5 million is to be available only for programs to bring Cypriots to the United States for education for fiscal years 1982 and 1983.

The conference substitute is the same as the House provision for fiscal year 1982 and for fiscal year 1983 earmarks $15 million for Cyprus, of which $10 million is to be available only for programs to educate Cypriots in the United States.

Tunisia

The Senate bill (sec. 201(b)) earmarks $5 million of the ESF authorization for Tunisia for fiscal year 1982.

The House amendment does not contain a similar provision.

The conference substitute is the same as the Senate provision for fiscal year 1982 with an amendment earmarking the same amount for fiscal year 1983.

Costa Rica

The Senate bill (sec. 201(b)) earmarks $15 million of the ESF authorization for Costa Rica for fiscal year 1982.

The House amendment does not contain a similar provision. The report of the House Foreign Affairs Committee recommends that $25 million of the total ESF authorization level be available for Costa Rica for fiscal years 1982 and 1983.

The conference substitute is the same as the Senate provision for fiscal year 1982 and earmarks the same amount for fiscal year 1983.

In view of the serious economic situation faced by Costa Rica, and the vital importance of that unique Central American democracy to the United States, the committee of conference notes that the $15 million earmark is a floor, and strongly urges the executive branch to make available $25 million for Costa Rica as recommended by the House.

Pakistan

The Senate bill (sec. 201(b)) earmarks $100 million of the economic support fund for Pakistan for fiscal year 1982.

The House amendment (sec. 114) authorizes $100 million for ESF assistance for Pakistan for fiscal year 1982 and (sec. 201) includes $200 million in the total ESF authorization level for Pakistan for fiscal year 1983.

The conference substitute has no earmark but includes $100 million in the total ESF authorization level for Pakistan for fiscal year 1982 and accepts the House provision for fiscal year 1983.

In providing fiscal year 1983 economic assistance funds for Pakistan from economic assistance authorities, it is the intention of the committee of conference that funds will not be taken from development assistance accounts, but that development projects currently planned will be funded by the economic support funds.

Lebanon

The Senate bill (sec. 715(b)) earmarks $5 million of economic support funds for fiscal year 1982 for relief and rehabilitation programs of international and private voluntary agencies.

The House amendment (sec. 202) sets out the sense of the Congress to authorize $7 million for Lebanon for fiscal year 1982 and not less than $7 million for fiscal year 1983 be available for the same purposes and by international and private voluntary agencies, and other not-for-profit U.S. organizations operating in Lebanon.

The conference substitute is a sense of Congress provision that $7 million for fiscal year 1982 and $7 million or more for fiscal year 1983 should be provided for Lebanon for the purposes set forth in the House amendment. The substitute does not earmark funds for Lebanon.

Commodity import program

The Senate bill (sec. 201(a)(2)) amends section 531 of the Foreign Assistance Act to provide that not less than 15 percent of the ESF funds authorized to be appropriated each fiscal year which are allocated under the commodity import program (CIP) to finance purchase of U.S.-produced commodities shall be available only for financing the purchase of agricultural commodities produced in the United States.

The House amendment does not contain a comparable provision.

The conference substitute directs the President to apply 15 percent or more of the total expenditures for the CIP programs for agricultural commodities and agricultural-related products from the United States for fiscal years 1982 and 1983.

Special requirements fund

The Senate bill (sec. 201(a)(b)) authorizes up to $75 million for a special requirements fund and requires a report to Congress 15 days in advance of any obligation of these funds.

The House amendment does not contain a similar provision, but includes $100 million in the total ESF authorization level in fiscal years 1982 and 1983 for a special requirements fund.

The conference substitute is the same as the Senate provision for fiscal year 1982 and authorizes the same level for fiscal year 1983.

Flexibility authority

(a) The Senate bill provides for a $50 million drawdown authority for emergency use when U.S. national interests urgently require such funding to promote economic or political stability.

The House amendment provides for a $100 million drawdown authority for the same purposes for fiscal years 1982 and 1983.

The conference substitute provides for $75 million in drawdown authority for fiscal years 1982 and 1983.

(b) The Senate bill provides that notwithstanding the earmarks for Israel, Egypt, Turkey, and Cyprus, up to 5 percent of any earmarked funds under this chapter may be drawn on to carry out the provisions of subsection (b)(1).

The House amendment provides that notwithstanding any provisions of chapter 4 or of any appropriations act—including a joint resolution providing continuing appropriations—which earmarks funds for a specific country or purpose, up to 5 percent of any earmarked funds may be drawn on to carry out the provisions of subsection (b)(1).

The conference substitute is the same as the House provision.

Egyptian small farmers

The House amendment (sec. 202(a)) provides for up to $50 million for fiscal years 1982 and 1983 for title XII agricultural extension programs for small farmers in Egypt in order to upgrade the skills of the agricultural faculty in provincial universities, improve the agricultural curriculum offered and the equipment available in provincial universities, and establish a provincial university extension service with an outreach program which can directly reach the Egyptian small farmer.

The Senate bill does not contain a similar provision.

The conference substitute is the same as the House provision. The committee of conference notes that the purpose of the provision is to provide policy direction for the President while allowing him discretionary authority. The $50 million figure is not to be considered an earmark.

MESRF

(a) The House amendment (sec. 302(b)) provides for up to $11 million for the Middle East special requirements fund, for fiscal years 1982 and 1983, including $4 million for each fiscal year for Middle East regional cooperation.

The Senate bill does not contain a similar provision, but its ESF total includes $4 million for Middle East regional cooperation and $7 million for program support and PVO's.

The conference substitute is the same as the House provision.

(b) The House amendment provides up to $4 million for fiscal years 1982 and 1983 to promote regional cooperation and contains sense of Congress language regarding the promotion of these cooperative projects to promote peace in the Middle East.

The Senate bill does not contain a similar provision, but its ESF total includes $4 million for Middle East regional cooperation.

The conference substitute is the same as the House provision.

Israel and Egypt—fiscal year 1983

Earmarks

The House amendment earmarks $785 million for Israel and $750 million for Egypt for fiscal year 1983.

The Senate bill does not contain a similar provision.

The conference substitute is the same as the House provision and provides the traditional aid level for Israel and Egypt.

Grant basis

The House amendment makes all funds available to Israel and Egypt under this chapter for fiscal year 1983 on a grant basis.

The Senate bill does not contain a comparable provision.

The conference substitute is the same as the House provision.

Cash transfers

The House amendment makes available, as a cash transfer, the total amount of funds allocated for Israel under this chapter for fiscal year 1983, as long as it does not adversely impact on the total amount of nonmilitary exports from the United States to Israel.

The Senate bill does not contain a similar provision.

The conference substitute is the same as the House provision.

POLICY ISSUES

Egyptian lands development

The House amendment (section 202(a)) contains a new section 532 of the Foreign Assistance Act which provides for obligation of funds for new lands development in Egypt, 90 days after the AID Administrator submits a report to Congress on the feasibility, the projected costs and the cost-benefits of desert reclamation in Egypt and on the projected role and magnitude of U.S. economic assistance in Egyptian desert reclamation.

The Senate bill does not contain a similar provision.

The conference substitute is the same as the Senate position. The committee of conference is concerned over any proposed use of U.S. AID funds for desert reclamation or "new lands" in Egypt. Studies available to the committee indicate that past desert reclamation efforts in Egypt have contributed little to domestic food requirements and that future efforts would be extremely expensive and less cost-effective than investment in old lands.

The committee of conference notes further that a substantial portion of the funding for Egypt in this title is to be used for increasing Egypt's ability to provide food for its population, an objective also pursued in the section relating to small farmers in Eygpt. The prospective reduction of direct U.S. food aid to Egypt is intended to reinforce this effort in future years.

Reports to Congress have suggested that dependency on U.S. food aid has served as a disincentive to Egyptian agricultural production, and the State Department has stated that "we recognize that it is not in Egypt's best interests in its efforts to achieve greater food self-sufficiency for us to continue high levels of food aid for the indefinite future."

In this regard, the Department states that there has been a 12-percent reduction from the originally projected $313 million in U.S. concessional food aid sales to Egypt in fiscal year 1982 to a currently planned $275 million and that a further cut of about 9 percent, to $250 million, is envisaged in the draft budget for fiscal year 1983. The fiscal year 1982 program is expected to represent 38 percent of the worldwide Public Law 480 title I food program. The proposal for fiscal year 1983 is about 30 percent of the global program.

The State Department has stated that "the administration will continue its efforts both to reduce Egypt's dependence on Public Law 480 and decrease its percentage of the program." The administration is to be commended for these steps and encouraged to adhere to this course in the future. Such steps will help avoid an excessively high level of food aid going to any one country and thereby insure that more of the program will be available to meet food and emergency humanitarian needs and carry out U.S. objectives elsewhere.

MESRF

(a) The House amendment requires a prenotification regarding the obligation of Middle East special requirements funds, before the President obligates these funds, in accordance with the existing procedures under section 634A of the Foreign Assistance Act of 1961, as amended.

The Senate bill does not contain a similar provision.

The conference substitute is the same as the House provision.

(*b*) The House amendment requires an annual report to congress at the end of fiscal years 1981, 1982, and 1983 on the use of Middle East special requirements funds.

The Senate bill does not contain a similar provision.

The conference substitute is the same as the House provision.

Syria

(*a*) The House amendment (sec. 202) requires deobligation of all funds appropriated in prior fiscal years for Syria, except for funds committed or earmarked as of April 9, 1981, in four specified categories.

The Senate bill does not contain a similar provision, but prohibits any U.S. aid for Syria under section 201(b) for fiscal year 1982.

The conference substitute is the same as the Senate provision with an amendment extending the earmark for fiscal year 1983.

(*b*) The House amendment provides that funds deobligated pursuant to subsection (c)(1) may be used by the AID Administrator to reimburse U.S. contractors in event of certain losses resulting from the deobligation.

The Senate bill does not contain a similar provision.

The conference substitute is the same as the Senate position.

(*c*) The Senate bill (sec. 719) provides for Appropriations Committee approval prior to the deobligation of funds approved in authorizing legislation.

The House amendment does not contain a similar provision.

The conference substitute is the same as the House position.

Nonproliferation

The House amendment contains a new section 534 of the Foreign Assistance Act which prohibits the use of ESF funds for fiscal years 1982 and 1983 to finance the construction of, the operation or maintenance of, or the supplying of fuel for, any nuclear facility in a foreign country unless the President certifies to the Congress that the use of the funds for such purpose is indispensable to the achievement of U.S. nonproliferation objectives.

The Senate bill contains no similar provision.

The conference substitute is the same as the House provision.

TITLE III—DEVELOPMENT ASSISTANCE

AGRICULTURE, RURAL DEVELOPMENT, AND NUTRITION

(a) The Senate bill (section 301) amends section 103 of the Foreign Assistance Act to provide up to $5 million for infant feeding programs and to call for reports on implementation of the provision and on implementation of the WHO infant formula marketing code.

The House amendment bill (section 313) contains a similar provision but does not propose that AID fund research on problems relating to infant feeding programs.

The conference substitute is the same as the Senate provision.

(b) In authorizing $180 million for the International Fund for Agricultural Development, the Senate bill (sec. 301) includes sense of Congress language that U.S. representatives to the Governing Council of IFAD seek to limit the funds's professional staff to 75, seek equity between OECD contributions and all other contributions, encourage expedited procedures, and seek to insure that U.S. contributions are disbursed at a rate similar to the overall disbursement rate. It also calls on the Fund to seek support from a wider variety of donors, and to increase other donors' contributions to IFAD.

The House amendment contains only the authorization of $180 million for IFAD.

The conference substitute is the same as the House provision.

The committee of conference strongly supports the President's proposal for a further U.S. contribution to IFAD.

However, the committee of conference believes that U.S. representatives or the Governing Council of IFAD should actively seek to limit to no more than 75 the number of professional staff (professional category and above, according to the United Nations Common System) of the Fund; seek equity between the contributions of member states of the Organization for Economic Cooperation and Development and all other donors in any negotiations for future replenishments of resources for IFAD; and encourage the development of procedures to expedite disbursement of resources for projects and activities supported by IFAD. The committee of conference also looks with favor on the general approach of IFAD in obtaining major support from a wider variety of donors than has normally been the case in international organizations, and would urge the President to pursue other efforts to increase the amount of assistance provided to developing countries by European allies of the United States, Japan, and members of the Organization of Petroleum Exporting Countries.

(c) The House amendment (sec. 310(a)) provides that up to $1 million shall be available in fiscal years 1982 and 1983 to carry out section 316 of the International Security and Development Cooperation Act of 1980.

The Senate bill does not contain a comparable provision.

The conference substitute is the same as the House provision.

POPULATION AND HEALTH

(a) The Senate bill (sec. 302) amends section 104 of the Foreign Assistance Act to earmark $3 million for the World Health

Organization special program of research, development, and research training in human reproduction, and $38 million for the U.N. Fund for Population Activities.

The House amendment does not contain these earmarks.

The conference substitute provides that for fiscal years 1982 and 1983 not less than 16 percent or $38 million, whichever is less, of the total funds appropriated for population programs be available for the U.N. Fund for Population Activities.

The committee of conference strongly urges that the Agency for International Development provide $3 million for the WHO special program of research, development, and research training in human reproduction and expects to receive a notification of program change to this effect.

(b) The Senate bill contains a prohibition on funding for biomedical research relating to abortion or involuntary sterilization as a means of family planning.

The House amendment contains a similar provision.

The conference substitute is the same as the Senate provision.

The committee of conference notes that the existing prohibition on the use of AID population planning funds for services to perform abortion as a method of family planning, and the new additional prohibition on biomedical research on abortion as a method of family planning, effectively set necessary limits on U.S. support for international population planning programs with respect to concerns about adequate directives against promotion of abortion-related activities. The committee of conference further notes that audit reports indicate that AID has complied with existing regulations to date.

(c) The Senate bill earmarks $15 million in health funds for PVO health activities.

The House amendment does not contain this earmark.

The conference substitute is the same as the House provision.

SCHOLARSHIPS FOR SOUTH AFRICAN STUDENTS

The Senate bill (sec. 303) amends section 105 of the Foreign Assistance Act of 1961 to provide that up to $5,700,000 be made available to provide scholarships for South African students.

The House amendment requires that not less than $5,700,000 be made available for this purpose for fiscal years 1982 and 1983.

The conference substitute provides that not less than $4 million be available for this purpose for fiscal years 1982 and 1983.

SCIENCE AND TECHNOLOGY

Section 305 of the Senate bill amends the Foreign Assistance Act of 1961 to add a new section on programs of scientific and technological cooperation and authorizes $10 million for these purposes.

The House amendment contains no comparable provision, but does include $10 million in the sum made available for section 106 for the purposes of programs in scientific and technological cooperation.

The conference substitute is the same as the House position, because of the conferees' reluctance to increase the number of functional accounts. However, the committee of conference believes that the objectives and programs contained in sections 401 through 403 of the International Development Cooperation Act of 1979, which establishes the authorities for the Institute for Scientific and Technological Cooperation, could be pursued under the authority of section 106 of the Foreign Assistance Act of 1961, as amended, and expresses its strong support for the use of $10 million of the funds for section 106 for such programs of scientific and technological cooperation.

ENERGY DEVELOPMENT AND PRODUCTION

The House amendment (sec. 304) moves the selected development assistance and PVO provisions of existing section 106 of the Foreign Assistance Act to a new section 107, thus establishing section 106 exclusively as an energy development and production authorization.

The Senate bill contains no comparable provision.

The conference substitute is the same as the Senate position, because of the conferees' reluctance to increase the number of functional accounts. The conference committee notes, however, that this decision should not be interpreted as a lessening of its interest in and support for the energy programs carried out by the U.S. assistance program.

U.N. DECADE FOR WOMEN

The Senate bill (sec. 306) earmarks $500,000 for international programs which support the original goals of the U.N. Decade for Women.

The House amendment does not contain a comparable provision.

The conference substitute is the same as the Senate substitute, providing $500,000 for these programs for fiscal year 1982.

The committee of conference supports this provision in order to insure that international development programs for women continue to receive adequate support for deserving projects. Use of "multi-bi" arrangements to permit AID to fund directly projects identified by the Voluntary Fund of the U.N. Decade for Women will permit the United States to continue to support worthy individual projects and to encourage support for such activities by other donors. The reduced U.S. direct contribution to the Voluntary Fund of $500,000 indicates the displeasure of the United States at the unfortunate politicization of the United Nations Mid-Decade Conference for Women in Copenhagen in July 1980.

The committee urges the executive branch to restore the fiscal year 1983 contribution to the Voluntary Fund to $1 million if the projects supported by the Fund maintain standards they have exhibited to date.

HUMAN RIGHTS

The House amendment (sec. 306) amends section 116 of the Foreign Assistance Act to continue to target $1.5 million for human rights programs in fiscal years 1982 and 1983.

The Senate bill (sec. 307) eliminates this target.

The conference substitute is the same as the House provision. The committee of conference has noted the reluctance of the Agency for International Development to fund some activities previously supported in accordance with this directive and therefore believes it necessary to continue to urge the executive branch to support such activities.

ENVIRONMENT AND NATURAL RESOURCES

The House amendment (sec. 307) amends section 118 of the Foreign Assistance Act to require environmental impact statements and environmental assessments.

The Senate bill (sec. 308) does not contain a comparable section.

The conference substitute is the same as the House provision.

PRIVATE VOLUNTARY ORGANIZATIONS

The Senate bill (section 310) amends section 123 of the Foreign Assistance Act to earmark 16 percent of development assistance funds to be made available for activities of private voluntary organizations (PVO's) and to require an annual report on the implementation of the section.

The House amendment does not contain a comparable provision.

The conference substitute provides that in fiscal years 1982, 1983 and 1984 the President shall seek to channel not less than 16 percent of development and disaster assistance funds to PVO's, and that not less than 12 percent of these funds shall be available for PVO activities in those years. Organizations which by December 31, 1984, obtain less than 20 percent of their financial support from non-Federal Government sources are not eligible to receive assistance under the Act for programs which they initiate unless this 20 percent provision is waived by the executive branch.

The decision of the managers of conference to agree to this section represents a further effort by the Congress to promote the use of American private and voluntary organizations in the implementation of U.S. assistance to developing countries.

The Congress has long recognized the valuable contributions by PVO's in humanitarian and developmental activities around the world. The issue of U.S. Government support of PVO's has been addressed in virtually every AID authorization bill since the New Directions legislation of 1973 or in committee reports accompanying such legislation. The conferees believe that the previous legislation and committee reports have helped to establish an increasingly productive partnership between AID and the nonprofit voluntary sector in carrying out U.S. assistance abroad.

In this new amendment to the Foreign Assistance Act, the committee of conference seeks to add to this momentum and to reinforce the policies that have led to growing use of PVO's in the programs in which they are particularly effective. The reference to 16 percent is designed not as a ceiling, but as a target which should be exceeded if appropriate. In its use of the term "financial support," the committee of conference does not intend that the term include the value of in-kind support, services of volunteers, or commodities made available to the organization for overseas distribution.

In the requirement of 20 percent financial support from non-U.S. Government sources, "programs of U.S. PVO's" refers to those PVO-initiated activities, funded or partially funded by AID, for which AID requires the PVO to be registered; subventions such as ocean freight are not included, nor are grants in support of specific AID programs.

HOUSING GUARANTEE PROGRAMS

The House amendment (sec. 309) amends section 222 of the Foreign Assistance Act to extend the Housing Investment Guarantee (HIG) program through September 30, 1984, and to increase the ceiling to $1,718 million to provide for the second year.

The Senate bill (section 313) extends the program to September 30, 1983, and maintains the ceiling at the existing level of $1,555 million.

The conference substitute is the same as the House provision.

INTERNATIONAL ORGANIZATIONS AND PROGRAMS

The House amendment (sec. 310) amends section 301 of the Foreign Assistance Act to earmark $45 million for the United Nations Children's Fund, $8.2 million for the United Nations Environment Program, $500,000 for the United Nations Institute for Training

and Research, and $400,000 for the U.N. Trust Fund for Southern Africa.

The Senate bill (sec. 311) earmarks up to $45 million or not less than 19.6 percent of the total appropriated for this section for the U.N. Children's Fund; up to $134,500,000 or not less than 58.7 percent of the total appropriated for the U.N. Development Program; and up to $10 million or not less than 4.4 percent of the total appropriated for the U.N. Environment Program.

The conference substitute provides that of funds appropriated for fiscal years 1982 and 1983 for this account, not less than 19.6 percent or $45 million, whichever of these amounts is less, be available for the U.N. Children's Fund; not less than 59.5 percent or $134.5 million, whichever of these amounts is less, be available only for the United Nations Development Fund; not less than 4.4 percent or $10 million, whichever of these amounts is less, be available for the United Nations Environment Fund; not less than 0.159 percent or $400,000, whichever of these amounts is less, be available for the U.N. Trust Fund for Southern Africa; and not less than 0.196 percent or $500,000, whichever of these amounts is less, be available for the U.N. Institute for Training and Research.

In addition, the committee of conference intends that contributions will be made available to the following organizations: U.N. Interim Fund for Science and Technology for Development, Organization of American States, U.N. Capital Development Fund, F.A.O. World Food Program, U.N. Education and Training Program for Southern Africa, U.N. Institute for Namibia; Voluntary Fund for the U.N. Decade for Women, World Meteorological Organization/Voluntary Cooperation Program, International Atomic Energy Agency, Convention on International Trade in Endangered Species, and U.N. Fellows.

It is the intention of the conferees that the levels specified are not ceilings, and should funding be available, the executive branch have the authority to increase the U.S. contributions above these levels.

AFRICAN DEVELOPMENT FOUNDATION

The House amendment (sec. 312) amends section 510 of the International Security and Development Cooperation Act of 1980 and earmarks out of funds to carry out part I of the Foreign Assistance Act $2 million for fiscal year 1982 and $2.178 million for fiscal year 1983 for the African Development Foundation.

The Senate bill has no comparable provision.

The conference substitute provides that $2 million shall be used for fiscal year 1982 and up to $2 million shall be used for fiscal year 1983.

TITLE IV—FOOD-FOR-PEACE PROGRAMS

SELF-HELP PROVISIONS

The Senate bill (sec. 603) amends section 109 of the Agricultural Trade Development and Assistance Act of 1954 (hereafter referred to as Public Law 480) to include two additional self-help measures that the President will consider before entering into agreements with developing countries; namely, programs to reduce illiteracy and to improve the health of the rural poor.

The House amendment (sec. 403) is similar, except that it refers to programs to reduce illiteracy among farmers and programs to improve the health of farmers and their families.

The conference substitute is the same as the Senate provision.

The Senate bill (sec. 604) requires that, in connection with agreements with developing countries under title I, the economic development and self-help measures agreed to shall be described in specific and measurable terms. In addition, this provision requires, in connection with such agreements, that the President take steps to assure that the self-help measures agreed to are in addition to the measures the recipient country otherwise is undertaking without the new resources.

The House amendment (sec. 404) is similar, except that it requires that the economic development and self-help measures agreed to must be described in quantitative and measurable terms, and further provides that the President should satisfy himself that the economic development measures, as well as the self-help measures agreed to, are in addition to the measures the recipient country would have undertaken irrespective of the agreement.

The conference substitute adopts the Senate position with regard to describing title I self-help measures in specific and measurable terms and in not including economic development measures in the additionality requirement. The substitute adopts the House position with regard to applying the additionality requirement in relation to self-help measures which the recipient country would have undertaken.

ALLOCATION OF TITLE I ASSISTANCE

The House amendment (sec. 405) adds a new section to Public Law 480 to limit the amount of financing made available under title I for any one country to no more than 30 percent of the total dollar amount of financing made available under that title to all countries. This provision would be effective beginning with fiscal year 1983.

The Senate bill contains no comparable provision.

The conference substitute is the same as the Senate position.

TITLE II MINIMUM

The House amendment (sec. 406) amends section 201 of Public Law 480 which currently requires that of the overall minimum of 1.7 million metric tons of agricultural commodities which much be distributed under title II each year, at least 1.4 million tons must be distributed through nonprofit voluntary agencies and the World Food Program. The House amendment reduces the subminimum for nonprofit voluntary agencies and the World Food Program from 1.4 million tons to 1.2 million tons annually, and makes the subminimum applicable to *nonemergency programs.*

The Senate bill contains no comparable provision.

The conference substitute is the same as the House provision.

TITLE V—OTHER ASSISTANCE PROGRAMS

INTERNATIONAL NARCOTICS CONTROL

Paraquat

The House amendment (sec. 502) repeals the present subsection 481(d) of the Foreign Assistance Act. Subsection 481(d) presently prohibits use of chapter eight funds for spraying a herbicide to eradicate marihuana if that practice is likely to seriously harm the health of users of the sprayed marihuana; except that the prohibition does not apply if the herbicide is used in conjunction with another substance that will clearly and readily warn potential users of the sprayed marihuana of the use of herbicide. Subsection 481(d) also provides notification and reporting requirements.

The Senate bill (sec. 403) amends subsection 481(d) to provide as follows: (1) The Secretary of State shall inform the Secretary of Health and Human Services of any use of herbicide under chapter eight funded programs to eradicate marihuana; (2) the HHS Secretary shall monitor the impact on the health of persons using such marihuana and if he determines their exposure to the herbicide harms their health, he shall so report to Congress with any recommendations he may make; (3) earmarks not less than $100,000 in international narcotics control funds for developing a substance that clearly and readily warns potential marihuana users that the marihuana has been sprayed with paraquat; and (4) requires that if such a substance is developed, it shall be used in conjunction with the spraying of paraquat under any chapter eight funded narcotics control program.

The conference substitute is the same as the Senate provision with an amendment that urges the President to use not less than $100,000 in international narcotics control funds for developing a substance that clearly and readily warns potential marihuana users that the marihuana has been sprayed with paraquat or other herbicide harmful to the health of persons using such marihuana and requires that if such a substance is developed it shall be used in conjunction with the spraying of paraquat or other herbicide.

Assistance to Colombia

The House amendment removes the present requirement which limited use of $16 million of fiscal year 1980 narcotics aid funding for Colombia to transportation equipment and training personnel for interdicting drug traffic.

The Senate bill has no comparable provision.

The conference substitute is the same as the House provision.

Annual report

The Senate bill requires an annual report from the President, to be submitted by February 1, on the status of U.S. policy to establish and encourage an international strategy to prevent the illicit production of and to interdict and intercept trafficking in narcotics.

The House amendment has no comparable provision.

The conference substitute is the same as the Senate provision.

ASSISTANCE FOR DISPLACED PERSONS IN CENTRAL AMERICA

The House amendment (sec. 504) adds new section 495I to the Foreign Assistance Act: (1) To help alleviate the suffering of persons displaced by strife in El Salvador and encouraging the use of private voluntary organizations and international relief agencies to provide this assistance; and (2) to authorize the President to furnish assistance to assist the Government of Belize in the resettlement of Haitian nationals.

For these purposes, $5 million is authorized in fiscal year 1982 and $5,455,000 in fiscal year 1983, to be provided under the policies and purposes of the international disaster assistance authority (sec. 491) of the Foreign Assistance Act.

The Senate bill has no comparable provision.

The conference substitute is the same as the House provision, with an amendment providing $5 million for fiscal year 1983.

TITLE VI—PEACE CORPS

PEACE CORPS AUTONOMY

Both the Senate bill (title V) and the House amendment (title VI) provide, with technical differences, for the separation of the Peace Corps from the ACTION Agency effective upon the date of enactment of this act.

Transfer of personnel, funds, obligations, property, and records

The Senate bill (sec. 503 (a) and (b)) provides for the transfer of various items, including personnel, assets, liabilities, contracts, property records, and unexpended balances used primarily in connection with functions relating to the Peace Corps.

The House amendment contains a similar provision, with technical differences.

The conference substitute is similar to the Senate provision.

Transferred personnel

The Senate bill (sec. 503(a)) provides that: (1) The transfer of full-time personnel and permanent part-time personnel shall not cause such employees to be separated or reduced in rank, class, grade, or compensation, or otherwise suffer a loss of employment benefits for 1 year after the later of (a) the date on which the Director of the Office of Management and Budget submits a report on steps taken to implement the separation of the Peace Corps from the ACTION Agency, as required in section 606 or (b) the effective date of a particular individual transfer; (2) the transferred personnel shall be assigned, to the maximum extent feasible, to such related functions and organizational units in the Peace Corps as such personnel were assigned to immediately before the date of enactment; (3) the collective-bargaining agreements in effect on the date of enactment covering transferred personnel shall continue to be recognized until the termination date of such agreements or until a mutual modification by the parties otherwise specifies; (4) transferred personnel shall be given Foreign Service appointments under the authority of section 7(a)(2) of the Peace Corps Act except that no transferred employee may be so appointed without his or her consent until 3 years after the effective date and the Foreign Service appointment of each transferred employee holding a career or career-conditional appointment at grade 8 or below of the General Schedule would not be subject to the 5-year appointment limitation contained in section 7(a)(2)(A) of the Peace Corps Act or other time limitation; and (5) the basic rate of compensation for persons appointed under these provisions would not be permitted to be reduced below the rate received by such person immediately prior to the effective date of such person's appointment.

The House amendment does not contain similar provisions.

The conference substitute is similar to the Senate provision, but also specifies that such appointments may take place notwithstanding the provisions of clause (B) of section 7(a)(2) of the Peace Corps Act.

The committee of conference notes that the provisions in the Senate bill relating to the transfer of employees are derived from section 5 of Public Law 89-134, establishing the unique, unified Peace Corps personnel system, and should be implemented in similar fashion.

Functions of the Director of the Peace Corps

The House amendment (sec. 3(c)(2)) provides that the Director of the Peace Corps shall continue to exercise all the functions under the Peace Corps Act which the Director was performing on the day before the date of enactment.

The Senate bill does not contain a comparable provision.

The conference substitute provides that the Director of the Peace Corps shall continue to exercise all the functions under the Peace Corps Act which the Director was performing on December 14, 1981. The effect of this provision would be to supersede the authority under section 4(b) of the Peace Corps Act to withdraw any authority which had been delegated to the Director of the Peace Corps on December 14, 1981.

Reports

The Senate bill (sec. 506) requires, not later than the 30th day after enactment, the Director of the Office of Management and Budget to submit to the appropriate committees of Congress and to the Comptroller General a report regarding the steps taken to implement the separation of the Peace Corps from ACTION, and provides for the Comptroller General, not later than 45 days after enactment, to report to such committees whether determinations made by the Director of the Office of Management and Budget were equitable.

The House amendment contains a similar provision, but requires the report to be made only to the appropriate committees of the Congress and requires the Director of the Office of Management and Budget to consult with the Director of the ACTION Agency, the Director of the Peace Corps, and the Comptroller General prior to submission of the report.

The conference substitute is the same as the Senate bill with amendments specifying that the Director of the Office of Management and Budget consult with the Director of the ACTION Agency and the Director of the Peace Corps prior to submission of the report and provides for the reports to be submitted February 15, 1982, and March 1, 1982, or 30 and 45 days after enactment, whichever dates are later.

AUTHORIZATIONS

(a) Section 604 of the House amendment provides for restoration of Peace Corps authority to procure legal services abroad.

The Senate bill does not contain this provision.

The conference substitute is the same as the House provision.

(b) The Senate bill (sec. 515) amends section 5(c) of the Peace Corps Act to eliminate the $125 ceiling on volunteer readjustment allowances.

The conference substitute specifies that the readjustment allowance be provided at a rate not less than $125 per month. The committee of conference expresses the expectation that the allowance will be raised as soon as possible and will continue to be increased at reasonable intervals of time to levels commensurate with economic conditions.

TITLE VII—MISCELLANEOUS PROVISIONS

EXCESS PROPERTY

The House amendment (sec. 701) authorizes AID to acquire "other property already owned by an agency of the United States" in addition to excess property, if a substantial savings would occur. Use of excess property may be supplementary to the procurement of new items.

The Senate bill does not contain a similar provision.

The conference substitute is the same as the House provision.

COMPENSATION FOR DEPUTY MISSION DIRECTORS

The Senate bill (sec. 704) amends section 431 of the Foreign Assistance Act to make specific provisions for the salary level and benefits which are paid to the deputy chief of the AID mission.

The House amendment does not contain this provision.

The conference substitute is the same as the House position.

NOTIFICATION OF PROGRAM CHANGES

The Senate bill (sec. 705) amends section 634A of the Foreign Assistance Act to require that program change notifications include:

(1) The nature and purpose of the proposed obligation;

(2) The program or source from which such funds are being reprogramed;

(3) The reasons that such proposed obligation could not be made out of funds which might be appropriated pursuant to a request for supplemental appropriations; and

(4) Specification of the national interest of the United States in the proposed new obligation.

The House amendment does not contain a similar provision.

The conference substitute provides that section 634A of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following:

Whenever a proposed reprograming exceeds $1 million and the total amount proposed for obligation for a country under the act in a given fiscal year exceeds by more than $5 million the amount contained for that country in the report required by section 653(a) of this act, notifications of such proposed reprogramings shall specify:

(1) the nature and purpose of such proposed obligation, and

(2) to the extent possible at the time of the proposed obligation, the country for which such funds would otherwise have been obligated.

INSPECTOR GENERAL

The House amendment (sec. 705) places the AID Inspector General's office under the authority of the Inspector General Act, making the Inspector General a Presidential appointee.

The Senate bill does not contain a similar provision.

The conference substitute is the same as the House provision.

ABOLISHMENT OF THE INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

The Senate bill (sec. 706) repeals the reorganization plan and Executive order which established the International Development Cooperation Agency.

The House amendment does not contain a similar provision.

The conference substitute is the same as the House position on this issue, which is to leave existing statutory authorities unchanged. The committee of conference affirms its opposition to any unnecessary bureaucratic layering or expenditures in the development and execution of U.S. policies and programs relating to countries of the developing world. Thus, IDCA should not act as a seperate layer of bureaucracy to engage in duplicative management of AID or other IDCA components. The committee of conference also emphasizes again its support for coordination and consolidation of U.S. Government activities relating to developing countries in order to achieve maximum effectiveness for these policies and

programs. IDCA authorities should assist its Director in acting as a central point in the executive branch for review and coordination of overall foreign assistance activities conducted by the U.S. Government, and as a spokesman for the overall development interests and objectives of the United States, in particular as outlined in section 2 of Reorganization Plan No. 2 of 1979 and sections 101 and 102 of the Foreign Assistance Act. The committee of conference expects the President to present a nominee for the IDCA Director's post as soon as possible, and that there will be close consultation with the Congress before any executive branch decisions are made concerning possible changes in functions or administration with regard to IDCA.

EMERGENCY HUMANITARIAN HELP FOR THE PEOPLE OF POLAND

The House amendment (secs. 706 and 718) contains the following provisions relating to Poland: (a) A statement noting Poland's serious food shortages which will be worsened if feed supplies for livestock do not arrive quickly, and urging the President for urgent humanitarian reasons to use existing authorities promptly to provide feedgrains from Commodity Credit Corporation stocks or other appropriate commodities under as favorable terms as possible; (b) encouragement to the President to pursue discussions with other Western countries about a multilateral effort to help the people of Poland achieve self-sustaining economic recovery in the years ahead; (c) notwithstanding any other provision of law, up to $5 million of fiscal year 1982 Economic Support Funds for Poland for purchase, transportation, and distribution of food and medical supplies through private and voluntary organizations; and (d) authority for the use of currencies or credits received by the U.S. Government from its April and October 1981 sales of surplus dairy products to Poland, subject to provision in advance in an appropriation act, to serve U.S. interests including for activities of common benefit to the people of the United States and the people of Poland, such as for joint programs in agriculture, education, science, and culture, and for additional facilities for the Children's Hospital at Krakow, with the availability of such currencies or credits not to affect or reduce appropriations otherwise available for such purposes.

The Senate bill has no provision comparable to (a) or (b) above. It has a provision (sec. 730) similar to (c) except that the $5 million provided for ESF for Poland is earmarked. It has a provision similar to (d) except that its examples of programs for which the currencies or credits could be used includes programs in energy and health and does not include reference to the Children's Hospital at Krakow; and it does not include the provision regarding the effect on appropriations of the availability of the currencies or credits.

On (a) and (b) the committee of conference provision is the same as that of the House. On (c), it is the same as that of the Senate. On (d), the committee of conference provision is the same as that of the House except that the illustrative uses of the currencies or credits includes use for purposes such as joint programs in energy, agriculture, education, science, health, and culture, or for humanitarian activities, as in the Senate bill. The committee of conference intends that additional facilities for the Children's Hospital at Krakow be among the purposes for which the funds could be used.

With regard to the $5 million authorized in Economic Support Funds the intent of the committee of conference is that the funds be used to help relieve, to the greatest extent possible, the severe food and medical shortages facing the Polish people. These funds are to be distributed by private voluntary agencies, as appropriate, such as the Polish-American Congress, Project HOPE, and Catholic Relief Services, which have established a relief network in Poland in cooperation with the Church, the Solidarity labor union, and the Polish Government. The committee of conference recognizes that these funds represent only a portion of the emergency relief needs of the Polish nation.

FINDINGS REGARDING GLOBAL SECURITY

The House amendment (sec. 707) states that the security of the United States and other countries is affected by a broad range of global problems, of which the most critical include hunger, disease, and extreme poverty. Stating that such problems may lead to unrest and violence, it finds that U.S. global and national security must be defined to include these problems.

The Senate bill does not contain similar provisions.

The conference substitute is the same as the House provision.

FINDINGS AND DECLARATION OF POLICY REGARDING WORLD HUNGER

The House amendment (sec. 708) states that the Congress declares that the elimination of hunger and its causes is of fundamental moral significance, is in the political, economic, and security interests of the United States, and shall be a primary object of U.S. relations with developing countries.

The Senate bill does not contain a similar provision.

The conference substitute is the same as the House provision.

FOOD SECURITY RESERVES

The House amendment (sec. 709) states certain findings or world food security reserves and requires the President to encourage other countries to establish their food security reserves that complement U.S. reserves.

The Senate bill does not contain a similar provision.

The conference substitute is the same as the House provision.

CONSOLIDATED REPORTS ON MILITARY ASSISTANCE AND SALES

The Senate bill (sec. 710) creates a consolidated annual reporting requirement under section 25 of the Arms Export Control Act to incorporate a number of current reports related to military assistance and sales and repealed reporting requirements for a number of one-time reports and obsolete provisions.

The House amendment does not contain a comparable provision.

The conference substitute is the same as the Senate bill with two amendments. First, the following reports will continue to be provided on a quarterly basis:

Section 26(b) of the Arms Export Control Act—a quarterly report on defense requirement surveys;

Section 28 of the Arms Export Control Act—requiring quarterly report on defense requirement surveys;

Section 28 of the Arms Export Control Act—a quarterly report on price and availability estimates;

Section 36(a) of the Arms Export Control Act—a quarterly report on commercial exports and foreign military sales of $1 million or more, projections on credits and guarantees that have or will be extended, an estimate of U.S. Government employees and civilian contract personnel overseas, reports on agents fees, and other information.

Second, section 620(s)(2) of the Foreign Assistance Act of 1961 will be kept as a separate annual reporting requirement with section 620(s)(1)(C) repealed, and with a clarifying amendment to section 620(s)(1)(B). It is the intent of the conferees that these changes not result in a diminution of efforts by the executive branch to comply with the requirements of section 620(s).

REPEALS

The Senate bill (sec. 712) repeals various provisions of a number of foreign assistance acts because they are no longer necessary.

The House amendment does not contain a similar provision.

The conference substitute is similar to the Senate provision with an amendment providing that the following provisions not be repealed:

Foreign Assistance Act of 1961, as amended (Public Law 87-195)

(a) Section 116(d) relating to human rights reports on members of the United Nations.

(b) Section 121(b) regarding annual reports on the Sahel development program.

(c) Section 240A, regarding reports from the Overseas Private Investment Corporation.

(d) Section 300, regarding reports on the International Food and Agriculture Development Board.

(e) Section 306, regarding reports on voluntary contributions to international organizations.

(f) Sections 481(b) (1) and (2), regarding reports on international narcotics control assistance.

(g) Section 502B(b), regarding reports on the human rights record of foreign nations.

(h) Section 620(s)(2), regarding reports on funds U.S. aid recipients spend to acquire weapons. Section 620(s)(1)(c) of such section would be repealed.

(i) Section 620(u), relative to an aid recipient's dues to the United Nations.

The International Development Cooperation Act of 1979

(a) Section 407(b)(2), relating to a report from the Council on International Scientific and Technological Cooperation.

(b) Section 411, relating to a report from the President on operations of the International Scientific and Technological Cooperation.

The Foreign Assistance Act of 1974

Sections 55(a) (4) and (5), and (6), regarding reports on global food aid.

The Foreign Assistance Act of 1973

Section 39(a)(4), relating to a report on measures taken to meet the world food shortage.

REPORTS ON FOREIGN ASSISTANCE

Responsibility for preparing the annual report on foreign assistance

The Senate bill (sec. 711) amends section 634 of the Foreign Assistance Act to give responsibility for providing the information in the annual report on foreign assistance to the President instead of the Chairman of the Development Coordination Committee.

The House amendment has no comparable provision.

The conference substitute is the same as the House position.

Consolidated reports

The Senate bill incorporated various existing reporting requirements into a consolidated report.

The House amendment has no comparable provision.

The conference substitute is the same as the Senate provision with an amendment deleting the following from inclusion in the consolidated report:

(a) Allocation of U.S. contributions to the Sahel development program.

(b) Reports required pursuant to Title XII: Famine Prevention and Freedom from Hunger.

(c) Voluntary contributions by the U.S. Government to international organizations in the preceding fiscal year.

(d) Programing and obligation of funds relating to international narcotics assistance.

(e) Description of human rights practices in proposed recipients of foreign assistance and members of the United Nations.

(f) Reports related to the operations of the Overseas Private Investment Corporation.

External debt burdens on Egypt, Israel, and Turkey

The Senate bill requires that the annual report on foreign assistance include appropriate information regarding any country, including Egypt, Israel, and Turkey, whose economic conditions may jeopardize its ability to meet its international debt obligations.

The House amendment (sec. 713) requires a report no later than January 15, 1982, on the external debt burdens of Egypt, Israel, and Turkey, and the impact of Arab sanctions on the Egyptian economy.

The conference substitute is the same as the House provision with an amendment requiring a report no later than 120 days after enactment of the bill and a report no later than 1 year from the date of enactment.

TECHNICAL AMENDMENT

The Senate bill (sec. 713) amends section 620(f) of the Foreign Assistance Act to alphabetize the list of Communist countries in section 620(f) and to include the Lao People's Democratic Republic on the list of Communist countries.

The House amendment does not contain a similar provisions.

The conference substitute is the same as the Senate bill, with an amendment to strike the reference to the Lao People's Democratic Republic.

HAITI

(a) The Senate bill (sec. 716(a)) expresses the sense of Congress that assistance to Haiti be used to ameliorate poverty and assist Haiti in dealing with illegel emigration

The House amendment (sec. 710(a)) expresses the sense of Congress that up to $15 million be made available for development assistance to Haiti, and adds $6.2 million for the purposes of section 103(a) of the Foreign Assistance Act for Haiti.

The conference substitute is the same as the House amendment (sec. 710(a)), with an amendment deleting the $6.2 million authorization.

(b) The Senate bill provides that assistance to Haiti is to be provided only if the President determines that Haiti "is" acting to prevent illegal emigration. The House amendment is similar but requires that the President determine that Haiti "has" acted to prevent illegal emigration.

The conference substitute is the same as the Senate provision.

(c) The Senate bill requires the President to report 6 months after enactment of this act on actions by the Government of Haiti to restrict illegal emigration.

The House amendment requires the President to report each 6 months.

The conference substitute is the same as the Senate provision.

(d) The Senate bill permits certain military assistance and training to assist Haiti in halting illegal emigration for fiscal year 1982.

The House amendment is similar, but permits such assistance for all countries and has no fiscal year limitation.

The conference substitute is the same as the Senate provision, with an amendment making such authority available in fiscal year 1983 as well as fiscal year 1982.

REAFFIRMATION OF HUMAN RIGHTS

The Senate bill (sec. 717(a)) expresses a congressional finding that the United States should continue in its role as a defender of human rights and the President and the Secretary of State need accurate information on matters pertaining to human rights, and (b) expresses a sense of Congress that the President submit to the Senate the name of the nominee for position of Assistant Secretary for Human Rights.

The House amendment (sec. 712) states that Congress reaffirms its support for various statutory provisions relating to internationally recognized human rights.

The conference substitute reaffirms congressional support for the statutory provisions which have been enacted in order to promote internationally recognized human rights and expresses the sense of Congress that a strong commitment to the defense of human rights should continue to be a central feature of American foreign policy.

ASSISTANCE TO ARGENTINA

The Senate bill repeals section 620B of the Foreign Assistance Act but continues to prohibit assistance to Argentina unless the President makes certain determinations. The Senate bill (sec. 720) also states the sense of Congress concerning Argentine Government treatment of detainees and further expresses the congressional hope for progress regarding disappeared citizens and prisoners held at the disposition of the National Executive Power.

The House amendment repeals section 620B of the Foreign Assistance Act but continues to prohibit assistance to Argentina unless the President makes certain determinations. The House amendment (sec. 715(c)) requires, as part of the Presidential determination, that particular attention be paid to disappeared citizens and prisoners held at the disposition of the National Executive Power.

The conference substitute is the House provision, with an amendment to change subsection (c) in order to reflect both the House position on the accounting for disappeared persons and the treatment of prisoners held at the disposition of the National Executive Power and the Senate section 720 regarding the same matters. Revised subsection (c) reads:

The Congress welcomes the actions of the Government of Argentina to adjudicate numerous cases of those detained under the National Executive Power of the Argentine Government, and the Congress hopes that progress will continue, especially with regard to providing information on citizens listed as "disappeared" and prisoners remaining at the disposition of the National Executive Power.

In the process of making the determination required in paragraph (1) of subsection (b), the President shall consider, among other things:

(1) efforts by the Government of Argentina to provide information on citizens identified as "disappeared"; and

(2) efforts by the Government of Argentina to release or bring to justice those prisoners held at the disposition of the National Executive Power (PEN).

ASSISTANCE TO CHILE

The Senate bill (sec. 726) repeals section 406 of the International Security and Arms Export Control Act of 1976 that prohibits military assistance and sales to Chile but requires a detailed report certifying that the Government of Chile has made progress in complying with internationally recognized principles of human rights, that the provision of assistance is in the U.S. national interest, and that the Government of Chile is not aiding or abetting international terrorism. The provision also states the sense of Congress that Chile should take steps to bring to justice those indicted in connection with the Letelier/Moffitt murders.

The House amendment contains no comparable provision.

The conference substitute is the Senate provision, with an amendment placing the essence of subsection (b)(5) into subsection (b)(4)(C), so that one of the matters on which the President must report is whether the Government of Chile has taken appropriate steps to cooperate to bring to justice those indicted in connection with the murders of Orlando Letelier and Ronni Moffitt.

In making this report, the President shall consider, among other things, whether the Government of Chile is ending the practices of internal exile and forced expulsion, and is allowing those citizens who desire to return to Chile to do so, and whether the Government of Chile is permitting the unimpeded investigation, by internationally recognized commissions on human rights, of alleged violations of internationally recognized human rights.

ASSISTANCE TO EL SALVADOR

The situation in El Salvador

The House amendment (sec. 716) is a sense of Congress resolution with regard to the situation in and U.S. assistance to El Salvador.

The Senate bill does not contain a comparable provision.

The conference substitute is the same as the House provision.

Military assistance

The Senate bill (sec. 707) conditions U.S. military assistance to El Salvador on the President certifying that, "to the extent not precluded by forces outside its control," the Government of El Salvador is making progress with regard to respect for human rights, control over its armed forces, implementation of economic and political reforms, is committed to the holding of free elections at an early date, and to that end has demonstrated its willingness to negotiate an equitable political resolution of the conflict with any group which renounces and refrains from further military or paramilitary opposition activity.

The House amendment (sec. 113) also conditions U.S. military assistance on certification by the President with regard to the Government of El Salvador's achievement in similar areas, with the main differences

being that the House conditions are not predicated on "to the extent not precluded by forces outside its control" and the final condition deals with the Salvadoran Government's "willingness to negotiate with opposition groups an equitable political resolution of the conflict" rather than with "groups that renounce and refrain from further military or paramilitary opposition activity." The House amendment also includes more detailed introductory policy language.

The conference substitute is the Senate provision, with the following amendments:

(1) The replacement of the Senate policy language with the more detailed House policy language, with the addition of the following sentence at the end of the first paragraph: "Moreover, the Congress recognizes that the efforts of the Government of El Salvador to achieve these goals are affected by the activities of forces beyond its control."

(2) Adoption of the House provision that the first report under this section is to be submitted to the Congress within 30 days of enactment of this section, and, as provided in both bills, every 180 days thereafter.

(3) Removal from subsection (c) of the language in the Senate provision, "to the extent not precluded by forces outside its control".

(4) Amending subsection (c)(1) to refer to the Government of El Salvador's efforts to "comply with" rather than "control violations of" internationally recognized human rights.

(5) Amending subsection (c)(2) to adopt the House language which reads: "is achieving substantial control over all elements of its own armed forces, so as to bring to an end the indiscriminate torture and murder of Salvadoran citizens by these forces".

(6) Amending subsection (c)(4) to read: "is committed to the holding of free elections at an early date and to that end has demonstrated its good faith efforts to begin discussions with all major political factions in El Salvador which have declared their willingness to find and implement and equitable political solution to the conflict, with such solution to involve a commitment to (1) a renouncement of further military or paramilitary activity, and (2) the electoral process with internationally recognized observers."

The conferees noted that the removal of the Senate language in subsection (c) "to the extent not precluded by forces outside its control" was not intended as disagreement with the notion that there might be forces outside the control of the Government that might prevent its good faith efforts to implement these policies, as evidenced by the conferees agreement to include similar language in the introductory policy statement.

Reporting requirement relating to El Salvador

The Senate bill (sec. 728) provides for a report from the President regarding the conflict in El Salvador and the possibilities of its resolution.

The House amendment does not contain a comparable provision.

The conference substitute is the same as the Senate provision.

Compensation

The Senate bill (sec. 729) contains a provision prohibiting U.S. assistance for the purpose of planning for compensation, or for the purpose of compensation, for the confiscation, nationalization, acquisition, or expropriation of any agricultural or banking enterprise, or of the properties or stock shares which may be pertaining thereto.

The House amendment does not contain a comparable provision.

The conference substitute is the same as the Senate provision.

El Salvador refugees

The House amendment (sec. 720) recommends that extended voluntary departure status be granted to Salvadoran refugees.

The Senate bill contains no comparable provision.

The conference substitute is the following: "It is the sense of the Congress that the administration should continue to review, on a case-by-case basis, petitions for extended voluntary departure made by Salvadoran citizens who claim that they are subject to persecution in their homeland, and should take full account of the civil strife in El Salvador in making decisions on such petitions."

ASSISTANCE TO NICARAGUA

Conditions for assistance

The Senate bill (sec. 723) earmarks $13.275 million in development assistance and $20 million in ESF for Nicaragua under the following conditions:

(a) Such assistance shall be available only for private sector in Nicaragua;

(b) Subsection (a) shall not apply if there is progress toward free and fair elections;

(c) The President is to report for each 6-month period for which funds are provided.

The House amendment (sec. 721) provides that, in furnishing assistance to the Government of Nicaragua, the President shall take into account the Nicaraguan Government's respect for human rights, and the fulfillment by the Government of Nicaragua of its commitment to the Organization of American States; and the Government of Nicaragua's role in international terrorism. Further, any agreement for the provision of assistance shall, to the maximum extent feasible, require that the assistance be used for the private sector. The House amendment (sec. 711) states the sense of Congress that, in providing assistance to Nicaragua, the U.S. Government should take into consideration the holding of elections.

The conference substitute is the same as the House provision (sec. 721), with an amendment adding the Senate provision requiring reports every 6 months on the use of funds, the $20 million earmark, and an extension of the earmark to fiscal year 1983.

ASSISTANCE FOR PAKISTAN

The Senate bill (sec. 714) expresses the sense of the Congress that Pakistan's security is threatened by the presence of Soviet forces in Afghanistan, and that U.S. assistance will help Pakistan maintain its independence as well as benefit the people of Pakistan by promoting economic development. The bill further states that, in authorizing assistance to Pakistan, it is the intent of Congress "to promote the expeditious restoration of full civil liberties and representative government" in that country. The Senate bill earmarks $100 million in economic support funds for Pakistan for fiscal year 1982.

The Senate bill also allows the President to waive the prohibitions of section 669 of the Foreign Assistance Act of 1961, relating to transfers of nuclear enrichment equipment, for up to 6 years, solely for Pakistan, if he determines that to do so is in the national interest of the United States, and disallows the use of the Presidential waiver provided in section 670 of the Foreign Assistance Act if any non-nuclear-weapon country detonates a nuclear explosive device.

Finally, the Senate bill requires that a classified Presidential report on Pakistan's nuclear program be submitted to the Congress, as part of the presentation materials for foreign assistance programs proposed for each fiscal year, for each year the wavier for Pakistan is in effect, beginning with fiscal year 1983.

The House amendment (sec. 114) expresses the sense of the Congress regarding the security threats faced by Pakistan, the national interest of the United States in providing assistance to Pakistan in the preservation of its national independence and integrity, and the destabilizing effects of the proliferation of nuclear explosive devices or the capacity to manufacture or acquire such devices. It reaffirms the commitment made by the United States to Pakistan in the 1959 bilateral agreement relating to aggression from a Communist or Communist-dominated state states that security assistance for Pakistan will be made available in order to help that country in dealing with the security threat posed by Soviet troops in Afghanistan, and earmarks $100 million in economic support funds for fiscal year 1982.

The House bill amends sections 669 and 670 of the Foreign Assistance Act of 1961, in order to:

(1) Suspend new military and economic assistance to any country which transfers a nuclear explosive device to a non-nuclear-weapon state (as defined by article IV (3) of the Treaty on the Non-Proliferation of Nuclear Weapons), and;

(2) Suspend new military and economic assistance to a non-nuclear-weapons state which receives or detonates a nuclear explosive device.

The House concluded that an extension of the coverage to provide for suspension of assistance would help insure that any cutoff would be immediate and would include assistance in the pipeline.

Under the House bill, the above suspensions of assistance may be waived by a Presidential certification that such action would under extraordinary circumstances "be seriously prejudicial to the achievement of U.S. nonproliferation objectives" or "otherwise jeopardize the common defense and security." These Presidential waivers are then subject to congressional override by concurrent resolution.

The conference substitute is the same as the Senate provision with the following amendments:

(1) Prohibitions on economic and military assistance shall apply to any country which transfers a nuclear explosive device to any non-nuclear-weapons state, or to any non-nuclear-weapons state which receives a nuclear explosive device from another country;

(2) The prohibitions on assistance relating to transfers, receipts, or detonations of nuclear explosive devices may be delayed upon certification by the President to the Congress that an immediate termination of assistance would be detrimental to the national security of the United States. Upon such certification, the President is allowed to furnish assistance otherwise prohibited for a period of 30 days of continuous session of Congress. During that period, any joint resolution which would authorize the President to waive the termination of assistance at the end of the 30-day period will be considered under expedited procedures in both Houses;

(3) A Presidential waiver of prohibitions on assistance contained in provisions of sections 669 and 670 of the Foreign Assistance Act relating to transfer or receipt of nuclear reprocessing or enrichment equipment may be overturned by concurrent resolution of Congress during a period of 30 calendar days beginning after the waiver is submitted;

(4) A classified Presidential report to Congress is required relating to the nuclear program of any country for which a Presidential waiver of sections 669 or 670 of the Foreign Assistance Act is in effect;

(5) The language of section 114(a)(1) of the House bill expressing the sense of the Congress regarding Pakistan is incorporated into the Senate language;

(6) The earmarking of $100 million in economic support funds for Pakistan in fiscal year 1982 is deleted as part of an overall agreement on earmarking, and;

(7) The reporting requirement in section 620E(c) of the Foreign Assistance Act as amended by section 714 of the Senate bill is deleted.

The committee of conference expressed its intent that prohibitions on assistance to countries transferring or receiving nuclear explosive devices should apply specifically to the transfer or receipt of title to and control over the use of such devices. Further, the committee of conference expressed its belief that prohibitions on assistance required by section 670 of the Foreign Assistance Act as amended should be interpreted to require the immediate suspension of assistance, in the event of transfer, receipt, or detonation of a nuclear explosive device. The committee of conference expressed its intent that any waiver pursuant to the provisions of sections 669 and 670 relating to transfer or receipt of nuclear enrichment or reprocessing items should not be submitted, under normal circumstances, when a congressional recess would interfere with its consideration. The committee of conference maintained its belief that the executive branch shall keep the Congress fully and currently informed on nuclear nonproliferation matters.

The committee of conference expresses its deep concern at the continued illicit production of large quantities of opium in Pakistan, which is directly and significantly contributing to the heroin problem in the United States. The committee recognizes that the Department of State, AID, and other U.S. agencies are already taking significant steps—including high-level consultations with the Government of Pakistan—to deal with this increasingly serious problem for both countries. Nevertheless, the committee of conference strongly urges that additional steps be taken, and additional resources devoted to the narcotics suppression effort. The committee expects that narcotics suppression activities under the authorities of part I, chapter 1 and part II, chapter 4, of the Foreign Assistance Act of 1961, will be funded as a part of economic assistance programs in Pakistan.

COMPREHENSIVE ANALYSIS OF FOREIGN ASSISTANCE

The Senate bill (sec. 718) requests the President to provide no later than February 15, 1982, a comprehensive report to Congress on his approach to foreign assistance—such report to include analysis and recommendation on:

(1) The relationship between foreign assistance and defense expenditures as means of conducting foreign policy;

(2) The appropriate mix between military and economic assistance;

(3) The strengths and weaknesses, and appropriate mix, of bilateral and multilateral assistance programs;

(4) The relevance of the basic human needs approach to current aid policy;

(5) The performance of other aid donors, and the benefits they derive from their programs;

(6) Criteria for determining the appropriate size and composition of country programs;

(7) The appropriateness of the current mix of grants and loans, and the possibility of combining them with new or existing guarantee, insurance, and export credit programs;

(8) Specific means to more actively engage the private sector in assistance programs; and

(9) The usefulness of current functional categories in constructing the development assistance budget.

The House amendment does not contain a similar provision.

The conference substitute is the same as the Senate provision, except that the request for a report by February 15, 1982, is changed to request a preliminary report by March 31, 1982, and a final report by June 30, 1982. The conferees believe that this is an important opportunity for the executive branch to lay out its overall approach to foreign assistance in light of its first year of experience. While the Congress could benefit from such a study during its annual review of foreign assistance, it is more important that the study reflect the combined thinking of the various agencies and the President. Hence the conferees were willing to request that at least a preliminary report be made available to the Congress by March 31, 1982, and that the final report be submitted by June 30, 1982.

FINANCIAL OBLIGATIONS OF THE SOVIET UNION TO THE UNITED NATIONS

The Senate bill (sec. 721) contains a congressional finding that the Soviet Union is in arrears on payments for peacekeeping operations of the United Nations and a sense of Congress that the United States should undertake diplomatic initiatives to obtain payment by the Soviet Union.

The House amendment does not contain a similar provision.

The conference substitute is the same as the Senate provision.

IMMIGRANT VISAS FOR TAIWAN

The House amendment (sec. 772) provides that the approval referred to in the first sentence of section 202(b) of the Immigration and Nationality Act shall be considered to have been granted with respect to Taiwan (China).

The Senate bill did not contain a comparable provision.

The conference substitute is the same as the House provision. The intent of the provision is to extend to Taiwan eligibility for up to 20,000 immigrant visas a year which was taken away from the people on Taiwan inadvertently when the United States normalized its relationship with the People's Republic of China.

NONALINED COUNTRIES

The Senate bill (sec. 725) provides that: (a) in considering assistance to nonalined countries represented at the meeting of the Ministers of Foreign Affairs of nonalined countries on September 25 and 28, 1981, at the United Nations the President shall consider whether such country has dissociated itself from the communique issued following the meeting; (b) within 30 days after enactment of this section the President shall transmit a report on countries which have dissociated from the communique along with the method of dissociation; and (c) within 30 days after receiving a statement of dissociation from any country, the President shall transmit the statement to Congress with a description of the method of dissociation.

The House amendment (sec. 724) contains a similar provision, but requires only that the President report within 30 days on the countries which have dissociated from the communique.

The conference substitute is the same as the House provision, with an amendment requiring that the report state the methods of dissociation.

FISCAL YEAR 1983 AGGREGATE APPROPRIATIONS CEILING

The House amendment (sec. 727) established the President's fiscal year 1983 budget request as the aggregate ceiling for the fiscal year 1983 for all appropriations authorized by this act.

The Senate bill has no comparable provision.

The conference substitute is the same as the Senate provision.

SAVINGS PROVISION

The House amendment (sec. 719) contains a savings provision stating that enactment of this act shall not affect provisions of law specifically applicable to fiscal year 1981 which are repealed or otherwise amended by this act.

The Senate bill does not contain a similar provision.

The conference substitute is the same as the Senate position.

EFFECTIVE DATE

The Senate bill (sec. 732) states the act shall be effective upon the date of anactment except as otherwise provided in for section 712 (repeals). Authorizations and limitations on authority for fiscal year 1982 take effect on October 1, 1981.

The House amendment does not contain a similar provision.

The conference substitute is the same as the House provision.

LEBANON

The Senate bill (sec. 715) contains a provision stating the sense of Congress concerning the crisis in Lebanon and citing principles for U.S. policy, including the maintenance of an effective cease-fire, resolution of the issue of Syrian missiles in Lebanon, freedom for various communities in Lebanon, reaffirmation of historic U.S. ties with Lebanon, generous support for relief efforts in the country, and respect for a Lebanese Government based on open national elections free from external interference.

The House bill (sec. 714) contains comparable language but does not refer to the issue of the Syrian missiles or relief efforts in Lebanon.

The conference substitute is a compromise which includes all elements of the Senate provision and rephrases the last principle of U.S. policy in the Senate bill to read "restoration of Lebanon's sovereignty free from outside domination or occupation."

CYPRUS CONFLICT

The House amendment (sec. 717) constains a provision stating the sense of Congress that the President should take into account whether governments are helping to

promote a peaceful settlement of the Cyprus dispute and that a peaceful settlement should entail withdrawal of foreign troops and a return of Cypriot refugees to their homes.

The Senate bill does not contain a comparable provision.

The conference substitute is the same as the Senate position.

TOXINS AND BIOLOGICAL AND CHEMICAL AGENTS

The Senate bill (sec. 722) contains a provision that condemns use of toxins, or biological or chemical agents against the people of Laos. Kampuchea, and Afghanistan, urges U.N. action on violations of international law, and urges the President to obtain an explanation from the Soviet Union regarding the strong circumstantial and presumptive evidence of agent use.

The House amendment contains a comparable provision that also states the sense of Congress that the President allocate highest priority to the development of further evidence. The House provision also reiterates concern about the Sverdlovsk anthrax outbreak and expresses the sense of Congress that negotiation of a chemical weapons treaty should be given high priority.

The conference substitute is the same as the House provision.

ANGOLA

The Senate bill (sec. 709) repeals section 118 of the International Security and Development Cooperation Act of 1980 that prohibits military or paramilitary assistance to Angola and states that nothing in this section should be construed as endorsement of aid for military or paramilitary operations in Angola.

The House amendment does not contain a comparable provision.

The conference substitute is the same as the House position.

Managers on the Part of the Senate.

PROTECTION ISLAND NATIONAL WILDLIFE REFUGE

Mr. JONES of North Carolina. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1486) to establish the Protection Island National Wildlife Refuge, Jefferson County, State of Washington, as amended.

The Clerk read as follows:

H.R. 1486

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Protection Island National Wildlife Refuge Act".

SEC. 2. The Congress finds that—

(1) Protection Island provides nesting habitat for 72 per centum of the entire seabird population of Puget Sound and the Strait of Juan de Fuca;

(2) this island also provides refuge for other species, including the endangered bald eagle and the harbor seal; and

(3) this island is a nationally significant environmental resource threatened with destruction through residential and related development.

SEC. 3. As used in this Act:

(a) The term "refuge" means the Protection Island National Wildlife Refuge that includes those lands and waters, and interests therein, located in Jefferson County, State of Washington, that are depicted on the map entitled "Protection Island National Wildlife Refuge", dated September , 1980, and on file at the United States Fish and Wildlife Service. The purposes of the refuge are to provide habitat for a broad diversity of bird species, with particular emphasis on protecting the nesting habitat of the bald eagle, tufted puffin, rhinoceros auklet, pigeon guillemot, and pelagic cormorant; to protect the hauling-out area of harbor seals; and to provide for scientific research and wildlife-oriented public education and interpretation.".

(b) The term "Secretary" means the Secretary of the Interior.

SEC. 4. (a) Subject to subsections (b) and (c), the Secretary is authorized to acquire lands and waters or interests therein within the boundaries of the refuge by donation, purchase with donated or appropriated funds, or exchange.

(b)(1) In the case of any person who is the owner of land that—

(A) is within the boundaries of the refuge and contains a structure, suitable for use as a personal residence, that was located on the land on January 1, 1981; and

(B) in the judgment of the Secretary the United States should acquire a fee simple interest therein;

the Secretary shall first offer to acquire land subject to a life use, or, at the option of the owner, to an extended use reservation for a shorter term of years, subject to such terms and conditions as the Secretary deems necessary or appropriate to insure that the land will be used in a manner that is compatible with the purposes for which the refuge is established.

(2) Acquisition of land subject to life uses or other extended use reservations under paragraph (1) shall be made on the basis of the fair market value of the land and improvements thereon at the time of acquisition less 1 per centum of such value for each year of the reservation. The term of life uses shall be calculated on an actuarial basis.

(c) With respect to land within the boundaries of the refuge other than land described in subsection (b), the Secretary, in order to lessen the impact of Federal question on the present owners, shall give special consideration to providing for extended use reservations to the extent compatible with the purposes for which the refuge is established.

SEC. 5. The Secretary shall establish the refuge by publication of a notice to that effect in the Federal Register at such time as he determines that lands, waters, and interests therein sufficient to constitute an efficiently administrable refuge have been acquired. The Secretary may make such minor revisions in the boundaries of the refuge as may be appropriate to carry out the provisions of this Act.

SEC. 6. Prior to the establishment of the refuge and thereafter, the Secretary shall administer the lands, waters, and interests therein acquired for the refuge in accordance with the National Wildlife Refuge System Administration Act of 1966 (16 U.S.C. 668dd–ee). The Secretary may utilize such additional statutory authority as may be available to him for the conservation and development of wildlife and natural resources, the development of outdoor recreation opportunities compatible with the wildlife resources, and interpretive education as he deems appropriate to carry out the purposes of the refuge.

SEC. 7. Beginning October 1, 1982, there are authorized to be appropriated $5,000,000 for acquisition of lands and waters, and interests therein, for the refuge.

The SPEAKER. Is a second demanded?

Mr. FORSYTHE. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER. The gentleman from North Carolina (Mr. JONES) will be recognized for 20 minutes, and the gentleman from New Jersey (Mr. FORSYTHE) will be recognized for 20 minutes.

The Chair recognizes the gentleman from North Carolina (Mr. JONES).

Mr. JONES of North Carolina. Mr. Speaker, I yield myself such time as I may consume

Mr. Speaker, H.R. 1486 would establish the Protection Island National Wildlife Refuge in Jefferson County in Washington State.

Protection Island consists of 400 acres located in the entrance to Puget Sound in the State of Washington. Both the U.S. Fish and Wildlife Service and the State of Washington have identified it as a unique seabird habitat of national significance. This island is particularly valuable for two species of birds that have highly specialized habitat requirements, the rhinoceros auklet and tufted puffin. Owls, nighthawks, swifts, finches, and many types of western songbirds also reside on Protection Island and in recent years two pairs of bald eagles have nested on the island. A larg pod of harbor seals uses the island for whelping and resting.

The island has been subdivided for residential and recreational development since 1968. In 1974, the county placed a moratorium on building until a State-approved water system could be developed. As a result, only a few houses have been constructed.

If a water system is constructed and large-scale development results, there is a real concern that the result would be the reduction or elimination of the seabird habitat and the loss of a natural resource of national significance. Of particular concern is the potential for the release of rats or feral cats, both of which would have serious effects on ground nesting species such as the auklet.

H.R. 1486 would create the Protection Island National Wildlife Refuge which would be managed by the Secretary of the Interior through the Fish and Wildlife Service as part of the National Wildlife Refuge System. An authorization of $5 million for acquisition, beginning in fiscal year 1983, is included in the bill.

Mr. Speaker, H.R. 1486, as reported by the Committee on Merchant Marine and Fisheries, would direct the Secretary to offer life estates or other extended-use reservations to those who own habitable residences on the island. The number of the residences is not great nor is their present use damaging to the birdlife on the island. I believe that, with this amendment, the legislation strikes a fair balance between the protection of the birdlife and respect for the rights of the landholders and I urge my colleagues to support this bill.

Mr. FORSYTHE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I support the passage of H.R. 1486, a bill to assure that the integrity and values of Protection Island in Washington State are retained and perpetuated for the nesting seabirds and the harbor seals found in Puget Sound.

The island serves as an extraordinary breeding area for six species of seabirds. Over 40,000 seabirds utilize the 400-acre island for nesting. In addition, the beach areas serve as habitat for pupping and hauling out activities of harbor seals.

In 1968 a development company purchased the island and initiated plans to develop it as a residential and recreational home subdivision which included nearly 1,100 lots. To date nearly 600 lots have been sold, but in 1974 a building moratorium was imposed on Protection Island until a State-approved water system could be developed. Consequently, development has been limited to a small airstrip, an unapproved road system, a marina, and a small number of residences. However, there is no doubt that should the water problem be resolved and development commence, the value of this island as a seabird nesting site would be dramatically reduced.

Many of the property owners on Protection Island have indicated a willingness to sell their lots in order to facilitate the establishment of a national wildlife refuge. However, other landowners are opposed to selling their property. Many want to continue to visit or reside on their property, and others want to maintain ownership for investment purposes.

The legislation before us today will authorize the Secretary of the Interior to acquire the lands, waters, or any interest in such lands and waters on Protection Island as are necessary to carry out the purposes of the refuge. At the same time, those lotowners who had structures on their lots suitable for personal residence on January 1, 1981, are assured of being offered life or other extended-use reservations on their property. The bill assures the protection of the birds and marine mammals and their important habitat while providing for the continuation of a limited number of activities.

Therefore, Mr. Speaker, I want to urge my colleagues to join me in supporting the passage of H.R. 1486.

Mr. PRITCHARD. Will the gentleman yield?

Mr. FORSYTHE. I yield to the gentleman from Washington.

Mr. PRITCHARD. Mr. Speaker, I rise in support of H.R. 1486 which would establish the Protection Island Refuge in my home State of Washington. I first would like to thank my colleague from the State of Washington, who introduced this legislation, for all his help in getting the bill to the House floor for consideration today. I would also like to commend the members of the Merchant Marine and Fisheries Committee for their unanimous support of this bill.

The abundant wildlife resources on this 400-acre island in the Strait of Juan de Fuca has been identified by both the U.S. Fish and Wildlife Service and the State of Washington as a unique seabird habitat of national and international significance. The island's location and topography are also ideally suited for some marine mammals as well. In contrast, the lack of potable water and high winds make human habitation on the island difficult.

Protection Island has two histories: A long history of being perhaps the most important seabird nesting area in Puget Sound and the Strait of Juan de Fuca, and a relatively short, unsuccessful history for recreational development. Other islands in Puget Sound and the San Juans possess far better recreational development potential than Protection Island. However, few, if any, locations are left which would provide suitable habitat for these species.

Although the island is relatively small, there are a substantial number of private lot owners. A survey conducted last year by the Protection Island Property Owners Association revealed that many would be interested in selling their property to the Federal Government for the purpose of creating a wildlife refuge. Others expressed specific reservations about selling their lots to the Federal Government. This legislation addresses those reservations by incorporating an amendment adopted during the subcommittee markup, which provides the Fish and Wildlife Service with the necessary flexibility to treat all the property owners fairly.

I urge that this bill be passed with the support of the full House. Thank you.

Mr. JONES of North Carolina. I yield such time as he may consume to the gentleman from Louisiana (Mr. BREAUX).

Mr. BREAUX. Mr. Speaker, I would just point out the contribution of the gentleman from Washington (Mr. BONKER) who has been instrumental in developing this legislation through the subcommittee process. He has had hearings in his congressional district along with the gentleman from Washington (Mr. PRITCHARD) and I thank them for their active work.

Mr. Speaker, H.R. 1486 would establish the Protection Island National Wildlife Refuge in Jefferson County in Washington State.

Protection Island consists of 400 acres located in the entrance to Puget Sound in the State of Washington. Both the U.S. Fish and Wildlife Service and the State of Washington have identified it as a unique seabird habitat of national significance. This island is particularly valuable for two species of birds that have highly specialized habitat requirements, the rhinoceros auklet and tufted puffin. Owls, nighthawks, swifts, finches, and many types of western songbirds also reside on Protection Island and in

recent years two pair of bald eagles have nested on the island. A large pod of harbor seals uses the island for whelping and resting.

The island has been subdivided for residential and recreational development since 1968. In 1974, the county placed a moratorium on building until a State-approved water system could be developed. As a result, only a few houses have been constructed.

If a water system is constructed and large-scale development results, there is a real concern that the result would be the reduction or elimination of the seabird habitat and the loss of a natural resource of national significance. Of particular concern is the potential for the release of rats or feral cats, both of which would have serious effects on ground nesting species such as the auklet.

H.R. 1486 would create the Protection Island National Wildlife Refuge which would be managed by the Secretary of the Interior through the Fish and Wildlife Service as part of the National Wildlife Refuge System. An authorization of $5 million for acquisition, beginning in fiscal year 1983, is included in the bill.

Mr. Speaker, H.R. 1486, as reported by the Committee on Merchant Marine and Fisheries, would direct the Secretary to offer "life estates" or other extended use reservations to those who own habitable residences on the island. The number of the residences is not great nor is their present use damaging to the bird life on the island. I believe that, with this amendment, the legislation strikes a fair balance between the protection of the bird life and respect for the rights of the landholders and I urge my colleagues to support this bill.

● Mr. DICKS. Mr. Speaker, I am pleased to have this opportunity to remind my colleagues of my support for the Protection Island National Wildlife bill.

This bill was first introduced in the 96th Congress because of an increasing statewide concern for preserving the island's unique resources. This concern has not diminished since the Protection Island bill was first proposed. Instead, the concern has grown. The threats to the island are increasing. The time to act is now.

I understand the concerns of my colleagues with regard to the rights of the property owners. In response to this, Congress BREAUX introduced an amendment which gives consideration to the landowners. Under the amendments, the Secretary of the Interior is directed to offer life leases to owners of improved property. In addition, the Breaux amendment further encourages the Secretary to offer similar options to the owners of unimproved property. This amendment mollifies much of the opposition created by the Protection Island Refuge proposal.

H.R. 1486 authorizes $5 million in fiscal year 1983 to establish the Protection Island National Wildlife Refuge. The authorization and the establishment of the refuge is necessary for several reasons.

The island is beset with excessive winds, severely eroding cliffs, and because there is less than 16 inches of rainfall per year, the threat of fire is imminent. There is no electricity, no dependable transportation on and off the island, and no reason why this island should have been plotted in the first place. Perhaps most disturbing to the property owners is the fact that there is no potable water. Potable water was promised when the island was initially plotted and sold. However, after several aborted attempts to provide water for the island, the State Health Department has placed a ban on building and septic tank permits. It appears unlikely that an acceptable source of water will be supplied.

The 400-acre island was divided into 835 lots, thereby providing a potential for over 3,000 people to inhabit the island. Increased development, human disturbance to the breeding grounds of the harbor seals and the 21,000 pair of seabirds, and the introduction of predatory animals would fatally disturb the wildlife and the delicate ecosystem of Protection Island. For all the reasons that Protection Island is perfectly suited to bird and animal, it is equally unsuited to residential and commercial development.

The value of this island as a source of recreational opportunity, environmental education and interpretive programs cannot be underestimated—nor can it be disputed. I urge my colleagues to take advantage of this opportunity to preserve this island for the enjoyment of this generation and for future generations—vote for passage of H.R. 1486.●

Mr. JONES of North Carolina. Mr. Speaker, I have no further requests for time.

Mr. SPEAKER. The question is on the motion offered by the gentleman from North Carolina (Mr. JONES) that the House suspend the rules and pass the bill, H.R. 1486, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill as amended, was passed.

A motion to reconsider was laid on the table.

□ 1800

GENERAL LEAVE

Mr. JONES of North Carolina. Mr. Speaker, I ask unanimous consent that all Members who wish to may have 5 legislative days in which to revise and extend their remarks on the bill, H.R. 1486, as amended.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

FISHERMEN'S CONTINGENCY FUND

Mr. JONES of North Carolina. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3816) to improve the operation of the Fishermen's Contingency Fund established to compensate commercial fishermen for damages resulting from oil and gas exploration, development, and production in areas of the Outer Continental Shelf, as amended.

The Clerk read as follows:

H.R. 3816

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. DEFINITIONS.

Section 401 of the Outer Continental Shelf Lands Act Amendments of 1978 (43 U.S.C. 1841) is amended as follows:

(1) renumber paragraphs (1) through (7) as paragraphs (2) through (8); and

(2) insert immediately before paragraph (2), as renumbered, the following:

"(1) 'area affected by Outer Continental Shelf activities' means any geographic area:

"(A) which is under oil or gas lease on the Outer Continental Shelf;

"(B) where Outer Continental Shelf exploration, development, or production activities have been permitted, except geophysical activities;

"(C) where pipeline rights-of-way have been granted; or

"(D) otherwise impacted by such activities including but not limited to expired lease areas, relinquished rights-of-way and easements, Outer Continental Shelf supply vessel routes, or other areas as determined by the Secretary;".

SECTION 2. ESTABLISHMENT AND OPERATION OF FUND.

Section 402 of the Outer Continental Shelf Lands Act Amendments of 1978 (43 U.S.C. 1842) is amended to read as follows:

"ESTABLISHMENT OF FISHERMEN'S CONTINGENCY FUND; FEE COLLECTION

"SEC. 402. (a)(1) There is established in the Treasury of the United States a Fishermen's Contingency Fund. The Fund shall be available to the Secretary without fiscal year limitations as a revolving fund for the purpose of making payments pursuant to this section. The Fund shall consist of—

"(A) revenues received from investments made under paragraph (3);

"(B) amounts collected under subsection (b); and

"(C) amounts recovered by the Secretary under section 405(h)(3).

The total amount in the Fund that is attributable to such revenues and amounts may at no time exceed $2,000,000; and not more than 8 percent of such total amount may be expended in any fiscal year for paying the administrative and personnel expenses referred to in paragraph (2)(A).

"(2) The Fund shall be available, as provided for in appropriation Acts solely for the payment of—

"(A) the personnel and administrative expenses incurred in carrying out this title;

"(B) any claim, in accordance with procedures established under this section, for damages that are compensable under this title; and

"(C) attorney and other fees awarded under section 405(e) with respect to any such claim.

"(3) Sums in the Fund that are not currently needed for the purposes of the Fund shall be kept on deposit in appropriate interest-bearing accounts that shall be established by the Secretary of the Treasury or invested in obligations of, or guaranteed by, the United States. Any revenue accruing from such deposits and investments shall be deposited into the Fund.

"(4) The Fund may sue and be sued in its own name. All litigation by or against the Fund shall be referred to the Attorney General.

"(b)(1) Except as provided in paragraph (2), each holder of a lease that is issued or maintained under the Outer Continental Shelf Lands Act and each holder of an exploration permit, or an easement or right-of-way for the construction of a pipeline in any area of the Outer Continental Shelf, shall pay an amount specified by the Secretary. The Secretary of the Interior shall collect such amount and deposit it into the Fund. In any calendar year, no holder of a lease, permit, easement, or right-of-way shall be required to pay an amount in excess of $5,000 per lease, permit, easement, or right-of-way.

"(2) Payments may not be required under paragraph (1) by the Secretary of the Interior with respect to geological permits and geophysical permits, other than prelease exploratory drilling permits issued under section 11 of the Outer Continental Shelf Lands Act (3 U.S.C. 1340).".

SEC. 3. ADMINISTRATION OF CLAIMS.

Section 403(c) of such amendments of 1978 (43 U.S.C. 1843(c)) is amended as follows:

(1) Paragraph (1) is amended to read as follows:

"(c)(1) Payments shall be disbursed by the Secretary from the Fund to compensate commercial fishermen for actual and consequential damages, including resulting economic loss, due to damages to, or loss of, fishing gear by materials, equipment, tools, containers, or other items associated with Outer Continental Shelf oil and gas exploration, development, or production activities. The compensation payable under this section for resulting economic loss shall be an amount equal to 25 per centum of such loss. For purposes of this subsection, the term 'resulting economic loss' means the gross income, as estimated by the Secretary, that a commercial fisherman who is eligible for compensation under this section will lose by reason of not being able to engage in fishing, or having to reduce his fishing effort, during the period before the damaged or lost fishing gear concerned is repaired or replaced and available for use.".

(2) Paragraph (2) is amended—

(A) by striking out "any area account established under this title—" and inserting in lieu thereof "the Fund—",

(B) by striking out subparagraphs (A) and (E),

(C) by redesignating subparagraphs (B), (C), and (D) as subparagraphs (A), (B), and (C), respectively,

(D) by inserting "and" after the semicolon in subparagraph (C) (as so redesignated),

(E) by redesignating subparagraph (F) as subparagraph (D), and

(F) by striking out "or will receive" in subparagraph (D) (as so redesignated) and inserting in lieu thereof "received, or will receive,".

SEC. 4. BURDEN OF PROOF.

Section 404 of such amendments of 1978 (43 U.S.C. 1844) is amended—

(1) by amending the matter appearing before paragraph (1) to read as follows: "With respect to any claim for damages filed under this title, there shall be a presumption that such damages were due to activities related to oil and gas exploration, development, or production if the claimant establishes that—";

(2) by striking out "five days after the date on which such damages were discovered;" in paragraph (2) and inserting in lieu thereof "fifteen days after the date on which the vessel first returns to a port after discovering such damages;"; and

(3) by amending paragraph (3) by striking "existed in such area" and inserting in lieu thereof "existed where such damages occurred, except that in the case of damages caused by a pipeline, the presumption established by this section shall obtain whether or not there was any such record of the pipeline on the damage date; and".

SEC. 5. CLAIMS PROCEDURE.

Section 405 of such amendments of 1978 (43 U.S.C. 1845) is amended as follows:

(1) Subsection (b) is amended to read as follows:

"(b) Upon receipt of any claim under this section, the Secretary shall transmit a copy of the claim to the Secretary of the Interior and shall take further action regarding the claim that is required under subsection (d).".

(2) Subsection (c) is amended by striking out "hearing" and inserting in lieu thereof "proceeding".

(3) Subsection (d) is amended to read as follows:

"(d)(1) The Secretary shall, under regulations prescribed pursuant to section 403(a), specify the form and manner in which claims must be filed.

"(2) The Secretary may not accept any claim that does not meet the filing requirements specified under paragraph (1), and shall give a claimant whose claim is not accepted written notice of the reasons for nonacceptance. Such written notice must be given to the claimant within 30 days after the date on which the claim was filed and if the claimant does not refile an acceptable claim within 30 days after the date of such written notice, the claimant is not eligible for compensation under this title for the damages concerned; except that the Secretary—

"(A) shall in any case involving a good faith effort by the claimant to meet such filing requirements, or

"(B) may in any case involving extenuating circumstances,

accept a claim that does not meet the 30-day refiling requirement.

"(3)(A) The Secretary shall make an initial determination with respect to the claim within 60 days after the day on which the claim is accepted for filing. Within 30 days after the day on which the Secretary issues an initial determination on a claim, the claimant, or any other interested person who submitted evidence relating to the initial determination may petition the Secretary for a review of that determination.

"(B) If a petition for the review of an initial determination is not filed with the Secretary within the 30-day period provided under subparagraph (A), the initial determination shall thereafter be treated as a final determination by the Secretary on the claim involved.

"(C) If a petition for the review of an initial determination is timely filed under subparagraph (A), the Secretary shall undertake such review and, on the basis of such review, issue a final determination with respect to the claim within the period beginning on the 30th day, and ending on the 60th day, after the day on which the Secretary issued such initial determination. Before undertaking any such review, the Secretary shall provide to the claimant, and any other interested person who submitted evidence relating to the initial determination, an opportunity to submit written or oral evidence relating to that determination.".

(4) Subsection (e) is amended to read as follows:

"(e) If the decision of the Secretary under subsection (d) is in favor of the commercial fisherman filing the claim, the Secretary, as a part of the amount awarded, shall include reasonable claim preparation fees and reasonable attorney's fees, if any, incurred by the claimant in pursuing the claim.".

(5) Subsection (f) is amended by striking out "hearing examiner" each place it appears therein and inserting in lieu thereof "the Secretary", and by striking out "hearing" each place it appears therein and inserting in lieu thereof "proceeding".

(6) Subsection (g) is amended to read as follows:

"(g) Any proceeding conducted with respect to an initial determination on a claim under subsection (d)(3)(A) shall be conducted within such United States judicial district as may be mutually agreeable to the claimant and the Secretary or, if no agreement can be reached, within the United States judicial district in which the home port of the claimant is located.".

(7) Subsection (h) is amended—

(A) by amending paragraph (1) to read as follows:

"(h)(1) The amount awarded in an initial determination by the Secretary under subsection (d) shall be immediately disbursed, subject to the limitations of this section, by the Secretary if the claimant—

"(A) states in writing that he will not petition for review of the initial determination; and

"(B) enters into an agreement with the Secretary to repay to the Secretary all or any part of the amount of the award if, after review under subsection (d)(3)(C) or, if applicable, after judicial review, the amount of the award, or any part thereof, is not sustained."; and

(B) Paragraph (2) is amended by adding at the end thereof the following new sentence: "Any moneys recovered by the Secretary through subrogation shall be deposited into the Fund.".

(8) Subsection (i) is amended to read as follows:

"(i) Any claimant or other person who suffers a legal wrong or who is adversely affected or aggrieved by a final determination of the Secretary under subsection (d), may, no later than 30 days after such determination is made, seek judicial review of the determination in the United States district court for such United States judicial district as may be mutually agreeable to the parties concerned or, if no agreement can be reached, in the United States district court for the United States judicial district in which is located the home port of the claimant.".

SEC. 6. SURVEY OF OBSTRUCTIONS.

Section 407(a) of the Outer Continental Shelf Lands Act Amendments of 1978 (43 U.S.C. 1847(a)) is amended by striking out "a two-year survey" and inserting in lieu thereof ", during the 2-year period beginning on the date of the enactment of the 1981 amendment to this subsection, a survey".

SEC. 7. REGULATIONS IMPLEMENTING THIS ACT.

Section 403(a)(1) of the Outer Continental Shelf Lands Act Amendments of 1978 (43 U.S.C. 1843(a)(1)) is amended by striking out "claims; and" and inserting in lieu therof "claims (except that, notwithstanding any other provision of law, final regulations implementing the 1981 amendments to this title shall be published in the Federal Register within 120 days after the date of the enactment of such amendments); and".

SEC. 8. TECHNICAL AMENDMENT.

Section 401(3)(B) of the Outer Continental Shelf Lands Act Amendments of 1978 (43 U.S.C. 1841(3)(B)) is amended by striking out "at sea".

SEC. 9. EFFECTIVE DATE.

(a) Except as provided for in subsection (b), the amendments made by this Act shall apply with respect to claims for damages that are filed, on or after the date of the enactment of this Act, with the Secretary of Commerce under section 405(a) of the Outer Continental Shelf Lands Act Amendments of 1978.

(b)(1) Any commercial fisherman who filed a claim with the Secretary of Commerce for compensation under title IV of such amendments of 1978 before the date of the enactment of this Act may, if no decision on such claim was rendered under section 405(d) of such title IV before such date of enactment, refile such claim with the Secretary if the claimant notifies the Secretary in writing within thirty days after notification under paragraph (2) of his eligibility to refile the claim that he intends to so refile. If timely notification of intent to refile is made under the preceding sentence, any action pending with respect to the original claim shall be suspended pending the refiling of the claim under paragraph (2) and, if such refiling is timely made, such action shall be vacated.

(2) The Secretary shall notify each claimant eligible to refile a claim under paragraph (1) of such eligibility within 10 days after the date of enactment of this Act.

(3) A claim for which notification on intent to refile was timely made under paragraph (1) must be refiled with the Secretary within the thirty-day period after the date on which the regulations promulgated to implement the amendments made by this Act become final or action shall be resumed with respect to such claim without regard to the amendments made by this Act.

(4) The amendments made by this Act shall apply with respect to any claim that is refiled on a timely basis under paragraph (3).

The SPEAKER. Is a second demanded?

Mr. FORSYTHE. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER. The gentleman from North Carolina (Mr. JONES) will be recognized for 20 minutes, and the gentleman from New Jersey (Mr. FORSYTHE) will be recognized for 20 minutes.

The Chair recognizes the gentleman from North Carolina (Mr. JONES).

Mr. JONES of North Carolina. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 3816, a bill to improve the operation of the fishermen's contingency fund. This fund was established under title IV of the 1978 amendments to the Outer Continental Shelf Lands Act of 1953. It was intended to compensate commercial fishermen for damage to fishing gear resulting from oil and gas exploration on the Outer Continental Shelf. Unfortunately, the Administrative Law Judge proceedings set up for processing claims by regulations implementing the act have proved to be cumbersome, costly and time-consuming. For example, of the 176 claims filed under title IV, only 11 had been paid when H.R. 3816 was introduced; and it had required an average of 22 months to process each of these claims. The purpose of H.R. 3816 is to simplify and expedite the claims process, to substitute a simple new "Loss of Profits" formula, and to assure that claims hereafter are heard and determined within a maximum of 120 days. The bill increases the total amount of the fishermen's contingency fund from $1 million to $2 million, but continues to derive the funds from fees charged Outer Continental Shelf oil exploration permittees and oil line easement holders. The bill authorizes no appropriations. It does just what its title says: It improves the operation of the fishermen's contingency fund which was established to compensate commercial fishermen for damages resulting from oil and gas exploration on the Outer Continental Shelf.

The motion to suspend the rules incorporates four amendments designed to improve the bill. In a moment, the gentleman from Louisiana will explain the amendments.

Mr. Speaker, I urge my colleagues to support this important bill.

I now yield such time as he may consume to the gentleman from Louisiana, chairman of the Subcommittee on Fisheries and Wildlife Conservation and the Environment.

Mr. BREAUX. Mr. Speaker, will the gentleman yield?

Mr. JONES of North Carolina. I yield to the gentleman from Louisiana.

Mr. BREAUX. Mr. Speaker, as the distinguished chairman of the Merchant Marine and Fisheries Committee, Mr. JONES, has indicated, the thrust of H.R. 3816, as amended, is to streamline and simplify a Federal program that has run aground.

The fishermen's contingency fund, created by title IV of the Outer Continental Shelf Lands Act Amendments of 1978, was designed to address the concerns of the Congress about the possible interference of OCS-related activity with commercial fishing operations. It is to be recalled that one of the primary purposes of the 1978 OCS Lands Act Amendments was to lay the groundwork for an accelerated OCS leasing program, particularly in so-called frontier areas where there was little, or no, previous experience with OCS leasing activities. Many Members believed that local opposition to an accelerated leasing program in frontier areas, such as Georges Bank, was attributable to the fears of local fishermen regarding the potentially harmful impact that OCS leasing might have on their ability to harvest the abundant fishery resources above the shelf.

With enactment of the title IV program, Congress sought to assure these fishermen of prompt and equitable relief for direct damage to their boats and fishing gear, as well as related consequential damages from lost fishing time, due to OCS activities.

As the gentleman from North Carolina has pointed out, this program has proved to be an administrative disaster. It took over a year and one-half to get regulations promulgated; when promulgated, the regulations were incomprehensible; claims filed over 2 years ago were not yet processed when committee received testimony this past June; three times the amount paid to claimants has been spent on administrative costs by the Federal Government; and on and on.

The result has not been a lessening of the concerns of commercial fishermen, but an intensification. Recent discussions between Georges Bank fishermen and the offshore oil and gas industry concerning the feasibility of establishing an informal commission consisting of representatives of both industries is one example of this continuing concern. One plan contemplated by the parties envisioned that the commission would act as an original arbitrator in a dispute. If the commission ruled that a claim was valid, an interest free loan in the claimed amount, guaranteed by the oil companies, would be immediately paid to the fisherman. If the fisherman subsequently recovered from the Fishermen's Contingency Fund, the loan would be repaid.

Mr. Speaker, our committee believes that this type of stopgap measure should not be necessary. It is a waste of corporate assets—the oil companies having once tied up capital in the form of a fund assessment and a second time in the form of a guaranteed loan.

Numerous problems have also been incurred by fishermen in the Gulf of Mexico which, of course, is the area of greatest offshore activity. H.R. 3816, as amended, attempts to alleviate the need for the backstop efforts being discussed in New England, as well as

the hardships encountered in the gulf, by:

First, consolidating the existing fund and area accounts into one general fund, to be centrally administered by the Secretary of Commerce. The Department estimates that the administrative savings from the resulting lighter bookkeeping and reassessment burdens would run from 15 to 25 percent;

Second, removing the requirement that every claim be sent through a formal administrative law proceeding. All evidence received by the subcommittee indicates that this requirement was the single biggest cause of present program delays;

Third, placing strict time limits on the new process by which the Secretary of Commerce validates the claims presented to him; and

Fourth, substituting a "resulting economic loss" formula for the current "loss of profits" test for determining consequential damages. The current test involves the utilization of prior year's tax returns and has proved inequitable as applied to the fishing industry which is subject to sizable annual fluctuations in income. The National Marine Fisheries Service indicates that the new test will entail an analysis of the current year's fishing effort.

A transitional rule contained in the bill allows those fishermen who filed a claim under the existing system and who have not received a final determination on that claim to refile their claim under the new system.

Mr. Speaker, three additional technical amendments are incorporated in the bill before us:

First, we have clarified our intent to maintain the fund as a revolving fund;

Second, we have provided clear authority for the Attorney General to handle all litigation for or against the fund. By litigation we mean either those actions instituted by the Government against a party pursuant to subrogation of the fisherman's claim or in defense of a final determination of the Secretary. The Attorney General would not, however, handle the initial and final determinations for the Secretary of Commerce as no litigation per se is envisioned. I might add that the administration requested this clarification and we have concurred after discussing the provision with the Judiciary Committee; and

Third, we have clarified the existing venue provisions so that no doubt will exist over our intent to have any formal proceeding instituted with respect to a claim conducted as close to the home port of the claimant as possible.

Finally, Mr. Speaker, I would like to congratulate the chairman and ranking minority member of our Panama Canal/OCS Subcommittee. That subcommittee had sequential referral of the bill with our own Fish and Wildlife Subcommittee and I am grateful to Mr. HUBBARD and Mr. LENT for their cooperation in insuring timely action on this necessary, corrective legislation. The problems of this program have been the subject of numerous hearings in both our subcommittees. The bill was reported by unanimous voice vote, as amended, by both subcommittees meeting in joint markup and by the full committee. I urge my colleagues to join me in passing the measure.

Mr. FORSYTHE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I join my distinguished colleague in supporting H.R. 3816. I support this legislation because it will insure the smooth operation of what was intended to be an effective conservation program for fishermen whose vessels or gear are damaged by OCS oil and gas exploration, development, and production.

When the OCS Lands Act was amended in 1978 to establish the gear compensation program, it was in anticipation of the expansion of oil and gas activities which we expected would lead to conflicts between the offshore oil and gas industry and commercial fishermen. We also expected that the procedure for determining the validity of fishermen's claims would result in timely and equitable payments to fishermen. As the distinguished chairman of the subcommittee stated, our expectations have not been fulfilled. Not only has the amount of money spent on administration of the program far exceeded the total amount of claims paid, but some claims filed up to 3 years ago still have not been acted on. Long delays have occurred even after a claimant's eligibility for damages has been acknowledged. The continuation of such delays is intolerable.

Mr. Speaker, this Nation's fishermen should not be asked to assume the economic burden of OCS oil and gas activities. The issue before us today is whether our fishermen should be forced to wait an average of 22 months for the Federal Government to act on their claims. My answer is no, and the answer in H.R. 3816 is no.

The legislation before us today establishes a simplified procedure for determining appropriate compensation and for processing the paperwork associated with claims decisions. H.R. 3816 will provide necessary relief to domestic fishermen who are now overburdened with the excessively complicated requirements of title IV. In this sense H.R. 3816 is not a new direction in congressional policy—rather it furthers one of the basic policies intended to be established by the 1978 law. Further, by simplifying the claims procedure it is expected that the cost of administering the program will be reduced between 15 and 25 percent.

Mr. Speaker, H.R. 3816 will remove the roadblocks that have plagued implementation of the fishermen's contingency fund. I urge my colleagues to join me in responding to the needs of domestic fishermen by supporting this legislation.

Mr. LENT. Mr. Speaker, will the gentleman yield?

Mr. FORSYTHE. I yield to the gentleman from New York.

Mr. LENT. Mr. Speaker, I rise in strong support of H.R. 3816, a bill making needed improvements to the operation of the fishermen's contingency fund. The fishermen's contingency fund was established by title IV of the Outer Continental Shelf Lands Act Amendments of 1978 to compensate commercial fishermen for damages resulting from oil and gas exploration, development, and production on the OCS. These changes in the fund's operation are based on experience over the past 3 years during which time a number of problems causing unnecessary delays in claims payments have been identified. The Panama Canal/OCS Subcommittee, on which I serve as the ranking minority member, held hearings on this issue as did the Subcommittee on Fisheries and Wildlife Conservation and the Environment. In addition, a number of the problems with the fund were outlined in the final report of the select committee on the OCS last year.

I believe the proposal before us today effectively and equitably addresses the concerns which have been brought to our committee's attention. To facilitate the claims procedure, the legislation eliminates the area accounts thereby reducing administrative expenses. It also requires that all claims be processed by the National Marine Fisheries Service in an informal proceeding rather than involving administrative law judges in a lengthy claims settlement procedure. In anticipation of increased OCS oil and gas activity, the legislation increases the size of the fund from $1 million to a maximum of $2 million. The fund is supported by fees paid by the offshore oil and gas industry and its sole purpose is to compensate commercial fishermen for gear loss, damage, and related consequential damages sustained as a result of offshore oil and gas activity.

The committee amendment makes only minor technical changes to the bill as reported. It clarifies that the fund shall be a revolving fund to assure its continuity. In addition, it clarifies that all litigation by or against the fund shall be referred to the Attorney General as provided in section 516 of title 28, United States Code. The intent of H.R. 3816 is to expedite payment of claims so that fishermen can get back to work as soon as possible after sustaining damages. With increased OCS oil and gas activi-

ties expected, these improvements to the fishermen's contingency fund are needed to reduce unnecessary administrative delays and redtape in the claims procedures. H.R. 3816 deserves the full support of this body and I urge my colleagues to vote for its passage.

The SPEAKER. The question is on the motion offered by the gentleman from North Carolina (Mr. JONES) that the House suspend the rules and pass the bill, H.R. 3816, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. JONES of North Carolina. Mr. Speaker, I ask unanimous consent that all Members who wish to do so may have 5 legislative days in which to revise and extend their remarks on the bill, H.R. 3816, as amended.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

BANDON MARSH WILDLIFE REFUGE

Mr. JONES of North Carolina. Mr. Speaker I move to suspend the rules and pass the bill (H.R. 2241) to provide for the establishment of the Bandon Marsh National Wildlife Refuge, Coos County, State of Oregon, as amended.

The Clerk read as follows:

H.R. 2241

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—BANDON MARSH NATIONAL WILDLIFE REFUGE

PURPOSES OF REFUGE

SEC. 101. For the preservation and enhancement of the highly significant wildlife habitat of the area known as Bandon Marsh, in the estuary of the Coquille River in the State of Oregon, for the protection of migratory waterfowl, numerous species of shorebirds and fish, including Chinook and silver salmon, and to provide opportunity for wildlife-oriented recreation and nature study on the marsh, the Secretary of the Interior (hereinafter in this title referred to as the "Secretary") shall establish as part of the national wildlife refuge system a national wildlife refuge to be known as the Bandon Marsh National Wildlife Refuge (hereinafter in this title referred to as the "refuge").

BOUNDARIES OF THE REFUGE

SEC. 102. There shall be included within the boundaries of the refuge those lands and waters generally depicted on the map entitled "Bandon Marsh National Wildlife Refuge", dated September 1980, comprising approximately three hundred acres. The map shall be on file and available for public inspection in the office of the United States Fish and Wildlife Service, Department of the Interior.

ACQUISITION

SEC. 103. The Secretary may acquire lands or waters, or interests therein, within the boundaries of the refuge by donation, purchase with donated or appropriated funds, or exchange. Any lands, waters, or interests therein owned by the State of Oregon or by any political subdivision thereof may be acquired only with the consent of the owner thereof.

ESTABLISHMENT

SEC. 104. The Secretary shall establish the refuge by publication of a notice to that effect in the Federal Register at such time as he determines that lands, waters, and interests therein sufficient to constitute an efficiently administratable refuge have been acquired.

ADMINISTRATION

SEC. 105. The Secretary shall administer the lands, waters, and interests therein acquired for the refuge in accordance with the National Wildlife Refuge System Administration Act of 1966 (16 U.S.C. 668dd and 668ee). The Secretary may utilize, to the extent he deems appropriate to carry out the purposes of this title, such additional statutory authority as may be available to him for (1) the development of outdoor recreation opportunities compatible with the wildlife resources of the refuge, and (2) interpretive education.

AUTHORIZATION OF APPROPRIATIONS

SEC. 106. Beginning October 1, 1982, there are authorized to be appropriated $270,000 for the acquisition of lands, waters, or interests therein, for the refuge.

TITLE II—FALLS OF THE OHIO NATIONAL WILDLIFE CONSERVATION AREA

CONGRESSIONAL FINDINGS

SEC. 201. The Congress finds that—

(1) the area along the Ohio River near the city of Louisville, Kentucky, contains highly significant and varied wildlife and supports important aquatic nurseries;

(2) the area includes a unique and world-renowned three-hundred-million-year-old fossilized coral reef which is the only place where the Ohio River flows over bedrock;

(3) the wetlands of this area represent one of the most valuable and unique wildlife habitat types in the United States and have extremely high value for fishermen, bird-watchers, nature photographers, paleontologists, and others; and

(4) this area should be preserved to ensure the well-being of these species, to provide wildlife-oriented recreation for the public and encourage the study of fossils.

DEFINITIONS

SEC. 202. For purposes of this title:

(1) The term "Secretary" means the Secretary of the Interior.

(2) The term "selection area" means those lands and waters near the McAlpine Dam in the Ohio River located in Jefferson County, Kentucky, and Clark and Floyd Counties, Indiana, depicted on the map entitled "Falls of the Ohio National Wildlife Conservation Selection Area", dated December, 1981, and on file at the United States Fish and Wildlife Service.

(3) The term "wildlife conservation area" means the Falls of the Ohio National Wildlife Conservation Area.

PURPOSES OF WILDLIFE CONSERVATION AREA

SEC. 203. The purposes for which the Falls of the Ohio National Wildlife Conservation area is established are—

(1) to protect wildlife populations and habitats in their natural diversity including, but not limited to, bald eagle, peregrine falcon, Canada geese, mallard, gadwall, blue-winged teal, black duck, American widgeon, and wood duck;

(2) to conserve fish populations in their natural diversity including, but not limited to, shad, shiner, crappie, largemouth bass, striped bass, and channel catfish;

(3) to ensure, to the maximum extent practicable and in a manner consistent with paragraphs (1) and (2) and compatible with navigation on the Ohio River and operation of the McAlpine locks and dam, the necessary water quality within the wildlife conservation area;

(4) to protect the fossilized coral reef as a unique paleontological feature; and

(5) to provide opportunities for scientific research and interpretive and environmental uses and fish and wildlife oriented recreational uses.

SELECTION AND ESTABLISHMENT OF WILDLIFE CONSERVATION AREA

SEC. 204. (a) SELECTION.—(1) Within one year after the date of the enactment of this title the Secretary shall, in consultation with the Secretary of the Army acting through the Chief of Engineers—

(A) designate approximately one thousand acres of land and water within the selection area as land which the Secretary considers appropriate for the wildlife conservation area; and

(B) publish in the Federal Register a detailed map depicting the boundaries of the land designated under subparagraph (A), which map shall be on file and available for public inspection at offices of the United States Fish and Wildlife Service and the Corps of Engineers.

(2) The Secretary may make such minor revisions in the boundaries designated under paragraph 1(B) as may be appropriate to carry out the purposes or, or to facilitate the acquisition of property (and interests therein) within, the wildlife conservation area.

(b) ESTABLISHMENT.—The Secretary shall, in consultation with the Secretary of the Army acting through the Chief of Engineers, establish the Falls of the Ohio National Wildlife Conservation Area, by publication of a notice to that effect in the Federal Register, within one year after the date of the enactment of this title.

ADMINISTRATION

SEC. 205. The Secretary of the Army, acting through the Chief of Engineers, shall administer all lands, waters, and interests therein within the wildlife conservation area to assure that the wildlife conservation area is managed to carry out the purposes for which it was established, and to that end shall consult with, and utilize the services of, the Secretary. In order to effectively manage the wildlife conservation area, the Secretary of the Army shall acquire by donation, purchase with donated or appropriated funds, or exchange lands, waters or interests therein within the boundaries of such area. The Secretary of the Army and the Secretary may utilize such additional statutory authority as may be available to them to carry out this title.

REGULATIONS

SEC. 206. The Secretary of the Army shall promulgate regulations, within one year after date of the enactment of this title, to carry out this title. Such regulations shall include, but not be limited to, a prohibition on all hunting, as well as prohibitions on vandalism (including the removal of fossils) and the dumping of refuse, within the boundaries of the wildlife conservation area.

AUTHORIZATION OF APPROPRIATIONS

SEC. 207. Beginning October 1, 1982, there are authorized to be appropriated to the Secretary of the Army not to exceed $300,000 to carry out this title; and such sums shall remain available until expended.

The SPEAKER. Pursuant to the rule, a second is not required on this motion.

The gentleman from North Carolina (Mr. JONES) will be recognized for 20 minutes, and the gentleman from New Jersey (Mr. FORSYTHE) will be recognized for 20 minutes.

The Chair recognizes the gentleman from North Carolina (Mr. JONES).

Mr. JONES of North Carolina. Mr. Speaker, I yield such time as he may consume to the gentleman from Louisiana (Mr. BREAUX).

Mr. BREAUX. Mr. Speaker, I would first like to commend our colleagues on this side of the aisle, the gentleman from Oregon (Mr. WEAVER) and the gentleman from Oregon (Mr. AUCOIN), who have contributed a great deal to the development of this legislation. Had it not been for their interest and their urging of our subcommittee, we probably would not be where we are this evening.

Mr. Speaker, the passage of H.R. 2241 will result in the protection of two small but important natural resources.

Title I of the bill would establish the Bandon Marsh National Wildlife Refuge on the Coquille River estuary in the State of Oregon. This marsh is one of the few remaining salt marsh ecosystems along the northern California coast and, as such, is an important way station for migrating marsh, shore and waterbirds including dowitches, curlews, godwits and the endangered brown pelican. In addition, the marsh is rich in organic matter and provides nutrients valuable to the Coquille River salmon resource and numerous other species of fish in the Coquille Estuary.

Bandon Marsh is presently owned by the Port of Bandon. They are willing to exchange the marsh for an abandoned U.S. Coast Guard Station which has been declared excess. The only acquisition costs would be to reimburse the trust for public land, a private conservation organization, for their expense in purchasing private land that underlies the Coast Guard station.

Mr. Speaker, the cost of the acquisition of this refuge, $270,000 at most, is slight, and the cost of its operation as part of a larger refuge unit, $6,000 per year, is also slight when compared to the benefits to the fish and wildlife resource and those of us who enjoy that resource.

Title II of the bill would establish the falls of the Ohio National Wildlife Conservation Area along the Ohio River near Lousiville, Ky. This area is not only rich in wildlife, but also contains a 300-million-year-old fossilized coral reef which is a major archeological resource. Some of the area is in Federal ownership already, managed by the Corps of Engineers as part of the McAlpine locks and dam system.

The legislation would require the Secretary of the Interior, utilizing the biological and archeological expertise of that Department, to fix the boundaries of the area. Management of the conservation area would rest with Corps of Engineers in consultation with the Department of the Interior and any acquisition necessary for the management would also be done by the corps.

Mr. Speaker, again the benefits are great and the costs small. The bill would authorize $300,000 for acquisition of the area. Management expenses by the Corps of Engineers would be negligible. I urge my colleagues to support this legislation.

Mr. WEAVER. Mr. Speaker, will the gentleman yield?

Mr. BREAUX. I yield to the gentleman from Oregon.

Mr. WEAVER. Mr. Speaker, I rise in strong support of the Bandon Marsh bill. This is a valuable contribution to our wildlife refuges, and I want to thank the chairman of the full committee, the chairman of the subcommittee, and the ranking minority member, for bringing the bill to the floor.

Mr. HAMILTON. Mr. Speaker, will the gentleman yield?

Mr. BREAUX. I yield to the gentleman from Indiana.

Mr. HAMILTON. Mr. Speaker, I rise in support of H.R. 2241, and I express my appreciation to the gentleman from Louisiana (Mr. BREAUX), who held the hearings in Louisville, Ky., for the Falls of the Ohio. I express my appreciation to the chairman and urge the House to approve this bill.

Mr. Speaker, I have long supported preservation of the Falls of the Ohio, and will continue to urge that action be taken to protect and enhance this rare and beautiful geological formation.

Geologists have studied this world-renowned site for over 100 years, and more new fossil coral species have been founded on specimens collected from this 300-million-year old reef than any other individual site in the world.

The area is also a haven for some of the most diverse birdlife in the Midwest, and its waters boast an abundance of fish species.

The wetlands provide a unique wildlife habitat which is so valuable to bird watchers, fishermen and scientists.

In addition, to its educational value, the scenic beauty of the area is further inducement to insure preservation of the falls.

The site also has great historical value, serving as a crossing for mastadons, then buffalos, Indians, and finally the first pioneers to travel into the Northwest Territory. Its surrounding archeological sites cover 4,000 years during which settlements were made, captured, and rebuilt.

Yet the beauty, wildlife, and scenic value of the Falls is being threatened daily by the intervention of man. The McAlpine Dam has changed the waterflow of the river and has led to excessive silt build-up around the Falls, obscuring it from view and potentially threatening the fossilized coral reef. The Falls is also threatened by vandals and souvenir hunters who destroy or chop away parts of the fossil deposits in the coral reef, and by persons who dump garbage on the adjoining riverbank. In addition, the bird population has declined dramatically due to poaching and excessive silt accumulation in the wetlands.

Because of the many unique virtues possessed by the Falls, it would be a great tragedy and national shame to allow further deterioration of the site. Future generations will be shocked at our negligence and irresponsibility if we do not act to preserve the area.

The question as to who should manage and protect this national treasure has been debated for many years, and various proposals have been advanced at the local, State, and Federal levels. I have consistently supported any appropriate measure to provide protection for the area. Yet despite all the efforts of many individuals at many levels, the Falls still remains unprotected. This leaves me with a great feeling of impatience and frustration as I view the long struggle to preserve the Falls.

Local groups concerned about the Falls began organizing in the early 1960's, and as a result the Falls of the Ohio was designated a national natural landmark in 1966. Although this was a positive first step, Federal funds were not available to insure proper management and care of the Falls, and the area continued to deteriorate. At the suggestion of the National Park Service, Indiana and Kentucky formed a bistate commission in 1970 to resolve the issue. Unfortunately, the commission became caught in the crossfire of other disputes between the two States and was unable to accomplish its goal.

Since the States are apparently unable to protect the Falls, I believe that the intrinsic scientific, historical, scenic, and wildlife value of the area

justifies Federal responsibility for its protection and preservation. Last year I cosponsored legislation which would have designated the Falls as a national monument under the care of the Department of the Interior.

Presently I am a cosponsor of H.R. 2241 to make the Falls into a national wildlife conservation area under the protection of the Army Corps of Engineers. I am prepared to support any proposal which will properly protect the Falls and preserve it for future generations.

Mr. Speaker, H.R. 2241 directs the Secretary of the Interior to designate approximately 1,000 acres of land and water including and surrounding the falls as appropriate for the Falls of the Ohio National Wildlife Conservation Area. Actual management of the area, however, will be the responsibility of the Secretary of the Army, acting through the Army Corps of Engineers. It is expected that the corps will consult frequently with the Department of the Interior's Fish and Wildlife Service and Park Service to gain from their experience and knowledge in managing Federal lands.

The Secretary of the Army is charged with the responsibility of acquiring the land designated by the Secretary of the Interior, and may do so through donation, purchase, or exchange. It is not my intention in supporting this bill to disturb existing enterprises that may be located within the selection area, or potential development adjacent to the conservation area. The corps is further responsible for developing implementing regulations to prohibit vandalism, dumping of refuse, and hunting within the conservation area.

I cannot stress enough the importance of taking swift action to preserve the Falls of the Ohio. We simply cannot allow the current deterioration of the falls to continue. Mr. Speaker, I urge my colleagues to join with me in the effort to save this rare and beautiful area.

Mr. JONES of North Carolina. Mr. Speaker, I reserve the balance of my time.

Mr. FORSYTHE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I, too, want to express my strong support for the enactment of H.R. 2241. I would also like to commend my distinguished colleagues from Louisiana and Kentucky for working together to come to an agreement on this comprehensive legislation which will provide additional protection for our Nation's wildlife resources. The Bandon Marsh in Oregon and the falls of the Ohio near Louisville, Ky., are unique areas, but with differing needs in terms of providing protection for their resources.

The 289-acre salt marsh on the coast of southern Oregon is important because it contains two habitat types which are essential to the survival of a large variety of fish and wildlife. Some 68 species of birds and 45 species of fish depend on the resources of Bandon Marsh at some time in their life cycle. In addition, great numbers of migrating shorebirds spend time feeding or resting in this very important staging area before moving on in the spring or fall. Unfortunately, however, Bandon Marsh is threatened by commercial development. About 20 percent of the marsh has already been filled for the construction of a lumber mill complex, and the company has expressed interest in filling the remainder of their property. This is particularly troublesome when other Oregon estuaries have sustained losses of up to 50 to 90 percent of their original marshes and tidal flats due to dredging or filling for commercial or industrial purposes. The present owners of the proposed refuge property, the Port of Bandon, would like to exchange their property for the abandoned Coast Guard station in the city of Bandon. Part of this property is now in private ownership and the rest has been declared excess property and is ready for disposal.

A private nonprofit corporation, dedicated to preserving lands for public use, has offered to purchase the private property and exchange it with the Port of Bandon for their interest in Bandon Marsh. Upon enactment of this legislation, the Department of the Interior could then acquire the land from the private group for establishment as a national wildlife refuge—an appropriate designation for this very important habitat. The Fish and Wildlife Service has ranked Bandon Marsh seventh in over 40 habitat sites identified in their inventory of important fish and wildlife habitats in Oregon.

Another area noted for its diversity of birdlife is the falls of the Ohio near Louisville, Ky. The Falls, as my distinguished colleague and ranking minority member of the committee will soon describe, is a unique area in our country deserving special attention. Besides the abundance and diversity of fish and avian species, the area contains geological and historical resources which truly merit protection in the interest of future generations of Americans. Acquisition of lands for the establishment of a national wildlife refuge would not only be unnecessary and costly to the Federal Government in these times of fiscal restraints, but it could also interfere with the operations of the existing locks and dam constructed for the purpose of commercial and recreational navigation on the Ohio River. Therefore, I think it is appropriate that we recognize the uniqueness of the resources of the Falls of the Ohio by supporting this bill which would provide for their protection while allowing for the continuation and expansion of water development operations on the Ohio River by the Corps of Engineers.

Mr. Speaker, for these reasons I want to urge my colleagues to join me in supporting the enactment of H.R. 2241.

Mr. SNYDER. Mr. Speaker, will the gentleman yield?

Mr. FORSYTHE. I yield to the gentleman from Kentucky.

Mr. SNYDER. Mr. Speaker, I rise in support of H.R. 2241 which would establish the Bandon Marsh Refuge and the Falls of the Ohio National Wildlife Conservation Area. The distinguished gentlemen from Louisiana and New Jersey have ably discussed the background and need to establish the Bandon Marsh Refuge which I support. For the benefit of my colleagues, I would like to further discuss title II of the bill which establishes the Falls of the Ohio National Wildlife Conservation Area.

As some of my colleagues know, I introduced H.R. 632, a bill designed to protect the falls by giving it refuge status. However, as a result of the Fisheries and Wildlife Conservation and the Environment Subcommittee hearing in Louisville, Ky., last August on this bill, the evidence indicates that the protection and preservation of the area can be accomplished without making the falls a refuge to be managed by the Interior Department.

The bill before us achieves this by directing the Secretary of the Interior to designate a wildlife conservation area of approximately 1,000 acres but requires the Corps of Engineers to acquire the necessary interests in land and manage them for preservation and protection purposes. This makes abundant sense from a sound fiscal as well as management standpoint. The corps already manages the locks and dam and exerts considerable control over the area and replacing Interior with the corps as manager will minimize any interagency conflict.

The corps would be required to promulgate regulations within 1 year after the date of enactment to carry out the act. These regulations would cover prohibited activities such as vandalism, souvenir hunting, dumping and the like which have contributed to the degradation of the area.

The bill would require the Secretary of the Army to consult with the Secretary of the Interior to insure that the conservation area is managed in accordance with the purposes of the title. The expertise of the Department of the Interior should help to enhance the corps' interpretation of both the fossil and wildlife features of the area. Finally, the bill would authorize $300,000 in fiscal year 1983 to carry out the purposes of the act.

Mr. Speaker, I believe the record which we established in Louisville

clearly indicates that the Falls of the Ohio deserves preservation and protection.

The Falls of the Ohio is a unique and world-renowned 300-million-year-old fossilized coral reef which is the only place where the Ohio River flows over bedrock. Here one can walk on what was a sea floor over 300 million years ago.

This wetland area has also become nationally known among avian scientists as one of the most exciting places in this section of the country to see migrating waterbird, waterfowl, and shorebirds. It also attracts fishermen and other outdoor enthusiasts. Perhaps nowhere else in the world is there an area which offers such wildlife and prehistorical distinctions within such close proximity to a major metropolitan area.

The coral reef of the falls is one of the finest horizontal exposures in the world of Devonian fossil corals. Nearly 900 nominal species of fossil corals have been found on specimens collected from approximately 150 feet of coral beds in the falls area. Corals from the Falls of the Ohio can be seen in almost every natural history museum in the world.

Approximately 245 species of birds have been recorded at the falls, including the Arctic peregrine falcon and the symbol of our freedom, the endangered bald eagle. The migratory birds that pause and nest on the islands at the falls are an unmatched display of birdlife so far inland. Many of the birds that stop there breed in Canada and Alaska, including Arctic regions, and spend their winters on the gulf coast and in Central and South America.

Among the first naturalists in the area, John James Audubon, the artist, and Alexander Wilson, the "Father" of American ornithology, noted the unusual bird population in the vicinity of the falls in the early 1800's. Audubon made over 200 sketches of birds there.

However, in recent years, a chief concern has been the dramatic decline in the population of these birds. Within recent years, poachers have killed birds and driven off others. Egrets, for example, were familiar sights at the falls in the 1940's and 1950's but are no longer visitors there. A large black-crowned night heron rookery once occurred on one of the islands, but is no longer present. At times 100 or more of these birds could be seen roosting or feeding at the falls.

Unfortunately, the area is subjected to vandalism, fossil removal, and degradation because it has not been under any sort of sound resource management. If this bill is adopted and enacted, I believe we are well on our way to putting a stop to the deterioration of the area.

There is no question that a Federal presence is necessary. For over 20 years efforts by local residents to establish a bistate park failed. On the Federal level, the area has been studied to death but the only action taken was when it was designated a natural landmark.

It is my belief that establishing the Falls of the Ohio as a national wildlife conservation area will preserve one of the most unique and interesting wildlife areas in our country and that it will not only continue to attract the fishermen, nature lovers, and scientists who now visit there, but it will insure that future generations also have an opportunity to appreciate and learn about nature.

Finally, I would like to express my appreciation to the distinguished chairman of the subcommittee, Mr. BREAUX, for the interest he has taken in preserving the falls and his continuing support to achieve that goal. It is further in order to thank my distinguished colleagues, Chairman JONES, and Mr. FORSYTHE, the ranking minority member of the subcommittee, for their assistance in moving this important legislation.

I urge my colleagues to support this bill.

● Mr. SWIFT. Mr. Speaker, I would like to take this opportunity to thank Mr. BREAUX, the chairman of the Subcommittee on Fisheries and Wildlife Conservation and the Environment for his prompt action on the bill, as well as my colleagues on the Merchant Marine and Fisheries Committee for their recognition of the importance of this area as a national wildlife refuge. I would single out my colleague, Congressman BONKER for his leadership on this effort on behalf of the Washington State delegation and all those in Washington State who are supporting this legislation.

In 1792, on a beautiful May morning Capt. George Vancouver set out destined for a small island in the Strait of Juan de Fuca. He recorded in his journal, "we found the sea almost covered with aquatic birds." As Vancouver ventured onto the island and scaled the plateau he continued in his journal, "a landscape almost as enchantingly beautiful as the most elegantly finished pleasure grounds in Europe." He later named the island Protection Island because of the haven it provided from the harsh winds.

Today, aquatic birds still continue to nest there; 21,000 pairs of seabirds nest on this haven representing six major bird species and 72 percent of all seabirds breeding in the strait and the Puget Sound. In addition, Protection Island provides a habitat for harbor seals for loafing and pupping. Without a doubt, Protection Island should be part of our National Wildlife Refuge System.

In addition, it is a prime candidate because often the most difficult problem in any Federal acquisition has been worked out. Provisions for property owners who would like to maintain their present level of usage and for those who would like to sell have been arranged in this bill.

I would urge my colleagues to support this bill and include Protection Island in our National Wildlife Refuge System.●

● Mr. AUCOIN. Mr. Speaker, I urge my colleagues to support H.R. 2241, which directs the Department of Interior to establish the Bandon Marsh Wildlife Refuge in the estuary of the Coquille River in Oregon. It facilitates, with the assistance of the Trust for Public Land, an exchange of surplus Federal property for a marsh owned by the Port of Bandon, Oreg.

This legislation authorizes Interior to acquire land and water within the marsh and authorizes $270,000 beginning in fiscal year 1983.

It is important that H.R. 2241 passes now. The Trust for Public Land holds an option to purchase the land on which a portion of the Federal property is situated. The option expires on the 31st of this month and in order to secure a renewal of that option, TPL needs the assurance that the Department of Interior will establish the wildlife refuge. H.R. 2241 gives that assurance.●

The SPEAKER. The question is on the motion offered by the gentleman from North Carolina (Mr. JONES) that the House suspend the rules and pass the bill, H.R. 2241, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The title of the bill was amended so as to read: "A bill to provide for the establishment of the Bandon Marsh National Wildlife Refuge, Coos County, State of Oregon, and for other purposes.".

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. JONES of North Carolina. Mr. Speaker, I ask unanimous consent that all Members who wish to do so may have 5 legislative days in which to revise and extend their remarks on the bill, H.R. 2241, as amended.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

BLACK LUNG BENEFITS REVENUE ACT OF 1981

The SPEAKER. The pending business is the question of suspending the rules and passing the bill, H.R. 5159.

The Clerk read the title of the bill.

The SPEAKER. The question is on the motion offered by the gentleman from Illinois (Mr. ROSTENKOWSKI) that the House suspend the rules and pass the bill, H.R. 5159.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended, and the bill was passed.

A motion to reconsider was laid on the table.

REAFFIRMING SUPPORT OF THE CONGRESS FOR THE PEOPLE OF POLAND

Mr. ZABLOCKI. Mr. Speaker, I send to the desk a concurrent resolution (H. Con. Res. 240) reaffirming the support of the Congress of the United States for the people of Poland, and I ask unanimous consent for its immediate consideration in the House.

The SPEAKER. The Clerk will report the concurrent resolution.

The Clerk read the concurrent resolution, as follows:

H.CON. RES. 240

Whereas the people of Poland, through the dramatic establishment of the labor union, Solidarity, have demonstrated the traditional Polish love of freedom;

Whereas the decision of the Polish Communist government to establish martial law could not have been made without the encouragement of the Soviet Union;

Whereas the Soviet Union because of its proximity of Poland, its troops stationed in Poland, and its historic disregard for civil and human rights, must be held ultimately responsible for actions of the Polish Communist government;

Whereas the Roman Catholic Church in Poland has played a constructive and vital role in establishing the framework in which gains in civil and human rights have been made in the past two years; and

Whereas the people of the United States support the Polish people in their attempt to secure basic human and civil rights: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That the Congress supports the Solidarity movement in its attempt to regain human and civil rights in Poland, deplores the action of the Polish Communist government in establishing martial law, and places the ultimate responsibility for this setback for human and civil rights on the Soviet Union; and be it further

Resolved, That the Congress reaffirms its support of the Polish people and its deep concern over any Soviet Union interference in the affairs of Poland.

□ 1810

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

The SPEAKER. The gentleman from Wisconsin (Mr. ZABLOCKI) will be recognized for 1 hour.

Mr. ZABLOCKI. Mr. Speaker, I yield myself such time as I may consume.

GENERAL LEAVE

Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the concurrent resolution presently being considered.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. ZABLOCKI. Mr. Speaker, I rise in support of House Concurrent Resolution 240, with regard to the current situation in Poland.

The resolution cites critical issues which the Congress must seriously confront—the imposition of martial law in Poland, and heavy-handed Soviet policy in dealing with the situation in that country. It also correctly points out the deep, abiding desire among Polish people for freedom, and the constructive role played by the Catholic Church in advancing economic and political freedom in Poland.

Finally, House Concurrent Resolution 240 recognizes and reaffirms the consistent U.S. policy of support for the Polish people in their attempt to secure basic human and civil rights.

Mr. Speaker, at this critical juncture, it is important that we support Poland's struggle for the right to solve its problems by its own means. It is also desirable to assert the means to preserve the hard-fought gains won so far. Accordingly, a strong congressional statement of support for this struggle and disapproval for arbitrary and imposed practices like the imposition of martial law is proper.

Mr. Speaker, I urge the adoption of House Concurrent Resolution 240.

Mr. Speaker, I yield such time as he may consume to the gentleman from Michigan (Mr. BROOMFIELD).

Mr. BROOMFIELD. Mr. Speaker, yesterday, I expressed my deep concern on the House floor regarding the dramatic situation in Poland. As we again discuss Poland today, I wish to reemphasize some fundamental principles which I believe should guide all of the concerned parties on this issue.

First, there must be no physical intervention by the Soviet Union. As I mentioned previously, the Polish Government could not have initiated this crackdown on Solidarity without Soviet prior approval. But actual direct Soviet intervention would raise the confrontation to a new level. It would make a mockery of the Helsinki Final Acts and demonstrate a callous disregard for the need for alternative governmental and economic models within the Warsaw Pact. Such Soviet intervention should be met in the West by swift economic and diplomatic reprisals.

Second, the gains won by Solidarity over the last year should not be rolled back by the Polish Government. A government which purports to represent the common worker cannot maintain legitimacy if it proceeds to overturn solemn commitments previously made to millions of Polish workers. Demands on both sides should be subject to debate and negotiation. Restraint must be manifest on the part of the Polish Government. Failure to do so merely exposes the Polish Government's policy of slavery, and in the long run, benefits neither the Polish people nor the Government.

And finally, the Polish and Soviet Governments must respect human rights. They are obligated to follow this course as a consequence of the Helsinki accords. Should they deviate from this commitment, then they must expect appropriate responses from the West, as well as from independent internal sources in Poland.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. BROOMFIELD. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Speaker, I want to compliment the chairman of the committee and the ranking member for bringing this resolution to the floor. I think it is important this body recognize the fact that the strings in Poland are pulled by the Soviet Union and it is so stated in this resolution.

I compliment the committee for bringing forth such a strong resolution and urge my colleagues to support it.

Mr. BROOMFIELD. Mr. Speaker, I yield 5 minutes to the gentleman from Illinois (Mr. DERWINSKI).

The SPEAKER. Without objection, the gentleman from Illinois (Mr. DERWINSKI) is recognized.

There was no objection.

Mr. DERWINSKI. Mr. Speaker, Christmas is almost upon us and the Soviets are at it again. The Soviet invasion of Afghanistan nearly 2 years ago should vividly remind all of Soviet actions in the past and the threat that now faces Poland.

The world's most admired union movement, Solidarity, is clearly threatened by the bully boys of the U.S.S.R. Not only is this situation a danger to the Polish people but all Americans, union leaders and workers around the world should be alarmed.

Solidarity is not an external leadership power play but a workers' grassroots movement to bring humane working and living conditions to the people of Poland. The people of Poland have waited too long, have stood in too many bread lines, too many meat lines, too many loss-of-dignity lines, until finally they have found themselves united as a people sharing the daily drudgery of life in Poland.

Totally frustrated with the Communist system, their self-respect gone, there is no room left for retreat, there is no more room for further degrada-

tion, there is only the anger and madness of human suffering, saying that life cannot continue to go on this way.

The Polish laborer can no longer sit by idly, quietly hoping that the false promises of the Communist government will come true. Working 10 to 12 hours a day, 6 to sometimes 7 days a week, where both parents work, families still cannot be adequately fed. Parents cannot promise their children a better life, greater dignity or even a greater sense of self-respect. The only respect left has come from Solidarity, a united movement that directly challenges the basis of the Polish Communist structure.

Solidarity is a proletarian movement openly exposing the hypocrisy of communism, under which the only role of the working class is to suffer in united misery. The movement is exposing the open nepotism of upper Communist society, where the elite class of government takes from the poor working class and keeps a dictatorship in command.

The events in Poland will not go away quickly. At this point we do not really know if the Polish Army is playing the role of a legitimate arbiter or is acting at Soviet direction. It is necessary for us to appreciate the reality of events in Poland and the seriousness of the situation there. Let us hope and pray that as we share in the celebration of the birth of Christ, that we remember the people of Poland and the true meaning of Christmas.

Mr. BROOMFIELD. Mr. Speaker, I yield such time as he may consume to the minority leader, the gentleman from Illinois (Mr. MICHEL).

The SPEAKER. Without objection, the gentleman from Illinois (Mr. MICHEL) is recognized.

There was no objection.

Mr. MICHEL. Mr. Speaker, the situation in Poland is so sensitive that we hestitate to speak out for fear of disturbing matters. Yet at the same time we feel it is incumbent upon the Congress to publicly state some vital principles.

The first and most obvious public statement the Congress must make is to reaffirm our support for the Polish People's recent gains in basic human and civil rights.

This statement is not just a ritual or a symbolic gesture. This is a very important policy statement of principle.

Very often we tend to think that certain matters are so well understood that they need no repeating. But in this case we cannot take the risk of being misunderstood.

By this resolution, we are letting the world know that the people of the United States, through their elected Representives in the House, support the people of Poland.

The next principle that must be publicly stated is our conviction that the Soviet Union will be held ultimately accountable for any violation of human or civil rights in Poland.

We refuse to hide behind the polite niceties of diplomatic make-believe that suggests there is a distinction between the actions of the Communist regime in Poland and the wishes of the Soviet Goverment.

The Soviet Union has the ultimate military power in the Polish situation and they must bear the moral and political responsibility for any and all setbacks for human and civil rights in Poland.

For the present we need not go beyond this clear statement of those principles.

We await the unfolding of events but the Soviet Government must know we do not await in some sort of moral or political vacuum.

We will not engage in empty gestures or imprudent and inflammatory words. We carefully measure what we say today because of the *sensitivity of the situation.*

But the Soviet Union should know that everything that happens in Poland in the next few days and weeks will be judged by its effect on the human and civil rights of the Polish people.

We can do no less for the people of Poland. They have always loved freedom. And in the past year and a half *they have reminded the world once more how precious and glorious freedom is.*

Mr. ZABLOCKI. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Wisconsin.

Mr. ZABLOCKI. I thank the gentleman for yielding.

Mr. Speaker, I just want to take this time to commend the gentleman and congratulate the gentleman from Illinois for his efforts in drafting the resolution and obtaining the support through his leadership on his side of the aisle.

Mr. MICHEL. I thank the chairman.

Mr. BROOMFIELD. Mr. Speaker, I, too, want to congratulate the minority leader for his work in drafting this resolution.

I yield 1 minute to the gentleman from New York (Mr. GILMAN).

The SPEAKER. Without objection, the gentleman from New York (Mr. GILMAN) is recognized.

There was no objection.

Mr. GILMAN. Mr. Speaker, I rise in support of House Concurrent Resolution 240, reaffirming the support of the Congress for the people of Poland and I join my colleagues and freedom-loving people everywhere in expressing my dismay at the currently declared state of martial law in Poland. It is extremely important that at this critical time we express our support for the courageous Polish workers who have risked everything in order to better the living and working conditions of the Polish people.

We have watched the patient and peaceful struggles of the Polish workers over the last year with great admiration. We have seen them establish an independent trade union, Solidarity and from there take step after step toward establishing greater freedoms for the Polish people, until most recently they called for a nationwide referendum on establishing a non-Communist government. Time after time, when confronted with a roadblock to the progress they were making in achieving these liberties, the Polish workers persevered.

Their determination and bravery continues to grow; their love for their country strengthens their convictions. They have inspired all freedom-loving people in the manner in which they have exhibited the power of faithful and determined human spirits. In this time of their terrible winter cold, we are especially concerned about the threat to human life, not only from outside military force, but also from the lack of food and other critical supplies in Poland.

By this resolution, which I urge my colleagues to support, we express our hope and belief that the Polish workers can peacefully negotiate with the government to resolve this present crisis from within and without any interference by the Soviet Union.

Mr. BROOMFIELD. Mr. Speaker, I yield back the balance of my time.

Mr. ZABLOCKI. Mr. Speaker, I yield 2 minutes to the gentlewoman from Ohio (Ms. OAKAR).

Ms. OAKAR. Mr. Speaker, I want to echo the sentiments here on the floor today in commending the chairman and others responsible for this resolution. I think to put it very simply, the world really looks to the Polish people for their courage. They have been absolutely courageous in their quest for freedom and they are role models for other people throughout the world who do not have this freedom, particularly those captive nations that have been under the domination of the Soviet Union for so long. That is why I think those of us who are free have a special responsibility to support this resolution and let our brothers and sisters in Poland and other areas of the world that are so dominated, let them know that we join with them in their quest for freedom and admire their courage and certainly support their efforts.

● Mr. MOFFETT. Mr. Speaker, I strongly support the resolution offered by the distinguished chairman of the House Foreign Affairs Committee (Mr. ZABLOCKI) reaffirming our support for the courageous Polish people. It is important at this point that we make clear our solidarity with

the people of Poland, and our commitment to their struggle for freedom.

The recent declaration of martial law, and the arrests and suspensions of civil rights which accompanied it, were without doubt orchestrated by the Soviet Union. We must do everything in our power to see that the current suspension of freedoms is quickly ended, and the Soviet Union must be made to know that we will not tolerate blatant interference in the internal affairs of Poland. The indigenous movement toward freedom and economic equality in that country must be allowed to continue. I urge the adoption of the resolution.●

● Mr. SMITH of Pennsylvania. Mr. Speaker, in light of the increasing uncertainty and political instability in Poland, our country must take appropriate measures to insure the safety of those Polish citizens now living in this country. The proceedings initiated by the Attorney General, while in other circumstances may have been reasonable, are not acceptable in light of the volatile situation in Poland. The people of our Nation continue to be appalled at the total disregard for human dignity and basic human rights which the Polish Government has expressed through its actions in this matter. The arrests of innocent citizens, as well as the threats against the lives and safety of many others, make it absolutely necessary that our country take affirmative acton. If we are to maintain our position as the champion of freedom and dignity for all people, we cannot sit idly by, or further complicate the situation by jeopardizing the well-being of the Polish people in this country who now look at the prospect of being deported.

Our support of this resolution can be viewed in no other light than a resounding expression of faith in those principles to which our Nation has adhered since its inception. This is not a piece of legislation which merely expresses the rhetoric of freedom, but takes concrete steps to translate those words into deeds of good will. Were our Government to force these people to return to Poland in a situation where their very lives would be in jeopardy, our words would be but hollow echoes.

I commend the sponsors of this resolution for their sound expression of principle, and urge my colleagues to join with them in showing the commitment of this body to the ideals of freedom and human dignity.●

□ 1820

Mr. ZABLOCKI. Mr. Speaker, I move the previous question on the concurrent resolution.

The previous question was ordered.

The SPEAKER. The question is on the concurrent resolution.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

THE HOUSE OF REPRESENTATIVES OUGHT TO BE MORE HONEST WITH THE PEOPLE

(Mrs. FENWICK asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. FENWICK. Mr. Speaker, I am very sorry to do this. I do not like to rise to speak, as I feel I must. But I do not think this House ought to let this go by——

The SPEAKER. Does the gentlewoman want to take the well?

Mrs. FENWICK. I will do whatever the Speaker suggests.

The SPEAKER. I think the gentlewoman should take the well. Apparently the gentlewoman has something on her mind.

Mrs. FENWICK. Yes, Mr. Speaker, I have, and I am not enjoying it at all.

What is on my mind is that this afternoon we have done something that is disappointing to the House and I think will be deeply disappointing to the people of this country. We have again, without a vote, accepted an increase in our benefits or in our possible benefits, without a vote, without a committee hearing, without anything—just passing, as though it were with a wand, a measure by which we have doubled the amount that can be accepted in honorariums by Members of this House.

We should not do it this way. We ought to be more honest with the people. This is sneaky. This is not as dignified and as honorable as this House deserves. This is beneath the dignity of the House. It is the pickpocket's way. We have done it in the sly, easy way so that nobody would notice. We cannot do this in this country. The public is already alarmed by such ways. If we need something, we should be ready to vote it.

REPRESENTATIVE CALDWELL M. BUTLER SHARES ALARM OF ACTION OF HOUSE

(Mr. BUTLER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BUTLER. Mr. Speaker, I just want to say for the record that I share the alarm of the gentlewoman from New Jersey, and I was disappointed that I was not on the floor when this issue was raised. I do think it reflects upon the House when we choose to accomplish these things in this manner. I would like to identify myself with the remarks of the gentlewoman from New Jersey.

ACTION OF HOUSE OF REPRESENTATIVES IS LOOKED UPON WITH DISRESPECT BY THE PEOPLE

(Mr. SAM B. HALL, JR., asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SAM B. HALL, JR., Mr. Speaker, I would like to join with what has been said by the distinguished gentlewoman from New Jersey (Mrs. FENWICK) and the gentleman from Virginia (Mr. BUTLER). I think what was done was an underhanded way, really. I think it just causes this House to be looked upon with disrespect by the people of this country. I think we are the cause of this. It should not have been done this way. I think a lot of the criticism that we have brought upon us is justifiable criticism. I hope we can do something about this, and I am sorry that we did it in the way that we did. I certainly would have been against it.

A MARK OF DISRESPECT FOR THE HOUSE

(Mr. WALKER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WALKER. Mr. Speaker, I appreciate the opportunity to also indicate my opinion that the gentlewoman from New Jersey was absolutely right.

A little while ago I offered a motion to vacate the proceedings under which we considered that particular bill, because I think, at the very least, the House ought to be given the opportunity to vote on a matter of that kind of consequences which is going to have that kind of a public problem, I think, for the Members of Congress. What we have done is, we have increased our outside earnings from 15 to 30 percent. It seems to me that that is an issue that we addressed earlier this year. This House, by a 2-to-1 margin, decided that that is not what we wanted to do. To do it in an underhanded manner as was done on the House floor today I do not think does this House any good and it is a mark of disrespect for the House.

BOTH HOUSES OF CONGRESS SHOULD BE EQUAL

(Mr. ROUSSELOT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROUSSELOT. Mr. Speaker, I could not disagree with my colleague more. The other body has a limitation of $25,000. I understood, according to the Constitution, we were an equal body. I would have voted for it, had I had the chance. I do agree with my colleague that maybe this was a little

quick. We have been sitting here all day, casting all kinds of votes, as the gentleman knows, and I am proud that we took the effort to make ourselves equal to the other body.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair will make the following statement: Whenever a Member is making a unanimous-consent request on the floor of this House, before the motion is made, the Chair always asks that Member, "Has it been cleared through the leadership on both sides? Has it been cleared with the committee and the minority and the majority on both sides?"

When he has an affirmative answer, then he recognizes the Member. In this instance, that is exactly what he did. Now, any Member who was on the floor—it was unanimous consent—would have had an opportunity to object.

ANNUAL REPORT ON PIPELINE SAFETY FOR CALENDAR YEAR 1980—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Energy and Commerce and the Committee on Public Works and Transportation.

To the Congress of the United States:

In accordance with the requirements of Section 16 of the Natural Gas Pipeline Safety Act of 1968, as amended, and Section 213 of the Hazardous Liquid Pipeline Safety Act of 1979, I hereby transmit the Annual Report on Pipeline Safety for calendar year 1980. The period covered by this report precedes my term of office.

RONALD REAGAN.

THE WHITE HOUSE, *December 15, 1981.*

FIFTEENTH ANNUAL REPORT RELATING AUTOMOTIVE PRODUCTS TRADE ACT TO DEVELOPMENTS DURING 1980—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore. (Mr. BOLAND) laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Ways and Means:

To the Congress of the United States:

In accordance with the Automotive Products Trade Act of 1965 (Public Law 89-283), I transmit herewith the fifteenth annual report relating to developments during 1980. The period covered by the report precedes my term of office.

RONALD REAGAN.

THE WHITE HOUSE, *December 15, 1981.*

1980 AERONAUTICS AND SPACE REPORT—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Science and Technology:

To the Congress of the United States:

In accordance with the requirements of Section 206 of the National Aeronautics and Space Act of 1958, as amended (42 U.S.C. 2476), I hereby transmit the 1980 Aeronautics and Space Report. The period covered by this report precedes my term of office.

RONALD REAGAN.

THE WHITE HOUSE, *December 15, 1981.*

ELEVENTH ANNUAL REPORT ON HAZARDOUS MATERIALS TRANSPORTATION FOR CALENDAR YEAR 1980—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Energy and Commerce, the Committee on Merchant Marine and Fisheries, and the Committee on Public Works and Transportation:

To the Congress of the United States:

In accordance with the requirements of Section 109(e) of the Hazardous Materials Transportation Act (P.L. 93-633), I hereby transmit the Eleventh Annual Report on Hazardous Materials Transportation for calendar year 1980. The period covered by this report precedes my term of office.

RONALD REAGAN.

THE WHITE HOUSE, *December 15, 1981.*

FARM BILL CONFERENCE REPORT

(Mr. AKAKA asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. AKAKA. Mr. Speaker, before we adjourn for the Christmas recess, the conference report on the 1981 farm bill will come to the House floor for approval. I urge all of you to consider this legislation very carefully before you vote on final passage. I urge you to think of the need for providing a 4-year extension of our major farm programs and a 4-year extension of the food stamp authorization.

Mr. Speaker, I have spoken to many farm groups and many of my colleagues about the farm bill. I realize that this legislation is not warmly embraced by all of the commodities whose programs are contained in the bill. If it were possible to go back into conference and adopt the type of programs that would make every commodity happy, I would be the first to recommend such a course of action; unfortunately, this is no longer a possibility. The Senate has already passed the conference report and as a result the House-Senate conference has been dissolved. There is no conference which the farm bill can be sent back to, and even if there were, it is uncertain whether the outcome could be changed. I followed the month-long deliberations of the conference very closely and can say that the commodity support levels now in the bill are at the limit of what Congress and the farm groups will accept and the administration will tolerate.

As we all know, compromise is the essence of the legislative process. The farm bill conference report was forged in this spirit, and although it was subjected to many stresses in the process, the bill emerged intact. There are many diverse interests in the farm and labor community that support the bill, both in my State and across the Nation. Groups like the American Textile Manufacturers Institute, the Washington Association of Wheat Growers, the American Federation of Grain Millers, the ILWU, the Western Dairymen's Association, to name a few, support the farm bill. I have a full list, and I ask that it be printed in the RECORD.

I ask all my colleagues to join me in supporting the farm bill.

The list follows:

Calcot Lt'd., Bakersfield, Calif.

Newhall Land & Farming Co., Valencia, Calif.

Distillery, Wine and Allied Workers International Union—United Sugar Workers Council of California, AFL/CIO.

Kent Shimamoto, Bearing Supply Co., San Francisco, Calif.

Glenn Stirim, Jr., Ferry Steel, San Francisco, Calif.

Her Boegtly, Voegtly & White, San Leandro, Calif.

Frank Pignati, Weeks-Howe & Emerson, San Francisco, Calif.

Clarence Blixt, Hogan Mfg., Escalon.

John G. Ziegler, Ziegler & Associates, Walnut Creek.

Joe Sheid, Scheid Industrial Supply, San Francisco, Calif.

Allen Brown, Pacific Pipe Co., San Francisco, Calif.

John Moller, Viking Distributing Co., Oakland.

George Lundquist, Bay City Iron Works, Oakland.
Spreckels Sugar Division, Amstar Corp., San Francisco.
John Robinson, Beacon Oil Co., Inc., Hanford, Calif.
Stan W. Brand, Stan Brand Inc., Tustin, Calif.
Milton L. Wright, Aromco Industries, Inc., Oakland, Calif.
Floyd Dirlam, Smith Tank Lines, Inc., Fresno, Calif.
Union Sugar Co., San Francisco, Calif.
Erick Pedley, Jr., Pedley-Knowles & Co., San Francisco, Calif.
Sig Cabral, Leighton-Stone Corp., San Francisco, Calif.
Winston Honeychurchm Pacific Electrical Instrument Laboratory, San Francisco.
Andre Bouden, Jensen Instrument Co., South San Francisco.
David Golner, Belilove Co., Oakland.
Vince Kostovny, Redwood Controls, Pleasant Hill.
Thomas G. Kilfoil, Thomas G. Kilfoil Co., San Bruno, Calif.
Thomas Masinter, Vincent Electric Motor Co., Oakland.

The Hawaii World Trade Association.
The Peanut Growers Cooperative Marketing Association.
Virginia Peanut Growers Association.
United Egg Producers.
Western Cotton Growers Association.
Western Dairymen's Association.
Wholesale Florists and Florist Suppliers Association.

□1830

THE REASONS FOR A GOLD STANDARD

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. PAUL) is recognized for 60 minutes.

GENERAL LEAVE

Mr. PAUL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and to include extraneous matter on the subject of my special order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. PAUL. Mr. Speaker, a little over a year ago, the Congress passed legislation establishing the Gold Commission. There have been several meetings with the Gold Commission and a report is due on March 31 of next year.

Being a member of that committee, I have had frequent interviews with the media and quite a few questions have come up regarding the gold standard. They have followed a certain pattern and I believe they reveal certain misconceptions about the gold standard and it is important that we try to explain some of the questions that many individuals have.

The first question that comes up frequently is why we should even bother about a gold standard? Why should we have a gold standard? And the best answer for that is, do we want to persist with the type of standard that we have today? We have a paper standard and the paper standard of today has a disastrous record.

Considering the past 10 years, in particular, since the gold window was closed in 1971, up until 1981, the record is disastrous. Inflation has been at a very high rate, interest rates are soaring, the true wage of the average worker is reduced by 15 percent, and we see nothing but chaos in the financial markets.

One of the main reasons why we should have a gold standard is that gold is an honest currency and it is not deceitful. Inflation, which is an increase of the supply of money and credit is a vehicle for stealing from the people and it is nothing more than a deceptive tax.

It is literally theft. Under a gold standard there would be no inflation because the Government, the politicians, the bankers, and any special interests could not increase the supply of money.

If they are restrained in this procedure, the supply of money being restricted, prices then would not respond by going up. So if an individual is concerned about the inflation that we have, and every poll taken in the last 5 years in this country reveals that inflation is the No. 1 problem—he must realize that the Government cannot print gold, and we realize then there is restraint put on the politicans.

There is no doubt big Government and inflation go together because this is the vehicle by which big Government is financed.

Our taxes are very high, but our debt is also very high. This is one way we can pay for the huge deficit, now over $100 billion per year.

Prior to 1971, we had a pseudo or partial gold standard and this existed from 1945 to 1971 under the Bretton Woods agreement. Even though gold was redeemable at $35 an ounce to foreign banks, the American people could not redeem it and it was not a true gold standard.

Nevertheless, under that gold standard prices were held in check and the record between 1945 and 1971 was exceptional compared to the 1971 to 1981 period.

Money, if not decided by fiat by government, must have quality to it. Paper money has no quality. Gold money has a quality to it that makes people trust it and believe in it. For this reason, it affects future anticipations of what will happen to the value of the money and, therefore, it affects the interest rates.

In this case under a true gold standard the dollar will be redeemable. That is, if you are holding paper, it must be something that you can take and turn in and get something of real value.

Now, today you turn in a dollar and you get a dollar back. Under a true gold standard, if you turned in a gold certificate you would get a certain amount of gold or silver in return.

An important point about money is understanding how money originated. Money originated as a barter commodity. It never originated and was never intended that paper printed by government would be true money.

Gold came about as money mainly because it was the most convenient and the most useful commodity to use as money, and for that reason history has decided that gold is the most efficient money.

It is no different than the fact history shows that we speak the English language. True money is gold or silver or one of the metals. When we try to make paper operate as money, we defy history and we defy economic law and we defy logic.

This is what we are trying to do. We are trying to buck the trend of history and buck economic law and say that paper is money and will be money.

The fact that paper works to a degree as money only does so because it was originally backed by gold. It originally was redeemable in gold and it is the residual trust that we placed in money at that time that allows our money today to function to the extent that it does.

One question that is frequently brought up to me is if we decided to go on a gold standard, is there enough gold? A lot of people concede that a gold standard is a good idea but they claim that today there is not enough gold for the big economy we have in the country as well as the world and, therefore, there is not enough gold. It is true that the gold supply is much lower today than it was a couple of decades ago.

There was a time when our country had 770 million ounces of gold in reserve backing the currency. Today there is only 264 ounces. But the concern that one has about the supply of gold is unnecessary because the supply of gold always adjusts. Whether you have 200 ounces or 500 ounces you can still have a gold standard because the general price level will adjust.

The important thing is that under a gold standard, if it is strictly adhered to, there will be no illicit increase of supply of money and credit as we are doing today.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. PAUL. I yield to the gentleman from California.

Mr. ROUSSELOT. I appreciate my colleague yielding.

I appreciate him also taking the time to explain to this Chamber what is being done in the Gold Commission that is now meeting, what the progress is, and also giving some of his thoughts on how we could eliminate so much of the inflationary pressure on our economy if we had some viable standard by which to abide as it related to our dollars.

Now the gentleman has just mentioned one argument that is usually raised relating to, by those who oppose a return, redemption of some kind of a gold standard—and that is that because there is not enough production of gold per year that, therefore, the supply of money would be kept very taut or very tight.

Could the gentleman respond to that again because I think that is important for our colleagues to understand, that actually it would not only reduce inflation, it would be a tremendous discouragement to high interest rates, and our country would again be on a more viable money system that people could depend on.

□ 1840

Mr. PAUL. I thank the gentleman for the question, because it is a most important question and unless we understand the answer, we will never have sound money again.

The Keynesians believe in the liberal notion that duplication of monetary units somehow or other produces economic growth. That is a false statement.

Mr. ROUSSELOT. A lot of consumption.

Mr. PAUL. That is right. You can produce a lot of money. It will be used to consume a lot of goods, but it will raise prices. It does not increase capital investment. You must have savings, you must have profits, and you

must have production in order to have true capital formation.

Money growth does not produce economic growth. If this were the case, we nearly tripled M_3 in our past decade, from 1971 to 1981. If duplicating monetary units and increase in the money supply were beneficial, then we should have had a tremendous past decade, yet we had a disastrous past decade.

Mr. ROUSSELOT. The one way we can make a judgment on this issue is just on the basis of history.

Mr. PAUL. Especially the last 10 years.

Mr. ROUSSELOT. In other words, which shows us that because we have inflated the money supply so extensively, that has caused the tremendous rate of inflation, has denied the elderly people of our country their rightful retirement benefits and all the other things that go with raving inflation.

Mr. PAUL. I think the other important aspect that happens that we generally forget about in all those who are concerned about those who are poor in society and those who may be unemployed and not doing well, they should pay heed to what has happened to the real wage in the past 10 years. The real wage for the first time in our history over a full decade has gone down. It has gone down 15 percent, so the average workingman is losing out and there has been a transfer of wealth. In an inflationary period, there is a transfer of wealth from the middle class to the wealthy, at least in the early stages. In the latter stages of runaway inflation, everybody is devastated, as well as the political system.

So today we are living in a period when the workingman is losing out and some who have capital assets are gaining wealth.

Mr. ROUSSELOT. So we can look to history to prove that when we have had something relating to a gold standard or some thing similar, the workingman has really been better off because the dollar that he earns and takes home is worth something, not only today but in the future, because he knows that it is backed by something of value.

Mr. PAUL. This is absolutely true, because today if a workingman works all day and he gets $100, and he puts it in the bank and leaves it there, in 1 year it may be worth $80 or $85. Somebody is literally stealing from that workingman, because he is in a position that he cannot beat inflation. That is, he might not be buying commodities, investing in art, or buying gold and silver and doing the things that might protect him; so it is only honesty in currency that can protect the workingman.

Mr. ROUSSELOT. Well, in these commission meetings, has the gentleman discussed if we did return to some form of a gold standard, who would decide or how would it be decided what the price of gold is?

Mr. PAUL. Yes. This is a common question asked and something we have discussed frequently.

Now, the important thing to realize here is that if you are on a true gold standard, the monetary unit becomes gold itself, or you define the dollar in the weight of gold, as it was before. Before it used to be that a dollar was defined as one thirty-fifth of an ounce of gold and in an earlier period of time it was one-twentieth of an ounce of gold; but, of course, from where we are today to where we would like to go is difficult, because you do have to develop a new ratio.

I do not like to talk about the price of gold because that leads one to believe that you are only talking about a pseudogold standard; but on a real gold standard, you have the unit defined in the weight of gold.

What that would be, nobody really knows. The marketplace should determine this.

After the Civil War, after the inflation of the greenback period, they had to go through a 3-year transition period in order to get back to par value; but they went through a painful 3-year period of deflation. They literally withdrew the unbacked greenbacks. They had deflation. There was economic pain, but they went back on the gold standard.

I do not think that is advisable now.

Mr. ROUSSELOT. How could we do that without avoiding, or by avoiding that kind of trauma?

Mr. PAUL. You would have to let the market tell us what that ratio is, whether it is 400, 500, or 1,000. You would have to set the date in the future, say in 1 or 2 or 3 years.

Mr. ROUSSELOT. What would be the advantage of doing that?

Mr. PAUL. The advantage would be that we as politicians, or the bureaucrats, or the Federal Reserve, are more likely to make a mistake. If they would take 300 and we kept running up our deficit and continued to print money, it would not last. It would just be temporary. If we did it at 1,000 it may be too high and this would cause a tremendous influx and an inrush of gold into the country; so the adjustment period could be difficult.

I would be inclined to think that it does take a period of time and we must set a date in the future and let the market adjust this and find out whether the ratio is $1,000 or $1,500.

Mr. ROUSSELOT. So you would pick a time certain in the future, say 2 years from now?

Mr. PAUL. Right.

Mr. ROUSSELOT. And say at that time, whatever the market price of gold is, it would be set at that ratio?

Mr. PAUL. Yes.

Mr. ROUSSELOT. And so then nobody could predict exactly and could not necessarily overspeculate working up to that timeframe?

Mr. PAUL. That is right. There would be speculators who would like to push the price high, but there would be gold users who would like to push the price low, so I think the market would balance this out.

I concede that there may be some problems, but the problems would be less than bureaucrats and politicians doing it, because I think they would be more inclined to make a mistake.

Mr. ROUSSELOT. Well, again, I wish to thank the gentleman for bringing this subject to the House of Representatives. It is something we should be giving consideration to and the gentleman is to be complimented not only for bringing it to our attention, but also in his work in serving on the Commission.

When may we expect a report from that Commission?

Mr. PAUL. The report from the Gold Commission is due March 31 and it is a report that is to be sent back to the Congress.

Mr. ROUSSELOT. So the Congress will have the full value of receiving that report in March?

Mr. PAUL. Yes; but I understand also the administration has made statements that they are also anticipating the results of the Gold Commission report as well.

Mr. ROUSSELOT. Well, again, I compliment my colleague for bringing this to the attention of the House.

Mr. Speaker, today's high interest rates are the scourge of the American consumer who must bear the brunt of inflation. The Nation's credit situation is in disarray and the purchasing power of our dollar is consequently being destroyed.

To bring down interest rates we can either decrease the demand for money or increase the supply of money. The Keynesian and monetarist, who are better known as "demand-side" economists, have focused mainly on attempting to reduce the demand for credit in answer to today's problem of high interest rates. The Reagan administration has launched an all out effort to cut back on Federal programs in an effort to reduce the Federal Government's demand for credit.

Monetarists likewise have no interest in the actual supply of money; but concentrate instead on the demand for credit. In fact, they argue that the Federal Reserve should not pay any attention whatever to the actual price of credit that shows itself in our prevailing interest rates.

According to a recent article that appeared in the Washington Post entitled, "To Lower Interest Rates, Go Back to Gold," written by Mr. Jude Wanniski, the Federal Reserve's game

plan is to control the money supply so that if there is less money available then people will be unable to demand wage and price increases. Consequently, for the monetarist solution to work, Mr. Wanniski points out that we are usually told by the monetarist that there must be a period of recession and unemployment in which people realize that they can't ask for more, simply because there isn't enough money in the system.

Mr. Wanniski stresses the fact, however, that "Supply-side" economists focus on increasing the supply of credit as a means of avoiding a recession in order to lower interest rates. A recession only shrinks the economy and its tax base, while setting the stage for higher interest rates for the following year.

To quote Mr. Wanniski;

The only way to break this spiral is by increasing the supply of credit, basically by making it so much more attractive to be a creditor that people will once again be happy to lend long at low interest rates.

Mr. Wanniski goes on to explain that supply-siders say that people would be encouraged to lend long once again by announcing that we are going to move toward the opening of the gold window that President Nixon closed in 1971. Furthermore, the current global liquidity crisis could end without inflation by moving to guarantee the dollar's value as a unit of account in a specified weight of gold.

If the dollar were convertible into gold, debtors would not stand to gain through inflation—there would be no windfall losses or gains. Debtors would simply pay what they had promised; creditors would receive what had been pledged. consequently, Mr. Wanniski maintains that there would be no inflation premiums included in the interest rate. Once again people would be willing to lend long at low interest rates.

It is my hope along with other Members of this body that we find a way to return to a viable gold standard.

Let me suggest my colleagues review an interview with Lewis Lehrman that appeared in the November 30th issue of Fortune magazine.

[From Fortune, Nov. 30, 1981]

THE GURU OF GOLD DEFENDS HIS STANDARD

Now that their coveted tax cut is in place, a vanguard of supply-side economists has begun singing a new song—the ode to gold. A return to the gold standard is essential, these supply-siders say, if the personal tax cut is to work its full magic on investment and growth. One critic of the supply-siders, Democratic Congressman Henry Reuss of Wisconsin, quips that the clamor for a gold standard is evidence that "failure has gone to their heads." In fact, the gold advocates among the supply-siders have been talking up "hard" money for some time now. Nearly two years ago Morgan Stanley and Co. circulated a paper by businessman Lewis E. Lehrman that has become something of a gold-standard manifesto.

The thumping for gold has taken on a special urgency recently, however, because supply-siders outside the Administration fear that President Reagan's monetarist approach to dealing with inflation could overwhelm the beneficial effects of the tax cut and choke off economic growth. Just as the Federal Reserve Board appears to have put its house in order, economist Arthur Laffer and consultant Jude Wanniski, among others, have been arguing that the strategy of gradually reducing the growth of the money supply is doomed. Worse still, they say, the attempt to restrain money growth has pushed up interest rates and stifled investment without altering inflation expectations.

Proponents of a gold standard contend that tying the dollar to a commodity whose value is stable over the long run is the only way to halt inflation. Like Sir Isaac Newton, Karl Marx, and legions of others in the past, they believe gold is the best choice. Gold supposedly beats out all other commodities because its supply has historically grown at a rate of about 2 percent a year, roughly the same as the rate of money growth that monetarists contend would yield price stability. Lately, the auric oracles have been predicting that interest rates would tumble if President Reagan simply announced a plan to link the dollar to gold once again.

Monetarists, and just about all other economists, see things differently. One major objection is that an abrupt shift to a gold standard would cause a reduction in money growth much sharper than anything the Fed has engineered; as one former Treasury under secretary puts it, gold would amount to "a chastity belt for a nymphomaniac." A quick move to gold, most monetarists fear, would cause a very deep recession. Many gold critics also believe it would be folly to strap U.S. monetary policy to the ups and downs of a commodity whose largest producers are South Africa and Russia.

Nonetheless, gold has picked up an intellectual respectability that seemed implausible just a short time ago. Alan Greenspan, a mainstream Republican economist, has advocated government issues of gold-backed bonds as a technique for easing the economy toward a gold standard. Congress has created a 17-member Gold Commission to study the role of gold in the domestic and international monetary systems. And, though he hasn't said anything on the subject lately, President Reagan endorsed the gold standard during his campaign.

The confusion surrounding the issue seems unending. As Fortune observed fifty years ago during another debate over the gold standard, it is a subject in which "a known fact is something to cling to in a whirling eddy of hypotheses, trends, theories, nebulous generalizations, and conflicting interpretations."

To get a clearer fix on what the gold advocates have in mind, and how sound their claims really are, Fortune's A. F. Ehrbar conducted a wide-ranging interview with Lewis Lehrman. Lehrman, 43, helped build his family's wholesale grocery business into the Rite Aid Corp., a $1-billion-a-year discount drug chain. The founder of a New York think tank called the Lehrman Institute, he aspires to be the next governor of New York. He is a member of the Gold Commission, and occasionally has written under the pseudonym "A. Gallatin." (Gallatin, the second Secretary of the Treasury, was an ardent foe of federal deficits and a champion of hard money.) Excerpts from the dialogue between Ehrbar and Lehrman:

Q. Why would a gold standard restore so much confidence in the dollar and in the willingness of the government to control inflation?

A. Because the Federal Reserve would be required, by law, to redeem currency in gold.

Q. So your system wouldn't be like the gold-exchange standard that President Nixon abolished in 1971, under which foreign governments could redeem dollars for gold at the fixed price of $35 an ounce but U.S. citizens couldn't even own gold. What system do you want?

A. What we need is a true gold standard, similar to the one we had until 1933. That would be a modernized gold standard where the value of the currency was defined by law as a weight unit of gold. There would be minting of gold dollars for anyone who wished to bring his bullion to the mint for free coinage, and all paper currency and bank deposits would be a claim on the monetary standard [gold]. Convertibility would be universal and unrestricted.

Q. But why would people put such great faith in a political decision that could be unmade as easily as it was made?

A. I deny that it could be unmade so easily. First of all, this is a nation of laws, and it does not pass a law that it does not intend to uphold. Second, the reason people won't hold paper money now is that they know there is absolutely no limit on the quantity of currency and credit that can be issued at the whim of the central bankers or legislators. Under a gold standard, there is the regulating mechanism of convertibility. Throughout American history, convertibility provided for a steady increase in the money supply at a rate of about 2 percent annually, which is directly proportional to the growth of the gold supply.

Q. Why is a gold standard inherently better than legislation or a constitutional amendment limiting the growth of currency or of the monetary base?

A. First, we have a great deal of history on the way the gold standard worked in the past. Though it was imperfect, the gold standard yielded a stable dollar and reasonable price stability over the long run. A constitutional amendment to require the Federal Reserve to create a specified amount of money in circulation is a nice abstract, academic theory. But it's never been done successfully, so you have to decide whether a monetary standard that has worked is a more practical and effective means toward your goal than blackboard exercises in the classroom.

The second thing I would say about requiring the Fed to fix the quantity of money, and this is more of an opinion, is that I believe the Fed can't do it.

Q. But returning to the gold standard amounts to fixing a permanent price for gold. Doesn't that risk massive inflation or deflation? If the price is too high, gold will pour into the Federal Reserve, and the money supply could explode as the Fed issues dollars in exchange for the gold. If the price is too low, the money supply could plummet as people rush to exchange dollars for gold, and we could have deflation and depression.

A. There is no escape from using good judgment and human intelligence. You have to apply judgment to the market data to discover the equilibrium price of gold. That entails risk, but it can be done. And it entails less risk than living with the catastrophic effects of paper money and the inflation of today.

Q. How do you decide the price of gold?

A. I have recommended a stabilization period of two years between the managed paper-money system of today and the modernized gold standard. Assuming that the Federal Reserve behaved properly during the transition, people would become convinced that we really were going to adopt the gold standard. By the final three months preceding the establishment of the monetary standard, the price of gold would be freed from any inflation expectations. During that period, the President would assemble the senior financial officers of his Administration, the key legislative leaders, and the key members of the Federal Reserve system, and this group would write a statute defining the dollar as a specific weight of gold. And that would be the permanent price of gold.

Q. But how do you determine that price?

A. One indicator is the market price, which my friend Arthur Laffer relies upon entirely. I do not. The second consideration is judgment—establishing the price of gold at a level high enough to ensure that there will be no decline in average wages. [That is, high enough that there wouldn't be sharp deflation.]

Q. Why is that necessary?

A. It's not necessary, but it is desirable. After the establishment of the monetary standard, the economy would be deregulated, the tax code would be more completely reformed, and the budget and spending practices of the government would be completely overhauled. All of those changes would permit the price mechanism to operate more flexibly, and resources would be allocated more efficiently. It makes sense to establish the price of gold at a level that eases this reform of our economic system rather than intensifying the difficulties.

Q. You have said that a return to the gold standard would cause interest rates to drop to 6 percent or less and bring about an investment boom because it would ensure a stable price level. Are you sure that prices really would be stable?

A. The greatest period of price stability in American history was under the monetary standard established by Congress in 1792 that lasted, but for the brief interruption of the Civil War, until the establishment of the Federal Reserve in 1913. There were fluctuations during that period, but the price of a loaf of bread was about the same under Teddy Roosevelt as it was under George Washington.

Q. While prices were stable over the long run, isn't it a fact that changes in the price level were very rapid in the short run?

A. It is not true. Under the gold standard you sometimes get a gently falling price level of 1 percent to 1.5 percent a year over periods of 20 or 30 years, or a gently rising price level of 1.5 percent to 2 percent per year, which to practical people means nothing. What business people and working people can't adjust to is an unhinged system that gives them 12 percent inflation, so that you get a doubling of the price level every six years.

Q. The statistics suggest that prices actually were very unstable in the short run under the gold standard. In fact, the price level varied considerably more from year to year under the gold standard than it did from 1934 to 1980. The period when prices were the most stable, according to the usual statistical measures, was 1946 to 1970, not under the classical gold standard.

A. Well, I think the proper period for comparison is since 1971. The years from 1946 to 1970 were basically the Bretton Woods gold-exchange period, and I yield to your figures because I agree with them. I think the crucial period to compare is the last ten years, with its total suspension of gold convertibility, and the period of more or less classical gold standard from Thomas Jefferson to Teddy Roosevelt. In these two periods the variations are close to one another, but greater in the recent period.

Q. A number of monetarists concede that the discipline of a true gold standard would produce long-run price stability but argue that it would also bring greater volatility in economic activity. Do you agree with that view, and believe ending inflation is worth greater short-run uncertainty, or do you simply disagree?

A. I disagree with my monetarist friends about the short-run fluctuations. If one is looking for the kind of reasonable stability we can have in this imperfect world of change and uncertainty, then the gold standard is the best monetary institution by which to attain that goal.

Q. The history of business cycles indicates that we had a lot more fluctuations and bad times under gold. From 1882 to 1913—when the U.S. was on the purest form of the gold standard—we had nine full business cycles, and business was contracting 47 percent of the time. But from 1945 to 1980—a period four years longer—we had only seven full cycles, and business was contracting only 18 percent of the time.

A. My view is that it's not a matter only of time periods, but of real output levels. The period from the 1870's to World War I was one of unparalleled increases in real output. Also, you should compare the 1882-1913 period with the last ten years, because we still had a gold exchange standard until 1971.

Q. You've got some special factors in those periods of robust growth—unlimited immigration, the opening of the West . . .

A. I agree. But they are part of the free and open trading system and the common currency system characterized by classical liberal economies and the gold standard.

Q. Do you give the gold standard credit for the opening of the West?

A. No, I don't. I'm just saying that the gold standard was associated with the unbelievable strides of an impoverished 13 colonies by the sea to preeminence in the world economy. The standard is not only associated with, but is somehow inextricably bound up with stable long-term growth. The gold standard does not cause one to settle the West, but it helps make that kind of development possible.

Q. Statistics going back that far are unreliable, but those available don't show that long-run growth was much greater than it has been over the last 35 years.

A. All I'm getting at is you don't have less growth.

Q. Many economists argue that a gold standard like the one you recommend would make the U.S. economy more vulnerable to external shocks. For instance, the election of a Mitterrand could cause the French to want to hold gold; if they redeem dollars for gold, that reduces the U.S. gold stock, which in turn requires a reduction in the U.S. money supply and a drop in economic activity.

A. It need not. You can have variations in the quantity of bank deposits and paper currency which diverge from the variations in the monetary gold stock. The variations will not be substantial, but there can be variations. It's this flexibility of the gold standard which in fact commends it as the monetary institution to withstand outside shocks.

Q. But if substantial amounts of gold were drawn out of the U.S., wouldn't that cause a reduction in the money stock and, in turn, depress economic activity?

A. I wouldn't exclude that as a possibility, but it wouldn't necessarily happen. It is entirely possible that you could have a stable money supply while gold reserves were gently falling.

Q. What about the danger that a political faction such as OPEC might blackmail us by threatening to convert large holding of dollars into gold?

A. This is a canard that circulates among a lot of people. The truth is that OPEC countries wish to produce their real wealth in exchange for dollars in order to build up their countries. That's the way businessmen and nations operate. They don't operate according to some abstract theory of what can be imagined as a bogeyman.

Q. An international gold system is a system of fixed exchange rates. Doesn't the settlement of balance-of-payments deficits in gold also require a drop in the money supply and a contraction in economic activity?

A. No. A true gold standard simply causes nations to settle promptly the deficits they accrue as they go along. You don't have to export gold. You could simply export more textiles, or more steel, or more automobiles. You could export, in the case of the U.S., more high technology, more plants and equipment, more wheat, more services. A deficit can be settled by shipping out a real good like gold, but it can also be settled by shipping out a real good like wheat.

Q. You have written that a gold standard must be international to be truly effective. What happens to your system if other nations refuse to go along?

A. I believe that leadership counts. The U.S. is, in fact, the leader of the free world. Again, so many of these things have to do with your articles of faith. It is the manifest destiny of the U.S. to lead not only the free world but all nations in the world who wish to be free.

Now, if the U.S. agreed to make the dollar as good as gold, it would be an act of leadership showing that once again we would respect the value of people's wages and the value of their savings. It would give dignity to the dollar once again, and all other nations in the free world would promptly repair to our standard.

It's unlikely that other nations will get the change to repair to a U.S. gold standard anytime soon. Lehrman has only one ally on the Gold Commission, Republican Congressman Ron Paul of Texas, and gold hasn't picked up many followers on Capitol Hill. If anything, the case for gold should deteriorate if the Fed sticks to its policy of reducing monetary growth. But Lehrman and other gold advocates could get their way if the Fed falters and inflation takes off on yet another upward spiral.

Mr. PAUL. I thank the gentleman very much.

I would like to make just another point here regarding the supply of money. When a country is on a paper system, the government creates new money and all new money enters the market through the banking system or through the government monetizing debt. This represents special interests,

the special interests of the politican or the special interest of the banker.

Under a gold standard, the new money enters in a very different manner. If a miner produces gold and he produces money, he has earned it, it has real value and it enters into the market by him purchasing goods or putting it in the bank and loaning it. So in this sense the paper standard is not economically wise. It is not a market entry, where the gold as it enters is a market entry of new money and it is fair. It does not favor any special interest.

Many people are concerned about the supply of money, and we mentioned just briefly a few minutes ago that the supply of money was not critical. Under a gold standard, one year you might have a 1-percent increase in the supply of money and another year you might have 4. It averages out that the money growth under a gold standard is between 2 and 3 percent, close to what the monetary rule that the monitorists claim we should have; but the big difference is who controls the power to create money.

It is also recognized that throughout the history whenever the power has been given to the politicans and to the bankers to create new money, they have always abused this power. This power cannot be abused when money is literally gold.

Some would say, well, if we cannot establish a gold standard by edict, by passing a law, all we need to do is pass a law and suspend the gold standard if it becomes necessary. This is absolutely true.

It is true the same way as having a constitutional amendment that protects our right of free speech.

Many governments have had rights of free speech written into the law, but they suspend them under times of emergency.

This does not take away the argument to have something written into law to protect the right of free speech nor the right to have honest money.

Our job as representatives of the people would be to protect that right, to secure the right of free speech under all sets of circumstances and also to secure the right of honest money under all sorts of stress, whether they be economic or international.

Another question that frequently comes up along this line is the question of whether or not South Africa and Russia could hold us hostage. This argument carries really no weight whatsoever. If you take the total stock of gold existing in the world today and you take the best year of production for South Africa and Russia, we find that they can only produce 1 and 1½ percent of the total gold stock. So even if they withheld all their supply for 1 year and dumped it on the market in 1 day, it cannot affect the purchasing power of that gold if they did this. But they would not be inclined to do this. It would not be in their best interest.

In 1968 when we removed the last cover for gold on the Federal Reserve note, the argument then was that we must remove the gold cover because we are artificially supporting the price at $35 an ounce, and if we did not support the price at $35 an ounce, gold would drop to $6 an ounce and the South Africans would be punished and they would suffer the consequences.

□ 1850

The plain truth is, and everybody knows that after we removed the gold cover in 1968, the ratio of gold to Federal Reserve notes, or the price of gold, has skyrocketed. It has been approximately 1 year ago that the South Africans were able to get $850 per ounce for their gold. It has been a boon to the South Africans, as well as the Russians.

So being off the gold standard has not hurt them in any way, and going back on would not necessarily and could not possibly help them in any way.

Many people in the past have claimed that under the gold standard we have instability. Of course, they compare the instability to perfection, but they never compare the instability under a gold standard to the instability of the past 10 years.

The amount of inflation and financial crisis we have had, the condition of the bond market today, and the condition of the savings and loans is such that it is much worse than everything that ever happened under the gold standard. But the plain truth is that under the gold standard the trouble that we did have was always from the abuse of the gold standard and not from the gold standard itself. It was the fact the governments either suspended the rules or did not follow the rules to begin with.

For instance, during the 19th century, the periods that we suffered the most serious consequences of inflation were two, the War of 1812–14, and the Civil War period, because they suspended redeemability and they inflated; they literally printed up greenbacks. And under those conditions, we did have serious inflation. Even the transition period going from the time we were off gold back onto gold, even though that can cause some trouble, we cannot blame that on the gold standard. We must blame that on the people who inflated and abused the gold standard.

When we were on the gold standard between 1879, after we resumed redeemability, up until 1913 when we established the Federal Reserve System, we did have panics and crashes. But again, it was due to localized or statewide expansion of credit. There was always fractional reserve banking that occurred, and the banks always stretched it to the hilt and they became illiquid. When the people did not trust the banks, questioning whether or not they had the amount of gold present that they should have, there was a run on the bank. But this, again, was due to the fact that they did not follow the rules of the gold standard, and they did not have 100 percent reserves behind the certificates. They claim that the period of time from 1882 to 1896 was a time where we suffered tremendous deflation, and then from 1896 to 1913 we had inflation. The figures that are used during these periods are the Wholesale Price Index. The Wholesale Price Index is much more flexible than the Consumer Price Index, and indeed, in the first period from 1882 to 1896, prices did go down 47 percent, the Wholesale Price Index, but retail prices went down 1 percent a year.

Can you imagine the American people complaining today if all they had to worry about was that the retail prices were decreasing 1 percent per year? There was no havoc caused by decreasing prices 1 percent per year.

From 1896 to 1913, due to an increase in the gold supply, in this sense a gold inflation, prices went up at the rate of 1 percent per year.

But we should not compare this to perfection. We should compare this to what we have had with paper. And the Wholesale Price Index in these past 10 years, from 1971 to 1981, has been going up at 9.5 percent per year and the Consumer Price Index has been going up 8.4 percent per year. So in comparison, the price stability was overwhelmingly in favor of stability under the gold standard as compared to the paper standard.

Even though history is very clear on stable prices, with the gold standard versus paper standard, it is not rigidity that is beneficial under a gold standard. As a matter of fact, under a gold standard things are not held rigid. The money supply can adapt. It can adapt to economic needs. And any supply is workable, because the general price level adjusts.

It is true that the gold standard without a free market does not add a whole lot. A good standard works with and is part of a free market system, because if you have the rules set up so that people are encouraged to invest, to save, the taxes are low, that we do not tax savings, that we do not tax profits, yes, it would be very difficult to have any money work. It is just that paper currency works even poorer under the conditions that we have today as compared to the free market.

One of the main arguments against accepting a rule over that of the gold standard has a lot in common with those who advocate a monetary rule versus a gold standard. They have

much in common. But the one thing I believe they omit, those individuals who promote the rule, is that they do not quite understand human nature; that if you permit somebody to create new money out of thin air at the rate of 3 or 4 or 5 percent a year, they will abuse this and go to 6 if they can do it at 5. And the political pressures are always so great that they always yield to it.

But the other important thing is that when Government does it, you will create malinvestment. The malinvestment comes from the fact that the Government introduces the funds and there will be a type of market—a credit allocation—as soon as the Government gets involved, and the money will not be invested the same way it would be under a gold standard.

Most important, though, I think gold represents a free market and it represents honest money.

I happen to be a very strong proponent of the gold standard, and have been, and see the tremendous significance of the gold standard. But I am also one who is very realistic and I understand that the gold standard cannot possibly be a panacea for all our other problems. If we expect the gold standard to be instituted and solve the problems that we have in our economy due to overtaxation, overregulation, and the huge deficits, I think we would be deceiving ourselves. But if we think we can stop inflation without honest money, we are also deceiving ourselves.

But we have a great problem before us, because the size of the Government is such that it is going to be most difficult to get to a free market economy and, therefore, to have a gold standard. Now, this doesn't mean that we should reject the notion of a gold standard. It means that we have to be prepared for it. But I think it is most important that we are realistic to know that the transition period of going from where we are to where we must go in order to stop inflation is difficult. But if we do not start making and providing the groundwork for it, that day, when we have inflation rates at 15 or 20 or 50 or 100 percent, which is inevitable under a paper standard. Paper does not work, it has always failed throughout history. There has never been a successfully managed paper standard. And for that reason, we as Members and Representatives of the people must be prepared and start thinking about how we will once again establish honest money.

Mr. SILJANDER. Mr. Speaker, will the gentleman yield?

Mr. PAUL. I would like to yield at this time to the gentleman from Michigan.

Mr. SILJANDER. I thank the gentleman for yielding.

Mr. Speaker, I have introduced House Resolution 274, calling for lower interest rates and a balanced budget. I am doing so because the high interest rates are destroying America, clear and simple, destroying the auto industry, the housing industry, the construction industry, the thrift institutions and, naturally, the consumer abroad are being destroyed by the high interest rates in America.

Coming from Michigan, a State that has the highest inflation rate, the highest unemployment in the Nation, we know too well how all these industries are being devastated by high interest rates.

I think we should analyze the reasons why we have high interest rates, and then if we can analyze that and come to some agreement and grips with that issue, then we can logically determine what we can do to begin to lower the interest rates.

First, we have a $1 trillion national debt. And if the interest rate on that debt were to average 10 percent, anyone in simple mathematics can analyze it is $100 billion in simple interest that the Government must borrow to pay off the national debt.

Second, the budget deficit alone will be well over $100 billion this year, estimated to be $152 billion the following year, and finally, in 1984, the year that we are targeting for a balanced budget, it looks like the deficit will be $162 billion. If we simply add 1 percent more inflation or 1 percent more interest, we will place another $35 billion on top of the national debt that has already broken the $1 trillion mark.

□ 1900

I think point number two dealing with why interest rates are so high is because of Government loan and Government loan guarantees. This crowds the market, and $600 billion that the Government involves itself in with loans and loan guarantees is usurping authority, usurping money, out of the market, leaving thereby less money for the consumer.

The other issue, as we have talked so often about, is tight money versus loose money. The Federal Reserve has obviously failed in their effort to keep money tight. We are actually, according to Joe Cobb, of the Council on Competitive Economy, actually in a very loose money situation. He claims in terms of liquid money we are at nearly 30 percent monetary growth last year, whereas the Federal Reserve Chairman claims no more than a 5-percent growth. Obviously, there is an inconsistency somewhere. I think the inconsistency is in monetary policy. The monetary policy is out of control. It is out of control with the hum of the printing presses that run 24 hours a day.

The "M" policies are not logical. The "M" policies change with all types of different circumstances, be it a change of administration in the White House, a change of the Chairman of the Board or of Board members, a change with an active Congress such as the Keogh plan, or the new change in IRA plans or the new All Savers plans. Things seem to change the "M" policies with everything that goes on in Washington, D.C.

So, obviously with this inconsistency we are in a loose and erratic monetary policy. Somehow, some way, this policy needs to be tightened down, or more than anything, needs to be a consistent policy that we can all, as well as the financial institutions, look to for some form of reliability. The Federal Government, through the Federal Reserve, raises reserve requirements, or they raise interest rates, and as a result the whole economy suffers. The Dow has no real meaning today. How many "Big Macs" can one buy with a dollar next year? We know how many today, but next year is a big question.

In 1933, the Gold Reserve Act finally separated the dollar tied to weight of gold, as Congressman RON PAUL has already very articulately outlined. The result of that erratic monetary policy, the result of Government-guaranteed loans, direct loans, the result of tremendous debts and deficits by the Federal Government, pushes up inflation. It is very clear; we have had history to prove that and demonstrate that beyond any reasonable doubt.

When inflation goes up, the financial institutions have nothing else to do, no alternative but to raise interest rates to hedge against expectancy of high inflation.

We have two solutions. We have a short term and long term solution, I think, to the devastating interest rates. The short-term solution, naturally, is to balance the budget. We have to lessen the debt interest payments and to fund the debt if we can by gold bonds. We have to limit and lessen the deficit borrowing, and we can only do that by fiscal responsibility and boldness in Federal Government, and boldness really here in the halls of Congress in terms of getting that budget in some reasonable semblance of balance.

Second, for a short term solution, we have to reduce direct loans and guaranteed loans by Government only to those of vital, economically needed areas. That is a short-term solution addressing the concerns.

The long-term solution, I think, is clear also. The long-term solution would be addressing the inconsistent monetary policy and redirecting that into a very consistent one, and that would be with the gold standard. We need a disciplined and constant value of our dollar, something that we can count on, something we can have con-

fidence in. Banks will no longer need to hedge against inflation.

I think the French example of 1926 and 1959 clearly demonstrates a need for a gold standard and budgetary equilibrium.

Since 1971, when President Richard Milhous Nixon finally and clearly separated all ties to gold, we had many interesting things happen in America, and I think we ought to analyze and contrast what we had economically in 1971 to what we are now experiencing here in 1981. The M_2 policy at the Federal Reserve in 1971, in other words, the amount of money that was flowing into the market in 1971 was approximately $659 billion. In 1980, the estimate is $1 trillion $735 million—almost three times in 1981 what it was in 1971.

The inflation based on the Consumer Price Index in 1971 was 4.3 percent. In 1981, the September rate was 14 percent. The annual rate of inflation, interest rates, prime rate in 1971 was 5.5 percent. Today, and historically in 1980, the interest rates have superseded 20 percent.

The real value of an average workingman's paycheck since 1971 has not increased, but rather decreased over 14 percent. Unemployment in 1971 was 5.9 percent. In 1981 it is 7.8 percent.

The personal savings rate in 1971 was 7.7 percent. Today, in 1981, it is less than 4.7 percent.

Personal and business bankruptcies have almost doubled this year just to last year, but again, comparing 1971, there was an average of 205,099 bankruptcies that year. In 1981, the projected first quarter is 363,610 bankruptcies. Our whole posture has been weakened economically. Our leadership as a world position for monetary policy and the dollar has weakened substantially since we severed the link in 1971 finally to the gold standard.

I would like to throw out a couple of quotes by two men I highly respect for their knowledge of this issue and of the economy. The first quote comes from Congressman RON PAUL of Texas, who says:

> Politicians who have been in office for too many years, and have therefore lost touch with the people, pay no heed to the rising clamor for money of real value. But the old scapegoats no longer work.
>
> Blaming Arabs, businessmen, labor unions, or consumers for rising prices, doesn't drown out the steady hum of printing presses running 24-hours-a-day ballooning the money supply, and thereby debasing every dollar previously printed.
>
> Congress alone is responsible for inflation, and Congress alone can stop it. It has shirked its responsibility for decades, but events are making a continuation impossible. It is time now to prepare for monetary reform.

There is one last quote by Congressman JACK KEMP that goes such as this:

> One great obstacle stands between us and the beginning of the American renaissance toward which we have worked: the problem of restoring a stable and honest dollar. Like the continental dollar and the Civil War greenback, our latest decade long experiment with an unbacked paper currency has been a disaster. Since 1971, it has led only to rising prices, rising interest rates, and rising unemployment.
>
> Each time in the past, such unfavorable economic conditions have been ended only by making the dollar convertible into something of value—silver or gold. I am convinced we must do so again.

That was Congressman JACK KEMP.

I deeply believe that Americans need encouragement and need security to do three basic things: To save, to risk, and to invest. If we cannot give solemn assurance to those individuals to do those three items, then I think America will continue to go down in economic decline. Economic freedom, as all others, requires order, discipline, and energies of initiatives.

"Fighting inflation," says economist Eugene Birnbaum, "through deliberate recession is akin to medieval bleeding."

Americans in this Nation are bleeding again. We are bleeding from a lack of discipline, from a lack of courage of Congress to balance the budget, and now it is time to minimize that pain.

The formula for success of the 1980's is simple. It is a five-pronged plan for success. No. 1, a balanced budget; No. 2, a stable monetary policy established through the gold standard; No. 3, tax cuts and free market incentives to produce capital investment; No. 4, deregulation of industry; and lastly, No. 5, we have to evaluate our loan guarantees and direct loans by Government. This, in my opinion, will assure America that we will have a consistent policy of economic expansion rather than economic decline.

I thank the gentleman.

Mr. PAUL. I thank the gentleman from Michigan for his very logical statement.

The Byzantine Empire had a golden coin called a Byzant. It lasted over 1,000 years, and maintained its value for that entire 1,000 years and it circulated throughout the world. Our first experience in this Nation with inflation was with the Continental dollar, where we had runaway inflation, and when our Founding Fathers wrote the Constitution, they wrote that we could only mint gold and silver coins, and we could not emit bills of credit.

□ 1910

I personally believe that it is immoral to print money and inflate at will. I believe it is unconstitutional and it is economic insanity.

After the Constitution was written we did establish a gold dollar. A loaf of bread in 1792 cost the same as it did in 1934. Since 1934 it has been straight downhill, especially since 1971, as far as the value of the dollar goes.

All nations who have inflated and all nations who end up with runaway inflation are doomed to have social and political upheaval. We must look carefully at what has happened in the South American countries as well as what happened with Nationalist China prior to the Communist takeover, as well as what preceded the takeover in Germany with Hitler after the runaway inflation in the 1920's.

This is a serious problem. It deserves serious attention, and the day must come when we have money good as gold once again.

● Mr. PHILIP B. CRANE. Mr. Speaker, there is a ferocious national debate taking place today on the state of the economy and the future direction that we should take in the solution of our problems. Primary in the solutions offered to our economic problems is a return to the gold standard. This has been my position of record for many years and in this Congress I have introduced H.R. 831 to accomplish this end. In my mind the evidence on this question is so convincing as to be irrefutable. The necessity for a stable form of exchange which is free from Government manipulation and the perversions, distortions, and abuses, which the power of Government inherently breeds, is clear. For those who are unable to accept distant history, then the past decade of the 1970's should be enough to make the case.

The traditional restraint of guaranteeing the redeemability of paper gold was removed by all governments after August 15, 1971, following President Nixon's suspension of international gold payments by the United States. Since that time the world has been afloat in a sea of paper currencies managed and mismanaged by approximately 120 sovereign governments. Having been set free from the contractual gold payment restraint, massive spending and currency inflation have run out of control bringing this country and the world to the brink we stand at today. The following facts speak for themselves. In the United States, budget outlays went from $196 billion in 1970 to $661 billion in 1981. The deficit has gone from 2.8 billion in 1970 to $55.6 billion in 1981. The story is very much the same in the rest of the Western World.

In 1970 only a few industrial states such as Japan, Denmark, Iceland, Spain, and Turkey experienced inflation rates of more than 5 percent. By 1980, the picture was very different. Inflation rates were as follows: Australia 10.2 percent, Canada 12 percent, Denmark 12.3 percent United States 13.5 percent France 13.6 percent, Spain 15.5 percent, Great Britain 18 percent, Italy 21.3 percent, Greece 25 percent, and Turkey 94 percent. Without the restraint of a gold standard worldwide inflation has exploded.

Clearly we stand at a crucial crossroad. It is my hope that leaders in our

Government and in the other governments of the world will be led by conscience not to avoid this step that must be taken. For if they do, the economic havoc we can expect is extreme. It is my conviction that we don't have to experience such a catastrophe. And it is certainly my intention to continue working to avert it. With full debate, reasoned discussion, and honest intent, there is no reason why we cannot reach a consensus in this country, adopt a gold standard, and halt our drift toward economic ruin. Obviously, the path we have been following is not the answer.●

FIRST CONGRESSIONAL DISTRICT OF NEW YORK YEAR-END REPORT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. CARNEY), is recognized for 10 minutes

Mr. CARNEY. Madam Speaker, for many years, the people of the First Congressional District of New York have been provided a year-end report on the activities and votes of their Representative in Congress. I take great pleasure in carrying on this tradition during this 97th Congress. At this time, as we move into the final hours of the 1st session of the 97th Congress, I would like to submit the First Congressional District year-end report.

These have been an exciting 12 months to be in Washington. I believe history will record this first session of this Congress as one of the most significant, far-reaching legislative sessions of this century. By actions taken this year, this Congress has begun a redirection of our National Government. In many cases, the changes wrought will restore to individual citizens and families a measure of control over their lives and pocketbooks which had been surrendered to a Federal Government grown too expensive, too expansive, and too burdensome. In other instances, the new direction will begin the necessary revitalization of our national defense and restoration of a strong, clear, and consistent foreign policy.

While many major issues have been addressed by this Congress, it has been the economy which has taken the greatest amount of time and attention. That concern by the Congress, of course, only reflects the concern of the people of New York and the rest of the United States. It also is true that Congress in this first session has reflected the national will and desire for a meaningful change from business as usual in Washington.

At his inaugural in January this year, President Reagan called for a new beginning. In mid-March he came before us in a joint session of Congress to lay out a four-point economic recovery plan to meet the challenges of that auspicious theme for his administration.

The program's four major elements, designed to complement one another, were: First, cutting the growth of Federal spending; second, reduction of tax burdens; third, regulatory reform; and fourth, controlling money and credit.

Now, only 9 months later, the planks of that program directly affected by congressional action are in place or soon will become effective.

In major showdowns this year with opposing elements in Congress determined to derail the economic recovery plan, the President's program repeatedly prevailed. Much of the credit for those successes lies with the people. I received hundreds of letters and phone calls from the people of the First Congressional District. Not all supported the President's plan in every instance. But a recurrent theme running through many of those messages was: It may not be perfect, but the President's plan deserves a chance.

I have supported most of what the administration has proposed in its attempts to launch a new beginning. Those of us elected by the people are not sheep to be led by the executive branch. On occasion, the interests of the people of the First Congressional District run counter to an administration plan; in those cases, I have voted or acted accordingly. But, for the most part, the policies and programs of this administration have warranted the support I and others have given them.

What we have accomplished in pursuit of the President's economic recovery plan is truly impressive.

We have lowered personal income taxes by 5 percent as of October 1, with additional 10 percent reductions planned for July 1982 and July 1983. Those 25-percent across-the-board reductions will mean more money for the persons who earn it to decide how to spend, not some bureaucrat in Washington. We also have insured that for the first time, the government no longer will profit from continued inflation. Beginning in 1986, personal income tax rates and personal deduction will be adjusted, or indexed, for inflation. This will mean the end of the "bracket creep" by which salary and wage increases only boosted individuals into higher tax brackets where Government takes a larger bite.

We have put into place incentives for businesses to invest in new plant and equipment in order to operate more efficiently and create new jobs. We have enacted major incentives for individuals to save more money and thus help create the capital needed for investment and economic growth as well as to better provide for themselves and their families for the future. We have added extra incentives for individual initiative by insuring that a farmer or small businessman's lifetime effort and investment benefits his family, not the tax collector, by easing the inheritance tax rates that destroy many family farms and enterprises.

Other benefits we have enacted as part of the tax-reduction plan include:

New deductions for couples who work, reducing the "marriage penalty";

New charitable deductions for those who do not itemize on their tax returns;

An increase in the amount of money that can be put into an individual Retirement Account (IRA) or Keogh retirement plan, with persons already covered by a pension program at work allowed for the first time to set up an IRA too, in order to help workers to better save and plan for their later years.

I believe it is worthwhile to reassess how far we have come in improving the economy this year. To understand where we are today, we have to recall where we stood at this time last year under the last administration.

When Jimmy Carter took office in 1977, inflation was running at 4.8 percent. When he left office, inflation had risen to a 12.4 percent per year rate. Under the Reagan administration, inflation is down to a 9.5 percent annual rate. Just last month consumer price rises were holding at 4.4 percent annual rate. Clearly, we are turning the tide on inflation. And it is this lowered inflation which offers the greatest encouragement for those on fixed or low incomes who have been hurt most by the soaring inflation of recent years.

When Jimmy Carter took office in 1977, the prime interest rate was 6.25 percent. When he left office, it was up to a high of 21.5 percent. Now it is down to 15.5 percent and still heading downward.

When Jimmy Carter took office, Federal spending was increasing at a rate of 12.3 percent a year. When he left office, the spending growth rate was 14 percent. The latest estimate of the growth in spending under the Reagan administration is 10.6 percent for fiscal 1982.

One area where we have not seen as much improvement is in unemployment. Unemployment in the last quarter of 1980 was 7.5 percent; during the same period this year it is 8 percent. As regrettable as that high figure is, there are signs of hope. One purpose of the Reagan economic program is to increase savings and investment needed to create jobs. During all of 1980, only 300,000 new jobs were created. This year, there have been 730,000 new jobs created. So we are seeing some progress, although clearly not enough.

We have begun to fulfill the mandate of the people. We have cut spend-

ing for fiscal years 1982-84 by $167 billion in budget authority and by $131 billion in actual budget outlays. We have reduced the tax burden for fiscal 1982 from the 22.1 percent of the gross national product projected by the Carter administration to only 20.4 percent under the Reagan administration.

What we have been doing is painful. But I believe the people of the First Congressional District continue to realize we can endure some short-term pain in order to get a long-term gain.

The primary responsibility of an elected Representative is to insure that the voice of his constituents is heard on the issues. That is why I have maintained a higher than average attendance record on the floor of the House, the place where final amendments are proposed and the place of ultimate judgment. I am proud to say that in the 3 years I have served in Congress, I have been present for 95 percent of the more than 1,800 recorded votes conducted in that time.

Issues which took on very special significance in this Congress were the preservation of clean drinking water and clean air. My own efforts in this behalf have been helped by becoming the ranking minority member of the Science and Technology Committee's Subcommittee on Natural Resources, Agriculture Research, and the Environment. On Long Island, we have a particularly keen interest in clean water because of our total dependence on underground aquifers for our drinking water. This year I have worked with State and local officials as well as Federal agencies to enhance efforts to insure a pure drinking water supply for Suffolk County and all of Long Island. I take particular pride in being able to use my subcommittee position for the betterment of our environmental quality on Long Island.

Next session, we look forward to rewriting the Clean Air Act. This is one proposal that will get my very close attention. When we get done rewriting that law, I want to be able to say we have more effective protection of the people's health through enhancing the quality of the air they breathe.

The security of our Nation is an essential Federal priority. Because of this, it has been my pleasure to support the President in his efforts to bolster our national defense effort, which slipped badly in recent years. On November 18, I voted for the $197.4 billion defense appropriations bill. On Long Island, we are proud of our contribution to the national defense. Economists have calculated that the Long Island economy will realize a $1 billion boost as a result of the 1982 defense spending bill.

The core of our defense program remains the men and women who serve in the military service. In September, I supported the 14.3-percent increase in basic pay for all military personal, a move which should help retain the experienced personnel needed to operate our sophisticated modern military with its All-Volunteer Force.

Our national debt to those who serve us all in the military continues after their service. This year, we in the House enacted three major veterans' bills, all of which I supported.

Signed into law on November 3, was the Veterans Health Care, Training and Small Business Loan Act of 1981. A major provision in that law provides medical help for the first time through the Veterans' Administration for Vietnam veterans exposed to the herbicide agent orange who developed health problems as a result.

The Veterans Disability Compensation, Housing, and Memorial Benefits Amendments became law in October. Among other provisions, that law increased disability compensation for disabled veterans and their dependents or survivors by 11.8 percent effective October 1.

The third measure to become law was the Former Prisoner of War Benefits Act of 1981.

We in the House also passed two veterans bills which the Senate now must approve. One would strengthen the VA medical system. The other would create a variable-payment home loan program to help veterans buy houses in times of high interest rates.

Mr. Speaker, there is one last item which I want to particularly note for the people of the First Congressional District because it has the potential of overshadowing all else we have done.

I refer to President Reagan's historic peace initiative announced on November 18. At that time, he issued a challenge to the Soviet Union, a challenge not of war but of peace. Each of the four points in his plan is highly significant. But the most critical is the offer to cancel the placement of new nuclear defense missiles in Europe, if the Soviet Union will dismantle the strategic missiles it already has in place targeted on western Europe.

This is a call for the beginning of a mutual disarmament, if that disarmament can be adequately verified. The strategic arms reduction talks (START) which President Reagan called for have the potential of becoming the turning point in the world's prospects for a true and lasting peace, a peace without the threat of a nuclear holocaust.

The voting summary printed below represents the highlights of the recorded votes taken by the House in 1981. I have tried to represent your interests to the very best of my ability. The congressional office of New York's First District exists to serve you. I welcome your advice and comments and look forward to serving and working with you in the next session of the 97th Congress.

Date (1981)	Legislative issue	Carney vote
February 5	Increase the public debt limit to $985 billion through September 30, 1981 (Approved, 305–104)	No.
March 4	Authorize the House Committee on Standards of Official Conduct to do a complete investigation of whether the FBI's "Abscam" probe found improper conduct by House members, officers or employees, and grant extra powers to conduct such an inquiry (Approved, 390–1).	Yes.
March 25	Reduce amount for House committees and House Information Systems computer services to 90 percent of what was actually spent for those purposes in 1980 (Rejected, 184–225)	Yes.
March 26	Designate April 26, 1981, as National Recognition Day for Veterans of the Vietnam Era (Approved, 391–0)	Yes.
April 7	Pass resolution calling on the president to carry out the objectives of the International Year of the Disabled (1981) as proclaimed by the United Nations (Approved, 364–2)	Yes.
May 7	Pass substitute resolution offered by Gramm-Latta to set fiscal 1982 budget targets in accord with the President's economic program (Approved, 253–176)	Yes.
Do	Final passage of fiscal 1982 budget target legislation, setting budget authority at $764.5 billion; outlays, $688.8 billion; revenues, $657.8 billion; and, deficit, $31 billion (also revised binding budget levels for fiscal 1981 and directed House committees to cut back programs within their jurisdictions to save $36.6 billion in outlays in fiscal 1982) (Approved, 270–154).	Yes.
May 13	Insist that House conferees on the first fiscal 1982 budget resolution must adhere to the House position on budget authority and outlays for defense programs in fiscal 1982 (Approved, 247–162).	Yes.
June 11	Adopt amendment to prohibit funds in the Department of Energy's national security programs to develop or produce enhanced radiation (neutron) weapons (Rejected, 88–293)	No.
Do	Delete a provision in the Department of Energy's national security programs barring preparation of any environmental impact statement not already being prepared for an Energy Department military facility, unless the statement is required by law (Approved, 233–122).	No.
June 16	Express support for diplomatic efforts to resolve the crisis in Lebanon and congratulate special envoy Philip C. Habib on his peace efforts there (Approved, 398–1)	Yes.
June 17	Prohibit Legal Services Corporation funds from being used for lobbying, except on behalf of a client's legal rights (Approved, 271–141)	Yes.
Do	Bar Legal Services Corporation lawyers from filing class action lawsuits against Federal, State or local governments under any circumstances (Approved, 241–167)	Yes.
June 18	Prohibit Legal Services Corporation funds from being used in cases to "promote, defend or protect" homosexuality (Approved, 281–124)	Yes.
June 23	Authorize $6.1 billion in fiscal 1982 for the National Aeronautics and Space Administration (Approved, 404–13)	Yes.
Do	Authorize $2,665,462,000 for defense programs in fiscal 1981 (Approved, 360–50)	Yes.
June 24	Adopt the conference report on the bill to repeal the existing 5 percent maximum discount merchants can offer customers for cash purchases and extend until 1984 the existing prohibition on surcharges for credit-card purchase, and to authorize appointment of a Surgeon General aged 64 or older (Approved, 398–9).	Yes.
June 25	Force an immediate vote on the procedural measure setting the rules for consideration of the budget reconciliation bill, thus effectively cutting off debate and ending the possibility of amending the bill to make changes in existing Federal programs to achieve budget reductions required by the first fiscal 1982 budget resolution (Rejected, 210–217).	No.
June 26	Adopt a conference report giving steel companies, on a case-by-case basis, until December 31, 1985, to meet the 1982 air pollution cleanup deadline (money saved by deferring pollution control expenditures must be used to modernize older steel plants) (Approved, 412–4).	Yes.
Do	Consider en bloc amendments by Rep. Latta to strike parts of six titles of the bill recommended by following committees—Agriculture; Banking, Finance and Urban Affairs; Education and Labor; Post Office and Civil Service; Science and Technology; and, Ways and Means—and to substitute provisions endorsed by the President (Approved, 217–211).	Yes.

Date (1981)	Legislative issue	Carney vote
Do	Force an immediate vote on, and thus end debate and the possibility of amending, a motion to recommit the budget reconciliation bill to the Budget Committee with instructions to provide a twice-a-year, cost-of-living adjustment for Federal employees (Approved, 215–212).	Yes.
Do	Final passage of the Gramm-Latta version of the budget reconciliation bill, to revise existing laws to achieve budget savings in fiscal 1982–84 as ordered by the first budget resolution for fiscal 1982 (Approved, 232–193).	Yes.
July 9	Agree to an amendment to another amendment to the Defense Department authorizations bill to prohibit spending funds for the MX missile system until both houses of Congress have adopted resolutions approving the MX system selected by the President (Rejected, 201–207).	No.
Do	End debate on an amendment to the Defense authorizations bill deleting $2.4 billion for development of the MX missile system (Rejected, 193–213)	No.
Do	Delete $2.4 billion for development of the MX missile system (Rejected, 96–316)	No.
Do	Make funds specified in the Defense authorizations bill for the B–1 bomber also available for research and development of an advanced technology bomber (Rejected, 153–254)	No.
Do	Reinstate a requirement that the Defense Department reduce the number of its civilian employees in grades GS–13 to GS–18 (Rejected, 142–249)	No.
July 10	Delete a provision in the Defense authorizations bill authorizing the Defense Department to use grants (rather than contracts) for research and procurement (Rejected, 190–194)	No.
July 14	Facilitate the production of oil from tar sands deposits on Federal lands (Approved, 416–0)	Yes.
Do	Delete from the Defense authorizations bill increases in three thresholds on Defense Department purchases: an increase from $10,000 to $25,000 of the ceiling on the use of simplified small purchase procedures; an increase from $100,000 to $500,000 of the minimum amount of cost and pricing data that must be certified by contractors under the Truth in Negotiations Act; an increase from $100,000 to $5 million of the maximum contract that can be negotiated by a service secretary for experimental, development or research work (Rejected, 109–311).	No.
July 15	Amend an amendment to the Defense authorizations bill to permit U.S. Armed Forces personnel to participate, under certain circumstances, in illegal drug seizures or arrests outside the land area of the United States (Approved, 248–168).	No.
Do	Approve the amended amendment allowing the armed services to cooperate with civilian law enforcement officials in operations against drug smuggling (Approved, 362–49)	Yes.
Do	Require that all purchases of computers and computer services for the Defense Department be made through the General Services Administration (Rejected, 118–299)	No.
Do	Amend an amendment to prohibit the armed services from buying autos manufactured outside the United States or Canada unless the Defense Secretary certified to Congress that suitable autos manufactured in the United States or Canada were unavailable (Rejected, 38–371).	No.
July 16	Delete provisions in the Defense appropriations bill requiring selective service registrants to provide their social security numbers and providing for the Departments of Defense, the Treasury and Health and Human Services to share names and addresses of registrants (Rejected, 125–290).	No.
Do	Accept the substitute proposed amendment directing the President to submit to Congress by January 15, 1982, his recommendations for improving the efficiency and management in the Defense Department and for eliminating waste, fraud, abuse and mismanagement there; also directing the President to report on actions taken concerning General Accounting Office (GAO) reports on waste, fraud, abuse and mismanagement in the Defense Department (Approved, 416–0).	Yes.
Do	Prohibit Defense authorizations for research, development, testing, evaluation or procurement of the F/A–18 fighter-attack aircraft, directing instead the $3.1, billion authorized for it be made available for other Navy and Marine Corps aircraft programs (Rejected, 101–316).	Yes.
Do	Bar procurement of A–7K attack planes and use funds earmarked for that plane to buy 13 F–16 fighters instead (Rejected, 148–268)	No.
Do	Final passage of the bill authorizing $136,111,036,000 for Defense Department weapons procurement, military research, operations and maintenance, and civil defense in fiscal 1982 (Approved, 354–63).	Yes.
Do	Allow the House-Senate conference committee on the Defense budget to close meetings to the public when classified information was under consideration (Approved, 381–2)	Yes.
July 17	Resolution calling on the President to: develop and carry out a nuclear non-proliferation policy that would strengthen the barriers to the spread of nuclear weapons and set forth concrete methods for restraint by all nuclear supplier nations; encourage nations to ratify the Non-Proliferation Treaty; work to develop sanctions against nations that divert nuclear supplies from peaceful purposes into nuclear weapons; and fully carry out the Nuclear Non-Proliferation Act of 1978 (Approved, 365–0).	Yes.
Do	Reduce the appropriation for the Office of Policy Development in the Housing and Urban Development Department from $30 million to $20 million (Approved, 202–162)	Yes.
Do	Prohibit the Environmental Protection Agency from spending funds to require States to carry out or enforce programs for vehicle emission-control inspection and maintenance (Rejected, 177–184).	Yes.
July 21	Put the House on record in favor of insuring that current recipients of the social security "minimum benefit" (paid to retirees as an add-on to their regular, or earned benefit) not have their benefits reduced (Approved, 405–13).	Yes.
Do	Cut the appropriation for the National Science Foundation from $1.06 billion to $995 million (Rejected, 152–264)	No.
Do	Appropriate $62,599,958,500 in fiscal 1982 for the Department of Housing and Urban Development and 20 independent agencies (Approved, 362–54)	Yes.
Do	Provide $100 million for administrative expenses of the payments-in-lieu-of-taxes program (Rejected, 96–320)	No.
July 22	Delete $135 million earmarked for the solvent refined coal-conversion demonstration plant at Newman, Ky. (Rejected, 177–236)	No.
Do	Delete $30,000 earmarked for the Franklin Delano Roosevelt Memorial Commission (Rejected, 201–216)	Yes.
Do	Appropriate $11,139,727,000 in fiscal 1982 for the Interior Department and related agencies (Approved, 358–46)	No.
July 24	Delete $228 million for the Clinch River, Tenn., nuclear breeder reactor (Rejected, 186–206)	No.
Do	Transfer $10 million for research at the privately operated Barnwell, S.C., nuclear fuel reprocessing facility to Government nuclear waste research (Rejected, 157–213)	No.
Do	Appropriate $13,189,674,000 in fiscal 1982 for energy and water development programs (Approved, 244–104)	Yes.
July 27	Increase from $300 million to $336.6 million the authorization for fiscal 1982 and following fiscal years for the annual Federal payment to the District of Columbia (Approved, 209–179)	Yes.
Do	Extend for 2 years the District of Columbia mayor's authority to accept certain interim loans from the U.S. Government and to extend the Treasury Secretary's authority to make such loans (Approved, 239–149).	Yes.
Do	Appropriate $22,730,534,000 for the Agriculture Department and related agencies in fiscal 1982 (Approved, 343–33)	Yes.
July 28	Replace the U.S. Travel Service with a new U.S. Travel and Tourism Administration in the Commerce Department and authorize $6.5 million in fiscal 1982 for tourism programs (Approved, 321–98).	Yes.
Do	State Congress opinion that since interest rates are "needlessly and destructively high," Congress and the administration should take actions to reduce future budget deficits, encourage the banking system to provide credit to those who contribute to long-term productivity, and encourage the Federal Reserve to lower interest rates (Approved, 403–17).	Yes.
Do	Make it easier for private companies to produce synthetic fuel from oil shale on Federal lands (Approved, 408–5)	Yes.
Do	Delete $5 million earmarked for the Bureau of Alcohol, Tobacco and Firearms in the Treasury Department (Approved, 279–141)	Yes.
Do	Delete $13.6 million earmarked for the Savings Bond Division of the Treasury Department which promotes the purchase of Government savings bonds (Approved, 223–190)	No.
July 29	Amend the 3-year tax-cut bill to instead provide a 1-year reduction in income tax rates skewed to benefit those earning less than $50,000 per year and to provide narrowly targeted business and investment tax incentives (Rejected, 144–288).	No.
Do	Approve the Conable-Hance substitute tax bill, reducing individual income tax rates by 25 percent across the board over 3 years, to index tax rates to offset bracket creep from inflation beginning in 1985, and providing business and investment tax incentives (Approved, 323–107).	Yes.
July 30	Express the House's sentiment that the United States could not remain indifferent to any internal repression or external aggression against the people of Poland and that such developments would have serious consequences for East-West relations (Approved, 410–1).	Yes.
Do	Restore $13.6 million to the Treasury Department for promotion of U.S. Treasury bonds (Rejected, 203–210)	Yes.
Do	Reduce the funding for the Executive Office of the President to the fiscal 1981 level (Rejected, 164–253)	Yes.
Do	Prohibit the use of funds under the Federal Employees Health Benefit Program for abortions, except when the life of the mother is endangered (Approved, 253–167)	Yes.
Do	Prohibit the Internal Revenue Service from carrying out, or the courts from enforcing IRS regulations to deny tax-exempt status to private schools that discriminate against racial minorities, unless the court order or regulation was in effect before August 22, 1978 (Approved, 337–83).	Yes.
Do	Reduce by $13.6 million the appropriations for the Savings Bond Division of the Treasury Department (Rejected, 182–233)	No.
Do	Appropriate $9,745,292,000 in fiscal 1982 for the Treasury Department, U.S. Postal Service, Executive Office of the President and 10 independent agencies (Approved, 323–94)	Yes.
July 31	Restore the social security "minimum benefit" for persons presently receiving it (Approved, 404–20)	Yes.
August 4	Adopt the conference report on the bill cutting individual income tax rates by 25 percent across the board over 33 months, requiring that individual income taxes be adjusted, or indexed, annually to offset the effects of inflation beginning in 1985, allowing accelerated depreciation for business investment in new assets, and providing special savings and investment incentives (Approved, 282–95).	Yes.
September 9	Delete $241 million for the Legal Services Corporation (Rejected, 122–272)	Yes.
Do	Appropriate $8,683,999,000 for the Departments of State, Justice and Commerce, the Federal judiciary and related agencies (Approved, 245–145)	No.
September 10	Increase funds for the Coast Guard by $84 million (Rejected, 129–260)	Yes.
Do	Reduce funds for the Transportation Secretary's office by $1 million (Approved, 209–172)	Yes.
Do	Increase funds for the Coast Guard by $6.19 million and prohibit the use of funds to reduce civilian employment below the fiscal 1981 level (Approved, 283–98)	Yes.
Do	Bar the use of Transportation Department funds to enforce a rule reducing air traffic at Washington National Airport below the daily levels of July 31, 1981 (Approved, 204–188)	Yes.
September 15	Adopt the conference report appropriating $60,689,970,200 in fiscal 1982 for the Housing and Urban Development Department and 20 related agencies (Approved, 209–197)	Yes.
Do	Increase the pay of senior enlisted military personnel by 18 to 22 percent and the basic pay of junior enlisted personnel by 7 to 9 percent (Rejected, 170–232)	No.
Do	Increase the basic pay of all military personnel by 14.3 percent (Approved, 396–1)	Yes.
September 16	Provide interim spending authority, via a "continuing" resolution, from October 1 to November 1, 1981, for certain Federal agencies whose regular fiscal 1982 appropriations have not become law (Approved, 281–107).	Yes.
Do	Appropriate $6,887,542,000 for military construction projects in fiscal 1982 (Approved, 382–24)	Yes.
September 17	Prohibit U.S. contributions to the United Nations Educational, Scientific and Cultural Organization (UNESCO) if that organization carries out any policy or procedure to license journalists or their publications, censor or otherwise restrict the free flow of information within or among countries, or imposes mandatory codes of journalistic practice or ethics (Approved, 372–19).	Yes.
Do	Authorize fiscal 1982 and 1983 programs of the State Department, International Communication Agency and the Board of International Broadcasting (Rejected, 165–226)	No.
September 22	Proclaim as an honorary U.S. citizen the Swedish diplomat Raoul Wallenberg, who helped Hungarian Jews escape Nazi extermination during World War II and was taken prisoner by the Soviet Union after the war (Approved, 396–2).	Yes.
Do	Express sense of the Congress that the Springbok National Rugby Team of South Africa should not play rugby in the United States (Rejected, 201–198—two-thirds vote majority required for passage).	No.
Do	Authorize $44,000 per year for the Council on Environmental Quality and its staff under the Environmental Quality Improvement Act of 1970, for the fiscal years 1982, 1983, and 1984 (Approved, 360–42).	Yes.
Do	Ban the use of personnel lotteries in hiring District of Columbia police officers and firefighters (Approved, 305–96)	Yes.
Do	Appropriate $2,389,228,200 (composed of $520,570,000 in Federal funds and $1,868,658,200 in city revenues) for operating the District of Columbia government in fiscal 1982 (Approved, 299–105).	Yes.
September 23	Set prison terms of up to 3 years and fines of up to $15,000 for anyone exposing the identity of a U.S. covert intelligence agent with "reason to believe" the exposure might "impair or impede" U.S. intelligence operations (Approved, 226–181).	Yes.
Do	Final approval of the $1,08 billion for the National Science Foundation in fiscal 1982 (Approved, 262–149)	Yes.
September 24	Authorize $3,1 billion in fiscal 1983 for interstate highway construction and to set a limit of $8.2 billion on obligations from the highway trust fund in fiscal 1982 (Approved, 377–25)	Yes.
October 1	Adopt conference report establishing U.S. Travel and Tourism Administration (Approved, 288–112)	Yes.

Date (1981)	Legislative issue	Carney vote
Do	Adopt a resolution disapproving the action of the District of Columbia city council in revising criminal penalties for certain sex-related offenses (Approved, 281–119)	Yes.
Do	Set Federal dairy price supports at $13.10 per hundredweight until November 15, 1981, and delay until then the wheat-producer referendum (Approved, 328–58)	Yes.
October 5	Eliminate a provision in the Voting Rights Act extension legislation that made the signing of a consent decree in a voting-rights lawsuit a bar to bailing out from coverage of the act, if the consent decree were signed within 10 years of a jurisdiction's petition to bail out (Rejected, 92–285).	No.
Do	Allow three-judge Federal district courts to hear petitions by jurisdictions seeking to bail out from coverage of the Voting Rights Act (Rejected, 132–277)	Yes.
Do	Extend key provisions of the 1965 Voting Rights Act (Aproved, 389–24)	Yes.
October 6	Bar enforcement of a provision in the budget reconciliation bill that prohibited medicare and medicaid reimbursement for drugs for which the Food and Drug Administration had not completed an evaluation of their effectiveness (Approved, 271–148).	Yes.
Do	Bar Mine Safety and Health Administration enforcement of regulations relating to the surface mining of stone, clay, colloidal phosphate, sand or gravel (Approved, 254–165)	Yes.
Do	Send the Labor-HHS-Education appropriations bill back to committee for revision (Rejected, 168–249)	No.
Do	Express Congress' deep regret over the assassination of President Anwar el-Sadat of Egypt (Approved, 411–0)	Yes.
October 7	Adopt the conference report for the bill authorizing $4.5 billion for pay raises for military personnel, effective October 1, 1981 (Approved, 417–1)	Yes.
Do	Reduce by $1 billion the Agriculture Committee approved fiscal 1982 spending for farm programs, by lowering sugar and dairy price support levels and making certain farm programs discretionary instead of mandatory (Approved, 400–14).	Yes.
Do	Set the minimum dairy price support level at 70 percent of parity but not less than $13.10 per hundredweight in fiscal 1982 (effectively permitting dairy price supports to rise in fiscal 1983 to a minimum of 75 percent of parity, unless Congress blocked such an increase) (Rejected, 123–277).	No.
Do	Set dairy price support levels at a minimum of 70 percent of parity for fiscal years 1982–85, with certain exceptions (Rejected, 153–243)	Yes.
October 14	Adopt a resolution disapproving the sale to Saudi Arabia of Airborne Warning and Control System (AWACS) radar planes, conformal fuel tanks for F–15 aircraft, AIM–9L Sidewinder missiles and KC–707 aerial refueling aircraft (Approved, 301–111).	Yes.
October 15	Repeal the poundage quota and acreage allotment system for peanuts and eliminate a specified loan rate for peanuts and, instead, to authorize the Agriculture Secretary to determine the loan rate (Approved, 250–159).	Yes.
Do	Eliminate the Federal price support program for sugar (Approved, 213–190)	Yes.
October 20	Designate the fourth Sunday in October as National Mother-in-Law Day (Approved, 305–66)	No.
Do	Authorize the president to issue a proclamation designating the week of November 22, 1981, as National Family Week (Approved, 405–1)	Yes.
Do	Authorize $8,332,000 annually for fiscal 1982 and 1983 for Federal hazardous materials transportation activities and to establish regional training centers for State, local and other personnel to improve enforcement of regulations governing the transportation of hazardous materials and emergency response capability (Approved, 410–2).	Yes.
Do	Authorize $4,544,000 for nonperforming arts functions at the John F. Kennedy Center for the Performing Arts (Approved, 288–123)	No.
Do	Provide discretionary power for establishing a bank to finance U.S. grain exports and to permit the Agriculture Secretary to set a minimum price for U.S. grain sold abroad (Rejected, 138–270).	Yes.
October 21	Direct the Agriculture Secretary, within existing legal authority, to make the tobacco price-support and allotment programs self-supporting, without cost to the Federal budget except for administrative expenses (Approved, 412–0).	Yes.
October 22	Require most food-stamp recipients to pay for a portion of their stamps (Rejected, 147–251)	Yes.
Do	Final passage of requirement that meat produced abroad and sold in the United States be produced without drugs or agricultural chemicals barred for health reasons in the United States (Approved, 211–168).	No.
Do	Exend farm and food program authorizations for only 2 years, instead of 4 (Rejected, 180–193)	Yes.
October 27	Amend the Federal Water Pollution Control Act to authorize $2.4 billion for fiscal 1982 spending (Approved, 382–18)	Yes.
Do	Increase the amount House Members can earn as outside income, from 15 percent to 40 percent of their official salary, and increase from $1,000 to $2,000 what Members can earn for a single speech, article, or personal appearance (Rejected, 147–271).	No.
October 28	Allow States to exempt themselves from the extra 2 months of daylight saving time provided in the Energy Conservation Daylight Saving Act (Rejected, 170–242)	No.
Do	Extend daylight saving time by 2 months, by starting it on the first Sunday of March (Approved, 243–165)	Yes.
November 4	Prohibit construction of U.S. naval vessels or their components in foreign shipyards, except where the President determines it is in the national interest to do so and notifies Congress of that (Approved, 366–21).	Yes.
Do	Mandate establishment of guidelines provided for increased coordination and sharing of medical facilities by the Veterans' Administration and Defense Department (Approved, 386–0)	Yes.
November 12	Allow the conference committee on the authorization of money for national security programs of the Energy Department to hold closed sessions when classified national security information is being considered (Approved, 385–0).	Yes.
November 16	Send the continuing resolution back to committee with instructions to cut 5 percent from discretionary funding in the continuing resolution, except for programs under the defense, military construction, and District of Columbia appropriations bills and social security administrative expenses, veterans' medical care, and food stamps (Rejected, 189–201).	Yes.
November 17	Agree to committee amendments of legislation directing the Transportation Secretary to document the vessel "Capt Tom" for coastwise trade and fishing (Approved, 353–0)	Yes
Do	Approve the conference report authorizing $130,696,451,000 for Defense Department programs in fiscal 1982, including weapons procurement, research and development, operations and maintenance, and civil defense (Approved, 335–61).	Yes.
November 18	Approve the conference report appropriating money for U.S. intelligence operations in fiscal 1982 (Approved, 379–22)	Yes.
Do	Approve the unchanged amendment to delete funding for the B–1 bomber (Rejected, 142–263)	No.
Do	Eliminate funding for the MX missile and basing system (Rejected, 139–264)	No.
Do	Appropriate $197,443,289,000 for Defense Department programs in fiscal 1982 (Approved, 335–61)	Yes.
November 19	Express congressional support for the President's November 18 proposals for reducing strategic and intermediate-range weapons in Europe (Approved, 382–3)	Yes.
Do	Approve the conference report authorizing $5,120,200,000 for Energy Department national security programs in fiscal 1982 (Approved, 355–55)	Yes.
Do	Reduce Federal regulation of the intercity bus industry (Approved, 305–83)	Yes.
Do	Authorize U.S. participation in the multinational peacekeeping force in the Sinai Peninsula after Israeli withdrawal in April 1982, and authorize $125 million as the U.S. share of the peacekeeping force's budget in fiscal 1982 (Approved, 368–13).	Yes.
November 20	Agree to a Senate amendment allowing construction to continue on the Garrison diversion water project in North Dakota which a Federal court had halted (Rejected, 67–314)	No.
Do	Extend the Older Americans Act programs through fiscal 1982 and grant increased administrative flexibility to State and local providers of services to the elderly (Approved, 379–4)	Yes.
November 22	Send the continuing resolution for funding Government agencies without appropriations back to the conference committee for further reductions in spending levels (Rejected, 184–215)	Yes.
Do	Agree to Senate changes allowing additional pay and benefits for air traffic controllers who stayed on the job (Approved, 213–183)	Yes.
December 9	Waive existing antitrust and pricing laws to allow consumers to be billed in advance for the construction of an Alaskan natural gas pipeline (Approved, 233–173)	No.
Do	Bar U.S. foreign economic development aid to Indonesia, a member of the Organization of Petroleum Exporting Countries (OPEC) (Rejected, 55–355)	Yes.
Do	Accept an amendment to the foreign aid bill condemning Libya's support of international terrorism and requiring the President to report to Congress within 6 months possible steps to be taken against Libya (Approved 355–46).	Yes.
Do	Authorize spending $5.7 billion for U.S. foreign aid in fiscal year 1982 and 1983 (Approved, 222–184)	Yes.
December 10	Send the new continuing resolution (allowing funding for Government agencies without regular appropriations through Feb. 15, 1982) back to the Appropriations Committee for further reductions of $1.7 billion in the overall total budget authority (Approved, 222–194).	Yes.
Do	Adopt the second concurrent budget resolution, reaffirming the congressional budget for fiscal years 1982, 1983, and 1984, including sentiment that the Federal budget be balanced by 1984 and that Federal spending be no more than 20.5 percent of the gross national product in fiscal 1984 (Approved, 206–200).	Yes.
December 14	Authorize spending $1.925 billion for Coast Guard operations in fiscal 1982 (Approved, 391–2)	Yes.
Do	Authorize standby emergency petroleum allocation authority for the President in case of a severe oil supply interruption (Approved, 244–136)	Yes.

THE PUBLIC UTILITY FINANCIAL REFORM ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. CORCORAN) is recognized for 10 minutes.

● Mr. CORCORAN. Madam Speaker, I am today introducing the Public Utility Financial Reform Act. The bill would amend section 3 of the Public Utility Holding Company Act of 1935 to facilitate diversification by electric and gas utilities into more profitable, nonutility businesses.

This country's utilities are experiencing serious financial difficulties which, if allowed to continue, would have a devastating impact upon the Nation and its citizens and industry dependent upon reliable electric and gas utility service.

As many of us know, the common stocks of electric utilities are selling well below their book values, and lowered bond ratings have resulted in higher interest charges that are ultimately passed on to consumers. These factors have caused the utility industry, as well as other concerned citizens, to explore the possibilities of diversification as a means of improving the industry's financial performance and stability and contributing to the well-being of the Nation's energy resources.

The act was passed in 1935 to correct a series of abuses by electric and gas utility holding companies, notably excessive pyramiding of corporate structures and stock watering. At the time, a handful of holding companies controlled virtually the entire utility business in the Nation. These holding companies operated in disparate parts of the country and were not subject to effective State regulation.

In the view of the Congress, the power and interstate character of these holding companies rendered State control over such abuses ineffective and required that authority over them be conferred upon the Securities and Exchange Commission. The principal purpose of the act, as noted in the legislative history, was to insure effective State regulation by reorganizing these holding companies into geographically contiguous units. Virtually all of the questionable practices the act was designed to correct were

securities and accounting ones, not unique to the utility industry. As such, they probably would have been eliminated over time by the then-new Securities Act of 1933 and the Securities Exchange Act of 1934, both of which turned out to be far more effective than anticipated. Accounting standards and practices have improved dramatically since the mid-1930's. Moreover, the regulation of public utilities on the State level is considerably more effective today than when the act was passed, since State utility laws have now evolved into strong, comprehensive regulatory systems. Thus, present Federal and State regulation is drastically different from that of the early 1930's, and there is little likelihood those problems would recur in the face of regulatory scrutiny under Federal and State laws other than the act.

The bill allows both independent electric and gas operating companies to form exempt holding companies; it also allows exempt holding companies to diversify without later being subject to arbitrary SEC revocation of their exemptions. The bill would apply to all electric and gas utilities with the exception of registered holding companies.

I recognize that there are a number of issues relating to utility diversification and the act that need to be addressed. I hope introduction of this legislation will encourage early hearings on this subject. Earlier this year, hearings on the subject of least cost energy strategies for the utility industry were held by Chairman OTTINGER'S Energy Conservation and Power Subcommittee. In fact, it was at a September 10 hearing of that subcommittee that I first discussed the possibility of the need for the Congress to consider the impact of the act on the financial health of the utility industry. Subsequently, I sent a questionnaire regarding the act to approximately 150 utility executives and each of the 50 State public service commissions.

In reviewing the act, we must look at the likely impact of diversification on investors and consumers alike. Secondly, one must view utility diversification in the context of the Nation's overall energy posture and the development of its renewable and alternative energy resources. Finally, we should address specific questions that may be of concern to regulators and investors alike, such as whether the holding company structure, with separate corporate subsidiaries for utility and nonutility businesses, as provided in the bill, adequately protects against cross-subsidization between the utility business and the nonutility business and possible competitive effects in the marketplace, particularly among small businesses.

Madam Speaker, I consider the financial health of the utility industry to be an important issue. I look forward to further addressing this matter in the ensuing months.

Madam Speaker, for the benefit of our colleagues, I would like to include in the RECORD at this point the text of the "Public Utility Financial Reform Act."

H.R.—

A bill to amend the Public Utility Holding Company Act of 1935 to improve financial performance of electric and gas utilities by removing unnecessary regulatory impediments to the exercise of sound and prudent business judgment by utility executives

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

Section 1. This Act may be cited as the "Public Utility Financial Reform Act".

FINDINGS

SEC. 2. The Congress hereby finds that—

(1) the electric and gas utility industries in the United States, once strong and stable, are now experiencing serious and intractable financial difficulties, the consequences of which threaten the existence of these vital national resources, together with the citizens and industry of the United States dependent thereon;

(2) while there may be a number of alternatives available to remedy the financial difficulties confronted by the electric and gas utility industries, it is in the best interests of investors and consumers to encourage the most expeditious of those financial remedies;

(3) the diversification of a business portfolio, when done prudently, is recognized as both as technically and operationally sound means of improving corporate financial performance by spreading or countering business risk;

(4) prudently managed diversification into nonutility businesses is a normal business practice that could substantially improve the financial performance of certain electric and gas utilities;

(5) it is in the public interest to remove unnecessary and unintended regulatory impediments to the exercise of sound and prudent business judgment by utility executives;

(6) the Public Utility Holding Company Act of 1935 was intended to correct abuses in the manner in which the utility industry was then conducting its affairs; the legislative intent was not, however, to prevent or interfere with those normal and prudent business practices the benefits of which would accrue to both investors and consumers;

(7) certain provisions of the Public Utility Holding Company Act of 1935 nevertheless act to increase, rather than decrease, business risk in a manner that is detrimental to the interests of investors and consumers by effectively discouraging diversification by electric and gas utilities into non-utility businesses; and

(8) the amendment of the Public Utility Holding Company Act of 1935 to provide for the establishment of a new exemption for holding companies with a subsidiary public-utility company meeting certain defined criteria and the establishment of definitive exemptions would be consistent with the public interest and the interests of investors and consumers and would eliminate those provisions which inhibit normal and prudent business practices.

STATEMENT OF PURPOSES

SEC. 3. The purposes of this Act are—

(1) to facilitate diversification by removing technical restrictions imposed by the Public Utility Holding Company Act of 1935 on those utilities prudently operating in the best interests of their investors and consumers that find it desirable and beneficial to diversify their business activities;

(2) to provide a new exemption under section 3 for a holding company with one subsidiary public-utility company that operates in one or more States contiguous to the State in which such subsidiary public-utility company is organized;

(3) to provide an exemption for holding companies created by companies that are presently exempt under section 3(a)(2) of the Public Utility Holding Company Act of 1935; and

(4) to provide definitive exemptions in subsection (a) of section 3 so as to reduce the regulatory impediments of the exercise of prudent business judgment related to diversification by such utilities.

AMENDMENTS TO THE PUBLIC UTILITY HOLDING COMPANY ACT OF 1935

SEC. 4. Section 3 of the Public Utility Holding Company Act of 1935 is amended to read as follows:

"POWER TO MAKE PARTICULAR EXEMPTIONS REGARDING HOLDING COMPANIES, SUBSIDIARY COMPANIES, AND AFFILIATES

"SEC. 3. (a) The Commission, by rules and regulations upon its own motion, or by order upon application, shall unconditionally exempt any holding company, and every subsidiary company thereof as such, from all provisions of this title, except paragraph (2) of subsection (a) of section 9, if—

"(1) such holding company, and every subsidiary company thereof which is a public-utility company from which such holding company derives, directly or indirectly, any material part of its income, are predominantly intrastate in character and carry on their business substantially in a single State in which such holding company and every such subsidiary company thereof are organized;

"(2) such holding company is predominantly a public-utility company whose operations as such do not extend beyond the State in which it is organized and States contiguous thereto;

"(3) such holding company is only incidentally a holding company, being primarily engaged or interested in one or more businesses other than the business of a public-utility company and (A) not deriving, directly or indirectly, any material part of its income from any one or more subsidiary companies, the principal business of which is that of a public-utility company, or (B) deriving a material part of its income from any one or more such subsidiary companies, if substantially all the outstanding securities of such companies are owned, directly or indirectly, by such holding company;

"(4) such holding company is temporarily a holding company solely by reason of the acquisition of securities for purposes of liquidation or distribution in connection with a bona fide debt previously contracted or in connection with a bona fide arrangement for the underwriting or distribution of securities;

"(5) such holding company is not, and derives no material part of its income, directly or indirectly, from any one or more subsidiary companies which are, a company or companies the principal business of which

within the United States is that of a public-utility company; or

"(6) such holding company has only one subsidiary public-utility company and such subsidiary public-utility company's operations as such do not extend beyond the State in which it is organized and States contiguous thereto.

"(b) If a holding company otherwise qualifies for an exemption pursuant to subsection (a) of this section, that exemption shall not be affected by the ownership by a public-utility subsidiary of such holding company of a public-utility company provided that the ownership of such public-utility company by the public-utility subsidiary of such holding company is exempt pursuant to paragraph (2) of subsection (a) of this section.

"(c) The Commission, by rules and regulations upon its own motion, or by order upon application, shall exempt any subsidiary company, as such, of a holding company from any provision or provisions of this title, the application of which to such subsidiary company the Commission finds is not necessary in the public interest or for the protection of investors, if such subsidiary company derives no material part of its income directly or indirectly, from sources within the United States, and neither it nor any of its subsidiary companies is a public-utility company operating in the United States.

"(d) Within a reasonable time after the receipt of an application for exemption under subsection (a) or (c), the Commission shall enter an order granting, or, after notice and opportunity for hearing, denying or otherwise disposing of such application. The filing of an application in good faith under subsection (a) by a person other than a registered holding company shall exempt the applicant from any obligation, duty, or liability imposed in this title upon the applicant as a holding company until the Commission has acted upon such application. The filing of an application in good faith under subsection (c) shall exempt the applicant from any obligation, duty, or liability imposed in this title upon the applicant as a subsidiary company, until the Commission has acted upon such application. Whenever the Commission on its own motion, or upon application by the holding company or any subsidiary company thereof exempted by any order issued under subsection (a), or by the subsidiary company exempted by any order under subsection (c), finds that the circumstances which gave rise to the exemption no longer exist, the Commission shall by order revoke such order.

"(e) The Commission may, by rules and regulations, conditionally or unconditionally exempt any specified class or classes of persons from the obligations, duties, or liabilities imposed upon such persons as subsidiary companies or affiliates under any provision or provisions of this title, and may provide within the extent of any such exemption that such specified class or classes of persons shall not be deemed subsidiary companies or affiliates within the meaning of any such provision or provisions, if and to the extent that it deems the exemption necessary or appropriate in the public interest or for the protection of investors or consumers and not contrary to the purposes of this title.

"(f) A holding company which is exempt under subsection (a) of this section may engage in any business (or businesses) whether or not any such business is incidental or necessary to the operation of a public-utility company, but any such business (or businesses) which is not incidental or necessary to the operation of a public-utility company shall be conducted through a separate non-utility subsidiary (or subsidiaries) of such holding company.".●

THE MAN FROM COPE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. RODINO) is recognized for 5 minutes.

● Mr. RODINO. Madam Speaker, next month, our good friend, Al Barkan, the man from COPE, will retire after 35 years of political action on behalf of organized labor.

For the last 27 years, since the creation of the AFL-CIO, he has been with that organization's Committee on Political Education. For the last 19 years, he has been COPE's national director.

Throughout his labor-union career, from his early days in his native Bayonne, N.J., Al Barkan has championed the cause of working people through his tireless efforts to reform the political process to the benefit of all Americans.

Al Barkan was pushed into his union career by the oil industry. After he had worked his way through the University of Chicago, earning a degree in economics, Al returned to Bayonne to teach night-school English. He also gave some extracurricular help to some striking oil workers. This earned him the displeasure of a member of the school board, who was also the head of the struck oil company. Al then and there decided he would prefer organizing workers to grading papers. He went to work as a volunteer for the Textile Workers Organizing Committee, thus beginning a relationship with the Textile Workers Union that has lasted a lifetime.

After a 4-year Navy career in World War II, which included running the 1944 campaign of Franklin Roosevelt aboard the U.S.S. *Alabama* and marriage to his wife, Helen, Al returned to his labor union grass roots political activity. It was during his stint as executive director of New Jersey's CIO Council that we met and began a close friendship that has spanned more than three decades. Al joined COPE in 1955 and was appointed director in 1963 by George Meany, another ardent advocate of political action.

Al Barkan is an old-line labor leader, but he was quick to adapt modern technology to the needs and purposes of COPE. In the words of Lane Kirkland:

> Al has worked constantly to sharpen the tools of political action vital to labor's tough and continuing fight for social and economic justice.

Indeed, Al Barkan has been with us in that continuing fight, a fervent, eloquent and innovative force, a reliable leader in the battle for civil rights, health, and safety in the workplace, decent education, reform of labor and election laws.

It is obvious, then, that Al Barkan has done far, far more than help elect candidates with COPE's grass roots campaigns and COPE's dollars. But, make no mistake about it: Al Barkan has been without peer in that aspect of his work. During his stewardship, nearly 63 percent of all COPE-supported candidates for President, the U.S. House of Representatives and the Senate have been elected. More than 140,000 union members and their families take part as volunteers in year-round COPE programs to register voters and get them to the polls. As a result, union members now register and vote in numbers 10 to 15 percent greater than the general electorate, whereas 20 years ago they registered and voted in numbers 10 to 15 percent lower than the general voting public.

This is the legacy of Al Barkan to the labor movement he has served through decades of selfless hard work.

"This movement of ours," Al recently said, "and the people embody all that is strong and good and just in our nation and all that it strives for and reaches to be in its finest moments. For me, there is no other course, no other life I would trade it for."

Now, he is retiring after 43 proud years in what he has justly called the most militant, the most committed, free labor movement in the entire world.

I wish him good luck and Godspeed.

Al Barkan will not easily be replaced. But the standards he has set and the accomplishments he has achieved will be a lasting inspiration to his successor.

FUEL SEVERANCE TAXES CHILL ECONOMIES OF FROST-BELT STATES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Madam Speaker, I came before this body recently to speak about the desperate economic situation which currently exists in the industrial Northeast. At that time I outlined several ways in which this situation could be eased, and even corrected, with the help of Congress. Now, I want to get down to specifics.

Today, I am going to focus on State severance taxes on fuel. We currently have a situation whereby one State is in effect taxing the citizens of another. I am talking about the fuel severance taxes imposed by several States which produce coal and gas. What these States are doing is taxing the coal and oil which is shipped to other States. Montana, for example, tacks on an additional 30 percent to the cost

of coal shipped outside the State. This charge is paid by the purchaser of the coal, be it a utility or oil company. Ultimately, of course, it is passed along to the consumers of those importing States. By 1987, if nothing is done, Montana and Wyoming will reap $240 million a year in coal severance taxes from the consumers in just eight States, namely: Illinois, Minnesota, Iowa, Indiana, Wisconsin, Michigan, Ohio, and New York. The State of Montana is fortunate enough to have one-fourth of this country's low-sulfur coal deposits. Low-sulfur coal is a necessity in Northeastern States.

This is an outrageous situation. What if every State in the Union imposed taxes on those items which are abundant within their boundaries. Florida could tax oranges, Kansas could tax wheat, and Alabama cotton. If we are truly a Union, what justification can one State have to severely tax another for something that it cannot produce itself, yet needs to survive? The same situation exists with a tax on oil produced by Texas, Alaska, Louisiana, and California. These States stand to make $120 billion in taxes during the 1980's and that figure is based on the low estimate of oil being sold at $30 a barrel.

There have been hearings in the House on legislation which would limit coal severance taxes to 12.5 percent. Passage of this bill would be reasonable and just. It would also be a way to help the industrial Northeast without affecting the Federal budget. Not only should this legislation be enacted, but there should also be similar legislation for oil severance taxes. We cannot continue to pit ourselves against one another in economic wars. The Northeast needs oil and coal, it always will. States which have these resources should be able to derive income from their good fortune, but they should not be able to shamelessly tax the consumers of fellow States, placing additional financial burdens on already troubled regional economies.

We are on a course of becoming two nations, one rich, and one broke. It cannot continue. Correcting the fuel severance tax situation is a start, but there is more that can be done. I'll be back to tell you about that.●

UNFAIR CONFINEMENT OF CHAPLAIN JOHN WARD

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. HIGHTOWER) is recognized for 5 minutes.

Mr. HIGHTOWER. Madam Speaker, a few years ago I saw a book entitled "Military Justice Is to Justice What Military Music Is to Music." I did not read the book, but the title indicates that it was probably a harsh treatment of our system of military justice. I have had some experience in recent weeks evaluating the treatment of one of my constitutents that makes me want to look again at the system.

I would like to bring to my colleagues' attention the unjustified confinement of my constituent, Chaplain John D. Ward, captain in the U.S. Air Force. John Ward was convicted, by courts martial, of falsifying travel vouchers, theft of $430 and fraudulently obtaining government services. He was sentenced to 2 years of confinement at hard labor, forfeiture of $800 per month and a reprimand. He is appealing this conviction, as is his right. Currently, he is in confinement at Fort Leavenworth, Kans., pending a review of his case.

The primary reason for confinement is to prevent an individual from fleeing the jurisdiction in order to avoid incarceration. This is not the case with John Ward. He has stated that if he is unable to clear himself of these charges, he will serve his punishment willingly. John Ward has given nearly 18 years of service to this country. Prior to this matter, his record is without blemish. He is a minister, married, and a father of five. Previous officer evaluations included in his record, as well as numerous letters of support sympathizing with Chaplain Ward's situation, show him to be well-liked and respected by his superiors, his peers and the community. This is a man with a stake in society; hardly someone who would need to be restrained while attempting to clear his good name. Following sentencing by the courts-martial in May, Captain Ward was granted a deferment of confinement until action by the convening authority and was even allowed to travel to the United States for 30 days. Why, then, is it necessary to restrain him now?

I am shocked and surprised at the commanding officer's decision to confine John Ward at Fort Leavenworth and protest his harsh and unfair treatment during these proceedings. If this is standard procedure, perhaps it is time to introduce legislation to mandate release unless it seems likely the person will flee. Military justice must not become a lesser form of justice.

SIMILARITIES BETWEEN THE PEOPLE OF NEW YORK AND THE PEOPLE OF SOUTH DAKOTA

The SPEAKER pro tempore (Mr. HIGHTOWER). Under a previous order of the House, the gentlewoman from New York (Ms. FERRARO) is recognized for 60 minutes.

Ms. FERRARO. Mr. Speaker, the weekend of November 13, I had the opportunity to visit the State of South Dakota as the guest of the Sioux Valley Empire Electric Association, the rural electric cooperative that serves southeastern South Dakota. My good friend TOM DASCHLE and his staff were also extremely helpful in planning my stay and making it a very informative and pleasureable experience. I want to share a bit of that experience with my colleagues tonight.

To tell the truth, my initial reaction to the invitation I received from the Sioux Valley people was "South Dakota? Me? Why?" I had never been to South Dakota. I had no experience with the rural electric cooperatives. In fact, as a Representative from Queens in New York City, I had not much experience with rural anything.

Still, I welcomed the opportunity to visit South Dakota to see how the farmers of our Nation live. It didn't take a lot of time to determine there were a great many differences between the First Congressional District in South Dakota and the Ninth Congressional District in New York. But a quick check on some basic facts and figures also showed some amazing comparisons.

Congressman DASCHLE has a district that covers over 15,000 square miles. Mine covers roughly 20 miles. The distance between his district offices in Sioux Falls and Aberdeen is greater than the distance between my New York office and my Washington office.

Tom has thousands of farms in his district, covering millions of acres. I learned from the New York Department of Agriculture that in 1972, the last time anybody bothered to check, there were exactly 13 farms in all of Queens County—which comprises not only my congressional district but three whole and three partial congressional districts—and they covered about 15 acres. I have 22,000 consumers in a square mile in my district to his four farmers per square mile.

Another difference emerged from the materials that had been provided by the Sioux Valley Electric people regarding the service they offered. Sioux Valley has an average 1.72 consumers per mile of line. That compares with Con Ed in New York, which has almost 70 consumers per mile of line but lines are duplicated and triplicated so the figures are much higher.

So it was clear there were differences.

But, of course, there were also similarities, beginning with the fact that while New York City is not exactly loaded with prime agricultural lands, much of New York State is heavily agricultural, so as I learned about South Dakota's agriculture, I also learned some things about New York agriculture.

One of the things that I must admit surprised me was the fact that, contrary to any general impression of South Dakota as a farm State and New York as an industrial State, there is very little difference between total agricultural production in the two

States. In fact, according to the USDA, New York ranks 23d in agricultural receipts, and South Dakota ranks 22d.

But there were other similarities as well. Similarities in the type of people who live in the First District of South Dakota and the Ninth in New York. Similarities in the problems they are facing today. Similarities in how they have attempted to solve their problems.

I would like to take just a few minutes to talk about some of the things I learned in South Dakota.

The first stop was the Earth Resource Observation Service (EROS) center. EROS was the first example I would see of the concern of South Dakotans for the future. What they do, and it was fascinating, is to use remote-sensing techniques to monitor Earth resources.

Remote-sensing techniques can be used for inventorying the Earth's resources, including oil, gas, copper, and other minerals as well as water. It has been used to detect changes in the land to monitor strip mining and reclamation of strip mines and for gaging the environmental impact of the Alaskan pipeline. It's a great tool for keeping track of what's happening to the Earth so we can make the most of our resources while protecting them for future generations.

On Saturday, the second day of my visit, I had the chance to visit with three South Dakota farm families. Basically, the conversations I had with the three families—the Knutsens, the Gerringers, and the Halls—provided the greatest evidence of the fundamental similarities between South Dakota and Queens.

In rural South Dakota, and in urban and suburban Queens, the people basically wanted the same thing from their government. Not a handout, but an honest chance to make it on their own.

Throughout my stay, I was amazed at the similarities between the Norwegians of South Dakota and the Italians and Greeks of Queens. All hard-working, family oriented people. What they did for a living differed, but their willingness, and their desire, to work for a living was the same.

And their problems were the same.

An erratic economy that keeps the costs of doing business high, forces unemployment in Queens and forces farmers like the Knutsens, Gerringers, and Halls to borrow, borrow, borrow against the ever-rising value of their land, because it's the only way they can keep going.

As a matter of fact, in a recent Washington Post, far from Bruce and Bushnell, South Dakota, there was a report of a new study which found that American farmers are in serious trouble because of debts exceeding $160 billion.

I can pretty much guarantee you that those South Dakota farmers had not read the Post, and I doubt whether they have heard of the Cornucopia Project, which conducted the study.

But they can tell you more than you would ever want to know about the problems facing farmers who have borrowed to the hilt against their farms and who are fighting a constantly uphill battle becasue of low-market prices for their crops and high-production costs for feed, and fuel, and supplies.

In fact, with regard to low-market prices for crops, Cec Hall gave me some numbers that are really stunning. We have all seen the commercials that IBM runs on television saying that if prices generally had declined in recent years in real terms the way computer costs have, steak would cost a nickel or so a pound, and a suit of clothes would cost $10, and everything would be pretty terrific.

Well, when Cec Hall started farming in 1947—that is 34 year ago—the price of corn was $2.40 a bushel. Today, it is $2.05 a bushel. And those figures are not in constant dollars. Actually, if you adjust the figures to reflect the change in the consumer price index since 1947, that $2.05 a bushel that Cec Hall is getting is really worth less than 52¢ a bushel. And the $2.40 he got in 1947, if it had kept up with the CPI, would now be $8.85.

What truly astounded me about the prices the farmers are getting for their crops and their financial problems is the fact that food prices are a major issue in New York as well, but for exactly the opposite reason. A big part of the increase in the consumer price index in recent years has been increases in food prices.

The cost of living in New York is the highest in the country, and food prices have a lot to do with it. Too many middle class and working class families in New York, for whom sirloin used to be affordable, are now finding hamburger a luxury.

It is a terrible situation. The people growing the food are going broke trying to stay in business, and the people who need the food are going broke trying to buy it. Clearly the high prices being paid by my people in New York are not doing the farmers any good, but somebody somewhere is making money.

Part of the problem lies in transportation costs. The Washington Post article to which I referred earlier reports that for every $2 spent growing food, another $1 is spent transporting it, and all that gets passed on to the consumer but does the farmer no good.

While rising energy costs plague everybody, farmers and consumers alike, at least the farmers know they can eat when times are tough. For my people, particularly the elderly and the poor, the approach of winter may mean a choice between freezing or starving. None of us, from any part of the country, can turn our backs on these issues.

My trip to South Dakota has helped me understand the problems facing farmers, and to see more clearly how they contrast with the problems facing my people in Queens. I do not have the solutions, but I do have a better picture of how things work.

Interest rates are a particular killer for family farms in South Dakota, just as they are for small businessmen and women in Queens. Melvin Knutson cannot afford to replenish his pig stock because he would have to borrow the money to buy the pigs, and the interest payments on the borrowed money would be more than his profits on selling the pigs after he paid for feed and other expenses.

The problems these farmers are having making a living lead to other problems in rural America. Because it is so tough to make a living, and because the only thing they have that keeps its value is their land, they are frequently tempted to sell the land and move to the city. This causes several problems.

The only people who can afford to buy land at today's prices are big corporations—they are called "faceless farmers" in South Dakota. They buy up the land, grow whatever they can make the most money from on it, and either pocket the profits or write off the losses against their taxes. The result is the degradation of fertile cropland, which is one of the most serious problems facing all Americans today, and the centralization of control of agriculture, which can only lead to price manipulation that costs my people in New York money in higher grocery prices.

Another problem caused by the soaring land prices is that young people cannot afford to buy land to get started. It is really a sickening parallel to the problem of young people in my district who cannot afford to start a business or buy a home because they cannot get the money.

In any event, the consolidation of land ownership by large corporations is a growing problem. The Cornucopia Study found that 1 percent of farmland owners control 30 percent of the farmland, and the trend is worsening.

The last subject I wanted to discuss is my meeting with officials of the Sioux Valley Electric Cooperative. The Rural Electrification Administration was one of the prime targets of the Reagan budget cutting program. Thanks in large part to the efforts of TOM DASCHLE and other rural representatives, most of the REA's functions were saved.

But what I came to understand while I was in South Dakota was the absolute shortsightedness of the attempt to cut REA. It may be that REA

is more responsible than any other agency for the prosperity of rural America.

REA, I learned, is in the business of guaranteeing loans to local cooperatives, and the loans are repaid, with interest. I was reminded of the New York City loan guarantees, which also were repaid, in full, on time, with interest.

There is another parallel between economic conditions in New York City and in South Dakota that strikes me when I consider REA. The REA operates on low-interest loans. One of the most serious problems facing many neighborhoods in my district is the deterioration of older housing.

There has been a Federal program, a low-interest loan program like REA, that has dealt with this housing problem in New York and other cities. The section 312 program provided homeowners with money at below market rates so they could make home improvements that not only increased the value of their homes but also kept their neighborhoods pleasant places to live.

Unfortunately, the 312 program did not fare as well in the budget cutting as the REA's did. As a result, many homeowners in Queens face a problem totally alien to the farmers I visited. While the farm land is soaring in value, the value of homes in some parts of Queens is actually depreciating, and the neighborhoods are failing. To cut the Federal 312 program is as shortsighted as to cut the REA program.

All these programs—rural electrification, the New York City loan guarantees, the section 312 loans—are investments in America, investments in people. It might be a little hard to see at first, but the connection between the well-being of farmers in rural South Dakota and municipal employee union members in New York City is much closer than we normally think.

It is a little strange, but that weekend, while OMB Director David Stockman was in the headlines for saying some things I agreed with, I was thinking of something he had said months ago that I strongly disagreed with.

In February, the Reagan-Stockman duo submitted to Congress their booklet of budget cuts titled "America's New Beginning: A Program for Economic Recovery."

In the section titled "Applying Sound Criteria to Economic Subsidy Programs," on the subject of mass transit operating assistance, Mr. Stockman wrote, ". . . there is no reason for someone in Sioux Falls to pay Federal taxes so that someone in Los Angeles can get to work on time by public transportation."

Well, I guess they could just as well have said there's no reason for someone in Los Angeles, or New York to pay Federal taxes so someone in Sioux Falls can benefit from rural electrification, or commodity price supports, or federally subsidized irrigation projects.

And they would have been just as wrong.

The fact is we are all in this together. Just as the people of New York depend on the farmers of South Dakota to provide their food, the farmers need the people of New York as a market for their products. And the subway service that seems irrelevant in Sioux Falls is critical to New Yorkers getting to work each day, so they can afford to buy the products produced on the farm.

The point, I guess, is that we too often think in terms of rural versus urban, or Sunbelt versus Snowbelt. What I have learned is that it's too easy to concentrate on our own problems and ignore the problems facing people in other parts of the country. If we are going to achieve economic prosperity for all, we are going to have to pull together.

There is one last thing I want to mention.

The conference report on the farm bill will be on the floor tomorrow, and it provides a perfect example of the reasons consumers and producers alike are dissatisfied with the current state of our farm economy. The conferees decided, against the wishes of the House, to restore the peanut and sugar price support programs to the bill. These provisions add costs and inefficiencies to farm production, which causes the consumers I represent to oppose the bill.

At the same time, the bill contains target and loan prices for basic farm commodities that will set those prices at the lowest levels, as a percent of parity, in half a century.

Low prices for farmers are not exactly news. Farm income has declined 3 years in a row, from $32 billion in 1979 to a projected $15 billion in 1982. With income declining, farmers are forced to borrow just to pay the interest on the money they already owe. Recent USDA statistics show farm debt is now eight times higher than farm income. And despite the credit crunch, this farm bill makes credit harder to get by making the economic emergency loan program discretionary.

So the situation is rising prices for consumers, falling income for producers, and a new coalition forming between rural and urban members in opposition to farm programs. I am going to vote against the farm bill conference report tomorrow. I am going to vote against it because of the sugar and peanut provisions that are bad for my consumers, but also because I learned in South Dakota that the target and loan prices are bad for the farmers.

Finally, I want to thank TOM DASCHLE and all the people from Sioux Valley Electric, particularly Virg Herriot, for a thoroughly informative 2 days. I think I have learned some things that will make me a better Member of Congress.

□ 1930

Mr. DASCHLE. Mr. Speaker, will the gentlewoman yield?

Ms. FERRARO. I yield to the gentleman from South Dakota.

Mr. DASCHLE. I want to commend the gentlewoman on what I think is one of the finest statements I have heard about the perception that one from an urban area has toward a rural area, but also about the tremendous relationship and similarities that exist with rural and urban people.

"Congress Country" was really designed for somewhat of a special interest, and that was to educate people from rural areas about the problems and the idea and the way of life in rural America, and that is the large reason why the gentlewoman from New York was invited to come to South Dakota, to tell you about the tremendous devastation that exists economically today, about the incredibly high-interest rates, the low cost of production, about the fact that indebtedness now is eight times what it was in 1950, about the fact that we have seen a decline in farms by more than 6,000 since 1959.

Those were the kinds of things we wanted to impress upon the gentlewoman from New York and indeed I think we did, judging from the statement she has just made.

But something we did not fully realize and appreciate was what we learned from her. She came as an eloquent spokesman, a dynamic spokesman for that part of New York City that she represents, and really for all urban areas. She came to tell us about the incredible impact that unemployment has had, about the need for rural support for many of the programs that she has so eloquently enunciated her support for over the years, about the impact that high-food prices and those commodities had on her senior citizens, about the fact that small businessmen in her State and her district are having just as incredible a time in coping with the Reagan economic program and with the high-interest rates that we are all faced with today, as my farmers are in South Dakota.

So indeed, she did probably as excellent a job as any Congresswoman or any Congressperson has in my experience in South Dakota government and representation.

So I commend her for not only her eloquence in enunciating the problems and concerns of urban America, but for so clearly describing her percep-

tions of what rural America is all about.

There are a number of similarities between urban and rural America and I think that the single most important one as we face the remaining days of this session of Congress is our combined opposition to the current farm bill. She has indicated some reasons why it is a bad bill. I only want to reiterate those and other reasons why I believe this farm legislation needs to be defeated.

Certainly we can do a better job. Certainly if we defeat the bill tomorrow we will do a better job. But if we are going to defeat it, it is going to take the understanding that she has articulated in her speech along with the commitment of urban and rural people alike that we understand the demise of family farms and we understand what ramifications that has for all of us. That is I think the reason why she joined us in her opposition and certainly it is very welcome.

I cannot say with any more sincerity how grateful all of us are in South Dakota for her visit in 2 days. She taught us a lot. She was willing to listen. And indeed from that we have all learned a great deal. I thank her for this time.

Ms. FERRARO. I thank the gentleman for his comments.

Again as I have said, we are all in this together and I mentioned on so many occasions when I spoke with the gentleman's constituents, there is so much of the pie and fairness dictates that everybody gets a piece, and I think that rural and urban America working together to guarantee fairness is the direction that is going to be the good direction for this country to go.

Mr. DASCHLE. If the gentlewoman will yield further, I want to say that as issues confronting New York come before us, I certainly have a very distinct interest in listening to the gentlewoman's advice, to follow her guidance as she pursues these issues, and I expect to work very closely with her in the years ahead.

Ms. FERRARO. I thank the gentleman.

AGRICULTURE AND FOOD ACT OF 1981

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. DE LA GARZA) is recognized for 30 minutes.

● Mr. DE LA GARZA. Mr. Speaker, I have some information which will be, I hope, helpful to the Members in considering S. 884, the Agriculture and Food Act of 1981:

Without passage of new legislation, price support and production adjustment provisions of the 1977 Act for the major commodities will revert to permanent legislation—the 1949 Act for price support and 1938 Act for marketing quotas and acreage allotments.

DAIRY

Conference report

Milk price support at not less than $13.10 per hundred pounds for fiscal 1982. For fiscal years 1983, 1984 and 1985, the minimums would be $13.25, $14.00 and $14.60 if surplus purchases during the year are projected at more than $1 billion. For any year in which purchases are projected at less than $1 billion, the minimum would be 70 percent of parity. The support floor would rise to 75 percent of parity if projected surplus purchases are less than 4 billion pounds of milk in fiscal 1983, 3.5 billion in fiscal 1984, and 2.69 billion for fiscal 1985.

Basic law

Beginning January 1, support would range between 75 and 90 percent of parity depending on supply levels, adjusted annually, and beginning April 1983, semiannual adjustments would be required to maintain support at a minimum of 75 percent of parity as of such date. On January 1, support would rise to $13.49 per cwt., costing an estimated $379 million more in fiscal year 1982 than if the support remained at $13.10 per cwt.

WHEAT

Conference report

Wheat target prices at not less than $4.05 per bushel for the 1982 crop (compared with $3.81 for 1981), $4.30 for 1983, $4.45 for 1984 and $4.65 for 1985. Price support loan rates for the 1982-85 crops would be not less than $3.55 per bushel (compared with $3.20 for 1981). No acreage allotments would apply.

Basic law

Per recent legislation, a referendum would be conducted not later than December 31 to determine whether wheat producers are in favor of a marketing quota for the 1982 crop. Farm allotments must be determined regardless of the outcome of the referendum.

If quotas are disapproved, the support loan rate would be 50 percent of parity (about $3.77 per bushel) for allotment wheat.

If quotas are approved by at least ⅔ of the producers voting, price support on wheat used domestically for food would be at 65 to 90 percent of parity ($3.90 to $6.79 per bushel), a portion in the form of loans and the balance in the form of certificate payments paid for by processors. Cash penalties would apply to wheat grown outside of allotments. There would be no target prices or deficiency payments.

The cost of the wheat program for fiscal year 1983 would be about $491 to $1,106 million higher than the conference provisons.

CORN

Conference report

Corn target prices at not less than $2.70 per bushel on the 1982 crop (compared with $2.40 for 1981), $2.86 for 1983, $3.03 for 1984 and $3.18 for 1985. Price support loan rates for corn would be not less than $2.55 per bushel in 1982-85 (compared with $2.40 in 1981).

Basic law

Price support through loans and purchases would be at 50 to 90 percent of parity ($2.73 to $4.91 per bushel) beginning with the 1982 crop. There would be no target prices or deficiency payments. If there is an acreage diversion in effect, the minimum price support is 65 percent of parity. No allotments or marketing quotas are applicable. The cost of the feed grain program in fiscal year 1983 under the reversion would exceed the cost of the conference provisions by $208 million.

UPLAND COTTON

Conference report

Loan rates based on a percentage of open market prices and a loan floor of 55 cents a pound (57 cents assumed for the 1982 crop). Target prices will be the higher of (a) 120 percent of the loan rate, or (b) 71 cents a pound in 1982, 76 cents in 1983, 81 cents in 1984 and 86 cents in 1985. No acreage allotments would apply.

Basic law

A national marketing quota was proclaimed on October 15. A referendum must be held prior to December 31, per recent legislation. The minimum allotment is 16 million acres—less than is expected to be planted in 1982. Cotton production has shifted away from the States where the allotments are presently held. Allotments cannot be transferred across State lines.

Price support must be between 65 and 90 percent of parity (82.6 to 114.3 cents per pound) if the quota is approved in the referendum. In such case, cash penalties would apply to cotton grown outside of allotments. There would be no target prices or deficiency payments. If quotas are not approved, support is at 50 percent of parity (63.5 cents). For fiscal year 1983, the cotton program would cost $28 million more under reversion than under the conference bill.

RICE

Conference report

Acreage allotments would be eliminated so that program benefits become available to all producers. The rice loan rate will continue to be 75 percent of the target ($8.14 per cwt. for the 1982 crop). Target prices will be not less than $10.85 per hundred pounds for 1982, $11.40 for 1983, $11.90 for 1984, and $12.40 for 1985.

Basic law

Acreage allotment and marketing quota authority would be applicable. A referendum must be held within 30 days of an announcement of the quota (not later than January 30). Quotas would be in effect unless rejected by at least ⅓ of rice producers voting.

When a quota is in effect, price support is between 65 and 90 percent of parity ($14.61 to $20.23 per cwt.). In such case, cash penalties would apply to rice grown outside of allotments. There would be no target prices or deficiency payments. If the quota is not in effect, price support is at 65 percent of parity. For fiscal year 1983, the cost of the rice program is projected $52 million higher under reversion than under the conference provisions. Over $500 million for export subsidies could also be paid.

PEANUTS

Conference report

The bill eliminates the traditional peanut acreage allotment system, allowing producers without allotments to grow peanuts without restraint, but retains the farm poundage quota system. The total national poundage quota would be reduced in 1982 to a minimum of 1.2 million tons, and would be dropped further to 1.1673 million tons in 1983, 1.1347 million tons in 1984 and a final floor of 1.100 million tons for the 1985 crop. Price support for quota peanuts grown within the farm poundage quota would be set at a minimum of $550 per ton for 1982-85, with annual increases beginning in 1983

to reflect increases in production costs (but with a 6 percent limit on each annual adjustment). Support for non-quota peanuts would be set by the Secretary, based generally on world market conditions and fixed at a rate which would avoid any net cost to the government.

Basic law

Marketing quotas were announced on December 1. Price support would be at 75 to 90 percent of parity ($701 to $841 per ton) since quotas would be in effect. If quotas was not in effect, support would be at 50 percent of parity ($467 per ton). The differentiation between "quota" and "additional" peanuts would not exist. Cash penalties would apply to peanuts grown outside allotments. The cost of the peanut program in fiscal year 1983 is projected $189 million higher under reversion.

SOYBEANS

Confence report

Price support loan rates for the 1982–85 crops will be set at 75 percent of the five-year national average price received by farmers with a floor of $5.02 a bushel ($5.02 a bushel assumed for 1982 crop). No production adjustment, cross-compliance requirements or reserve programs would be permitted.

Basic law

Mandatory price support for soybeans would end with the 1981 crop. For the 1982 and subsequent crops, if support were provided for soybeans it must also be provided for cottonseed.

WOOL AND MOHAIR

Conference report

The support level for 1982 through 1985 would be 77.5 percent of the rate determined under a formula contained in the basic wool-mohair law (for 1982, $1.37 per pound).

Basic law

The current program of support at 85 percent of the formula price will expire on December 31. Discretionary authority for price support beyond this date is contained in the 1949 Act. Price support through loans, purchases, or other operations may be provided at 75 to 90 percent of parity. If there were a wool program for the 1982–83 marketing year, support for shorn wool would be at $1.49 to $1.79 per pound.

SUGAR

Conference report

The bill sets up a four-year program with a purchase program on the 1982 crop at 16.75 cents a pound for raw sugar, and beginning October 1, 1982, loan rates of 17 cents a pound on raw sugar for the 1982 crop, 17.50 cents a pound for 1983, 17.75 cents a pound for 1984 and 18 cents a pound for 1985.

Basic law

No program required under basic law.

COMMODITY COST OF REVERSION TO BASIC LAW

For fiscal year 1982, reversion would cost $0.7 to $1.6 billion more than the conference provisions. For fiscal year 1983, the cost of reversion exceeds that of the conference provisions by $2.1 to $2.9 billion.

COMPARISON OF ESTIMATED COC NET OUTLAYS FOR S. 884 AS REPORTED BY THE CONFERENCE AND REVERSION TO BASIC LEGISLATION

[In millions of dollars by fiscal years]

	1982	1983	1984	1985	1986	1982–86 total
Wheat:[1]

Reversion:						
Yes	527	1,000				
No	415	840				
Total COC outlays:						
Conference	4,278	1,749	2,103	1,652	1,265	11,047
Reversion:						
Yes	5,876	4665				
No	4,952	3,859				

[1] Referendum required. Analysis done with both "yes" and "no" vote for wheat and cotton.

Calculations—omnibus farm bill S. 884

Fiscal year 1982:	*Billions*
Reversion "yes" votes on various referenda	$5.876
Conference bill	4.278
Difference	1.598
Reversion "no" votes on various referenda	$4.952
Conference bill	4.952
Difference	.674

In other words, in fiscal year 1982 additional Commodity Credit Corporation (CCC) outlays would range from 674 million to 1.598 billion if permanent law went back into effect.

Fiscal year 1983:	*Billions*
Reversion "yes" votes on various referenda	$4.665
Conference bill	1.749
Difference	2.916
Reversion "no" votes on various referenda	$3.859
Conference bill	1.749
Difference	2.110

In other words, in fiscal year 1983 additional CCC outlays would range from $2.110 billion to $2.916 billion if permanent law went back into effect.

Totals for two-year period—fiscal years 1982 and 1983:

If "yes" vote on referenda:	*Billions*
1982	$1.598
1983	2.916
Total	4.514
If "no" vote on referenda:	
1982	$.674
1983	2.110
Total	2.884

SUMMARY

In other words, if the conference bill is defeated and permanent law were implemented during the next two years, additional CCC outlays would run from $2.884 billion to $4.514 billion. There would, of course, be continuing increased outlays in fiscal year 1984 and beyond.

ORPHAN DRUG ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. WAXMAN) is recognized for 5 minutes.

● Mr. WAXMAN. Mr. Speaker, today I am introducing the Orphan Drug Act. This legislation will encourage pharmaceutical companies to develop drugs for rare diseases, like Huntington's disease, myoclonus, ALS (Lou Gehrig's disease), Tourette syndrome and muscular dystrophy. I hope all Members will join me in supporting this important bill.

Fifty years ago we could not have dreamed of the miraculous breakthroughs in medical care which have occurred as a result of the development of new drugs. Indeed we are fortunate to live in a country that has committed tremendous resources to pharmaceutical research and development. In 1979 pharmaceutical companies spent approximately $1.2 billion on drug research and development in this country. Amid these successes though, we must not overlook one of the most serious human tragedies of our time. There are millions of Americans who are affected by rare diseases or conditions, but successful drugs to treat them, commonly called orphan drugs, have not been developed and are not expected to be developed.

The problem with orphan drugs is that, because so few individuals are affected by any one rare disease, the costs of developing a drug are greater than the relatively small revenues generated by it. For example, Huntington's disease affects only about 14,000 people; myoclonus about 2,000; ALS about 9,000; Tourette syndrome about 100,000; and muscular dystrophys about 200,000. Consequently, the pharmaceutical company which develops a drug for a rare disease can reasonably expect to incur a financial loss.

Under these circumstances many promising orphan drugs will not be developed. The Orphan Drug Act will change this outlook. It creates new financial incentives to develop orphan drugs; it reduces the costs of orphan drug development by providing new

flexibility in our drug approval process without compromising the safety or efficacy of the drugs; and it assures better coordination of those Government agencies, like the National Institutes of Health, which are involved in drug research and testing. With this legislation we can be confident that a pharmaceutical company which discovers a promising orphan drug or uncovers an important research lead can and will pursue it until a new drug is available to the public.

The Pharmaceutical Manufacturers Association and its member companies are also addressing this difficult issue through the creation of the Commission on Drugs for Rare Diseases. As stated in the Commission's charter, it will "serve as a clearinghouse to which academic and other scientific investigators or institutions can submit information on promising compounds or basic research leads for wide distribution to * * * the drug industry and other interested parties." The Commission will perform the very useful function of giving independent (noncompany) investigators a forum to present the merits of their discoveries.

I am pleased the Commission has begun this important work and believe the Orphan Drug Act will serve the Commission well. In addition to giving pharmaceutical companies incentives to commit their own researchers to the creation of orphan drugs, the act will also enable the companies to commit necessary resources in pursuit of the discoveries of independent scientists. The Orphan Drug Act and the Commission will bring us new orphan drugs to combat rare diseases.

Many members will recognize the Orphan Drug Act as the successor bill to Mr. WEISS' H.R. 1663 which has 77 cosponsors. It is through Mr. WEISS' leadership that the orphan drug problem has been presented to this Congress. I am pleased that Mr. WEISS has joined me in sponsoring the Orphan Drug Act.

Rare diseases not only cause significant human suffering; but they cost this country billions of dollars a year in treatment costs, personal income lost due to illness, and productivity lost by absence from work. The Orphan Drug Act will promote the development of orphan drugs to treat these diseases.

ORPHAN DRUG ACT—SECTION-BY-SECTION EXPLANATION

Section 1: Statement of Congressional findings regarding the need to make changes in applicable Federal laws to promote the development of drugs for rare diseases, which are commonly called orphan drugs.

Section 2: This section amends the Federal Food, Drug and Cosmetic Act (FFDCA) to authorize the FDA to approve a new drug for a rare disease based on one adequate and well-controlled human clinical trial if that trial proves that the drug is effective. All drugs currently must have two adequate and well-controlled human clinical trials. If the FDA determined that the one trial did not prove the efficacy of the drug, an additional trial would be required. This section does not change the current requirements that a drug be proven safe.

Section 3: This section amends the FFDCA to authorize the FDA to require the manufacturer of an approved drug for a rare disease to establish and maintain a system for collecting data about the drug's effectiveness when in public use.

Section 4: This section amends the FFDCA to authorize the FDA to make drugs for rare diseases, which are still being tested, available for treatment on a limited basis if there is no alternative drug treatment or therapy for the rare disease for which the drug is being tested.

This section also amends the FFDCA to require FDA, at the request of a sponsor of a drug, to designate that drug as a drug for a rare disease if the FDA determines that the drug is for a rare disease. If FDA designates a drug, notice of the designation must be made available to the public.

Section 5: This section amends the FFDCA to establish for a drug for a rare disease which is not patentable, a seven year period of exclusive marketing beginning with the date the drug is approved by FDA.

Section 6: This section establishes in the Department of Health and Human Services (HHS) an interagency committee on orphan drug development. The Committee is comprised of Federal employees from agencies involved in drug research and testing. The Committee's mandate is to evaluate and coordinate governmental activities concerning drugs for rare diseases and to promote the development of such drugs. The Committee would report annually to the Congress.

Section 7: This section amends the Internal Revenue Code to establish a tax credit for a taxable year for any pharmaceutical company developing a drug for a rare disease. The credit would be an amount equal to the research costs during the taxable year attributable to human clinical testing of such a drug.●

STATE OF THE PARKS BILL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Nebraska (Mr. BEREUTER) is recognized for 10 minutes.

Mr. BEREUTER. Mr. Speaker, on Thursday of last week I introduced a bill, H.R. 5162, which is designed to focus stronger public, administration and congressional attention onto the plight of our national park system. I will henceforth refer to this as the state of the parks bill.

Mr. Speaker, our national park system represents, both in physical and in conceptual terms, one of the greatest contributions America has ever made to its own people and to the people of the world. The concept of preserving a piece of the natural landscape as nature has designed and evolved it, and making it carefully available for the enjoyment, use and inspiration of people, in perpetuity, for present and future generations, was born in America. Many Americans, of course, know of the energetic leadership that President Theodore Roosevelt brought to the national parks movement. America's and the world's first national park was born in the wide open spaces of our great western landscape on March 1, 1872, with the creation of Yellowstone National Park.

Since that time our own national park system has grown in size and complexity of representation to 333 individual park units across the Nation, representing the best and most nationally significant of our natural, historic and recreational heritage. The concept has spread around the globe to the degree that scores of nations have developed their own national parks and equivalent reserves. The preservation ethic has caught fire in America and has gone global. The result has produced great havens for the protection of vestiges of the planet's natural landscapes and life forms; the result brings great spiritual, educational, and recreational enjoyment to millions of human beings; the result has highly stimulated and fostered the recognition and development of an environmental ethic among many peoples of the world.

But I now shudder to say that the health of this great system of national parks, at least here in America, is not well. Civilization and "progress" is encroaching upon the parks. What once were pristine areas surrounded by a sea of protective wild landscape, are now becoming islands of, resistance—hopefully—in a sea of change. Park boundaries do not automatically stop impinging activities that emanate from the other side of the line.

In recognition of this general concern, and at the instigation of the highly respected then-ranking Republican member of the Subcommittee on National Parks and Insular Affairs (KEITH SEBELIUS of Kansas), members of the subcommittee requested in July 1979 that the National Park Service prepare a "state of the parks" report and submit the findings back to the committee. The information requested was fairly identical to that enumerated in the bill I am introducing today.

After a very slow start, the National Park Service did submit a very important document to the Congress in May of 1980 entitled "State of the Parks—1980—A Report to the Congress". That report detailed and summarized some very worrisome findings with regard to damage and threats to the integrity of park resources, emanating from both outside and inside the boundaries of the parks. Rather than discuss the essence of the report's findings here, I shall attach the executive summary of the report to the end of my statement.

Mr. Speaker, if the reaction of the press across the country to this report would constitute any indication of the concern of the general public, I am heartened to think that there will

soon develop a sufficient outcry for action upon these problems which will enable us to move forward, forcefully, with solutions and financial resources.

Mr. Speaker, while I am not certain that the National Park Service has yet instigated a purposeful, energetic program to rapidly get on top of this issue, since its issuance of the report over a year ago, I am at least pleased to know of the concern about it expressed by leaders of this administration. The Director of the National Park Service, when he appeared before the Public Lands and National Parks Subcommittee on a recent October 20 budget oversight hearing, stated that the issues represented by the state of the parks report are of very priority concern, and that "if any director of a national park system had sleepless nights, this is the reason."

In addition, Secretary Watt, in a July 6, 1981, memorandum to the Director of the National Park Service on the subject of "Management of the National Park System," strongly supported the continuation of the state of the parks effort. He said in that memorandum:

> Two recent developments have provided the Service with the opportunity to reemphasize its basic responsibilities. First, the "state of the parks" analysis begun in 1980 should continue, and actions vigorously pursued to monitor, prevent, or mitigate significant threats.

He then goes on to discuss his concerns over the deteroriated condition of physical facilities. I will attach the full text of Secretary Watt's memorandum at the end of my statement.

Mr. Speaker, I am not sure, however, that the aforementioned, excellent statements of concern and commitment are alone sufficient. I think the entire Congress does have and should have a great concern over an issue of this importance. The parks are located in almost every State of the Union, and I think that the great majority of the Members of this body have a national park system unit in their district. Our national parks are very highly prized by the American people. Our national parks are the American crown jewels.

It is for these reasons that I introduced H.R. 5162 last week, and I genuinely hope that this issue, aided by a bill such as the one just offered, will receive prompt and adequate attention by this body and the Congress.

The American people have, I firmly believe a sufficient measure of their character, their spirit and their dreams wrapped up in our parks to become greatly aroused and concerned over the current and foreseeable plight of our parks—problems and threats which are already quite obvious. The enactment of this bill, or a measure similar to it, would, this member suggests, be a very positive step toward enhancing the protection of these crown jewels, national assets to which so much dedication and appreciation has been devoted by the American people.

Prompt congressional action is essential and it will be popularly supported by the citizens of these United States of America.

TEXT OF H.R. 5162

The Act of August 18, 1970 (84 Stat. 825; 16 U.S.C. 1a-1 through 1a-7) is amended by adding a new Section 13 as follows:

"The Secretary of the Interior is authorized and directed to prepare through the National Park Service, and to transmit on January 1 of each year to the Speaker of the United States House of Representatives and to the President of the United States Senate, a 'State of the Parks' report, indicating current and potential or foreseeable damage and threats to the resource integrity of each individual unit of the national park system. The report shall be prepared on a fiscal year basis and shall deal with damage or threats which emanate from both inside and outside the boundaries of the park units, to include an indication of magnitude and trend of such damage or threats. Actions being taken, or recommended solutions to eliminate or mitigate such damage or threats, shall be indicated for each park unit. Similar information for the entire national park system shall also be included in each annual report. The annual reports shall be printed as House documents. Effective October 1, 1982, there are authorized to be appropriated such sums as may be necessary to carry out the provisions of this section.".

STATE OF THE PARKS—1980 A REPORT TO THE CONGRESS

EXECUTIVE SUMMARY

The National Park Service recently has completed its first Servicewide survey designed to identify and characterize threats that endanger the natural and the cultural resources of the parks. This 1980 State of the Parks report presents the results of that survey. It focuses on three aspects of the threats to the parks problem: First, the Report identifies *specific threats* which endanger the resources of individual parks; second, it identifies *sources of threats,* whether located internal or external to park boundaries; and third, the Report identifies *park resources which are endangered* by the threats.

The findings presented in this Report are based upon information submitted by park superintendents, park natural and cultural resource managers, park scientists, and park planners. It should be emphasized that the recognition and the perception of threats may be affected by the professional training and experience of these observers. A park superintendent, for example, may be most sensitive to operational problems associated with overcrowding or vandalism; a park scientist or resource management specialist may be particularly aware of threats to water quality or wildlife habitat; a park planner is more likely to perceive disruptions associated with zoning or land use practices. Further, the respondent to the threats survey may show a greater interest in problem areas with prospective solutions and may fail to emphasize certain issues simply because they appear to be beyond his or her span of influence. Clearly, there are subjective judgments involved in any threats reporting and evaluation process. However, collectively, the results of this systematic park-by-park survey provide important new information concerning a broad spectrum of problems and issues with which the National Park Service must deal.

Threats survey results

The term "threats" as used in this Report refers to those pollutants, visitor activities, exotic species, industrial development projects, etc., which have the potential to cause significant damage to park resources or to seriously degrade important park values or park experiences. Without qualification, it can be stated that the cultural and the natural resources of the parks are endangered both from without and from within by a broad range of such threats. In this regard, the most significant findings developed in this study may be summarized as follows:

Park units representing all size and use categories, and all types of ecosystem, reported a wide range of threats affecting their resources. These threats, which emanate from both internal and external sources, are causing severe degradation of park resources.

The 63 National Park natural areas greater than 30,000 acres in size reported an average number of threats nearly double that of the Servicewide norm. Included in this category are units such as Yellowstone, Yosemite, Great Smoky Mountains, Everglades and Glacier. Most of these great parks were at one time pristine areas surrounded and protected by vast wilderness regions. Today, with their surrounding buffer zones gradually disappearing, many of these parks are experiencing significant and widespread adverse effects associated with external encroachment.

The 12 Biosphere Reserve Parks, which are unique natural areas that range in size from 15,000 acres to more than two million acres and which are dedicated to long-term ecosystem monitoring under the UNESCO Man and the Biosphere program, surprisingly reported an average number of threats nearly three times the Servicewide norm. This is particularly disturbing because the Biosphere Reserve Parks are considered to be model ecological control areas. The large number of threats reported by these parks may reflect the greater emphasis directed to monitoring in these areas.

If this is, in fact, the reason for the increased occurrence of reported threats in the Biosphere Reserve parks, it suggests that significant numbers of threats may have been overlooked in other parks which, to date, have received much less monitoring and research attention.

More than 50 percent of the reported threats were attributed to sources or activities located external to the parks. The most frequently identified external threats included: Industrial and commercial development projects on adjacent lands; air pollutant emissions, often associated with facilities located considerable distances from the affected parks; urban encroachment; and roads and railroads.

Threats associated with activities or with sources located within park boundaries continue to cause signifiicnt degradation of park resources, park values, and visitor park experiences. The most frequently reported internal threats are associated with: Heavy visitor use; park utility access corridors; vehicle noise; soil erosion; and exotic plant and animal species.

Scenic resources were reported to be significantly threatened in more than 60 per-

cent of the parks. Air quality resources were reported endangered in more than 45 percent of the parks. Mammal, plant, and fresh water resources all were reported threatened in more than 40 percent of the units. Other endangered resources are listed in ranked order of occurrence in the report.

A surprising 75 percent of the reported threats to park resources have been classified by onsite park observers as inadequately documented by either private or government research. Threats associated with air pollution, water pollution, and visitor related activities most frequently were cited as needing additional monitoring, scientific measurements or research documentation.

Conclusions

The units of the National Park Service represent all of the major categories of ecosystems within which we live. These parks, individually and collectively, constitute the best of our natural and cultural resources. The lessons that we learn and the progress that we make in our attempts to better manage and protect these resources are of benefit to us all.

The results of this study indicate that no parks of the System are immune to external and internal threats, and that these threats are causing significant and demonstrable damage. There is no question but that these threats will continue to degrade and destroy irreplaceable park resources until such time as mitigation measures are implemented. In many cases, this degradation or loss of resources is irreversible. It represents a sacrifice by a public that, for the most part, is unaware that such a price is being paid.

The diversity and complexity of the problems identified in this report serve to emphasize the need for an expanded program to protect and preserve the resources that the National Park Service know what natural and cultural resources exist in each park, establish the condition of these resources, and determine how and to what extent these resources are threatened. Essentially we must do the following:

We must prepare a comprehensive inventory of the important natural and cultural resources of each park and develop a plan at the park level for managing these resources.

We must establish accurate baseline data on park resources and conduct comprehensive monitoring programs designed to detect and measure changes both in these resources and in the ecosystem environments within which they exist.

We must pay additional attention to those threats which are associated with sources and activities located external to the parks. These threats today pose unique problems because of the Service's limited ability to deal directly and effectively with such outside influences.

We must improve our capability to better quantify and document the impacts of various threats, particularly those which are believed to most seriously affect important park resources and park values.

To accomplish these objectives will require that the Service significantly expand its research and resource management capabilities. At the present time, the natural science research program of the National Park Service is base funded at a level of only nine million dollars and is staffed by fewer than 100 scientists; this is an average of less than one researcher for each three units of the System and represents only 1.1 percent of the total Park Service staff. * * *

U.S. DEPARTMENT OF THE INTERIOR,
Washington, D.C., July 6, 1981.

MEMORANDUM

To: Director, National Park Service.
From: Secretary of the Interior.
Subject: Management of the National Park System.

Since the National Park Service was established, certain of my predecessors, beginning with Secretary Franklin K. Lane, have outlined the principles which are to guide the Service in the management of the National Park System. I believe that now is a particularly appropriate time, as the Nation enters the 1980's under new leadership and in high expectation of constructive change, to renew that practice.

In his letter of May 13, 1918, to Stephen T. Mather, first Director of the National Park Service, Secretary Lane wrote: "For the information of the public an outline of the administrative policy to which the new Service will adhere may now be announced. This policy is based on three broad principles: First, that the national parks must be maintained in absolutely unimpaired form for the use of future generations as well as those of our own time; second, that they are set apart for the use, observation, health, and pleasure of the people; and third, that the national interest must dictate all decisions affecting public or private enterprise in the parks."

The principles outlined for the first Director of the Service more than 60 years ago apply with equal force to the management of the National Park System today, and I affirm them wholeheartedly. Moreover, the Congress, as the maker of public land policy, has consistently supported these broad principles through the enactment of various laws, capped by the language of the Act of August 18, 1970, as amended: "Congress further reaffirms, declares, and directs that the promotion and regulation of the various areas of the National Park System . . . shall be consistent with and founded in the purpose established by the first section of the Act of August 25, 1916, to the common benefit of all the people of the United States. The authorization of activities shall be construed and the protection, management, and administration of these areas shall be conducted in light of the high public value and integrity of the National Park System and shall not be exercised in derogation of the values and purposes for which these various areas have been established, except as may have been or shall be directly and specifically provided by Congress."

I commend to every employee of the National Park Service a re-reading of the first section of the Act of August 25, 1916, which set forth the fundamental purpose of parks: ". . . to conserve the scenery and the natural and historic objects and the wildlife therein and to provide for the enjoyment of future generations." No agency in Government has a clearer mandate.

I am concerned that in recent years the funding and manpower resources of the Service have not always been directed to fulfilling its basic mission as set forth above. The challenge to the Service in the 1980's, and my charge to you as Director, is to assure that the funding and staffing available to you in a time of reduced Federal expenditures are applied to achieve the most benefit for visitors to the most heavily visited parks, being always mindful of the preservation of park resources. I am particularly concerned that you give priority to protecting and maintaining the "crown jewels," the internationally known, unique natural parks in the system.

Two recent developments have provided the Service with the opportunity to reemphasize its basic responsibilities. First, the "State of the Parks" analysis begun in 1980 should continue, and actions vigorously pursued to monitor, prevent, or mitigate significant threats. Second, the deteriorating condition of physical facilities has been addressed by the additional funds for maintenance provided by Congress in the fiscal year 1981 budget. The Service must put in place the management systems necessary to follow up on these Congressional initiatives in order that the public gets the highest return on its park dollar. It is timely to develop a long-range plan of funding and personnel requirements, so that the National Park System may be developed and operated to meet acceptable standards. You should begin immediately to explore the components of such a long-range plan.

As Director, you should emphasize management of the National Park System. At this time, the attention of all managers within the System needs to be specifically directed to achieving efficiency, serving visitors, and protecting park values, rather than expanding the System. Special emphasis should be placed on bringing the old-line parks up to standard.

The National Park Service is in a unique position to serve people. As such, it is one of the few Federal agencies whose personnel have the opportunity of meeting their true bosses, the thousands of visitors, each of whom has spent considerable time and money just to be in a park. The Service has a tradition of providing a high standard of service to the visitor, and this standard must be maintained. At a time when most families' budgets are being increasingly squeezed, the opportunity of a park visit becomes even more special. Courtesy, patience, and helpfulness on the part of park employees will assure visitors that yours is an organization that lives up to its name, as a Service. As Director, you should ensure that you recruit men and women who like people for those front-line positions where service to the visitor is immediate and direct.

For those visitors who take the opportunity to stay in lodges, rent bicycles or horses, and purchase food and equipment while in the parks, the concessioner is essential to the park experience. Concession operators are partners with the National Park Service in serving people. A successful partnership is based on mutual support and mutual responsibility. Park managers must appreciate the need for the operator to make a reasonable profit, and concession operators need to be aware of the statutory mandate of the Service to protect park resources for people. Both the Service and the concessioners are, above all, responsible for assuring the park visitor an opportunity to use safe, high-quality facilities at a reasonable cost. Where, because of deterioration over long periods, this standard is not being met, I believe you should explore with the concessioners alternative ways to find the needed capital and upgrade those facilities that are necessary for the visitor.

In summary, let us get back to the basics. Let us protect the land and its resources. Let us serve the visitor. I am confident that the Service can and will, through professional, innovative, and accountable manage-

ment, fulfill its statutory mandate, and I pledge my support to that end.

JAMES C. WATT.

□ 1940

INCREASE IN HONORARIA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Iowa (Mr. BEDELL) is recognized for 15 minutes.

Mr. BEDELL. I rise to object to the increase in Members' outside earnings that was passed by the House today wherein we increased our outside earnings from 15 percent to 30 percent of our salaries.

I object to the fact that the honoraria limits were increased from $1,000 to $2,000 per speech.

I object to the fact that the honoraria would be counted in the time it was received, rather than in the time at which the speech was given.

Mr. Speaker, I have always questioned the appropriateness of honoraria for Members of Congress.

First of all, I have yet to hear a speech by a Member of Congress which was worth $2,000. I do not accept honoraria. Two thousand dollars for a speech does not necessarily buy influence, but I submit that it is more difficult to vote against a special interest if they have just paid you $2,000 for addressing their national convention.

I understand there can be arguments as to whether or not the salaries of Congressmen should be increased. I do not think they should at this time, but surely there can be no argument that whatever is done should be done out in broad daylight. Surely we should vote on whatever is done and we should have the courage to do so.

I object more than anything else to the way this was sneaked through the Congress without our having an opportunity to debate the issue and for the people to know how we voted and how we felt on this issue.

Mr. Speaker, our country is in trouble today. Farmers are in trouble. Businessmen are in trouble. Unemployed are in difficulty.

Mr. Speaker, until we realize that here in the Congress and until we decide that we are going to set an example for the rest of the country, I submit we are not doing what we need to do and if we can sit here and think that we can go ahead and raise our salaries where all the rest of the country is suffering lower and lower income, I submit that we are not performing as we need to perform and I object very much to what the House has done today.

CRIME SUBCOMMITTEE TO HOLD HEARING ON PHASEOUT OF THE BUREAU OF ALCOHOL, TOBACCO, AND FIREARMS

The SPEAKER pro tempore. Under a previous order of the House the gentleman from New Jersey (Mr. HUGHES) is recognized for 5 minutes.

● Mr. HUGHES. Mr. Speaker, on December 16, 1981, at 10 a.m. in room 2237, Rayburn House Office Building, the Subcommittee on Crime of the House Judiciary Committee will hold a hearing on the phaseout of the Bureau of Alcohol, Tobacco, and Firearms.

Appearing before the subcommittee to give testimony will be the Honorable John Walker, Assistant Secretary of the Treasury Department; the Honorable Benjamin Civiletti, former Attorney General of the United States; a panel of former officials of the Bureau of Alcohol, Tobacco, and Firearms; and a panel of insurance company executives.

All interested persons or organizations wishing to submit testimony for the record of the hearing or desiring further information should address their communications to the Subcommittee on Crime, 207 Cannon House Office Building, Washington, D.C. 20515 or telephone: (202) 225-1695.●

FOOD IRRADIATION

(Mr. PRICE asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. PRICE. Mr. Speaker, an article in the December 12, 1981, Washington Post reports on FDA approval of ionizing radiation processing of fruits and vegetables for human consumption. As the article states, this action could be the start of a revolutionary change in the food industry. The use of radiation to control insects and pathogens has great promise for improved nutrition of people throughout the world. Research work over the past several decades which I have personally supported indicates this method of preserving foods has great advantages in the preservation of food values, simplifying food processing and distribution, particularly in Third World nations, and greatly reducing energy consumption in the food industry.

I highly commend the article which I am including at the close of my remarks since it presents a fairly comprehensive summary of the problems of present methods of preserving foods. It appears obvious that certain presently used processing methods must be stopped and it also appears that the use of ionizing radiation such as gamma rays will be the best substitute.

[From the Washington Post, Dec. 18, 1981]

FDA, ANSWERING MEDFLY THREAT, EASES PRODUCE IRRADIATION BAN

(By Jay Mathews)

LOS ANGELES, December 11.—Responding to the threat of the Mediterranean fruit fly, the Food and Drug Administration has softened its long-held ban on treating produce with gamma rays, in a move that could revolutionize the food industry.

Agency spokesman Jim Greene said Commissioner Arthur Hull Hayes Jr. has granted conditional permission to a San Jose firm, Emergent Technologies, to begin irradiating produce.

The $10 million irradiation plant proposed by the firm, if it passes several federal requirements, would be the first in this country to put food irradiation to full commercial use.

State and federal officials, applauding the move, say gamma rays may be the only way to treat fruits in new infestations by the Medfly or other pests if a popular chemical fumigant now in use is banned for being a suspected cause of cancer.

But the gamma ray process also has the even more significant capability, confirmed by Army tests and commercial use in Europe, of greatly extending the shelf life of milk, bacon and other foods.

"This has wide-ranging implications," said Frank Bragg, a spokesman for the University of California at Davis, where experiments with the gamma ray process are continuing. "There is going to be a multimillion-dollar industry springing up very quickly with the FDA approval."

A potential stumbling block, scientists and government officials acknowledge, is consumer fear of anything to do with radiation.

Hayes, in a letter to White House science advisers, said, "Irradiation of food poses no danger to consumers."

Niel E. Nielson, president of Emergent Technologies, said in an interview that "this is just as safe as drying the food in the sun, or broiling it," both processes involve radiation.

Although the Army has been experimenting with gamma ray treatment of food since the 1940s, commercial food processors have declined to make a great effort to develop radiation facilities because refrigeration or chemical fumigation could do the job more cheaply.

Rising energy costs and new research on the harmful effects of many chemicals have led some to reconsider irradiation, however.

Nielson said his company has been lobbying Congress and the FDA for years to lower restrictions on the use of irradiation.

"Then those little bugs changed the situation quite drastically," said Manuel C. Lagunas-Solar, chief of the UC Davis experimental program on irradiating food.

Although dormant this winter, the small fly, whose larvae can spoil dozens of varieties of fruits and vegetables, remains a serious potential threat to California's $16 billion agricultural industry, and to growers in other states.

With the chemical fumigant ethylene dibromide (EDB) now strongly suspected as a potential cause of cancer in workers who come in close contact with it, the growers and the FDA have been eager to promote an alternative method of treating infested fruit.

According to Greene, FDA Commissioner Hayes was able to grant an exemption from regulations restricting irradiation of food in

the United States by classifying the Medfly situation in California as an emergency.

Greene said the agency will still require, however, that Emergent Technologies assure worker safety marketability of the irradiated produce and a radiation dose of no more than 100 kilorads before final approval for the project is given.

Dick Thompson, spokesman for the California Department of Food and Agriculture, called gamma ray treatment "a good process, it's been used in Europe for some time."

He said some American stores now sell an irradiated milk produced in Europe that can remain on a kitchen shelf without spoiling for months because the decay-causing bacteria had been killed.

Lagunas-Solar said the irradiated food is safe for consumers but that processors must be careful not to overdose softer fruits, which could suffer skin damage or spoil more quickly because of the treatment.

Gamma rays are used in this country to sterilize medical instruments and bandages, as well as food for patients in some hospitals and for National Aeronautics and Space Administration astronauts who must remain in space for a long time.

Greene said the federal government approved irradiation treatment of potatoes and wheat in the 1960s, but processors decided not to spend the money to build the proper facilities.

According to Nielson, a plant capable of handling thousands of tons of produce each day could be ready within a year if the plan received full government cooperation.

Crates of produce in metal containers and moving on conveyor belts would enter large rooms with thick concrete walls where it would be exposed to cobalt 60, a powerful radioactive isotope.

The dose would be enough to arrest further development of any Medfly eggs or larvae in the produce.

State officials are spraying suspected Medfly areas about once every three weeks through the winter and plan to hit any remaining pockets of the insect with concentrated spraying in the spring.

But Japanese buyers have refused to accept any fruit from California that has not been completely fumigated.●

ROLLCALL VOTES—WE ARE IMPROVING

(Mr. DANIELSON asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. DANIELSON. Mr. Speaker, my continuing analysis of rollcall votes has now been completed through last Friday, December 11, 1981. The most significant development remains, as I mentioned in a preliminary report on September 18, 1981, the drastic reduction in the number of rollcalls that we have had as compared with recent years.

Through last Friday we had had only 356 rollcall votes—approximately half the number of votes at the same point in any year during the past two Congresses. December 11, last Friday, was our 158th legislative day. Total rollcalls through 158 legislative days, or the end of the session when there were fewer than 158 legislative days, starting with 1977, is as follows: 1977—740 rollcalls (through November 3); 1978—942 rollcalls (150 legislative days—end of session); 1979—698 rollcalls (through December 4); 1980—681 rollcalls (153 legislative days—end of session); and 1981—356 rollcalls (through December 11).

The most noticeable alteration in the makeup of the types of rollcalls that are being called is the substantial drop in the number of quorum calls, and a large increase in votes on approving the Journal and on resolving into Committee. Recognizing, of course, that votes on approving the Journal are often used in lieu of a quorum call at the opening of the day, the figures are as follows:

COMBINED TOTAL OF VOTES ON APPROVING THE JOURNAL AND RESOLVING INTO COMMITTEE

	Number of votes	Percent of total rollcalls
1978	74	7.9
1979	60	7.9
1980	64	9.4
1981 (through Dec. 11)	55	15.5

There has been a rather substantial change in the list of the top 10 rollcall requesters, resulting mainly from the absence of the gentleman from Maryland (Mr. Bauman), who is no longer a Member of this body and who held undisputed title to first place in that list for so many years.

The current holder of that title has set a new record for the 4-year period I have been analyzing rollcall votes, however, by requesting 10.4 percent, 37 out of 356, of the rollcalls so far this year. That is almost a full percentage point higher than any previous mark.

Tables follow showing the number of votes carrying by 90 percent or more, a summary by type of vote, and the top 10 rollcall requesters from 1979 through 1981, all based on rollcalls from January 5, 1981, through December 11, 1981. The listing of rollcalls is alphabetical, by Member requesting the rollcall:

1981 VOTES CARRYING BY 90 PERCENT OR MORE

[Jan. 5, 1981, through Dec. 11, 1981]

Percent	Votes [1]	Votes [1]	Percent [2]
100	27	27	8.0
99	33	60	17.8
98	7	67	19.8
97	14	81	24.0
96	14	95	28.1
95	8	103	30.5
94	5	108	32.0
93	3	111	32.8
92	1	112	33.1
91	3	115	34.0
90	5	120	35.5

[1] Number of rollcall votes in 1981 with this percentage and over.
[2] Aggregate percent, 1981, of 338 rollcall votes this percentage and over, excluding quorums.

SUMMARY OF ROLLCALLS BY TYPE OF VOTE

[Jan. 5, 1981, through Dec. 11, 1981]

Type of vote	1981	Percent
Agreeing to conference report	11	3.1
Agreeing to the amendment	108	30.3
Agreeing to the amendments	7	2.0
Agreeing to the resolution	37	10.4
Approving the Journal	28	7.9
Call of the States	1	.3
Closing portions of conference	1	.3
Commit with instructions	3	.8
Concur in Senate amendment	1	.3
Election of Speaker	1	.3
Motion to adjourn	2	.6
Motion to close conference	1	.3
Motion to consider	1	.3
Motion to discharge committee	1	.3
Motion to instruct conferees	1	.3
Motion to limit debate	2	.6
Motion to recommit	3	.8
Motion to reconvene	1	.3
Ordering the previous question	7	2.0
Passage	51	14.3
Postponing consideration	1	.3
Previous question on conference report	1	.3
Quorum	17	4.8
Recede and concur in S amendment	3	.8
Recommit conference report	1	.3
Recommit with instructions	4	1.1
Resolving into Committee	27	7.6
Suspension rules agree to conference report	1	.3
Suspend rules and agree	6	1.7
Suspend rules and pass	24	6.7
Table motion to discharge commission	1	.3
Table motion to instruct	1	.3
Table motion to reconsider	1	.3
Total	356	100

Mr. MINETA in two instances.
Mr. OBERSTAR.
Mr. MINISH.
Mr. GEPHARDT.
Mr. OTTINGER in two instances.
Mr. DYSON.
Mr. MCDONALD in five instances.
Mr. LAFALCE
Mr. MURTHA.
Mr. RAHALL.
Mr. WAXMAN in two instances.
Mr. HOYER.
Mr. YATRON.
Mr. SCHROEDER in two instances.
Mrs. BYRON.
Mr. RATCHFORD.
Mr. AKAKA.
Mr. DE LUGO.
Mr. GARCIA.

SENATE BILL AND JOINT RESOLUTIONS REFERRED

Bill and joint resolutions of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 1131. An Act to require the Federal Government to pay interest on overdue payments and to take early payment discounts only when payment is timely made, and for other purposes; to the Committee on Government Operations.

S.J. Res. 118. Joint resolution to authorize and request the President to designate the month of January 1982 as "National Cerebral Palsy Month"; to the Committee on Post Office and Civil Service.

S.J. Res. 121. Joint resolution to provide for the designation of the year 1982 as the "Bicentennial Year of the American Bald Eagle" and the designation of June 20, 1982, as "National Bald Eagle Day"; to the Committee on Post Office and Civil Service.

S.J. Res. 136. To validate the effectiveness of a plan for the use or distribution of funds appropriated to pay a judgment awarded to the San Carlos Tribe of Arizona; to the Committee on Interior and Insular Affairs.

ENROLLED BILLS SIGNED

Mr. HAWKINS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 4209. An act making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1982, and for other purposes; and

H.R. 4845. An act to designate the building known as the Lincoln Federal Building and Courthouse in Lincoln, Nebr. as the "Robert V. Denney Federal Building and Courthouse."

SENATE ENROLLED BILLS SIGNED

The SPEAKER announced his signature to enrolled bills of the Senate of the following titles:

S. 1003. An act to amend title III of the Marine Protection, Research, and Sanctuaries Act of 1972, as amended, to authorize appropriations for such title for fiscal years 1982 and 1983, and for other purposes; and

S. 1948. An act to permit to become effective certain Farm Credit Administration regulations which expand the authority of financing institutions, other than farm credit system institutions, to borrow from and discount with Federal intermediate credit banks.

ADJOURNMENT

Mr. BEDELL. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 7 o'clock and 45 minutes p.m.), the House adjourned until tomorrow, Wednesday, December 16, 1981, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2688. A letter from the Comptroller General of the United States, transmitting his review of the deferral of budget authority contained in the message from the President dated November 13, 1981 (H. Doc. No. 97-110), pursuant to section 1014(b) of Public Law 93-344 (H. Doc. No. 97-122); to the Committee on Appropriations and ordered to be printed.

2689. A letter from the Assistant Secretary of the Air Force (Research, Development and Logistics), transmitting notice of the proposed conversion to contractor performance of the commissary shelf stocking and custodial services function at Randolph Air Force Base, Tex., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

2690. A letter from the Assistant Secretary for Administration, Smithsonian Institution, transmitting the annual pension plan report for the Smithsonian Institution and the Woodrow Wilson International Center for Scholars, covering calendar year 1980, pursuant to section 121(a)(2) of the Budget and Accounting Procedures Act of 1950, as amended; to the Committee on Government Operations.

2691. A letter from the Acting Secretary of the Interior, transmitting the annual report on the oil and gas leasing program for non-North Slope Federal lands in Alaska, pursuant to section 1008 of Public Law 96-487; to the Committee on Interior and Insular Affairs.

2692. A letter from the Acting Deputy Assistant Secretary of the Interior for Indian Affairs, transmitting a report on cancellations and adjustments of reimbursable charges of the Government of the United States existing as debts against individual Indians or tribes of Indians during fiscal year 1980, pursuant to the act of July 1, 1932; to the Committee on Interior and Insular Affairs.

2693. A letter from the Chairman, U.S. Nuclear Regulatory Commission, transmitting a draft of proposed legislation to amend the Atomic Energy Act of 1954, as amended, to authorize the U.S. Nuclear Regulatory Commission to alleviate certain costs to resident inspectors arising from their relocation; to the Committee on Interior and Insular Affairs.

2694. A letter from the Administrator, National Aeronautics and Space Administration, transmitting notice of the proposed demonstration in late 1983 of the Space Shuttle's capability to rendezvous with spacecraft and retrieve them using the remote manipulator system arm, pursuant to section 4(3) of the NASA Authorization Act, 1982; to the Committee on Science and Technology.

2695. A letter from the Secretary of Health and Human Services, transmitting a draft of proposed legislation to annul the requirement that the Secretary of Health and Human Services appoint an Advisory Council on Social Security during 1981; to the Committee on Ways and Means.

2696. A letter from the Chairman, National Transportation Safety Board, transmitting the Board's letter appealing the OMB's proposed budget allowance for fiscal year 1983, pursuant to section 304(b)(7) of Public Law 93-633; jointly, to the Committees on Appropriations and Public Works and Transportation.

2697. A letter from the Comptroller General of the United States, transmitting a report on problems with the M-1 tank's power train (MASAD-82-7, December 15, 1981); jointly, to the Committees on Government Operations and Armed Services.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. ADDABBO: Committee of conference. Conference report on H.R. 4995 (Rept. No. 97-410). Ordered to be printed.

Mr. FUQUA: Committee on Science and Technology. H.R. 5016. A bill to establish a Federal policy with respect to the disposal of high-level radioactive waste from civilian nuclear activities, to provide for the construction, operation, and maintenance of waste disposal facilities, to provide for a program of nuclear waste and spent fuel research and development, and for other purposes with amendments (Rept. No. 97-411, Pt. I). Ordered to be printed.

Mr. BROOKS: Committee on Government Operations. Report on improving the administration of the civil service disability retirement program (Rept. No. 97-412). Re-

ferred to the Committee of the Whole House on the State of the Union.

Mr. ZABLOCKI: Committee of conference. Conference report on S. 1196 (Rept. No. 97-413). Ordered to be printed.

Mr. RODINO: Committee on the Judiciary. H.R. 4353. A bill to amend the act entitled "An Act to establish a uniform Law on the Subject of Bankruptcies," approved November 6, 1978 (Rept. No. 97-414). Referred to the Committee of the Whole House on the State of the Union.

Mr. RODINO: Committee on the Judiciary H.R. 5116. A bill to amend the act of November 6, 1978, with respect to certain fees charged under the Bankruptcy Act (Rept. No. 97-415). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BAFALIS:

H.R. 5217. A bill to amend the Internal Revenue Code of 1954 to limit the maximum rate of interest charged on certain deferred payments of estate taxes and certain recapture taxes; to the Committee on Ways and Means.

By Mr. COELHO:

H.R. 5218. A bill to amend title 18 of the United States Code to prohibit the production and knowing possession of false documents or papers of the United States, and the use of false information in obtaining any official document or paper of the United States which includes a statement or other indication of identification or U.S. nationality; to the Committee on the Judiciary.

By Mr. CONTE:

H.R. 5219. A bill to designate certain lands as wilderness; to the Committee on Interior and Insular Affairs.

By Mr. CORCORAN:

H.R. 5220. A bill to amend the Public Utility Holding Company Act of 1935 to improve financial performance of electric and gas utilities by removing unnecessary regulatory impediments to the exercise of sound and prudent business judgment by utility executives; to the Committee on Energy and Commerce.

By Mr. DONNELLY:

H.R. 5221. A bill to amend the Internal Revenue Code of 1954 to provide a tax credit for tuition and fees for elementary and secondary education; to the Committee on Ways and Means.

H.R. 5222. A bill to amend the Age Discrimination Act of 1967 to permit a trial by jury in any action brought against a Federal agency under such act; jointly, to the Committees on the Judiciary and Education and Labor.

By Mr. DUNCAN:

H.R. 5223. A bill to exempt certain fixed contribution multiemployer pension plans from title IV of the Employee Retirement Income Security Act of 1974; to the Committee on Education and Labor.

By Ms. FENWICK:

H.R. 5224. A bill to provide equitable, comprehensive, and exclusive benefits in the case of persons whose disabilities or deaths are the result of asbestos-related diseases associated with their employment, and for other purposes; to the Committee on Education and Labor.

By Ms. FERRARO (for herself and Mr. PEPPER):

H.R. 5225. A bill to amend title XVIII of the Social Security Act to compensate the social security trust funds for payroll tax receipts that are lost when the unemployment rate is above 6 percent; to the Committee on Ways and Means.

By Mr. GRADISON:

H.R. 5226. A bill to amend part A of title IV of the Social Security Act to authorize States, with Federal matching under the AFDC program, to encourage and assist individuals receiving aid under that program in achieving self-support by making private health insurance reasonably available to such individuals when their income rises to the point where they are no longer entitled to such aid and as a consequence they lose their medicaid eligibility; to the Committee on Ways and Means.

By Mr. HUGHES:

H.R. 5227. A bill to amend title 18 of the United States Code with respect to extradition, and for other purposes; to the Committee on the Judiciary.

By Mr. HUGHES (for himself, Mr. RODINO, and Mr. MCCLORY):

H.R. 5228. A bill to amend title 18 of the United States Code to implement the Convention on the Physical Protection of Nuclear Material, and for other purposes; to the Committee on the Judiciary.

By Mr. LOWERY of California (for himself, Mr. HUNTER, Mr. BURGENER, Mr. ANDERSON, Mr. GINGRICH, Mr. WOLF, Mr. MCGRATH, Mr. DORNAN of California, Mr. LEBOUTILLIER, Mr. LOWRY of Washington, Mr. HYDE, and MR. MINETA):

H.R. 5229. A bill to amend the Internal Revenue Code of 1954 to allow individuals an income tax credit for certain aircraft noise insulation expenditures; to the Committee on Ways and Means.

By Mr. MATSUI (for himself, Mr. ROUSSELOT, Mr. COELHO, Mr. FAZIO, Mr. MOORHEAD, Mr. PANETTA, Mr. PASHAYAN, and Mr. SHUMWAY):

H.R. 5230. A bill to amend the Internal Revenue Code of 1954 relating to the treatment under the DISC rules of fungible products marketed through pooling arrangements of cooperative associations; to the Committee on Ways and Means.

By Mr. OTTINGER:

H.R. 5231. A bill to authorize the issuance of variable-rate debentures by the Federal Deposit Insurance Corporation and Federal Savings and Loan Insurance Corporation; to the Committee on Banking, Finance and Urban Affairs..

H.R. 5232. A bill to provide additional authority to the Board of Directors of the Federal Deposit Insurance Corporation to assist the Board in maintaining the stability of insured banks; to the Committee on Banking, Finance and Urban Affairs.

H.R. 5233. A bill to amend the Internal Revenue Code of 1954 to clarify the tax treatment of thrift partnerships, and for other purposes; to the Committee on Ways and Means.

By Mr. PURSELL:

H.R. 5234. A bill to amend section 1304 of the Internal Revenue Code of 1954 relating to income tax returns of married individuals; to the Committee on Ways and Means.

By Mr. RODINO (for himself, Mr. BROOKS, Mr. BUTLER, Mr. EDWARDS of California, Mr. EVANS of Georgia, Mr. HUGHES, Mr. HYDE, Mr. MAZZOLI, Mr. MCCLORY, Mr. MOORHEAD, Mr. RAILSBACK, and Mr. SEIBERLING):

H.R. 5235. A bill to amend the Sherman Act, the Clayton Act, and the Federal Trade Commission Act to exclude from the application of such acts certain conduct involving exports; to the Committee on the Judiciary.

By Mr. SOLARZ:

H.R. 5236. A bill to authorize the Secretary of the Army, acting through the Chief of Engineers, to construct the project to control beach erosion and provide storm protection along the Atlantic coast of New York City from Rockaway Inlet to Norton Point; to the Committee on Public Works and Transportation.

By Mr. SOLOMON:

H.R. 5237. A bill to direct the President to impose certain limitations on the amount of milk protein products that may be imported into the United States; to the Committee on Ways and Means.

By Mr. WAXMAN (for himself, Mr. WEISS, Mr. WALGREN, Mr. WYDEN, Mr. MOFFETT, Mr. LELAND, Mr. OTTINGER, Mr. WIRTH, Mr. MOTTL, Mr. AKAKA, Mr. BARNES, Mr. BEILENSON, Mr. DIXON, Mr. SHAMANSKY, and Mr. TAYLOR):

H.R. 5238. A bill to amend the Federal Food, Drug, and Cosmetic Act to facilitate the development of drugs for rare diseases and conditions, and for other purposes; jointly, to the Committees on Energy and Commerce and Ways and Means.

By Mr. FOLEY:

H.J. Res. 377. Joint resolution providing for the convening of the 2d session of the 97th Congress; considered and passed.

By Mr. BRINKLEY:

H.J. Res. 378. Joint resolution to extend deepest gratitude and heartfelt thanks to Dr. Solomon Garb for his national leadership role in the war against cancer; to the Committee on Post Office and Civil Service.

By Mr. ZABLOCKI (for himself, Mr. WRIGHT, Mr. MICHEL, Mr. BROOMFIELD, Mr. DERWINSKI, Mr. FOUNTAIN, Mr. FASCELL, Mr. ROSENTHAL, Mr. HAMILTON, Mr. BINGHAM, Mr. YATRON, Mr. SOLARZ, Mr. BONKER, Mr. STUDDS, Mr. IRELAND, Mr. MICA, Mr. BARNES, Mr. WOLPE, Mr. SHAMANSKY, Mr. GEJDENSON, Mr. DYMALLY, Mr. ECKART, Mr. LANTOS, Mr. BOWEN, Mr. WINN, Mr. GILMAN, Mr. GOODLING, Mr. LEACH of Iowa, and Mrs. SNOWE):

H. Con. Res. 240. Concurrent resolution reaffirming the support of the Congress of the United States for the people of Poland; considered and agreed to.

By Mr. MURTHA:

H. Res. 305. Resolution amending the Rules of the House of Representatives to increase the amount of outside earned income which a Member may accept, and for other purposes; considered and agreed to.

MEMORIALS

Under clause 4 of rule XXII,

235. The SPEAKER presented a memorial of the Senate of the Commonwealth of Massachusetts, relative to the Clean Air Act; to the Committee on Energy and Commerce.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. DANIELSON:

H.R. 5239. A bill for the relief of the Virginia-Pilot and the Ledger-Star; to the Committee on the Judiciary.

By Mr. SOLARZ:

H.R. 5240. A bill for the relief of Chaim Tal, his wife, Lucyna, and their children, Danny, Ronit, and Ilanit; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 323: Mr. BROWN of Colorado.

H.R. 808: Mr. SEIBERLING, Ms. OAKAR, Mr. JAMES K. COYNE, Mr. BEREUTER, and Mr. EARLY.

H.R. 1362: Mr. WYLIE, Mr. ADDABBO, Mr. BENNETT, Mrs. HECKLER, Mr. BUTLER, Mr. GONZALEZ, Mr. BLANCHARD, and Mr. DORGAN of North Dakota.

H.R. 1649: Mr. STUMP.

H.R. 2250: Mr. HARKIN.

H.R. 2488: Mr. BRINKLEY, Mrs. ROUKEMA, Mr. COELHO, Mr. HARKIN, and Mr. FARY.

H.R. 3269: Mrs. MARTIN of Illinois, Mr. MADIGAN, Mr. DENARDIS, Mr. HOLLAND, Mr. LUNGREN, Mr. SHELBY, Mr. HENDON, and Mr. APPLEGATE.

H.R. 3429: Mr. LOWRY of Washington.

H.R. 3575: Mr. DELLUMS, Mr. SAM B. HALL, Jr., Mr. PICKLE, and Mr. WILSON.

H.R. 3767: Mr. WYDEN, Mr. BAILEY of Pennsylvania, Mr. VENTO, Mr. BAFALIS, Mr. EVANS of Georgia, Mr. ANTHONY, Mr. SIMON, and Mr. DORGAN of North Dakota.

H.R. 3984: Mr. ROSE.

H.R. 4139: Mr. NEAL.

H.R. 4326: Mr. CORCORAN and Mr. FASCELL.

H.R. 4438: Mr. DUNCAN, Mr. EMERY, Mr. YOUNG of Alaska, Mrs. HOLT, Mr. TAYLOR, Mr. ROBERT W. DANIEL, Jr., Mr. WHITEHURST, Mr. MARLENEE, Mr. SHUMWAY, Mr. MCDONALD, Mr. LATTA, and Mr. CHENEY.

H.R. 4467: Mr. PERKINS and Ms. FERRARO.

H.R. 4507: Mr. HUGHES, Mr. DORGAN of North Dakota, Mr. DYSON, Mr. FORSYTHE, and Ms. MIKULSKI.

H.R. 4554: Mr. MCDONALD.

H.R. 4562: Mr. GEJDENSON.

H.R. 4673: Mr. SMITH of Oregon.

H.R. 4709: Mr. BROOMFIELD.

H.R. 4728: Mr. LEBOUTILLIER, Mr. HUTTO, Mr. HUGHES, Mr. JEFFRIES, Mr. BUTLER, Mr. FLIPPO, and Mr. BEDELL.

H.R. 4784: Mr. MCDADE.

H.R. 4796: Mr. ATKINSON, Mr. DERWINSKI, and Mr. NATCHER.

H.R. 4808: Mr. STUMP, Mr. JAMES K. COYNE, Mr. MCCOLLUM, Mr. UDALL, Mr. DICKINSON, Mr. MINETA, Mr. WAMPLER, Mr. ROBINSON, Mr. BLILEY, Mr. DORNAN of California, Mr. TAYLOR, Mr. FRENZEL, Mr. SUNIA, Mr. GINGRICH, Mr. ADDABBO, Mr. RINALDO, Mr. RITTER, Mr. LUNDINE, and Mr. HARTNETT.

H.R. 4869: Mrs. COLLINS of Illinois, Mr. MITCHELL of Maryland, Mr. CHAPPELL, and Mr. SOLOMON.

H.R. 4928: Mr. GOODLING and Mr. MILLER of Ohio.

H.R. 4930: Mr. BOWEN.

H.R. 4952: Mr. GAYDOS, Mr. GILMAN, and Mr. ERTEL.

H.R. 4999: Mr. LIVINGSTON, Mr. MORRISON, Mr. PHILIP M. CRANE, Mr. BARNARD, Mr. CLAUSEN, and Mr. GOODLING.

H.R. 5004: Mr. ERDAHL, Mr. MATSUI, and Mr. WILLIAMS of Ohio.

H.R. 5005: Mr. MARKEY, Mr. SKELTON, Mr. ECKART, Mr. DONNELLY, Mr. SHANNON, Mrs. HECKLER, Mr. BRINKLEY, Mr. HERTEL, Mr. DERWINSKI, and Mr. MINETA.

H.R. 5126: Mr. MONTGOMERY, Mr. ROE, Mr. WHITTEN, Mr. OTTINGER, Mr. BEVILL, Mrs. HOLT, and Mr. TAYLOR.

H.R. 5133: Mr. KILDEE, Mr. BLANCHARD, Mr. YOUNG of Missouri, Mr. BONIOR of Michigan, Mr. BENJAMIN, Mr. HALL of Ohio, Mr. MITCHELL of Maryland, Mr. FROST, and Mr. HERTEL.

H.R. 5135: Mr. HUBBARD, Mr. BEARD, Mr. ROSE, Mr. MITCHELL of Maryland, Mr. GINGRICH, Mr. HEFTEL, Mr. SKELTON, Mr. MATSUI, Mr. JACOBS, Mr. DICKS, Mr. HOYER, Mrs. SNOWE, Mr. AKAKA, Mr. WINN, Mr. VOLKMER, Mr. FLIPPO, Mr. LUKEN, Mr. LOWRY of Washington, Mr. NEAL, Mr. ANDREWS, Mr. BONKER, Mr. FRANK, Mr. SHUMWAY, Mr. YOUNG of Missouri, Mr. RAHALL, Mr. PHILIP M. CRANE, Mr. WEAVER, Mr. ATKINSON, Mr. ANNUNZIO, Mrs. BOUQUARD, Mr. ANDERSON, Mr. GARCIA, Mr. JEFFRIES, Mrs. HOLT, Mr. BLILEY, Mr. DIXON, Mr. STUDDS, Mr. CORRADA, Mr. ROBINSON, Mr. RICHMOND, Mr. Gephardt, Mr. LOWERY of California, Mr. FORSYTHE, and Mr. UDALL.

H.J. Res. 293: Mr. MARTIN of New York, Mr. EARLY, Mr. JAMES K. COYNE, Mr. SPENCE, and Mr. CLAUSEN.

H.J. Res. 354: Mr. DOWNEY, Mr. WEAVER, Mr. MOLLOHAN, Mr. SIMON, Mrs. FENWICK, Mr. SYNAR, Mr. BRINKLEY, Mr. BINGHAM, Mrs. SNOWE, Mr. JOHN L. BURTON, Mr. YOUNG of Missouri, and Mr. EVANS of Iowa.

H. Con. Res. 192: Mr. GUARINI.

H. Con. Res. 205: Mr. UDALL.

H. Con. Res. 207: Mr. GUARINI.

H. Con. Res. 222: Mr. HENDON, Mr. EDGAR, Mr. YATRON, Mr. DASCHLE, Mr. WOLF, Mr. DOWDY, and Mr. TAYLOR.

H. Res. 297: Mr. STANGELAND, Mr. EVANS of Indiana, Mr. LEWIS, Mr. DOUGHERTY, Mr. MURTHA, Mr. STUDDS, Mr. HEFNER, Mr. EDGAR, Mr. YATRON, Mr. DASCHLE, Mr. ROE, Mr. FOWLER, Mr. HARKIN, Mr. KOGOVSEK, and Mr. WILSON.

H. Res. 304: Mr. DAUB, Mr. MICHEL, Mr. CHENEY, Mr. RAILSBACK, Mr. HYDE, Mr. FINDLEY, Mr. BAILEY of Pennsylvania, Mr. MITCHELL of Maryland, Mr. MAVROULES, Mr. HILER, Mr. COATS, Mr. SMITH of New Jersey, Mr. CARMAN, Mr. MOLINARI, Mr. NAPIER, Mr. WAMPLER, Mr. BETHUNE, Mr. TAUKE, Mr. PORTER, Mr. ALBOSTA, Mr. SOLOMON, Mr. DANNEMEYER, Mr. STATON of West Virginia, Mr. LEBOUTILLIER, Ms. FIEDLER, Mr. LEWIS, Mr. DENARDIS, Mrs. HECKLER, Mr. LOTT, Mr. EDGAR, Mr. FOGLIETTA, Mr. MCDADE, Mrs. SCHROEDER, Mr. LEACH of Iowa, Mr. ATKINSON, Mr. BOLAND, Mr. RICHMOND, Mr. ROE, Mr. YATRON, Mr. CORCORAN, Mr. FORSYTHE, Mr. DWYER, Mr. TRAXLER, Mr. LOWERY of California, Mr. GEJDENSON, Mr. HUNTER, Mr. FARY, Mr. GRISHAM, Mr. LANTOS, Mr. CONYERS, Mr. MOORHEAD, Mr. SANTINI, Mr. OBERSTAR, Mr. BRODHEAD, Mr. DONNELLY, and Mr. FISH.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

302. By the SPEAKER: Petition of the national convention, Military Order of Foreign Wars of the United States, Baltimore, Md., relative to selective service; to the Committee on Armed Services.

303. Also, petition of the Board of Aldermen, St. Louis, Mo., relative to the Voting Rights Act of 1965; to the Committee on the Judiciary.

EXTENSIONS OF REMARKS

SENATOR RANDOLPH COMMENDS CITIZEN LEADERS FOR COMMUNITY IMPROVEMENT PROGRAMS

HON. QUENTIN N. BURDICK

OF NORTH DAKOTA

IN THE SENATE OF THE UNITED STATES

Tuesday, December 15, 1981

● Mr. BURDICK. Mr. President, I call attention to the tribute paid December 10, by our colleague from West Virginia, Senator JENNINGS RANDOLPH, who addressed 400 citizen leaders from outstanding community improvement programs in the country being honored at the National Awards Luncheon of Keep America Beautiful, Inc.

Keep America Beautiful, Inc., a nonprofit public service organization supported by more than 140 companies, trade associations and labor unions, recognized more than 80 of these programs. They were selected for these national awards by an independent panel of judges because of their success in achieving litter reductions and improvements in waste handling through voluntary means.

Senator RANDOLPH praised the leadership of Keep America Beautiful, Inc., notably Chairman Jack K. Paquette, vice president and assistant to the chairman of Owens-Illinois, Inc., and KAB president Roger W. Powers.

He noted the significant contributions of KAB's Clean Community System. The CCS changes personal attitudes toward the handling of waste, and is now operating in 241 cities and counties in 36 States. More than 25 million Americans live in these communities, and litter reductions of up to 80 percent are being achieved.

From the Senator's own State, three outstanding programs were recognized: the Stratton Conservation Club in Beckley, the West Virginia Youth Conservation Program and the Weirton Steel Division of the National Steel Corp.

His remarks on the importance of individual involvement in keeping America beautiful were well received by this prestigious audience. He is, of course, well known to them as one of the strongest supporters of KAB and the CCS. He was one of the first citizen members of Keep America Beautiful, and in his leadership role on the Senate Committee for Environment and Public Works, he has come to symbolize, for the thousands in the KAB movement, a positive outlook on the Nation's waste management needs.

Mr. President, I ask unanimous consent that Senator RANDOLPH's remarks be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

REMARKS OF SENATOR JENNINGS RANDOLPH

Ladies and gentlemen, members and directors, award winners and friends. It is a privilege to join you again, in a KAB meeting. We mark the successes and achievements of this year in the movement to keep America beautiful. My salute to the many award winners.

Forgive my singling out three excellent programs from the State of West Virginia:

The Governor's Office of Economic and Community Development, as you heard, has won a Keep America Beautiful Day Award for its statewide effort this spring. Lesley Nall, please communicate our congratulations to everyone in your Agency and to Governor Rockefeller for this fine achievement.

West Virginia won two first-place honors in the national awards competition—no surprise to me, of course, because they're first-rate programs. I know that the Stratton Conservation Club in Beckley has won two third-place awards and two second-place awards in past years. Charlie Sergent, I am delighted your club has made it to the top.

The Youth Conservation Program of the West Virginia Department of Natural Resources won a first-place award. Maxine Scarbro, I know you worked earnestly for that program. Your efforts are valued by everyone in the Keep America Beautiful movement.

I don't have to convince you about the importance of the solid waste problem. You are solving it. That may not have been exactly what you had in mind when you began working in "beautification," "fighting litter" or "recycling." Each of those goals is ultimately and inextricably tied to the absolute necessity of planning carefully how we manage and make room for the solid wastes emanating from everyday life. Everything from the three or four bundles of household garbage we place in the trash to the millions of tons of industrial wastes from factories must be disposed of in the safest, most efficient way possible.

The Keep America Beautiful Clean Community System, which we have watched grow to include 241 cities and counties in 6 years, is a shining example of a carefully planned, comprehensive approach to managing solid waste on a number of levels. It educates the individual, encouraging proper disposal of household trash. CCS approaches businesses in the community to containerize their commercial wastes, and encourage their customers to also be litter conscious. It works with the town's public works and sanitation departments, suggesting new and more efficient methods of waste management and inspiring employees to excel in their work. CCS recommends efficient waste handling practices to be used by workers in industry and construction. And while doing this, the CCS program enlists the aid of each of these groups, with civic and social organizations, to work together to make the entire community aware of what must be done to improve the quality of life.

America, as it moves forward among the nations, can only be strong if her people are strong. What happens at the grassroots is what counts; all of you have demonstrated this, through your participation in these programs. People can, and should, do more for themselves. The award winners are abundant proof of that: they stand as models of what can be accomplished in every community, large or small, urban or rural.

Voluntarism responds to the call for increased participation of the individual in deciding the destiny of his community, and ultimately, his country. You award winners have already risen to the challenge, taking the lead in determining the future of your communities. A rebirth of individual responsibility is needed in America. But for each and every award-winning program here, no matter how great and wide-ranging its success, there is work to do. When you leave today and return to your own States, and counties, and communities, you will find waiting for you new problems, new obstacles, new challenges. Judging from the caliber of programs, of volunteers, of dedicated leaders today, I know that the difficulties will be faced squarely. Innovative, creative solutions to the problems will be applied. I am sure those attending this meeting will return to their tasks with a renewed vigor, strengthened by the well-deserved recognition they have received, and heartened by the outstanding examples they have seen here.

I, again, salute the many worthwhile programs represented here and the people who make them work. I commend Keep America Beautiful, Inc. for its part in inspiring dedication and commitment to the improvement of America.●

FREE WORLD LEADERS KNEW OF HOLOCAUST IN 1943

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. SOLARZ. Mr. Speaker, recently a significant and deeply moving conference was held at the State Department. Organized by the U.S. Holocaust Memorial Council and chaired by the Honorable Elie Wiesel, the International Liberators Conference, October 26-28, was to commemorate the suffering and sacrifice of those who perished in the Nazi concentration camps during World War II, and the liberation of those who survived. In the words of President Reagan the Conference served "as a stark reminder to the world's conscience of what transpired during that period of history and will strengthen our resolve to prevent mankind from sinking into that ultimate horror again."

Conference participants came from many lands, including both those who

liberated the camps, and those victims of the Nazi terror who still lived. I had the opportunity to attend the Conference and I shall not try to relate here my own reactions. Suffice it to say that the Conference was unique in my experience.

However, I do wish to call to the attention of my colleagues one exceptionally important speech which was delivered at the Conference. The subject under discussion was: "Discovering the 'Final Solution'." In other words, when did the Free World first find out about Nazi plans and actions designed to exterminate the Jews? Was it only after the war had ended, when Allied troops liberated the concentration camps? Or had it been possible for those suffering under Nazi oppression to send out word of the Holocaust even while the war was under way? And if the free world leaders learned of the Holocaust during the war, what action did they take? One speaker was uniquely qualified to answer that question, Dr. Jan Karski, a hero of the Polish underground, a secret emissary to the West, and today a professor at Georgetown University.

Dr. Karski was born in Poland. He entered the diplomatic service of his country, was mobilized in 1939, was taken prisoner by the Soviet Army. He escaped shortly thereafter, and joined the Polish anti-Nazi underground in German-occupied Poland. As an underground courier he made several secret trips to France, Great Britain, and America during the war. During these highly dangerous trips Dr. Karski carried messages and appeals not only from the Polish underground leadership, but also from two Jewish organizations, the Bund and the Zionists. He was authorized to speak for all those groups.

True to that trust he conveyed the desperate appeals and hopes of those he represented. He made clear the plight of the Jews, the terrible dangers which threatened them, and their specific recommendations for free world action on their behalf. Dr. Karski's report reveals some responded favorably to these appeals, and others, to their shame, did not. I will let Dr. Karski's words speak for themselves on that subject. But one thing comes through very clearly: by 1943 free world leaders had been informed of the Holocaust. They knew.

Mr. Speaker, I ask that Dr. Karski's address at the Liberators Conference be included in today's CONGRESSIONAL RECORD.

INTERNATIONAL LIBERATORS CONFERENCE, 1981

The subject "Discovering the 'Final Solution' " requires consideration of the following questions:

What and when did the Western leaders as well as the Western public opinion learn about the Holocaust?

In what way did the information reach them?

What was the reaction? According to evidence?

I, among many, did play a part in this story. In preparing my report I had in mind not only our Conference but historical record, as well.

In the middle of the Summer, 1942 I received a message from the Delegate of the Polish government in exile for the Homeland, Cyril Ratajski, that he approved of my request to be sent secretly to London as a courier for the leaders of political parties organized in the Central Political Committee, and for the Delegate himself. The coming expedition was to be my fourth secret trip between Warsaw-Paris-London.

Sometime in September 1942, the Delegate informed me that the leaders of two Jewish underground organizations: the Socialist Bund and the Zionists learned about my mission and requested permission to use my services for their own communications to their representatives in London; to the Polish government and to the Allied authorities. The Delegate was sympathetic and I agreed.

Soon after, I met the two Jewish leaders on two occasions. They met me jointly to emphasize that their communications were in behalf of all Polish Jews regardless of their political differences. They identified themselves by their functions (naturally, no names). All post-war literature identifies them as Leon Feiner (Bund leader) and Adolf Berman (Zionist). For the record I must add, that an Israeli scholar, Walter Laqueur, in his recently published book, "The Terrible Secret," suggests that the Zionist leader might have been Menahem Kirschenbaum.

The Jewish leaders sent through me various messages, instructions and appeals to various quarters. I selected only those which directly pertain to the subject under discussion. Some other, important ones, I shall regretfully, ignore.

MY MISSION TO THE POLISH AND ALLIED GOVERNMENTS

The umprecedented destruction of the entire Jewish population is not motivated by Germany's military requirements. Hitler and his subordinates aim at the total destruction of the Jews before the war ends and regardless of its outcome. The Polish and Allied governments cannot disregard this reality. The Jews in Poland are helpless. The have no country of their own. They have no independent voice in the Allied councils. They cannot rely on the Polish Underground or population-at-large. They might save some individuals—they are unable to stop the extermination. Only the powerful Allied governments can help effectively.

The Polish Jews appeal to the Polish and Allied Governments to undertake measures in an attempt to stop the extermination.

They place historical responsibility on the Polish and Allied governments if they fail to undertake those measures.

This is what the Jews demand:

A public announcement that prevention of the physical extermination of the Jews become a part of the over-all Allied war strategy;

Informing the German nation through radio, air-dropped leaflets and other means about their government's crimes committed against the Jews. All available data on the Jewish ghettos; concentration and extermination camps; names of the German officials directly involved in the crimes; statistics; facts; methods used should be spelled-out;

Public and formal demand for evidence that such a pressure had been exercised and Nazi practices directed against the Jews stopped;

Placing the responsíbility on the German nation as a whole if they failed to respond and if the extermination continues;

Public and formal announcement that in view of the unprecedented Nazi crimes against the Jews and in hope that those crimes would stop, the Allied governments were to take unprecedented steps: Certain areas and objects in Germany would be bombed in retaliation. German people would be informed before and after each action that the Nazi continued extermination of the Jews prompted the bombing.

Jewish leaders in London, particularly Szmul Zygelbojm (Bund) and Dr. Ignace Szwarcbard (Zionist), are solemnly charged to make all efforts so as to make the Polish government formally forward these demands at the Allied councils.

TO THE PRESIDENT OF THE POLISH REPUBLIC, WLADYSLAW RACZKIEWICZ

Many among those who directly or indirectly contribute to the Jewish tragedy profess their Catholic faith. The Polish and other European Jews sent to Poland feel entitled on humanitarian and spiritual grounds to expect protection of the Vatican. Religious sanctions, excommunication included, are within the Pope's jurisdiction. Such sanctions, publicly proclaimed might have an impact on the German people. They might even make Hitler, a baptized Catholic, to reflect.

Because the nature of this message and the source it came from as well as because of diplomatic protocol's requirements, I was instructed to deliver the message to the President of the Republic only. Let him use his conscience and wisdom in approaching the Pope. I was explicitly forbidden to discuss that subject with the Jewish leaders. Their possible maladroit intervention might be counterproductive.

TO THE PRIME MINISTER AND COMMANDER IN CHIEF, GENERAL WLADYSLAW SIKORSKI, MINISTER OF INTERIOR, STANISLAW MIKOLAJCZYK, ZYGELBOJM AND SZWARCBARD

Although the Polish people at large sympathize or try to help the Jews, many criminals blackmail, rob, denounce or murder the Jews in hiding. The Underground authorities must apply punitive sanctions against them, executions included. In the last case, the identity of the guilty ones and the nature of their crimes should be publicized in the Underground press.

Zygelobjm and Szwarcbard must use all their pressure, so that pertinent instructions would be issued.

In order to avoid any risk of anti-Polish propaganda, I was explicitly forbidden to discuss that subject with any non-Polish Jewish leaders. I was to inform Zygelbojm and Szwarcbard about that part of my instructions.

TO THE ALLIED INDIVIDUAL GOVERNMENT/CIVIC LEADERS AS WELL AS TO INTERNATIONAL JEWISH LEADERS

There is a possibility to save some Jews if money were available. Gestapo is corrupted not only on the low level but also on the medium and even high level. They would cooperate for gold or hard currency. The Jewish leaders are able to make appropriate contacts.

Some Jews would be allowed to leave Poland provided they have original foreign passports. Origins of those passports are un-

important. As large a supply of such passports as possible should be sent. They must be blank. Forged names, identification data, etc., would be overlooked by the German authorities—for money, or course;

Provisions must be made that those Jews who do succeed in leaving Poland would be accepted in the Allied or neutral countries;

Some Jews of not semitic appearance could leave the ghettos, obtain false German documents and live among other Poles under assumed names. Money to bribe the ghetto's guards, various officials like (Arbeitsamt) is needed.

Money, medicines, food, clothing are most urgently needed by the survivors in the ghettos. Subsidies obtained from the Delegate of the Polish government as well as other funds sent through various channels by the Jewish international organizations are totally insufficient. More hard currency, sent without any delay, is a question of life or death for thousands of Jews.

In addition to all the messages I was to carry, both Jewish leaders solemnly committed me to do my utmost in arousing the public opinion in the free world on behalf of the Jews. I solemnly swore, that should I arrive safely in London, I would not fail them.

At the end of the second meeting, the Bund leader confronted me with the following. He knows the English people. My report might seem incredible. My mission would be enhanced if I were able to say that I witnessed the Jewish tragedy. The Jewish Underground does have some contacts, even with Gestapo. They are able to smuggle me to the Warsaw ghetto. They are even able to smuggle me—in disguise—to the Belsec camp. In the ghetto, he himself, would be my guide. In Belsec—a Nazi official would take care of my expedition. Both trips are dangerous—but they are feasible. He has no right to ask me to undertake them. But, "Witold" (my psuedonym at the time) "I know much about you and your work. Would you volunteer to help our Jewish cause?" I agreed.

I visited the Jewish ghetto twice, in the middle of October 1942. A few days later, I visited Belsec—all three trips proved successful. These trips became the last items in collecting data, messages, instructions, complaints of various political leaders in the Underground. Two or three days later, I embarked on my secret journey to London.

Again my trip was successful. It lasted 21 days: Warsaw-Berlin-Brussels-Paris-Lyon-Perpignan-Pyrenees Mountains on foot-Barcelona-Madrid-Algeciras-Gibraltar. A ceremonial dinner with the Governor. A good night sleep. A plane was waiting. In last week of November, 1942, I already began reporting in London. Of course, one must realize that my Jewish reports were only a part of my over-all mission. In addition, I was supposed to go back to Poland—on my fifth mission. The Polish Prime Minister's office which organized all of my contacts asked every individual I had been sent to not to identify me publicly.

As to my Jewish materials, I was not the only informant. Since 1941, secret radio contacts with London functioned. Coded data on the Jewish ghetto's deportations, extermination had been regularly transmitted from Poland to London for information and public distribution. Most of the messages, however, were considered as lacking credibility. The head of the secret radio service, throughout the entire war, was Stefan Korbonski eventually, the last head of the Polish Underground State.

The most important personalities in England to whom I made reports on the Jewish situation (November 1942–June 1943):

(1) The Poles

All government and political leaders; Liaison to Cardinal Hlond (at the time residing in the Vatican); Mgr. Kaczynski; Jewish leaders: Zygelbojm (Bund); Szwarcbard (Zionists); Grosfeld (Socialist).

(2) The English: Four members of the War Cabinet

Anthony Eden, Foreign Secretary; Arthur Greenwood, Labor Party; Lord Cranborne, Conservative Party; Hugh Dalton, President of the Board of Trade. Then: Lord Selbourne, War Office, European underground resistance; Miss Ellen Wilkinson, Labor, Member of Parliament; William Henderson, Labor Party leader, Member of Parliament; Owen O'Malley, British ambassador to the Polish government; Anthony D. Biddle, American ambassador to the Polish government.

United Nations War Crime Commission, Sir Cecil Hurst, chairman,

I pressed for and did contact several non-government personalities:

H. G. Welles, world-known author; Arthur Koestler, world-known author; Victor Gollancz, publishing firm of his name; Allen Lane, publishing firm Penguine; Kingsley Martin, editor-in-chief, New Statesman and Nation; Ronald Hyde, editor, Evening Standard; Gerard Berry, editor, New Chronicle;

Action resulting from my mission and—no doubt—other reports:

On December 7, 1942, two weeks after I began reporting, Polish National Council passed a resolution dealing with the Jewish extermination and committing the government to act without any delay. (The text of public record).

Three days later, on December 10, 1942, Polish government issued a formal appeal to the Allied governments concerning the extermination of the Jews in Poland.

On December 17, 1942, the Allied Council (representatives of all Allied Governments) unanimously passed a public Appeal of the Allied Nations in behalf of the Jews.

Two days later, on December 19, 1942, President of the Polish Republic sent a note to Pope Pius XII asking for intervention in behalf of the Jews. (The text reproduced in numerous publication—after the war).

Then, one month later, on January 18, 1943, Polish Foreign Minister, Edward Raczynski presented his government's demands in behalf of the Polish Jews at the Allied Nation's Council: bombing of Germany as reprisals for the continued extermination of the Jews; forwarding demands to Berlin to let the Jews out of the German-dominated countries; demanding action as to make the Allied as well as neutral countries accept the Jews, who succeeded or would succeed in leaving the German-dominated countries.

British Foreign Secretary, Anthony Eden, in the name of H.M. government, rejected all demands, offering vague promises to intervene in some neutral countries. (Minutes of the session eventually became public).

Beginning in March 1943, secret executions of the Polish hoodlums, who acted against the Jews were carried out. The names of the criminals and the nature of their crimes were publicized in the Underground press.

The Directorate of the Civil Resistance which organized Underground courts had been established already in 1942. It was headed again by Korbonski. By the way, he lives just a few blocks away. Last April—36 years after the war ended—he had been decorated by the Israeli Ambassador with a Yad Vashem Medal for the Rightous Among the Nations. I called him to come and listen to my report. He answered that he would love to come—but he was not invited.

In the early 1943 numerous articles, based on my information, appeared in the British press. Public demonstrations had been organized. In May 1943, a pamphlet was published authored by a prominent Soviet writer, Alexey Tolstoy, German writer Thomas Mann and myself (described as a "Polish Underground Worker"). The pamphlet was entitled "The Fate of the Jews."

MY MISSION IN THE USA

In June 1943 at the suggestion of the American Ambassador Biddle, I was sent to Washington, still secretly, under an assumed name, Jan Karski. I stayed there until August 1943, living on the premises of the Embassy. Polish Ambassador, Jan Ciechanowski, supervised my activities and organized my contacts.

I reported to the following individuals (only the most important will be mentioned): Franklin Delano Roosevelt, President of the United States; Cordell Hull, Secretary of State; Henry Stimson, Secretary of War; Francis Biddle, Attorney General; Colonel Donovan, chief, Office of Strategic Services (O.S.S.); Apostolic Delegate, Cardinal Ameleto, Giovanni Cicognani; Archbishop Mooney; Archbishop Spelman; Archbishop Strich; Dr. Nahum Goldman, President, American Jewish Congress; Rabbi Stephen Wise, President, World Jewish Congress; Waldman, American Jewish Congress; Felix Frankfurter, Justice of the Supreme Court; and Backer, Joint Distribution Committee. Publishers and commentators: Mrs. Ogden Reed, publisher, New York Herald Tribune; Walter Lippmann; George Sokolsky; Leon Denned, editor, The American Mercury; Eugene Lyons; Dorothy Thompson; William Prescott, The New York Times; and Frederick Kuh, Chicago Sun.

Upon my return to London, Prime Minister Mikolajczyk informed me that he would not send me to Poland for the duration of the war. I saw too many people in the United States and I became too well-known. German radio mentioned my activities in America, describing me, by the way, as a "Bolshevik agent on the payroll of American Jews." My additional shortcoming—as he explained—were recognizable scars on both my wrists. In June 1940—on my third secret expedition—I was captured by Gestapo in Preshov, Slovakia. Unable to withstand torture, I tried to commit suicide, cutting my veins with a concealed blade. It did not work. Transported to Poland for further interrogation, I had been rescued by the Underground. But, even after a cosmic operation, the scars remained. Gestapo certainly had my files and I became a public figure, he argued.

Two months later, in October 1943, I was sent to the United States—for the second time but openly and again as Karski—to speak, write, report, inform the public-at-large—openly.

Since October 1943, until the end of the war, I delivered some 200 lectures in the United States: from coast to coast; from Rhode Island to Florida. In all of them I spoke about the Jewish tragedy. Every lecture had been reviewed in the local press.

Then came my articles on what the Jews demanded, on what I saw in Warsaw ghetto

and Belsec in Colliers: New York Times; The American Mercury; La France Libre; The Jewish Forum; Common Cause; Herald Tribune; New Europe; Harper's Bazaar. Many of them had been illustrated—several under my personal supervision. Various exhibitions had been organized.

Then, in 1944—still during the war, I published a book, Story of a Secret State. Its central theme was my visits to the Warsaw ghetto and Belsec. The book became Book-of-the-Month Club Selection. Soon after it was published in Great Britain, Sweden, Switzerland, France.

Many of you gave testimony on the Jewish Gehenna. Respect is due to you. The Lord assigned me a role to speak and write during the war, when—as it seemed to me—it might help. It did not.

Later, however, when the war came to its end, I learned that the governments, the leaders, scholars, writers did not know what had been happening to the Jews. They were taken by surprise. The murder of six million innocents was a secret. A "Terrible Secret" as Laqueur reports.

Then, I became a Jew. Like the family of my wife, who is sitting in this audience—all of them perished in the ghettos, concentration camps, gas chambers—so, all murdered Jews became my family.

But I am a Christian Jew. I am a practicing Catholic. And, although not a heretic, still my faith tells me:

The Second Original Sin had been committed by humanity: through commission, or omission, or self-imposed ignorance, or insensitivity, or self-interest, or hypocrisy, or heartless rationalisation.

This sin will haunt humanity to the end of time.

It does haunt me. And I want it to be so.●

SAVING OUR SAVINGS AND LOANS

HON. RICHARD A. GEPHARDT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. GEPHARDT. Mr. Speaker, the American housing industry is in deep trouble today. Housing starts are at record lows. Interest rates are near record highs. Millions of Americans want to buy homes but cannot afford the monthly payments. Thousands of construction workers are laid off and do not have a hint of when they will be called back. It is not an overstatement to say that our housing industry is in the middle of a depression. Their partner in pain is the savings and loan industry.

My goal today in announcing my support for H.R. 5135 and H.R. 5136 is to help solve the problems of both these industries. It is clear that lower interest rates are required. And it is equally obvious that moves that encourage financial institutions to pay more for the money they borrow will raise the price of mortgages beyond their currently intolerable level. Allowing this trend will also be the death knell for hundreds of savings and loan associations throughout America.

These two pieces of legislation would restrict actions by the Depository Institutions Deregulation Committee and subsequently remodel it. They are sorely needed now. As one who has supported the general trend toward deregulation throughout our society, I do not take this step lightly. It is my belief, however, that a deregulation program that leads to the disappearance of the savings and loan associations that have served us so well in the past is not in the interest of savers, homebuyers, or Americans generally. It is not in the national interest.

I hope we soon act to address the problems these bills would solve.●

APPRENTICESHIP BILL GAINS SUPPORT (H.R. 4884)

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. CLAY. Mr. Speaker, I am sponsoring a bill to strengthen the role of apprenticeship programs, sponsored by the Department of Labor, in an effort to help fight our Nation's high unemployment problem. In the few weeks since I introduced the National Apprenticeship Act Amendments (H.R. 4884); the bill has generated considerable attention and a great deal of support. I would like to share with my colleagues a letter I received from one of my constituents, Mr. John E. Hinkson, director of the Department of Apprenticeship and Training at the St. Louis Construction Training & Advancement Foundation. Mr. Hinkson's letter clearly expresses the need to enact this legislation and is typical of the many expressions of support my office has already received on this subject.

I was extremely pleased to read that H.R. 4884 was recently introduced by Congressman William L. Clay and Congressman Carl D. Perkins. I would like you to know that I support this bill in its entirety.

When I became involved in apprentice training in our industry in 1957, the Bureau of Apprenticeship and Training was an independent agency and representatives worked very closely with my organization and myself personally. I soon became aware of the influence they had on our business and the guidance they afforded to all who needed assistance. Over the years, the Bureau's position has been eroded because of the role imposed on it under the Manpower Administration in the late 60's, and under ETA and the tie into CETA in the 70's.

As Training Director for the Associated General Contractors of St. Louis, I have been in contact with the Bureau almost weekly, and except in a very few/rare instances, there has always been a spirit of cooperation and a willingness to assist in any way possible by BAT personnel. As you know, this is contrary to many other government agencies.

It is my opinion that a strong and independent Bureau of Apprenticeship and Training is essential to the continued growth of apprenticeship in our industry for many reasons, but not the least of which is standardization so that people can move from one program to another throughout the country without losing the benefit of the training received in another program. Also, the Bureau should be staffed sufficiently to assist and to encourage the development of additional programs where there are none. H.R. 7274 approved August 16, 1937, provided for this. H.R. 4884 re-establishes the original intent.

I support, as do most Americans, the efforts of Congress and the President in attempting to cut waste in government and the use of available funds in a way that will give the greatest benefit to the public. Expanding the Bureau of Apprenticeship and Training and establishing it as an independent agency is not in conflict with these efforts. An adequately staffed, independent Bureau will assure the continued training of people for all segments of industry using private funds, not government funds. BAT field representatives work with dozens of training committees who are responsible for thousands of apprentices in the private sector and the government is paying for only one staff person. I submit that is a bargain.

A.G.C. training directors have for years been trying to maintain the tradition of apprenticeship as a vehicle to satisfy the manpower needs of our industry. H.R. 4884 is necessary in the continuation of the efforts we are all making.

I find it hard to put into words how strongly I feel about what has happened to BAT over the years. Ineffective programs should be eliminated. Our national apprenticeship system under BAT must be preserved, and in fact as I stated, should be expanded. Our country depends on trained people. Training people in the private sector with private funds is the most economical and efficient way to get the job done.

Your support of this bill is respectfully solicited and will be greatly appreciated.

Sincerely yours,

JOHN E. HINKSON,
Director,
Department of Apprenticeship and Training.●

REPORT ON NICARAGUA

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. LAGOMARSINO. Mr. Speaker, this week's Time Magazine offers an up-to-date account of conditions in Nicaragua and the strain this imposes on our relations with that country. I urge my colleagues to consider carefully this report on Nicaragua and the alternative policies the United States may have to consider in dealing with the growing military threat to the rest of the region.

[From Time, Dec. 14, 1981]

NICARAGUA—LIFE IN THE BUNKER REPUBLIC

(By George Russell)

For weeks, Secretary of State Alexander Haig, White House Counsellor Edwin Meese and other senior U.S. officials have been is-

suing a series of increasingly bellicose warnings about the behavior of Nicaragua's Marxist Sandinista government. The U.S. is concerned about what Haig calls the "drift toward totalitarianism" of the Nicaraguan regime, the presence of some 1,500 Cuban military advisers in the country and the role of Nicaragua in supporting the left-wing guerrillas in El Salvador. Haig is also irked by Nicaragua's own heavy arms buildup, which he believes is sponsored by Cuba and the Soviet Union. As one U.S. official put it, the buildup threatens to turn the tiny republic (pop. 2.7 million) into "a super power in Central American terms."

Despite those sharp expressions of concern, the Reagan Administration was at pains last week to show that it was still trying to hold its temper. At a meeting of the Organization of American States on the Caribbean island of St. Lucia, Haig said that the U.S. "is prepared to join others in doing whatever is prudent and necessary to prevent any country in Central America from becoming the platform of terror and war." As Nicaraguan Foreign Minister Miguel d'Escoto Brockmann listened gravely, Haig added that "if Nicaragua addresses our concerns about interventionism and militarization . . . we do not close the door to the search for proper relations."

There is no ignoring Nicaragua's military buildup. The Sandinista arsenal now includes some 30 Soviet tanks, and the Reagan Administration suspects that MiG-21 aircraft may soon be shipped to Nicaragua, giving that country clear air superiority over its neighbors. On the ground, Nicaraguan military strength is already well established; the Sandinista army of 26,000 is at least twice the size of any other in Central America. In addition, Nicaragua has a "ready reserve" force of 40,000.

Reagan Administration officials maintain, despite Nicaraguan denials, that Soviet arms in Nicaragua are, in turn, being handed on clandestinely by the Sandinista government to aid Marxist guerrillas in El Salvador and other neighboring countries. For that reason, Washington in January decided to suspend some $15 million in promised U.S. aid to Nicaragua. That was possibly an unwise decision, since it reinforced Sandinista charges that the Reagan Administration is merely out to ruin the country. In their recent statements, both Haig and Meese have ruled out unilateral U.S. military intervention in Nicaragua as an antidote to the flow of arms, but they have ruled out little else. Both officials, in fact, have said that a naval blockade of Nicaragua or other drastic measures could not be excluded as an eventual possibility.

The Reagan Administration's tough stand comes at a time when the exuberant optimism that followed the July 1979 overthrow of the government of Anastasio Somoza Debayle has all but evaporated. After 28 months in power, a kind of bunker mentality seems to have settled over the nine-member Sandinista national directorate that controls the country. Economically, Nicaragua is on the rocks. Politically, the Sandinista leadership is betraying itself as insecure, arbitrary and determined to hold on to power, come what may. Says one Western diplomatic analyst in Managua: "They've made up their minds they can't come to an understanding with the U.S., largely because of the El Salvador question. I think they are willing to take this country down to a subsistence economy and absolute misery if necessary."

The basis of that Sandinista position is evident enough: stubbornness, a condition that Washington's statements have only helped deepen. Still, the stridently pro-Cuban and pro-Soviet policies of the directorate are not at all what most Nicaraguans had in mind when they welcomed that conquering guerrillas into power in 1979. Ever since then, the Sandinistas have been trying to impose some form of one-party, Marxist-Leninist rule on the country, while pluralistic forces, especially the private business community, are trying to retain free speech, a free press and the right to free assembly.

In September the Sandinistas declared a "state of economic emergency," banning strikes, profiteering and the distribution of news or information deemed to be injurious to the economy. The government also increased its attacks against the Superior Council of Private Enterprise, known by its Spanish acronym COSEP, which represents the beleaguered 50 percent of Nicaraguan private enterprise that has not been nationalized since the 1979 revolution.

Sandinista speeches also began to take on a decidedly paranoiac tinge, helped along, in part, by U.S. naval maneuvers last October off the nearby Honduran coast. When Nicaraguan Defense Minister Humberto Ortega warned that the country's enemies "will be hanging along the roads and highways" in the event of a U.S. invasion, COSEP leaders reacted. In an open letter, they charged that "the national economy shows no signs of recuperation, social peace has not been found, the country finds itself in spiraling debt, with no foreseeable end." The directorate thereupon threw four COSEP leaders in jail, along with 22 Communists.

In one sense, the Sandinistas had reason to be thin-skinned, since the Nicaraguan economy is in shambles. The country's foreign debt has more than doubled, from $1.5 billion at the time of the revolution in July 1979 to $3.5 billion today. Per capita income has dropped from $300 a year to less than $200. Nicaragua faces a balance of payments deficit next year of $450 million. the Sandinistas have been borrowing to the limit from Mexico, the Soviet Union and most recently, Libya. Says one Western diplomatic observer: "They say no country really ever goes bankrupt, but no country has quite had Nicaragua's experience before."

As the economic crisis has deepened, gangs of Sandinista goons, known as turbas, have roughed up outspoken critics of the government, including, in at least one case, a Roman Catholic bishop. Last month, the directorate also tried to squelch publication of the first major public opinion poll taken in Nicaragua since the revolution. Sponsored by the staunchly independent newspaper La Prensa, the poll showed that 70 percent of Nicaraguans want free elections (which the directorate has postponed until 1985 at the earliest), and that 64 percent feel that their lives have not improved since 1979.

At the same time, the Sandinistas have shown little sign of abandoning their support for the guerrilla insurgency in El Salvador. Signs at Managua's César Augusto Sandino Airport proclaim: Revolution or Death. El Salvador will be victorious. It is an open secret in Managua that the Salvadoran guerrillas maintain a major military command post in the Nicaraguan capital, on the same avenue as the American embassy. The city also serves as a way station for Salvadoran guerrillas who are either recuperating from their warfare or are in transit to Cuba.

Despite Sandinista stubbornness, there has been a pause lately in the frequent temporary shutdowns of La Prensa. The government hints that it will soon release the imprisoned COSEP leaders. A source close to the Sandinistas has declared that a completely Marxist-Leninist state may be "out of reality" for Nicaragua right now.

The signs of reasonableness, however, may be no more than a temporary tactical accommodation on the part of the Sandinistas. As one diplomat in Nicaragua puts it, "the periods of accommodation are getting so brief that they are invisible." Warns another critic of the regime: "For a long time the Nicaraguans have always had a sense of when to pull back. I'm just afraid that the Sandinistas lack the intelligence, or the capability, or simply the will to do it this time.●

DAVID AND CAROLINE WALLERSTEIN

HON. SIDNEY R. YATES

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. YATES. Mr. Speaker, more than 200 years ago, representatives of the people of the United States met to form a more perfect union. Just about 50 years ago David and Caroline Wallerstein stood together to form their more perfect union. Now, 50 years later, on December 26, they will celebrate their 50th wedding aniversary.

That the 50th wedding anniversary is a triumph of hope, love, and understanding is so true for the Wallersteins. David and Caroline have been for all their lives good to each other, to their friends, to their communities, and to their country. They care and they share.

They have been our close personal friends for almost as many years as they have been married. It is a friendship which we cherish and in which we take pride. We extend our love and congratulations to them. We wish for them many, many more years of health and happiness, of continuing to share the joys each brings to the other.●

SOUTHWEST TEXAS STATE UNIVERSITY—NATIONAL NCAA CHAMPIONS

HON. J. J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. PICKLE. Mr. Speaker, to paraphrase an old poet, somewhere in the land today the crowds are cheering, and somewhere the sun is shining bright.

And I know that the Members of this august body will be gratified to hear that "somewhere" in this case is San Marcos, Tex., where the sun almost always shines brightly, and where the crowds are cheering because

Southwest Texas State University has won the NCAA division II national football championship.

As is befitting the alma mater of Lyndon Johnson, the "Bobcats" were not content merely to take the championship, but did so in such a way as to leave no doubt that they are the finest team in their division, or perhaps anywhere. Last week, in the semifinals, they defeated a highly respected team from Michigan 62–0. This past weekend, playing North Dakota State in the Palm Bowl for the national title, Southwest Texas dominated in the same way, 42–13.

I do not wish to brag too much, Mr. Speaker, for the results of the division I bowl games are not in yet, and I suppose it is remotely possible that some other congressional district, or—the Good Lord forbid—some other State, might by luck or chance top the University of Texas. It is doubtful, of course, but we cannot always account for fate.

Still, it is a great pleasure and pride for those of us in central Texas to know that whatever else happens we have national bragging rights for at least the next year. I am proud and glad for the administrators, coaches and especially the young people who proved equal to their highest goals this season, as I know everyone around San Marcos is proud of them. Our late President Johnson would be proud too. He always appreciated excellence and determination, and the Southwest Texas Bobcats have demonstrated plentiful quantities of both.●

HEROIC RESCUE EFFORT

HON. TONY COELHO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. COELHO. Mr. Speaker, last summer a 14-year-old girl named Stacey Arras disappeared while camping at Sunrise High Sierra Camp in Yosemite National Park. An exceptionally well-coordinated rescue effort was mounted immediately upon discovery of her disappearance thanks to the dedicated, skillful efforts of concerned individuals and groups in the area. Tragically, Stacey was never found despite the valiant efforts of the searchers. I would like to take this opportunity to bring this heroic effort to the attention of my colleagues, and to thank the participants for the time and energy they put forth. Following is a list of those who helped:

Mr. Charles McIntosh, San Diego Search and Rescue, San Diego.

Mr. Tim McGruder, Saddleback Search and Rescue, Tustin.

Mr. Arnold Gaffrey, Sierra Madre Search and Rescue, Sierra Madre.

Mr. Wayne Campbell, Bay Area Mountain Rescue, Oakland.

Mr. Pat Elliot, Inyo Co. Search and Rescue, Bishop.

Mr. Ben Schifren, Tuolumne Co. Search and Rescue, Pinecrest.

Mr. Timothy Fives, Sylmar Search and Rescue, Valencia.

Mr. Bruce Parker, Montrose Search and Rescue, Glendale.

Mr. Mike Edwards, San Jose Search and Rescue, San Jose.

Mr. Doug Magee, June Lake Search and Rescue, June Lake.

Mr. Maury Ducasse, San Mateo Search and Rescue, San Mateo.

Mr. Richard Burns, Altadena Search and Rescue, Altadena Sheriffs Office, Altadena.

China Lake Mountain Rescue Group, Ridgecrest.

Mr. Walt Walker, Riverside Mountain Rescue, Riverside.

Mr. Mike Peterson, Los Padres Search and Rescue, Santa Barbara.

Mr. Van Williams, Malibu Search and Rescue, Pacific Palisades.

Ms. Sandy Bryson, WOOF, So. Lake Tahoe.

Capt. J. M. Gleim, Commanding Officer, Naval Air Station, Lemoore.

Headquarters, ARRS/AFRCC, Scott Air Force Base, Ill.

Mr. Don Roberts, Inyo National Forest, Bishop.

Mr. Aubrey Majors, Chief, Central Division, Calif. Highway Patrol, Fresno.

Wing Commander, 146th Tactical Airlift Wing, Van Nuys Air National Guard, Van Nuys.

Mr. C. J. Johnson, Dist. Manager, Pacific Telephone & Telegraph, Fresno.●

PARRIS EXPRESSES SUPPORT FOR POLAND

HON. STAN PARRIS

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. PARRIS. Mr. Speaker, I am strongly concerned over the recent events occurring in the country of Poland this weekend. I have always supported the concept of a nation governing itself without any outside interference from any country.

I recently cosponsored House Joint Resolution 124 which passed this House overwhelmingly on July 30. This resolution expresses the U.S. concern for the people of Poland should any external aggression or internal repression take place.

The United States is closely monitoring the current situation to insure that the people of Poland have an opportunity to resolve their internal problems without any external interference. Should Soviet military intervention occur, the United States has stated that such an occurrence would have serious consequences for East-West relations.

I urge my colleagues to be aware of the delicate situation in Poland and to support any actions by the United States which give the people of Poland a chance to govern themselves.●

THE POLISH CRISIS

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. MURTHA. Mr. Speaker, the hearts of all the freedom-loving people of the world go out to the brave Polish people in this time of crisis. At a time of year when many organizations consider who to choose for the "Man of the Year," I believe the "People of the Year" are the citizens of Poland.

It is my belief that the crackdown by the Polish Government over the weekend is one of the most serious developments since World War II. The Polish people have been fighting out from under a Communist system that has already caused them great suffering. The Polish situation is the perfect example of the failure of the Communist system. The nation has a failing economy, a shortage of key goods, major overseas debts, and after that record of failure, the Government now feels compelled to try to remove the people's hard won freedoms.

The actions this past weekend verified the worst fears of the free world. It is my deep and heartfelt hope that the gains made by the Polish people for freedom and human dignity must not be totally lost.

I believe it is a time for careful, decisive action by the Government of the United States. I recommend:

One. U.S. efforts at the United Nations to appoint an international fact-finding committee for the purposes of reporting to the world on the situation within the country and working to insure that individuals are treated reasonably and that international pressure is brought to bear against any attempts at bloodshed and reprisals against the leaders and members of the Solidarity Labor Union.

Two. The United States should make it clear that Soviet military intervention in the Polish situation will result in the strongest possible U.S. reactions. I have no doubt the Soviet Union forced the weekend crackdown, and efforts must be made to remove them from the situation and allow the Polish people to settle their own difficulties. The United States should make it clear that Soviet direction of the Polish situation will result in: One, removal of U.S. negotiators from the SALT missile limitation talks; two, a complete embargo of trade with the Soviet Union; and three, move to eliminate all Western aid of any type to the Soviet Union. It must be made clear they cannot intervene militarily with impunity.

Our hearts go out to the Polish people and those who care about freedom, liberty, and justice throughout the world must continue to recognize

and work to support their brave struggle.●

THE SOVIET ROLE IN THE MIDDLE EAST PEACE PROCESS

HON. LARRY WINN, JR.

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. WINN. Mr. Speaker, by next spring the United States will have over 1,100 fully armed troops stationed indefinitely in the Sinai Peninsula. The American military personnel will serve as part of a multinational peacekeeping force to monitor Egyptian and Israeli compliance with their peace treaty once Israel withdraws from the Sinai in April 1982. In addition to playing the major role in the 2,500-man peacekeeping force, the United States will also pay the lion's share of the costs—close to $290 million over the next 3 years alone. Moreover, this country has agreed to use its diplomatic influence to bring other nations, including Colombia, Fiji, France, and Great Britain, into the force.

The commitment of U.S. military personnel to the volatile Middle East is not a responsibility the United States has lightly assumed. Indeed, when the Egyptian-Israeli Peace Treaty was signed in 1979, it was envisaged that the United Nations would perform the peacekeeping function in the Sinai. Only if the U.N. failed to provide a peacekeeping force would the United States, in fulfilling a written pledge by President Carter, put together an alternative multinational force for the Sinai.

That there will be no United Nations force for the Sinai is the result of Soviet opposition. The Soviet Union, which does not support the Egyptian-Israeli Peace Treaty, made it clear it would use its Security Council veto to block the creation of the intended U.N. peacekeeping force. It is instructive to draw attention to this fact now when there is much discussion of the demise of the Camp David peace process and calls for its replacement by a comprehensive approach to achieving a Middle East settlement. In such a comprehensive approach, the Soviet Union would play a central role. But Soviet involvement in the Middle East peace process would only impede further progress toward an agreement. The Soviets are in the Middle East to make trouble, not peace, as the record plainly shows:

First, the Soviet refusal to agree to a U.N. peacekeeping force for the Sinai is not the first time Moscow has derailed U.N. peacekeeping efforts. In 1979, the Soviet Union refused to permit the renewal of the mandate of the U.N. Emergency Force (UNEF) which had monitored ceasefire arrangements in the Sinai since 1973.

Second, the Soviet Union owes more than $112 million for the upkeep of United Nations peacekeeping forces in the Middle East established since 1956. Moscow has refused to pay its assessment for U.N. peacekeeping activities in the Sinai from 1956 to 1967 and from 1973 to the present. And the U.S.S.R. has not paid its assessed share of the costs for the United Nations Interim Force in Lebanon (UNIFIL) from 1978 to the current time.

Third, more damaging yet to the prospects for peace in the Middle East has been the Soviet role in conflict situations. In brief, where the Soviets go, conflict, insurgencies, and terrorism follow. The Kremlin's confidence that its Arab proteges would win the 1967 war led to Soviet diplomatic efforts at the U.N. to delay a ceasefire. Superpower involvement in the 1973 war began with the Soviet Union's resupplying the Arab States with arms and ammunition on a large scale and urging nonbelligerent Arab States to join the war. And there have been more recent examples. In 1979, South Yemen attacked North Yemen with obvious Soviet support and assistance. An end to the conflict was eventually possible through Arab mediation efforts from which Moscow kept completely apart despite U.S. requests for active Soviet involvement. The Soviets, of course, have been supplying both Iran and Iraq with weapons during their war and have kept conspicuously aloof from attempts to resolve this conflict peacefully. Meanwhile, they have continued a military buildup on their border with Iran. The Soviet Union's unwillingness to use its influence with Syria and the PLO to resolve peacefully the 1981 Lebanese crisis is well documented. Far from moderating the bellicose behavior of Syria, the Soviets indicated that they would back Damascus in military action against Israel while they exercised naval forces in the eastern Mediterranean at the height of the crisis. Since the summer, Moscow has continued, directly and indirectly, to supply the PLO with heavy weaponry which threatens to destabilize the current fragile cease-fire—a cease-fire that the Soviets played no role in negotiating.

Fourth, over the past decade, the Soviets have conducted an impressive expansion of their military forces and assets throughout the Middle East—in South Yemen, Ethiopia, Libya, Syria, and Afghanistan. Through the Soviet presence on both sides of the Bab el-Mandab Strait and near the Persian Gulf, Moscow could now bring to bear a significant military force on chokepoints vital to Western energy supplies and security.

In contrast then with the United States, which works to improve the economic condition of Middle Eastern states and to promote the resolution of regional conflict through mediation and now even by participation in peacekeeping forces, the Soviet Union furthers its own strategic ends by exploiting misery and creating unrest. Through a combination of subversion and massive arms supplies, Moscow deepens its own influence, extending its coercive reach over our friends—and the region's oil. President Sadat recognized this underlying reality of divergent U.S. and Soviet interests in the Middle East when he went to Jerusalem to end the 1977 efforts at a comprehensive peace approach and set in motion the Camp David process. It is time, once again, to recognize that the Soviet Union will not and cannot contribute to the peace process and that a comprehensive effort which involves Moscow will only lead to a dead end. It is, therefore, important for all concerned to reaffirm their faith in U.S. efforts to promote peace in the Middle East through the Camp David process, which still holds the greatest hope for a resolution of the Arab-Israeli conflict.●

A TRIBUTE TO DAVE RIGHETTI

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. MINETA. Mr. Speaker, it gives me great pleasure to rise today to honor an outstanding athlete from San Jose, California, Mr. Dave Righetti, the American League's Rookie of the Year for 1981.

Dave is a San Jose native who attended Pioneer High School and San Jose Community College. He was originally signed by the Texas Rangers. In 1978, the New York Yankees acquired Righetti from the Rangers and had him play triple-A ball before bringing him to the major leagues; 1980 was a disappointing year for Dave, with a 6-10 record and a 4.93 ERA. But he worked hard in the off season and in spring training this year he showed real promise. After winning his first five decisions in the minor league, the Yankees called him up.

Dave's pitching coach, Clyde King has called him "an intelligent young pitcher. He knows what he's doing with his pitches." As a major leaguer this year he posted an 8-4 record and had a 2.05 earned-run average.

During the American League playoffs, Dave had the chance to pitch against the hometown favorites, the Oakland A's. Even though Dave was not in his best form, he still led the Yankees to a 4-0 victory on their way to a World Series berth. A's manager, Billy Martin, when asked about Righetti said "He's one of the best pitchers to come along in a long, long time."

After an exciting season which took him to the World Series in his rookie year, Dave got to face another rookie sensation in his World Series debut, Fernando Valenzuela of the Los Angeles Dodgers. The baseball world had not seen two rookie pitchers facing each other in a World Series game since 1950 when Whitey Ford of the New York Yankees defeated Bob Miller of Philadelphia. Many of Righetti's admirers feel certain that Righetti is on his way to a Whitey Ford-like career.

Mr. Speaker, I ask you and all my colleagues in the House of Representatives to join me in congratulating Dave Righetti on an outstanding season and for being named Rookie of the Year. He deserves the very best in the years to come.●

A TRIBUTE TO DOROTHY CASEY

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. LENT. Mr. Speaker, the cynics among us are very fond of stating that our country is dominated by a "me" generation interested only in their own selfish needs. I consider that a sadly distorted view of our great Nation and its responsible, civic-minded citizens.

Therefore, it is with great pleasure, Mr. Speaker, that I rise to call to the attention of my colleagues the outstanding record of dedicated service to the needs of others established by Mrs. Dorothy Casey, a resident of North Merrick, N.Y., in my Long Island congressional district. Her selfless devotion clearly demonstrates how mistaken are those who believe Americans think only of themselves.

For more than a decade, Mrs. Casey has given wholeheartedly of her time and effort to activities involving the Nation's No. 1 child health problem—birth defects. For year after year, Mrs. Casey has unstintingly volunteered her services for a multitude of March of Dimes activities dealing with this major child health problem.

She has been a member of the March of Dimes executive board for 6 years, and currently serves as secretary of the Long Island chapter. She has played a major role in the chapter's vital fundraising activities such as telephone pledge drives, the door-to-door Mothers' March, and the annual Walk America Walk-a-thon. She has chaired many of these fundraising events.

In addition to these activities, Mrs. Casey has represented the March of Dimes at numerous volunteer conferences, and attended medical symposiums at North Shore Hospital.

No task was too small, no challenge too difficult for Mrs. Casey.

In recognition of her outstanding record of countless hours of volunteer service to others, Mrs. Casey is to be honored by the Long Island March of Dimes on Sunday, January 31, 1982, at a special dinner dance in her honor.

Mr. Speaker, I know that all of my colleagues will join me in adding our congratulations and best wishes to Mrs. Casey for her compassion and her tremendous desire to help others. Her dedication to the betterment of mankind is an inspiration to every American.●

ALASKAN NATURAL GAS PIPELINE

HON. BOB SHAMANSKY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. SHAMANSKY. Mr. Speaker, I regret that my colleagues adopted the Alaskan Natural Gas Pipeline Waivers.

Like most of my colleagues on both sides of this issue, I support construction of the Alaska natural gas pipeline if it will provide secure supplies of gas to American consumers at a reasonable price. Alaskan natural gas supplies are unquestionably important to this Nation's long-run energy independence. The proven gas reserves in Alaska constitu e 13 percent of the Nation's gas reserves. This gas could replace 400,000 to 600,000 barrels of imported oil a day. Congress in 1977 approved the pipeline with the condition that the entire pipeline be completed and gas flowing before consumers are billed for any of the pipeline's costs.

On September 22, 1977, John McMillian, chairman of the Northwest Oil Co., told the House Commerce Committee:

> The President's decision requires that the project be privately financed in its entirety. The United States and Canadian Governments will not be called upon for financial guarantees . . . Nor will consumers have to bear the hypothetical burden of noncompletion of the project . . . Instead, other primary beneficiaries of the project will be called upon to provide the necessary financial backing. We believe that Alcan can obtain the necessary project financing from Canadian and United States sources.

Now Mr. McMillian and his firm have changed this condition for their own convenience. Does anybody really believe that the oil and gas companies involved do not have the wherewithal to provide financial backing for this pipeline? It is incredible to me that anyone can claim they don't.

The same oil and gas industry and the same administration that came here and said, "Let the market operate", today have changed their message. They now are asking the public to step in and shield them—at the consumers' expense—from the decisions of the marketplace.

The major banks have scrutinized this project and concluded there is a sizable risk that the pipeline might not be completed or, if it is, that the Alaskan gas might not be marketable. Stanley Lewand, vice president of Chase Manhattan Bank, told the Committee on Energy on October 30, 1981:

> Lenders have indicated . . . that they are not willing to accept the risks that the delivery system might not be completed . . . and that they must be assured of the timely repayment of their debt and interest thereupon.

Oil companies ask why should they take the risk. Instead they urge that consumers in 36 States should underwrite this project. This means consumers will be forced to assume the risk that the pipeline might not be completed—a risk financiers such as Mr. Lewand have concluded is too great for them to underwrite. In other words, I find it unreasonable and unacceptable that the people of central Ohio will be put in a position where they might have to pay for natural gas which they may never use. Unfortunately, that is what this bill provides.

According to the Office of the Federal Inspector, average residential monthly gas bills would increase by $1.37 to $2.30, commercial gas customers' would rise by $8.79 to $14.82 a month, while industrial customers' bills would rise by $387 to $610 a month—all in 1980 dollars.

As a U.S. Representative it is my job to support measures that increase productivity, reduce regulatory impediments, encourage energy supply and protect the consumer from undue hardship. It is not my job to ask my constituents to assume a risk that the financial community will not accept. A better arrangement should have been worked out for gas consumers.●

THE INTER-AMERICAN FOUNDATION: AN AMERICAN SUCCESS

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. GARCIA. Mr. Speaker, I would like to pay special tribute to the Inter-American Foundation, "a corporation created to support the self-help efforts of poor people in Latin America and the Caribbean." The Foundation was founded in 1969 as a semiprivate institution with an independent board of directors. Its independent status enables it to remain apart from the caprices of immediate foreign policy considerations. Also, because it responds directly to the requests of local, non-Government organizations, assistance intended for the poor and underprivileged is not absorbed by governments.

The Foundation does not initiate projects; it responds to them. Non-

Government groups approach the IAF with a project proposal, it evaluates their requests, then decides whether or not the project is worth funding. What makes the work of the Foundation so special is that the beneficiaries of its grants put in their own time, labor, and money to guarantee the success of a project. More often than not, each dollar given by the Foundation is matched by funds from local groups. Bureaucracies and redtape are bypassed because the Foundation goes directly to local, non-Government organizations.

A typical Foundation grant was recently made to the Holy Cross Fathers in Haiti. The grant, although small, will nonetheless enable IDEA, a church-supported organization, to expand its adult education program and community development activities in Cap Haitien, Haiti. Considering the difficulties the United States is having in handling the Haitian refugee question, a grant that helps Haitians help themselves should not only be encouraged but applauded.

The Foundation fosters creativity. It helps the poor to better themselves without making them permanently dependent on public funds. The IAF has a small staff, well versed in the cultures, languages, and problems of Latin America and the Caribbean. All of our Government's foreign aid programs would be well advised to follow the example set by the Foundation. The Inter-American Foundation brings capitalism with a human face to Latin America.●

LITA ANNENBERG HAZEN AWARD FOR EXCELLENCE IN CLINICAL RESEARCH CITED

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. GREEN. Mr. Speaker, It gives me great pleasure to insert into the RECORD the remarks of Edward N. Brandt, Jr., M.D., Assistant Secretary for Health, Department of Health and Human Services, who spoke on the occasion of the third annual Lita Annenberg Hazen Award for Excellence in Clinical Research, December 8, 1981.

The $100,000 award is presented to a physician and his chosen research fellow, whose investigative studies have changed the medical profession's knowledge and consequent treatment of a disease. This year, the award was made to Dr. Aaron B. Lerner, M.D., Ph.D., professor and chairman, Department of Dermatology at Yale University School of Medicine, for his groundbreaking work in the study of melanomas and his contribution to immunology, endocrinology, and neurobiology.

Established in 1979 by Mrs. Lita Annenberg Hazen, the award is a reflection of her concern about the steady decline in the number of physicians choosing research over private practice in this country. With the reduction of Federal funds for biomedical research, private sector funding, such as the prize established by Mrs. Hazen, plays an increasingly important role in clinical investigation.

Dr. Edward N. Brandt, Jr., keynote speaker at the award ceremony, emphasized the importance of cooperation among government, industry, and academic research communities to insure the overall health of American scientific research during these difficult times when funds are scarce.

It gives me great pleasure to share his remarks with my colleagues.

LUNCHEON ADDRESS BY EDWARD N. BRANDT, JR., M.D., ASSISTANT SECRETARY FOR HEALTH, U.S. DEPARTMENT OF HEALTH AND HUMAN SERVICES

It is a privilege for me to be here today to share in this special moment of recognition for the distinguished recipient of this year's Lita Annenberg Hazen Award.

I applaud Dr. Aaron B. Lerner's accomplishments in clinical research—and I congratulate Mrs. Hazen, Dr. Tom Chalmers, President and Dean of the Mount Sinai Medical Center and the Award Committee, and everyone involved in this important program.

It's not often I have the opportunity to speak to one audience about two very important issues for American medicine. But today's event is a unique reflection of these two issues: the status of America's biomedical research capacity and the role of private, non-government support for such research.

As to the condition of our research capacity, I believe we have the strongest biomedical research enterprise in the world. Part of that strength is its diversity—the laboratories in state-supported and private colleges and universities, in private non-profit research institutes and foundations, and in for-profit laboratories supported by industry.

Because of this diversity, research in America enjoys a high degree of independence. And by any measurement you choose for demonstrating leadership and results, our independent, diverse research capacity remains one of the wonders of the world. In fact, I would guess that our breadth of diversity and the independent nature of our researchers make the Lita Annenberg Hazen Award Committee's tasks especially difficult—but also especially satisfying, once the choice is made.

But there are warning signs of difficult times ahead. Currently, about 60 percent of all research in America is carried out in college and university facilities. Private industry and Federal intramural research each account for about 15 percent. Non-profit organizations carry out the remaining 10 percent. In clinical and biomedical research, the university role is even more prominent. It would include work done in university-affiliated medical centers and institutes, which many of you here today represent.

The growth of the publicly-funded university has been extraordinary over the past 30 years, so that the "diversity" I mentioned earlier is heavily weighted toward public institutions. Since 1950, enrollment in publicly-funded higher education rose from 50 percent of all students to nearly 80 percent of all students. Private colleges and universities had only an estimated 22 percent of all higher education enrollment last year.

That proportion of research done at universities is not frozen at the 60-percent level. It is growing, a trend that is related to the gains in students, faculty, and facilities. On the other hand, the Federal Government—under very difficult fiscal pressures—is trying to maintain a reasonable level of effort for its own intramural research; the government understandably chooses to invest most of its research dollars in extramural projects. This is especially true in clinical research.

Industry has been more forthcoming in its contributions to basic, clinical, and applied research over the past 10 years. Most of its money has gone to university research groups. As Lewis Branscomb, Vice President and Chief Scientist of I.B.M. candidly admits, "most companies do not provide a natural haven for basic research; its natural home is the university."

Unfortunately, neither the Nation in general nor industry in particular is either raising or even maintaining a level of support, relative to economic activity generally. For example, in the decade of the 1970's overall investment in basic research as a percentage of our gross national product declined by 20 percent. Industry's research investment—as a fraction of sales—fell by nearly 30 percent. It also continues to decline as a percentage of corporate pretax income.

We must understand that most of this decline is a function of inflation, which has expanded virtually all ledger accounts for both government and industry, usually at the expense of that one important line item: Research. But it's a decline nevertheless.

In an article written for the Committee for Corporate Support of Private Universities, Mr. Branscomb of I.B.M. observed that "the net revenue of corporations tends, in the aggregate, to rise with inflation, and along with it, the potential for corporate contributions. Thus," says Mr. Branscomb, "corporate support is indexed philanthropy, in that it grows with inflation."

Then why the decline in support for research? Because, as Lewis Branscomb says, this is "the potential for corporate support." Later, in that same article for the Committee, Mr. Branscomb admits that "whenever one looks for corporations which might be willing to support some academic need—whether it be a new initiative in research, or to help increase the participation of minorities in science and engineering—the names of only a half dozen to a dozen major companies are consistently mentioned."

What should our response be to these warning signals? What is the best strategy for strengthening the research capacity in private universities and in industry? What are our options for being able to purchase more and better clinical research with dollars shrunk by inflation?

I believe that the research community, our academic leaders, and the management of business and industry are beginning to spend more time—together—in confronting these issues in order to solve them for their own—and our country's—best interests. Varieties of new, close relationships are developing such as the M.I.T.-Exxon contract and the new Whitehead Institute that is affiliated with M.I.T. Also, Monsanto and Seagram's agreement with Harvard, Mallinckrodt's grant to the University of Washing-

ton for work on hybridomas, the Shell Foundation and Princeton . . . slowly but steadily the list is growing.

M.I.T.'s President Paul Gray has been a strong proponent for "reinvigorating a research relationship with industry." He says that "universities are one of the primary sources of creative thought in society. But," he adds, "creative thought does not in itself insure the transfer of invention to the world in a useful way."

I think his point is well taken—except for one caveat: clinical research, as we have been practicing it in this country for nearly a century, insures or guarantees nothing but hope for a successful result. In fact, many successful results of basic and clinical research turn out not to be very useful or commercially attractive. Yet, unless we are comfortable with the mixed outcomes of our diverse and independent research enterprise, we will never celebrate its occasional and extraordinary victories in the years ahead.

Dr. Lewis Thomas, President of Sloan-Kettering, made this important point in one of his columns for the New England Journal of Medicine early last year. He titled his column "On Science Business" and he wrote:

"We are beginning to draw from a bank of stored information in biomedical science, and I suspect that we are doing something like this in the physical sciences as well. There is some danger," he says, "that the need to continue depositing new information in that bank will be overlooked in the pressure for quick applications."

Dr. Thomas urges everyone involved—government, industry, and the academic and research communities—to be "willing to run risks of being wrong." He realizes that this is costly and time-consuming and frustrating. But he also realizes it creates the environment for spectacular results. The alternative is not encouraging." He warns, "If things go on in this way, the country's basic science effort will come to a standstill, and the bank will go empty."

The annual Lita Annenberg Hazen Awards for excellence in Clinical Research introduce to the public at large those individuals of great knowledge and talent who are making priceless deposits in our country's clinical research bank. They—and the Award Committee itself—represent the great diversity and independence that provide the strength of research in this country. In the face of powerful economic and social forces, our research community is working very hard to keep all its strengths intact. So far, I think it is succeeding, but it needs still more help.

Nevertheless, I am optimistic about the future. I believe the philanthropic vision shown by Mrs. Lita Annenberg Hazen will be multiplied many times over by other individuals and corporations. And each will enhance the honor and stature of the other. These effects—taken together—will serve to maintain our country's leadership role in research. For America to remain strong, we have no other course to choose.

In that spirit, I thank you for your kind invitation and again offer my sincere congratulations to this year's recipient, Dr. Aaron B. Lerner.●

THE MARVA COLLINS STORY

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. CLAY. Mr. Speaker, the "Marva Collins Story" sponsored by Hallmark Cards on CBS television on Tuesday, December 1, 1981, portraying the life of Marva Collins was a timely, inspirational, and tastefully developed presentation. Mrs. Collins, through her founding of the Westside Preparatory School, has made a remarkable contribution to the power of education and opportunity for the dispossessed and excluded in our society; especially the children of suppressed and oppressed black Americans.

Mrs. Collins is to be commended for her perseverance, and strength of character in pursuing and demonstrating the educability of all children and youths. The continuance of the Westside Preparatory School is a tribute to her tenacity and unconquerable will. She has been able to get children, who had been previously labeled as not able to learn, to read and comprehend far beyond their expected performance.

In a larger sense, however, Mrs. Collins is a personification of every man and every woman. The fact of the matter is that in St. Louis, Chicago, Detroit, Baltimore, New York and other large urban school districts, there are courageous and extraordinary teachers who demonstrate in the face of great adversity and opposition, a caring and commitment to black and minority children and youths. They, too, are national heroes and heroines who render superior service to this Nation's most precious resource—its children and youths.

The members of the Congressional Black Caucus took notice of this remarkable lady this past September through its award of the highly cherished George W. Collins Award. This award established by the Congressional Black Caucus gives recognition to an individual for his/her community service contribution. This award was conferred upon Mrs. Collins as a manifestation of the caucus' beliefs in her commitment to black children and youths in the community and her resolute belief in the emancipation of the hidden talents and strengths of blacks and minority youngsters.

I applaud the recognition which has come to Mrs. Collins. I applaud her stamina, determination, and fierce resolve to "keep on keeping on" because of her imperishable belief that a "mind is a terrible thing to waste."

I earnestly hope that the "Marva Collins Story" will be a prelude to other stories of the sacrificial and selfless contribution of the nameless heroes and heroines who man the Nation's public schools and keep human possibilities vibrant and alive.

CBS television and Hallmark Cards, Inc., as sponsors of the "Marva Collins Story" have rendered a distinctive and enduring contribution to our Nation. Each is deserving of a nation's thanks and praise for the "Marva Collins Story."

It is also a source of inspiration that in the early years, when there were areas of difficulty, that her loving and devoted husband and children remained steadfast and supportive of her endeavors. Her success, it can be said, is truly a family success.

Marva Collins represents a priceless contribution to the strength of the mind and belief that education will open doors to wondrous opportunities, and I wish her Godspeed as she continues to extend truth and human enrichment to all children and youths.●

SALUTE TO DAUGHTERS OF MIRIAM CENTER FOR THE AGED ON 60TH ANNIVERSARY OF ITS FOUNDING

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. ROE. Mr. Speaker, this year, the Daughters of Miriam Center for the Aged, which is located in the city of Clifton, my congressional district and State of New Jersey, celebrated its 60th anniversary of outstanding services dedicated to the pursuit of happiness and security for people, and particularly our senior citizens. I know that you and our colleagues here in the Congress will want to join with me in extending our heartiest congratulations and best wishes to the distinguished officers, trustees, faculty, and community leaders who have actively participated in the organization and administration of one of the most prestigious care and activities centers for senior citizens in our Nation, the Daughters of Miriam Center for the Aged.

Mr. Speaker, the exemplary leadership and outstanding efforts of our citizens so important to our quality of life are in the vanguard of the American dream. As we commemorate this 60th anniversary celebration, we express our appreciation to the officers and trustees of the Daughters of Miriam Center for the Aged, comprised of business and professional men and women, who through their fidelity, devotion and personal commitment over the past six decades, have provided intelligent direction and dedication toward achieving the goals and purposes of the center—to help our elderly attain quality of life and an increased dimension of living in their golden years.

The current officers and members of the Board of Trustees are, as follows:

OFFICERS AND EXCECUTIVE COMMITTEE

Arnold H. Goodman, president.
Raymond Kramer, Honorary president.
Helen G. Deich, past president.
Leonard Kohl, past president.
Saul Rosen, past president.
Alexander E. Rosenthal, past president.
Samuel S. Schwartz, past president.
Milton Werksman, past president.
Arthur Bodner, senior vice president.
Joel J. Steiger, vice president.
Melvin Opper, vice president.
Stanley Berenzweig, vice president.
Milton Kleinman, treasurer.
Jesse Gochman, M.D., assistant treasurer.
Jack Birnberg, secretary.
Philip E. Sarna, assistant secretary.
Harvey Adelsberg, M.P.A., F.A.C.H.A., executive vice president.

Harold B. Abramson, William Adler, Steven Alexander, M.D., Jerry Atkins, Warren G. Bauer, Stanley Berenzweig, Gerrard Berman, Jack Birnberg, Irvin Blank, Mrs. Benjamin V. Blazer.

Arthur Bodner, Samuel Bograd, Mrs. Julian L. Bornstein, Samson Bosin, Louis Brawer, Vivian Caplan (ex-officio), Benson J. Chapman, H. Louis Chodosh, M.D., Bertram I. Cohen, Stuart Coven.

Helen E. Deich, Hy Derfler, Saul Dobrow, Herman D. Edelson (advisory), Mrs. Morris Feld, Lenore Fried (ex-officio), Sandor Garfinkle, Dr. Solomon Geld (honorary), Merrill Gitkin, Jesse Gochman, M.D.

Howard Goldberg, Lawrence Goldman, Mrs. Martin Goldstein, Arnold H. Goodman, Harry Gordon, Lawrence Gurtman, Nathan Harelick (honorary), Mrs. Bernard Hoffman, Lewis L. Immerman, M.D.

Henry George Jacobs, Rabbi Dr. Leon Katz, Herbert C. Klein, Milton Kleinman, David Kluger (honorary), Norman Koch, Leonard Kohl, Sanford Komito, George Kramer, Raymond Kramer (honorary president).

Richard Lane, Sandor Levinsohn, M.D. (honorary), Hayward Lieberman, Ronald S. Mack, Leonard Marcus (advisory), Mrs. Joseph Nalenbogen (advisory), Melvin Opper, Harold Peimer, Monroe Potash, Alan S. Prell.

Mrs. Sylvia Richman (ex-officio), Richard Robinson, Edward M. Rod, Martin Rosen, Saul Rosen, Richard Rosenberg, Eugene Rosensweet, Alexander E. Rosenthal, Peter Rosenthal, Irvin K. Ruttenberg (advisory).

Mrs. Joseph Sall, Walter Sanders, Philip E. Sarna, Louis E. Schotz (advisory), Ruth Schwartz (ex-officio), Samuel S. Schwartz, Sidney Shelow, Mrs. Joseph Shulman (honorary), Mrs. Jack Stark (ex-officio), Joel J. Steiger.

Julius M. Stern, Julius M. Sucoff, D.D.S. (ex-officio), Martin Sukenick, Ben Tankel (advisory), Robert J. Topchik, David Waldman, Mrs. Samuel B. Weisenfeld, Milton Werksman, Ben Wiener, Siggi Wilzig, Mrs. Siggi Wilzig, Morris Yamner, Meyer Zendell (advisory).

I particularly commend to you the administrator and executive vice president of the Daughters of Miriam Center for the Aged, the Honorable Harvey Adelsberg, who has responded with the highest standards of excellence in helping to improve the lives and services of the people entrusted to his care.

Mr. Speaker, the Daughters of Miriam Center for the Aged is a nonprofit organization, governed by a philanthropic board of trustees, supported through the generosity of the Jewish communities of Paterson, Passaic, Clifton, FairLawn, and environs.

The center was established in 1921 through a gift from the Honorable Nathan Barnert, two-term mayor of Paterson and a well-known philanthropist, in memory of his wife, Miriam. It has progressed over the years from a shelter for aged persons and orphaned children, "Home for the Aged and Orphans," through its gradual transition to "Home and Infirmary for the Aged," and its ultimate expansion and transformation to one of the leading facilities of excellence in the field of care for the elderly—"The Daughters of Miriam Center for the Aged." It is licensed by the New Jersey State Department of Health, accredited by the Joint Commission on Accreditation of Rehabilitation Facilities, and approved by the American Dental Association. Daughters of Miriam Center is college and university-affiliated as a teaching and inservice training center.

The facilities and services included in this complex are a 283-bed medical and nursing care center, Miriam Apartments I and Miriam Apartments II, consisting of 270 units, which provide congregate services to older persons capable of independent living, a day care center for the elderly for seniors who are in need of social and medical services and the Fred Ables Memorial Sheltered Workshop. In total, they serve 650 aged people in a given day.

Mr. Speaker, the original purpose of the center was to give sheltered care to both the aged and to orphaned children. The first location was in a converted house in Paterson, and after the initial 5 years, in a 50-bed capacity building on an estate in Clifton. This dual program for the underprivileged at both extremes of the age spectrum remained unchanged for over 20 years. In the following 40 years, the program for dependent children was relinquished to a professional casework agency which placed them in foster or adoptive homes. The Daughters of Miriam merged with the B'nai Israel Home for the Aged in Passaic, and a growing partnership of government and philanthropy in the funding of care through the introduction of medicare and medicaid and Federal loans for major structures evolved. The high standards of care at Daughters of Miriam have a direct connection with the philosophy of its professional and lay leaders. They believe that a nursing care facility must approximate as closely as possible a client's former home environment. It must provide skilled nursing and medical services but, even more urgently, it must offer a congenial atmosphere in which the residents can carry on the activities of daily living which are so important to the senior citizens.

A unique establishment within the Daughters of Miriam community is the Fred Ables Memorial Workshop. In effect, this sheltered work activities program is a small self-contained industry, the purpose of which is to provide occupational therapy for many of the aged residents on assembly jobs for contracting commercial companies. The workshop is licensed by the U.S. Department of Labor and workers are paid at rates approved by the Department; but more important, the participants are given the self-assurance that comes with still being able to do useful work and to make an independent contribution toward their own maintenance.

According to their capabilities and interests, residents take part in a broad variety of daily living and social activities—arts and crafts in special rooms or in rooms on the infirmary floors; cooking and baking programs; bingo games; watching television; relaxing in the solarium overlooking the busy Garden State Parkway; and walking or visiting with friends in the gardens. Groups such as the Friendship Club of the Clifton Jewish Center come in to entertain. Parties are held in the auditorium for residents on their special anniversaries. Cookouts and picnics in the center grounds are regular features of the summer months. Frequent theater tours to the city are arranged for the more active residents.

Considerable time is given, of course, to therapy sessions and medical checkups. A qualified staff of over 300 people, including resident and attending physicians are available 24 hours per day, 365 days a year. Also on the staff are a psychiatrist, physiotherapist, pharmacist, medical technicians, registered graduate and licensed practical nurses, nurses' aides, and orderlies. Over half of the members of the staff are specialists in medical and nursing care. The full program of intensive care for residents is rounded out by specialists in podiatry, optometry, dental, and physical therapy.

Mr. Speaker, it is a great pleasure to call this 60th anniversary celebration to your attention and seek this national recognition of the outstanding services provided by the officers, trustees, staff and professional men and women of the Daughters of Miriam over the past six decades. Their dedication and devotion in helping our seniors to maintain their dignity and help find happiness and independence in their golden years have truly enriched our community, State, and Nation. We do indeed salute the Daughters of Miriam on their 60th anniversary and extend our best wishes for their continued good works and success in all of their future endeavors.●

A TRIBUTE TO JOHN T. KEHOE

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. MATSUI. Mr. Speaker, for the past 6 years, the Sacramento Metropolitan Chamber of Commerce has been guided by one of the most able and effective directors in its history, Mr. John T. Kehoe. The community and citizens of Sacramento, as well as the chamber itself, have benefited greatly from John Kehoe's talented and energetic leadership.

This outstanding administrator, whose distinguished career has included service in the Governor's cabinet when President Ronald Reagan was chief executive of the State of California, will be leaving the Sacramento chamber soon to pursue a challenging opportunity in the private sector as vice president in charge of economic planning for the Cook Company of Sacramento.

I am sure that all Members of this House, and particularly our California delegation, will join me in extending best wishes to John Kehoe and in saluting his outstanding career in city, State and Federal Government, as well as his work for the Sacramento Metropolitan Chamber of Commerce.

John Kehoe's career has included 18 years of public service, beginning in Hayward, Calif., where he worked as an assistant city manager. He later served as administrative assistant to a distinguished Member of the House, Hon. George Miller, followed by 3 years as director of governmental affairs for the California State University and College System.

In 1969, Governor Ronald Reagan asked John Kehoe to join his administration as education consultant. One year later, Mr. Kehoe was appointed as the Governor's legislative secretary, and in 1972, he became a member of the Governor's cabinet as director of consumer affairs. During his 2 years in that position, the department received national acclaim for programs implemented under his leadership.

A description of John Kehoe's community interests, activities, and awards would fill many pages. One of his more recent achievements was election by the people of Sacramento to the five-member board of one of California's major publicly owned electrical utilities, the Sacramento Municipal Utility District.

As a Representative of Sacramento in the Congress of the United States, it is my great pleasure and honor to officially recognize John T. Kehoe's tremendous contributions to the Sacramento area, to the entire State of California, and to this Nation, and to express our hope that he finds his new position stimulating and rewarding.●

NOT TO BE FORGOTTEN—AGAIN

HON. GUY VANDER JAGT

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. VANDER JAGT. Mr. Speaker, the December 1981, edition of Reader's Digest carries an extremely interesting and heroic story of one of my most famous and well-known constituents, Matt Urban. He is a Congressional Medal of Honor recipient—some 35 years after he was recommended.

I ask you to read the article, which follows, for a very selfish and personal reason. I recently introduced special legislation in behalf of Matt, H.R. 5097, which would make him eligible for the special pension due those who have been awarded the Medal of Honor as of October 13, 1964. Matt started receiving the pension as of July 21, 1980. If paperwork had not been lost, he should have been receiving the special pension some 16 years previously.

We have made one major goof on a very gallant man. But, we have the chance, through H.R. 5097, to rectify it much as we did in finally presenting him the Medal of Honor some 35 years later.

The Digest article, "The Hero We Nearly Forgot," follows:

[From the Reader's Digest, December 1981]

THE HERO WE NEARLY FORGOT

(By John G. Hubbell)

Matt Urban was a one-in-a-million soldier, one to be remembered in all of history. An infantry officer in World War II, he was wounded time and again, but he always kept coming back, and each time his presence brought something extra to his men when they needed it most. He galvanized them, inspired them, and he led them to success while repeatedly risking his life to save others. The Germans nicknamed him "The Ghost," incredulous at his combat exploits and his ability to survive.

Finally, wounded for the seventh time, Matt Urban was forced to quit the battlefield. He was medically retired from the service and returned to his home in Buffalo, N.Y. His heroism was nearly forgotten, mostly because a recommendation for the nation's highest decoration for bravery, the Medal of Honor, was lost by the Army for three and a half decades before it was discovered and Matt's legendary exploits were at long last justly rewarded. Here is Matt Urban's amazing and inspiring story.

Matt's War began on a troop-transport ship off Port Lyautey, on the northwest coast of Africa, in November 1942. He was attached to the 9th Infantry Division. Its mission in the invasion of North Africa was to capture a strategically important airfield in French Morocco. He was 23, a first lieutenant, an Army R.O.T.C. graduate of Cornell University. An outstanding college boxer, he hoped for a career in coaching. His title was Morale and Special Services Officer.

He had been ordered to stay aboard ship until the beachhead was secured. He would be needed later, to organize entertainment for battle-weary troops. Matt fumed. It was not his notion of what he should be doing during a war.

The first reports from the beach were of fierce enemy resistance and heavy American casualties. Matt draped himself with bandoleers of ammunition and grenades, slung a rifle over his shoulder and climbed down to a rubber raft. A colonel stood at the rail screaming, "Urban where do you think you're going?"

"I belong with my friends, colonel," Matt yelled.

"Your orders are to stay aboard ship. Get back, or I'll see that you're court-martialed."

Matt waved, and started rowing. Enemy artillery and mortar fire rained down on the invaders. Bodies—his buddies'—floated in the water and sprawled grotesquely in the sand. The sight of dead Americans infuriated Matt. He waded ashore, ran up the beach firing, hitting the sand, crawling ahead, firing, firing, firing.

He never again saw the colonel who had threatened him with court-martial, and no one questioned his appearance in combat. He replaced a platoon leader who had been wounded.

By the spring of 1943, Matt was 2nd Battalion's F Company executive officer, second in command, and fighting in Tunisia. When the company commander was wounded, Matt took over.

In late March, the battalion was holding at bay a strong German force attacking from the east. Matt volunteered to eliminate an important observation post alone. He saw no point in risking other lives.

Armed with a half-dozen grenades and a .45, Urban crawled in pre-dawn darkness onto a barren hillside, creased with deep wadis—dry riverbeds. He was frightened, praying harder than he had ever prayed. It took him half an hour to come abreast of the observation post. Then he moved quickly, came out of a wadi heaving his grenades. Before the explosions had died away he had his .45 out and was jumping into the enemy position, firing at the retreating figures. A fleeing German tossed a grenade back at him. Fragments tore the palm of Matt's right hand.

He cut the wires into the observation post, and smashed the radio equipment. Later he suffered a wound to his left arm. Then, with the German position knocked out, the battalion moved northward.

"Follow Me." On Easter Saturday, 1943, Matt led F Company up onto a stragetically located hill called Djebel Dardyss. He agreed wholeheartedly with Gen. George S. Patton's concept of leadership: the best leader is one who gets out front and leads, not stands behind and directs; it's much more effective to pull a string than to push it.

The company was within 1,000 yards of the high ground when a concealed German force opened up with a storm of mortar and machine-gun fire. There was no place to hide, nothing to do but surrender. Therefore, the only sensible thing, to Matt, was to attack. From above, the enemy hurled down great sheets of murderous fire. On and on F Company crawled behind its commander, up the hill to within 40 yards of the Germans. There, Matt passed down the word to fix bayonets and prepare to attack. Steel glinted across the hillside. Then, suddenly, Matt stood, his .45 in his right hand.

"All right, men" he roared. "Let's get em. Follow me."

Matt charged straight at the heart of the enemy strongpoint. And F Company, whipped to a frenzy, came on with him.

It was over quickly. Only minutes earlier F Company had faced annihilation. Now, the 2nd Battalion owned the high ground, having routed a superior German force.

At 4 a.m. on Easter, the Germans counterattacked. Matt stood in the middle of the melee, firing his .45, shouting encouragement: "Hold your ground. Fire. Fire. Use your grenades. Hold your ground." And F Company held.

All that Sunday and on into the night, the 2nd Battalion fought two German Battalions to a standstill, with F Company on the high ground. The attack broken, the Germans withdrew. Soon, they abandoned North Africa. For Matt, there were two Silver Stars, a Bronze Star and two Purple Hearts.

Several days after the Normandy invasion of June 6, 1944, Matt, now a captain, led F Company against an enemy strongpoint not far from Utah Beach. Two German tanks hidden in hedgerows were the key to the battle. Ordering his company to flatten itself, Matt grabbed a bazooka and, with an ammunition carrier, worked his way through hedgerows until he saw a tank 45 yards away. Matt fired the bazooka. The tank exploded. Moving down the hedgerows, the two men destroyed the second tank. F Company came spontaneously to its feet, screaming, charging into the hedgerows, routing the enemy.

During this engagement, shell fragments tore away much of the calf of Matt's left leg. A medic took care of the gaping wound and advised that the C.O. be evacuated. The C.O. declined. He sat on a litter carried by two GIs and, roaring directions, coached his men forward. Early next morning, Matt took a bullet through the right forearm, and now there was no putting off evacuation.

Like a Madman. One July morning, in a hospital in southern England, Matt read a dispatch identifying his unit as having suffered heavy losses near St. Lô. The commander of the 2nd Battalion, "Black Mike" Kauffman, had been wounded and removed to the United States. Matt advised his doctors that his hospital stay was ended, and caught a boat across the channel. From there he hitchhiked nearly 100 miles—back to the front.

The men couldn't believe their eyes when they saw Matt limping up the road, using a stick as a cane. And 2nd Battalion survivors were never to forget July 25, 1944. Pinned down by German artillery fire, the battalion seemed immobile—no one leading, no one giving orders. The men lay in foxholes and ditches; they seemed resigned to being killed or taken prisoner. "On your feet, soldiers!" Matt ordered. "Let's go. Follow me."

S/Sgt. Alex Kahn was to report one GI's immediate after-action assessment: "One of the craziest officers suddenly appeared before us, yelling like a madman and waving a gun in his hand. He was probably a replacement, never in combat before. He got us on our feet, though, gave us our confidence back, and saved our lives."

Reaching the forward elements of the battalion, Matt found only one American tank intact, but its turret gunner had been wounded. A lieutenant attempted to man the turret and was riddled. A sergeant followed, and was killed also. Matt, knowing he was about to die, hobbled to the tank and flattened himself against it, enemy slugs splitting the air overhead. He would try to slide up and into that turret like a snake—and then * * * suddenly, unbelievably, he was in it, manning the heavy-caliber machine gun. Still alive—not even wounded.

Matt ordered the driver to move forward. His blistering fire silenced a German machine gun and an anti-tank gun emplacement. "Matt Urban moved forward," S/Sgt. Earl Evans noted later, "and damned if the U.S. Army didn't move forward also. It was the only natural thing to do."

Following the St. Lô breakthrough, the battalion commander was killed, and Matt assumed command. In the fighting that followed he took mortar shrapnel in the chest and was hit in the lower back. He refused to be hospitalized. He now had been wounded six times.

The Last Battle. Before dawn on September 3, 1944, artillery pounded German positions at Philippeville, Belgium. Matt was leading the assault. He was closing in when German machine guns laced the battalion with a vicious crossfire. It was here Matt's war ended. A bullet burst through his neck, mutilating his larynx.

Regimental surgeon, Maj. Norman Weinberg, a poker-playing pal since Matt's initial Army days, quickly dressed the wound and prepared to have Matt evacuated.

Father Timothy Andryziak, battalion chaplain and another poker player, reached the scene. "Any hope?" the priest asked. Weinberg shrugged. Father Andryziak administered last rites. Matt was appalled. He'd be damned if he would die.

Back in the hospital in England, The Ghost was soon well enough to be returned to the United States for voice therapy. He was medically discharged from the Army in February 1946. By now, some battlefield promotions had caught up with him; only two months past his 25th birthday, he was a lieutenant colonel, one of the Army's youngest. A veteran of six major campaigns, he wore a modest number of decorations: two Silver Stars, two Bronze Stars and seven Purple Hearts. These did not nearly match Matt Urban's valor and heroism.

A principal reason for the neglect was the turmoil of postwar transition, when countless servicemen returned to civilian life. Thus, a recommendation for the Medal of Honor written by S/Sgt. Earl Evans for his former C.O. had failed to reach division headquarters; a copy lay in the Adjutant General's office for 35 years.

But Matt Urban's kind of incandescent heroism glows brightly in the memories of those who witnessed it until inevitably it is properly recognized. After inquiries by Sergeant Evans and Urban were made, the Army opened its archives, found eyewitnesses to Matt's actions, conducted interviews and took depositions.

On July 18, 1980, in ceremonies at the Pentagon, Army Chief of Staff Gen. Edward C. Meyer presented Matt with the Legion of Merit for his outstanding performance through several campaigns. That same day, the French ambassador conferred upon him the Croix de Guerre, one of the highest combat honors France can bestow.

And the next day, 35 years after the end of the great war, Matt Urban, now recreation director and civic-center manager for the city of Holland, Mich., stood in the East Room of the White House, summoned at last by his Commander in Chief.

Wearing his Army dress uniform, Matt stood at attention as the citation outlining his legendary exploits was read. The old soldier's eyes glistened with tears as President Carter, apologizing for the country's long delay, placed the blue ribbon around Urban's neck. The two men embraced, then the President stepped back and wiped the tears from his own eyes. Matt Urban had received at last the supreme tribute his country can bestow on its soldier sons.

With the award of the Medal of Honor, Matt Urban had become one of the most decorated soldiers in American history.●

A TRIBUTE TO JOSEPH P. PERRUCCI

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. MINETA. Mr. Speaker, it gives me great pleasure to rise today in recognition of Joseph P. Perrucci, who will be honored at a testimonial dinner on January 23, 1982 by the Italian Men's Club of San Jose.

Joe Perrucci was born in San Jose, Calif. on December 15, 1905 and attended local schools. His parents were born and married in Tricarico, Italy and were very active in the Italian community in San Jose, founding the Tricarico Club, one of the oldest and best known Italian organizations in the Santa Clara Valley.

In 1931, Joe founded Mayfair Packing Co. Today this firm is recognized worldwide as one of the largest processors and shippers of dried fruits and nuts. For 40 years he was a director of the Dried Fruit Association of California and served as its president for three terms. Additionally, he was a director and vice president of the Italian-American Chamber of Commerce of the Bay Area, and a director of the American Italian Chamber of Commerce of Italy with headquarters in Rome.

In 1973, Joe was selected as one of a group of Americans to attend a trade fair in China that resulted in commerce between the two countries. Previously, in 1961, Joe met with the Minister of Labor of Italy in an effort to bring American industry to that country to help assist its economically underdeveloped areas. As a result of this meeting, Mayfair Europa was established in the Naples area. The plant provided employment for many Italians in this depressed area. Because of these actions and assistance, the Italian Government bestowed on Mr. Perrucci The Star of Solidarity, the highest award given to a foreigner. He was also given the title of Cavaliere of the Republic of Italy.

In November 1980, when a terrible earthquake struck Italy, killing thousands, he was one of the first to react. Instructing the manager of his Naples plant to render all possible aid, he provided food and lodging to many victims. In May 1981 he visited the earthquake area and upon his return to San Jose led a drive to raise all the neces-

sary funds to build an elementary school in the town of Sant' Angelo dei Lombardi. The necessary funds were raised, the school was built, and on October 6 Joe led a contingent from San Jose to the dedication.

Mr. Speaker, I ask you and all my colleagues in the House of Representatives to join with me in thanking Mr. Joseph P. Perrucci for his humanitarian and generous support to many worthwhile causes and to wish him the best in the years to come.●

SUMMARY OF CLEAN AIR HEARINGS IN CLEVELAND ON SEPTEMBER 19

HON. DENNIS E. ECKART

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. ECKART. Mr. Speaker, on September 19 the Northern Ohio Lung Association and the League of Women Voters of Cuyahoga County sponsored hearings in Cleveland on the issue of clean air. The hearings were very productive and informative, allowing both experts and concerned citizens alike the opportunity to testify. I was honored to have the opportunity to chair these hearings, which were also attended by representatives from the offices of Congresswoman OAKAR, Congressman MOTTL, and Senator METZENBAUM.

I would like to take this chance to again commend the many dedicated people whose efforts toward coordinating these hearings were certainly successful in every respect. The comments and viewpoints which were presented have provided me, and hopefully many others, with a clearer understanding of what our environmental goals need to be as Congress reviews the Clean Air Act. The members of the Lung Association, the League of Women Voters, and of my advisory committee on energy and the environment are all to be heartily congratulated for their work on this event.

I recently received the transcript of these proceedings, which I have summarized for the review of my colleagues and those people involved in the hearings. Copies of the complete transcript can be obtained from the Northern Ohio Lung Association, for the cost of reproduction and mailing, at 4614 Prospect Avenue, Cleveland, Ohio 44103. The summary follows:

The meeting was called to order by Zelda Stutz, President of the Cuyahoga County League of Women Voters. The hearings were then turned over to Edith Chase, from the Ohio League, who acted as moderator for the hearings. Ms. Chase established the ground rules for the speakers and the question and answer periods, and generally outlined the arrangement of the proceedings.

In my brief introductory remarks before the group, I described the task now before Congress in reauthorizing the Clean Air Act. The decisions regarding air pollution and its control not only have immediate implications but, more importantly, far reaching effects and results. The impact of environmental issues are a pay now or pay later matter, and I expressed the belief that expediency and economic revitalization cannot be the guiding concerns when considering such issues.

The meeting was turned back to Edith Chase, who called on Mr. William McVey, representing Congresswoman Mary Rose Oakar. Mr. McVey expressed Representative Oakar's regrets at being unable to attend, and expressed her strong support for a strict clean air law that insures the protection of our health and safety.

At this time, the first witness was recognized, State Representative Sherrod Brown, of the 61st district in Ohio. Mr. Brown's statement pointed out the international implications of the problem of acid rain. He called for strengthened cooperation among Ohio officials, the Governor, the Environmental Protection Agency, and the utility companies in addressing this issue and seeking solutions. He reaffirmed Ohio's need to implement stricter pollution control and standards, and indicated that Ohio's ability to do so has been proven.

The next speaker was Dr. David Gillespie, Associate Professor of Medicine at Case Western Reserve University. Dr. Gillepsie expressed his interest in pulmonary medicine and environmental effects on health. He discussed the health effects of three major pollutants: sulfur oxides, nitrogen oxides, and total suspended particulates. He summed up by stating that we must not tamper with the Clean Air Act's ability to protect individual's health, especially those facing added risks from polluted air. Dr. Gillespie also addressed a question regarding the costs of continued bad health from air pollution. He said that not only health costs are involved, but costs related to agricultural loss and worker production loss as well. Economically, it still remains cost effective in the long run to maintain strong controls on environmental pollution. In answer to another question, Dr. Gillespie touched upon the possibility that cancer rates as well may be tied to air pollution levels. Studies are still being conducted.

The next witness was Tom Graske, Public Information Officer with Cleveland's Division of Air Pollution Control. Mr. Graske provided important statistics on Cuyahoga County's pollution levels, and explained how they are obtained and measured. He also announced that the Division is presently submitting revisions to the City's Air Pollution Code to the City Council, and that public comment and input was welcome. Those wishing to get involved can call the Divsion's offices at (216) 664-3512. He stated that the Division opposed proposals to give state and local governments authority to establish secondary standards. The Division also recommends that actual reductions in sulfur oxide emissions be achieved to combat acid rain. He further recommended that training programs for air pollution control personnel be expanded, and that attainment deadlines should be extended for the National Ambient Air Quality Standards. He called for a more concise and clear policy on new source construction, and one which is consistent nationwide.

I questioned Mr. Graske as to the methods for dealing with a state administration which appears unwilling to implement a state plan, as is the case in Ohio. He stressed the need for federal oversight reviews and action when states are not found to be in compliance.

Mr. Graske addressed additional questions about the reasons for advocating an extension of attainment deadlines; whether or not he believes that it is realistic to call for increased training programs when the budget is being drastically cut; and the projected effects of these budget cuts overall on his Division's ability to carry out its work.

Mr. Braxton Tewart, Director of Community Relations for the Ohio Lung Association, outlined for the group the Association's major recommendation for the reauthorization of the Clean Air Act: 1. The national ambient air quality standards should remain unchanged. 2. A fine particulate standards should be included. 3. The motor vehicle inspection and maintenance program should remain unchanged. 4. Federal oversight should be continued versus turning all responsibility over to the states. 5. Public participation should be encouraged. 6. The atmospheric transport standards for sulfur dioxide and nitrogen oxide should remain unchanged, and the enforcement should be strong to reduce acid rain.

Mr. Tewart listed over eight principles which should also guide all consideration of clean air issues. The principles included public involvement, costs, employment, profits, individual choices, the issue of high sulfur coal, and the role of health concerns. He then answered questions from the floor pertaining to recent Administration attempts to clamp down on EPA scientist's public statements, and the budget cuts.

The next witness was Mr. Tom Jenkins, Professor of Physics at Case Western Reserve University and a representative of the Sierra Club. He provided important information on the need to maintain a strong Prevention of Significant Deterioration program (PSD) under the Act. The reasons stated were: 1. The program provides an extra margin of safety against health effects which might be unknown or poorly understood at this time. 2. The program provides a large reservoir of air for diluting the pollution produced in industrial concentrations such as Cleveland. 3. The program spreads the responsibility for air pollution control to all states rather than just the industrial states which have to deal with long-standing air quality problems. 4. Finally, the PSD program prevents adverse biological impact of ecosystems in our National Parks and wilderness areas, and protects visibility in park areas.

Reverend Mike Frank, Pastor of Broadway Christian Church, spoke next on behalf of the Neighborhood Coalition. He made several points about air pollution representing the views of citizens in his neighborhood: First, there has been a definite improvement in the quality of our air. Second, progress so far is possible largely due to an active EPA and Federal regulations. Third, the people only want simple justice . . . they want to be protected from the injustices that prevent healthy air and a clean living environment.

The next witness was Mr. Jim Cowden, Professor of Environmental Science at Hiram College. Mr. Cowden discussed the faulty assumptions and simplistic notions often used in making cost-benefit analyses regarding clean air control methods. He outlined several major studies along these lines, and stressed the importance of studying agricultural impacts as well.

The last invited speaker was Dr. Kathleen Barber, Professor of Political Science at John Carroll University. Dr. Barber briefly addressed four issues: First, transferring authority for setting minimum standards back to the states reverses a workable, sensible allocation of power. Second, we must preserve those sections of the Act which relate to Prevention of Significant Deterioration. Third, strict automotive emission standards must be maintained. Fourth, Congress must address the causes and effects of acid rain, despite the Reagan administration's attack on Government activism.

At the conclusion of the witness testimony, I gave a brief statement regarding the timetable for action in Congress on the reauthorization of the Clean Air Act. I provided a capsulized history of what has happened to date on the legislation, and described the political atmosphere that is developing in Congress over this issue.

The audience was then invited to submit testimony for the record, with each statement being limited to 2 minutes. Chris Gitlin spoke on behalf of her husband, a clinologist involved in respiratory diseases. She, too stressed the relationship between pollution levels and health problems, citing national statistics and study results. Mr. Arnold Gleisser representing the Richmond Heights Environmental Board, presented information about the local PCB problem resulting from broken capacitors. He also presented information and further comment on the acid rain problem. Mr. Chester Brooks pointed out the health hazards from pollutants besides those currently regulated, such as ethylene dibromide, mustard gas, and leaded gas.

A representative of the Lorain County League of Women Voters, Jean Cornelius, mentioned that currently, few toxic pollutants are under federal control. She spoke about chemical synergism—the interaction between chemicals which produces a toxic effect which is greater than the sum of the effects of the individual chemicals. Nancy Martt with the League of Women Voters, and Greg Taylor of the Isaac Walton League, both spoke in favor of a strong clean air law. Mr. Taylor expressed the concern of fishermen over increased acidity in lakes caused by acid rain.

Thomas Hill spoke about the health effects of asbestos as an example of a pollutant which went unchecked for too long. John Swearer brought up the issue of government overspending and budgetary waste in the U.S. EPA. Terry Mors reminded the group of the recent Harris poll results indicating that 80 percent of the country favors strong clear air laws and no weakening amendments to the Clean Air Act. He also stressed that along with acid rain, dry deposition transports must be studied. Irene Penfield stated that air pollution is a problem of special concern to Blacks in this country because they tend to populate the inner city areas, which are hard hit by pollution. John Edwards, the Conservation Chairman of the Western Cuyahoga Audubon Society, outlined his organization's recommendation for the Clean Air Act. He stressed the need for retention of primary health standards, federal authority for control, and the PSD program. He also stated that the Act should be strengthened to include toxic pollutants and acid rain.

Nick Sabadosh said that this issue should not have to pit jobs against clean air. Ellen Knox read from a meaningful statement by Lewis Thomas, Chancellor of the Rockefeller Institute, about the prospects for the future. Mr. W. D. Clapham, Jr. commented that although there is still much to learn and understand about acid rain, we must proceed now to deal effectively with it. Barbara Sibley provided a consumer's point of view, saying that she would be willing to pay a bit more for certain goods and services if it would assist in producing cleaner air. Genevieve Cook spoke about a long term cancer study conducted in Cuyahoga County, which shows higher death rates for cancer in areas of greater air pollution. Mary Croxton supported continuation of nationwide pollution control and for research into better methods of burning high sulfur coal.

Marge Grevatt spoke about poverty and air pollution, Maria Idam rose to offer added support for a strong Clean Air Act, and Mimi Becker pointed out that there are dangers from long range transports of pollutants from high stacks other than sulfur dioxide. Clifford Mitchell raised the issue of indoor pollution, and called for greater attention to this problem. Dr. Alan Kuper spoke on behalf of the Ohio Lung Association about the important role of citizen groups and citizen action. Janet Hutchison, a member of the Advisory Commission of the Cuyahoga Valley National Recreation Area, mentioned the concern for park preservation. Ronald Sobek offered information on a fluidized combustion system now being researched for use on power plants. Judith Wood represented biking enthusiasts, and called for federal support money for biking to help reduce air pollution and gasoline usage. Finally, Robert Wood addressed the meeting as an Assistant Professor in Pediatrics at Case Western Reserve University involved in childhood lung diseases. He brought up the important point that health effects may take as long as forty years to be recognized in a human body . . . we should not have to wait that long before the causes of the health problems are attacked.

The public hearing was adjourned at 2:15 p.m.●

A TRIBUTE TO THE GREAT MILLS HIGH SCHOOL FOOTBALL TEAM

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. DYSON. Mr. Speaker, I should like to call to the attention of my colleagues and the general public to the outstanding achievements of the Great Mills High School football team of southern Maryland.

Coming off a 3-7 record the previous year, this team made history by winning the Southern Maryland Athletic Conference, going undefeated during the regular season and fighting their way into the State finals. Their success demonstrates what hard work, dedication, and a group of individuals pulling together for the same goal, can achieve. The lessons of discipline, pride, and sacrifice play an important role, not only in football, but also in life, and the Great Mills team has proven they have learned them well.

Mr. Speaker, praise is also due those individuals who through their tireless efforts transformed this dream into a reality. Steve Hoopengardner, Southen Maryland Athletic Conference coach of the year, devoted long hours and hard work to instilling a winning attitude and the fundamentals critical to a winning season. Through his ability to communicate with his players a 11-1 record was achieved.

Credit must also be given to the coaching staff. Joe North, Steve Wolfe, Stanley Hoopengardner, Gene Wood, and Harold Willard all contributed their selfless devotion to the team. In addition, Athletic Director Bob Wrabley cannot be forgotten for the time and effort he gave to the Great Mills football program. Without the hard work of all these people there would have been little success.

Of course with the opening kickoff, the responsibility for executing the plays rests with the players. The names—John King, William Smith, John Garner, Jesse Wilson, Jeff Dubinok, Evan Roberts, Linzell Harris, Terrell Scriber, Donald Stewart, Larry Valdez, Dwayne Humenik, John Shoemaker, Keith Pinno, Thomas Chase, Michael Von Allmen, Shawn Campbell, David McRae, Shawn Day, Ronald Von Collin, Antonio Dixon, Earl Childress, Mark Musselman, John Bragaw, Deane Starr, Ronald Clark, Harvey Picard, Jeff North, Patrick Young, Stephen DeBarr, Joel Holt, Brian Woode, John Young, and Benjamin Simmons—will long be remembered to the area's football fans. Led by their 25 seniors, Great Mills was able to achieve a degree of success unmatched in the school's history. They provided the experience and leadership which is a necessity for winning football games.

Mr. Speaker, to the residents of St. Mary's County high school football is more than a game, it is an infatuation. Without the support of its fans who cheered them on, provided encouragement and followed their progress, the task would have been extremely difficult. The Great Mills football team not only captured the hearts of their fans but also brought them all closer together. They should be congratulated for their achievements and for a job well done.●

WATT TRIUMPHS OVER ENVIRONMENTALISTS

HON. DON YOUNG

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. YOUNG of Alaska. Mr. Speaker, Interior Secretary James Watt has staged a startling political turnaround. While liberal Democrats and environmental groups had all but nailed the coffin shut on Watt's service as Presi-

dent Reagan's Interior Secretary, Watt was quietly gaining the respect of the administration and the American people. Now Secretary Watt's Cabinet seat seems assured as the Secretary has gained continued popularity with his attempt to restore a prudent balance between environmental, economic, and energy concerns.

This is the point stressed in a recent National Review article which I urge my colleagues to read. The article reviews Secretary Watt's first 10 months of duty and concludes that he has successfully overcome the attack of the "cryptopolitical" environmentalists demanding his immediate ouster. The environmentalists and press have backed off Watt because they realize that he has the categorical support of the President and his policy views reflect Reagan's electoral mandate.

Secretary Watt, Mr. Speaker, has triumphed over the environmentalists. He also carried through on his responsibility as the Nation's manager of our natural resources by judiciously balancing the interests of economic wellbeing and energy production with environmental protection.

The November 27 National Review article follows:

[From the National Review, Nov. 27, 1981]

HOW'S WITH WATT?

James Gauis Watt, Secretary of the Interior, is a survivor. This is no small feat, considering that Watt spent July and August on a wheel of fire, when hardly a day passed that some politician (notably Messrs. Udall, Cranston, and Kennedy) or some environmental group did not call for Watt to resign or for the President to sack him. During these months his Department was tense and jittery, morale low. Thanks principally to Watt's equanimity under stress and his tenacity of purpose, the bureacrats hung tough, and Interior still serves the Republic.

In September the situation began to stabilize for Watt, and since then his fortunes have been slowly but steadily climbing, despite one of the cruelest, best organized, and most prolonged onslaughts in recent memory. The current wisdom is not only that Watt will make it but, indeed, that he may be engineering one of the more dramatic public-image turnarounds we have seen. Already Watt is one of the three top GOP fundraisers (including Reagan himself), and is probably not number three.

For his first five months in office, Watt by design concentrated solely on administration and management. He moved boldly to yank the recalcitrant Interior bureaucracy in a new direction, as when he fired in one fell swoop 51 excessive lawyers and clerks from the solicitor's office. During those five months, Watt gave out only two interviews, stayed in Washington, read résumés, interviewed candidates, sketched flow charts, and slapped around the Bureau of Land Management bureaucrats until they began treating Westerners more like citizens and less like poachers. (This coerced change in the BLM's collective attitude defused the Sagebrush Rebellion, by the way.) From an MBO (Management by Objective) standpoint, Watt gets high grades. But from a political, public-relations standpoint, Watt flunks. By concentrating exclusively on management, Watt left the environmental battlefield entirely to the opposition, viz., that coalition of preservationists groups that had met in the Rose Garden in September 1980 to endorse Jimmy Carter and urge the defeat of Ronald Reagan—unprecedented political acts for allegedly apolitical types.

Later, these environmentalists were joined by other liberals who were being denied their conventional left-wing causes—like welfare expansion, or foodstamp program enlargement, or jail reform, or busing—because Ronald Reagan had successfully coopted this social agenda with powerful political actions of his own, notably his economic program. Environment, really, was the only theater left for these frustrated causistes.

In late August, Reagan's Holy Trinity got into the act (counselors Meese, Baker, and Deaver) and urged Watt not to pull his punches but to get on the road and tell his story directly to the people. The electorate should learn directly from you what you think, they told him, as opposed to what the Sierra Club says you think. In early September, Watt launched his stump tour at the Western Governors Conference in Wyoming, putting on a day-long performance that drew kudos from the polls and influential media types present.

Audiences around the nation are pleasantly surprised to find that Watt is not the Frankenstein that ecology freaks have made him out to be. And they like his sharp distinction between preservation and conservation, the former converting nature into an end in itself, a religion, that leaves man out. Preservationism is for the select few who have the money and time for the pursuit of solitary wilderness, as Congressman William Dannemeyer (R., Calif.) has appropriately noted, while conservationism sees nature as an instrument, a dynamic one, for enriching all the people spiritually and economically. The latter necessitates, of course, rational and balanced economic growth—a growth rooted in the development of our natural resources.

But there's the rub. Preservationism is what Watt inherited at Interior, entrenched preservationism, i.e., little or no development. Although our federal lands contain well over one-half of the coal in America there has not been a single major coal lease issued in ten years. In resource-laden Alaska, Watt next month is holding an onshore federal oil and gas lease offering—the first in 15 years. Applications to explore the Overthrust Belt have lain on bureaucrats' desks at Interior for a decade and longer, yet oil shale, tar sands, and coal in that Belt contain enough energy to meet our domestic needs for literally hundreds of years.

Watt's upsurge has been helped by the recent loss of credibility suffered by the powerful Sierra Club. A top-secret, 12-page, minutely detailed memorandum from Sierra's top brass dealing with the generation, collection, and delivery of anti-Watt protest signatures, with crassly manipulative instructions for persuading journalists and the public to view the phenomenon as "grass-roots," plus the use of this politico-media event as a membership recruitment lure, was picked up by the press, who found its style worthy of comparison to some of the more imaginative offerings of G. Gordon Liddy (sorry, Gordon). As everyone knows, Sierra is a crypto-political outfit (its tax exemption has been removed) at best, and now that the fact is publicly recognized, Watt will be fighting a seen enemy, almost a political party in miniature, and that should make the going easier for him.

It used to be said that the Reagan Administration had three true believers: David Stockman, James Watt, and Ronald Reagan. With Stockman having recently gone over the side (alas, he now favors upping taxes and, in so doing, screwing supply-siders), only two are left. It behooves the GOP establishment, nationally and regionally, to get behind Watt, as have Senators Goldwater, McClure, Symms, Laxalt, Stevens, et al. In an age of trimmers, true believers are an endangered species, and so deserve all the protection they can get.●

ON THE MOTION TO INSTRUCT THE DEFENSE CONFEREES

HON. LAWRENCE J. DeNARDIS

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. DeNARDIS. Mr. Speaker, President Eisenhower in a press conference that he held on September 3, 1957, dealt with the question of defense spending in terms of the military requirements of the United States and the free world. On that occasion Mr. Chalmers M. Roberts of the Washington Post asked the following question:

Mr. President, in view of Soviet military developments and the negative Soviet attitude on the disarmanent talks, plus the inflationary problem, do you intend to attempt to keep the military budget at the $38 billion figure for the next two fiscal years 1959 and 1960 as reported?

Answer: Well, you will recall that I have tried to establish the difference between a new obligational authority and the expenditure program. I have come to believe that a very fine and adequate defense for the United States can at present prices be sustained with an expenditure program, if well planned in advance, at $38 billion.

Now, there is no sacrosanct nature of this or any other figure, but I believe that as you go beyond, you get into things that are unnecessary, and if they are unnecessary, they are certainly unwise from the standpoint of the whole economy. If you go below, I believe that you are getting into an area of unacceptable risk.

President Eisenhower said, therefore, that either we cannot afford it or we do not need it, or both, which clearly indicates that he had a sense of, first, the real military requirements of the free world, a subject he knew better than any other 20th century American President. Second, the considerable potential for overspending for the military that exists in our military-industrial-political system and third, the adverse relationship between excessive and nonessential defense spending and an economy in the throes of inflation.

Let us try to apply the wisdom and sense of appropriateness that Ike exhibited during the critical period over which he presided to the matter at hand. When is a $197 billion defense figure enough—when it is 14 percent more than last year and the thoughtful product of a democratically con-

trolled House—while at the same time to a figure that is the product of a new Republican President who ran on a prodefense platform who recommended approximately the same amount. Mr. Speaker, I submit that the proposed Senate increase of 18 percent is not a well considered estimate and that the conference must adhere to the House figure. The old game of splitting the difference will not do in this case. Splitting the difference or any close approximation would destroy what equity and purpose there is in this budget. The high bid of the Senate should be rejected and the House conferees should hang tough and return a report to this body we can support.

I support the motion to instruct the House conferees and I congratulate the gentlelady from New Jersey, Mrs. ROUKEMA, for her magnificent efforts in pressing this cause.

THE ASBESTOS HEALTH HAZARDS COMPENSATION ACT

HON. MILLICENT FENWICK

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mrs. FENWICK. Mr. Speaker, today I am introducing a bill to insure that workers disabled by exposure to asbestos receive adequate compensation without having to resort to costly and time-consuming litigation. This legislation, the Asbestos Health Hazards Compensation Act, will provide equitable and comprehensive benefits to persons disabled as a result of employment-related diseases, members of their families, and surviving dependents.

At the present time, there is no single comprehensive method of dealing with the problems and hardships created by asbestos-related diseases, the dimensions of which have only recently become apparent in medical studies. It has traditionally been within the jurisdiction of the States to determine worker compensation laws; but in those cases where the States fail to provide the necessary services, the Federal Government must take the initiative. This is certainly the case here.

Asbestos-related diseases are not like coal mine-related illnesses. Coal mines are located in specific States and the diseases connected with them are locally defined. Asbestosis and other asbestos-related diseases are not confined to mining areas, or even to the industrial facilities where asbestos is processed. They are scattered from California to Rhode Island, in shipbuilding yards, housing construction and repair, and other occupations and places where workers handle asbestos products.

Since few States provide adequate benefits for death or disability due to asbestos-related diseases, individuals have been forced to seek legal action against manufacturers, employers, and the Federal Government to acquire sufficient compensation. Such remedies are inconsistent and burdensome at best and fail to promote a comprehensive, unified approach to the payment of disability benefits.

This act, which is in the nature of "no fault" legislation, is designed to promote a comprehensive, unified approach and a workable benefit schedule that will be satisfactory to both employers and employees.

We now know from medical studies that asbestos exposure is a leading cause of cancer. It is estimated that 50 percent of all asbestos insulation workers die of cancer. According to Dr. Irving Selikoff, the renowned and acknowledged expert in the field—

> At present, one in every five deaths among insulation workers is due to lung cancer, one in ten to cancer of the pleura or peritoneum, and one in ten to scarred lungs of asbestosis.

We also know, based on studies by Dr. Selikoff and others, that asbestos workers who smoke have an incidence of lung cancer 90 times greater than workers who smoke but are not exposed to asbestos.

I have narrowed the scope of the bill to cover only those diseases which are caused by exposure to asbestos and are diagnosed as such. The medical community has assured me that these diseases are clearly diagnosable, so there is no presumption factor to establish eligibility. Anyone who provides medical certification that the disease is asbestos related will be eligible for benefits.

The bill which I am introducing today will pay benefits to affected persons and their dependents for disability or death from an asbestos-related disease. Affected persons are those whose occupations involve exposure to asbestos or members of their families who contract asbestos-related diseases from close contact with those individuals. Compensation will be provided for both partial and total disability, and benefits can be later adjusted if the nature or severity of the disease changes.

I have introduced legislation of this type in the two preceding Congresses—in 1977 and 1979. The bill I am introducing today includes several major changes. First of all, the Federal Government has been eliminated entirely as a source of funding the compensation claims. Although the asbestos fund set up under the provisions of the bill will still be administered by the Department of Labor, the funding will come solely from the asbestos industry and the tobacco industry. The formulas for industrial financial contributions have been adjusted upward, and may be further adjusted by the Secretary of Labor should the need to cover the cost of benefits.

Second, the claims will be more closely scrutinized. Many compensation programs of this type have been the victim of fraud and abuse. This serves only to harm those who justly deserve compensation. As I have said previously, asbestos-related diseases can be clearly pinpointed and thus my bill specifically denies length or degree of exposure as proof of disease. In addition, the Secretary of Labor can seek a second medical opinion when he believes a claim has been fraudulently or inaccurately represented.

Finally, as in my previous bills, the issue of third-party litigation is dealt with in an equitable way. Those suits filed in Federal or other courts prior to enactment of this legislation will be allowed to go forward. The plaintiffs may, however, drop their suits within half a year and file for benefits under this act.

We are now aware of the health hazards of asbestos exposure and are beginning to move in the right direction by recognizing the danger and trying to do something about it through increased safety standards. I think all of us feel obliged to aid those workers who have long suffered from asbestos-related diseases without receiving adequate benefits. This legislation will finally provide those individuals and their families with a comprehensive compensation plan that is both equitable and expeditious.

Further and finally, I would like a print out that even those States which have good workmen's compensation laws in other respects often fail to provide coverage for the unusually long potency period of asbestos disease. That is why we must have nationwide coverage under a uniform law.●

GEORGE MASON: FATHER OF THE BILL OF RIGHTS

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. McDONALD. Mr. Speaker, almost everyone who lives in the Washington, D.C., area has visited Mount Vernon, the home of George Washington. Many tourists take the time to visit Mount Vernon also. However, many District of Columbia area residents and most tourists are completely unaware that a little further down the river is the magnificent home of George Mason—Gunston Hall. George Mason is the father of our "Bill of Rights" which were incorporated in the U.S. Constitution in 1791 by the States. James Madison, in the first session of the First Congress (as a Representative from Virginia) in-

troduced 17 resolutions. Congress rejected 5 of them and submitted 12 to the States, of which 10 were ratified. These became our Bill of Rights. Mason did this "to quiet the apprehensions of many that without some such declaration of rights the government would assume and might be held to possess the power to trespass upon those rights of persons and property which by the Declaration of Independence were affirmed to be unalienable."

Therefore, on this day, December 15, "Bill of Rights Day," it is particularly appropriate to insert in the CONGRESSIONAL RECORD a recent article by Prof. Raymond Polin of St. John's University on George Mason which appeared in the Freeman Digest, December 1981. The article follows:

GEORGE MASON: FATHER OF THE BILL OF RIGHTS

(By Raymond Polin)[1]

Thomas Jefferson has been justly honored, in the main, as the author of the Declaration of Independence, one of three accomplishments that he chose to be inscribed on his tombstone: "Here was buried Thomas Jefferson, author of the Declaration of American Independence, of the Statute of Virginia for religious freedom, and father of the University of Virginia."

It is indicative of the priority of values held by Jefferson that he asked to be remembered in finality by a legacy of principles of freedom and an institution of high education. No mention was made by him that he had attained the very highest political offices of his state and nation: Governor of Virginia, Secretary of State of the United States, and successively Vice-President and President of the United States.

But how much credit is justly due Jefferon for composing the Declaration? How original and how complete was his authorship of this document? Did he create or invent it, or did he copy, recall, or borrow in good part?

Jefferson's role as the author of the Declaration seems securely established and likely to endure. However, there is little or nothing in the Declaration in concept or language that had not been previously written by Spanish and Italian Jesuits of the seventeenth century, John Morin Scott (1730?-1784) of New York, James Otis (1725-1783) of Massachusetts, Filippo Mazzei (1730-1816) of Italy and Virginia, Richard Bland (1710-1776) of Virginia, Thomas Paine (1737-1809) of England and Pennsylvania, and George Mason (1725-1792) of Virginia. What is more, Jefferson was most probably familiar with all of these prior writings with the possible exception of the polemical pieces by Scott that were broadcast at the time of the Stamp Tax controversy in 1765. Jefferson himself has been candid enough to write in later years in a letter of May 8, 1825, to Henry Lee: "I did not consider it as any part of my charge to invent new ideas altogether and to offer no sentiment which had ever been expressed before."[2]

A NECESSARY CONNECTION

It does not diminish the honor that of right belongs to Jefferson, therefore, if we call attention to the contribution of others to the Declaration of Independence and accord them their just recognition in turn. Also, we gain increased understanding of the relationship between the Declaration and the Constitution of the United States and subsequent amendments if we see their "necessary" connection. For we may regard the original Constitution, the Bill of Rights, and especially Amendments XIII, XIV, XV, and XIX, as "necessary" to implementation of the ideas stated in the Declaration.

And this is where proper recognition of the role of George Mason also becomes "necessary" to an improved perspective of historical development and justice to the memory of Mason. For not only did Mason make an important immediate contribution to the Declaration of Independence, but he also anticipated in general the structure and principles of government contained in the Constitution of the United States and those amendments which most added to freedom and equality before the law in America. We may also observe that Thomas Jefferson was not at the Constitutional Convention in Philadelphia in 1787 or in Virginia during the struggle for ratification, but George Mason was a leading actor during both events.

Robert Allen Rutland says of Mason's participation during the Constitutional Convention: "He was a faithful attendant at the sessions, speaking to the point on practically every topic of importance."[3] In any event, Jefferson and Mason indisputably viewed each other as honorable, kindred spokesmen and were the warmest of allies, pleased with and supportive of each other. It was a friendship based on the strongest of foundations—mutual respect—and ended only with the death of Mason but a week after a farewell visit by Jefferson to Mason at Gunston Hall, his beloved plantation home.[4]

The Declaration of Independence probably would have been quite similar in use of concepts, language, and line of argument even had Mason's Virginia Declaration of Rights not been available to Jefferson. Perhaps the same may be said of the Bill of Rights and Amendments XIII, XIV, and XV. However, we are able to trace a direct causal connection between the Virginia Bill of Rights and the First Ten Amendments. Indeed, a careful reading of the Virginia Bill indicates that its influence on the contents of the Declaration of Independence is much less than its contribution to the Bill of Rights of the Constitution of the United States. Also, the Bill of Rights may be of more practical and enduring value to the American system of government than the Declaration of Independence.

The Declaration embodies a credo of lofty principles and sentiments—but it is the Bill of Rights that is a matter of everyday law and habit by which Americans live. The Bill of Rights fulfills the aspirations of the Declaration of Independence as a continuing effective limitation on the power of government and as a promoter of individual and group freedom and opportunity. Is not this combination the essential nature of the American system of government and society?

Therefore, it is really of minor concern whether it be Mason or Jefferson who is to be held responsible for the phrase "the pursuit of happiness" that appears in the Declaration. For example, William Safire writes in a column entitled "What Government is For," that Jefferson departed from Locke's phrase "life, liberty and property" because, as Safire states it: "A disciple of his, Thomas Jefferson thought that he would give that phrase an inspirational lift, and our Declaration of Independence hails 'life, liberty and the pursuit of happiness.' That euphemism started the trouble."[5] The usually well-informed Safire has strayed into areas dealing with history and political theory where he lacks expertise and has thereby illustrated the need for many of us to become more familiar with the background as well as the wording of the Declaration.

THE ORIGIN OF THE IDEA

It is not difficult to set straight who was primarily responsible for inclusion of the words "the pursuit of happiness" in the Declaration by pointing out that they were, in effect, contained in the earlier Virginia Bill of Rights that was adopted on June 12, 1776, and that even before that date Philadelphia newspapers had reprinted its draft text (e.g., the Pennsylvania Evening Post on June 6, and Pennsylvania Ledger on June 8, and Pennsylvania Gazette on June 12). Jefferson was not asked to draft the Declaration until June 11 and probably did not begin his task of writing until June 12.[6]

The first article of Mason's Virginia Bill states: "That all men are by nature equally free and independent, and have certain rights, of which, when they enter into a state of society, they cannot, by any compact, deprive or divest their posterity; namely, the enjoyment of life and liberty, with the means of acquiring and possessing property, and pursuing and obtaining happi-

ness and safety."[7] By comparing the texts of the Virginia Bill of Rights and the First Ten Amendments—and, incidentally, the contributions of its framers in 1776 to the Declaration of Rights for the State of Pennsylvania and of John Adams to the draft of the Massachusetts Declaration of Rights for its Constitution of 1780—we see clearly recognizable reliance on George Mason's thoughts and words.[8] Most important of all, the following provisions that are present in the First Ten Amendments are contained in the Virginia Bill of Rights as well, at times in the very same words:

Amendment I: Freedom of religion and of the press.

Amendment II: A well-regulated militia. (Mason goes well beyond the Constitution, e.g., by specifying "that, in all cases, the military should be under strict subordination to, and governed by, the civil power.")

Amendment IV: No general warrants, but only those specifying the particular person, place, and thing and issued only upon probable cause.

Amendment V: No man to be deprived of liberty or property without due process of law, or compelled to be a witness against himself.

Amendment VI: In all criminal prosecutions the right of the accused to a speedy trial in the State and district and to be informed of the nature and cause of the accusation; to be confronted with the witnesses; and to have compulsory processes in his favor.

Amendment VIII: "Excessive bail shall not be required, nor excessive fines imposed, nor cruel and unusual punishments inflicted." (E.g., Mason: "9. That excessive bail ought not to be required, nor excessive fines imposed, nor cruel and unusual punishments inflicted.")

The influence of Mason and his tenets goes far beyond the Constitution's Bill of Rights, however. Thus, we may note the following basic provisions that are present in the original articles of the Constitution and are also specified in Mason's Virginia Bill of Rights: separation of the branches of government, a republican form of government, and periodic election to legislative and executive offices.

It is a matter of conjecture why Jefferson and his colleagues—who did make changes in his draft—did not include property or restore it. In fact, the word property does not appear in Jefferson's Rough Draft or the final version, but we do not know what was contained in the earlier drafts that have been lost. Perhaps this omission was an oversight, and perhaps not. Perhaps consciously or subconsciously property was omitted because material things were lower in their scale of values than the independence, self-government, and personal freedom for which they proclaimed "we mutually pledge to each other our Lives, our Fortunes and our sacred Honor."

OPPOSING ON PRINCIPLE

Even the pragmatic Alexander Hamilton in A Full Vindication of the Measures of the Congress (1774) had written with disdain of the economic aspects of the tea tax: "How ridiculous, then, is it to affirm that we are quarreling for the trifling sum of three pence a pound on tea, when it is evidently the principle against which we contend."[9] It is still the general rule that America, although rich in material accomplishments and possessions, considers things of the human spirit, including its pursuit of happiness, as transcendent. However, cognizance should be taken here that personal freedom, safety, and happiness are usually inseparable from enjoyment and protection of legitimate property rights.

The role of Thomas Jefferson and his Declaration of Independence as sources of continuing inspiration is a familiar one. Less familiar but no less important for America is the role that George Mason and his Virginia Bill of Rights played in fitting into place the capstone of American constitutionalism. It is not James Madison who is the original author of and prime mover for the First Ten Amendments to the Constitution of the United States: it is George Mason. George Mason refused to sign the Constitution at Philadelphia in September of 1787 because it failed to incorporate a Bill of Rights for the purpose of imposing limitations on the new federal government and because it failed to end slavery. He resolutely sat on his hands.

Mason went home to brave the wrath of George Washington and many of his countrymen by arguing in company with Patrick Henry that ratification of the Constitution should not take place until a Bill of Rights had been added to limit the power of the federal government and to protect the rights and freedom of states and individuals. To his great credit, although Madison adhered to his position that ratification should come first, he came to see the merits of Mason's demand for a federal Bill of Rights and the need to forestall a new convention. Madison therefore was to be the leader in Congress of those working for adoption of a national Bill of Rights in fulfillment of their ratification campaign promise.[10]

Until his end, Mason continued to hate slavery and to rue the failure of the Constitution to root it out from the new nation. But Mason approved of Madison's version of his Virginia Bill and lived to see the First Ten Amendments to go into effect on December 15, 1791.[11] It would therefore be appropriate if, just as Thomas Jefferson is remembered every Fourth of July in connection with America's Declaration of Independence from Great Britian, George Mason were to be more widely associated in the popular mind with the Bill of Rights that carried Independence a step further to "secure the Blessings of Liberty to ourselves and our Posterity" purposed in the preamble of a somewhat incomplete Constitution.

[7] In addition to *The Freeman*, Vol. 31, No. 7 (July, 1981), pp. 410-412, the text of the Virginia Bill of Rights is contained in Miller, *Gentleman Revolutionary*, pp. 337-340 (first draft, printed committee draft, and final version).

JACKSON HIGH SCHOOL BAND TO MARCH IN ROSE BOWL PARADE

HON. RALPH REGULA

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. REGULA. Mr. Speaker, a week ago I drew my colleagues' attention to the McKinley Senior High School Bulldogs who had just returned the Ohio football championship to Stark County, Ohio, in the district I am honored to represent.

Today I call attention to an honor won by one of the outstanding musical organizations in Stark County—The Jackson High School marching band which has been selected to represent Ohio and a seven-State area in the Rose Bowl parade.

When the purple and gold from Jackson High School steps smartly along beneath the palm trees in Pasadena on January 1, it will be performing before an audience extending from coast to coast—and overseas via satellite.

In order to make this dream come true, the band members have worked long and hard to ready themselves musically and financially. By selling pizzas, candy and roses; sharpening lawn mower blades; holding dances, rock-a-thons and other events, they raised 38 percent of the $164,820 required to finance their trip.

Unfortunately, the Ohio State University football team will not be representing Ohio in the Rose Bowl this year even though they are cochampions of the Big Ten. However, director Tim DeStefano and his show band of Stark County will be there—and when their music is heard, the hearts of Ohioans, and especially Stark Countians, will fill with pride.●

COMBATTING VANDALISM: SUGGESTIONS FROM NASSAU COUNTY, NEW YORK

HON. JOHN LeBOUTILLIER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. LeBOUTILLIER. Mr. Speaker, the public and their elected representatives at all levels of government have been saying how crime has risen to epidemic proportions.

While Federal agencies have reacted with typical Washington sluggishness to the problems, local agencies have been in the vanguard fighting all crimes ranging from murder to vandalism.

Fighting crimes is akin to plugging a dike's leak with one's finger. Like the proverbial Dutch boy who valiantly

tried to stop the torrents of the dike breakage, crime keeps popping up in places other than where the police are. Clearly, good law enforcement and intelligent, perceptive planning must go hand in hand.

The Nassau County, New York, Task Force on Vandalism is doing just that. The task force, commissioned by Nassau County Executive Francis T. Purcell in 1980, made their comprehensive report available earlier this year. Purcell and other concerned county leaders, such as Judge Robert Roberto and Task Force Legislative Director Harry Ellerton, attempted to discover just where vandalism was occuring, why it might be occurring, and what could be done to stop it from occurring.

The task force's report is a worthy study, and might well go on to serve as a worthy pilot project for other American locales suffering from the same problem.

Vandalism is no minor crime; it strikes at the most fundamental base of society: the right to safety. Crimes against property often lead to even more hideous crimes against people. When both occur, society is in danger of being ruled by those who have no respect for elemental decency and the most sacred rights of others. "No community is immune from the acts of vandalism," the report's authors state in their introduction. "Schools, businesses, private homes, houses of worship, and public buildings all share the brunt of destructive acts." Repeated occurrences of vandalism decrease public safety and contribute to social fear and mistrust. An unapprehended vandal is likely to be a recidivist, as well as a practitioner of a crime more serious than vandalism itself.

The task force has reliably surveyed the problem, examined its scope, determined its underlying causes, and recommended strategies for its elimination. Task Force Legislative Director Harry Ellerton has concisely expressed his views on the issue, as well as summarized the Commission's findings in an article in the September 3, 1981, edition of the East Meadow (New York) Beacon.

I commend Mr. Ellerton's thoughts to the attention of my colleagues:

TASK FORCE ON VANDALISM REPORT

(By Harry Ellerton)

With the Attorney General's Task Force on Violent Crime issuing their report, with its emphasis on dealing with major crimes, Vandalism by young people is still being thought of as a nuisance type crime, which is merely an annoyance to the public and a sign of the times, for which there is no solution.

But the increase in Vandalism in Nassau County was held significant enough by the Police Commissioner for the County Executive to appoint a Task Force on Vandalism to look into the problem and come up with meaningful answers.

As the Task Force's Legislative Chairman, after a full year's investigation and evaluation, there is absolutely no doubt in my mind that a young person who gets away with an act of Vandalism, when caught, might well be encouraged to embark on a career into more serious crimes, such as Burglary, Hold-Up and eventually Murder. This conclusion is shared by most officials, engaged in the various parts of the Criminal Justice System, that we talked to.

We must, therefore, do today whatever it takes, and at any cost, to deter a young first offender to become a recidivist, indeed graduate from Vandalism to more serious crimes. We must do that at all costs as the most cost effective way to fight the major crimes of tomorrow.

We are told that it costs the public about $20,000 per year to keep a convicted person in prison, in addition to what it costs to process him or her through the system—police, prosecution, defense, court and probation. If we make up our mind to train and employ able and devoted Youth Counselors who would help youngsters stay out of further trouble, each might well save 10 to 20 first offenders from becoming criminals, and at a nominal cost of perhaps $1,000 to $2,000 per person. Beside saving these kids and their families untold misery, the dollar savings to the public would be significant.

The Question to be asked has to be: Are we finally ready to admit that a serious problem exists and are we willing to address ourselves to solve it?

If we are still unwilling to turn over the enforcement of our laws to those among us who advocate the use of Vigilante methods, with a gun in every home or car, because the authorities have clearly not been able to protect the public from the marauders among us, then the other alternative has to be our insisting that our elected and appointed officials really start doing the job that they are paid to do. They must start by truly working together for the good of the public and stop passing the proverbial buck from one to the other.

It may well be too much to ask of certain members of the System to put aside their personal financial interest and stop exploiting the clearly ineffective Criminal and Juvenile Justice System by using technicalities to get young criminals back on the street over and over again, until they commit crimes that will finally cause them to end up in jail, with the tax payers footing that expensive bill. The system must be tightened up even if the cost of doing so is high.

Equally, the excuse "We just don't know the answers to this problem" is no longer valid, because the "Blue Print for Action" is available in the form of The Final Report that the Task Force on Vandalism presented to the County Executive in July 1981. It lists all statistics, reasons and ramifications as well as the recommendations most likely to stem this trend towards complete anarchy.

All it takes is to follow the most pragmatic recommendations of that Report and enforce all existing laws, at all costs. We must lobby hard for the new Legislation that is clearly needed, as outlined in the Report, and insist on the cooperation and coordination among the various parts of the system that leaves so much to be desired at the present time.

Additionally, there exists a curious reluctance on the part of the Major News Media, the Press as well as Radio and TV networks, to forthrightly inform the public as to the feasibility of the effective measures that can and must be taken to combat this cancer eating away at our very way of life. Except for the local newspapers, who continue to do an excellent job of reporting the situation as it is, even our officials insist on down playing, if not ignoring the situation completely. This is a disservice to the people who need all the encouragement they can get, that the problem does not defy any solution

The time has come for our officials on all levels to address themselves to this issue, realizing the seriousness of continuing to merely pay lip service to it and very little else. Respect for the law is at an all time low not only by our young people but also by the rest of the free world, of which we are supposed to be the leader.

We must set out to disprove the contention of many people these days that a form of government, such as ours, that favors the rights of criminals, is jeopardizing the safety of its citizens. Many believe that this permissive attitude towards crime is in effect little different from the practices of the totalitarian regimes which actually encourage acts of injustice and even violence against their own people.

When elderly people are afraid to leave their homes in fear of their very lives in many parts of our country, is it any wonder that there are comparisons made by many as to the desirability of living in this country versus living in a society that at least protects its people from harm in the streets, even if at the expense of freedom of speech and criticism of their government.

This sort of unhealthy situation and thinking of our people demands vigorous actions and remedies, which include taking the profit out of crime, not only for those actively engaged in it, but also for those who perpetuate it by exploiting the shortcomings of our present Criminal and Juvenile Justice System. We simply cannot afford to stand by and allow offenders to be run through the system over and over again, at the tax payers expense, without contributing to the problem ourselves.

All it takes is the resolve to do something more than wring our collective hands, namely insist on meaningful action NOW, we have a "Blue Print for Action" in the Nassau County Vandalism Report, which is available to every one for the asking from the County Executive's office in Mineola.

You can help by familiarizing yourself with its contents and by demanding the appropriate action from your elected representatives and officials.

The charge of the Committee on Legislation was to review the current state of legislation as it relates to the issue of Vandalism and suggest ways in which current laws can be enforced more effectively or recommend new legal remedies which might minimize the incidence of Vandalism. In Addition, the committee was asked to dialogue with those agencies in the Criminal Justice System which have direct contact with the issue and elicit their thoughts on strengthening ways in which Vandalism can and should be handled by the system.

RECOMMENDATIONS

(1) Crimes of Vandalism should be recognized as the probable start of a Criminal Career and should be identified early and dealt with appropriately by school and parents and the judicial system.

(2) Judges should require offenders to pay legal fees of victims and the cost of all damaged property as restitution through direct payments and through Confessions of Judgment when the offender or parents are presently unable to pay such costs. Such Judg-

ments would be prepared and filed in Nassau and Suffolk County by the Attorney of the offender pursuant to court order and he shall then notify the recipient of the recording date. Victims could then pursue liens based on the judgments for future recovery of damages.

(3) Orders of Restitution against defenders in criminal cases should be automatically converted to Civil Judgments and made acceptable for filing in the County Clerk's Office against any present or future assets of the defender.

(4) Personal Restitution (working off damages) should be performed in the offenders home community.

(5) Plea-Bargaining should be limited.

(6) The Law mandating a $5,000 parental liability charge when religious property is vandalized be extended to include Vandalism of all property.

(7) The Family Court records should be available to the District Attorney in Adult Courts. The Committee endorses D.A. Dillon's support of a proposed bill sponsored by Assemblyman Arthur J. Kremer, described by Mr. Dillon as follows:

"Under this proposal, records of a young person adjudicated a Juvenile Delinquent, two or more times within 10 years, for acts that would be crimes if done by an Adult, would be made public, neither sealed nor destroyed, as presently done. Our goal is to give young people just one bite of the apple. Once given a break all sealing of records would end."

(8) The Committee feels that restitution to the victim of vandalism must be made in full in every case. The victims rights must be given first priority in every case.

To this end, monetary penalties must be collected at all costs, and if uncollectable at the time of the judgment, by means of liens on the property and future earnings of the offender and/or their parents, if juvenile. The Committee believes that the long-term deterrent effect achieved by the certainty of strict enforcement of all judgments of a monetary nature would more than offset any upfront collection and administrative expenses.

(9) The Probation Department who collects all data connection with juvenile proceedings in the Family Court undertake a study on Recidivism of Juveniles, which is felt to be absolutely essential and of the highest priority at this time. The results of this study should once and for all enable us to ascertain the deterrent effect, or the lack of it, the Juvenile Justice System has been able to exert on first offenders, employing currently used procedures.●

PARRIS COMMENDS HOUSE ON FUNDING FOR THE WOODROW WILSON BRIDGE

HON. STAN PARRIS

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. PARRIS. Mr. Speaker, I am extremely pleased that the House today has approved legislation that will provide Federal funds for the repair of the Woodrow Wilson Memorial Bridge. Since the Senate has already agreed to a similar provision in its multiyear highway bill, I am confident that an agreement will soon be reached and that the required $60 million will be provided in full.

I have been working with my colleagues for several months in an effort to secure the Federal funds needed to repair the bridge and I am elated that an agreement has finally been reached. I would like to thank Congresswoman HOLT and my colleague from Virginia Congressman WOLF for their hard work, diligence, and patience. I would also like to express my thanks to Senator STEVE SYMMS, Congressman CLAUSEN, and Congressman SHUSTER and their staff people for working with us and providing their expertise in finding a solution to this difficult situation.

For some time now, the Woodrow Wilson Bridge has been in desperate need of repair and is closely approaching the point where it will have to be closed for safety reasons if not rebuilt and resurfaced soon. The bridge serves as a vital transportation link, crossing the Potomac River and passing through the three jurisdictions of Virginia, Maryland, and the District of Columbia. On weekdays, over 100,000 vehicles cross over the bridge bringing area residents to their jobs. There is not a day that goes by without my office receiving a phone call or letter from a resident concerned with the bridge's horrible condition.

This bridge is the only U.S. Government-owned bridge in the country and Congress has an obligation to provide the funds for its repair. The original construction of the bridge was financed completely with Federal funds. Since the construction of the bridge, Virginia, Maryland, and the District of Columbia have shared equally the cost of the ordinary maintenance and operation of the bridge. All concerned parties, including the Federal Highway Administration, recognize that the repairs which are now required are far beyond the scope of ordinary maintenance and that the cost of such repairs should be financed with Federal funds. Since the repairs are so extensive, and the bridge belongs solely to the Federal Government, I am delighted that the House has agreed to provide the full $60 million which is required to rehabilitate the bridge.

The Wilson Bridge plays a key role in bringing thousands of Washington area residents to their jobs each morning. It has been let go long enough and has deteriorated to the point where it is no longer safe. I am pleased that the House has recognized this problem and has agreed to rectify the situation. I am also confident that the Senate will agree to this provision so that repairs can begin on the bridge in the very near future.●

THE JAPANESE R. & D. CHALLENGE: THE AMERICAN SMALL BUSINESS RESPONSE

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. LAFALCE. Mr. Speaker, the United States faces a serious challenge to its technological and innovative preeminence from Japan. The Japanese have reached the point where they can mount a concerted effort to produce the innovations that have kept the U.S. economy competitive even with its basic industries in decline.

A recent article in the Wall Street Journal describes the Japanese program and why the United States needs to take steps to assure its lead. According to the article:

> The challenge for the future, (Japanese) business and government leaders agree, is to originate technologies. "The century of catch-up and modernization is now ended," MITI (the Ministry of International Trade and Industry) said in a report last year. Hitachi Ltd.'s chairman, Hirokichi Yoshiyama, says that Japan must give priority in the 1980s and beyond to the development of unique technologies, particularly ones that lay the groundwork for innovations. Otherwise, some Japanese fear increasing resistance in other advanced countries to the one-way flow of technology from Japan that is so injurious to some foreign industries.

The Japanese are taking concrete steps to achieve these goals. "Japan has set upon a policy of sharp increases in research and development spending, to 3 percent of gross national product in 1990 from 2.7 percent currently, with the Government's share of the R. & D. bill to rise to 40 percent from 27.2 percent," the Wall Street Journal reports.

The United States cannot rest on its innovative laurels. New programs and policies must be adopted that use existing innovative resources fully and stimulate new ones. It is essential that our Nation be kept at the cutting edge of innovation if the U.S. economy is to remain competitive, dynamic, and create the millions of new jobs needed in the decade of the 1980's.

Congress is currently considering a bill that is a key element in stimulating U.S. innovation. That bill is H.R. 4326, the Small Business Innovation Development Act of 1981. H.R. 4326, which was reported unanimously by the House Small Business Committee and has over 150 cosponsors, would require Federal agencies with large R. & D. budgets to strengthen small business' tremendous innovative abilities by establishing small business innovation research programs. Modeled after the highly successful National Science Foundation program, the bill would require each qualifying agency to

spend a small percentage of its total R. & D. budget to fund research on new innovative ideas by small R. & D. firms to meet Federal R. & D. needs. The purpose is to use Federal funds in the way most likely to spur the development of new technologies and insure their commercial application.

H.R. 4326 provides for a minimal investment in America's R. & D. future. What makes this investment so crucial is that it is going to the small R. & D. businesses that have demonstrated an unusual ability to innovate, an ability far greater than the large corporations.

The Senate has passed its version of the Small Business Innovation Development Act by a 90 to 0 vote. Action is needed in the House if the United States is to have a positive policy and program to stimulate innovation.

Mr. Speaker, I am including the complete text of the Wall Street Journal article of December 1, 1981, in the RECORD. After Members read it, they will realize the importance of H.R. 4326 and the need to cosponsor and enact it.

TECHNOLOGY DUEL—JAPAN STRIVES TO MOVE FROM FINE IMITATIONS TO ITS OWN INVENTIONS

(By Urban C. Lehner)

TSUKUBA, JAPAN—In 1950, a 23-year-old engineer named Nobutoshi Kihara "invented" the tape recorder.

Actually, German scientists had invented it earlier, during World War II. But Mr. Kihara had never seen the Germans' machine and had no technical information on it. All he knew was that the Germans had made one. His impressive success in creating the device anew helped propel his obscure Tokyo-based company—now called Sony Corp.—to world prominence.

A few months ago, a team led by Mr. Kihara, who now is a Sony managing director, came up with another breakthrough; a camera that doesn't use film. The images are recorded instead on a special magnetic disk. After taking as many as 50 pictures, the user can pop the disk out of the camera, insert it in an apparatus attached to his television set, view the pictures and decide which ones he wants to make prints of. After pictures have been printed, the disk can be reused. Sony hopes to market the camera, which it calls Mavica, within two years at a price of about $1,000.

Sony truly invented the filmless still camera. No one else has achieved anything like it. but Sony didn't invent a vital component that makes the Mavica possible—a specialized semiconductor, a charged coupling device (CCD) that converts rays of light into electronic signals. Chicago-based Bell & Howell Co. holds the basic patent on the CCD.

Thus has technology here advanced. Japan has gone beyond merely imitating the inventions of others, though it still does some of that. Today many Japanese companies specialize in improving on or finding new applications for existing technology.

Overall, based on such measures as patents registered, research expenditures and technological exports, Japan's science and technology agency reckons that although the country still is far behind the U.S., its science and technology have rapidly grown to become comparable to West Germany's.

But the Japanese have yet to originate epoch-making new technologies that make possible whole new industries, as the light bulb did or the jet engine or the CCD. Toru Namiki, an official of the Ministry of International Trade and Industry (MITI), says one study shows that in a recent 20-year period, Japan came up with 26 technological innovations, only two of which were momentous. The U.S. had 237 innovations, 65 of great significance.

FROM IMITATION TO CREATION

The challenge for the future, business and government leaders agree, is to originate technologies. "The century of catch-up modernization is now ended," MITI said in a report last year. Hitachi Ltd.'s chairman, Hirokichi Yoshiyama, says that Japan must give priority in the 1980s and beyond to the development of unique technologies, particularly ones that lay the groundwork for innovations. Otherwise, some Japanese fear increasing resistance in other advanced countries to the one-way flow of technology from Japan that is so injurious to some foreign industries.

To accomplish its purposes, Japan has set upon a policy of sharp increases in research and development spending, to 3 percent of gross national product in 1990 from 2.27 percent currently, with the government's share of the R&D bill to rise to 40 percent from 27.2 percent. (In the U.S., 2.5 percent of gross national product currently goes to R&D and the government's share is 50 percent, or 35.5 percent excluding military research, of which Japan has almost none.) Japan's new stress will be on basic research.

Japan also is consolidating physically some of its research so as to improve efficiency. MITI recently moved its own labs to a new science city here in Tsukuba 25 miles north of Tokyo. The agency plans to build 16 "technopolises" to house other research labs, high-technology businesses and their employes in the 1990s.

A PUSH IN ELECTRONICS

Japanese companies, too, are increasing their R&D efforts, especially in such industries as electronics. Hitachi, which employs more than 9,000 researchers, has increased its R&D outlays to 128 billion yen in the year ended last March 31, or 3.81 percent of sales, from 36.2 billion yen, or 2.97 percent of sales, nine years earlier. In semiconductors and computers, it is spending 13 percent to 15 percent of sales on R&D, and it is increasing emphasis on basic research.

Still, it won't be easy for Japan to stimulate innovation as it was to stimulate imitation, many observers believe. Japan's social system stresses conformity and group harmony. Its educational system stresses memorization by students and deference by young faculty members to their elders. Its laboratories tend to be large bullpens where researchers work in groups.

These conditions aren't conducive to creativity, asserts H. Stephen Spacil, a General Electric Co. scientist stationed in Tokyo as a scientific observer.

Thus, the decision to encourage scientific innovation has occasioned some national soul-searching. Can and should Japan change its social and educational system? And if it does, how is Japan to avoid losing the sources of its current economic strength?

The problem, writes the research chief of Matsushita Electric Industrial Co., Shunkichi Kisaka, is that while it wouldn't be easy for Japan to display greater creativity by altering its educational and social systems, it would be even more difficult for a research institute or a business enterprise to enhance creativity quickly.

One specific effort to encourage creativity just got under way at the Japan Research Development Corp. (JRDC), a nonprofit outfit created recently by the science and technology agency. It is a series of four research projects, each to last five years, in which scientists from abroad will be invited here to work with Japanese scientists, exposing them "to different ways of thinking," as the JRDC's Noboru Fujikawa puts it. Ten foreign scientists already have applied for the first project, an effort to develop a vaguely defined "perfect integrated circuit."

But even those who expect Japan to meet the creativity challenge don't expect that it will happen overnight. Justin Bloom, who just finished a six-year stint as the science counselor at the U.S. embassy in Tokyo, believes that Japan is entering a golden age of creativity in science. But he doubts that the age will flower until Japan revamps its system of higher education.

Masanori Moritani, a senior researcher at Nomura Research Institute, an affiliate of Nomura Securities Co., thinks it will be 10 or even 20 years before the government's efforts to spur creativity will really pay off.

JAPAN'S CURRENT STRENGTHS

That, of course, doesn't mean that Japanese technology is in the doldrums. All signs are that it will continue to progress even without any basic changes in the country's social and educational system. In a number of specific areas, Japan is showing great strength.

Steel: Most people, perhaps correctly, don't think of steel as a high-technology industry. But the Japanese have raised steelmaking to new heights. Increasingly, they are exporting this technology by licensing its use to steel-makers in such countries as South Korea, and even in the U.S. Indeed, steel is the one industry in which Japan currently exports more technology than it imports.

It is generally agreed that Japan will continue to be strong in steel. With world demand for steel weak and likely to remain so, steel-makers in the U.S. have looked for ways to diversify out of what they see as an unpromising business. Japanese steelmakers have responded to the slump differently. They are busy trying to create new demand by developing new products. For example, Nippon Kokan K.K., Japan's second largest steel-maker, is working on lighter steels and composites of steel and plastic for use in future fuel-efficient automobiles. Recently the company developed a steel for use in natural-gas pipelines that can withstand pressures of 80,000 pounds per square inch, which is 10,000 pounds higher than the current pipeline-industry standard.

Social Technology: Experts say that Japan has done an excellent job technologically in such areas as disaster prevention (for example, its extensive earthquake-prediction system) and mass transportation (Japan's 125 mile-per-hour bullet trains).

At MITI's robot lab here in Tsukuba, researchers are trying to perfect a guide-dog robot for the blind. (Japan has 340,000 blind people but only 380 guide dogs.) The robot, which has been under development for five years and could easily take another five years to perfect, will be programmed to travel its master's normal routes (house to office, for example) and will be able to see

and avoid such hazards as open manholes, the researchers say.

Production Technology: "If you think of technology as production technology," says Kenichi Ohmae, who runs the Tokyo office of the consulting firm McKinsey & Co.,"Japan has been very innovative."

The category includes robots, and in that field, says Paul Aron, the president of U.S. operations for Daiwa Securities Co., the Japanese are convinced they are going to be preeminent.

The Japanese also have proved skillful in coming up with equipment to improve manufacturing productivity.

The world doesn't see much of this stuff, though. It isn't for sale. "Many large Japanese companies have labs that do nothing but design production equipment for their own factories," says GE's Mr. Spacil, adding: "That's rather rare in the U.S." At Osaka-based Matsushita Electric Industrial Co., Minoru Morita, the managing director in charge of production engineering, says the purpose of this is keeping ahead of competitors. Matsushita employs 3,000 engineers and makes about 30 percent to 40 percent of its production equipment in-house—several hundreds of millions of dollars a year worth.

Applications and New Products: The Japanese will undoubtedly continue to find new and better uses for technologies developed elsewhere. Competitive pressures at home and abroad encourage them to exploit existing technology. "I see no limit to our creation of new products," says Sony's Mr. Kihara.

Foreign competitors make it easy for the Japanese by not manufacturing what they have developed. For instance, liquid-crystal displays, used in electronic watches and calculators, were developed in the U.S. and in Britain, but in neither country did anyone show much interest in producing them. Today Sharp Co. and Hitachi each have 25 percent of the world market. The combined U.S. share is less than 10 percent.

Pharmaceuticals: Japan has long been strong in fermentation technology, and its drug companies are beginning to spend significantly on developing new-product applications. Although the Japanese aren't soon likely to overtake their American and European competitors in pharmaceuticals generally, it won't be long before they are real contenders in some product lines; including anti-cancer drugs. One problem the industry faces is that some of Japan's talented scientists are doing their work in the U.S. and in other countries.

Nuclear Energy: McKinsey's Mr. Ohmae (who has a Ph.D. in nuclear engineering) says Japan has surpassed France and is probably on a par with the U.S. The anti-nuclear movement here is weaker than in the U.S., which is ironic considering the vehement opposition here to nuclear weapons. By one estimate, as much as two-thirds of all government R&D money here goes to nuclear-energy research. Japan, more dependent on foreign oil than any other advanced country, plans to lessen that dependence by constructing reactors, which it hopes also to export.

Computers: The Japanese haven't been as successful in cracking world markets as they had hoped, but they haven't given up, and their computer makers are pouring money into R&D. The government, looking toward the 1990s, is financing two ambitious research programs. One is to develop a supercomputer that will work 1,000 times faster than today's fastest. The other is to develop a fifth-generation computer that "thinks" like human beings and can "understand" what they are saying. (Some Western experts doubt that even the Japanese can build such a beast.)

Despite their strengths, many Japanese will continue to worry about the state of their technology until Japan demonstrates an ability to innovate. In 1963, William Shockley, one of the three Bell Laboratories scientists who invented the transistor, visited Japan and was interviewed on television by Makoto Kikuchi, who today is the director of Sony's research center in Yokohama. Mr. Kikuchi remembers well Mr. Shockley's taunts: "Do you really think you can establish a Western kind of science and technology on a base of Japanese culture and language? Don't you have any feeling of incompatibility?"

A lot of viewers here undoubtedly nodded their heads when they heard that, for it jibes with a popular notion that the Japanese aren't scientifically innovative. McKinsey's Mr. Ohmae crystallizes the debate here when he says the real question is, Can Japanese scientists learn to create?●

SUPPORTS RETENTION OF PUBLIC SERVICE SUBSIDY TO U.S. POSTAL SERVICE

HON. MICKEY LELAND

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. LELAND. Mr. Speaker, as chairman of the House Subcommittee on Postal Personnel and Modernization, I wish to reaffirm my full and unqualified support for the retention of the public service subsidy to the U.S. Postal Service. The elimination of this subsidy would have disastrous effects that would adversely affect the quality of postal service, postal rates, and postal employees.

I was very disappointed by the action of the Appropriations Committee, which voted to eliminate the subsidy that had been planned. I am afraid that the members of that committee were mislead by comments made by the Postmaster General indicating that the Postal Service could absorb the loss.

However, the Postmaster General aslo said that absorbing that loss would mean a rate increase sooner than planned, and that the loss of the subsidy will make it much more difficult to maintain present services such as 6-day delivery, and to continue operations of small post offices.

I urge my colleagues to keep these facts in mind whenever we consider postal affairs.

I would like to insert into the RECORD, a statement from the ad hoc committee for Postal Service, which includes employee unions and organizations representing postal supervisors and postmasters. I agree totally with their views and their analysis:

THE IMPACT OF TOTAL ELIMINATION OF THE PUBLIC SERVICE SUBSIDY

President Reagan has proposed an additional cut in the Postal Service appropriation for fiscal year 1982. His proposal is to cut $250 million from the public service subsidy and thus totally eliminate the subsidy for the current fiscal year. The impact of such a cut and elimination, if approved by Congress, would be devastating.

The reasons why the public service subsidy should not be cut and totally eliminated include the following: A reduction in vital services; loss of jobs; increase in postal rates; loss of Congressional influence; and the excessiveness of the cuts in relation to other programs.

REDUCTION IN VITAL SERVICES

The public service subsidy allows the Postal Service to continue nationwide services such as six-day mail delivery, the operation of small, rural post offices, corner collection boxes, and door-to-door delivery. Despite assurances to the contrary, the Postal Service will have little choice but to revise current policy and eliminate those services which the subsidy guarantees. An elimination of one day of mail service, for instance, would have negative reprecussions for all users of the mails, including a decline in the quality and speed of delivery.

The Postal Service is a public service, whose historical, non-profit orientation precludes it from ever attaining a goal of self-sufficiency. Unfettered access to a universal postal system operating at reasonable rates has been a long agreed upon national policy. If cost-effectiveness has been a national postal objective, then comprehensive rural delivery services, six days of mail delivery, free mailings of items for the blind and handicapped, special rates for library services, and other public spirited projects would never have been adopted.

LOSS OF JOBS

A total of 40,000 jobs could be lost if there is a reduction in current delivery services or an elimination of a number of small, rural post offices. For example, a swing shift letter carrier, who works a different route every day so that the regular carrier can have his day off, would be eliminated. This would obviously also impact all employees, such as clerks and mail handlers. Additionally, supervisors and Postmasters would have fewer people to supervise, thus more jobs would be lost. Of course, closing small Post Offices would eliminate additional jobs for all postal employees.

HIGHER POSTAL RATES

An additional cut of $250 million, coupled with the $394 million cut during the first budget resolution, will result not only in reduced services, but higher postal rates. The recent increase in first-class postage from 18 cents to 20 cents occurred before the proposed additional cut. The Postmaster General says he will ask for another rate increase to 24 cents within two years. This anticipated increase is based upon a $250 million public service subsidy. Without this subsidy, the Postmaster General will certainly have to ask for an even larger rate increase. Because rate increases correlate with usage, the subsidy elimination will result in increased rates and reduced volume. Both are counter-productive and detrimental to Americans using and relying on the Postal Service.

As a matter of national policy, Congress and the general public support equal access to the mails at non-discriminatory rates.

The Administration proposal to eliminate the public service subsidy directly challenges that national policy. If implemented, the net effect of the Reagan cut would be most directly felt by the group for whom it seeks relief—the taxpayer.

CUT IS EXCESSIVE

On September 24, the President announced his intention to seek a 12 percent across-the-board cut in all non-defense appropriations. The elimination of the public service subsidy for the Postal Service is a 29 percent cut. The Postal Service, and consequently the general mailing public, are being asked to shoulder a disproportionately higher share of the cuts.

LOSS OF CONGRESSIONAL INVOLVEMENT

Congress limited subsidies to the Postal Service are its last viable means of control over the Service. The automony given the Postal Service by the 1970 Reorganization Act allows it a great deal of independence. Eliminating the subsidy payments severes the last vestige of influence, save oversight hearings, which Congress has over USPS. The day may yet come when postal management will dictate draconion reductions in postal services with complete impunity from Congressional review. Elimination of the subsidy only hastens the nearness of that day.●

MATAGORDA ISLAND—HOME OF ENDANGERED SPECIES

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. CONTE. Mr. Speaker, today I am introducing legislation to designate portions of Matagorda Island, which is located off the coast of Texas, as wilderness. This designation will insure that this magnificent island remains in a natural state for the protection of endangered species, migratory waterfowl and upland game.

As many of you are aware, Matagorda Island is one of the Nation's largest barrier islands. It is, perhaps, one of the single-most important areas of wildlife habitat in the country. In fact, it is the winter home of the endangered whooping crane and six other endangered species; the bald eagle, the peregrine falcon, the brown pelican, kemps ridley, loggerhead, and Atlantic green sea turtles. In addition, the island provides a critical habitat for thousands of migratory waterfowl and numerous upland game species. It includes some of the best productive habitat for the mottled duck on the Texas coast and is a key wintering habitat for the central flyway.

Mr. Speaker, it is my understanding that there may be an effort to transfer to the State of Texas this invaluable federally owned area without the benefit of an environmental impact statement. My legislation is designed to create a proper atmosphere for the holding of hearings to determine what boundaries and sections of the island qualify as wilderness. It is also designed to consider the relation of the island to the Coastal Zone Act and the pending barrier island legislation now before the Congress.●

INTERNATIONAL HUMAN RIGHTS DAY

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. WAXMAN. Mr. Speaker, 33 years have passed since the adoption of the Universal Declaration of Human Rights by the United States. In those 33 years, much progress has been made. And much, of course, remains to be done. The Declaration's preamble declares that—

The advent of a world in which human beings shall enjoy freedom of speech and belief and freedom from fear and want has been proclaimed as the highest aspiration of the common people.

It is time for this administration and this Congress to rededicate ourselves to the human rights struggle. Our past record of leadership bestows upon us unique influence and a moral responsibility to use that influence. Our vigorous efforts are dictated not only by our humanitarian concern for the oppressed around the world, but by our own self-interest as well. Our own liberties will be safer if the rights of others are protected.

In commemorating this day, let us reject a policy of timidity which might allow our friends or our foes to conclude that we are "soft" on human rights.●

DR. WILLIAM E. ECCLESTON ON FREEMASONRY

HON. JOSEPH G. MINISH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. MINISH. Mr. Speaker, at a time when voluntary charitable activity is being called on to assume even greater burdens in helping less fortunate members of society, it is appropriate to consider the good work of some of the fine organizations which we sometimes take for granted. Recently William E. Eccleston of Washington, D.C., delivered an address at the Washington Rotary Club describing the nature and activities of the Freemasons, and I feel that his remarks will be of interest to all.

Dr. Eccleston was awarded his D.D.S. by Georgetown University in 1934, going on to graduate work at the Cook County Graduate School of Dentistry in Chicago. Since returning to Washington in 1936, Dr. Eccleston has practiced his profession and been active in a number of civic and fraternal activities. His retirement from practice in 1979 freed Dr. Eccleston to devote full time to his duties as sovereign grand inspector general in the District of Columbia, the Supreme Council, Scottish Rite. As a 33d degree Mason and past grand master of the Grand Lodge of the District of Columbia, Dr. Eccleston is well qualified to bring us up to date on the many charitable activities which the Masons pursue.

AN ADDRESS DELIVERED BY DR. WILLIAM E. ECCLESTON BEFORE THE WASHINGTON, D.C. ROTARY CLUB ON SEPTEMBER 9, 1981

I do want to mention the fact that I am a dentist by profession, but in September 1979 my building at 1726 Eye Street, N.W., was demolished and I retired from my profession.

I have been received into Rotary under the classification of Fraternal Organizations, which in this instance means the Fraternity of Freemasonry, which is the oldest and largest fraternity in the world, consisting of over five million Masons. I have been active in Freemasonry for over 40 years. There are several branches and a number of degrees in Freemasonry. To become a Master Mason you have to receive the first three degrees. From there you can progress to the other degrees and orders if elected, such as the York Rite, the Scottish Rite, the Shrine and other branches. How does one become a Mason? Many men live a lifetime and never know they must ask for admission to the world's oldest, most purposeful and greatest Fraternity. They do not realize that they will not be invited. They must come in of their own free will and accord, without persuasion. They must ask a Mason for a petition.

"What is Freemasonry?" It is a fraternal society which is based on certain moral and religious doctrines: the moral doctrines include brotherly love, relief and truth, and the religious doctrines comprise a belief in a Supreme Being and the immortality of the soul.

There is nothing in our requirements to prevent a Roman Catholic, a Mohammendan, a Buddist, a Morman, a Protestant or a member of any religious sect having a belief in one Supreme Being from becoming a Mason, and we have within our membership adherents of each of these religious groups. Discussion of sectarian religion is prohibited in the lodge in order to maintain peace and harmony, but Masonry encourages its members to take an active part in the churches of their choice. It is perfectly proper to explain that the discussion in the lodge of political matters or candidates is also prohibited for the same reason, but that as individuals we have the right, outside the lodge, to engage in political affairs. Indeed, civic duty encourages the individual Mason to actively participate in community affairs.

The many charity and benevolent programs of the affiliated Bodies and organizations are visible manifestations of Masonic relief. The Shrine Hospitals for Cripple Children and the Shrine Burns Institutes have captured the imaginations of everyone with the truly great benevolent work which they accomplish. Their combined operating expenses amount of something like one million dollars a week. The Shriner Hospitals are for the treatment and care of children afflicted with deformities, disease and injuries involving the bones, joints and muscles. The Shrine Burns Institutes are designed to

meet the physical and psychological challenges presented by severe burns. In both type hospitals there are research facilities and related training programs.

The benevolences of the Scottish Rite of both Southern and Northern Jurisdictions are among some of the greatest of unheralded acts of Masonic concern. The Scottish Rite Hospitals for Crippled Children in Decatur, Georgia, and Dallas, Texas, in operation for more than fifty years, have annual budgets in the millions of dollars. Tens of thousands of children of all races have been returned to useful living as a result of these great charities.

Masonic bodies grant scholarships to deserving students in many fields of scholastic endeavor.

Many Grand Lodges maintain and operate Masonic homes, orphanages, hospitals and infirmaries. This is a major effort representing many millions of dollars investment and is a multi-million dollar annual expenditure.

The Knights Templar Eye Foundation of the Grand Encampment, Knights Templar, is a multi-million dollar activity providing research, surgery and hospitalization for individuals with disease or injuries of the eyes which could result in blindness. And there are many other charities, such as dentistry for the handicapped, muscular dystrophy program, blood donor program, dyslexia and aphasia program, schizophrenic research program and cerebral palsy-spastic program plus the support of youth programs.

Masonic relief and charity amount to over $1,500,000.00 per day.

Thank you for giving me this opportunity to speak today.

I also want to say that I am happy to be a Rotarian.●

JERRY WURF: A CHAMPION OF PUBLIC EMPLOYEES

HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. HOYER. Mr. Speaker, we who are friends of the labor movement have always had a champion in Jerry Wurf, who worked tirelessly for more than 40 years building the largest public employee union in the Nation. I had the pleasure of working with many of Mr. Wurf's colleagues, all of whom were resolute in their admiration of this man, and, in fact, mirrored many of this gentleman's finest attributes. So it was with a great deal of sadness, Mr. Speaker, that I learned of Mr. Wurf's death last week.

Jerry Wurf almost singlehandedly took on the difficult task of organizing public employees on the local, county, and State levels. With a vigor and determination unmatched since the early days of union activism, Jerry Wurf brought to public employees a sense of identity, a sense of pride in their work, and a sense of the great contributions these employees make to the taxpayers who pay their salaries.

Mr. Speaker, these are trying times for public employees. My district has a high percentage of public employees at all levels of government, and all of them are experiencing declining morale from the economic insecurity of this era.

Too often this Congress and the American people have been quick to find fault with the government employee, while at the same time they are slow to realize they are the same employees who collect their garbage, process their loans, and man their police and fire stations. Yet Jerry Wurf went far in bringing to this most vulnerable of employee groups the security and protection they so rightly deserve.

It was no small feat to bring our treatment of government employees into the 20th century. It took a man of Jerry Wurf's savvy, intelligence, and determination to accomplish this. Jerry took over the reins of leadership of the American Federation of State, County and Municipal Employees in 1964, and during the next 17 years, saw his union grow to become the third largest in the AFL-CIO. It was this perception that government operates more efficiently and more productively when its employees may count on a fair and deserved salary and benefit package. We have only now begin to realize this.

Jerry Wurf was a man whose determination was reflected in all he attempted. I only wish, Mr. Speaker, that the tough gentleman were still with us as we enter perhaps one of the most trying times every faced in America. Though we cannot count on his physical presence to guide us through the coming battles, his memory will provide a banner for us to work behind.●

BRUTAL TREATMENT OF VIETNAMESE BOAT PEOPLE BY THAI PIRATES

HON. HAMILTON FISH, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. FISH. Mr. Speaker, the mistreatment of defenseless people is always a matter of grave humanitarian concern. A recent article in the Washington Post presents a shocking account of the brutal treatment of 41 Vietnamese on a small boat who faced repeated pirate attacks before a Thai fishing boat rescued them. Most of the Vietnamese never made it to shore because the fishermen left them off the coast in rafts rather than face possible punishment for bringing refugees to Thailand. In November, pirates attacked 17 out of 21 of the refugee boats that reached Thailand. U.N. statistics document an astonishing 80 to 90 percent chance of pirate attack on those who in desperation leave Vietnam.

A Thai antipiracy program, relying on U.S. funds, recently terminated for lack of resources. The United States should respond generously to efforts by the United Nations High Commissioner for Refugees to meet the piracy threat.

A concerted diplomatic effort on the part of our Government, moreover, should be directed toward underscoring U.S. abhorrence of attacks on refugees and U.S. support for regional efforts to stop piracy.

The Washington Post has helped to focus world attention on a serious humanitarian problem by printing this provocative story on the brutal treatment of desperate people. Hopefully, the article will inspire a concerted national and international response. The article follows:

[From the Washington Post, Dec. 10, 1981]

BRUTAL PIRATES INCREASINGLY PLAGUE VIETNAMESE BOAT PEOPLE

(By William Branigin)

BANGKOK.—Last month, Le Thi Anh Phuong and 40 other Vietnamese set off from Rach Gia on the southwestern coast of Vietnam in a small wooden boat.

As they approached Thailand, they were attacked four times by pirates. Each time they were robbed, and each time the other vessel rammed their frail craft. Then on Nov. 30, with their boat foundering in heavy seas, a Thai fishing boat came to the rescue. The fishermen gave the Vietnamese food and water and began towing their boat. When it sank anyway, the fishermen took the refugees aboard their own vessel.

However, the fishermen were fearful of violating strict Thai immigration laws that impose harsh penalties on Thais who take Vietnamese refugees to shore or harbor them on Thai soil. So the fishermen built rafts for the Vietnamese and put them to sea about half a mile off the Thai fishing port of Songkhla.

Of the 41 boat people, 28 never made it to shore in the rough waters. Le Thi Anh Phuong, a 23-year-old student, was the only woman among the 13 survivors who reached Thailand.

In a way, this story reported by refugee officials is typical. Of the 21 Vietnamese refugee boats that made it to Thailand in November, 17 were attacked by pirates. The average number of attacks was 3.5 per boat.

This is consistent with U.N. statistics lately, which show that 80 to 90 percent of the refugee boats reaching Thailand have been attacked by pirates, many of them several times.

However, the more unusual account of the circumstances in which 28 persons drowned underscores a source of mounting U.N. concern about Thailand's policies toward refugees.

Some refugee officials say that tough Thai measures are responsible for the deaths of some refugees who might otherwise be saved. Moreover, the officials worry that the Thai policies, designed to deter Vietnamese boat people from coming here in the first place, are indirectly encouraging more frequent and more brutal attacks by Thai pirates.

In fact, according to U.N. officials, November has been the worst month on record for pirate attacks on Vietnamese boat people.

Usually, the number of confirmed Vietnamese refugee deaths directly attributable to pirate attacks averages one for every 100

boat people who arrive in Thailand safely, according to U.N. officials. But last month the rate was more than one for every 10. According to the officials, at least 101 persons were confirmed killed and an additional 43 were missing and presumed dead. About 950 Vietnamese arrived safely.

In one of the more brutal incidents reported last month, pirates robbed a boatload of 19 Vietnamese, sank the boat and threw all 12 men overboard to drown, according to refugee officials. The pirates abducted four women and three children, including a three-month-old baby, and repeatedly raped the women over a 10-day period before throwing all into the sea.

Two of the women were picked up by a fishing boat after clinging to plastic jugs for three days and nights, but were thrown overboard again the next day because the fishermen feared complications. Another fishing boat then picked them up, and they eventually managed to swim to shore.

"It seems that lately the attacks have become more vicious," one refugee official said. He said the rates of murder, abduction and rape were up.

One possible explanation, the official said, was the termination of a Thai antipiracy program at the end of September. The $2 million program, funded by the United States, ended when it ran out of money after six months and the Thai government rejected a U.S. offer of an additional $600,000 as too little to keep it going.

Now, however, the Thai government is considering a proposal by the office of the U.N. High Commissioner for Refugees to raise $3.6 million for a one-year antipiracy program. Although the Thais originally requested $34 million, U.N. officials said they expected a positive response to the proposal shortly.

Another explanation for the increasingly brutal incidents of piracy is that, despite Thailand's expressed concern about the problem, pirates find some sanction in the government's hardened attitude against boat people.

"One hopes it is not a percolating effect of the tougher government policy," a refugee official said. "But I think it would be better if the government promoted rescues." He noted that an increase in murders by pirates coincided with the harsher policy, under which Thailand said Vietnamese boat people arriving after Aug. 15 would no longer be eligible for resettlement in third countries but would be placed in austere camps.

Another aspect of the policy is that anyone caught bringing "illegal immigrants" to Thai territory faces criminal charges providing for stiff fines and jail sentences. According to Prasong Soonsiri, head of Thailand's National Security Council, harboring such a person in one's home is punishable by 10 years imprisonment.

Under the law, fishing boat captains have been arrested for helping Vietnamese refugees.

U.N. officials argue, however, that the Thai government and fishermen have an obligation to try to rescue Vietnamese boat people in distress under provisions of the international Convention on the High Seas, of which Thailand is a signatory.

"Here we have 28 people dead because Thai courts have seen fit to punish people for acting in accordance with international law," a refugee official said, referring to the incident reported this month.

Prasong said he was not aware of the high seas convention provisions, but that Thailand "can't help" such incidents as the recent drownings "because we have to respect our own laws."

Despite the way pirates may interpret their government's attitude toward Vietnamese boat people, Western diplomats say there is no evidence that the Thai government actively encourages them or regards them as a useful deterrent to refugees. In fact, Thai authorities have dealt firmly with pirates when they are caught.

In one recent case, a sailor in the Thai Navy was sentenced to 25 years in prison for raping a Vietnamese woman. So far this year, about two dozen other Thais have been charged with various offenses related to piracy.

However, some of the worst offenders are believed to go free. They are the ones who kill all the refugees and sink their boats, leaving no witnesses and no evidence.

According to the refugee officials, some of the pirates are Vietnamese or Malaysians, but most are Thais. Often, they are fishermen who attack refugee boats as a sideline.

Although only a small fraction of Thai fishing vessels are involved in piracy, the boats range widely, and some apparently go out of their way to find Vietnamese refugees.

While piracy has long been common in Southeast Asian waters, refugee officials say, the combination of thousands of usually defenseless boat people, long-standing enmity between Thais and Vietnamese and hard times for the fishing industry in the overworked gulf have seriously aggravated an age-old problem.

Despite the frequency and brutality of the pirate incidents, Western diplomats believe they have not significantly deterred Vietnamese from fleeing their homeland. Rather, the attacks have caused some boat people to change course in an effort to avoid Thailand.●

DIDC SHOULD POSTPONE DECEMBER 16 MEETING

HON. CECIL (CEC) HEFTEL

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. HEFTEL. Mr. Speaker, the Depository Institutions Deregulation Committee (DIDC) will be meeting on December 16 to consider at least four new account proposals which would have the effect of further accelerating the deregulation of deposit rate ceilings. I am concerned that an action of this nature will result in further injury to our already distressed thrift industry.

Savings and loans and thrift institutions are suffering record operating losses across the country. This is not surprising in view of the high interest rates and rapid deregulation of deposit ceilings that we have been experiencing for almost 2 years. The DIDC has, to date, effectively eliminated interest rate differentials between banks and thrift institutions. Other new instruments, including those created by the DIDC and those which will be under discussion this Wednesday, will only serve to virtually totally eliminate interest rate ceilings.

Unfortunately, while the DIDC has deregulated the assets of financial institutions by allowing competition for deposits through higher interest rates, it has not deregulated the 30-year low-interest liabilities which thrift institutions have incurred over the years. Until the bulk of these loans mature and provide thrifts the ability to invest in shorter term, higher yielding financial instruments, it is unreasonable to continue to constrain these institutions to compete beyond their means.

By postponing further deregulation of interest ceilings, thrift institutions will be able to gain valuable time as old loans mature and new investments can be made.

I hope my colleagues will join with me in urging DIDC to take into consideration the adverse impact that further deregulation of deposit rate ceilings will impose upon savings and loan and thrift institutions and postpone the December 16 meeting of the DIDC.

Thank you.●

TRIBUTE TO CHIEF JOHN K. TERRY

HON. GEORGE C. WORTLEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. WORTLEY. Mr. Speaker, on January 23, 1981, a long and distinguished career of military service will draw to a close with the retirement of C.M. Sgt. John K. Terry from the 174th Tactical Fighter Wing, Hancock Field, New York Air National Guard.

What makes this retirement so special is that Chief Terry is one of three remaining original members of the Syracuse Guard still in full time service. Not only that, he is the only one with uninterrupted service. Chief Terry was one of the architects of the present day 174th Tactical Fighter Wing. With little outside help, he and a few dedicated others worked over the years to make the 174th a real first class operation composed of nearly 1,000 members who run a front-line weapons system. It is high tribute to Chief Terry that the 174th is recognized as one of the finest Air National Guard units in the country.

During his long career, Chief Terry served as an aircraft mechanic, crew chief, flight chief, and quality control specialist on various aircraft. He was activated in 1961 during the Berlin crisis and then again in 1968 during the *Pueblo* crisis. For the past 4½ years he has served as the supervisor of the 174th Consolidated Aircraft Maintenance Squadron, an important focal point for maintenance activities in developing the expertise to main-

tain today's modern A-10 weapons system.

There is no question of Chief Terry's ability, dedication and patriotism. I join with his many friends in the Syracuse area who wish him well during his retirement and thank him for a job well done.●

JERRY WURF—A CHAMPION OF THE PEOPLE WHOSE IDEALS LIVE ON

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. SOLARZ. Mr. Speaker, T. S. Eliot once wrote:

We fight rather to keep something alive than in the expectation that anything will triumph.

These words suggest to me the philosophy of an old friend of mine, Jerry Wurf, who died last Thursday at the early age of 62.

Jerry Wurf was a fighter—and it did not matter if the battle seemed unwinnable. He had no time for naysayers, defeatists, or those who hid from the fray. He cared passionately about the lot of working men and women in this country; and he used every ounce of energy, every moment that he had, to make our constitutional guarantee of equality a reality for every American—whether Christian or Jew, black or white, Hispanic or Asian. He marched on picket lines for sanitation workers in Memphis, hospital attendants in New York, and municipal workers in Baltimore. He even went to jail for what he believed in.

Throughout his colorful 40-year career in the American labor movement, Jerry Wurf was a doer. Some disputed his tactics, his politics, the vehemence of his language, the toughness of his bargaining; but none disputed his commitment to improving the economic and social condition of workers.

A Brooklynite, Jerry Wurf was born 62 years ago in Brighton Beach which I have the honor to represent. He graduated from New York University; but given the condition of the economy in 1940, he went to work in a cafeteria. He wound up organizing the cafeteria workers, and found his vocation—unionism. In the late 1940's he became the New York representative for the struggling American Federation of State, County, and Municipal Workers. He organized and recruited laborers and hospital workers into this union, and fought for the right to organize public employees. Political education was an important ingredient in his efforts to improve the clout of his union members, and he was a master at explaining the economic and political realities of the day. Under his able and aggressive management, the New York AFSCME operation flourished.

In 1964 Jerry was elected the national president of AFSCME; and he threw himself into the task of straightening out the union's finances, building a strong organizational department, and developing a major campaign to unionize public employees. The hard work paid off. In just 10 years AFSCME's ranks swelled to 700,000 workers in one of the most significant organizing efforts in the history of the American labor movement.

Jerry Wurf was a natural for the activist, progressive spirit of American political life in the sixties and seventies. He was concerned about international as well as local issues. He was an early and vocal opponent of the war in Vietnam. On the domestic scene he kept his union in the forward ranks of those fighting to end hunger, poverty, unemployment, racial injustice, and discrimination at home. A fiery platform orator, he missed no opportunity to call for social, economic, and political reforms that would make our society a truly democratic one. He was a compassionate man, moved by the pain and suffering of others.

Plagued by poor health over the last few years, Jerry refused to reduce his workload or withdraw from his efforts to build his union, improve the lot of his members, and make our society a more decent and caring one. There was always too much for him to do, and never enough hours.

In the 1980's Jerry was quick to label Reaganomics as the politics of selfishness was greed. He worked to expose the real cost of "trickle-down" tax and spending policies—massive unemployment, usurious interest rates, bankruptcy, and even hunger for millions of Americans. Recognizing that the budget cuts were slashing into the very social fabric of our Nation, he took an active role in organizing the massive demonstration on Solidarity Day. Though ill, he took to the podium and called for the concerted efforts of progressives and trade unionists to bring our Nation back to its senses, and to create jobs and opportunities instead of destroying lives and crippling the poor.

Jerry Wurf deeply believed in our Constitution and its mandate that government was to "promote the general welfare" of our people. And to him that also meant ensuring that the working people of this country shared in the wealth that their hands and minds had helped produce. As a leader of public employees, he raged at the thoughts of government proposing to leave the sick uncared for, the children untaught, the elderly penniless, and the young jobless, in the name of balancing the budget.

And now he is dead. A great and compassionate voice that boomed across this land crying out at every injustice is now silenced. but he has left a large and bold imprint on our history.

From humble beginnings he rose to the heights of the American trade union movement. As president of the third largest labor union in the AFL-CIO, he dealt with the great in politics, business, and industry. He used his position and his resources not for self-aggrandizement, but to build an America that was compassionate and just.

The poor and forgotten of this Nation whose voices Jerry make us hear have lost a valuable ally, a mighty champion. I have lost a friend whose support and counsel has meant much to me over the years. Jerry was the kind of man who stood by you in good times and bad—and never hesitated to tell you the truth.

Today I extend my deepest sympathies to his family for the terrible loss they have suffered—to his wife Mildred, to his daughter Susan, to his son Nicholas Sigmund, and to his youngest daughter, Abigail Louise. I also would like to express my sympathies to Jerry's fellow trade unionists who must now continue the fight for justice without his able assistance.

I think these words of Dylan Thomas describe to me how those of us who loved Jerry should continue to build the only legacy he really cared about—a better America:

"Do not go gentle into that good night;
Old age should burn and rave at close of day;
Rage, Rage against the dying of the day."●

FREEDOM FOR POLAND

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. YATRON. Mr. Speaker, it is with the deepest concern and apprehension that I view the most recent events in Poland. Since the courageous workers of that country started their movement for freedom and economic reform in August of 1980, the world has witnessed a repressive Communist regime admit its mistakes, become more open, and make strides toward change. Restraint was exercised by both the Government authorities and Solidarity in an effort to avoid a showdown and ultimately bloodshed.

Now, however, the Polish Government has apparently opted to stop this reform effort and revert to repressive acts, which to date have been scrupulously avoided, but which are so characteristic of a Communist regime. Most distressing is the fact that General Jaruzelski's action has won applause from the Kemlin. It could very well have been pressure from the

Soviet Union which forced the General to act when he did.

What is needed in Poland is not more repression, but more freedom so that all possible alternatives to remedy the tremendous economic difficulties can be discussed. What is needed in Poland is not bloodshed or civil war, but accommodation and compromise which will allow the evolution toward a free society to continue. Finally, what is needed in Poland is not continued pressure and meddling from Moscow, but a clear political environment so that the Polish people can resolve their own crises and problems.●

SAVING THE SAVINGS INSTITUTIONS

HON. DANIEL K. AKAKA

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. AKAKA. Mr. Speaker, tomorrow, December 16, the infamous Depository Institutions Deregulation Committee (DIDC) meets again. For those of my colleagues who have not already done so, I would urge you to send a letter to the DIDC asking that the actions of the committee be suspended until the Congress can complete oversight hearings on the crisis now facing the thrift industry and stability restored to the industry.

Today's Washington Post business section includes an article outlining the problems of the thrift industry in New York and California. The article correctly illustrates the severity of the crisis faced by the savings industry across the Nation.

Many Members of Congress have already voiced concern over the impact of pending DIDC proposals. Yet, it is clear that more of us need to reemphasize the intent of the law that created DIDC. That law, Public Law 96-221, created DIDC to oversee the orderly phaseout of savings interest rate ceilings over a 6-year period. The phaseout is to be accomplished with "due regard for the safety and soundness of depository institutions." To date, DIDC has ignored this phrase in the law.

I urge my colleagues to write to DIDC requesting an immediate halt to its proposed actions until the Congress has time to act and until greater stability is restored to the thrift industry.

I would like to request that the text of the Washington Post article be inserted in the CONGRESSIONAL RECORD at this point.

SAVING THE SAVINGS INSTITUTIONS

(By Nancy L. Ross)

NEW YORK.—A ghoulish game, prompted by the announcement of third-quarter operating losses even greater than record second-quarter losses, was being played last month in private by New York banking regulators and in public by the media. Question: How long would it take mutual savings banks to go broke if present economic trends continue?

Answer: Almost a third of New York City's savings banks would run out of surplus funds in two years or less, a couple within two quarters or less. Though a few strong institutions could withstand that magnitude of losses for 10 years or more, for the city's savings banks as a whole, average life expectancy was about three years. Since the third-quarter figures came out, one of the city's remaining 36 savings banks has been merged out of existence by the government authorities. Two more mergers are imminent.

During the current quarter interest rates have dropped sharply. How much the decline is cutting operating losses remains to be seen. Yet, unless interest rates fall further, and more important, remain at low levels for an extended period, the deadly erosion of the thrift industry will continue, according to New York State Superintendent of Banks Muriel Siebert.

Savings banks and savings and loan associations in her state suffered operating losses of over $1.2 billion during the first nine months of this year. The more numerous savings banks accounted for the major portion, $897 million. Of the 105 New York state-chartered savings banks, 97 were in the red. Third-quarter losses of $372 million were 23 percent more than in the second quarter. Three New York City savings banks were marginally profitable. Net worth of surplus fell to $4.4 billion, 17 percent below the December 1980 level. Withdrawals exceeded deposits by $11.4 billion during the first nine months. At the end of September the banks had total assets of over $65.8 million.

As for New York savings and loan associations (plus a handful of federally chartered savings banks) insured by the Federal Savings and Loan Insurance Corp. (FSLIC), losses for the first three quarters totaled $352.7 million. Net worth was down by 25 percent from December 1980. Savings outflows through September totaled $1.76 billion. Mortgage activity declined by 41 percent during the period to $237 million. At the end of the third quarter they had assets of $26.8 billion.

During the first half of 1981, New York state S&Ls had the second worst return-on-assets ratio of any of the 50 states, Puerto Rico, Guam and the District of Columbia, according to a survey by the Federal Home Loan Bank Board; Puerto Rico had the worst return-on-assets ratio. New York's total loss was $1.45 per $100 of assets, compared with 49 cents for the nation as a whole.

Two major mergers involving the city's thrifts were engineered by state and federal regulators during the disastrous third quarter. West Side Federal Savings and Loan of New York and Washington Savings and Loan of Miami were merged with Citizens Savings and Loan of San Francisco. Between them the New York and Florida S&Ls were losing almost $10 million a month, and their net worth is near zero. Citizens is a subsidiary of the National Steel Corp. of Pittsburgh, which agreed to invest $75 million in the two savings institutions over three years. The FSLIC will provide an estimated $10 million a month in subsidies.

Greenwich Savings Bank, which had losses of $21 million during the third quarter and would have gone broke by next February, was merged with another New York thrift, Metropolitan Savings Bank, at an estimated cost to the Federal Deposit Insurance Crop. of $465 million. At the same time, a separate intrastate-assisted $2.2 billion merger in September involved Franklin Society Federal S&L of New York City and First Federal S&L of Rochester. More recently, Empire State Federal Savings and Loan in White Plains, which had a $4.3 million loss in the first half, was merged into Erie Savings Bank of Buffalo.

Back in the city, Central Savings Bank, which would have exhausted its reserves in six months, was merged with Harlem Savings Bank Dec. 7 at a cost to the FDIC of $160 million. The insurers are still seeking merger partners for New York Bank for Savings and Union Dime Savings Bank.

The West Side Federal and Greenwich mergers made history of a sort. West Side Federal was involved in the first interstate merger since federal regulators changed the rules last spring to aid troubled S&Ls by permitting suitors to come from out of state. Greenwich marked the first time in the annals of New York State banking regulations that a state-chartered mutual savings bank required federal assistance in working out a merger.

But as Siebert said, "If I thought that Greenwich were the first and the last of the supervisory mergers, I would not be here today" at a press conference publicizing the plight of banks.

Why does New York have such a sorry record? Saul B. Klaman, president of the National Association of Mutual Savings Banks, cited the state's unrealistically low usury ceiling of 10¼ percent, which was overridden by federal statute at the end of 1979. Moreover, mortgage loans were made under great political pressure at below-market rates for quite a while, he said.

Other important factors are customer sophistication on interest rates and the resulting cutthroat competition among 35 banks in the city. Seibert remarked: "Many people think the 'thrift problem' is a 'New York City problem.'" Indeed, giveaway campaigns there—ranging from toasters to "bring-a-friend" bonuses to sky-high interest rates on promotional investment plans—give the appearance the Big Apple's banks are either foolish or desperate or both.

Just because New York City is the brashest and the baddest doesn't mean the problem is not serious elsewhere. Take the very different example of California. Nine out of the country's 10 largest savings and loan associations are located in California. Although that state has 195 thrifts, or 5 percent of the institutions nationwide, they command 20 percent of the assets.

Not only are they the biggest with $126.3 billion in assets, California S&Ls are among the best. Collectively, they had a higher return on assets during the first half of 1981 than did 38 other states, the District of Columbia, Puerto Rico and Guam.

But "best" is a relative term in this terrible year for thrifts. According to the Federal Home Loan Bank of San Francisco, California S&Ls lost $232 million in the first half of the year, followed by a third-quarter loss of $261 million. Total operating losses for the year to date: almost half a billion dollars. This contrasts with positive earnings of $152 million in the fourth quarter of 1980.

California's performance during the first half meant an operating loss of 38 cents for every $100 of assets. By the third quarter, California losses soared to an annualized rate of 82 cents per $100. Nationally, it was 84 cents.

More bad news showed up in the net new-savings column. California savers withdrew $995 million more than they deposited during the first quarter. By the second quarter that figure jumped to $2.4 billion and held there for the third quarter as well. Contrast that with a gain of $529 million during the last quarter of 1981.

In the same nine-month period, net worth (assets minus liabilities) declined from $6.8 billion to $6.4 billion. The state's S&Ls had a net-worth-to-deposits ratio of 7.2 percent in September, down from 7.6 percent last December. Yet it was considerably above the national average of 5.9 percent reported at the end of June, and well in excess of the 4 percent required by federal regulators. That is not to say there are no S&Ls in serious trouble in the state; in June the Federal Home Loan bank Board reported 17 mainly small, new S&Ls had ratios under 4 percent.

Sanford C. Bernstein & Co., which tracks major California stock associations, predicts that H.F. Ahmanson, parent company of the largest S&L in the country, Home Savings, will have a loss of $2.55 per share in 1981 compared with a profit of $2.34 the previous year.

The second largest, Great Western, will show a loss of 20 cents per share compared with a profit of $1.74 last year. Great Western's relatively good performance of a $2.4 million profit in the third quarter is due in part to two unusual items: An Internal Revenue Service settlement of $5.5 million and repurchase of $53 million in Great Western mortgage-backed bonds at $40 million. First Charter, which owns American Savings, will have a loss of $1.95 per share versus a gain of $1.32 in 1980.

Glendale Federal, which recently became the country's fourth-largest S&L when it acquired First Federal Savings and Loan Association of Broward County, Fort Lauderdale, Fla., in a supervisory merger, was said by the Federal Home Loan Bank Board to have suffered a loss of $8 million during September. California Federal, the next largest federally chartered S&L, declined to give figures but acknowledged its share of red ink during the third quarter.

Mortgage loan activity declined from $4.3 billion in the fourth quarter of 1980 to $2.5 billion in the third quarter of this year. October activity was off 25 percent from September. Bernstein & Co. reported that the third-quarter flow of mortgage credit in that state approximated only 5 percent of outstanding portfolios at an annual rate. In other words, mortgage activity during the third quarter was running at 15 to 20 percent of its average during the previous decade. "The flow of mortgage credit has essentially been shut off in California," said the firm.

The above figures indicate that the situation in California, unlike New York, did not take a dramatic turn for the worse until the third quarter. Prior to that, the Golden State's S&Ls on the whole had weathered the crisis rather well for a variety of reasons. These include a period of sustained real estate growth longer than anywhere else in the country, no usury statutes, and a greater percentage of mortgage banking activity than in any state except Texas. With a rapid turnover of their portfolios, California S&Ls were not saddled with low-yielding mortgages to the degree their eastern colleagues were.

Moreover, according to William Popejoy, who switched jobs this month from president of Far West Savings and Loan to president of Financial Federation Inc., for a long time S&Ls in his state did not pay out cash dividends, and by keeping their earnings in reserve, built up capital positions that have seen them through this crisis. Financial Federation showed a loss of $9 million during the third quarter compared with a profit of $1.8 million in the same quarter of 1980.

Two other factors also contributed to the success of California thrifts: The ability of state-chartered S&Ls to invest directly in real estate and to make variable rate mortgages (VRMs). Federally chartered S&Ls only gained the power to make variable rate mortgages in 1979, four years after the state thrifts did. (Federally chartered S&Ls cannot yet invest directly in real estate, whereas California recently upped the percentage of portfolio state-licensed S&Ls can invest from 5 to 12 percent.)

How much help variable rate mortgages were to California S&Ls is a subject of debate. Until recently, when the ceiling was lifted, state-licensed S&Ls were allowed to raise the interest rates on VRMs by just one-half percentage point a year, or 2½ percentage points over the life of the loan. In the words of Linda Tsao Yang, California's Savings and Loan Commissioner, "It's a nice nest egg. Every half-point adjustment means $100 million additional a year." Thirty percent of California's mortgages are VRMs.

Yet only half the state-chartered thrifts offered VRMs, countered Popejoy who thinks they were not a major factor. Even James Montgomery, president and chairman of Great Western, which has 60 percent of its portfolio in VRMs, remarked, "The VRM wasn't variable enough to protect us." He meant lenders couldn't raise mortgage payments enough to cover their increased cost of funds.

Also on the minus side was the 1978 Wellencamp court decision prohibiting state-chartered S&Ls from exercising due-on-sale clauses—that is, preventing buyers from assuming existing low-interest mortgages. Mortgages without the clause were difficult to sell in the secondary market. The case has now embroiled federal S&Ls and is headed for the Supreme Court.

Another factor affecting profitability and growth is charter. During much of the past decade, the innovative freedom conferred on California S&Ls by a state license kept the industry there prosperous. Then the California federals exerted pressure on Washington to give them parity with the state S&Ls on things such as variable rate mortgages and real estate equity investments, so the advantage of a state charter was removed. Also state regulators have tried to impose stricter rules on branching within California.

Now, given the lure of interstate branching before them, many large California S&Ls claim state charters hinder growth and are rushing to convert to federal charters. If the big S&Ls change charters, the state's Department of Savings and Loans will have insufficient funds as well as less clout. State commissioner Yang, anxious to preserve the dual charter system, deplores this rush to de facto federalization without Congressional debate on whether it is desirable.

With the decline of interest rates during the fourth quarter, is the Golden State now out of the woods? The same factors that mitigated California S&Ls' losses through the first half of this year make analysts relatively optimistic about next year. Allan G. Bortel of Shearson/American Express in San Francisco projects that the state's S&Ls will break even by March, a couple of months ahead of the rest of the nation, provided Treasury bill rates stay in the 9 to 9½ percent level. He forecasts an industry wide profit of $1 billion to $1.5 billion next year, with California accounting for a quarter of it.●

THE THREAT OF BIOLOGICAL WARFARE

HON. WILLIAM R. RATCHFORD

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. RATCHFORD. Mr. Speaker, there is a frightening prospect growing in Asia. Recent reports are confirming earlier speculation that chemical warfare is being waged in Laos, Kampuchea, and Afghanistan, that a form of warfare which has been banned for over 50 years by international convention is being used to destroy the lives of thousands of people in these countries.

While the evidence is not absolutely conclusive yet, there is substantial documentation to corroborate the stories of refugees from Afghanistan and the nations in Southeast Asia that warring factions are resorting to these pernicious weapons of destruction. State Department officials have produced new evidence which gives credence to these charges, and it is now time to bring these findings to the attention of the rest of the world.

Chemical warfare is an insidious weapon, Mr. Speaker, and its use has been banned by all major nations through their agreement to the Geneva Protocol of 1925. While some nations, including the Soviet Union and the United States, have reserved the right to use chemical weapons as an in-kind retaliation, the charges of their use in Asia clearly cannot be answered because of self-defense. The attacks in these countries have often been launched on civilians or troops who lack any of the fundamental equipment to defend themselves from exposure to these poisons.

The State Department's most recent evidence on this tragic occurrence links the Soviet Union with the so-called yellow rain being dropped on Laos. If the responsibility for yellow rain does indeed fall on the Soviets, Mr. Speaker, then it is time that this issue be brought to the attention of the United Nations and other international deliberative bodies. The facts should be investigated, evaluated, and judged in the eyes of the world.

Chemical warfare is a terrible weapon, for its victims are more likely to be innocent civilians than equipped armed forces. These substances destroy human beings through simple exposure, and they can be dispersed to

cause many casualties in a very simple fashion.

All is not fair in war, Mr. Speaker, and civilized nations have rejected the use of these substances in conflicts through the Geneva Protocol of 1925. Any nation, friend or foe, which violates both international law and basic human rights through the use of chemical warfare should be placed in judgment by the international community and should put an end to this immoral and abhorrent form of warfare.●

ENLISTMENT, UTILIZATION OF MILITARY WOMEN SYMPOSIUM

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mrs. SCHROEDER. Mr. Speaker, in October I sponsored a symposium on a subject I have been concerned about for several years. Please allow me to insert into the RECORD the transcript from that event. It is worth reading.

ENLISTMENT, UTILIZATION OF MILITARY WOMEN SYMPOSIUM

SARAH MCCLENDON. Good morning. We're so pleased to see so many of you here this morning and we want to say how grateful we are to Congresswomen Pat Schroeder for this meeting. I'm Sarah McClendon, an Army veteran and a former member of the Defense Advisory Committee on Women in the Services. Some of us who had been in the service, and knew the problems women faced, wanted to have an informational meeting. We went to see Pat Schroeder. She has been corresponding with Department of Defense officials on this subject as a member of the House Armed Services Committee for months. She had the same questions we had. She agreed to sponsor this meeting, staff it, and put it on.

Mrs. Schroeder, who has been a member of Congress since 1973, is a member of the House Armed Services Committee and believe you me it was hard getting there. At that time Congressman Edward Hebert was chairman of that committee and he didn't care to have women on it. She sits on two very important subcommittees: Readiness, which concerns us today, and Research and Development. She's been active on the House floor in getting the Defense officials to account for and insure against waste and fraud. In addition to serving on the Armed Services Committee, she is also on the House Judiciary Committee and the Post Office and Civil Service Committee. Congresswoman Schroeder.

Representative SCHROEDER. Thank you very much, Sarah. You're really the mother of this idea and one of the moving forces behind it.

Let me explain why this isn't a formal hearing. First, you know what usually happens during a regular committee hearing. They tend to be terribly intimidating. I think these buildings were built to intimidate all of us the minute we walk in. Second, the military, when dealing with the issue of women, either in the military academies, in the service, or in civil service, rather than talk to women come here and talk to men. And third, we really don't ask women what changes could be beneficial to both men and women in the service. That would be perceived by some as "soft" on defense.

We all know the great strides made in recent history bringing women into the Services. All of a sudden, though, we've seen a serious policy change to hold static the total number of enlisted women. We've heard that this policy change was based on field reports citing problems arising from women in non-traditional areas. They claim insufficient housing, ill-fitting uniforms, complicated family schedules, and difficult social adjustments all hamper the ability to mobilize quickly. But we also know of many studies showing that women make excellent soldiers and that they really do add to readiness. So a lot of us are a bit surprised by this sudden change of direction and wonder about the underlying reasons.

The purpose of this symposium, then, is to hear from representatives of each service about how women are being utilized in non-traditional combat support roles, what extraordinary problems women encounter, and what problems the command structure faces in dealing with women in these roles. To hear about utilization policy may help explain enlistment policy and may suggest solutions to those problems.

My biggest fear is for the young women who are in the Armed Forces now and who want to make it their career. I find that their morale is terribly low right now because they're not sure what the future holds—whether there will be something there, or whether that career ladder is going to be pulled away suddenly. They are the reason for this gathering.

We were very fortunate to find as our moderator, Helen Rogan, who has just written an excellent book on this topic and who is probably one of the best authorities on the subject. The book is called Mixed Company: Women in the Modern Army. She is from England and was educated at Cambridge University. She lives in New York and has written for such prestigious publications as Time, New York Times Book Review, Newsday, and the Washington Monthly. In 1980 she won the DeWitt Wallace/Reader's Digest Fellowship. She has done the legwork, shadowing people in and out of the Pentagon and in the field, looking into the topic. We're terribly honored that she has given her time to be here this morning. Helen, thank you.

HELEN ROGAN. We have a very distinguished panel of speakers—one representing each of the services and a member of the Women and Army Policy Review Group, a body whose deliberations will undoubtedly affect the lives of the women and the men in the service. All of these people have first-hand knowledge of the part women play in today's military. In the audience there are retired military personnel, active duty soldiers, and civilian experts, many of whom will have something to say in the discussion that will follow the panel.

Considerations of time make it impossible for me to do more than briefly sketch the careers of our distinguished speakers and I hope they'll understand. There is no subtle preference, by the way, in the order of speakers.

Our first speaker, for the Air Force, is Major General William R. Usher, Director of Personnel Plans, Office of the Deputy Chief of Staff for Manpower and Personnel. He served as a combat pilot in Viet Nam, worked as a plans and training officer and now has special responsibility for combat readiness. General Usher.

GENERAL USHER. Congresswoman Schroeder, Ms. Rogan, I appreciate the opportunity to present a brief resume of the role of women in the Air Force today and what it looks like for the future.

Since 1972 the Air Force has experienced a 500 percent increase in the representation of women. In 1972, 2.3 percent of our force were women. Today about 11.2 percent are women. The Air Force has the highest representation level of any of the armed forces in the world. We've accessed over 100,000 women since the start of the All Volunteer Force and we've led the way in setting equal standards for males and females coming into the service. Our job entry criteria for men and women are equal and, as a consequence, the quality of our accessions is basically the same.

We've made great strides in the utilization of women in the Air Force. Women are now assigned to all officer career fields and all of the enlisted fields except those directly related to combat. Those include the security specialist involved in base defense, a combat para-rescue individual who picks up downed pilots behind enemy lines, aerial gunners on B-52s, and something we call a tactical air command and control specialist, an infantry position at the forward edge of the battle area.

We have, except for these combat and a small number of facility restrictions, the same utilization policy across the Air Force. That's evidenced by the fact that about 30 percent of women are involved in non-traditional skills. Out of the 63,000 women we have in the Air Force today, we have 22 pilots, 57 navigators, 93 pilots in training, and 7 navigators in training. We plan continued production in these skills in the future.

Our experience has been that women have performed very well. The duty performance and promotion rates, for example, are equivalent between male and females. They have a higher first term reenlistment rate compared to men. However, we find that the second term reenlistment rate begins to fall off. There isn't the same degree of interest in pursuing a full career as among males. Of course the Air Force has always had very high reenlistment rates overall so the significance of that may not be all that great.

Women have had generally lower disciplinary rates. Again, the Air Force is blessed with having low court martial Article 15 and administrative punishment levels throughout the force. To the extent there is a distinction, the female disciplinary rates are lower than males. We attribute this success in assimilating females into the mainstream in the Air Force to a number of initiatives we've taken over the years. First, we spend a great deal of time telling prospective accessions exactly what the Air Force is all about. We do this for males and females to make sure they understand very clearly what they're getting into. So, for instance, females and males entering the aircraft maintenance field, a very demanding one, must view a film so that they understand the rigors of that particular field. We also have a mandatory film that all prospective accessions, male and female, must view with respect to basic military training.

We also place a great deal of emphasis, during basic training, technical training, and in first unit assignment, on human relations and sex education. Womens' concerns are addressed at all levels in the chain of command and at all levels of our professional military education. We have a joint spouse assignment policy that's worked very

well for us. We've had about a 94 percent approval rate. We are not able to honor it 100 percent of the time, mission requirements come first, but we've been pretty good in doing most of it.

Let me just mention briefly some of the problems that have been raised by field commanders, some just a consequence of the demographics of the force. I didn't just idly mention the growth of women in the Air Force since 1972. I think it's something we all need to understand. 48,000 out of the 53,000 enlisted women in the Air Force are below the rank of E4. I pointed out earlier that they're getting promoted at the same rate, but they haven't had time to yet. It's a very young force, concentrated at the base level rather than upper echelons of command. Promotions will come as that force matures. Unfortunately, they have more than their proportional share of problems associated with a very young group of people, inexperienced in life in general and military life in particular.

We also have to deal with the fact that we have a very highly technical service that's growing more so every day. The propensity of females to join the military service is considerably less than males anyway. It isn't very high for males either, unfortunately. But the propensity for women to enter these technical areas is even lower. We have specific requirements for each job in the Air Force that demand certain prerequisites and certain aptitudes on tests. We find that a rather low number of females, due to cultural factors and other considerations, can meet these requirements to qualify for a large majority of our technical jobs. So that limits the numbers we are going to take in.

Another point worth mentioning, particularly in what Sarah McClendon brought up, is that the accession for males and females is going to vary indirectly with our ability to retain people. It's important to retain the people you train. If you see accession numbers decline for both men and women, you need to look at our retention rate. It may be improving. So I think that's worth looking at.

Overall, the Air Force is very satisfied with the performance of women. We're continuing to increase their numbers in both the officers and enlisted force. They're performing well and we expect them to continue to do so in the future.

HELEN ROGAN. Thank you very much. The next speaker is Navy Rear Admiral James Hogg who is the Director of Military Personnel Policy Division in the Office of the Chief of Naval Operations (OPNAV). Throughout his twenty five year career he has served in positions related to planning and readiness, as well as serving at sea, most recently as commander of Destroyer Squadron Seven.

ADMIRAL HOGG. Thank you Helen, Mrs. Schroeder, ladies and gentlemen. It's a pleasure to be here today.

I'll follow General Usher's plan to outline where the Women and Navy Program has been, where it is today and where it it headed. I don't consider it to be a separate program, though. Women in the Navy serve beside men and I don't like to think of assignments for men and for women. We have assignments for sailors and officers. Our women serve with the men with the exception of combat restrictions.

Since 1972 we have been increasing the number of women and diversifying their utilization. In fact, as we increase the number of women, it's essential that we diversify their utilization. I'll explain that in more detail in a few minutes.

With respect to officers, we have increased our number from 3,000 in 1972, 4 percent of the officer corps, to 5,300 this year, 8 percent of the corps. We expect to have by 1985, 6,400 which will represent 9 percent of the officer corps. We feel we'll have no problem reaching those numbers and we're confident the women will be fully integrated with our men in their roles and assignments. About half those women officers will be in the healing arts staff corps. About 40 percent will be in the unrestricted line which will include warfare specialties of aviation, surface and submarine warfare. And about 10 percent will be in the restricted line and other staff corps.

The retention of women officers has historically been the same as men. This year we had a significant improvement for retention of women officers over that of the men. I don't see that as significant data but it's certainly an encouraging trend.

The number of enlisted women has increased as well. In 1972 we had approximately 6,000 enlisted women in the Navy, about 1 percent of our total force. We're ending this year with 34,300, 7 percent of the force which, by the way, is 700 more than we had programmed for this year because of improved retention and decrease in attrition. We're planning to have 45,000 enlisted women in the Navy by 1985 which will represent 8 percent of the force. We feel that goal is attainable. It represents about 10,000 new women coming into the Navy each year. We've had that accession rate planned since 1980 and that will continue through 1985. It's attainable if we continue our present recruitment capability, if our attrition performance continues, and if our retention performance continues, especially in the non-traditional areas. We currently have about 23 percent of our women in non-traditional roles. By that I mean such functions as engineering, ordnance electronics and construction. We must increase that to about 31 percent between now and 1985 if we are to achieve the 45,000.

Now 45,000 is a significant number because beyond it we would impact severely on the ship-to-shore rotation for men and we would end up billeting an excess of women ashore without adequate upward mobilization. That wouldn't benefit the Navy and it certainly wouldn't benefit the women.

Our ability to recruit women into the non-traditional areas and to retain them in those non-traditional areas will be key to our ability to expand the force to 45,000. Thus far we have recruited women into the non-traditional areas without problems. Our retention of women in those areas is about the same as for women in traditional areas. Additionally, job migration out of those non-traditional areas is not a problem. I mentioned earlier that attrition is down this year as compared to last year for enlisted women and retention is slightly up.

The number of enlisted women has increased as well. In 1972 we had approximately 6,000 enlisted women in the Navy, about 1 percent of our total force. We're ending this year with 34,300, 7 percent of the force which, by the way, is 700 more than we had programmed for this year because of improved retention and decrease in attrition. We're planning to have 45,000 enlisted women in the Navy by 1985 which will represent 8 percent of the force. We feel that goal is attainable. It represents about 10,000 new women coming into the Navy each year. We've had that accession rate planned since 1980 and that will continue through 1985. It's attainable if we continue our present recruitment capability, if our attrition performance continues, and if our retention performance continues, especially in the non-traditional areas. We currently have about 23 percent of our women in non-traditional roles. By that I mean such functions as engineering, ordnance electronics and construction. We must increase that to about 31 percent between now and 1985 if we are to achieve the 45,000.

Now 45,000 is a significant number because beyond it we would impact severely on the ship-to-shore rotation for men and we would end up billeting an excess of women ashore without adequate upward mobilization. That wouldn't benefit the Navy and it certainly wouldn't benefit the women.

Our ability to recruit women into the non-traditional areas and to retain them in those non-traditional areas will be key to our ability to expand the force to 45,000. Thus far we have recruited women into the non-traditional areas without problems. Our retention of women in those areas is about the same as for women in traditional areas. Additionally, job migration out of those non-traditional areas is not a problem. I mentioned earlier that attrition is down this year as compared to last year for enlisted women and retention is slightly up.

Now I'd like to go into a program that many of you have heard about—the Women in Ships Program. That's a classic area where we can expand the utilization of women in the non-traditional areas. We first assigned women to our ships in 1978. As of last month we had 145 women officers on 29 ships and we have 1,500 enlisted women on 17 of those same ships. The current plan is to have 190 officers on some 30 ships and 5,000 enlisted women on those same ships by 1985.

This program is progressing well. The women at sea are performing their tasks as well as men. Their professional performance has been generally equal to and in many cases better than the men and their advancement rate has been comparable to that of the men. This year we expanded the program by about 200 women because we had command officers say they can utilize more women and they would like more enlisted women than men because of their performance.

In summary, I can say based on first hand experience and the reports we get throughout the Navy that women are doing well and we certainly expect them to continue to do so. I also fully expect to continue increasing the number of women and diversifying their utilization up to the 45,000 level I discussed earlier. Thank you.●

THE U.S. VIRGIN ISLANDS AND THE CARIBBEAN BASIN INITIATIVE

HON. RON de LUGO

OF THE VIRGIN ISLANDS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. DE LUGO. Mr. Speaker, last week I sent a letter to the President registering strong concern over his developing Caribbean Basin initiative and urging his administration to recognize two basic principles before that new policy is finalized. The first principle is that the U.S. territories in the

Caribbean must be actively consulted in the formulation of the new policy; the second that the new Caribbean policy must be consistent with territorial policy and must not eliminate or further erode the economic advantages that the Congress of the United States has so carefully developed for the territories.

That letter was cosigned by, among others, 10 committee and subcommittee chairman and by some of the highest ranking Republican Members of this Congress who share my concern about the future economic well-being of the Virgin Islands. I would like to express my gratitude to those Members and to insert in the RECORD the full text of that letter and the names of all cosigners.

Additionally Mr. Speaker, I would like to insert in the RECORD the text of an editorial that appeared in the St. Croix Avis in which the editor of that newspaper, Mr. Fred Clarke, very eloquently and succinctly points out the very same concerns.

The question Mr. Clark poses at the conclusion of his editorial is most appropriate: "Are we part of the United States, or are we just considered part-Americans?" Mr. Clarke has underscored the essence of the concerns put forth in my letter to the President, and the question he poses is central to any equitable and reasonable resolution of those concerns.

CONGRESS OF THE UNITED STATES,

HOUSE OF REPRESENTATIVES,
Washington, D.C., December 8, 1981.

HON. RONALD W. REAGAN,
President of the United States,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: We are writing to bring to your attention our concerns for the political and economic future well-being of the United States territories in the Caribbean—the U.S. Virgin Islands and Puerto Rico—which will be directly impacted by the Caribbean Basin Initiative.

We would ask that clear recognition be given to two basic principles in the development of the Caribbean Basin Initiative. First, that the territory of the U.S. Virgin Islands should play an active role in the policy development, and secondly, that new Caribbean policy be consistent with territorial policy.

Over the past twenty-five years, the Congress of the United States has carefully developed a territorial policy based mainly on trade and tax incentives in order to secure economic and political stability and to enable the U.S. Virgin Islands to achieve an increasing degree of self-reliance. The delicate balance inherent in that policy has been eroded over the past several years by the extension of escalating trade and tariff concessions to emerging nations with no concomitant re-evaluation of the concessions previously singular to the U.S. Virgin Islands. The effect in this erosion of territorial policy can be clearly seen in the critical condition of the territory's infrastructure, public services and investment climate.

The extension of unilateral advantages to the island countries in the Caribbean or the unwitting sharing of advantages currently enjoyed only by the Virgin Islands can lead to the decimiation of the Virgin Islands' economic and social position in the region. The destructive effect of such a policy will be not only limited to the Territory, but it may well be Caribbean-wide, for the Virgin Islands and Puerto Rico remain the American flag-ships of the entire region.

Mr. President, we believe the counter productive results of such a policy will be avoided by faithful adherence to the principle of full consultation with territorial government officials and Congressional representatives as the Caribbean Basin Initiative is being developed. Second, continued economic growth and prosperity in the Virgin Islands can only be achieved by commitments to the principle that the overall competitive position of the Virgin Islands will be preserved as a fundamental part of any Caribbean Initiative which your Administration might submit to the Congress.

We are ready to work with you and your Administration to build a successful Caribbean policy which does not threaten U.S. interests in our off-shore areas, and indeed strengthens them.

Respectfully yours,

RON DE LUGO,
MORRIS K. UDALL,
Chairman, Committee on Interior and Insular Affairs,
JAMES R. JONES,
Chairman, Committee on Budget,
MICHAEL D BARNES,
Chairman, Subcommittee on Inter-American Affairs,
JONATHAN B. BINGHAM,
Chairman, Subcommittee on International Economic Policy and Trade,
JOHN F. SEIBERLING,
Chairman Subcommittee on Public Lands and National Parks,
KENT HANCE,
FORTNEY H. (PETE) STARK,
Chairman, Subcommittee on Select Revenues,
DON H. CLAUSEN,

[From the St. Croix Avis, Dec. 8, 1981]

ALL OR PART?

Some months ago, in these columns, we asked, "Are we or are we not"? We were curious as to whether we were part of the United States of America.

Today, we raise the question once again. Are the U.S. Virgin Islands really a part of the United States of America, are we actually a member of the family, or are we only urchins, beggars if you will, who were invited into the neighborhood so long as we would be satisfied with the handouts, the scraps, the left-overs.

Possibly, we have ourselves to blame for this feeling in the United States that we are not, nor should be, recognized as real citizens, real neighbors. Maybe, because of the constant attitude of begging for more and a resistance to any proposals or programs designed to help ourselves, has inured the rest of the United States towards our needs.

The question again becomes prominent, and pressing, with the recent statements to the effect that some of the benefits and blessings we have been given shall shortly be diluted. Be shared, really, with other areas not, and never have been, even considered part of the United States.

The economy of the Virgin Islands has been dependent upon special tax and trade advantages over other areas of the Caribbean. These advantages have allowed the Virgin Islands to compete against these other areas for industrial development, tourism growth, commercial expansion,

The tax and trade advantages have, to a degree, offset the lower land and labor costs, the increasing local tax incentives offered by other Caribbean nations. And while the economy in the United States was healthy, we, in the Virgin Islands, were able to flourish with the help of these allowances, these hand-outs, from the United States.

Now, however, it seems the allowances, the advantages we have needed to compete, and which have allowed us to grow economically, may be taken away. Our free port status will be eroded, our tax and trade vantages will be weakened, our special allowances will be given to others.

Yet, we shall still be required, as a part of the United States, to obey the laws of the United States. The labor costs shall still be higher due to the requirement we abide by minimum wage rates established in the United States. The immigration laws, the Constitutional demand that all rights of that Constitution be accorded immigrants, such as free health, housing education, and others, as prescribed by the United States, shall continue to be law in the Virgin Islands.

This gives rise, as we see it, to the same question—"Are we part of the United States, or are we considered just part-Americans?"●

ANDREI SAKHAROV AND THE PLIGHT OF SOVIET JEWRY

HON. RICHARD L. OTTINGER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. OTTINGER. Mr. Speaker, the hunger strike of Dr. Andrei D. Sakharov and his wife has underscored the ongoing human rights atrocities inflicted on thousands of Jews in the Soviet Union. While Dr. Sakharov has recently won an important battle against the Soviet Government, Moscow will surely continue its full-scale anti-Semitic assault.

The latest available figures show that the Soviet Jewish emigration rate is at its lowest point since the start of the contemporary Soviet Jewry movement approximately a decade ago. Moscow has reduced the number of Jews allowed to emigrate from a high of 4,476 in October 1979 to 368 in October 1981.

Meanwhile, the official anti-Semitic policies of the Soviet Government continue to be used to shackle its Jewish citizens. The press disseminates anti-Semitic propaganda, Hebrew teachers are exiled, Jewish education programs are banned, and books and religious articles are confiscated. More arrests of Soviet Jews have taken place in the past 4 months than in the last 4 years.

In the face of these sweeping violations of human rights, it is vital that our Government recognize its moral responsibility to pressure the U.S.S.R. to respect the fundamental rights of Soviet Jews and allow for their free emigration. I have recently cosponsored two House resolutions which I am including in today's RECORD, expressing the sense of Congress on this important matter.

House Concurrent Resolution 219 introduced by the gentleman from New Jersey, Mr. SMITH, calls upon the U.S.S.R. to end the current policies restricting Jewish emigration. The measure also expresses the sense of Congress that official Soviet anti-Semitism is morally reprehensible.

House Joint Resolution 373, introduced by my good friend from Colorado, Mrs. SCHROEDER, expresses the sense of Congress that the Soviet Union should respect the rights of its citizens to practice their religion and to emigrate, and that these matters should be among the issues raised at the 38th meeting of the United Nations Commission on Human Rights at Geneva in February 1982.

Congress must provide a strong signal to the Soviet Union that we simply will not silently accept their terrible human rights abuses. We must maintain an unwaivering commitment to improving the plight of Soviet Jews by pressuring the Soviets at every possible level of contact to improve the human rights climate within its borders. Perhaps our continued pressure will one day lead to a time when people like Dr. Andrei Sakharov do not have to jeopardize their lives for the cause of emigration and human rights in the Soviet Union.

Mr. Speaker, I commend both House Concurrent Resolution 219 and House Joint Resolution 373 to the attention of my colleagues:

H. CON. RES. 219

Concurrent resolution calling upon the Union of Soviet Socialist Republics to end the current policies of Jewish emigration discrimination and anti-Semitism and expressing the sense of the Congress that the dramatic decline of Jewish emigration from the Union of Soviet Socialist Republics is morally reprehensible

Whereas the Government of the Union of Soviet Socialist Republics has decreased Jewish emigration significantly and nearly completely, and continues to maintain this form of discrimination based upon religion;

Whereas, under the current policy, the Government of the Union of Soviet Socialist Republics has reduced the number of Jews allowed to emigrate from a high of four thousand seven hundred and forty-six in October 1979, to the present figure of three hundred and sixty-eight in October 1981, the lowest amount since emigration began;

Whereas two hundred and sixty thousand Jews have been allowed to emigrate in the last twelve years, over one-half million Jews have filed for emigration in the same time period;

Whereas the Government of the Union of Soviet Socialist Republics is implementing a policy of exiling Hebrew teachers, banning Jewish education programs, and confiscating books, as well as sacred and religious articles;

Whereas the press of the Union of Soviet Socialist Republics is implementing a policy of disseminating anti-Semitic propaganda to the peoples of the Union of Soviet Socialist Republics which is designed to hinder Jewish heritage and terminate traditional religious practices;

Whereas within the past four months, more arrests of Soviet Jews have taken place than in the last four years, underscoring the policy of increasing discrimination, as well as the declining emigration figures, in the Union of Soviet Socialist Republics: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that the policies of Jewish emigration discrimination and anti-Semitism are morally reprehensible, and that the President, at every opportunity and in the strongest terms, should express to the Government of the Union of Soviet Socialist Republics the opposition of the United States to these reprehensible policies, and that the restrictions on the emigration of Soviet Jews be removed.

H.J. RES. 373

Joint resolution expressing the sense of Congress that the Government of the Soviet Union should respect the rights of its citizens to practice their religion, and to emigrate, and that these matters should be among the issues raised at the 38th meeting of the United Nations Commission on Human Rights at Geneva in February 1982

Whereas the Soviet authorities have mounted a triple assault on its Jewish community.

a. Exit permits have dropped to less than 100 families per month and are still declining, with the result that the emigration rate is 10 percent of that for 1979.

b. Ceaseless harassments, arrests, and trials have become an almost daily occurence, and

c. Unparalleled assaults on Jewish self-study groups occur in the major urban areas; and

Whereas such harassment, and obstacles to free movement violate the obligations of the Soviet Union to respect the rights of freedom of thought, conscience, expression, religion, and emigration, as provided for in the Universal Declaration of Human Rights, the International Covenant on Civil and Political Rights, and the Final Act of the Conference on Security and Cooperation in Europe at Helsinki, and the Constitution of the Union of Soviet Socialist Republics: Now therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That it is the sense of Congress that—

(1) the President of the United States should instruct the United States delegation to the United Nations Commission on Human Rights meeting in Geneva in February 1982, to carry to the Commission the message that the Soviet Union should respect the rights of its citizens to practice their religion and to emigrate, should stop its harassments, arrests, and trials of the members of its Jewish community, and should stop its assaults on Jewish self-study groups;

(2) the Government of the Soviet Union should comply with its obligations under the Universal Declaration of Human Rights, the International Covenant on Civil and Political Rights, the Final Act of the Conference on Security and Cooperation in Europe at Helsinki, and the Constitution of the Union of Soviet Socialist Republics, by ceasing the indiscriminate arrests and trials of Jewish activist, by ending the assaults on Jewish self-study groups, and by opening its doors to those who wish to emigrate;

(3) the President of the United States should express to the Government of the Soviet Union the strong and continuing opposition of the United States to such harassment of its citizenry, and the obstacles they present to those who wish to emigrate; and

(4) the President of the United States should reiterate to the Government of the Soviet Union that the United States, in evaluating its relations with other nations, will consider the extent to which such other nations honor their commitments under international law particularly any such commitments concerning human rights.

SEC. 2. The President shall transmit copies of this resolution to the Ambassador of the Soviet Union to the United States and to the Chairman of the Presidium of the Supreme Soviet.

EXTRADITION REFORM

HON. WILLIAM J. HUGHES

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. HUGHES. Mr. Speaker, today I am introducing a bill to reform the laws of the United States with respect to extradition. Current extradition laws have been on the books for well over a century and have never been reviewed in a comprehensive fashion. According to both the Departments of Justice and State and leading practitioners and academics, these provisions are not adequate in dealing with international crime control. The bill I am offering for introduction is designed to facilitate reform in this area. The Subcommittee on Crime, which I chair, will hold a hearing on this bill in the near future.

Increased ease and frequency of intercontinental travel has created international law problems that were unforeseen by the Congress of the 19th century. In recent years there has been a dramatic increase in the number of extradition requests made by foreign countries for terrorists and for persons involved in drug trafficking. Improved international cooperation in prosecuting these types of offenses will very likely produce an even greater level of extradition demands in the future. The current procedures carry forward the anomalies of a bygone era. The inconveniences caused by these statutory deficiencies are relatively minor now, but are likely to cause major problems in the future.

In addition, the United States has undertaken negotiations and executed new extradition treaties that cannot be fully implemented under present law. The modernization of extradition procedures would be an important step forward in implementing these international obligations.

This bill has been developed with the assistance of the Departments of Justice and State. Many of the ideas for reform in this area have come directly from their suggestions. Among the suggestions made by the administration that have been incorporated are the following:

First, require that the Attorney General act as complainant in extradition matters. Under current law a foreign government—or someone claiming to be acting on behalf of such government—can initiate an extradition proceeding. The suggested change is recognized practice in virtually every other country. The proposed change will also avoid foreign policy problems that arise under current law.

Second, permit an arrest warrant to be issued when the location of the fugitive is not known. This procedure will facilitate the efforts of law enforcement in locating persons sought for extradition, including suspected terrorists.

Third, permit the commencement of extradition proceedings upon the issuance of a summons. This procedure is appropriate when the fugitive's location is known and the risk of flight is small. This procedural device will also save money.

Fourth, set standards for the release of a person sought for extradition. Under current law there is no explicit treatment of the question of when and whether to release a person sought for criminal activity by a foreign government. The absence of statutory criteria for use by the courts has produced some inappropriate results. The proposed release criteria takes into account the dangerousness of the accused person, ties to the community, seriousness of the offense, and the need to honor our solemn treaty obligations.

Fifth, permits fugitives to be temporarily extradited to the United States for trial and sentencing. This change will assist law enforcement by allowing timely disposition of violations of American law. Under current law we would have to wait until any foreign sentence was served.

Sixth, establishes the right to counsel of accused persons and authorizes the appointment of counsel for indigents.

Seventh, clarifies the requirements of double criminality. International law and our extradition treaties require that the offense that is the subject of the proceeding be an offense in both the requesting State and the United States. The bill clarifies current law by providing that the alleged offenses must be an offense similar to a crime against: A majority of the States or the United States; the United States; or against the laws of the State in which the suspect is found.

Eighth, permits either party to appeal the decisions of the district court. Under current law neither side may appeal. As a practical matter, however, the defendant can obtain review through habeas corpus proceedings, and the Government by commencing a new proceeding. Direct appellate review will be more efficient.

Ninth, clarifies or codifies current extradition practices and sets forth clear procedures for use by the courts and the Attorney General.

There is one area where the bill differs from the previous recommendations of the Departments of Justice and State; treatment of the political offense exception and the application of defenses to extradition. Under current law virtually all of our extradition treaties provide that the United States does not have an obligation to return an alleged offender who has committed a political offense. The Federal district courts generally make this determination under current law. The administration wants to change this practice to vest these determinations in the discretion of the Secretary of State.

The bill I am introducing leaves the authority for making decisions about political offenses with the independent judicial branch. While there are legitimate concerns about the possible adverse consequences of the current practice on the political offense question, I believe they are adequately addressed in the bill. The bill sets forth for the first time in Federal law clear statutory criteria for the courts to use in determining a safeguard against possible abuse by guaranteeing the Government the right to appeal. These two changes should resolve most of the objections the affected agencies have to current law. If the witnesses at our forthcoming hearings offer persuasive reasons for modifying the current law, then such a change in the bill will be made. I am confident that any bill that emerges will fashion an appropriate balance between the rights of the accused and the foreign policy needs of our Government.

I extend an invitation to interested parties to comment on this bill. Comments or requests to testify should be made to the Subcommittee on Crime, 207 Cannon House Office Building, Washington, D.C. 20515 or telephone: 202/225-1695.●

SCHOOL LUNCH PROGRAM CUTS

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. HUBBARD. Mr. Speaker, Glinda Jeffrey, food service director with the Murray Public Schools in Murray, Ky., recently shared with me a letter that she wrote to Ms. Cynthia Ford, the technical assistance branch chief of the Nutrition and Technical Services Division of the U.S. Department of Agriculture. In her letter, Mrs. Jeffrey makes a good case in stating that school lunch and breakfast programs have absorbed all the budget cuts that they can tolerate. I believe Mrs. Jeffrey's letter is one which should be shared with my colleagues and I wish to do so at this time. The letter follows:

DEAR MS. FORD: I have pondered until the "eleventh hour" as to whether to write my feelings once again. I have kept my Congressmen busy lately with correspondence concerning the cuts in the school lunch and breakfast programs but thought perhaps I should try to express my feelings to someone else also.

As a school Food Service Director and as a parent I definitely feel that steps should be taken to prevent our Congress and our President from turning our school food serv-

ice programs into welfare programs. We, in our School District, have worked extremely hard to prevent students from identifying those other students who are on free/reduced price meals. We have about a 20 percent participation in that category and we have taken every precaution to prevent identification of these students. If we allow our funds to be taken from the paying child, we are right back where we were when I was in school—everyone knowing those children who cannot pay for their meals. As a parent I know I would not want my child to be identified and pointed out as a "free luncher". I can imagine the frustrations and embarrassments that he would suffer. As a former teacher, I have discussed these issues with my students. Most students feel the same way—they want the security of not being identified as part of a low income family.

I am also alarmed about the cuts in the amount of food that can be served—minimum-wise. There are many of us who will continue to serve as much as we can as long as we can, however, there are some who are waiting for such cuts in order to "survive". Whatever it takes to keep a program "surviving" should be provided without cutting the nutritional quality of these meals.

The past two years we have been fortunate to receive funds for nutrition grants through the NET program. It seems to me that we are now retracting everything that we have tried to teach all of our students during those two years. Was this a short-lived program—was its message not important? How can we turn our backs so soon on a program that we pushed so hard and proclaimed as most important only for a period of two short years.

I have been further disturbed by news yesterday and today that my hometown has been fortunate enough to receive funds to build a new Chamber of Commerce building and do extensive renovation to our community airport. Sure, these are important programs—however, can we not live without them? Can we live without nourishment to our bodies? We are fortunate not to have the deprived communities in our County as many across our Country have. Yet, I cannot be selfish enough to plead our cause alone—it must be for all our students nationwide.

Let's see what can be done for our students. I feel that we can salvage the school lunch and breakfast programs if we work hard enough. We have taken a commodity cut for both programs and have been completely wiped out as far as breakfast goes. We have withstood a cut in finances all across the board. We saw our special milk program be taken from us—hurting the needy. Personally, I feel that we have taken just about all the cuts that we can and still remain intact as the program that we know now.

It would be interesting to know just how many of the people who are casting votes to eliminate any more of our program really know first-hand poverty. How many of them "have been there" and suffered as a child . . . without proper nourishment.

I said in the very beginning last year when we started feeling the squeeze that our Country had wasted much . . . that cuts were inevitable and that I was willing to take our share in the food service area. I now feel that that share has been absorbed. Let's take a close look at some other programs that could be treated equally as hard as ours. For example, let's look at monies laid aside for new or renovated airports and chamber buildings. Where are our priorities—where does our future lie? Is it in airports and office buildings that we are putting ourselves? I ask you—should it not be in our youth and in their health. Let's give some serious thought to this important matter and then get on with the task of looking at other programs and letting the school food program continue to keep its head above water with what little is left of it.

Thank you for every assistance you can give the National School Lunch Program. Another thank you from all the students in our schools who eat daily, from teachers who diligently teach nutrition in all classes, and from parents, who most of all recognize the importance of it both for their children's health and financially.

Sincerely,

GLINDA JEFFREY,
Food Service Director.●

BRL TO OPEN PLANT IN FREDERICK, MD.

HON. BEVERLY B. BYRON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mrs. BYRON. Mr. Speaker, most of the economic news during recent weeks has been unfavorable and there is a great deal of concern about the need for economic development, business investment, and employment growth. I would like to take this opportunity to share with my colleagues some encouraging economic news—the impressive record of growth of Bethesda Research Laboratories, Inc., which has announced plans to open a new plant in Frederick, Md.

BRL is a leader in the biotechnology industry. It started in 1976 with only three employees. Just 5-years later, it now has a staff of over 350 and has a record of doubling its sales volume every year. The estimated value of the firm is now approximately $200 million.

The firm is currently located in Gaithersburg, Md., and its recent decision to build a new facility in Frederick will make a major contribution to the employment, revenues, and reputation of Frederick. The new facility will serve as the headquarters for BRL's worldwide operation and is expected to be completed by the mid-1980's. It is located on a gently rolling 21.4-acre site in the 100-acre Frederick Research Park.

I would like to congratulate BRL on its first 5 years of remarkable growth and would also like to welcome the firm to the Frederick community.●

THE 1945 ELECTIONS AND MONSIGNOR BELA VARGA

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. DORNAN of California. Mr. Speaker, Dr. Michael Szaz, executive vice president of the National Confederation of American Ethnic Groups, has written an excellent essay on the 1945 Hungarian elections and Monsignor Vela Varga. It deserves to be read by all who want to know of the Hungarian people and their struggle to be free. I would like at this time to insert it into the CONGRESSIONAL RECORD.

THE 1945 HUNGARIAN ELECTIONS AND MONSIGNOR BELA VARGA

We commemorate the valiant Hungarian people who in 1945 provided the only example of a free election under Soviet military presence in the world. The freeness of the 1946 elections in Czechoslovakia is also recognized, but its results were a less crushing defeat to the Communists than those in Hungary. In no other instances were democratic elections held behind the Iron Curtain.

Of course, the results of these elections were overthrown by Communist coups in 1947 in Hungary and in 1948 in Czechoslovakia, but the Hungarian elections were a historic milestone. In the November 4, 1945 elections the Communist Party polled only 17 percent while the major anti-Communist party a conglomerate of liberals, Catholics, national conservatives and agrarians, polled 57 percent. In any democratic country, the Smallholders would have formed the government alone but in postwar Hungary, the Soviet chairman of the Allied Control Commission, Marshal Voroshilov, forced the Smallholders to form a coalition government with the Communists, Social Democrats and the Peasant Party, with the Social Democrats in an electoral alliance with the Communists. The result was the forced disintegration of the Smallhodlers Party and the coup of May 30, 1947.

The ultimate failure of the democratic elections in Hungary does not lessen its unique importance. It displayed the determination of the Hungarian people, despite threats and economic bribery by the Communist Party, to reject the same in favor of Western democratic principles in a country where the Golden Bull (1222) followed upon the British Magna Carta) only seven years later.

The Hungarian freedomfighters of 1956 only continued this historic attitude of the people and the passive resistance which finally forced the Communists to ease their repression and restore some economic flexibility would have been impossible without the resolute resistance first expressed in the 1945 elections.

Simultaneously, we must remember the courageous political leaders of the Smallholders Party who fought against the Communist infiltration and takeover and had to flee or suffer prison for their activities as Western democrats. Many of them have died already some after years in NKVD and Hungarian Communist prisons like Secretary General Béla Kovacs and President Zoltan Tildy. We have, however, with us, one of the outstanding heroes of the 1945

elections in New York, Monsignor Bela Varga who both as the chairman of the Budapest division of the party and as its national vice chairman was instrumental in persuading his party to reject an electoral alliance with the Communists and to attain a 50.1 percent victory in "red" Budapest and 57 percent victory in Hungary as a whole. Monsignor Varga, a relentless fighter against oppression and persecution against the Nazis remained a steadfast fighter against communism even in his exile as chairman of the Hungarian Committee and continues his commitment even in his advanced years. We salute him and the gallant Hungarian nation in their fight to restore Hungarian national independence and individual freedoms.●

U.S. SERVICEMEN ACT OF LOVE

HON. C. W. BILL YOUNG

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. YOUNG of Florida. Mr. Speaker, as Christmas, the season of love and giving, nears, I would like to tell you about a special gift a group of our servicemen in the Mediterranean gave a small orphanage in Greece.

When the marines of the 32d Amphibious Unit aboard the U.S.S. *Saipan*, on their way to the Rapid Deployment training exercises in Oman, made a port call last month in Athens, they did not spend their liberty in the usual manner. Instead of touring the beautiful city, this group of marines left the ship early each morning, and boarded a bus that would take them to a hilly area east of Athens, where they would work until nightfall, clearing land, repairing buildings, and constructing an irrigation and reservoir system for a Greek orphanage.

M. Sgt. Bruce Gale of the U.S. Air Force Strategic Squadron Field Maintenance Division, at the Hellenikon Air Base in Greece, has been involved in helping homeless children at this orphanage for 12 years. He and Lt. Col. Sid Eilertson, the commanding officer of the 264th Marine Helicopter Squadron, organized 50 man work parties each day the unit was in port.

Some of the men worked to clear and fertilize the extremely rocky hillside so that crops could be planted to provide food for the children. Another group of marines excavated a portion of the land to construct a large cinder block cistern to hold water for use in the orphanage and the farm's irrigation system.

Some of the men worked on the orphanage building itself, giving it a new coat of paint and doing some much needed carpentry and electrical work. They even began to construct playground equipment in the orphanage's yard.

The marines were so touched by the children they had seen at the orphanage, that before leaving port, they contributed more than $3,000 to the orphanage fund. Lt. Col. Robert Tschan, commander of the 2d Battalion of the Marines Sixth Division led the collection drive, and when Col. Richard Poore, commander of the 32d Marine Amphibious Unit, presented the money to the orphanage, the marines challenged the men and women stationed at the Hellenikon Air Force Base to match the donation. Col. Phil Smith, commander of the Air Force base, accepted the challenge so that enough money would be raised to purchase a truck for use on the orphanage farm, which the marines had planted.

Mr. Speaker, this is a story of love and caring that can be told at anytime throughout the year, not just at Christmas. This is the type of story that makes all Americans proud of our servicemen, who spend long periods of time overseas away from their family and friends, but who continue to share themselves with the people of the world that they meet. Mr. Speaker, as one Member of Congress who had the privilege of meeting most of those marines, I simply want to say God bless them.●

COMMUNISM AT OUR BACK DOOR

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. LAGOMARSINO. Mr. Speaker, a recent editor's report by William Randolph Hearst, Jr. chronicles the progression of Communist regimes in the Caribbean and Central America. As the Soviet-Cuban axis increases its subversive activities in the region, the United States and its allies will be sorely tested to provide the means to resist. The report urges our allies to consider the threat continued Soviet-Cuban expansion can have for their own security and the need to collectively counter that threat:

COMMUNISM AT OUR BACK DOOR

(By William Randolph Hearst, Jr.)

NEW YORK—The long revolutionary fuse that Fidel Castro ignited in Latin America for his Soviet sponsors often sputters and occasionally the sparks fly around as they are doing today in Nicaragua. To thwart explosions and curb subversion, the Organization of American States (OAS) meets regularly to map common strategy and plan mutual assistance.

Their foreign ministers, from large nations and small, I'm pleased to note are doing just that right now. They are conferring in the sea-washed little Caribbean island-state of St. Lucia. That's not far from Puerto Rico or Martinique and is most strategically sited. All the assembled dignitaries, including our own Secretary of State Alexander Haig, are deeply concerned about the avowed export of revolt from Castro's Cuba. The bearded, cigar-chomping disciple of the U.S.S.R. has been extremely busy slipping armaments to the Sandinistas in Nicaragua who thereupon transship the Soviet-supplied weapons to guerrillas waging war throughout El Salvador in Central America.

Castro has already gotten some hard-nosed signals from the administration in Washington that we won't tolerate his back-door aid to insurrection in Latin America. It begins smack in the Caribbean basin. Edwin Meese, 3d, President Reagan's counselor, fully supported Secretary Haig on openly stating that the U.S. simply will not accept attempts at upheaval in regions which can impair our security. Mr. Meese chose his words carefully, and I think all Americans might care to look at them again.

"Al Haig has done an excellent job of portraying the position of this administration which is: We will not countenance subversion being imported into Central America."

We all know that Castro has made a mess of his own Communist-run economy. His mentors have been failing at it for 60 years themselves as well as wrecking the economies of all their satellites. You only have to look at the dismal plight in which embattled Poland finds itself right now to see what running on Moscow time means to people. So, the Soviets have to reach far across the world to our back door to keep their Cuban stooge, Castro, economically afloat.

In oil deliveries and spare parts for industry, the Russians supply Castro around a billion dollars a year. But it's a *quid pro quo* deal. Even when dealing with comrades, the Russians squeeze out one ruble for at least every two they give. Castro agreed with alacrity to provide the cannon fodder, in the form of Cuban legions, the Soviets wanted to move into key areas of Africa and the Middle East.

Then came Nicaragua ruled by the Somoza family. That was much closer to Castro's own home base of operations. He already had as "guests" a cadre of self-styled Sandinista revolutionaries biding time and weapons to take on the Somoza regime. A worldwide clamor arose at the time—synchronized by all major Soviet propaganda agencies—to depict the Sandinistas as God-fearing freedom fighters.

As the reality of events turned out, nothing is further from the truth. The successors to the deposed Somoza regime have filled jails with critics and newspaper editors, who once supported their cause. When they learned first-hand about dictatorial methods and complained bitterly, these disenchanted folks just vanished.

Sandinista Nicaragua is sliding rapidly into the morass of totalitarianism. It has become Castro's major satellite in Central America. Besides arresting critics and throttling the press, a big Cuban arms buildup is in progress. Get a load of these figures for a supposed have-not country struggling to make ends meet:

There are 3,000 Cuban military advisers in Nicaragua, a small nation of 2.4 million people. Considering that Castro had around 50,000 scattered around Africa and the Middle East, the total in Nicaragua is mammoth. On a shuttle basis, about 200 Soviet "advisers" come in from Cuba, have a look around and return to base. In addition 15 Soviet-made T-55 tanks and appropriate ammunition are in Nicaragua. At least 100 Sandinistas are in Bulgaria learning to fly MiGs.

Most of these armaments are earmarked or have already been slipped into El Salvador. The arms enable the guerrillas to turn

the tide of warfare in their favor in many areas. Use of the weapons also buttresses the terror tactics adopted by rebels who have been able to swagger their way around a terrified peasantry.

These stark statistics, which Secretary Haig has presented cogently to his OAS colleagues, are making them wonder about simmering unrest elsewhere as Costa Rica, Honduras and even Mexico with its new and highly coveted oil riches. Honduras, which just became a representative democracy again via elections, also is worried.

Needless to say, many of the countries within the OAS are poor and underdeveloped. The U.S.-conceived Marshall-type aid plan should be blended in with adequate security precautions because the poorer countries require—and should obtain—economic assistance quickly. The small and the weak countries feel especially vulnerable, which makes decisions all the more pressing. I feel strongly that we must help all our free friends so that they, in turn, can help themselves.

Overt techniques from this country or warnings to Castro to cut out adventurism in the Caribbean won't, I fear, be very decisive at this stage. Many Latin American nations don't take too kindly to us cuffing a Soviet upstart like Castro around. True, they fear his meddling in their own affairs but it requires deft diplomacy to make them realize that we have a common stake in solving the problem.

Secretary Haig has proven in many areas of the world that he can put out fires with the least damage to all concerned. He should be afforded the opportunity to sever Castro's Soviet-set fuse before it gets out of hand.●

"DIPC BENDS TO WILL OF CONGRESS"

HON. JERRY M. PATTERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. PATTERSON. Mr. Speaker, on December 9, I introduced two pieces of legislation, H.R. 5135 and H.R. 5136, designed to address the serious problems facing a major segment of our Nation's financial community—savings and loan institutions and mutual saving banks. One of these bills, H.R. 5135, is specifically aimed at preventing the Depository Institutions Deregulation Committee from causing further financial aggravation for the thrift industry. This bill would require the DIDC to suspend additional action for a period of 6 months in order to allow Congress an opportunity to examine the deregulation of the financial industry thus far, to insure that the deregulation is proceeding as called for in the Depository Institutions Deregulation and Monetary Control Act of 1980.

I am pleased to submit for the record today a bipartisan list of 43 of our colleagues who share my concern over the effects of the DIDC's actions on the health of the entire financial community and ultimately the economy at large.

In addition, I would like to express my personal relief that Treasury Secretary Regan, Chairman of the DIDC, has announced his intention to recommend that the Committee postpone consideration of the three deregulation initiatives which were scheduled for the December 16 DIDC meeting. Secretary Regan's decision was made in response to the requests of several Members of Congress and is timely and appropriate as Congress prepares to adjourn for the holiday recess. It is unfortunate that Secretary Regan will not be appearing tomorrow before the House Banking Committee. At Secretary Regan's request, these hearings have again been postponed. I look forward to having an opportunity to query the Secretary on the work of the Deregulation Committee when the Congress reconvenes in the new year.

The crisis of the thrift industry will certainly be with us when we return to Washington. I urge my colleagues to continue to monitor this situation to insure that the congressional intent of the 1980 act is adhered to.●

HUMAN RIGHTS

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. BONKER. Mr. Speaker, Patricia Derian, the former Assistant Secretary of State for Human Rights and Humanitarian Affairs, has written a perceptive and thought provoking article in the November 7, 1981, issued of Nation magazine, entitled "Some of Our Best Friends Are Authoritarians." Ms. Derian notes: "the Reagan administration has made faint efforts to fake an attitude toward human rights; it has made no effort to implement a policy."

Now that Elliot Abrams has assumed the post of Human Rights and Humanitarian Affairs, I commend to his attention and the attention of my distinguished colleagues, Pat Derian's article.

It is my hope that Mr. Abrams' appointment signifies a new beginning, that this administration will now make a new effort to establish a human rights policy that is evenhanded, just, and in the best traditions of the country:

[From the Nation, Nov. 7, 1981]

SOME OF OUR BEST FRIENDS ARE AUTHORITARIANS

(By Patricia Derian)

The Reagan Administration has made faint efforts to fake an attitude toward human rights; it has made no effort to implement a policy. Let's look at the record.

U.S. representative to the United Nations Jeane Kirkpatrick put forth the theory that authoritarianism is better than totalitarianism. Irving Kirstol and other neoconservatives were quick to rally behind this construct. Kirkpatrick claimed that in some places, notably Latin America, the people were not ready for democracy and that authoritarian governments were therefore an understandable, if regrettable, development. Despite right-wing efforts to resuscitate it, the authoritarian-totalitarian dichotomy has, blessedly, been laid to rest. The outrage generated by the description of torture and anti-Semitism in Argentina in Jacobo Timerman's Prisoner Without a Name, Cell Without a Number and the Polish workers' courageous struggle for economic and human rights in a "totalitarian" country showed how false the distinction was.

In his mid-January confirmation hearings before the Senate, Secretary of State Alexander Haig responded to a question about his position on the U.S. law prohibiting military and economic assistance to governments that violate human rights by saying, "In general, I support this provision of the Foreign Assistance Act. I do not believe we should, other than in the most exceptional circumstances, provide aid to any country which consistently and in the harshest manner violates the rights of its citizens." But even before the transcripts of that hearing were released, Administration officials were lobbying members of Congress to repeal legislation prohibiting military assistance to Argentina, where the ruling junta and its supporters are responsible for the murders of countless citizens, This same government routinely confiscates property, detains people in prison without pressing charges and practices torture, and it has been charged by human-rights groups with causing the disappearance of approximately 15,000 Argentines.

At a late January press conference, Haig said, "International terrorism will take the place of human rights [in] our concern, because it is the ultimate abuse of human rights." At the time Haig made that statement, the United States was continuing its attempt to extradite the terrorists it believes participated, with the approval of the Chilean government, in the Washington, D.C., assassinations of Orlando Letelier, a former minister in Salvador Allende's government, and Ronnie Moffitt, an American citizen and an associate of Letelier's at the Institute for Policy Studies. Immediately after Ronald Reagan's inauguration, the extradition efforts were abandoned, and Chile began to feel the warm sun of American friendship. Chile took part in the annual U.S.-South American naval exercise this year, the ban on Export-Import Bank loans to Chile was lifted, and U.S. representatives to international banks were ordered to support loans to Chile. In addition, Kirkpatrick recently visited Augusto Pinochet, Chile's president. So much for Chilean terrorism. Then, the Reagan Administration, after declaring the Soviet Union to be the greatest supporter of terrorism in the world, abandoned the wheat embargo imposed by Jimmy Carter in response to the Soviet invasion of Afghanistan and negotiated new grain sales with the U.S.S.R. No further policy to combat Soviet-supported terrorism has been proposed.

On April 30, The New York Times quoted President Reagan as having said that "even at the negotiating table, never shall it be forgotten for a moment that wherever it is taking place in the world, the persecution of people for whatever reason . . . persecution of people for their religious belief . . . that is a matter to be on that negotiating table or the United States does not belong at that table." In the same edition of The Times, a

front-page story reported that "after the speech, a White House spokesman said Mr. Reagan had not meant to alter his policy of playing down the rights issue in foreign relations."

The President nominated Ernest Lefever to be Assistant Secretary of State for Human Rights and Humanitarian Affairs. Lefever's publicly stated views on the subject were (a) that all legislation making foreign aid conditional on a nation's observance of human rights should be repealed and (b) that human rights had no place in U.S. foreign policy. The Senate Foreign Relations Committee, with a Republican majority, handed the President his first important defeat by voting 13 to 4 to reject the nomination. Lefever's name was withdrawn even though he modified his views during the confirmation hearings, and no one else has been named to fill the position. (Lefever is now a consultant to the State Department.)

Soon after he took office, President Reagan said he thought that South Africa's government was making a good-faith effort to improve its treatment of blacks. Apparently through the error of an inexperienced consular officer, the chief of South Africa's military intelligence and three of his colleagues were granted visas to enter the United States, even though the South African military is barred from this country by law. When their presence here became known, the State Department said that the South Africans had not been received by any U.S. officials. But they were received by Kirkpatrick, whose staff said she had not known who the visitors were, and by a U.S. military intelligence officer who was described as "an old friend." In October, several South African police officials were allowed to enter the United States to attend an international police conference, and it is rumored that Prime Minister P. W. Botha may soon pay a state visit.

The Administration has shown itself to be extremely hospitable to dictators and human-rights abusers. President Chun Doo Hwan, the strongman who ended South Korea's hopes for democracy, was welcomed by Reagan in February. And President Roberto Eduardo Viola of Argentina—elected in 1980 by the three members of Argentina's military junta—was warmly reveived when he visited Washington in March. Vice President George Bush fawned on President Ferdinand Marcos of the Philippines, pronouncing him a champion of democracy in his remarks last June at Marcos's inauguration for another six-year term.

The Administration has so far evaded the human-rights provisions of the International Financial Institutions Act of 1977. By way of explaining its support for loans to South Korea, Argentina, Uruguay and Paraguay, the Administration has claimed that "there have been significant improvements in the human rights situations in these countries . . . the Department has . . . determined that they do not now fall within the standard that would require a 'no' vote or abstention on loans not serving basic human needs."

While some members of the Administration maintain that the defeat of Carter was a direct repudiation of his human-rights policy, others argue that little has changed since the Carter Presidency. Actually, U.S. human-rights policy was not an issue in the election and so was not "repudiated." But it is also false to say that a reversal of the Carter Administration's policies on human rights has not taken place.

The Reagan Administration's intentions are evident in its warm embrace of dictators and its efforts to eliminate Congressional human-rights reports and to restore and increase aid to repressive governments. Reagan is banking on his ability to keep the public's attention focused on domestic—particularly economic-matters. He is also counting on a post-Iran eagerness to turn away from foreign affairs.

Reagan has made foreign affairs relatively simple. The Soviet menace is so overwhelming and the United States is so weak that we must blindly embrace all anti-Communist governments in order to defend liberty, justice and democracy.

The message to the world in clear: the United States is not serious about human rights. Although it will continue to mouth pieties, this country will not act on behalf of human rights.

But the Administration has been challenged. Democrat Don Bonker, chairman of the House Human Rights and International Organizations Subcommittee, and a handful of others in Congress have repeatedly urged Reagan not to abandon the U.S. commitment to human rights. Senator Christopher Dodd, Democrat of Connecticut, who recently visited El Salvador to discuss U.S. military aid, succeeded in making such aid contingent on peace negotiations and an improvement of the Salvadoran record on human rights. Though the Argentine regime is being courted by the U.S military, arms sales and economic aid are contingent on improvements in the human-rights situation there. The policy is having some effect. The most recent U.S. general to call on the Argentines was reported to have carried a list of conditions for arms sales, including moves toward a democratic government and progress on human rights.

It is likely that even before Reagan's bid for the Presidency, some of his industrialist friends had complained to him of the losses American business had suffered because of human-rights restrictions. They may have convinced Reagan that those off-limits governments with which they wanted to do business had had just provocation for their repressive actions.

Given his preoccupation with the supposed Soviet threat, U.S. business interests abroad and propping up anti-Communist governments a man who thinks only that the Russians are dangerous, China is big and Africa black (except for the little white tip) will inevitably come up with a disastrous human-rights policy.

I find it difficult to imagine that this can continue for three more years or that the American people will stand for it. Our allies are frightened and may desert us. Our enemies, we can only hope, will not figure out the extent of our disarray before we get back on track. I am far less worried about regaining military superiority over the Soviet Union than I am about a United States that has not been able or willing to develop a foreign policy, and that now has a President who does not care.●

U.S. SLIGHTS INTERNATIONAL EDUCATION

HON. JAMES L. OBERSTAR

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 15, 1981

● Mr. OBERSTAR. Mr. Speaker, we live in a time of international interdependence, an age in which time and space are compressed, a time in which ideas traverse geography as well as political boundaries with the speed of light, a time in which understanding among peoples diverse in customs and language is essential.

Communication is essentially a two-way street and one that is dependent upon understanding each of the other. I know from my student years abroad in Canada and in Belgium the importance other countries attach to international education and particularly the importance they place on understanding America as an economic system, as a political entity, as a social grouping.

I am disturbed that comparatively less emphasis is placed in this country on international education, that far less academic effort, both at the elementary and secondary level and at the higher education level, is devoted to international studies programs. I feel very strongly that American centers of learning must greatly strengthen both the quality and quantity of effort in the field of international education if we are to maintain our position of preeminence in world affairs.

That viewpoint is shared by C. Peter Magrath, president of the University of Minnesota. I would like to share with my colleagues the following article from the December 7, 1981, Minneapolis Tribune, which is an excerpt from a speech Dr. Magrath delivered last month to the Council on International Education Exchange. Dr. Magrath's views deserve not only our careful and thoughtful consideration, but also—and more importantly—action by the appropriate House Committees.

Americans tend to view most world events through national, rather than through state or regional glasses. The public looks to Washington and not to state capitols or university campuses for definitions of and solutions to most world problems.

This is an obvious, but nevertheless fundamental, premise to understand. It is also one that runs contrary to public sentiments on many issues where Americans clamor for less federal involvement. By tradition, statute and constitutional mandate, the federal government is empowered to set foreign policy and to create, fund and implement programs that join issues of a domestic and international character.

The unavoidable reality is this: Higher education's success in developing effective international programs will be determined to a far greater extent by decisions made on the federal level than by action made in state capitols, college and university trustee meetings or campus classrooms. This is not only a consequence of the traditional preeminence of the federal government in setting and funding foreign policy initiatives, but it is a consequence of the fact that most states and most colleges and universities have neither the resources—nor in many cases the inclination—necessary to permit a significant expansion of international education programs.

Before we can realistically plan for any expansion of programs that might address international issues, we first have to convince the public and its elected officials that support for higher education in general, and more specifically for international programs, makes sound domestic and economic policy. Second, we must convince that same audience that support for higher education and international programs makes sound foreign and national defense policy. Third, we have an obligation to design understandable and persuasive models that will justify a national commitment aimed at expanding international education programs.

The initial argument—that support for international education makes sound economic policy—reflects the fact that America no longer functions in a restricted national market, but must compete in the global marketplace. We are dependent upon foreign oil, foreign minerals and foreign products. In turn, our economic health is tied to our exports of agricultural, high-technology and industrial goods. Our economic dependence upon foreign trade is obvious; unfortunately, so too is our declining ability to retain, capture and increase those markets.

There are, to be sure, any number of reasons for our decline, but among the more important is the decline in support for various higher-educational programs. The message must be conveyed to Americans that we are losing out to Western European countries whose expenditures on research and development are steadily increasing while America's is steadily declining.

We are losing out to the Japanese who have 29,000 English-speaking salesmen in New York while we have only 1,000 American salesmen in Tokyo, few of whom can speak Japanese. And we are risking whatever competitive edge we might enjoy in agricultural exports due to our ever-decreasing support for international agricultural programs.

A further erosion in support for the foreign languages, for the training of teachers in international affairs, for research and development and for foreign exchange programs can only perpetuate our present national handicaps. And that can only lead to further economic problems. If for no other reason than sheer Yankee pragmatics and fiscal commonsense, Americans must be made to understand that support for higher education and international programs represents sound economic policy.

Equal, if not compelling, is the national-security case for supporting international education programs. That case emerges from the inherent limitations of our present defense posture. A security policy that is restricted to the purchase of new weapons suffers a setback with every technological armament advance of our adversaries.

This is not to say that defense spending should be curbed or that we should engage in unilateral disarmament. Quite to the contrary, I am saying that expenditures for national security should be broadened to include international education programs and that the recent cutbacks suffered in those programs are tantamount to unilateral disarmament.

I submit that the United States is guilty of unilaterally disarming its non-military security defenses. I also submit that national security is ill served by such a surrender. A 1979 survey of international communication, cultural, and educational programs taken by the General Accounting Office concluded:

"By comparison with allies and adversaries, the U.S. government investment in this field is low. In absolute terms the United States is outspent by France and the Soviet Union and is nearly equalled by West Germany. In proportion to the gross national product, the comparison becomes even more striking."

In light of such comparisons, it is not surprising that the House Committee on International Relations concluded: "In Third World cultural relations, the Soviet leadership appears to have placed its greatest hopes for ultimate success in academic exchange programs." Unfortunately, Americans cannot boast the same claim. Instead, at a time when other countries, friend and foe alike, are bolstering their arsenal of ideas, we have taken a different course. That course is a gross disservice to both our national-security interests and the interests of global peace and understanding.●

HOUSE OF REPRESENTATIVES—*Wednesday, December 16, 1981*

The House met at 10 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

He shall judge between many people, and shall decide for strong nations afar off; and they shall beat their swords into plowshares, and their spears into pruning hooks.—Micah 4:3.

We confess, O God, that we have not been as effective as we ought in lessening the violence that besets the nations. In this season of peace on Earth and good will toward all people we seek Your guidance and implore Your presence. Renew that vision of Your heavenly kingdom where people of differing backgrounds will live together in respect and understanding. Continue to show us, O God, what each of us may do so that the evils of war may be put aside and the season of light and love will shine upon all. In Your holy name, we pray. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. WALKER. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Speaker's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 200, nays 171, not voting 62, as follows:

[Roll No. 364]

Messrs. ERTEL, YATRON, WILLIAMS of Ohio, DASCHLE, YATES, KASTENMEIER, ENGLISH, SHAMANSKY, PANETTA, BUTLER, PURSELL, BONER of Tennessee, Ms. MIKULSKI, Messrs. WALGREN, LENT, Mrs. BYRON, and Mr. CARMAN, changed their votes from "yea" to "nay."

Messrs. VENTO, SHANNON, LOWRY of Washington, LEWIS, GUARINI, JOHNSTON, changed their votes from "nay" to "yea."

So the Journal was approved.

The result of the vote was announced as above recorded.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a bill of the House of the following title:

H.R. 4926. An act to authorize the Secretary of the Army to acquire, by purchase or condemnation, such interests in oil, gas, coal, and other minerals owned or controlled by the Osage Tribe of Indians as are needed for Skiatook Lake, Okla., and for other purposes.

The message also announced that the Senate had passed with amendments in which the concurrence of the House is requested, bills of the House of the following titles:

H.R. 4879. An act to clarify the treatment of international banking facility deposits for purposes of deposit insurance assessments and to remove certain limitations on the mortgage loan purchase authority of the Federal Home Loan Mortgage Corporation and the Federal National Mortgage Association; and

H.R. 4894. An act to authorize the Secretary of the Interior to disburse certain trust funds of the Lac Courte Oreilles Band of Lake Superior Chippewa Indians of Wisconsin, and for other purposes.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4995) entitled "An act making appropriations for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes."

The message also announced that the Senate agrees to the amendments of the House of Representatives to the amendments of the Senate numbered 24, 31, 36, 39, 40, 54, 55, 62, 67, 68, 72, 87, 89, 93, 96, 101, 107, 109, 110, 115, 116, 117, 118, and 120 to the above-entitled bill.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 1119) entitled "An act making appropriations for Agriculture, rural development, and related agencies programs for the fiscal year ending September 30, 1982, and for other purposes."

The message also announced that the Senate agrees to the amendments of the House of Representatives to the amendments of the Senate numbered 15, 23, 30, 35, 94, and 112 to the above-entitled bill.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4241) entitled "An act making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes."

The message also announced that the Senate agrees to the amendments of the House of Representatives to the amendments of the Senate numbered 11, 15, and 24 to the above-entitled bill.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1196) entitled "An act to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act to authorize appropriations for development and security assistance programs for the fiscal year 1982, to authorize appropriations for the Peace Corps for the fiscal year 1982, and for other purposes."

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair desires to announce the program for the day.

The Chair will announce that the first order of business today will be our consideration of the conference committee report on the social security bill under suspension of the rules.

Immediately thereafter, at the request of the President, the House could take up the conference committee report on the foreign aid appropriation if permission is granted to consider the conference report when filed.

Thereafter, we will return to the other suspensions which had been postponed from yesterday and rollcall votes on those other suspensions will be postponed until debate on all of them have been concluded.

The Chair recognizes, for purposes of a unanimous-consent request, the gentleman from Maryland (Mr. LONG).

MAKING IN ORDER AT ANY TIME TODAY OR ANY DAY THEREAFTER CONSIDERATION OF CONFERENCE REPORT ON H.R. 4559, FOREIGN ASSISTANCE AND RELATED PROGRAMS APPROPRIATIONS, 1982

Mr. LONG of Maryland. Mr. Speaker, I ask unanimous consent that it be in order at any time today or any day thereafter to consider the conference report and all amendments in disagreement thereto to the bill (H.R. 4559) making appropriations for foreign assistance and related programs for the fiscal year ending September 30, 1982, and for other purposes.

The SPEAKER pro tempore (Mr. WRIGHT). Is there objection to the request of the gentleman from Maryland?

There was no objection.

CONFERENCE REPORT ON H.R. 4559, FOREIGN ASSISTANCE AND RELATED PROGRAMS APPROPRIATIONS, 1982

Mr. LONG of Maryland submitted the following conference report and statement on the bill (H.R. 4559) making appropriations for Foreign Assistance and related programs for the fiscal year ending September 30, 1982, and for other purposes:

CONFERENCE REPORT (H. REPT. NO. 97-416)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4559) making appropriations for the foreign assistance and related programs for the fiscal year ending September 30, 1982, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 5, 18, 26, 29, 31, 33, 35, 37, 38A, 42, 45, 52, 55, 56, 61, 64, 67, 69, 72, 80, 82, 90, 105, 110, 111, 112, 128, 129, 131, 132, 133, 134, 136, 137, 139, 140, 141, 143, 146, 147, 148, 150, 152, 155, 157, and 161.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 3, 4, 6, 8, 9, 10, 13, 16, 17, 19, 19A, 20, 21, 27, 28, 30, 32, 34, 36, 39, 40, 41, 43, 44, 46, 48, 49, 50, 51, 57, 58, 60, 65, 66, 68, 74, 75, 76, 77, 78, 79, 81, 83, 84, 85, 86, 87, 88, 91, 92, 94, 95, 97, 100, 101, 103, 104, 105A, 106, 107, 108, 109, 111A, 113, 115, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 130, 135, 144, 145, 149, 151, 153, 154, 156, 158, 159, and 160, and its disagreement to the amendment of the Senate to the title of the bill, and agree to the same.

Amendment numbered 7:

That the House recede from its advancement to the amendment of the Senate numbered 7, and agree to the same with an amendment, as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following: *International Financial Institutions Act, $37,168,491, to remain available until expended, and $109,720,549 for the General Capital Increase, as authorized by section 39 of the Bretton Woods Agreements Act, to remain available until expended: Provided, That no such payment may be made while the United States Executive Director to the Bank is compensated by the Bank at a rate in excess of the rate provided for an individual occupying a position at level IV of the Executive Schedule under section 5315 of title 5, United States Code, or while the alternate United States Executive Director to the Bank is compensated by the Bank at a rate in excess of the rate provided for an individual occupying a position at level V of the Executive Schedule under section 5316 of title 5, United States Code*; and the Senate agree to the same.

Amendment numbered 11:

That the House recede from its disagreement to the amendment of the Senate numbered 11, and agree to the same with an amendment, as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following: *$700,000,000*; and the Senate agreee to the same.

Amendment numbered 12:

That the House recede from its disagreement to the amendment of the Senate numbered 12, and agree to the same with an amendment, as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following: *As authorized by section 17 of the International Development Association Act, to remain available until expended: Provided, That no such payment may be made while the United States Executive Director to the International Bank for Reconstruction and Devel-*

opment is compensated by the Bank at a rate in excess of the rate provided for an individual occupying a position at level IV of the Executive Schedule under section 5315 of title 5, United States Code, or while the alternate United States Executive Director to the Bank is compensated by the Bank at a rate in excess of the rate provided for an individual occupying a position at level V of the Executive Schedule under section 5316 of title 5, United States Code: Provided further, That the Secretary of the Treasury shall instruct the Executive Director to undertake negotiations to reallocate the development credits made available through the sixth replenishment to provide a more efficient distribution among recipient nations including a reduction in the maximum development credits provided to any given nation; and the Senate agree to the same.

Amendment numbered 14:

That the House recede from its disagreement to the amendment of the Senate numbered 14, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$108,250,000*; and the Senate agree to the same.

Amendment numbered 15:

That the House recede from its disagreement to the amendment of the Senate numbered 15, and agree to the same with an amendment, as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following: *International Financial Institutions Act, $7,847,869, to remain available until expended: Provided, That no such payment may be made while the United States Director of the Bank is compensated by the Bank at a rate which, together with whatever compensation such Director receives from the United States, is in excess of the rate provided for an individual occupying a position at level IV of the Executive Schedule under section 5315 of title 5, United States Code, or while any alternate United States Director to the Bank is compensated by the Bank in excess of the rate provided for an individual occupying a position at level V of the Executive Schedule under section 5316 of title 5, United States Code*; and the Senate agree to the same.

Amendment numbered 47:

That the House recede from its disagreement to the amendment of the Senate numbered 47, and agree to the same with an amendment, as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following: *30 percent*; and the Senate agree to the same.

Amendment numbered 54:

That the House recede from its disagreement to the amendment of the Senate numbered 54, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment, insert *$93,757,500*; and the Senate agree to the same.

Amendment numbered 59:

That the House recede from its disagreement to the amendment of the Senate numbered 59, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment, insert *$2,576,000,000*; and the Senate agree to the same.

Amendment numbered 71:

That the House recede from its disagreement to the amendment of the Senate numbered 71, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment, insert *$36,700,000*; and the Senate agree to the same.

Amendment numbered 93:

That the House recede from its disagreement to the amendment of the Senate numbered 93, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment, insert *$176,512,000*; and the Senate agree to the same.

Amendment numbered 96:

That the House recede from its disagreement to the amendment of the Senate numbered 96, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$38,488,000*; and the Senate agree to the same.

Amendment numbered 98:

That the House recede from its disagreement to the amendment of the Senate numbered 98, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$750,000,000*; and the Senate agree to the same.

Amendment numbered 99:

That the House recede from its disagreement to the amendment of the Senate numbered 99, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment, amended to read as follows: *of which not less than $550,000,000 shall be allocated to Israel and not less than $200,000,000 shall be allocated to Egypt*; and the Senate agree to the same.

Amendment numbered 102:

That the House recede from its disagreement to the amendment of the Senate numbered 102, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$750,000,000*; and the Senate agree to the same.

Amendment numbered 114:

That the House recede from its disagreement to the amendment of the Senate numbered 114, and agree to the same with an amendment, as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following: *not exceed $9,220,000,000*; and the Senate agree to the same.

Amendment numbered 116:

That the House recede from its disagreement to the amendment of the Senate numbered 116, and agree to the same with an amendment, as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following: *section 3109 of title 5, United States Code, and not to exceed $16,000 for entertainment allowances for members of the Board of Directors*; and the Senate agree to the same.

Amendment numbered 162:

That the House recede from its disagreement to the amendment of the Senate numbered 162, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment, amended to read as follows:

SEC. *525. None of the funds appropriated under this Act may be used to lobby for abortion*; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 22, 23, 24, 25, 38, 53, 62, 63, 70, 73, 89, 138, and 142.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4559) making appropriations for Foreign Assistance and related programs for the fiscal year ending September 30, 1982, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

Amendment No. 1: Changes capitalization.

TITLE I—MULTILATERAL ECONOMIC ASSISTANCE

FUNDS APPROPRIATED TO THE PRESIDENT

INTERNATIONAL FINANCIAL INSTITUTIONS

CONTRIBUTION TO THE INTER-AMERICAN DEVELOPMENT BANK

Amendment No. 2: Changes plural to singular.

Amendment No. 3: Strikes funding of prior replenishment.

Amendment No. 4: Appropriates $173,177,000 for the current replenishment as proposed by the Senate instead of $157,500,000 as proposed by the House.

Amendment No. 5: Restores salary restrictions as proposed by the House.

LIMITATION ON CALLABLE CAPITAL SUBSCRIPTIONS

Amendment No. 6: Adds "Inter-American Development".

CONTRIBUTION TO THE INTERNATIONAL BANK FOR RECONSTRUCTION AND DEVELOPMENT

Amendment No. 7: Restores salary restrictions proposed by the House and provides for different division between 1977 and 1981 capital increases while maintaining same total budget authority as provided for by both the House and Senate.

LIMITATION ON CALLABLE CAPITAL SUBSCRIPTIONS

Amendment No. 8: Adds "International Bank for Reconstruction and Development".

Amendment No. 9: Increases callable capital to $1,687,728,491 as proposed by the Senate instead of $1,678,305,878 as proposed by the House.

CONTRIBUTION TO THE INTERNATIONAL FINANCE CORPORATION

Amendment No. 10: Changes citation.

CONTRIBUTION TO THE INTERNATIONAL DEVELOPMENT ASSOCIATION

Amendment No. 11: Appropriates $700,000,000 instead of $725,000,000 as proposed by the House and $532,000,000 as proposed by the Senate.

Amendment No. 12: Restores salary restrictions and language proposed by the House which directs the Secretary of the Treasury to instruct the U.S. Executive Di-

rector to the International Development Association to negotiate the reallocation of development credits in order to achieve a more efficient distribution among nations and to decrease the maximum credits given to any one nation.

CONTRIBUTION TO THE ASIAN DEVELOPMENT BANK

Amendment No. 13: Increases paid-in capital to $4,713,851 as proposed by the Senate instead of $4,465,754 as proposed by the House.

Amendment No. 14: Provides $108,250,000 for the development fund instead of $98,713,383 as proposed by the House and $111,250,000 as proposed by the Senate.

Amendment No. 15: Restores salary restrictions and decreases prior replenishment from $14,116,177 proposed by the House to $7,847,869 proposed by the Senate.

LIMITATION ON CALLABLE CAPITAL SUBSCRIPTIONS

Amendment No. 16: Adds "Asian Development Bank".

Amendment No. 17: Provides callable capital of $41,666,667 as proposed by the Senate instead of $40,388,598 proposed by the House.

CONTRIBUTION TO THE AFRICAN DEVELOPMENT FUND

Amendment No. 18: Appropriates $58,333,333 as proposed by the House instead of $41,666,667 proposed by the Senate.

PAYMENT TO THE INTERNATIONAL FUND FOR AGRICULTURAL DEVELOPMENT

Amendment No. 19: Provides no funding as proposed by the Senate instead of $40,500,000 proposed by the House.

INTERNATIONAL ORGANIZATIONS AND PROGRAMS

Amendment No. 19A: Strikes "as amended,".

Amendment No. 20: Strikes $213,638,000 as proposed by the House.

Amendment No. 21: Strikes limitation as proposed by the House.

Amendment No. 22: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the sum inserted by said amendment, insert the following: "$215,438,000: *Provided*, That no funds shall be available for the United Nations Fund for Science and Technology or the United Nations Decade for Women".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The funds appropriated for international organizations and programs are allocated as shown in the following table:

Conference allowance

United Nations:	*Thousands*
U.N. Development Program	$126,750
U.N. Children's Fund	41,500
U.N. Capital Development Fund	2,000
U.N. Food and Agricultural Organization: World Food Program	2,500
U.N. Voluntary Fund for the Decade for Women	0
World Meteorological Organization Voluntary Cooperation Program	2,300
International Atomic Energy Agency	12,750
U.N. Environment Program	7,850
U.N. Education and Training Program for Southern Africa	1,000

U.N. Trust Fund for South Africa	400
U.N. Institute for Training and Research	500
Convention on International Trade in Endangered Species	138
U.N. Fellowship Program	1,250
Subtotal, U.N.	199,438
Organization of American States	16,000
Total, international organizations and programs	215,438

Amendment No. 23: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment insert the following: ": *Provided further*, That not less than $126,750,000 shall be available only for the United Nations Development Program".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 24: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following: ": *Provided further*, That not more than $41,500,000 shall be available for the United Nations Children's Fund".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 25: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following: ": *Provided further*, That not more than $7,850,000 shall be available for the United Nations Environment Program".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 26: Strikes language proposed by the Senate concerning the United Nations Institute for Namibia.

TITLE II—BILATERAL ECONOMIC ASSISTANCE

FUNDS APPROPRIATED TO THE PRESIDENT

Amendment No. 27: Strikes "as amended".

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Amendment No. 28: Strikes title.

AGENCY FOR INTERNATIONAL DEVELOPMENT

Agriculture, rural development and nutrition, Development Assistance: Amendment No. 29: Appropriates $700,000,000 proposed by the House instead of $637,485,000 proposed by the Senate.

The conferees are in agreement that the Agency for International Development, in its efforts to address Africa's worsening food situation, should move forward with its project (#698-0503) to strengthen agricultural research programs throughout Africa.

Amendment No. 30: Rearranges words.

Population, Development Assistance: Amendment No. 31: Appropriates $211,000,000 proposed by the House instead of $190,000,000 proposed by the Senate.

Amendment No. 32: Rearranges words.

Amendment No. 33: Deletes language proposed by the Senate concerning the United Nations Fund for Population Activities.

Amendment No. 34: Retains language proposed by the Senate concerning the World Health Organization's Special Program of Research, Development and Research Training in Human Reproduction. The conferees reiterate their belief that population and family planning measures are a vital component of third world economic development.

Health, Development Assistance: Amendment No. 35: Appropriates $133,405,000 proposed by the House instead of $120,405,000 proposed by the Senate.

Amendment No. 36: Rearranges words.

Education and human resources development, Development Assistance: Amendment No. 37: Appropriates $103,550,000 proposed by the House instead of $101,000,000 proposed by the Senate.

Amendment No. 38: Reported in technical disagreement: The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following: "$4,000,000 of this amount shall".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 38A: Restores the word "only" as proposed by the House.

Amendment No. 39: Rearranges words.

Energy and selected development activities, Development Assistance:

Amendment No. 40: Strikes a comma.

Amendment No. 41: Adds "and".

Amendment No. 42: Appropriates $137,200,000 proposed by the House instead of $120,000,000 proposed by the Senate.

Amendment No. 43: Strikes language proposed by the House which provided that $40,000,000 shall be available for resettlement services and facilities for refugees and displaced persons in Africa. The managers on the part of the House and Senate are in agreement that $30,000,000 of this amount should be restored under the Migration and Refugee Assistance account.

Amendment No. 44: Rearranges words.

Science and technology, Development Assistance: Amendment No. 45: Restores House language which provides $10,000,000 for science and technology.

Loan allocation, Development Assistance: Amendment No. 46: Adds "through".

Amendment No. 47: Provides for 30 percent of total Agency for International Development funds to be loans rather than 35 percent proposed by the House and 26 percent proposed by the Senate.

Amendment No. 48: Adds "the".

Amendment Nos. 49, 50, and 51: Update per capita income figures on which loan repayment terms are based as proposed by the Senate.

American schools and hospitals abroad: Amendment No. 52: Appropriates $20,000,000 proposed by the House instead of $12,000,000 proposed by the Senate.

International disaster assistance: Amendment No. 53: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate. The Senate amendment earmarks $10,000,000 to be used for earthquake relief and reconstruction in southern Italy.

Sahel development program: Amendment No. 54: Appropriates $93,757,500 instead of $95,000,000 proposed by the House and $92,515,000 proposed by the Senate.

Amendment No. 55: Restores language providing $2,000,000 for the African Development Fund proposed by the House.

Amendment No. 56: Restores language proposed by the House which continues availability of previously appropriated funds for the African Development Foundation.

Payment to the Foreign Service Retirement and Disability Fund:

Amendment No. 57: Rearranges punctuation.

Amendment No. 58: Changes citation.

Economic support fund: Amendment No. 59: Appropriates $2,576,000,000 instead of $2,463,500,000 proposed by the House and $2,623,500,000 proposed by the Senate. The funds appropriated are allocated as shown in the following table:

Conference allowance

	Thousands
Africa:	
Botswana	$10,000
Djibouti	2,000
Kenya	10,000
Liberia	10,000
Mauritius	2,000
Seychelles	2,000
Somalia	30,000
South Africa Regional	30,000
Sudan	100,000
Zambia	20,000
Zimbabwe	75,000
Subtotal	291,000
Asia:	
Pakistan	100,000

Total	2,576,000

The conferees are in agreement that Economic Support Fund Assistance made available to Israel under this Act, shall be completely disbursed no later than 30 days following the enactment of this legislation. The conferees recommend such an early disbursement in order to prevent the necessity of Israel having to seek costly commercial interim financing.

The conferees are in agreement that funds provided for Pakistan should be obligated and expended in accordance with the justification presented to the Congress by the Agency for International Development.

Amendment No. 60: Adds a comma.

Amendment No. 61: Restores language proposed by the House which provides that no funds in the Special Requirements Fund shall be obligated or expended without the prior written approval of the Appropriations Committees of both Houses of Congress.

Amendment No. 62: Reported in technical disagreement. The managers on the part of the House will offer an amendment to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following: ": *Provided further,* That not less than $100,000,000 shall be available for Sudan, not less than $5,000,000 for Poland, not less than $5,000,000 for Tunisia, and not less than $20,000,000 for Costa Rica".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 63: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following: ": *Provided further,* That not more than $15,000,000 shall be available for Cyprus".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 64: Strikes language proposed by the Senate which provided $2,000,000 for scholarships for South African students.

Peacekeeping Operations: Amendment No. 65: Appropriates $14,000,000 proposed by the Senate instead of $19,000,000 proposed by the House.

Operating expenses of the Agency for International Development: Amendment No. 66: Appropriates $331,000,000 proposed by the Senate instead of $335,632,000 proposed by the House.

Amendment No. 67: Restores language proposed by the House concerning Foreign Affairs Administrative Support.

Amendment No. 68: Strikes language proposed by the House concerning International Development Cooperation Agency.

Trade and development: Amendment No. 69: Restores language proposed by the House to allow funds to remain available until expended.

Housing and other credit guaranty programs: Amendment No. 70. Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate, which includes language establishing a limitation of these programs.

International narcotics control: Amendment No. 71: Appropriates $36,700,000 instead of $37,700,000 proposed by the House and $34,160,000 proposed by the Senate.

Managers on the part of the House and the managers on the part of the Senate agree that none of the funds provided for International Narcotics Control may be obligated for a United States contribution to the United Nations Fund for Drug Abuse Control unless the Appropriations Committees of the House and the Senate are previously notified 15 days in advance.

Amendment No. 72: Restores House language concerning uses of previously made available funds.

USE OF CERTAIN POLISH CURRENCIES

Amendment No. 73: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate. The amendment of the Senate provides for the equivalent of $70,000,000 in Polish Zlotys to be used in Poland to serve United States interests.

INTER-AMERICAN FOUNDATION

Amendment No. 74: Strikes "as amended,".

Amendment No. 75: Adds a comma.

Amendment No. 76: Strikes "as amended,".

OVERSEAS PRIVATE INVESTMENT CORPORATION

Amendment No. 77: Adds a comma.

Amendment No. 78: Strikes ", as amended".

Amendment No. 79: Adds "the fiscal year".

Amendment No. 80: Restores language proposed by the House to limit direct loans to $10,000,000.

Amendment No. 81: Adds "the fiscal year".

Amendment No. 82: Restores language proposed by the House to limit guaranteed loans to $100,000,000.

INDEPENDENT AGENCY

ACTION-INTERNATIONAL PROGRAMS

Amendment No. 83: Strikes title.

PEACE CORPS

Amendment No. 84: Strikes "for ACTION".

Amendment No. 85: Strikes ", as amended".

Amendment No. 86: Appropriates $105,000,000 proposed by the Senate instead of $100,000,000 proposed by the House.

DEPARTMENT OF STATE

MIGRATION AND REFUGEE ASSISTANCE

Amendment No. 87: Eliminates abbreviations.

Amendment No. 88: Eliminates abbreviations.

Amendment No. 89: Reported in technical disagreement: The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the sum stricken and inserted by said amendment, insert the following: "$503,000,000: *Provided,* That $30,000,000 of this amount shall be transferred to the Agency for International Development to be used only for resettlement services and facilities for refugees and displaced persons in Africa."

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment N. 90: Restores language proposed by the House providing $5,000,000 for persons displaced by strife in El Salvador.

Amendment No. 91: Provides that not more than $7,426,000 shall be for administrative expenses for the Office of Refugee Programs.

TITLE III—MILITARY ASSISTANCE

FUNDS APPROPRIATED TO THE PRESIDENT

MILITARY ASSISTANCE

Amendment No. 92: Strikes "as amended,".

Amendment No. 93: Appropriates $176,512,000 instead of $238,500,000 proposed by the House and $63,500,000 proposed by the Senate.

The conferees are in agreement that these funds provide $38,500,000 for the phasing out of the regular program and the balance for grant assistance to countries justified to

the Congress. No funds are included for the Special Requirements Fund.

Amendment No. 94: Deletes language proposed by the House concerning purchase of automobiles.

INTERNATIONAL MILITARY EDUCATION AND TRAINING

Amendment No. 95: Strikes "as amended,".

Amendment No. 96: Appropriates $38,488,000 instead of $35,000,000 proposed by the House and $41,976,000 proposed by the Senate.

FOREIGN MILITARY CREDIT SALES

Amendment No. 97: Strikes "not otherwise provided for,".

Amendment No. 98: Appropriates $750,000,000 instead of $650,000,000 proposed by the House and $990,900,000 proposed by the Senate.

Amendment No. 99: Provides that $550,000,000 shall be allocated to Israel and $200,000,000 to Egypt.

Amendment No. 100: Strikes language proposed by the House concerning Egypt which is no longer necessary because of amendment number 99. The Senate had no such proposal.

Amendment No. 101: Adds "the".

Amendment No. 102: Provides a limitation of $750,000,000 instead of $650,000,000 proposed by the House and $990,900,000 proposed by the Senate.

Amendment No. 103: Adds "the".

Amendment No. 104: Provides $3,083,500,000 proposed by the Senate instead of $2,846,187,000 proposed by the House for loan guarantees.

SPECIAL DEFENSE ACQUISITION FUND

Amendment No. 105: Strikes $341,000,000 proposed by the Senate. The House did not propose funds for this account.

TITLE IV—EXPORT-IMPORT BANK OF THE UNITED STATES

Amendment No. 105A: Strikes "hereby".

Amendment No. 106: Changes the word "accord" to "accordance".

Amendment No. 107: Adds a comma.

Amendment No. 108: Strikes "as amended,".

Amendment No. 109: Changes the phrase "corporation, except as hereinafter provided" to "corporation".

Amendment No. 110: Retains House language.

Amendment No. 111: Deletes Senate language.

LIMITATION ON PROGRAM ACTIVITY

Amendment No. 111A: Adds "the".

Amendment No. 112: Provides a limitation of $4,400,000,000 as proposed by the House for direct loans instead of $4,700,000,000 proposed by the Senate.

Amendment No. 113: Add "the".

Amendment No. 114: Provides a limitation of $9,220,000,000 as proposed by the Senate for guaranteed loans instead of $8,651,000,000 proposed by the House.

LIMITATION ON ADMINISTRATIVE EXPENSES

Amendment No. 115: Changes "vehicles," to "vehicles and".

Amendment No. 116: Eliminates the abbreviations and restores the limitation on entertainment allowances as proposed by the House.

Amendment No. 117: Adds "Export-Import".

Amendment No. 118: Adds "Export-Import".

Amendment No. 119: Changes the phrase "hereof" to "of this paragraph".

TITLE V—GENERAL PROVISIONS

Amendment No. 120: Changes the phrase "herein appropriated" to "appropriated in this Act".

Amendment No. 121: Changes punctuation.

Amendment No. 122: Provides language as proposed by the Senate to exempt the special requirements fund from the provision that not more than 15 percent can be obligated in the last month of availability.

Amendment No. 123: Adds "the".

Amendment No. 124: Changes the phrase "herein appropriated" to "appropriated in this Act".

Amendment No. 125: Strikes "as amended,".

Amendment No. 126: Strikes "as amended,".

Amendment No. 127: Strikes, "as amended".

Amendment No. 128: Restores $110,000 proposed by the House instead of $100,000 proposed by the Senate.

Amendment No. 129: Restores "official residence expenses" as proposed by the House instead of "representation allowances" as proposed by the Senate.

Amendment No. 130: Adds "the".

Amendment Nos. 131 through 133: Restore language proposed by the House and strike language proposed by the Senate in order to maintain current limitations on representation and other allowances as proposed by the House.

Amendment No. 134: Restores section number.

Amendment No. 135: Strikes "as amended,".

Amendment No. 136: Restores section number.

Amendment No. 137: Restores section number.

Amendment No. 138: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following: "513. None of the funds appropriated or otherwise made available pursuant to this Act shall be obligated or expended to finance directly any assistance or reparations to Libya, Iraq, or South Yemen".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 139: Restores section number.

Amendment No. 140: Strikes the language "and the relevant authorizing committees" proposed by the Senate.

Amendment No. 141: Restores section number.

Amendment No. 142: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate. The amendment of the Senate changes the words "heretofore authorized" to "authorized before the date of enactment of this Act".

Amendment No. 143: Restores section number.

Amendment No. 144: Changes "beyond" to "after the expiration of".

Amendment No. 145: Changes "herein" to "in this Act".

Amendment No. 146: Restores section number.

Amendment No. 147: Restores section number.

Amendment No. 148: Restores section number.

Amendment No. 149: Changes "documents" to "any document".

Amendment No. 150: Restores section number.

Amendment No. 151: Strikes "of the United States".

Amendment No. 152: Restores section number.

Amendment No. 153: Changes punctuation.

Amendment No. 154: Changes punctuation.

Amendment No. 155: Restores section number.

Amendment No. 156: Changes punctuation.

Amendment No. 157: Restores section number.

Amendment No. 158: Strikes the language proposed by the House.

Amendment No. 159: Changes punctuation.

Amendment No. 160: Adds "the".

Amendment No. 161: Restores language proposed by the House regarding the use of consulting services through procurement contracts.

Amendment No. 162: Amends the language proposed by the House to prohibit the use of any funds in the bill to lobby for abortion.

The House recedes from its disagreement to the amendment of the Senate to the title of the bill.

CONFERENCE TOTAL—WITH COMPARISONS

The total new budget (obligational) authority for the fiscal year 1982 recommended by the Committee of Conference, with comparisons to the fiscal year 1981 amount, the 1982 budget estimates, and the House and Senate bills for 1982 follow:

New budget (obligational) authority, fiscal year 1981	$11,892,241,444
Budget estimates of new (obligational) authority, fiscal year 1982	7,775,098,683
House bill, fiscal year 1982	7,440,280,064
Senate bill, fiscal year 1982	7,327,583,804
Conference agreement, fiscal year 1982	7,495,221,970
Conference agreement compared with:	
New budget (obligational) authority, fiscal year 1981	−4,397,019,474
Budget estimates of new (obligational) authority, fiscal year 1982	−279,876,713
House bill, fiscal year 1982	+54,941,906
Senate bill, fiscal year 1982	+167,638,166

CONFERENCE REPORT ON H.R. 4331, SOCIAL SECURITY AMENDMENTS OF 1981

Mr. ROSTENKOWSKI. Mr. Speaker, I move to suspend the rules and agree to the conference report on the bill (H.R. 4331) to amend the Omnibus Reconciliation Act of 1981 to restore minimum benefits under the Social Security Act.

The Clerk read the title of the conference report.

The SPEAKER pro tempore. Under the rule, a second is not required on this motion.

(For conference report and statement, see proceedings of the House of December 14, 1981.)

The gentleman from Illinois (Mr. ROSTENKOWSKI) will be recognized for 20 minutes, and the gentleman from Texas (Mr. ARCHER) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Illinois (Mr. ROSTENKOWSKI).

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that, given the important nature of this matter, time for debate be extended to an hour and a half, to be equally divided.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The SPEAKER pro tempore. The gentleman from Illinois (Mr. ROSTENKOWSKI) therefore, will be recognized for 45 minutes, and the gentleman from Texas (Mr.ARCHER) will be recognized for 45 minutes.

The Chair recognizes the gentleman from Illinois (Mr. ROSTENKOWSKI).

GENERAL LEAVE

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. ROSTENKOWSKI. Mr. Speaker, the conference agreement that I bring to the floor protects the benefits of every man and woman now in the social security system. I would call it a victory for the House in our negotiations with the Senate. We maintained the spirit of the House resolution on the minimum benefit and staved off Senate proposals for $3 billion in benefit cuts.

The major achievement of this conference was to restore the minimum benefit for all current beneficiaries. That benefit was eliminated at the insistence of the President in the Gramm-Latta Reconciliation Act which passed the Congress last summer. When the House had the opportunity to understand what was in the administration's Gramm-Latta package on social security and vote on the merits of the individual issue, it reinstated the minimum benefit both for current and new beneficiaries.

House conferees refused to accept Senate provisions for a dollar-for-dollar offset for those with Government pensions paying more than $300 per month. The House also rejected a Senate proposal to eliminate the minimum benefit for current beneficiaries living outside the United States.

Under the Reconciliation Act, the minimum benefit for new beneficiaries would take effect on November 1 of this year, affecting December benefit checks. The agreement reached yesterday delays this effective date by 2 months.

The most controversial issue in conference was a Senate proposal to reduce the cap on maximum family social security benefits—a savings of $3 billion over the next 5 years. They argued that the revenue loss resulting from reinstatement of the minimum benefit must be offset by benefit cuts in other areas. The House stood firm against any reduction in the "family maximum" benefit—which would have most affected surviving spouses and their children.

The Senate conferees Monday agreed to drop their proposal.

The next major item in dispute was a Senate provision relating to social security taxes on certain sick pay wages. Under current law, sick pay is excluded from covered wages if employers have a formal sick pay plan.

The Senate provision expanded the definition of covered wages to include all sick pay except that paid through insurance companies or other third parties.

Conferees finally agreed to a straightforward approach that treats all sick pay as covered, regardless of whether it is paid through third parties—with the exception of workmen's compensation.

The modified sick pay provision offsets much of the revenue lost by restoring the minimum benefit, and pulls payroll taxes more in line with income taxes on this issue.

The House prevailed in dropping a Senate provision extending the highway trust fund and its excise taxes through the decade. We felt that the issue was not germane to a social security bill. The House maintained that the provision went beyond the traditional authority of the Senate to amend House-passed revenue bills. We further believed that any long-range extension should only be considered after the Committee on Ways and Means has had an opportunity to review the financial status of the highway fund—and to consult with the Committee on Public Works and Transportation.

The House did accept several miscellaneous Senate amendments, including stiffer penalties for fraudulent use of social security numbers and waiving of certain provisions of the Privacy Act to facilitate administration of the 1980 law eliminating disability and student benefits for prisoners.

Taken together, the provisions of the conference agreement add up to net budget savings of $1 billion over the next 5 years.

The final—and perhaps the most critical—measure adopted in conference would allow borrowing freely among the three social security trust funds for a 1-year period, beginning January 1, 1982, without any reallocation of the rates.

No member of the House conferees considers this agreement anything more than a temporary response to the long-term needs of the social security system.

This agreement is a response to the immediate anxieties of the Nation's elderly. At this time we owe them no less.

We will hear criticism that Congress failed to address the system's long-range financial demands, I have no doubt that we will consider that matter next year—and reach an agreement that restores not only an adequate reservoir in the trust funds, but also the confidence that the social security system will forever fulfill its promises.

At this point, I will review the specific provisions of the agreement in greater detail.

INTERFUND BORROWING

The House bill as sent to the Senate contained no financing provisions for social security. The Senate added a provision that would have reallocated social security taxes over the next several years, taking revenues flowing into the (health insurance) trust fund and the disability fund (disability insurances) and redirecting these revenues into the old age and survivors (OASI) fund. The Senate amendment also provided very limited borrowing only between the old-age and survivors and disability insurance trust funds.

The conferees discussed the financing issue extensively, and it is clear that the Congress will have to act soon, possibly before 1983, to resolve the financing problems of all three trust funds. Interfund borrowing or reallocation of tax rates gives us some time to solve this problem, but the conferees recognized that any such measures can buy only limited amounts of time. Therefore, in order to insure that some further considera-

tion will be given to the social security financing problem in the near future, the conference agreement provides for no tax reallocation, and allows borrowing among all three trust funds (old-age and survivors, disability and hospital insurance) only through December 31, 1982.

The conferees intend that any transfer of funds made prior to the end of 1982 can only guarantee benefit payments for the first 6 months of 1983.

MINIMUM BENEFIT

The Omnibus Budget Reconciliation Act of 1981 eliminated the minimum benefit under social security for all current and future beneficiaries. This took effect in November of this year for future beneficiaries, and in March of 1982 for all current beneficiaries. At the same time this body approved final passage of the Reconciliation Act, we passed and sent to the Senate H.R. 4331, which rescinded that provision of the reconciliation bill, thereby restoring the minimum for all current and future beneficiaries. I might add that when the Committee on Ways and Means considered this provision in its regular budget work, the recommendation of our Social Security Subcommittee to eliminate the minimum for future beneficiaries, but not for current ones, was followed. This recommendation was in line with those from the General Accounting Office (GAO) and others, recognizing that while we should not cut benefits for current beneficiaries, eliminating the minimum for future recipients was appropriate, since most of them were not likely to be low-wage workers, but rather part-time or intermittent workers with coverage under pension plans or income from spouses.

When the Senate took action on this provision, they added several restrictions on which current minimum recipients would have their benefits restored: those living outside the United States would not be restored at all, and those with government pensions of over $300 per month (regardless of whether the pension was from work covered by social security) would have their minimum benefit reduced dollar-for-dollar down to the level of the benefit based on their actual earnings. The Senate did not restore the minimum for future recipients, except for members of religious orders under a vow of poverty, who would be eligible for the minimum benefit until October 1991.

The conference agreement restores the minimum benefit for all people who are eligible for benefits before January 1982 or whose benefits are based on a worker's eligibility or death before January 1982. Also, the elimination of the minimum benefit for future recipients applies only to members of religious orders who have taken a vow of poverty and who become eligible after December 1991. (I would note that the Statement of Managers is incorrect; the correct date is December 1991.)

Thus, the conference agreement insures that no current recipients will have their benefits reduced, and further delays elimination of the minimum for future beneficiaries by 2 months beyond present law, from November to January. This action is consistent with the Committee on Ways and Means' position on this issue from the start. This provision does not affect the "special minimum" provision in the law, which will still be available for workers who have truly worked for most of their careers under social security at low wages (below the minimum wage). Such a worker with 25 years under social security in 1980 would be getting a benefit of $219.80 per month. It should be borne in mind that any worker with wages at or around the minimum wage for any length of time will get a social security benefit much higher than the minimum, now and into the future.

EXTENSION OF COVERAGE TO FIRST 6 MONTHS OF SICK PAY

The Senate amendment to H.R. 4331 extended withholding of social security contributions to certain payments made to employees who are absent from work due to illness. The Senate amendment would have, in general, provided for withholding of FICA contributions from sick payments made during the first 6 months that an employee was off work. However, the Senate also provided an exception to this general rule: Sick payments made by an insurance company would generally not have been considered wages for FICA tax purposes.

The conference agreement expands the Senate amendment to include sick payments made by all third-party payors, including insurance companies. The conferees felt that the conference agreement provided more equitable application of this sick pay provision since payments from all sources would be treated identically.

The conference agreement also mandates the development of regulations which will allow the third-party payor to meet the liability which is imposed on him as a result of this provision without deposit of both the employee and employer share of the payroll tax. Under these provisions, the third party will withhold the employee portion of the FICA tax, deposit this tax and notify the employer for whom services are usually rendered of the amount of sick payments made. At this point, the obligation to deposit the employer's share of the tax and to notify the IRS of the amount of sick payments made becomes that of the employer for whom the employee normally renders services.

In the event that the third-party payor fails to meet any of the appropriate criteria for shifting the liability of the employer portion of the tax to the employer-policyholder for whom services are normally rendered, then any overpayment of employer taxes, that is, combined third-party payor and normal employer taxes, should be recovered under procedures established by Treasury regulations as intended by the conferees.

Changes made by this amendment are effective on January 1, 1982. The conferees, however, recognize that this date may pose problems for both employers and third-party payors. As a result, the conferees agreed to waive interest and penalties for failure to make timely payments of taxes which are imposed as a result of this amendment except if this failure is due to willful neglect and if the taxes which are due are not deposited on or before June 30, 1982.

PENALTIES FOR MISUSE OF SOCIAL SECURITY NUMBERS

Under present law, criminal penalties are provided for: First, knowingly and willfully using a social security number that was obtained with false information; second, using someone else's social security number; or third, unlawfully disclosing or compelling the disclosure of someone else's social security number. The crime is considered a misdemeanor and the penalty involves a fine of up to $1,000 or imprisonment of up to 1 year or both.

The Senate amendment would add new acts considered to be a misuse of social security cards by making it unlawful to: First, alter; second, buy or sell; third, counterfeit social security cards; or fourth, possess a regular or counterfeit card with intent to sell or alter it.

The provision would make all unlawful acts affecting the social security number or card a felony, rather than a misdemeanor.

It would increase the maximum fine for conviction of such acts from $1,000 or $5,000 and the maximum prison term from 1 year to 5 years.

The House conferees accepted the amendment.

Last year, the GAO investigated the misuse of social security cards and numbers. Their findings reveal that the fraudulent use of social security cards to gain benefits or jobs is growing immensely.

One recommendation of the GAO was to make the counterfeiting or altering of social security cards a felony punishable by a fine of $5,000 or imprisonment for 5 years.

The amendment simply adopts the recommendation of the General Accounting Office.

STATUTORY DEADLINE FOR IMPLEMENTING AFDC HOME HEALTH AIDE DEMONSTRATION PROJECTS

The House conferees accepted the Senate amendment which simply confirms a requirement in Public Law 97-35 that the Secretary of Health and

Human Services meet the January 1, 1982, deadline for entering into demonstration agreements with at least seven States establishing AFDC home health aide projects.

INFORMATION WITH RESPECT TO PRISONERS

Under the current law, student and disability benefits cannot be paid while individuals are imprisoned for conviction of a felony except where the individual is satisfactorily participating in a rehabilitation program.

In order to implement this law, the Secretary of HHS requires information from penal institutions with which to identify the relevant prisoners. In some cases, providing this information without the consent of the prisoner possibly violates various privacy acts.

The Senate amendment would provide that, without regard to any contrary Federal or State law, Federal, State, or local government agencies must furnish the name and social security number of any prisoner convicted of a felony, when the Secretary of HHS makes a written request to the agency for that information.

The House conferees accepted the Senate amendment because it was the clear intent of Congress when enacting prior law that prisoner benefits not be paid and the conferees felt that all efforts should be made to accomplish this objective.

REPORTS TO CONGRESS REGARDING PAYMENTS TO DECEASED PERSONS

Under current law, social security benefits terminate with the month in which a beneficiary dies. The Senate amendment would require the Secretary of HHS to report to Congress within 90 days after enactment on actions being taken to prevent payments to deceased social security beneficiaries.

The House conferees accepted this provision in order to determine what actions the Social Security Administration is taking to prevent payments to deceased beneficiaries and whether these actions will be effective.

EXTENSION OF DISABILITY INSURANCE MAXIMUM FAMILY BENEFITS TO OLD-AGE AND SURVIVORS INSURANCE BENEFICIARIES

Under present law, there is a limit on the amount of monthly benefits that can be paid on the earnings record of one worker. This limit is known as the maximum family benefit (MFB). In retirement and survivors cases, the MFB ranges from 150 to 188 percent of the primary insurance amount, the unreduced benefit of the worker. In disability cases, the MFB can be no more than the lower of 85 percent of the worker's average indexed monthly earnings or 150 percent of the primary insurance amount, but not less than 100 percent of the primary insurance amount.

The Senate amendment would provide that the disability maximum family benefit formula would be extended to retirement and survivor cases for workers reaching age 62 or dying after December 1981.

The effect of the proposal on family benefits for workers at various earnings is illustrated in the table below. The benefit calculations are for 1981 even though the proposal would not have taken effect until 1982.

COMPARISON OF CURRENT LAW AND THE SENATE PROPOSAL TO LIMIT FAMILY BENEFITS EXAMPLES OF 1981 BENEFIT LEVELS

Annual indexed earnings	Current law	Senate proposal to limit family benefit	
	Maximum family benefit	Maximum family benefit	Percent reduction
2,000	2,700	1,800	33
4,000	4,123	3,400	18
6,000	5,264	5,083	3
8,000	7,005	6,043	14
10,000	8,746	7,003	20
12,000	9,619	7,963	17
16,000	11,324	9,701	14
20,000	12,374	10,601	14

The House conferees rejected this amendment because it would have severely reduced benefits primarily for surviving spouses and their children. Benefit reductions would have totaled some $3 billion over the 5 calendar years from 1982 to 1986. No hearings on this major legislative proposal have been held in the House.

STUDY OF SOCIAL SECURITY ADMINISTRATION EFFICIENCY

The Senate amendment would require the GAO to undertake a study of the Social Security Administration for the purpose of determining the management efficiency, employee productivity, and technical capacities (including computer hardware and programing) of that agency and the extent of current information on the characteristics of recipients. The Comptroller General would be required to report to Congress, no later than 180 days after the date of enactment, the results of the study and any recommendations for improvements in any of the operations studied.

The House conferees took the position that further studies of this problem would not solve the problem. The Administrative problems of the system are well known to the committee and the Commissioner of Social Security. Hearings have been held on this subject, and the Commissioner is working on a detailed solution to the problem.

The conference agreement does not include this provision.

SEPARATE ACCOUNTING FOR SOCIAL SECURITY TRUST FUNDS

The Senate amendment would require the President in his annual budget message and midsession review to show the revenues, outlays and surplus or deficit estimates for each of the three trust funds and describe the economic assumptions upon which the estimates are based.

The conference agreement did not include this provision because the information is already provided annually to the Congress and the Office of the Actuary of the Social Security Administration releases more detailed information to the committees upon request.

SOCIAL SECURITY CARDS

The Senate amendment contained a provision which would have required that new and replacement social security cards issued more than 190 days after enactment be made of banknote paper and (to the maximum extent practicable) be a card that cannot be counterfeited.

The conference agreement does not include the Senate amendment. The statement accompanying the report, however, does call for the Secretary of HHS to study the costs and benefits to the trust funds of such a proposal, the costs and benefits to other government programs, and the impact of such a proposal on the privacy of individuals. At this time, however, it did not appear to the House conferees that any substantial benefit would accure to the social security program from such a card since the Social Security Administration does not itself use the card for any purpose other than notifying applicants of their social security number.

FUTURE LEGISLATIVE CHANGES IN THE SOCIAL SECURITY ACT

Under present law, Congress has the authority to alter tax and spending provisions. The Senate amendment included a sense of Congress resolution that any future legislative changes in the Social Security Act will not reduce the current dollar amount of monthly OASDI benefits

The House conferees rejected this because current Congresses cannot legally bind the actions of future Congresses.

HIGHWAY TRUST FUND AND HIGHWAY EXCISE TAXES

Under present law, the highway trust fund and its related excise taxes are in place until October 1, 1984. Under the Senate amendment, the highway excise taxes would be extended at present rates for 5 years, until October 1, 1989, and deposits of tax revenues to the highway trust fund would be continued for 6 years to October 1, 1990.

Because the highway trust fund and its taxes are presently in place until October 1, 1984, the House conferees took the position that there was no need to act on these matters now before either the Senate Finance Committee or the Committee on Ways and Means have had hearings on this proposal. In addition, major studies on highway cost allocation and on the present excise tax structure are due early next year from the Departments of Transportation and Treasury (in January 1982 and April 1982, respectively). These studies will allow both

committees to better assess the present tax structure for funding highway programs. Also, it is hoped that the House and Senate Public Works Committees will have agreed on a multi-year highway spending program in 1982 so that the tax-writing committees will be in a position to better assess the financial needs of the trust fund when considering an extension of the Fund and its taxes.

Mr. Speaker, we have a good compromise. I urge my colleagues to support it.

Mr. Speaker, I reserve the balance of my time.

The SPEAKER pro tempore (Mr. KAZEN). The gentleman from Illinois (Mr. ROSTENKOWSKI) has consumed 5 minutes.

The Chair now recognizes the gentleman from Texas, Mr. ARCHER.

Mr. ARCHER. Mr. Speaker, I yield 5 minutes to the gentleman from New York (Mr. CONABLE) the ranking Republican on the Ways and Means Committee.

Mr. CONABLE. Mr. Speaker, I have a frustrating sense of deja vú. It seems that I have stood here before—many, many times—taking virtually the same stance on social security.

We have just completed a conference report that does too little. It solves a problem with respect to the minimum benefit which Congress wanted to solve. But it solves no other social security problem of consequence.

Nevertheless, I have signed the conference report and ask my colleagues to approve it today. I do so because this is the only way the minimum benefit problem can be resolved and because other provisions of the report will force this Congress at least to confront the many larger social security issues within a reasonable time frame, rather than postponing it indefinitely.

The old-age and survivors insurance (OASI) trust fund, which pays benefits to some 30 million persons, is expected to run short of money to make those payments sometime late next year. The actual date being uncertain as long as the economy is in transition. The conference report would permit the OASI fund to borrow from the disability insurance trust fund or the hospital insurance trust fund through next year only. Those two items in combination mean that there is likely to be a lameduck session of the 97th Congress and that the truly tough social security issues may be dealt with then.

That is not a bad idea. It may be the only way to reach an acceptable bipartisan accord on these complex matters. I would rather see us proceed now toward such accord, but the realities of life force me to concede that the conferees probably made the base of an inherently bad situation. Therefore, Mr. Speaker, I am endorsing once again a less than ideal expedient with the hope that this body will take more responsible action within the next year. Perhaps we will have a commission report to act on by the time it comes up again.

Responsible action means, of course, making the decisions necessary to strengthen the system as much as possible over the long-term as well as the short, and structurally as well as financially.

In the past, when responsible action has been requested, sufficient support has not developed. For the majority, it has always seemed easier, and perhaps safer, to vote for doing as little as possible—just enough to prevent the system from sinking—as we are indeed about to do today.

How long we can keep this up, I do not know. By continuing to slap patches on the leaking but still ballooning trust funds, we not only are postponing inevitable decisions on long-range financing. We also are putting off badly needed system improvements, not the least of which are numerous corrections of inequities and anomalies.

To cite some outstanding examples of these unresolved issues, there is the treatment of women, and especially working women, under the system; there are very wide gaps in coverage; there are demographic disparities, which are becoming larger; and there is a whole range of problems in the disability insurance program.

When the social security system was established, our society was centered on the traditional family—a husband, wife, and one or more children. Families were more easily definable, fewer women were in the labor force, and men were generally viewed as the breadwinners.

The social security system was designed in light of the realities of that era. Wives were deemed dependent upon their husbands and did not have to prove that dependency in order to get spouses' benefits. Men, on the other hand, had to prove that they were dependent in order to receive similar benefits.

Working wives, in many cases, were not—and have not—been adequately compensated, as they see it, for their contributions as workers. If benefits based on their earning were low, and they were paid higher amounts based on their husbands' records, they could—and still can—charge with justification that they did not receive full, tangible recognition of their own contributions to the system. In many cases they get no return at all for their own contributions to the system as though they had themselves never worked in covered employment.

These are just a few of the reasons why the Congress should at least try to make corrections, where feasible, in the social security treatment of women. This will never happen until, and unless, social security is addressed in a broader way than this conference report permits.

Ms. OAKAR. Mr. Speaker, will the gentleman yield on that point?

Mr. CONABLE. I yield to the gentlewoman from Maryland very briefly.

Ms. OAKAR. Mr. Speaker, I want to commend the gentleman for his comments about the inequities toward women and his understanding of them. It is very well said.

Mr. CONABLE. I thank the gentlewoman.

Mr. Speaker, ideally, a nation's basic social insurance system should protect all the Nation's workers. We are far from that ideal in the United States—inconsistencies abound.

Why, for example, should the people who make the laws governing social security, and the people who administer those laws, be exempt from social security coverage? More and more of our fellow citizens are asking: If social security is good enough for us—all 117 million of us—why is it not good enough for you 2.5 million who happen to be civilian employees of the Federal Government? I do not have a good answer for that, and I have not heard a good answer from anyone else, either.

Anyone who has thought carefully and seriously about this gap in coverage realizes it is possible for Federal civilian workers to be better off under social security protection, which is much broader than that provided under the various Federal retirement plans. I believe that these plans can be coordinated with social security in such a way that the rights of affected workers would be protected fully and that their financial positions would be improved substantially.

This major coverage gap presents particularly tough problems which should at the least be confronted. They clearly will not go away.

The demographic problems associated with social security are equally real and inescapable. They also will not go away. People are living much longer now than they were when the system was started, and a major breakthrough in finding a cure for any leading disease will stretch those longevity tables even more. We know with a reasonable degree of certainty that there are about three workers for every social security beneficiary now and that the ratio will drop to 2 to 1 at the beginning of the next century, which is only 20 years away.

With that knowledge, we should—at the very minimum—consider taking steps now, legislatively, to adjust the system to those demographic changes so visible in the future.

People need time to adjust their retirement plans, their savings patterns,

and their ways or living. They need as much time as possible.

To know that such adjustments are inevitable, and to deliberately refuse to give adequate advance notice, is unconscionable as far as I am concerned. We do not have to make decisions for a future generation. But we should make those decisions easier. We could do so by scheduling system adjustments, on which a consensus can be reached, attaching in each case a "sunset" provision so that later Congresses would have to act to affirm the earlier decision. This would not lock in any changes, but would cause people to adjust their thinking and planning in anticipation of the possibility of change.

There are other, possibly better, ways of dealing with demographic problems. I am not a strident advocate of any particular way, but I believe the important thing is to deal with the problems, not to pretend they are not there.

As for the disability insurance program, the list of improvements that need to be made is very long. Most of these changes would cost very little, if anything; are relatively noncontroversial, and have been approved tentatively by the Subcommittee on Social Security. Taken as a whole, they would help beneficiaries, make claims handling more efficient, and save money over the long run.

But none of these improvements can be effected unless we produce more comprehensive, responsible legislation.

We can achieve that objective if the leadership of this House will permit those Members who know social security the best, because they work with the subject so closely, to develop and bring to the floor a comprehensive, responsible piece of legislation.

This can be done only on a bipartisan basis. I do not believe an enactable package can be put together if it bears a Democrat or Republican label. But there are enough Members of good will—and reasonably like mind—starting with the Subcommittee on Social Security, which is so well led, to reach a workable bipartisan—or nonpartisan—consensus.

We will, by approving this conference report today, be buying ourselves a little more time to reach that consensus. We will not be evading our ultimate responsibility.

One of the worst mistakes we legislators can make is to assume that the inevitable is always postponable. Collectively, we have made that assumption on social security with regularity. We have been running against mathematical odds, and we are losing the race. That is truly tragic, because the stakes, in terms of both people and dollars, are enormously high.

Eventually, if we stay on this course, we will simply run out of baling wire and the whole system will fall down on our heads. It will collapse either because we actually do nothing, and benefits cannot be paid, or because we let the Treasury start borrowing enough money every year to maintain the benefit pipeline. Either way, the social security system will collapse, and I cannot emphasize that point too strongly. Obviously, when benefits stop the game is over, and using general revenues—which really means Treasury borrowing—will destroy whatever insurance character the basic system has and turn it into another set of welfare programs virtually overnight. That is not conjecture, that is economic fact.

In this light, Mr. Speaker, we should begin to reconcile ourselves to the prospect, however unpleasant, of a lameduck session a year from now, and to a confrontation, at last, on social security.

Meanwhile, I think we really have no reasonable choice other than adoption of this report.

□ 1045

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 5 minutes to the gentleman from Minnesota (Mr. VENTO).

Mr. VENTO. Mr. Speaker, it is with sadness that I have concluded that I must vote against the conference report on H.R. 4331, the Bolling bill, which was intended to fully restore the social security minimum benefit for all current and future beneficiaries. Unfortunately, the conference report signed by the House conferees kills—not restores—the minimum benefit for thousands of future beneficiaries.

There is, of course, a bittersweet victory contained in the conference report. It does restore the minimum benefit for 3 million current recipients and for another 14,000 eligible before January 1, 1982. I do not underestimate the importance of this victory for the House. But, frankly, I strongly believe that the victory could have protected other senior citizens, too, if only the House conferees had not almost immediately abandoned the House position to the tender mercies of the Reagan administration's budget cuts and the Republican Senate. The first offer the House conferees made to the Senate pulled the rug out from under future minimum benefit recipients.

The 404 House Members who voted for the Bolling bill deserve a better conference report than that before the House today. More importantly, the 84,000 senior citizens—who, under the Bolling bill, would have received the minimum benefit in 1982—deserve a better conference report than that before the House today. The hundreds of thousands of senior citizens—who, under the Bolling bill, would have received the minimum benefit in later years—deserve a better conference report than that before the House today. Finally, the millions of Americans—whose confidence in one day receiving their own social security benefits has been shaken by this arbitrary attack on those about to receive the minimum benefit—deserve a better conference report than that before the House today.

Sometimes it's the pain from the most recent injury that dominates our thoughts. But we must not allow this to obscure the history of how Democratic House conferees came to the position of joining their Republican colleagues and a Republican Senate and a Republican President in cutting social security benefits for senior citizens about to retire—some of those retirements scheduled for only 16 days from now.

Shortly before his election, President Reagan said:

> Any reform of the Social Security system must have one overriding goal: that the benefits of those now receiving—or looking forward to receiving—Social Security must be protected, and that payments must keep pace with the cost of living.

A few short weeks after his administration took office, President Reagan took the first step in stripping Americans of those social security benefits he said were sacrosanct. From the beginning, his budget recommendations targeted the social security program for cuts. Specifically, the President called for elimination of the social security benefit that goes to millions of our Nation's poorest people, and elimination of social security student benefits.

This spring, the administration proposed even more severe slashes in social security benefits, and Richard Schweiker, Secretary of Health and Human Services, appeared before the Aging Committee to defend the administration's hard-line position.

The Republican Senate agreed to these social security cuts and with the narrow adoption of the Republican budget reconciliation substitute, Gramn-Latta II, so did a bare majority of the House. In frustration at this abandonment of millions of senior citizens, over 170 House Members from both parties joined in cosponsoring a resolution (H. Res. 197) to defer consideration of the reconciliation bill until after the Senate had agreed to restore fully the minimum benefit for all current and future recipients.

After public opinion began to mount against the administration's posturing on social security, the President issued a carefully worded statement intended to calm the fears of the Nation.

> I will not stand by and see those of you who are dependent on Social Security deprived of your benefits—

Reagan said in a nationally televised speech—

I make that pledge to you as your President. You have no reason to be frightened. You will continue to receive your checks in the full amount due you.

At the same time the President was going before the American people to reiterate his commitment to defend and preserve our social security system, his top aides were pushing for passage of the budget cuts his administration proposed—including elimination of the minimum social security benefit as part of the Omnibus Budget Reconciliation Act (H.R. 3982, Public Law 97-35).

Although some of us were unsuccessful in our effort to stop House floor consideration of the budget cuts bill until after the Senate had restored the minimum benefit, our efforts focused public attention and, through the help of the Rules Committee and its distinguished chairman (Mr. BOLLING), produced H.R. 4331, a bill fully restoring the minimum benefit for all current and future beneficiaries. The House approved that bill 404 to 20.

H.R. 4331 languished in the Senate until mid-October at which time the Senate amended the bill to: Kill the minimum benefit for all future recipients; place a means test on certain current minimum benefit recipients including teachers and others who receive public pensions of more than $300 a month; and lower the family maximum benefit—the amount of monthly benefits which can be paid on the earnings of one worker.

Given the enormous publicity campaign by the White House and the Senate to distort their real actions in killing the minimum benefit, the House can take credit for getting back a conference report that does provide the social security minimum benefit for beneficiaries who are eligible before January 1. Given the strong resistance of the Senate conferees to full restoration for all beneficiaries, the House should take credit for getting the measure of victory that it did.

I must stress, however, my strong belief that eliminating the social security minimum benefit for all those who qualify after January 1 is a betrayal of the Congress responsibility to maintain confidence in the social security system.

What is sacred about January 1, 1982, the day the conference report closes the door on the minimum benefit? Because it is frozen at $122 a month, the minimum benefit will die a natural death with the passage of time. Why should 7,000 people whose birthdays fall next month lose their minimum benefit when those born a month earlier receive it?

As Speaker O'NEILL said last July:

The Administration has sent a clear message: If it can cut off one group from social security, it can cut off another group. One day it attacks the minimum benefit. The next day, it attacks those retiring at 62. The principle is the same. If it can cut the checks of one group, it can cut the checks for another. I disagree with this Administration. The House of Representatives disagrees with the Administration. We don't agree that the best way to save Social Security is to hurt those who depend on it. We don't agree that the best way to build support for the system is to tear it down."

In all candor, I believe that the House this summer, and its conferees this fall, could have avoided this elimination of the minimum benefit.

I am voting against the conference report because it is an unacceptable compromise of the House position. On July 30, the House expressed its overwhelming support for the minimum benefit by a vote of 404 to 20. We went on record against cuts in social security for our poorest senior citizens, those who are most in need. Although the conference report before us gives the House 85 percent of what it wanted—I don't think it is good enough and I plan to vote against it.

If we pass this bill we will be denying 7,000 people a month—84,400 people a year—of benefits which they have every legitimate right to expect to receive. I think it is wrong to deny benefits to persons close to retirement age and I think the American people support my view. A recent Harris poll on social security found that 85 percent of those people surveyed opposed cuts in future social security benefits.

This conference report does make some exceptions in future minimum benefit eligibility. It stipulates that those involved in religious orders such as nuns or priests who take a vow of poverty will remain eligible for the minimum benefit. This raises a very important question: Does one who is poor by choice deserve better treatment that one who is poor by accident? Is a nun or priest more entitled to the minimum benefit than a woman who has worked scrubbing floors for low wages? I say, let us continue to honor the eligibility of both.

Mr. Speaker, I also want to address the cost of restoring the minimum benefit for the over 400,000 retirees who would become eligible for the minimum benefit in the next 5 years. The savings estimate for eliminating future minimum benefits is $685 million. But this does not include the added social security administrative costs and the offsetting increases in SSI, medicaid, and State welfare costs. According to testimony we heard in the Aging Committee hearings on the minimum benefit, it actually costs more to eliminate the minimum benefit than to maintain it.

It is also important to emphasize that the cuts contained in this conference report will not solve the problem of social security's inflation-tattered, recession-ridden wage base. Rather, let it be clear that social security is not the cause of the projected $150 billion deficit we now face in fiscal year 1982. As a matter of fact, social security has stood on its own two feet financially for the past 45 years and is capable of doing so in the future. Social security is as sound as the administration and Congress want to make it. This is its greatest strength and, as this Congress and this President have demonstrated this year, its greatest weakness.

The conference report before us also forces the payment of the social security tax on sick pay. Clearly this will deter some employees and employers from providing sick pay coverage. As the cost of adequate compensation increases, the inevitable result will be to reduce sick pay coverage. Ironically, without sick pay for workers, what happens is that costs increase for social security disability benefit, workers compensation, and public assistance. Is increasing these costs prudent? It may save money in the funny figures of OMB, but what about the long-range implications? I suggest that the sick-pay change is another bogus savings.

I note that most arguments in favor of imposing the social security tax on sick pay refer repeatedly to the fact that most large corporations already pay the tax on sick pay and, therefore, Congress should force all small businesses to do the same. Apparently this fits in with our new national policies of merger approvals and tax cuts for the big corporations while small businesses are forced to take the heat from inflation and high interest rates. Has anyone considered the impact of the sick-pay change on our labor-intensive, credit-sensitive small businesses? Or will these businesses continue to be an afterthought or, more importantly, merely a bankruptcy statistic?

It was not any surprise that the conference committee wanted to avoid sending out the mandated notices in early December. These notices would have gone to current minimum recipients—3 million people—informing them of the potential loss of benefits under the Republican reconciliation bill. We can be sure that these older families would have reacted to the notices, and their reaction would certainly have prompted a reversal. More importantly, those notices would have exposed the actions of the Congress and the administration in a most dramatic way.

It almost seems that the House and Senate were involved in a legislative game to see who would blink first, and the House blinked almost before the gavel fell to open the first conference committee meeting.

Why are we so weak in spirit when we support social security, the most successful of programs that this Congress has ever written, a program that continues to enjoy overwhelming public support. When we chip away at social security, as this conference report before us today does, we de-

stroy much more than the benefits for a few hundred thousand workers.

Indeed we call into question the social compact between workers and the retired that has persisted for the past 50 years and we destroy the credibility of this Congress. If we cannot stand up and fight for social security, are there any programs or commitments that people of this Nation can count on?

Mr. ARCHER. Mr. Speaker, I yield 5 minutes to a respected member of the subcommittee, the gentleman from Ohio (Mr. GRADISON).

Mr. GRADISON. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, most Americans are apprehensive about their social security system, and approval of this conference report today is not likely to make them feel more secure.

Nevertheless, I have signed the report and urge my colleagues to join me in voting for it. Frankly, I think the conferees' decision made the best of a bad situation and leaves us with no viable alternative.

If we do not approve the report the administration will have to move ahead with plans to stop paying the minimum benefit to those now receiving it, thus doing what the Congress and the President have agreed not to do. If we do approve the report, the minimum problem will be solved, and the stage will be set for a lameduck session of this Congress, when basic social security issues can, we hope, be settled in a bipartisan way. Not until then can the American people feel comfortable about their social security system's future.

Virtually every public opinion poll that has been conducted on the subject in recent years shows that a majority of our fellow citizens are uncertain now about the future of social security. They express doubt that the system will survive and are fearful that the trust funds may run out of money before they become eligible for benefits. This is particularly true of younger contributors to the system. For example, in a survey conducted by Lou Harris for the National Council on the Aging, 68 percent of persons age 18 to 54 expressed "hardly any confidence" that social security would be able to pay them benefits when they retired.

In another survey conducted for the recent National Commission on Social Security, 61 percent of the working population that was interviewed expressed little or no confidence that enough money will be available to pay their retirement benefits. Three-fourths of those interviewed were between ages 25 and 44.

That same survey, which was based on in-depth interviews, showed that most Americans also hope that events will prove them wrong, because they want social security to survive. They are worried about its future, but they wish very much to have it continue. They are even willing, according to this poll, to increase their contributions if necessary to keep the system going. They would prefer not to do so, of course, but they would rather pay more in FICA taxes than see the system collapse.

In an earlier study by Lou Harris, three-fourths of those interviewed said they wanted social security to operate more as it originally was enacted; that is, essentially as a retirement program, with basic benefits to be supplemented from other retirement income sources.

Polls and surveys tell me, Mr. Speaker, that a majority of Americans want their social security system to be placed on a sound financial basis as far into the future as possible. They want its insurance character not only to be retained, but to be strengthened. They clearly do not like the idea of social security benefits being based on need. They prefer the earned-right concept.

With these samplings of public opinion as background, Mr. Speaker, I simply do not see how this House can fail to pass the conference report on H.R. 4331 and then act responsibly on larger social security issues in 1982.

The Subcommittee on Social Security already has made long strides in that direction, and only a few more steps need be taken. Admittedly, they are the issues most difficult to resolve, but they can be negotiated if the leadership here will give us a "green light."

Virtually every member of our subcommittee has well-thought-out views on strengthening social security. I have developed a comprehensive plan in which I have great faith, and I would be delighted if my colleagues would support that plan in its entirety.

But I know that accommodation, and "give and take" are essential to the future of the social security system. And I am confident that other members of the subcommittee feel the same way.

Therefore, Mr. Speaker, I urge my colleagues to vote for this conference report. It will help us buy time, time we must use to produce a responsible and acceptable alternative to repair our financially ailing social security system.

Our fellow citizens will be watching us carefully, Mr. Speaker. They will be able to detect the difference between a vote to strengthen social security and a vote to keep it weak.

Mr. COLEMAN. Mr. Speaker, will the gentleman yield?

Mr. GRADISON. I yield to the gentleman from Missouri.

Mr. COLEMAN. Mr. Speaker, I rise today in strong support of the conference report on H.R. 4331. Restoring the minimum social security benefit to all who now receive it, or who will qualify for it this year, is the surest, most concrete way to back up the assurances we have all been making to our senior citizens. Congress and this Nation must stand behind past promises made to now retired Americans when they paid into the social security system during their working years. They deserve no less from us.

Mr. Speaker, let us also remember that the difficult long-term financing questions, as well as the system's short-term difficulties, still remain before us. These are questions we must face up to in a serious and thoughtful manner. We have to make sure that today's workers will receive fair and decent social security benefits when they retire, and that the promises we are making through the benefit structure are ones we can reasonably expect to fulfill.

The interfund borrowing allowed by this legislation, while it does not solve any problems, does nevertheless give us time to address these issues. I am hopeful we can use this opportunity to conduct the informed national dialog that is needed, without causing needless trauma to the 36 million Americans who now receive monthly social security checks or those who are nearing retirement age. It is utterly unacceptable to leave these people in perpetual terror that the rug will be pulled out from under them. Let us now work together toward a genuine, permanent solution to social security's financing problems, both immediate and long-term, so that once and for all, we can lay these fears to rest.

I urge my colleagues to join with me in supporting the conference report.

□ 1100

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 6 minutes to the gentleman from Texas (Mr. PICKLE), the chairman of the Subcommittee on Social Security, who has done an outstanding job in this area.

Mr. PICKLE. Mr. Speaker, to the Members of the House and to those 3 million elderly citizens of our land who now will have their minimum benefits restored, Merry Christmas. The House has at last and finally, by the enactment of this conference report, put to rest the question of the minimum benefit. To that I say "hallelujah, praise the Lord, and Amen."

We have come at this thing the hard way. I take satisfaction in knowing that we have restored the minimum benefit for our elderly citizens, most of whom are quite elderly and most of whom are female. That is the compassionate and the right thing to do.

I also take the satisfaction in knowing that this part of the conference committee report is in effect the same position taken unanimously on a bipartisan basis by our subcommittee in May. It was not an easy decision then

and it is not an easy decision now to make any kind of changes. But I think we can come to the floor today and say to all Americans who have been receiving this benefit, "You will receive it permanently from now on." That is the kind and proper thing to do.

So that is the first thing this conference report does. It restores the minimum benefit for 3 million people, and we must not lose sight of the fact that that is the principal thing it does.

Another important thing that it does is it establishes for the first time the principle of interfund borrowing. That is not an approach I like to advance, although I recommended it as part of my bill at the first of the year in order that it would be part of the overall package. Nevertheless, for the first time in the history of the social security program we have established the right of interfund borrowing, but wisely we have limited it to 1 year. We have said that after December 31, 1982, we cannot rely on using the interfund borrowing process any further, and within a few months of that time, if not in 1982, we must then face the critical issues of making some permanent solution to the social security program.

That is our challenge and our responsibility, and really it is one of the greatest challenges of any Congress. This was made evident to us when the new medicare numbers came out, involving a mere 3-percent change in medicare outlays for 1 year. It will be made evident again and again as the budget comes out in January, the social security trustees report comes out in early summer, the midsession review arrives, and as press reports appear throughout the year on meetings of the Statutory Advisory Council and/or the President's task force.

All the estimates show the trust funds, even with interfund borrowing, going steadily downward. All three funds together can make it as far as 1986 or 1987 if we look through rose-colored glasses and what we see actually comes true in every single year, in every single detail. But all three funds could also go under as early as late 1983.

Our chances of hitting any projections that have been made are nil. We may be above or below, but we will not be on the mark. As late as 1979 we were projecting 7.4 percent CPI and 0.6 percent real wage growth for last year. Last year we had 13.5 percent, not 7.4 percent, CPI, and we had minus 5 percent, not plus 0.6 percent, real wage growth. The problem which the new medicare numbers showed us is while we are using projections which we know will not be exactly on the mark, we have no room for error.

Putting aside projections, we do know that actually to go broke in 1984 we need only have minus 1-percent real wage growth—which we now have. Or we need have 12-percent inflation, and inflation the last 4 months has averaged 11.1 percent. Or we need medicare expenditures rising at 23 percent, and for 1980 they did rise at 21.4 percent. Or we can have any combination of these at lower numbers. And now we must factor in higher levels of unemployment, which will sharply lower revenues into the funds.

My friends, if we cannot take our warning from those simple facts, then we just are not looking after the social security program. We came close recently in the committee to taking steps to address the long-term problem in social security, and I am encouraged that this Congresss will address this problem. I recognize that the process of solving the real problems in social security has been delayed. I would hope, however, that we will use the short respite here to continue working on fuller solutions to the problems facing the social security program.

In one national poll taken in September, 82 percent said they felt it necessary for Congress to revise the financing of social security in the next year or so; and 77 percent said they felt it necessary for Congress to revise the benefits in the next year or so.

I will continue to propose that we break out of this fearful standoff and recognize that it is the social security program itself—not any of us—that the people really care about. We must do right by that program. We must make it sound, and that is what I will continue to try to do, as I know will my colleagues on both sides of the aisle.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. PICKLE. I will yield later, I say to the gentleman from California.

Mr. Speaker, I commend the chairman of our committee, the gentleman from Illinois (Mr. ROSTENKOWSKI), and I commend the ranking Republican member, the gentleman from New York (Mr. CONABLE), for their cooperation in this conference and for helping to give us the best conference report that I think we could have. I hope that every Member will vote for this conference report.

Mr. Speaker, I now yield to the gentleman from California (Mr. ROUSSELOT).

Mr. ROUSSELOT. Mr. Speaker, I appreciate the gentleman's yielding.

Do I understand, then, that the passage of this bill or this conference report will not solve the long-range problem of financing the social security system?

Mr. PICKLE. No; it will not. That is correct. We will have to meet that problem head on at a later date.

Mr. ROUSSELOT. This Congress has to come back sometime darned soon and reform the system?

Mr. PICKLE. We intend by this conference report to say to the Congress that by the end of 1982 or in early 1983 some meaningful reforms in the social security system must be made. That is the challenge that we face.

I think it is important to note that in this conference we did not accede to the Senate's request that we pay for the restoration of the minimum benefit with a sharp reduction in family benefits. The Senate had proposed that as one means of raising funds. We objected to it and fought it down, and that is not included in this bill. That is a good victory for all of us.

There will be some who might object to the inclusion of interfund borrowing in any form in this bill, and in a sense they are correct, because we should look at the financing picture as a whole and not piecemeal.

There may be others who will object to the short timeframe on the interfund borrowing as it is contained in the bill, and they are correct that we are forcing the hand of the Congress to do something about this soon. There are others who might object to the inclusion of the tax on the first 6 months of sick pay, and they are correct, because our primary purpose here is not to get into other issues but to correct the minimum.

I would hope that in our fears, discomforts, and disagreements we will not lose sight of the primary purpose of this conference report. This bill does correct the earlier action on the minimum benefit. This bill also allows the retirement fund to borrow money from the other social security funds next year, because we all know that by the end of 1982 the retirement fund will be so low in reserves that we will not be able to pay full benefits.

We have no alternatives. I say at this juncture that the interfund borrowing, as much as I do not like it, serves a single purpose of allowing us to continue payments while we work on more lasting solutions.

The SPEAKER pro tempore. The time of the gentleman from Texas (Mr. PICKLE) has expired.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 1 additional minute to the gentleman from Texas (Mr. PICKLE).

Mr. PICKLE. Mr. Speaker, the principal objection that some of the Members have to this conference report is that this does away with the minimum benefits for future recipients, and that is correct. There are only from 5,000 to 7,000 a month who will be eligible for this minimum benefit in the future. Three million people will have it restored by this action.

We ought to keep in mind the fact that most people in the future will get through normal wages higher benefits than they would under the minimum benefit. In fact someone who had worked under social security only at a minimum wage level for 13 years and retired this year at age 65 would get

$278 per month, far higher than the minimum benefit. Even if he retired at age 62 he would get $225 a month, still well above the minimum level. A person earning $7,000 a year or so in 1980 would get more than the minimum benefit. So we are not really being that harsh or unfair to future recipients.

It is also important to realize that the new beneficiaries in the future will be recipients who are part-time or intermittent workers—the double-dippers or the Government employees who have only minimal coverage under social security.

Forty percent of future minimum beneficiaries will be dually entitled—that is to say they are spouses or other individuals whose primary social security benefit will come from the main worker in the family. When their minimum benefit level goes down they will suffer no loss of income at all because their spouse benefit will go up.

We should also keep in mind that we do have the special minimum benefit bracket which goes to at least 400 new people a month. They are the long-range, low-wage earners. So we are really not being that unfair when we look at the figures and see that anybody who is only earning $7,000 a year or who will still get a benefit higher than in the minimum. Finally we should keep in mind that the numbers eligible for the minimum will decrease in the future as that benefit plays less and less of a role in the social security program.

The SPEAKER pro tempore. The time of the gentleman from Texas (Mr. PICKLE) has again expired.

Mr. ARCHER. Mr. Speaker, if the gentleman wishes further time, I yield 1 additional minute to the gentleman from Texas (Mr. PICKLE).

Mr. PICKLE. Mr. Speaker, I thank the gentleman.

Mr. Speaker, I can understand the concern of some who would like to have had a better conference. We would like to go to the conference on 10 issues and win them all. The House won 8 out of 10 issues, and that is a pretty good percentage.

The main thing is that we did restore the minimum benefit for all those who are receiving it. In the future the only people affected will in almost all cases be those who are intermittent workers.

We should keep in mind that 98 percent of the minimum benefit people are being taken care of in this bill. We could only argue that less than 2 percent in the future will feel that their benefits might be cut. We would not want to cut anybody, but we have got to look at the overall problem.

So again, Mr. Speaker, I recommend the conference report, and I commend the members of the subcommittee for the work which was done earlier, because I think now we must look to the future. We must resolve to ourselves that on a bipartisan basis we will try to find an answer to the social security problem. There is no more important domestic issue facing the American people today than our social security problem.

Mr. Speaker, this is a temporary stopgap, but it is an important step to take, and we must take it. I hope we take the step unanimously.

Mr. ARCHER. Mr. Speaker, I yield such time as he may consume to the gentleman from Virginia (Mr. BLILEY).

Mr. BLILEY. Mr. Speaker, I rise in support of the conference report on H.R. 4331. The final agreement reached is an indication of the kind of unity we need to secure a long-term solution to the social security funding crisis. On the whole, the agreement symbolizes a desire by this Congress to tackle the serious problem we are faced with, in a sound bipartisan manner.

I would like to commend my colleagues who served on the conference for their efforts toward a sound bipartisan solution to the funding crisis. We have a long road ahead of us in achieving our ultimate goal of establishing social security upon a stable financial base. The agreement before us today is the first step toward achieving that goal.

I am convinced that by working together we can find a sound bipartisan solution to the social security problem, together we can make social security better meet the needs of the elderly and disabled—those for whom social security was originally designed.

Therefore, I urge my colleagues to join me in agreeing to the conference report on H.R. 4331, restoration of social security minimum benefits.

Mr. ARCHER. Mr. Speaker, I yield such time as he may consume to the gentleman from Florida (Mr. YOUNG).

Mr. YOUNG of Florida. Mr. Speaker, I rise in support of the conference report.

Mr. Speaker, with the approval of the legislation before us to reinstate the minimum social security benefit, we can end 1981 with an encouraging signal to the many older Americans who were needlessly frightened throughout the year by reports that we would reduce their benefits.

Our action today will reaffirm the fact that we will not allow the benefits of those social security recipients currently on the rolls to be reduced. Such a reduction would be unjust and unfair and would be a breech of our commitment to the retired workers of America, who have budgeted very carefully for their retirement.

It is also my hope that we learn a lesson from our action today. I hope we learn once and for all that we cannot approach social security legislation bit by bit, as we have done in first eliminating and then restoring the minimum benefit. As I stressed in July, when we first voted to reinstate the minimum benefit, we must approach social security legislation in a responsible and businesslike fashion.

The legislation we consider today was approached neither responsibly nor businesslike. This body voted to reinstate the minimum benefit in July, and the Senate concurred, in principle, less than expeditiously in October. Two months later, we finally have received the conference report.

Throughout this period, the 3 million older Americans who rely on the minimum benefit have been forced to wait in limbo, not knowing if they would continue to receive their benefits. Today we can brighten this holiday season for them, and for all of the Nation's 36 million social security recipients, by showing that we do understand their needs and that we will take no action that would in any way result in financial hardship. This reassurance is the least we can do for these retired workers, who through years of labor, have made our Nation what it is today.

Mr. ARCHER. Mr. Speaker, I yield 5 minutes to the gentleman from California (Mr. ROUSSELOT), another respected member of the subcommittee.

Mr. ROUSSELOT. Mr. Speaker, I rise in opposition to H.R. 4331 as it was passed out of conference because it is nothing more than a big legislative copout. There is absolutely no reason that this Congress cannot address the real problems facing the social security system and enact comprehensive legislation to restore the financial soundness of this program which serves one out of every seven Americans.

The fact is that social security's financial problems are not new. These problems will not go away. The program has been operating in the red for the past 6 years. Although we have been aware of this, Congress has not acted to restore the financial integrity of the system. H.R. 4331, as it has come to us from conference, falls far short of addressing the basic problems facing social security.

First, with passage of H.R. 4331 the social security system will continue to accumulate deficits. Presently, the system is losing $12,300 every single minute of every day. H.R. 4331 does not address this fact at all. I would like to ask my colleagues how many of them would invest in a system that is losing $12,300 every single minute of every day. I do not think any Member would voluntarily participate in a program that is operating with a daily deficit of over $17 million. Yet that is the very extent of the financial problem which the social security system is presently facing. We are forcing 115 million working Americans to pay taxes into a system that has operated

in deficit for 6 years and also faces a deficit as large as $80 billion over the next 5 years.

Second, H.R. 4331 fails to establish a prudent level of trust fund reserve balances on which the system may rely during unanticipated occurrences.

Throughout the past decade trust fund reserve balances have been drained until today they are at their lowest levels ever (reserves as a percent of outgo). At the beginning of this year, just over 2 months of reserves remained in the system. This greatly contrasts with the 12-year reserve level of 1950 or even with the 1-year reserve level of 1970. Now some may feel that it is not essential to have exactly 1 year's worth of reserves in the system. This point is up to dispute. But one thing is certain, when the system is drained down to a few months of reserves, it becomes vulnerable to unanticipated fluctuations in the economy which may occur.

The point is that in the past, it has been the high trust fund reserve balances which have seen us through unanticipated economic downturns. However, today, with trust fund balances at their lowest level ever, we no longer can depend on that cushion. I question the prudence of our failure to address this problem in H.R. 4331.

A third consideration that is neglected in this measure before us is the system's long-term deficit, over the next 75 years, of $1.6 trillion—this is almost twice our national debt. Future beneficiaries certainly have much to be concerned about in regard to their benefits. Since we are aware of this deficit, we should responsibly begin consideration of steps which insure that we may allow for a smooth phasein of any changes that may be necessary. Furthermore, in 50 years, one out of every five Americans will be over 65 years of age. Careful consideration will have to be given in order to meet the concerns and needs of those who will be retiring in the next century.

And finally, H.R. 4331, even viewed as a quick-fix, fails to address the loss of public confidence in the social security system. This lack of confidence has resulted in a large degree from the periodic financial crises that have occurred.

A New York Times CBS poll showed that 54 percent of the American people no longer believe that the social security system will have the money available to pay them the full benefits they would be entitled to at retirement. For those polled 25 to 34 years of age, 75 percent doubted that social security will provide full benefits for their own retirement.

We must provide for long-term reforms that put the system on firm financial ground. In this way we can assure the 115 million contributors to the system and the present 36 million beneficiaries that they will be able to depend on social security in their time of need as a base of financial support.

And so I believe it comes down to a question of congressional responsibility. Unfortunately, Congress has not acted responsibly in overseeing the social security system. We have not been the protector of the program. Its present financial state is testimony to this. As I have already stated, the program has been operating in the red for 6 years. Although we have been aware of this, Congress has not acted to restore the financial integrity of the system.

Our main objective today should be to insure the continued stability of the social security system. Its problems will not go away by our sweeping them under the rug—and that is exactly what this bill does. All we are doing is buying time; time that the system does not have.

H.R. 4331 is a stopgap measure at best. By not addressing the problems I have mentioned we are shirking our responsibility as elected representatives. We know what the problems are, we have several options from which we may choose—as advanced in the Senate Finance Committee and the House Ways and Means Social Security Subcommittee. All that is lacking is our congressional action. It was the Congress which originally enacted social security and it is the Congress which must continue to protect it as a viable, financially sound social insurance system.

I must warn my colleagues that evasive and dilatory action cannot persist without severe consequence to millions of beneficiaries who depend upon their earned social security benefits. We can be certain that by delaying our legislative decisions they will not become any easier. And so I must oppose H.R. 4331 on the basis that it is not responsible legislation.

Mr. GILMAN. Mr. Speaker, will the gentleman yield?

Mr. ROUSSELOT. I yield to my colleague, the gentleman from New York.

Mr. GILMAN. Mr. Speaker, I thank the gentleman for yielding, and I support the remarks of my colleague from California (Mr. ROUSSELOT). I rise in opposition to the conference report on the social security minimum benefit restoration, H.R. 4331.

While I recognize that the conferees faced a difficult uphill battle and did partially restore these important social security benefits, I must express disappointment in their inability to achieve a full restoration of minimum social security benefits and were only able to restore the benefits for those who retire before January 1, 1982.

The House overwhelmingly passed H.R. 4331, expressing its view that we erred in going along with an abrupt termination of these benefits at the time that we passed the Reconciliation Act. I submit that we need more than this bill to keep faith with those older Americans who deserve, and have depended on, social security minimum benefits.

Mr. Speaker, I intend to continue to work with my colleagues on both sides of the aisle who seek responsible long-range solutions to strengthen and stabilize our social security system and who support minimum social security benefits, so that we may eventually restore these benefits, and allow those who have earned their social security benefits to receive their benefits at reasonable levels, in a dignified manner.

Mr. ROUSSELOT. Mr. Speaker, I thank the gentleman from New York (Mr. GILMAN).

Mr. Speaker, I believe it comes down to the question of congressional responsibility, and I think we have failed that test.

The SPEAKER pro tempore. The time of the gentleman from California (Mr. ROUSSELOT) has expired.

□ 1115

Mr. ROSTENKOWSKI. Mr. Speaker, I yield such time as he may consume to the gentleman from New York (Mr. LUNDINE).

Mr. LUNDINE. Mr. Speaker, I rise in opposition to the conference report on H.R. 4331, a bill to restore minimum benefits under the social security program. The report does not go far enough in implementing the clear intent of the House to continue minimum benefits to all current and future social security benefits.

On several occasions this session, the House has expressed its intent to preserve the minimum social security benefit. In action on this legislation in July, the House voted 404-20 to continue minimum benefits not just for certain groups of retirees, but for all current and future social security recipients.

On each of these occasions, I voted to retain the minimum benefit because I firmly believe that continuation of this benefit is both necessary and desirable. The minimum benefit offers the pledge that any worker who qualifies for benefits under social security will receive sufficient monthly payments to guarantee a decent retirement. This guarantee has been a basic and long-standing promise of the social security program.

By restoring the minimum benefit only for current beneficiaries, the legislation deprives future retirees of this guarantee. It violates the basic compact between the Federal Government and workers that, in exchange for years of FICA tax contributions, a decent level of support will be provided in retirement. We cannot eliminate this key guarantee without undermining the support and confidence of cur-

rent workers that is so critical to the future of the social security program.

My vote against the conference report is therefore not an expression of opposition to continuing the minimum benefit, but a call to return this legislation to conference so that a compromise can be obtained that is more in line with the House position on this issue.

I think it unfortunate that several needed provisions have been added to this legislation by the Senate in an attempt to buy House votes to end the minimum benefit. Certainly there is a need for the procedures in the bill to help curb the continued payment of benefits to prison inmates and deceased beneficiaries. Moreover, the provision permitting unqualified borrowing between the three social security trust funds is a change I have long advocated and strongly support.

However, this is clearly not the vehicle to make these changes. The House version of H.R. 4331 provides only for the restoration of minimum benefits for all current and future beneficiaries. The Senate action to add major program changes to the legislation is not only unnecessary, it violates the pledge made by President Reagan in September that no changes in social security benefits would be considered until after a special task force on social security had provided specific recommendations to Congress.

Mr. Speaker, while I think it is imperative that legislation is adopted that restores the social security minimum benefit, the provisions in the conference report before us are unacceptable. I urge my colleagues to defeat the report and send it back to conference for further consideration of the House position on this issue.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield such time as he may consume to the gentleman from Ohio (Mr. MOTTL).

Mr. MOTTL. Mr. Speaker, I want to associate myself with and endorse the remarks of the gentleman from Minnesota (Mr. VENTO), and ask my colleagues in the House to vote "no" on the conference report. We do not want two groups of senior citizens: One group that is lucky because they were 62 years of age before January 1, 1982, and the other unfortunate group that was 62 years of age after January 1, 1982. The conference committee can do better than this for our poorer senior citizens.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 4 minutes to the gentleman from Missouri (Mr. GEPHARDT).

Mr. GEPHARDT. Mr. Speaker, I rise to support this conference report and urge Members to vote for it. I also would like to point out that while this does not solve all of the problems of social security, I think a review of the chronology of the events surrounding this issue give us some sense of why we find it so difficult to deal with this issue.

Here we have a minimum benefit that is about $122 a month to people who for some reason did not qualify for a higher benefit.

On February 18 the White House released major details about its program for economic recovery and in that they completely cut out the minimum benefit as part of their budget proposal.

In June, on a bipartisan basis, the Subcommittee on Social Security of the Ways and Means Committee knocked out the minimum benefit prospectively but restored it and kept it on a retrospective basis. Everybody on the subcommittee I am aware of voted for that bill.

We then came to the floor in reconciliation. The Rules Committee asked for a rule that would allow a separate vote in Gramm-Latta on that question. That was refused and there was only an up or down vote on Gramm-Latta. In Gramm-Latta, as my colleagues know, the minimum was knocked out completely, retrospectively and prospectively, a position which, to my knowledge, nobody endorsed in the Congress but, indeed, that was the position the Congress voted for by voting for that bill.

Then in September, after a lot of argument back and forth, the President got on television and said we ought to restore the minimum benefit.

Now here we are 2 or 3 months later finally getting that done on the very same basis which we did it in the Committee on Ways and Means 8 or 9 months ago.

If we have this much trouble in the Congress dealing with an issue that is so clear cut as this one, I ask my colleagues how are we going to deal with social security in the overall if we cannot be more honest with one another, if we cannot deal with facts better than that, and if we cannot really sit down and try to deal with what is here rather than what we want some people to think is here.

While I am on what is here, I think it is important to note what has happened to social security in the last year. All we hear is we are not doing anything with the program. Perhaps we have not done enough. Perhaps we are going to have to do more, and I hope we can, even though I am discouraged by the chronology on this event.

But in the last year we have cut the minimum benefit; we have cut benefits for students. We have cut disability benefits. We have rounded benefits to save money. We have knocked out money for people that are getting workmen's compensation and social security. And we have done something with the earnings test to save money. Over the next 5 years we are going to save $22.4 billion for the trust funds from what we have done to social security this year.

All we continue to hear about is the charge on one side that we are not doing this and then a charge on the other side that we are not doing that.

I would suggest the only way to deal with social security is to lower the rhetoric, to deal with the facts, to be honest with one another, to say it like it is, and to not continually play legislative and political games with the most important program to the elderly people of the United States and, I would say, to the people of the United States.

Mr. Speaker, I yield back the balance of my time.

Mr. ARCHER. Mr. Speaker, I yield 3 minutes to the gentlewoman from New Jersey (Mrs. ROUKEMA).

Mrs. ROUKEMA. Mr. Speaker, I rise in support of the conference report on H.R. 4331, a bill to restore the social security minimum benefit.

Mr. Speaker, for some months now it has become apparent that Congress did not intend to totally eliminate the minimum social security benefit for current recipients. Last July, the House voted to reinstate the minimum benefit for current beneficiaries, and today's conference report is the culmination of several months of difficult negotiations by the social security conferees. I think that, on the whole, they have done a good job and are to be commended for their balanced approach to this difficult issue.

I believe this bill shows compassion for those who are receiving the minimum benefit and for those in great need. At the same time, it recognizes the need for reform within the system. Certainly we still have a long way to go toward a social security reform bill that will restore the fund to a sound financial basis for present and future retirees. This is a step in the right direction.

Mr. Speaker, this bill makes essential corrections by restoring the minimum benefit for current beneficiaries and those who will retire by December 31. In addition, it permits interfund borrowing until the end of 1982, which is at least a temporary, positive in keeping the system solvent.

The bill will also tighten reporting requirements relating to convicted felons who are in prison. In addition, it requires the Secretary to report on what actions are being taken to prevent deceased recipients from continuing to receive benefits. These are all reforms that legitimately and rightfully concern people, and I congratulate the committee and the conferees for addressing themselves to these issues.

In reviewing this bill in its entirety, we should note several important points: First, it keeps the faith with our elderly minimum benefit recipients by restoring a benefit they had

counted on—and received—for many years. At the same time, it limits future beneficiaries to a sum related to the amount they actually put into the system; second, it permits interfund borrowing to help get us through the short-term deficit; third, it is the first step toward financial responsibility because it tightens reporting procedures relating to waste and fraud; and fourth, it presents the beginning of a reform process that will protect the benefits of current and future recipients while, at the same time, returning the social security system to a sound financial basis. This generation and future generations cannot afford to be held hostage by the politicization of this issue; we owe them no less than a social security system that is sound and stable.

Mrs. FENWICK. Mr. Speaker, will the gentlewoman yield?

Mrs. ROUKEMA. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Speaker, I thank my colleague for yielding. I would like to associate myself with her remarks.

Mr. OXLEY. Mr. Speaker, will the gentlewoman yield?

Mrs. ROUKEMA. I yield to the gentleman from Ohio (Mr. OXLEY).

Mr. OXLEY. Mr. Speaker, it is well past time to begin addressing the serious problems facing the social security system. So far we have taken no more than a band-aid approach aimed at temporarily patching up the system rather than addressing the severe financial drain facing the three trust funds. Even under optimistic economic assumptions, the old-age and survivors insurance trust fund, the largest of the three, will have depleted its reserves and will be unable to pay timely benefits to over 32 million people by 1983, and perhaps as early as fall of 1982. Financing of the disability insurance and hospital insurance trust funds will remain sound probably no later than 1986. We must act now to avert financial disaster for the social security system.

I am encouraged by the fact that a task force has been appointed at the President's request to study and develop solutions to the social security problem. However, I fear that these solutions may come too late. We cannot afford to waste more valuable time while the social security system continues to lose $12,000 a minute. The time to act is now.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 5 minutes to the gentleman from Florida (Mr. PEPPER).

Mr. PEPPER. Mr. Speaker, I warmly commend our committee for what it has accomplished in this conference, against all of the pressure of the administration and the other body. You have made this a happier Christmas for about 3 million of our fellow Americans who anticipated that by the action we had previously taken under the duress of the administration they would not get their minimum social security check after the first of March of next year. The House conferees also rejected the provision in the Senate bill, proposed by the administration, installing a family cap which would have taken $1.4 billion out of the pockets of social security recipients. So I commend our conferees for what they have achieved. They have fought off efforts on the part of the other body to make many more vicious cuts in the social security program.

But regrettably, and I am sure the regret was no more poignant anywhere than in the minds of those conferees who are so dedicated to the elderly people of this country, it was at the expense of 7,000 people a month after January 1 who will not get the $122 a month minimum that we have restored to the 3 million elderly people of this country. They are the hostages who had to be given up for the benefit of the others.

This reminds me of a visit by my wife and myself to a English home a few years ago where the only son and daughter had departed to the war and never returned. In the great hall of that home were these words:

> You who come here
> go home and say
> we gave our tomorrow
> for your today.

Was it necessary that they give their tomorrow, these 7,000 people a month who were those people who were covered by the social security program, who paid into it for their 25 quarters, or who would have had their entitlement January 1 of next year? But that is a part of the price that we are having to pay for the resolve of those highest in authority in this Government, that the way to approach the social security problem is to cut benefits.

We have proposed means by which this program can be saved and it is easily done. But it seems the administration can see no alternative but cut benefits. As the gentleman from Missouri has just said, they have already this year cut benefits equivalent to about $19 billion over the next five years, even giving them credit for the restoration of the $6 billion which we restore in this conference report.

These cuts are only the tip of the iceberg. The administration has pending before the Congress recommendations for further cuts that would equal $37 billion a year for the next 75 years.

When we talk about permanent solutions for social security we have to make up our mind about one single thing. Do we want to solve the problems of social security by cutting benefits or do we not?

The other day Lou Harris released a nationwide survey about social security. He said if there is one fact unequivocally established in the minds of the American people, it is their support of the social security system, not only from the old but from the middle-aged and the young. Overwhelmingly, Americans of all ages support the current level of social security benefits, ever to the extent that they are willing to pay higher taxes for it. What concerns me is what the young people say:

> What will I get out there at the time of my entitlement if they are playing, as they are today, with the figures about future social security benefits for those whose rights have not yet been vested?

So we are playing on dangerous grounds here in jeopardizing the future right of people who have paid, according to the law, into social security benefits. Mr. Speaker, as we approach that season of the year when we are accustomed to think of new resolve and good resolutions, I hope it will be the solemn covenant of this House with the American people that we will not tolerate, we will not permit the cutting of social security benefits to the people of this Nation. We would reestablish by the integrity of this House in that commitment faith and confidence in the social security system, the greatest bulwark we have for a better life for the people of this country.

Mr. ARCHER. Mr. Speaker, I yield 1 minute to the gentlewoman from New Jersey (Mrs. FENWICK).

Mrs. FENWICK. Mr. Speaker, I thank my colleague. I am very sorry to hear such a partisan approach to the problem of social security. I would like to associate myself with the remarks of the distinguished gentleman on the other side of the aisle, the gentleman from Missouri (Mr. GEPHARDT). His way is the one which is going to solve the problem and if we do not approach it in that spirit we are not going to get anywhere.

I know the devotion of my distinguished chairman, Mr. PEPPER; his heart and mine are in the same place. We must have a sound social security system. But we are not going to get it if we approach the solution of the difficulties in a partisan spirit. It is going to require the highest statesmanship and the highest sense of duty and obligation, as was stated by the gentleman from Missouri when he spoke earlier. I would like to associate myself with his remarks.

□ 1130

It is that attitude that is going to bring about a solution of great importance to so many people in this country.

Mr. ARCHER. Mr. Speaker, I yield such time as he may consume to the gentleman from Pennsylvania (Mr. COUGHLIN).

Mr. COUGHLIN. Mr. Speaker, I rise in strong support of the conference report on H.R. 4331, legislation to restore the $122-a-month minimum social security benefit for 3 million current recipients.

The Omnibus Budget Reconciliation Act, which was signed into law in August, eliminated the minimum benefit for new retirees in December and current recipients next March. Congress had intended by this action to curtail windfall benefits for many individuals who worked only long enough under social security to establish their eligibility for retirement benefits. However, the total elimination of minimum benefits would also have affected those low-wage earners for whom the original provision was established. The House and Senate, therefore, quickly passed H.R. 4331 restoring minimum benefits under the Social Security Act.

The differences between the House and Senate legislation have been resolved so that those who are dependent upon social security will not be deprived of their benefits. Through enactment of H.R. 4331, we will hopefully regain the confidence of our older Americans to whom we have given our commitment that current benefits will not be cut, that the safety net will not be torn apart. Today, we can assure the millions of Americans currently receiving the social security minimum benefit that Congress will not break faith with them.

In addition to restoring the current $122 minimum social security payment, H.R. 4331 allows interfund borrowing among the three Federal payroll trust funds next year and the taxation of the first 6 months of sick pay, except worker's compensation. The conference report on H.R. 4331 also stipulates that the Department of Health and Human Services set up currently authorized AFDC/medicaid demonstration projects in at least 7 States to provide better health services for poor families.

I am pleased that H.R. 4331 addresses the problem of fraud and abuse within the social security program. This legislation would establish stiffer penalties for the misuse of social security cards by making such activity a felony and instituting substantial fines. Another provision in H.R. 4331 would require the Department of Health and Human Services to report to Congress within 90 days of enactment of H.R. 4331 the efforts it has undertaken to prevent social security payments to deceased persons. H.R. 4331 would also allow a waiver of certain sections of the Privacy Act to allow States to provide the Social Security Administration with information necessary to prohibit individuals from receiving social security disability and student benefits while in prison.

Addressing the needs of our senior citizens is one of our Nation's highest priorities and we must continue to strive to create a society in which old age is rewarded with respect and dignity rather than loneliness and dispair. I believe that confidence in our social security program and confidence in the coming days will be restored for the 3 million current recipients of the minimum payment today by the approval of the conference report on H.R. 4331.

Mr. ARCHER. Mr. Speaker, I yield such time as he may consume to the gentleman from Virginia (Mr. PARRIS).

Mr. PARRIS. Mr. Speaker, I am extremely pleased that the House and Senate conferees on the minimum social security benefit legislation decided to restore the minimum benefit for all recipients receiving payments before it was eliminated and for those who will become eligible before January 1, 1982.

A few months ago, a vast majority in the House voted to restore the minimum social security benefit. I joined my colleagues at that time to correct an inequity which would have adversely affected 3 million senior citizens. I was very disturbed to learn that when the Senate considered its minimum benefit legislation, it added language which would have severely penalized Federal retirees. Under the Senate proposal, retired Federal workers would have had their Social Security benefits reduced because they were also receiving Government pensions. They would have been required to have their social security benefits offset, dollar for dollar, when their Government pension exceeded $300 a month.

This was an unjust proposal which would have unfairly penalized about 350,000 senior citizens who have contributed greatly to their country. I have stated on numerous occasions that these individuals should not be asked to bear the burden of the social security system's financial problems.

I have made several statements on the House floor in opposition to this proposal and I have written all the conferees on the minimum benefit legislation to urge them to eliminate this unfair provision from the conference report. Federal workers took their jobs and planned their retirements with their social security and Government pension in mind. By changing the rules in the middle of the game, the Federal Government would have been breaking a commitment to provide these earned benefits.

I was pleased to learn that the conferees agreed to restore the minimum benefit for all recipients receiving payments before it was eliminated and for those who would have become eligible under prereconciliation law before January 1, 1982. For those retiring after December 31, 1981, benefits will be paid according to the formula established under reconciliation, which provided that benefits will be based on the actual earnings of beneficiaries and according to recomputation procedures prescribed in regulations issued by the Secretary of Health and Human Services.

To protect the financial integrity of the social security system, the conferees have allowed the borrowing between the three social security trust funds through December 31, 1982. This will give the Congress and the administration enough time to work on a more permanent remedy to the system's ailing financial condition.

The conferees also took other steps which will help ease the financial burden which social security is currently experiencing. Stiffer penalties have been provided for the misuse of social security cards, including making such activities felonies and establishing a $5,000 fine for knowingly altering or counterfeiting a social security card, or buying, selling, or possessing a counterfeit card. The conferees have also included language that requires HHS to report to Congress within 90 days of enactment on actions taken to prevent social security payments to deceased persons. The conferees have also taken steps to prevent persons from receiving social security disability and student benefits while in prison.

I believe that the conferees have taken some positive action in reforming the social security system to keep it financially sound without unfairly penalizing any one group of individuals. I commend the conferees on their efforts and I strongly urge my colleagues in the House to vote in support of this conference report.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield such time as he may consume to the gentleman from Puerto Rico (Mr. CORRADA).

Mr. CORRADA. Mr. Speaker, I rise in support of the conference report on H.R. 4331 to restore the minimum benefits under the Social Security Act which have been eliminated by the Omnibus Reconciliation Act of 1981.

Restoring these monthly payments of $122 to more than 3 million social security pensioners throughout the Nation, including over 100,000 pensioners in Puerto Rico who are now receiving those payments, is an act of justice and fairness to these elderly people who can barely subsist with $122 per month and who would have been subjected to great hardship and even penury and misery if such benefits had been cut by more than half in many instances. In the case of Puerto Rico, while our people are subject to the payment of social security taxes in exactly the same manner as Americans residing in the States, the elimination of the minimum benefits would

have been aggravated by the fact that the benefits of the supplementary security income (SSI) have not yet been extended to the island, a situation which I hope the Congress will rectify in the near future. I regret that we are not also restoring these benefits to prospective pensioners after January 1, 1982 but at least, by approving this conference report, benefits will be restored to current pensioners and those who may become eligible before January 1, 1982.

I urge my colleagues to support this conference report.

Mr. ARCHER. Mr. Speaker, I yield such time as he may consume to the gentleman from California (Mr. LAGOMARSINO).

Mr. LAGOMARSINO. Mr. Speaker, I rise in support of the conference report.

Mr. ARCHER. Mr. Speaker, may I inquire as to how much time is left on both sides?

The SPEAKER pro tempore (Mr. WRIGHT). The gentleman from Illinois (Mr. ROSTENKOWSKI) has 16 minutes remaining, and the gentleman from Texas (Mr. ARCHER) has 21 minutes remaining.

Mr. ARCHER. Mr. Speaker, I yield 5 minutes of our time to the chairman of the committee, the gentleman from Illinois (Mr. ROSTENKOWSKI).

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 4 minutes to the gentleman from Indiana (Mr. JACOBS).

Mr. JACOBS. Mr. Speaker, first I want to express my gratitude to the gentlemen of the conference committee who agreed at least—at least—to extend the deadline for the minimum benefit past Christmas until the first of next year. That gave at least a nod to the House position.

House Members may recall that the House bill restored the minimum benefit-"period." The other body restored the minimum benefit-"except." You might even say that the philos- ophy underlying that restoration was "give them some day their daily bread under certain conditions"—the condition that they not be Federal employees in the past, the condition that they already have been eligible on November 1, 1981.

The conferees for the House struggled and, in the end, obtained some little recognition of the House's position in that regard.

I want to direct the Members' attention to the so-called Gramm-Latta II legislation in which the minimum benefit was eliminated instanter, practically, for the people to whom Mr. PEPPER referred a few moments ago.

If there were Members of this body who felt compelled to vote for that reconciliation legislation, I remind every Member, I remind the Nation that there was a motion in connection with the procedures surrounding that reconciliation legislation which would have permitted the House to vote individually on the social security question.

I remember well that the gentleman in the chair now, the majority leader, argued for that motion, pointing out to the House, in his usual eloquence and not uncertain terms, that with the approval of that motion, Members would have the opportunity to vote separately to save the minimum benefit under social security and then go on to vote for the reconciliation legislation if they chose to do so.

Now, there have been suggestions that the gentleman from Florida has been partisan in his remarks. The gentleman from Florida served in the Congress when the great Harry Truman was President of the United States, and I believe that President was accused of being partisan, too. He said he gave the Republicans whatever the opposite of Heaven is, and the President replied—and this could apply to what Mr. PEPPER said today—"I don't give the Republicans (blank), I just tell the truth about them and it sounds like (blank)."

Mr. PEPPER told the exact truth about what happened on that reconciliation occasion. The House was not faced with an up or down vote on reconciliation, take it or leave it, all of the good things that some Members perceived in that motion and the bad; the House was faced with a decision of dividing the question and voting individually on the social security question. And on that question a very partisan and party line vote ensued, my party lost on that vote and the minimum benefit was killed.

Reference has been made to the President's suggestion for a permanent solution to the social security program. Now, if nobody collected any benefits from the social security program at all, that would solve the financing. In fact, there would be enough money left over to finance a war in El Salvador.

All I hope is that when the Congress adopts its permanent solution to social security, it will not amount to a final solution for the recipients.

Mr. PICKLE. Mr. Speaker, I yield 2 minutes to the gentleman from Massachusetts (Mr. SHANNON), a member of the subcommittee.

Mr. SHANNON. I thank the gentleman for yielding.

Mr. Speaker, last July, the House voted nearly unanimously to restore the minimum benefit for all current and future retirees. I deeply regret that the Senate insisted on cutting benefits for those eligible to receive them next year, and in years after that. Most of those people who receive the minimum benefit are elderly women, and many of them will have no option but to apply for welfare.

Earlier this fall, the Senate voted to cut social security family benefits drastically, and to impose a means test on Government employees currently receiving the minimum benefit. I commend the House conferees for rejecting these unwarranted and unfair provisions.

Throughout this year's ongoing debate over how to address the funding problems facing the social security system, the administration has paid very little attention to the needs of the elderly, or to whether the benefits paid out by the system are adequate. If there had been concern over the economic security of elderly Americans, then the President would never have proposed drastic benefit reductions back in May, and we would not be here today having to fight to restore a $122 per month for elderly men and women.

I am glad that the conference report at least restores the minimum benefit for those currently receiving it. We can face the people at home over the Christmas recess knowing that the Social Security Administration will not be sending out notices to 3 million retirees telling them that their benefits will be cut.

But we draw the line here. We are not going to let the administration cut benefits for elderly Americans solely as a budgetary tool.

The conference report on social security does not go as far as the House wanted it to go. But, it will prevent current retirees from losing vital benefits, and it does help address the system's financing problems in a way that will mean the least amount of disruption and distress for the country's elderly. For these reasons, I am going to support it.

Mr. ARCHER. Mr. Speaker, I yield 1 minute to the gentleman from California (Mr. ROUSSELOT).

Mr. ROUSSELOT. Mr. Speaker, I just want to correct one thing. Tne impression by the discussion here today would lead you to believe that my Democratic colleagues, in the reconciliation bill, had no reduction in social security benefits. They did. And it should be made very clear that the difference is one of degree on how much of a decrease in future social security benefits. So I think it should be clear right now and here that the reconciliation bill offered by the Democratic Party in this House, known as the Jones reconciliation bill, had reductions in social security benefits. So the difference is one of dollars.

Mr. CONABLE. Mr. Speaker, will the gentleman yield?

Mr. ROUSSELOT. I yield to the gentleman from New York.

Mr. CONABLE. Mr. Speaker, I would like to point out also that the minimum benefit is being phased out under the decision of the majority in December of 1977. The minimum benefit was frozen as of that time and will

phase out between now and the time the last recipient of the minimum benefit dies.

Mr. ROUSSELOT. Then, actually, the Democrats want to do that?

Mr. CONABLE. They wanted to phase it out, also, over a period of time.

Mr. ROUSSELOT. Oh, you would not know that today, would you?

Mr. PICKLE. Mr. Speaker, I yield 2 minutes to the gentlewoman from Ohio (Ms. OAKAR).

Mr. BEDELL. Mr. Speaker, will the gentlewoman yield?

Ms. OAKAR. I yield to the gentleman from Iowa.

Mr. BEDELL. Mr. Speaker, I rise in support of the conference report to accompany H.R. 4331, the social security minimum benefit restoration bill. I want to commend the conferees on their hard work on this crucial matter. We all realize that a social security conference is never easy, and the serious nature of the financial difficulties facing our social security system made this conference report very important.

From the beginning, I have protested the administration's plan to eliminate the minimum benefit. I am pleased that the conference committee agreed to reverse repeal of the minimum benefit for current recipients. This action is a positive first step.

The conference report before us authorizes interfund borrowing among all three social security trust funds until December 31, 1982. This provision addresses the immediate short-term financial problems of the social security system, but it is not a remedy for the long-range ills of the system. The need remains clear and strong for more substantive action.

In this regard, I have been doing a lot of research and studying and talking to my constituents in northwest Iowa about how we can save social security in the long term. Through forums conducted in June throughout the Sixth District, through public meetings I held in August, and through many valuable letters, I have received helpful suggestions from my constituents on how we can preserve our social security system in a fair and even-handed manner. As a result, just a few weeks ago I introduced three bills which would save the system without hurting present and future retirees.

My package of bills, Mr. Speaker, would include the following provisions: First, would preclude payment of all social security benefits to convicted criminals; second, would increase the cost-of-living adjustments by either the rise in the CPI or the wage index, whichever is lower; and third, would redirect the system back toward its original purpose by financing hospital insurance from general revenues.

Experts tell us that the retirement and survivors fund will come up short by an estimated $80.9 billion in the next 5 years and that the system will need $110.6 billion in the years 1987-90. Thus, as best we can tell, social security will need about $191.5 billion more in 1981-90 in order to continue paying benefits.

My social security package is projected to save social security at least $213 billion. I say at least because I am referring only to my bills which address the cost-of-living adjustments and the funding of hospital insurance. Additional savings would result from the elimination of social security benefits to prisoners—about $17 million in 1982.

I believe that my proposals address both the short- and long-term problems of the social security system. It is not a Band-Aid plan that will fix the system temporarily. Rather, these bills, if adopted, will assure financial stability at least through the next decade.

It is my feeling that once and for all we must solve the financial problems of our social security system. In the past we have not been accurate in estimating the financial needs of the system and we have time and time again relied on raising taxes. I believe that we do not have to resort to raising taxes or significantly cutting benefits by accepting a plan that will clearly restore the integrity to the system and build confidence in social security.

By accepting the conference report on H.R. 4331, we are taking the first step, a positive step in the right direction. The restoration of the minimum benefit for current retirees will finally put an end to the uncertainty that so many retirees had to face during the past months.

From the beginning, I felt that we should not have inflicted such uncertainty and fear upon our elderly by inaction in this vital area. It has been a difficult fight in Congress, but I, for one, am ready to do more. I urge my colleagues to support this conference report. I also ask my colleagues to join me in keeping the fight going to preserve and save our social security system.

Ms. OAKAR. Mr. Speaker, I chair a task force for social security and its treatment toward women, for the Aging Committee. Every time we have cuts in social security we especially affect the poorest person in this country—the older woman. Of course, older men do not do too much better.

Some of the first benefit cuts in the history of the system were made in the budget resolution offered by this administration; $25 billion of benefits were taken away in an effort to balance the budget on the backs of the elderly and our disabled. The first step in solving the problems of social security is to remove the trust fund from the unified budget so that no administration will be tempted to balance the budget by cutting social security benefits, the second largest pot in the budget.

With reference to this conference report, I want to commend the gentleman from Illinois for his efforts in restoring the minimum benefit for current beneficiaries. In addition, the bill has a positive addition by providing for interfund borrowing for 1 year. However, this version is far different from our House version in one major area, and I hope we do not deceive the American people into thinking that this bill restores the minimum benefit totally.

I am extremely disturbed by the incomplete restoration of the minimum benefit. Three million people will rest more easily at Christmas because they can be assured of their minimum benefit check, but 7,000 people coming on the rolls in January will not have a holiday. Who are these people? These people are mostly women, our mothers and grandmothers, and displaced homemakers, who have the necessary number of quarters but because of their low wages and intermittent work pattern will not receive the current minimum of $122 per month. These people also include the disabled and widows and widowers of eligible spouses. They will be denied the minimum. Their potential benefits will be reduced an average $60 per month, allowing them an income of only $720 a year

This conference report falls flat of our original intent of complete restoration of the social security minimum benefit. Eighty-four thousand people will be denied the minimum benefit during 1982. For many people, the minimum benefit is their only source of income.

Today I am introducing a bill to restore the minimum benefit to future beneficiaries. I am proud to have Senator PEPPER, our majority leader, and others as major sponsors. I invite others to cosponsor this bill to restore the minimum benefit so that when we return we truly restore the minimum benefit.

□ 1145

Mr. CONABLE. Mr. Speaker, will the gentlewoman yield?

Ms. OAKAR. I yield to the gentleman from New York.

Mr. CONABLE. I thank the gentlewoman for yielding.

I am curious if the bill adds cost-of-living adjustments to the minimum benefit which the gentlewoman is restoring prospectively, because there has been no increase in the minimum benefit under the bill that the gentlewoman's party passed in December of 1977.

Ms. OAKAR. I would love to respond to that about my party.

Mr. ARCHER. Mr. Speaker, I yield such time as he may consume to the gentleman from California (Mr. ROUSSELOT).

Mr. ROUSSELOT. Mr. Speaker, in reality there are two primary aspects of H.R. 4331. One aspect deals with the short-term financing of the program; namely, the interfund borrowing provision.

The other main aspect restores the minimum benefit for those presently receiving it and for those who will be eligible to receive the benefit through the end of this year. Although I cannot support the stopgap financing aspect of H.R. 4331, I do support the restoration of the minimum benefit as provided by the conferees.

We all know that changes will have to be made in the social security program. It is important that we give those who are affected by these changes time to adequately prepare for them. It is my belief that the elimination of the minimum benefit in the Omnibus Reconciliation Act of 1981 was too abrupt and unfair to those who have come to reply upon their minimum benefit as a supplemental source of income. Changing the rules in midstream is poor policy.

The prospective elimination of the minimum benefit will make certain that beneficiaries will receive social security benefits based on their actual earnings record. Let me stress to my colleagues that even the prospective elimination of the minimum benefit will not adversely affect those who would have received this benefit in the future. There is a Federal safety net which provides for those low-income elderly in need. This social safety net in my State of California consists of potential payments and benefits under Federal SSI, State SSI supplements, food stamps, and medicine.

Mr. PICKLE. Mr. Speaker, I yield 1 minute to the gentleman from Georgia (Mr. JENKINS).

Mr. JENKINS. Mr. Speaker, I am very pleased that the House today is taking action to reverse one of the mistakes that was made in the reconciliation bill. At that time I indicated that this House was making a grave mistake in taking the action that it did and I want to express my appreciation to the House in helping the President undo the mistake that he made.

It is one thing when we say that we have to reform social security. It is another thing to simply attempt to reform in the name of reform by eliminating people who have been drawing social security for many years, the very poor, the very low income people.

At that time, I voted against reconciliation based primarily upon the fact that this body was making a grave mistake in following the lead of the President in arbitrarily and uniformly disallowing people who had paid into social security, albeit on a low-income basis, and had been drawing social security for many years.

I want to say to the gentleman from Texas (Mr. PICKLE) and to the Members from this side of the aisle that I realize that this would not have been done had it not been for the insistence of the Democratic Members of the House, and I think that the gentleman deserves the appreciation of the old people of this land.

I would hope that, in the future, this House will never again blindly follow any President, simply because he may be popular at the moment. It is our responsibility to examine and study every proposal before voting for it. We did not do that in the reconciliation bill. I would urge and plead with those Members, especially those from the Republican side, who previously voted to take away these benefits from 3 million elderly Americans, to reverse their position and correct their mistake, by voting for this conference report.

The SPEAKER pro tempore. The Chair will state that the gentleman from Illinois (Mr. ROSTENKOWSKI), represented by the gentleman from Texas (Mr. PICKLE), has 12 minutes remaining and that the gentleman from Texas (Mr. ARCHER) has 15 minutes remaining.

Mr. PICKLE. Mr. Speaker, I yield such time as he may consume to the gentleman from Michigan (Mr. FORD).

Mr. FORD of Michigan. Mr. Speaker, I rise in support of the conference report.

Mr. PICKLE. Mr. Speaker, I yield such time as he may consume to the gentleman from Missouri (Mr. SKELTON).

Mr. SKELTON. Mr. Speaker, I rise in support of the conference report which will restore the minimum social security benefit to the 3 million elderly currently receiving it. This is welcome news, and certainly comes as a great Christmas present to the senior citizens who were facing the prospect of losing this vital part of their income within just a few weeks.

This conference report also provides for interfund borrowing within the social security trust funds. This is a concept which I have advocated in the past.

Mr. Speaker, the most important provision of this conference report, however, remains to be the restoration of the minimum benefit. We cannot pull the rug out from under people who have worked out a lifestyle for themselves based on a limited income during their retirement. Not only would this have been grossly unfair, it would have been devastating to the social security system which depends on the confidence of the people in order to work at all. I had opposed the elimination of the minimum benefit from the beginning, and voted to restore the benefit this past July. Elimination of the minimum benefit was a poor attempt to make the Government books look good on short notice, but it did not work. The minimum benefit was part of a contract that was made between the people and the Government and we should not, under any circumstances, deny this commitment. I continue to stand firm in my efforts of fiscal responsibility as I have in the past, but I also intend to stand up for the pact already made through the social security system with the people of this country.

We should be ever mindful that the integrity of the social security system should be kept intact—not only for the elderly, who depend upon it, but for those who are working and paying into the system at the present time. They look at what is being done, and by restoring this minimum benefit, they are being reassured that we in Congress intend to protect the integrity of the system.

Mr. PICKLE. Mr. Speaker, I yield 1 minute to the gentleman from North Carolina (Mr. FOUNTAIN).

Mr. FOUNTAIN. Mr. Speaker, I simply want to associate myself with those who have spoken in behalf of this conference report which restores the minimum social security benefits to current recipients. I have always felt that the most precious crop we grow in America is our children, and next to them, so far as I am concerned, the most precious human crop we have left is our talented and experienced reservoir of senior citizens. Unfortunately, too many of them have little to look forward to in a material way.

As the gentleman from Georgia said, I too voted against the reconciliation proposal in large part because of its damaging effect upon some of our senior citizens.

My desire to reduce expenditures, excessive expenditures, has not diminished; but, it must be accomplished in a reasonable manner. I sincerely hope that in our efforts to provide a more permanent structure for social security in the years that lie ahead, we will do nothing to endanger these citizens whom we are now trying to protect. We cannot, we must not, let them down now.

Older Americans, Americans who have worked hard all their lives in support of their families, their communities, and their Nation, have counted upon the social security system to supplement their incomes in their later years.

The social security system is not without its problems—serious problems. But, this does not give us license to change the rules in the middle of the game.

I fully support the conference report which would restore the minimum

benefit for all those who are currently receiving benefits.

Additionally, this conference report would authorize interfund borrowing among social security trust funds, and that will give the Congress time to find responsible and long-lasting solutions to the long- and short-term problems in the system.

Furthermore, the conference report makes other changes in social security which will, hopefully, aid the Social Security Administration in reducing fraud and mismanagement which robs rightful recipients of their benefits.

Many ideas have been advanced as to how the social security system should be reformed to keep it financially sound. This is an issue which will not go away, and a wide range of solutions must be studied.

And in the long run, it will doubtless become necessary to change the benefit structure somewhat and to broaden the source of income for the social security system to fulfill its requirements.

Clearly, responsible changes must be made in social security to keep it actuarially sound; but, we must also insure that those who have paid into the system continue to receive what they are entitled to.

I fully support this conference report, and I call upon the Congress to work diligently and forthrightly toward a sound social security system.

Mr. PICKLE. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. BIAGGI).

Mr. BIAGGI. Mr. Speaker, contemplate what occurs if this conference fails today. The Social Security Administration is prepared to send out notices to 3 million elderly citizens, most of whom are not aware of the law as it exists today, most of whom do not know that on March 1 they will no longer receive their checks, most of whom will be shocked and it will have a devastating effect on their health, if not their lives, when they receive that notice in this Christmas season.

I would urge the Members of this House to contemplate very seriously whether they vote for or against this conference report, although it may not be the alpha-omega, it may not be all we desire, it certainly is the best of a bad bargain and what it in fact accomplishes is the restoration of benefits to those 3 million.

Mr. Speaker, I remember the vote on the Budget Reconciliation Act. I voted against it and opposed it vigorously because it called for the eliminating of the minimum benefit. I have a personal interest in this matter, a special personal interest—the President of the United States called me and asked me to vote for his tax package and I said I would if he would give consideration to the restoration of those minimum benefits and he said he would protect the truly needy.

Shortly thereafter the bill was introduced by the gentleman from Missouri (Mr. BOLLING), H.R. 4331, and was adopted virtually unanimously. The very same people who voted for the Budget Reconciliation Act which terminated those benefits, reversed themselves. They were given liberty to vote for that measure.

Their consciences should not be eased by their later vote on this measure. I voted for the tax package and as far as I am concerned, the President's commitment will be completely fulfilled, when he signs this bill into law and completes the legislation saga of the minimum benefits for the elderly.

Mr. Speaker, no matter what we might feel about all of the provisions of this conference report, I implore my colleagues to support final passage for we must end a nightmare for 3 million of our elderly citizens. The nightmare began almost 6 months ago when Congress, at the direct request of the President of the United States, voted for the Budget Reconciliation Act which called for the elimination of the social security minimum benefit for all those presently receiving it, effective on March 1, 1982.

We then found ourselves in the unprecedented position of being the first Congress in history to ever reduce social security benefits for current beneficiaries. Since that fateful day—these 3 million elderly—who I might point out—are among the poorest of our elderly population—have been anxiously watching events in Washington. They have also been living in imminent fear of receiving the official letter from the Social Security Administration advising them of the cutoff of the minimum benefit. The thought of that letter being sent out to 3 million seniors—during the holiday season—was most distressing to me—and our actions today in passing this conference report will avert that specter. Equally as disturbing would be the situation involved for those elderly who might not be notified in advance of the cutoff—and suddenly in April of 1982 they do not receive their monthly minimum benefit check. Passage of this conference report will avert that tragedy as well.

Let us review the steps that lead us to where we are today. Shortly after we enacted the Budget Reconciliation Act—I had the occasion to speak personally with President Reagan in conjunction with our consideration of the tax cut bill. I told the President of my total opposition to his proposal as approved by Congress which eliminated the social security minimum benefit. I indicated that if he would work toward the restoration of the minimum benefit—I would consider supporting his tax proposal. The President advised me that it was never his intention to harm the truly needy among the minimum benefit recipients and that he would work for the restoration for these individuals. Based on that pledge, I supported final passage of the tax bill which is now law.

Just days after this conversation, which did receive a great amount of national attention, the House passed the original version of H.R. 4331 which restored the minimum benefit for all persons present and future. The Senate, in a somewhat more deliberate fashion, passed a modified version of the legislation. The conference report before us reflects the compromises struck. After our action today—the legislation goes to the President for his signature. His approval will reflect the fulfillment of his commitment to me and to the American people. It may help to restore some faith among our seniors who have been shattered by the actions of this administration and Congress concerning social security. Let us use this legislation as a catalyst for more comprehensive social security reforms, which are desperately needed.

Clearly, the most important provision in this conference report is the restoration of the minimum benefit for all those persons presently receiving it. We are talking about 3 million elderly, an overwhelming majority of whom are women. We are talking about hard-working men and women who were in jobs which did not pay them a sufficient enough wage to allow them to contribute to social security in an amount that would at least equal $122 a month. The minimum benefit guarantees this level of income for these individuals.

I join with my colleagues who are angered by the arbitrary cutoff date with respect to prospective beneficiaries but even this must be viewed in perspective. I support the fact that the conferees exempted nuns and others who pledge to the vow of poverty for service from the language barring any new minimum benefit recipients. It is also important to note that the cutoff date for new recipients was to be November 1, 1981. Under this legislation, it is delayed until January 1, 1982.

Another important provision in this conference report is its rejection of the ill proposed Senate agreement which would not have restored the minimum benefit for those retirees with Federal, State, or local pensions which exceed $300 a month. There was never any sensible justification for this and in reality, it smacked of discrimination and the conferees were wise to reject it.

I am an ardent supporter of the provisions dealing with interfund borrowing which are contained in this conference report. Interfund borrowing is essential and makes good commonsense. Two of the three social security trust funds have operating surpluses—the

one that does not—is the largest one, the old-age and survivors fund. Interfund borrowing will avert any interruption in the providing of benefits. While I would have preferred a longer period of authority for interfund borrowing, this is an important first step.

I commend the conferees for also rejecting the Senate provision which would have limited the maximum family benefit for retirees and survivors to that applicable to families of disabled individuals. According to our distinguished chairman, this provision would have reduced benefits by some $3 billion over the next 5 years primarily at the expense of families of insured deceased individuals with more than three dependents.

Let us today put an end to one of the sorriest episodes in modern public policy history. Let us remove a black mark which blemishes the record of the 97th Congress—namely that this is the first Congress in history to have ever voted to reduce social security benefits for existing beneficiaries. Let us by voting for this conference report begin the process of reestablishing the Congress as the true defenders of the social security system. Let us stop threatening its integrity and instead work for its preservation and strengthening.

Mr. PICKLE. Mr. Speaker, I yield 2 minutes to the gentleman from Connecticut (Mr. MOFFETT).

Mr. MOFFETT. Mr. Speaker, some of our colleagues have been bemoaning the fact that there have been partisan tones to the debate. I think there are some issues on which partisanship is not useful, but Ronald Reagan has taught us that a party should stand for something after all and that a party should have an ideology, and it seems to me that the Republican Party, the minority party in this House, has been honing its ideology for the last 20 years and moving toward a more conservative position, and I think we should have respect for that, that the party does stand for something.

Some of us would like our party to be clearer in its ideology from time to time, but the fact of the matter is partisanship on this issue does at least reflect the differences in the two parties and there is nothing to be ashamed of here.

There is a difference. There was a different point of view on this side of the aisle and it has been properly reflected. Parties do perform useful functions. When a group of people does not have anybody to stand up for them and they need someone to stand up for them, a party does perform a useful function. I am proud of my party for what it has done on social security and I am proud of the people who have made courageous votes on this side of the aisle and I do not think we should bemoan the fact, I say to my dear friend from New Jersey, that there have been partisan tones in this debate. It is merely a perfect reflection of the differences in the two parties, and if the gentlewoman is uncomfortable with the position of her party, which I sense she is, I think all of us have a great deal of sympathy for that, but it does not in any way diminish or decrease that difference.

During the election campaign last year, President Reagan made the following pledge to protect social security benefits before the American Association of Retired Persons:

> Any reform of the social security system must have one overriding goal—that the benefits' of those now receiving—or looking forward to receiving—social security must be protected, and that payments keep pace with the cost of living.

Despite this pledge, virtually every proposal made by the President since he entered office has been an attempt to eliminate or cut back social security benefits for millions of Americans. Last May, the President announced a number of proposals that were aimed at drastically reducing benefits. These included reducing the percentages of benefits paid to early retirees, restricting eligibility for disability benefits, delaying the annual cost-of-living-adjustment, taxing sick pay, placing a cap on family benefits, and eliminating the monthly minimum for both current and future recipients. Despite the overwhelmingly negative public reactions to this blatant attack on social security, the President and his allies succeeded in pushing through the elimination of the monthly minimum for both current and future recipients as part of the omnibus reconciliation budget bill last summer. Among other things, the elimination of $122 monthly minimum would have severely cut the benefits of 3.1 million Americans, of whom two-thirds were over the age of 70, and 85 percent of whom were women. Morever, 500,000 of these recipients were over the age of 80, and 16,000 over the age of 95. Yet the administration saw fit to try to slash their benefits, apparently on the presumption that anyone who is alive is also capable of supplementing retirement income with work.

On the same day that the House approved the omnibus budget bill, it voted 404 to 20 to restore the minimum benefit completely, to both current and future recipients. It did so by passing H.R. 4331.

Then, the Senate spent months delaying approval of H.R. 4331, trying to find ways in which to preserve cuts in social security benefits. While the Senate dallied, the President announced in early September that he still wanted, to delay the 1982 cost-of-living adjustment (COLA). He did not explain, however, in what manner he planned to delay the impact of inflation on the incomes of recipients whose COLA's were to be delayed. The public reaction was again so negative that the President was forced to go on television, on September 24, to reassure the public that he did not plan to cut benefits.

Once again, however, his allies in the Senate got to work, on doing just that—cutting benefits. When the Senate had approved its version of H.R. 4331, there were major cuts: The monthly minimum was eliminated for all future recipients; the minimum was also eliminated for all current recipients living outside the United States; there was a discriminatory dollar-for-dollar cut in benefits for those persons receiving public service pensions over $300 a month, but not for anyone receiving other kinds of pensions; the maximum family benefit was lowered; and social security taxes were to be deducted from the first 6 months of sick pay.

The Senate version of H.R. 4331 was in the true spirit of the administration—while proclaiming protection for social security, it set about gutting it for millions of Americans. The House and Senate then had to have a conference on H.R. 4331, to come up with common language. Yet the so-called compromise violates the pledges made by the President, time after time, before the Nation, to protect social security. It does so with particular impact on future recipients, by unfairly and abruptly eliminating the minimum benefit for all new recipients after January 1, 1982—all of 2 weeks from now.

This compromise, which we are considering today, will penalize the poorest citizens of our society the most, both now and in the future. For what it means is that starting in 2 weeks, we will no longer assure all retired Americans that they will receive an absolute minimum of $122 a month in social security benefits. Instead, benefits will be based on what is called one's earnings history. But what this really means is that those who have had the lowest salaries will be getting benefits of $40 or $50 a month, rather than the current minimum of $122. The $122 was the way in which we made sure that all retired Americans had some pitifully small minimum to support them; $122 a month does not go a long way—it is only barely $4 a day. Yet the Reagan administration and its Senate supporters have now found another way to punish those who are poor—by eliminating even this grossly inadequate minimum base for survival. When we already know that tens of thousands of our elderly eat pet food, because they cannot afford real food, it is a travesty and a disgrace to further impoverish and humiliate them.

The elimination of the minimum as of January 1, also violates any sense of giving adequate warning to future re-

tirees that a major cut in benefits was impending. What are elderly Americans near retirement supposed to do, who were counting on the $122 minimum? Are they supposed to go out and find a second job? How are they to survive on $60 a month instead of $122? What kind of nation does this to its elderly poor?

Another utterly unfair cut in social security benefits in this distorted "compromise" is the imposition of the social security tax on the first 6 months of sick pay. Is it not enough that a person is so ill that they cannot work? Do we really have to tax their sick pay? It is patently cruel to add to the burdens of the seriously ill as the tax on sick pay does.

The amount of money generated by these cuts is absolutely insignificant, compared to the total deficit of the social security system or the national budget. Experts estimate that elimination of the minimum benefit will save only $125 million a year. This compares to the $138 million we will spend in fiscal year 1983 for golf, bowling, softball, and tennis on military bases. Or the $102 million for military bands. Or the $12 a meal subsidy on every meal at the officers' dining rooms at the Pentagon. Or the $60 billion in tax loopholes we gave corporations, through leasing of tax credits over the next few years. Those favoring these cuts in benefits claim that this is necessary to keep the social security system solvent. Yet the amount of money to be saved is so small that major work will still be needed. But we have repeatedly refused to do away with tax loopholes that would yield more than enough funds to keep social security solvent indefinitely—such as the $12 billion a year tax gift given to the oil companies in the Reagan tax bill. How is it that we have enough money to give the oil companies $12 billion a year, but not enough to protect our elderly from the ravages of poverty and sickness? Think of it—we will save $125 million a year by eliminating the minimum benefit, while imposing severe hardship on the poorest of our elderly. Our spending priorities have become a disgrace. Is this the way in which the President fulfills his "overriding goal"—protecting the benefits of all current and future recipients?

Mr. Speaker, it is not enough that we have preserved minimum benefits for current recipients—that should never even have been an issue, but the President and the Senate made it one. It is not enough that we have prevented other grossly unfair alterations in benefit formulas. There is simply no decent reason for the "compromise" that the House conferees agreed to, violating the trust that millions of Americans have in the social security system. If we go through with these abrupt and unfair changes, which citizen will ever again have trust in the supposed protections that social security offers against poverty in old age? If we agree to these compromises, we will be further undermining the trust of Americans in their political system.

Mr. Speaker, we have seen that the President has no intention of living up to his pledge to protect the social security benefits of Americans. Because of the Senate's delays, we are in the position of accepting this punitive compromise, or forever eliminating the minimum benefit for all retirees. It is an unconscionable position for the House.

Mrs. FENWICK. Mr. Speaker, will the gentleman yield?

Mr. MOFFETT. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Speaker, my charming young colleague——

Mr. MOFFETT. I thank the gentlewoman.

Mrs. FENWICK. [continuing]. Is too young to remember, but I am not, that the father of social security in this House was Republican Robert Winthrop Kean, a Representative from New Jersey.

Mr. MOFFETT. I thank the gentlewoman for that information.

Mr. ARCHER. Mr. Speaker, I yield 2 minutes to the gentleman from South Carolina (Mr. CAMPBELL).

Mr. CAMPBELL. Mr. Speaker, I am deeply disturbed as I listen to the rhetoric that is coming forth concerning social security. This issue is most important to all Americans, young and old. As we look at history and we see that when we initiate the system we had 16 Americans paying for 1 retiree and today we have 3 paying for each 1 retiree, it does not take a mathematical genius to know that we have problems.

When we look at the fact that back in the 1950's we initiated an early retirement program and that we indexed that later to inflation, it does not take a genius to know that we are draining the system.

When we look at the fact that we let people retire under another retirement program and work a short period of time and then become eligible to draw minimum social security benefits—not the poor, but those who in fact have money—and then at that time drain the system from those who need it, we know we have problems.

As a matter of fact, Mr. Speaker, when we look at the fact that we initiated just a couple of years ago the largest tax increase in the history of this Nation, to fund social security, and we see it has not done the job then we know we have problems.

I would like to commend the gentleman from Texas (Mr. PICKLE). He has done an outstanding job. This committee has tried to do an outstanding job. But, Mr. Speaker, I think it is the height of hypocrisy when the Committee on Ways and Means is in fact instructed by the majority leadership not to bring a bill out to solve the problem of social security because they want the political issue.

I think quite frankly that the American people should know that that is exactly what we are hearing here today partisan rhetoric, not a solution.

Mr. PICKLE. Mr. Speaker, I yield such time as he may consume to the gentleman from New York, (Mr. PEYSER).

Mr. PEYSER. I rise in support of the social security conference report. The Congress should be ashamed of the fact that it supported the administration's program to eliminate the 3 million person who were covered under the minumum benefit plan. These were the poor and the elderly. I am pleased that this action will restore the benefits to these needy people.

Mr. Speaker, I am unhappy, however, that we did not leave the program as it was orginally. After January 1, 1982, there will be no additional people eligible for the program. I hope in 1982 the Congress will address this problem.

Mr. PICKLE. Mr. Speaker, I yield 2 minutes to the gentleman from Connecticut (Mr. RATCHFORD).

Mr. RATCHFORD. Mr. Speaker, what we find today is typical of the sometimes impossible choices at the end of any legislative session. Generally they focus on an area where the choices are those that neither side likes. We have that type of situation today.

I cannot help recalling the earlier reference to an old movie series, the "Perils of Pauline." In that silent move scenario, after much tension and high drama at the last moment the heroine was always saved.

We engage in that type of saving today, but I would say to those who participated in the drama that the high drama and tension really was not necessary. That tension falls on those who need it the least, the frail elderly. In this case, 3 million Americans in their seventies, eighties, and nineties.

Let us look at a script. It did not begin with a previous administration, it began with this administration, at the White House, with David Stockman. It continued with the script that was called Gramm-Latta. It continued with a vote on reconciliation, and today I cannot find one Member who admits that when he voted for Gramm-Latta they voted to eliminate 3 million Americans on social security.

□ 1200

Well, now we are finally doing something about it. We are going to do the humane and right thing. We are going to restore those benefits.

This, indeed, is the only proper thing to do. A satisfied choice, no. I do

not like what we are doing to future beneficiaries. I do not like a tax on sick benefits. I do not like what we are saying to those currently receiving benefits, because we are saying Government, this Government, is prepared to cut those who have a contract with the American Government; but the choice is ours and other options do not exist at this late date.

To the Committee on Ways and Means, I applaud your effort. It is the only proper thing to do. Let us be on with it before we adjourn today.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 1 minute to the gentleman from New York (Mr. DOWNEY).

Mr. DOWNEY. Mr. Speaker, we have learned a whole new political lexicon over the last few years. We have heard that a double dipper is somebody who has earned the right to two pensions and is suddenly somebody to be looked upon as a grasping and conniving selfish individual because they are concerned with their retirement; that the whole notion of why we are here can only be stated in one simple and clear way. One party views the people who had been receiving minimum benefits as the front line soldiers in the sacrifice for inflation. Another party recognizes that governments are organized to help people and, indeed, the poorest of the poor to be able to fend over the high cost of living.

I think that my party, as pointed out by the gentleman from Connecticut, Mr. MOFFETT, stands for something. It stands for the minimum benefit. We would not be here today if we had not cut it originally, in my opinion, a vain and futile attempt to deal with inflation by screwing the people who are least able to afford it.

Mr. ARCHER. Mr. Speaker, I yield 1 minute to the gentleman from New York (Mr. CONABLE).

Mr. CONABLE. Mr. Speaker, I have no objection to people earning two pensions, but it does seem to me that when part of one pension is unearned, they are in an odd position to say that we have earned our unearned benefits.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 1 minute to the gentleman from Texas (Mr. PICKLE).

Mr. PICKLE. Mr. Speaker, we are nearing the end of this debate with only one or two speakers remaining.

I would point out that there is very general agreement on the conference. I would hope we would receive a unanimous or near unanimous vote on this conference.

There are only two areas where there is some contention, that is in the question of the use of interfund borrowing and the question of eliminating prospectively the minimum benefit. Both of these issues will be faced by the Congress a year from now whenever we address these problems.

The main thing to remember now is that we are in general agreement on the overall purpose of this bill. This is approved by the Social Security Administrator, Mr. Svahn.

It is approved by the conferees.

It has the endorsement of Mr. Wilbur Cohen, former Secretary of HEW and HHS; Mr. Bill Driver, the former SSA Administrator, and of Robert Ball, the former SSA Administrator.

I think nearly all parties are in agreement that this conference report should be adopted. As we adopt it, let us be resolved that we will responsibly address the problems of the whole social security program next year—and do the responsible thing and the right thing for our elderly citizens.

Mr. ARCHER. Mr. Speaker, I yield myself 12 minutes.

Mr. Speaker, over the years too little time and attention has been paid to social security and all of its complexities and ramifications by the Congress of the United States, despite the fact that it was growing to a level where it is today only second to defense in the total number of dollars that flow out of Washington.

I think it is well today to briefly examine the history of the Congress and the social security system over the past 15 years. Unfortunately, it is not an attractive narrative in fiscal responsibility. The latest chapter being written today does not improve on that record. Here are just a few of the episodes from the chronological facts in the Journal. Throughout all the years in which the Congress voted benefits to social security recipients, usually just before election time, those benefits on a cumulative basis far outstripped advances in the cost of living. For example, over a 5-year span from 1968 to 1972, the Congress increased benefits nearly 72 percent across the board at a time when the Consumer Price Index was rising at at a rate of less than 5 percent per year.

In one of those years, 1972, the Congress really outdid itself. It passed a 20-percent across-the-board increase in benefits, without providing 1 additional cent of tax revenues to pay for that increase. It was an irresponsible act on the part of this body and it helped bring the social security trust funds to the edge of bankruptcy later in the decade.

Only a few of us in this Chamber today were present on that occasion, fewer still may remember it. There were only 35 votes, including mine, against the motion.

If this one step had not been taken, the system would not have faced the crisis that erupted in 1977. But a major crisis did develop and Congress again handled it inadequately.

Some of my Republican colleagues and I offered a program that year to strengthen the system, not only financially, but structurally. The trust funds would have been placed on a sounder basis over the short run and the long run and, importantly, the equity of social security would have been improved dramatically; but that proposal was dismissed almost out of hand by the same majority which controls the House today.

Instead, the Congress enacted the largest peacetime tax increase in our history, and then President Carter and the leaders of this body told the Nation they had made the social security system solvent for at least 25 years. They were short by only 20 years.

When it became obvious recently to anyone who bothered to read the trustees' reports that the trust funds were going broke again, a new drive began to stabilize social security. A leader in this effort was, and continues to be, the chairman of our subcommittee, the gentleman from Texas (Mr. PICKLE).

Under his leadership, the subcommittee made real progress, on a bipartisan basis, toward a reasonable set of solutions to the myriad problems besetting the system, reforms that are fair to young as well as old Americans. Seeking help from the executive branch, the chairman and some subcommittee members, including me, put strong pressure on the administration to come up with its own proposal.

In response to this importuning, the administration did propose a comprehensive package. Not all of its provisions were embraced enthusiastically by the subcommittee, the public, or by me; but it did provide the framework for Congress to hammer out bipartisan reforms. Unfortunately, we failed to take advantage of that opportunity.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. ARCHER. I would be happy to yield to the gentleman from California.

Mr. ROUSSELOT. So we could have had a reform bill here on the floor, this session, because we were making progress in the subcommittee had the Democratic leadership decided otherwise?

Mr. ARCHER. Absolutely.

Mr. ROUSSELOT. And the chairman, the gentleman from Texas (Mr. PICKLE), as the gentleman has indicated, has tried on a very bipartisan basis to try to bring that to the floor, the reform of the social security system.

Mr. ARCHER. Yes; the gentleman is correct.

Mr. ROUSSELOT. To save it.

Mr. ARCHER. The gentleman is correct again.

Now, at this point I should make it absolutely clear that the administration package, which addressed both short- and long-term social security issues, did not include a provision to

eliminate the minimum benefit retrospectively.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield at that point?

Mr. ARCHER. I will be happy to yield.

Mr. ROUSSELOT. The gentleman had better repeat that. I do not think we all understand that.

Mr. ARCHER. The administration proposal, made at the importuning of the social security chairman and *myself*, did not include a provision to eliminate the minimum benefit retrospectively.

That provision, which originated neither in the Department of Health and Human Services nor in the Social Security Administration, came to us separately as one of many recommendations in the budget reconciliation bill.

My views on this particular item remain unchanged. Although it is philosophically supportable, I thought it was a bad idea in that context and I agreed with my colleagues on the subcommittee that the minimum should be eliminated only on a prospective basis.

I emphasize that point, because the minimum benefit is not the problem here today in this conference report. We have all agreed to restore it retroactively, and if that were the only provision in this conference report, I would support it.

But to get back to the chronological record, the administration deserves credit for sending us a major reform package on social security to prevent its bankruptcy.

Unfortunately, that package was not an impetus in our deliberations, because the leadership of this body used one feature of it, along with a fabricated furor over the minimum benefit, to turn the entire social security debate into a name-calling, arm-waving sideshow.

In the midst of this unpleasantness, some of us have remained in lockstep with the gentleman from Texas (Mr. PICKLE), trying in vain to keep social security in perspective. I think the chairman of the Committee on Ways and Means, the gentleman from Illinois (Mr. ROSTENKOWSKI) shares our concern. I think he, too, would like to address the full range of social security issues responsibly and directly; but his hands also appear to be tied.

It seems clear that if the top leadership of this body had not stood in the way, our subcommittee would have already completed markup, as the gentleman from California said, on a bipartisan bill addressing the tough, critical decisions needed now to stabilize the social security system, short and long term; and I am convinced that truly constructive social security reform can occur only through a bipartisan effort.

But the House majority leadership precluded us from taking any steps forward, and now this conference report will delay us even more.

While the House was being straitjacketed by its leaders, the other body passed legislation which at best would have postponed for about a year the bankruptcy of the system's major trust fund, the retirement fund. I cannot say that they acted responsibly, because at worst, their bill could have led to irreparable damage by paving the way for general revenue financing of social security.

Because this Chamber did nothing, the prospects for a satisfactory conference were grim from the very start. With the possibilities for action ranging between zero and the pitiful package presented by the other body, there simply was no hope for a truly constructive compromise.

The only way out on a reasonable basis for the conferees was to retain the minimum benefit for those already receiving it, to eliminate it for those coming on the rolls in the future, and to do nothing else; to strip all the interfund borrowing out of the bill and to strip the coverage of sick pay out of the bill, and that was what I urged in the conference committee. If we had done that, the Congress would have had to bite the bullet which has been talked about so much. We would have been forced to take more definitive action within the next few months. The Congress would not have been able to sidestep the crucial test any longer, because if nothing is done, the old age and survivors insurance trust fund will run out of money, starting next fall, and the Congress never would let that happen. It would simply have to act, and act now.

Under the conference agreement, the problem can be swept again under the congressional rug, and so will end another sorry segment of the social security story, because once again, the conferees asked us to make a decision for purely political reasons. Instead of putting the interests of beneficiaries and taxpayers first, it is clear that this conference report is designed solely to get us through the next election.

The most compelling reason to oppose this measure is that it causes us to lose almost a year of leadtime, which we badly need to phase in some of the reforms we might elect to embrace. I doubt that anyone in this Chamber wants to act precipitously in making social security changes; yet by failing to require action now, we will be forcing ourselves precipitously to the edge of a social security default cliff.

□ 1215

We should be coping with these issues now, election year or not.

A responsible answer to social security's core problems never will be found painlessly. No constructive solution will be easier with the passage of time. I think we are kidding ourselves on this point.

The device of interfund borrowing is a tricky one which should not be used except as part of a larger, more comprehensive social security reform package. Standing alone, it has a "primrose path" aspect, with the potential for luring us closer to the general revenue financing trap. If we fall into that one, the social security system falls with us.

There are no general revenues, and once the Treasury starts borrowing money to pay social security benefits, several consequences are as inevitable as sunset. First, interest rates and then the inflation rate will start rising again. Second, pressure will mount to control benefit escalation through a needs test. Third, social security as we have known it will no longer exist; it will become just another set of welfare programs.

There is another major flaw in the conference report, Mr. Speaker. It has to do with subjecting additional so-called sick-pay income to the social security tax. This is a very complicated issue, with ramifications which we have not yet even identified, much less examined. There have been no hearings on the subject, and it is clear the action taken even exceeded the proper scope of the conference.

The SPEAKER pro tempore. The time of the gentleman has expired.

(By unanimous consent, Mr. ARCHER was allowed to proceed for 1 additional minute.)

Mr. ARCHER. Mr. Speaker, the Senate bill covered "sick pay" paid directly by the employer, but did not include all "sick pay" covered by insurance companies. The conference agreement goes even further and includes "sick pay" covered by insurance companies, which is normally less than the average take-home pay of the employee, and now this conference report will strap on that employee another payroll deduction at a time when he can least afford it. This is not the answer to the long-term or the short-term problems in social security.

Let us not grind away at the vulnerable worker in our haste to make a show in this bill, but as elected officials let us find a thoughtful approach to truly reform the social security system and restore confidence in its long-term stability.

I truly believe that if the conference changes become law, we will consume much time and effort in the future, trying to correct the mistakes we will be making today.

For all of these reasons, Mr. Speaker, I am opposed to the conference report on H.R. 4331. I know that I represent a minority, and a very small

one at that. But the years ahead will confirm the accuracy of my statement.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 5 minutes to the gentleman from Texas (Mr. WRIGHT) to conclude debate.

Mr. WRIGHT. Mr. Speaker, I rise in support of the conference committee report. It evokes from me, as I think it does from most of our Members, a combination of gratification and disappointment.

We are gratified because at long last we have been given an opportunity to restore to some of the oldest and poorest and most politically defenseless people in our society the benefits which were taken from them when we passed, almost sight unseen and unknowingly the document known as Gramm-Latta II.

We are disappointed, of course, because even with this restoration to those 3 million elderly Americans of the benefits that they had enjoyed before they were taken away from them by the Gramm-Latta proposition, in exchange and as a pound of flesh demanded by the other body, we have had to deny future beneficiaries these same benefits and have had to require that those receiving sick pay shall be taxed.

Probably the cruelest and most unfeeling injury inflicted on the day that we passed Gramm-Latta II, a compendium of cruel and bloodless deeds written by the Office of Management and Budget, was taking from these 3 million Americans this meager $122 a month benefit.

But let us not delude ourselves. We have not restored to those Americans, nor let them be deceived into thinking that we have, all the cruel things that have been performed by this and other deeds in this Congress, to the elderly of our land.

Students, children dependent upon social security beneficiaries, have had their educational benefits stripped away.

Other retirees, military and civilian, have had their benefits reduced. Railroad retirees have suffered harsh reductions in the benefits to which they were entitled at the beginning of this year.

Such programs as Meals on Wheels for the elderly shut-ins have been harshly cut by this Gramm-Latta proposition and by other reductions in programs to benefit the elderly of this land.

Only a week ago we voted to take $100 million from the funds that were available to administer social security benefits.

So let us make no mistake about it. Social security beneficiaries and the elderly of our country have borne a disproportionate share of the burden of trying to balance this budget.

And let there be no mistake whatever that the so-called package of reforms that was offered to us earlier this year in the name of the administration by Secretary Schweiker had as its primary and principal purpose reducing the deficit on the backs of the social security beneficiaries. That package of so-called reforms would have reduced payments to social security beneficiaries by some $70 billion over the next 5 years. Its purpose was rather cynically stated by the Director of the Office of Management and Budget in the Atlantic Monthly article when he said:

> The social security problem is not simply one of satisfying actuaries; it is one of satisfying the here and now of budget requirements.

And then perhaps the most cynical thing of all revealed in that article: "despite the political uproar," it says on page 45, "Stockman thought a compromise would eventually emerge on social security." And I quote from the words attributed there to Mr. Stockman:

> I still think we will recover a good deal of ground from this . . . It will permit the politicians to make it look like they are doing something for the beneficiary population when they are doing something to it which they normally would not have the courage to undertake.

I want to address myself to one misconception.

There has been a statement to the effect that the majority leadership has prevented the Ways and Means Committee from bringing to the floor a bill which would cure the problems of social security. That is not true. I am the majority leader; I made no restriction, nor uttered any such discouragement. But let me assure you, so long as I may be the majority leader, I will doggone well try to use whatever influence I may possess to assure that we shall not, under the misbegotten name of reform, reduce social security beneficiaries' payments that our elderly Americans have entitled themselves to over a lifetime of work.

I am committed to the proposition that we shall preserve and protect the integrity of the social security trust fund, and that we can and shall do this by means other than reducing benefits.

This bill restores one of those benefits. It originated in the House. It was diluted in the Senate. It represents movement in the right direction. It deserves to be supported.

Mr. PICKLE. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. I yield to the gentleman from Texas.

Mr. PICKLE. Mr. Speaker, I, too, regret that we were not able to proceed in the House and that the leadership deferred for action to the Senate. I equally regret that the President never formally sent to the Congress a social security bill and that the other body never introduced a bill or advanced their own position.

Politically, perhaps, both sides were correct. Legislatively, we are wrong in not doing something. I think we ought to just stop the finger-pointing and get back to work next year.

Mr. LIVINGSTON. Mr. Speaker, section 7 of the pending comference committee report mandate a study of a serious problem that I have addressed in a bill I inteoduced earlier this year. Specifically, Mr. Speaker, the Social Security Administration is sending social security checks to beneficiaries who are no longer living. While reasonable people may argue over the appropriate solutions to the general problems faced by the social security system, surely everyone can agree that social security benefit checks are too precious to be paid to anyone but the living.

Deceased beneficiaries receive social security checks because the Social Security Administration has no systematic way of knowing when a person has died. Once an American goes on the social security benefit rolls, he is all too often likely to remain there unless his death is voluntarily reported by his relatives, the Postal Service, the funeral home director or, if the decedent died in the course of hospitalization covered by medicare, by the hospital to the Health Care Financing Administration, which in turn reports the death to the Social Security Administration.

H.R. 5076, which the gentleman from Louisiana introduced on November 20, 1981, for himself, 20 original cosponsors, and 29 additional cosponsors, would have the 50 States share their death statistics with the Social Security Administration on a semiannual basis. Every State requires that each death be recorded, and the information is retained in a retrieval system that is automated to some extent, except in the State of Arizona and the District of Columbia and the Virgin Islands.

A recent investigation by the Office of the Inspector General of the Department of Health and Human Services proves that the current piecemeal system of death notification is grossly inadequate, and that State death records must be made available to the Social Security Administration. The investigation, known as Project Spectre, has revealed about 8,500 cases where medicare records showed a person was dead, but social security benefit checks kept going out. HHS estimates that over $60 million in benefit overpayments—which count as debits on the social security trust funds, whether or not the checks are cashed—will have been found when all of these 8,500 cases have been fully investigated. To date, however, the Inspector General has found that in

about 1,100 of these cases, checks totalling $14.3 million were sent to deceased beneficiaries. HHS presently estimates that it will save $26 million—in the first year alone—once it removes the names of the dead from the benefit rolls.

While the loss of these millions is disturbing enough, it should be remembered also that these figures do not take into account the administrative costs and printing costs of printing unnecessary checks in the first place, mailing the checks, investigating possible overpayments, recovering overpayments, and handling and processing checks that are returned by conscientious survivors of the deceased beneficiary. As the General Accounting Office has noted, in 1978 alone some 1.5 million benefit checks were returned to and handled by the Social Security Administration.

The millions of dollars in overpayments also do not reflect the frustration of some diligent survivors who try to have the checks stopped by reporting the beneficiary's death, only to find that somehow this simple message "does not compute": the checks keep coming. The gentleman has one constituent who, until last month, received benefit checks payable to his late mother, who passed away in 1973. After a number of attempts, both by telephone and in writing, to have the checks stopped, the 100-plus checks—none of which had been cashed, though each of which counted as a "withdrawal" from the trust funds—were sent by the gentleman's constituent and are in the process of being returned. By the way, these checks were in amounts ranging from $175 to $369 and totalled thousands of dollars—just for one person.

There is only one place to attack this problem: at the source. We must give the Social Security Administration the tools it needs to keep these checks from going out in the first place. A GAO report sums up the situation nicely in its title: "Social Security Should Obtain and Use State Data to Verify Benefits for All Its Programs" (Report HRD-80-4, October 16, 1979). H.R. 5076 would accomplish this. Moreover, it would conform to State laws that make death information private, in that it would amend current law so as to allow access to the State provided information only by close relatives of the decedent.

Mr. Speaker, the Social Security Administration is diligently working on this problem, which it discovered. But it needs the help of the Congress and the States, just as it provides help to the Congress and the States through the 70 million personal beneficiary files it gives to the States to help them administer progams like food stamps, medicaid, supplemental security income, and aid for families with dependent children.

Let us complete the exchange of information so as to assure the effective administration of all taxpayer-funded programs. Surely we are seeing only the tip of the iceberg in the $60 million in social security checks to the dead discovered so far. We cannot afford not to correct this most serious problem.

Mr. CONTE. Mr. Speaker, I am pleased to see that the House and Senate have taken action on the social security minimum benefit issue. The move to eliminate the minimum benefit, as contained in the omnibus reconciliation bill, was something I opposed from the beginning.

My vote against final passage of the omnibus reconciliation bill was predicated on my disagreements with various provisions in that bill to include the elimination of the social security minimum benefit. I felt that in passing such a provision, the Congress was violating a convenant between the Government and the citizens who receive the minimum.

To me, the social security program, despite some shortcomings, is an ideal social program that has worked well since its beginning in the mid-1930's. There is no question that we need to make some changes to the program to keep pace with the times. But the changes should not be made in a piecemeal fashion at the expense of those who receive the benefits.

As one who voted to restore the minimum benefit in late July, I felt that we in the Congress, as representatives of those who receive the minimum benefit, could reverse ourselves in the wake of what I consider to be an oversight on the part of this body.

● Mr. RODINO. Mr. Speaker, I think it is shameful that we find it necessary to consider this social security minimum benefit bill at all. The 3 million Americans—most of them low-income elderly—who receive the $122 monthly check should never have been cut off so senselessly by their Government.

Last June the administration's budget proposal eliminated the monthly minimum benefit in the interests of fiscal austerity. I strongly objected to this proposal as a cruel and impractical way to balance the budget. I pointed out that more than 500,000 people who receive the monthly minimum benefit are over 80 years old and rely almost exclusively on the program for survival. Also, a staff study of the House Aging Committee pointed out that it would cost the Government more money to eliminate the minimum benefit than to leave it alone—because about 600,000 people would be forced onto the welfare rolls.

Yet, the House rushed blindly into passing a reconciliation bill which embodied the President's plan, and then, realizing its folly, passed a separate resolution restoring the benefit.

Two months later, after millions of Americans voiced their shock and anger at the administration's social security cuts, President Reagan declared he had changed his mind and was abandoning his proposal. The Senate then passed a resolution partially restoring the monthly minimum benefit.

Throughout all these twists and turns millions of elderly men and women endured the uncertainty of not knowing if they would receive the monthly benefit they had come to rely upon for basic existence. Even worse, their checks were cut off as of October 1.

The conference report we are faced with today restores this minimum benefit to those who had been receiving it. But it does not offer a solution which I can wholeheartedly support—because it fails to continue the benefit for those retirees who turn 62 after December 31 of this year and members of religious orders who turn 62 after October 1, 1991. I am also disturbed by the Senate amendment embodied in the conference report which makes the first 6 months of sick pay subject to the social security tax—except for worker compensation payments and employee contributions to a sick pay plan. These limits betray the trust our working men and women have put in their Government to live up to its part of the social security contract.

But I will vote for the conference report because it is essential to continue the benefit for present recipients. Also, the conference report prudently authorizes interfund borrowing through December 1982 to insure the fiscal viability of the social security system until Congress acts on a more permanent solution to the social security funding problem.

It is my hope that when Congress takes up this task in the near future, the fate of our Nation's elderly will be handled with greater thought, compassion and consideration than it has been during the months of contradictions put forth by the Reagan administration on the minimum benefit issue. I hope that in the future the administration will be more sensitive to the needs of our elderly citizens before formulating its budget policies.

The monthly minimum benefit is the difference between starvation and subsistence for many older Americans, and this conference report will correct an injustice that was done them earlier this year. I support it. At the same time, I look forward to full consideration of the issues it leaves unresolved for providing a guaranteed social security system for America's future.●

Mrs. SCHNEIDER. Mr. Speaker, I rise in strong support of the conference report to accompany H.R. 4331 and urge its approval by the House.

I have spoken on the floor on many occasions in the past concerning the

vital need to restore the $122 minimum social security benefit. In our much-needed attempt to bring solvency and long-term health to the social security trust funds, it is important that we examine approaches which do not mean a reduction in benefits received by current recipients. This bill will correct the inequity caused earlier this year in that regard. While this report will not provide the minimum benefit for those entering the rolls after January 1, 1982, it will bring needed relief to millions of recipients who saw their benefits reduced. I, for one, would like to include the question of a permanent minimum benefit for new recipients as an item for debate when the social security question is addressed in a more comprehensive manner in the next session. It is important to remember that the vast majority of minimum benefit recipients are older, widowed, or single women.

The committee's work with regard to interfund borrowing is to be commended as well. This will allow for a longer period of serious examination and debate over the social security system as a whole. It is unfortunate that the committee chose to include the first 6 months of sick pay as income. While this move will recover a great deal of the cost of restoration of the minimum benefit, I would like to include this as well in the more comprehensive review to come.

In short, this conference report represents a reasonable and necessary reaffirmation of this Nation's commitment to a viable, equitable social security system and restores the faith placed in the system by millions of Americans who receive the minimum benefit. I strongly encourage a favorable vote.

● Mr. MATSUI. Mr. Speaker, I rise to applaud the decision of the conference committee in sustaining the right of all retired public employees to equal protection under our Federal social security laws. The conference committee has selected to reject that provision in the Senate bill which would have required an offset of public employees' social security minimum benefits dollar-for-dollar if their civil service pension exceeds $300 a month. This offset requirement would have attached exclusively to retired public employees, and not private sector annuitants.

I was particularly alarmed at the potential adverse consequences which this inequitable provision could have had on many of my constituents who reside in my congressional district. The Third Congressional District of California includes the State capital of California and the regional headquarters of numerous Federal programs. Many of my constituents are retired public employees who have committed their professional careers to serving these public agencies. Currently residing in my district are 11,417 constituents who receive Federal retirement benefits. In addition, Sacramento County has 1,716 county and 1,230 city retired employees within its bounds. California has 27,551 retired State employees who receive both social security and State retirement benefits. Despite many inquiries to the Social Security Administration, I could not obtain exact information on how many of these individuals would have been subject to this discriminatory provision.

Given the potential harm of this Senate provision on my district, I advised the chairman of the Ways and Means Committee in early November that I could never support any legislation which could so deleteriously affect such a significant number of my constituency. I am now pleased that the Conference Committee has elected to recognize that retired public employees have made contributions to the social security system in the same manner as any other social security beneficiary and deserve thereby commensurate benefits.

My specific concern on the public employee offset provision by no means diminishes my interest and support for the restoration of social security minimum benefits for current beneficiaries. I have been an advocate of this critical social security benefit program given the demographic nature of the population affected. It has been estimated that 75 percent of the current 3 million beneficiaries are aged women, many of whom are older than 75. These are retired and disabled women workers, or widows of retired and disabled workers who need the benefit to survive. These are persons who have contributed substantially to the economic viability of this country. I believe this Nation is sufficiently wealthy to afford these persons $122 per month in retirement benefits so that they may maintain some dignity in the closing years of their lives. I applaud the conference committee's recognition of this humane principle.●

● Mr. FRENZEL. Mr. Speaker, the bill before us today represents another lamentable chapter in the book of congressional cowardice concerning the social security system.

This year, the Congress had an opportunity, and an obligation, to make fundamental changes in the social security system in order to insure its long-term solvency. Instead, the House majority leadership, against all of the advice of the most distinguished experts, inside and outside of Government, deliberately chose not to consider any comprehensive social security refinancing plan.

This meager bill is the only social security bill the leadership would allow to come to the floor, although several comprehensive refinancing plans were proposed, and considered, by the Social Security Subcommittee. I believe the House has copped out. It has refused to make social security secure.

However, the bill is not a totally wasted effort, and does take care of a few of the myriad of problems facing the social security system. For that reason I shall vote for it even though it does not do the full job.

The bill extends interfund borrowing between the various social security trust funds for another year. This will help to delay the arrival of a major social security crisis for a short time. And it has the advantage of forcing another decision at the end of the year. Unfortunately, it will put an even more critical social security financial crisis squarely in the lap of a lameduck Congress, as it is doubtful that the majority leadership will have the courage to allow a major social security bill to be considered before the 1982 elections. Lameduck Congresses have never been a good environment to consider major legislation, and there is no indication that next year will be any different.

There is another problem which is more difficult to define. The conferees added a Senate amendment which had the laudable intention of balancing revenue loss to social security from reinstating the minimum benefit with new revenues derived from taxing for social security certain sick pay benefits. That is a good idea, but the House has had no hearings on the subject. We do not know the effect of the new tax. We do not know who is affected. There are enough unanswered questions to make me very nervous about this feature of the bill.

The bill reaffirms the Congress commitment not to reduce the benefits of current beneficiaries, by maintaining the minimum benefit for those individuals who are currently receiving it. The bill also eliminates the social security minimum benefit for future beneficiaries. This will result in the benefits of all future retirees being computed according to the same general formula. It will also eliminate a major revenue drain on the system's finances which has been created by individuals paying negligible amounts into the system, and receiving comparatively sizable benefits in return.

Today's bill brings us one step closer to a major social security financial crisis, without a comprehensive solution. I do still, however, harbor some hope that the Congress will take the necessary steps to develop a comprehensive social security refinancing program, so that 35 million Americans who rely on social security for their retirement support, and the 117 million who are paying into the system, will not have to live in fear of ever losing their earned benefits.

● Mr. ALBOSTA. Mr. Speaker, one of the most difficult and challenging

issues facing the Congress this year is reforming the social security system.

The Congress has a responsibility to keep its commitment to those who have retired or are nearing retirement. We cannot back down from this commitment and I am convinced that we will not. Furthermore, Congress will be working in the months ahead to insure that the social security system remains solvent. Financial problems of the long and short term must be addressed.

No proposal has generated as much public debate and controversy as the proposed elimination of the minimum benefit. The social security minimum benefit represents the sole income of approximately 3 million of the 36 million social security recipients. This minimum benefit provision, which was first enacted in 1939, is designed to increase retirement income for those with low-wage histories and for those whose employment was primarily before social security covered their work in the system's early years. Those persons who are now receiving the $122 monthly minimum benefit are generally elderly women who did not have an opportunity to work full time or earn a reasonable salary. More than one-half of minimum benefit recipients are over 70 and more than 500,000 are over the age of 80. It is clear that the elimination of these individuals could only mean additional hardship.

In addition to restoring the minimum benefit for all current recipients, the conference report calls for interfund borrowing. I have long supported the concept of borrowing between the old age and retirement trust fund, the disability insurance trust fund and the health insurance trust fund. I believe this action is necessary to help the retirement trust fund through this time of great concern.

There have been many attacks on the social security system, questioning its solvency. It distresses me greatly that so many Americans have been caused tremendous and I might add, unnecessary, anxiety over their social security. My constituents of the 10th Congressional District of Michigan have contacted me expressing their fear and anger regarding the proposal to reduce and/or eliminate social security benefits. Let this action here today send a clear signal to our citizens that the Congress is reaffirming its commitment to maintaining a financially sound social security system without cutting benefits. This action should reassure all Americans, those working and those who are retired, that the Congress is dedicated to resolving the problems facing the social security system and that the Congress will continue to work toward that end.●

● Mr. HEFTEL. Mr. Speaker, I rise today in support of the conference version of H.R. 4331, concerning social security minimum benefits for retirees. I am pleased that House and Senate conferees have reached an agreement on this issue which is critical to millions of older Americans.

The importance of retaining the social security minimum benefit for current retirees has prevailed in conference, and I am pleased that Senate conferees have followed the House lead on this issue. The overwhelming House vote of 404 to 20 earlier this year to retain these benefits for current retirees is evidence of the unyielding support by the House for our Nation's senior citizens.

As first proposed by President Reagan earlier this year, elimination of the minimum benefit for 3.1 million retirees who have come to depend upon this small, monthly check for their livelihood would have been an unconscionable act. The economic security of this segment of our Nation's elderly population was at stake. The cost savings from such a shortsighted proposal would have been miniscule in comparison to the human suffering that would have resulted.

I remain concerned, however, about the conferees' agreement to eliminate the minimum benefit for older Americans retiring after December 31, 1981. For many of these retirees, the minimum benefit could be their sole or primary source of income. In this time of grave economic instability and spiraling inflation rates, this monthly benefit could provide a small but important source of income for these retirees. Coupled with President Reagan's cuts in programs to aid the elderly poor, the elimination of the minimum benefit could bring severe hardship to this group of Americans.

Despite my objection to this provision of the conference agreement, I feel that the bill before us is the best possible compromise that could have been reached by the House and Senate conferees at this time. It addresses one of my primary concerns, as well as the concerns of a majority of my House colleagues—safeguarding social security minimum benefits for those now receiving them. I urge my colleagues to support the conference version of this legislation.●

● Mr. BENNETT. Mr. Speaker, I rise today to commend the members of the conference on H.R. 4331 for their agreement on restoration of the minimum benefit for those persons currently receiving it and for those eligible to receive it up to January 1, 1982.

I think virtually all of us would agree that the minimum benefit should be restored. Its elimination through the Omnibus Reconciliation Act of this summer caught most of us by surprise, and put all of us in a position we'd now like to reverse.

Immediately after passage of the Omnibus Reconciliation Act of 1981, I introduced H.R. 4212 to restore the minimum social security benefit to those who are currently receiving it and to those who would have become eligible to receive it over the next 3 years. I am certainly pleased that the conference has brought us a part of what I recommended and I urge all the Members of this body to vote in favor of it.●

Mr. HOLLENBECK. Mr. Speaker, I rise in support of the conference report on H.R. 4331, legislation restoring the minimum social security benefit for all current recipients.

This action is necessary to insure that the 3 million Americans currently entitled to the minimum benefit, many of whom have few if any other sources of income, do not suffer undue hardship.

I am pleased that my colleagues on the conference committee agreed to abandon the Senate provision which discriminated against the Federal retiree. However, as a past strong supporter of legislation restoring the minimum benefit for everyone eligible, both present and future, I regret that my colleagues did not see fit to support a compromise bill that granted benefits to future beneficiaries as well. In view of the fact that immediate steps are required to restore the minimum, I will cast my vote for H.R. 4331 with these reservations and will continue to work for full restoration of the minimum benefit.

● Mr. NELLIGAN. Mr. Speaker, I will vote in support of this conference report on minimum benefits today, but I feel it is only half a loaf.

I am very pleased that current minimum benefit recipients and those that will become eligible before the end of this year will continue to receive the benefit.

I am glad that the provisions the Senate added to take away the minimum benefit from certain Government pensioners has been eliminated.

And I believe that it is only appropriate and fair that members of religious orders continue to be covered by the minimum benefit, which they will be under this legislation.

This conference report has the further advantage of insuring the short-term solvency of the social security system by allowing funds to be borrowed from the health and disability trust funds for use in the hard-pressed retirement fund.

These are the positive points in this conference report, but I regret to say that there are at least two negative points.

First, the minimum benefit will not be continued for those coming onto the social security rolls next year and thereafter. The 1977 social security legislation already includes provisions to allow for the gradual phaseout of

the minimum benefit. I oppose accelerating this process.

Why should we deny these benefits almost overnight to thousands of deserving people? I, myself, am particularly concerned over the thousands of homemakers who had the responsibility of keeping house and raising families, and who could not go out and work in the labor force for the years required to obtain more adequate social security benefits.

This conference report also allows for the first 6 months of sick leave to be taxed. I find it unfortunate that those who are struck by misfortune must be taxed. Why take from one needy group, the sick, to give to another needy group, the minimum benefit recipients?

Mr. Speaker, I feel that I must vote for this conference report because the good outweighs the bad. If we do not pass this conference report, present minimum benefit recipients will lose out, and that it is something I cannot condone. I feel it is important that we do what we can now, but I hope that legislation can be passed in the future to continue the minimum benefit for prospective recipients.

Equity must prevail.●

● Mr. DREIER. Mr. Speaker, I rise to voice my strong support in favor of the conference report which accompanies H.R. 4331. If we do not today pass this report, then we will indeed be perpetrating a cruel hoax on the millions of people who depend on receiving the minimum benefit. Balancing the budget at the expense of those who depend on this benefit is simply an unacceptable alternative. We in Congress have an obligation to treat social security beneficiaries with the utmost of dignity and respect.

I would also add that the provision of this report which authorizes interfund borrowing between the OASI fund and the health and disability insurance funds is both timely and essential if we are to maintain the short-term solvency of social security. In the long run, however, difficult decisions must be made to protect the financial integrity of the entire social security system. These efforts must be sincere and bi-partisan. Social security is too important to too many people to simply be bandied about as a political football.●

● Mr. STARK. Mr. Speaker, we have before us today a conference agreement on social security minimum benefits that does not completely restore those benefits. It does restore them for the 3 million current recipients, but those who become eligible after this year will still lose the minimum benefit floor. I am not happy about this compromise, but I rise today in reluctant support of the agreement, because I believe it is crucial to restore benefits for the 3 million elderly poor citizens who have been held in cruel suspense since July, not knowing whether their benefits, in many cases their sole source of income, would be taken away from them.

This conference report is not perfect, and it is not what I would have wished to see; I would have preferred to see the House hold firm on its position to restore the minimum for all recipients, both current and future. The House very properly reversed itself on eliminating this benefit last August, at the very moment that we were finally approving the massive budget cuts in the omnibus reconciliation bill. We recognized then, as I do now, that elimination of the minimum benefit constituted the most blatant example of balancing the budget at the expense of the elderly poor, and we voted to restore the benefit completely.

The Senate, however, made extensive changes in our bill, limiting restoration of the minimum benefit only to some current beneficiaries, penalizing those current recipients with Government pensions severely, and eliminating the benefit for future beneficiaries. Furthermore, as the price for even this meager restoration, the Senate wanted to severely cut benefits for families of retired and deceased workers. In other words, they restored the minimum benefit for some current beneficiaries at the expense of widows and children receiving family benefits.

The House conferees, under these circumstances, made what I must concede is the best compromise we can expect. The cut in family benefits was rejected, the minimum benefit was restored for all current beneficiaries without exception, and borrowing among the three social security trust funds was provided, so that all beneficiaries can rest assured that their benefit payments will continue without interruption.

I very much regret that the House conferees could not have gone further, and held their position on restoration of the minimum benefit for future beneficiaries as well. But I do not think any better compromise can be expected, even if we reject this report now and require and conferees to meet again now or in January.

I cannot in good conscience vote against this report now, knowing that if no agreement is reached before we adjourn today, 3 million elderly Americans will receive a notice on January 6, informing them of the loss of their benefits in March. The suffering and confusion this would cause must be avoided at all costs and we must act now to remove all doubt from these elderly people's minds about whether their benefits will continue. It is for this reason, and because I do not feel any better solution will be reached later, even if we delay, that I reluctantly support the conference agreement.●

● Mr. OBERSTAR. Mr. Speaker, I rise in support of the conference report on H.R. 4331. I do so, not with enthusiam, but out of a sense of realism, that this is the best we can do for the needy of our society under the Reagan administration and in this dispassionate Congress.

I do want to express my respect for Chairman PICKLE and the other House conferees on H.R. 4331 who held fast in opposition to the Senate's attempt to use the plight of minimum benefit recipients as a weapon to force substantial reductions in social security benefits to families. The Senate's proposed restrictions on restoration of the minimum benefit as well as their proposed cap on maximum family benefits was, in my opinion, a continuation of overreaction to the administration's scare tactics. Had these provisions received the thorough consideration they deserved in both bodies before approval, we would not be debating this legislation in the closing hours of this session of Congress.

I voted for H.R. 4331 to completely restore the minimum benefit to both present and future retirees when the House considered that measure on July 31. It is manifestly unfair to reduce promised benefits without providing time for people to adjust their retirement plans. Although this conference report does not restore all minimum beneficiaries to their status quo, it does insure that present annuitants will not face a cut in their monthly checks on April 3, 1982. To me, that consideration is of overriding importance; it is the principal reason I am supporting the conference agreement.

Requiring social security taxes to be paid on the first 6 months of sick pay sounds, at first blush, rather harsh. On more careful analysis, however, it clearly is a valuable protection for wage earners. In short, while this provision exacts a price, it also offers a long-term benefit. Unless FICA taxes on income are paid, these wages will be excluded when benefits are determined at time of retirement, disability, or death. Including sick pay as regular, FICA-taxable income can be especially important for younger disabled workers who are allowed fewer drop-out years when benefits are computed on the basis of average lifetime income. In short, treating sick pay as income now means counting it for benefit purposes later, and that is a plus for retirees and disability beneficiaries alike.

The bill includes another very important feature: temporary authority for interfund borrowing. This will allow the transfer of funds, as required, between the old age and survivors trust fund, the disability trust fund, and the hospital insurance trust fund. This authority will assure ade-

quate social security funds to pay benefits at least through most of 1983. This breathing space will give Congress time to reassess the performance of the economy and make any additional, long-term changes which may be necessary to carry the trust funds through the 1980's and beyond.

Rather than chopping away at social security benefit protection piecemeal, we, as a nation, need to reassess the proper role of social security as a reflection of the economy and as a vital part of an overall retirement income concept. In the course of that reassessment, a number of important questions must be answered, including:

Are alternative annuity plans in place if the role of social security is reduced?

Are those alternatives guaranteed and will they be adjusted for future changes in the cost of living?

What portion of our national retirement income should be advance funded, what portion pay-as-you-go?

What percentage of the projected long-range deficit is attributable to the income-replacement provisions of social security; what percentage is attributable to anticipated future medical care needs of our aging population?

Should general revenue be used to partially finance benefits?

The answers to these questions will help us chart a responsible course for the future of social security.

Benefit reductions such as we have seen this year would not be necessary in a full-employment economy. Increases in the already high rate of unemployment will, in the near future, bring more pressure for additional cuts in retirement and survivor income benfits, further reducing the protection for people in an increasingly uncertain economy.

The Congress needs time to evaluate the economic picture and more carefully assess the need for changes in social security benefits or taxes without the threat of bankruptcy hanging over our heads. That is why the temporary financial solution offered by the conference agreement is vitally necessary. I urge my colleagues to support this measure.●

● Mr. MARKEY. Mr. Speaker, I am both pleased and disappointed with the outcome of the minimum social security benefit conference report. The minimum benefit has rightfully caused much concern during the past few months, ever since the administration first proposed to eliminate this benefit for all current and future beneficiaries. By restoring the benefit for current beneficiaries until December 31, the conference committee has calmed some nerves—the nerves of those who have been losing their minimum benefit and those nearing retirement who are unsure of what to expect at retirement. I will vote for the conference report because it is a positive action.

Yet it is a limited, gutless action. It still leaves those future beneficiaries, approximately 84,000 in total for 1982, hanging. Termination of the minimum benefit means that elderly poor beneficiaries beginning in January 1982 will be forced to find some other source of income, be it SSI or State general assistance. Some 7,000 people, mostly women, who would be coming on the rolls in January will be hit hard. Some Christmas present.

My colleague, Congresswoman MARY ROSE OAKAR, is introducing a bill today which calls for restoration of the minimum benefit for future beneficiaries. I strongly urge my colleagues to join me in supporting this affirmative measure. Let us keep in mind we are talking about individuals, including the disabled, widows, widowers, displaced homemakers, who will lose an average of $60 per month, leaving them with an income of $780 a year. These people have worked the necessary number of quarters, but because of their low wages and intermittent work pattern will not receive the current minimum of $122 per month—unless we act. Recognizing this, I am embarrassed. I am humiliated and disgusted. I only hope my colleagues will recognize what this will mean to many older citizens in 1982, and in the Christmas spirit act to reinstate the benefit for these deserving people.●

● Mr. RATCHFORD. Mr. Speaker, today we are asked to support a conference report that reflects a sad failure to offer reassurance to the American worker and retiree that their social security benefits will be spared by the White House and a Senate seemingly bent on offsetting a unwise tax cut program and excessive military expenditures with benefit cuts. Americans have overwhelmingly expressed their stern opposition to benefit cuts for current or future retirees. The House has consistently gone on record to disapprove administration proposals to drastically curtail benefits at this time. Even the President has now retreated on earlier efforts to effect programmatic changes that would have resulted in significantly lower benefits for millions of participants. Yet the report we must act on today falls far short of the President's own pledge to protect the social security program from the budget cutting process.

Specifically I refer to the rather half-hearted effort to restore the social security minimum benefit, a commitment by the President to support such a move, and the overwhelming support that the House measure generated. The House moved swiftly to restore the minimum benefit after the administration succeeded in providing for its elimination in the budget reconciliation bill last summer.

Acting in total defiance of public opinion, the stated position of the White House, and quite contrary to earlier House action, the Senate acted to restore the minimum benefit only for certain current beneficiaries rather than for all current and future beneficiaries.

The agreement of the conferees as before us today, Mr. Speaker, does not go far enough. It restores the $122 per month minimum benefit only for those currently eligible or who turn 62 before the end of the year, along with members of religious orders who turn 62 before November 1, 1992. For the some 3 million current recipients of the minimum benefit and those newly eligible this is welcome news. For those who would become eligible next year, however, this regrettable action by the conferees threatens the financial security of the many who must rely on the minimum benefit because their modest work histories would not otherwise generate the monthly benefits necessary to maintain a subsistence lifestyle at best.

Throughout this debate over the fate of the minimum benefit, the administration has loosely referred to a GAO report so as to suggest that the vast majority of minimum benefit recipients would receive other public or private pensions—monthly benefits that would be sufficient without the social security minimum benefit. This is not fact at all. Of the current 3 million minimum benefit recipients, well over half do not have other substantial pension income or would not receive a commensurate rise in SSI benefits to offset any loss in social security retirement benefits. By not restoring the minimum benefit for future beneficiaries, it is estimated that some 7,000 people each month for the next 3 years would receive an average reduction in their benefits check each month of about $60—a significant sum of money for those who must make ends meet with meager financial resources.

What I find most disturbing about the reluctance of the administration and the Senate to restore the minimum benefit for future beneficiaries is the remarkably small cost savings that can be gained from such an effort. Let us remember that present law gradually phases out the minimum benefit by freezing the initial level at $122 unless preretirement earnings justify a higher benefit. It is unlikely that there will be many workers in the future will not have sufficient earnings to be entitled to an amount greater than $122 a month.

What also concerns me deeply is the message that this action will send to other current retirees and participant workers. The product of this conference committee hardly offers them the reassurance that benefits to which

they are entitled will be protected, and that the Congress is taking the matter of future financing problems seriously. In addition to restoring the minimum benefit for current recipients only, the conferees saw fit to accept Senate language that subjects the first 6 months of sick pay to the social security tax, and to authorize interfund borrowing for only 1 year.

Although I object to many provisions that are contained in this conference report, I have chosen to reluctantly support it for fear that many more people who are now eligible or will become eligible for the minimum benefit before years end would otherwise be deprived of benefits that are rightly due them and in many cases absolutely critical to their abililty to live their retirement years in dignity. I have, however, joined my distinguished colleague, Congresswoman OAKAR, in sponsoring legislation today that would promptly restore the minimum benefit for future beneficiaries as well. I am prepared to work vigorously for passage of this critical legislation, for in addition to restoring critical benefits it will also reaffirm the commitment of this Congress to shield from an arbitrary budget ax any existing benefits that working men and women have come to expect and so rightfully deserve. Further, I will continue to support efforts to develop responsible long-term solutions to the trust fund reserve problems that will confront this Nation later this decade. The American people demand no less of elected Representatives—to protect those benefits they have worked a lifetime to secure, and to insure the long-term solvency of the system that makes those benefits possible.●

● Mr. MOAKLEY. Mr. Speaker, I rise in support of the conference report on H.R. 4331 which would restore the social security minimum benefit to all current recipients and all those eligible by January 1, 1982. I believe the elimination of the minimum social security benefit was a great disservice to our Nation's elderly. The great majority of those persons receiving this payment depend very heavily on this money. The original claim by the Reagan administration was that those receiving this benefit were so called "double-dippers" collecting generous private or Government pensions in addition to social security. It was clearly demonstrated that these people are only a very small majority of those receiving the minimum benefit and that many of them are on small pensions and also depend heavily on social security assistance. I and many of my colleagues fought the original measure to prevent the elimination of the minimum benefit. Although we were unsuccessful at that time, fortunately the administration and other supporters of the removal of this benefit realized the serious hardship that this measure would create and efforts were made to correct this error.

The legislation that is before us today will restore this benefit to all current recipients and will not place any restrictions such as those in the Senate version of this bill. It will also extend the date of eligibility from November 1, 1981 to January 1, 1982. I heartily support this legislation and urge my colleagues to do so also. To impose such major retroactive changes on current beneficiaries was an abandonment of our commitment to the elderly of our Nation. The elimination of this minimum payment has not been the painless move that was presented to this body earlier this year. It has already caused irreparable damage to those who should have received it. We must approve this legislation that will correct this injustice that has been placed upon these retired persons. We have a responsibility to these people, a responsibility to maintain the social security benefits as they have been promised to these individuals.●

● Mr. GARCIA. Mr. Speaker, today we vote on the conference report to accompany H.R. 4331, a bill to restore the minimum benefit portion of the social security system. Hovering over Congress as it struggles to deal with the latest budget deficit crisis is the threat of bankruptcy in this program which makes up almost one-quarter of the Federal budget.

The question is whether we legislators will do as we have in the past—patch up the current crisis for a year or two—or undertake a complete overhaul of the program to insure its long-term stability.

Regardless of the question of the long-term stability, the issue before us today is of critical importance immediately. It is unnecessary to permanently hurt millions of people now, especially the elderly, when there is a reasonable possibility that such extreme measures may not be needed at all. We should deliberate very carefully before rushing into a long-term solution. By distorting the nature of the social security problem and trying to scare people into accepting sharp cutbacks now, President Reagan was merely seeking funds with which to balance the overall Federal budget. Using the program for this obviously political purpose was the height of irresponsibility.

Not only was Reagan's basic premise wrong, his package was particularly heavy-handed and insensitive. A cut of Mr. Reagan's magnitude would create hardship and despair for millions for whom social security is the sole source of income.

The conference committee has appropriately rejected many of the Senate's and President's proposals aimed at reducing benefits for the most needy members of our society. In my view, it is a fair compromise that allows us the time to look at the serious long-term problems affecting the social security system.●

● Mr. EVANS of Delaware. Mr. Speaker, I rise in strong support of the conference report to accompany H.R. 4331, to restore the minimum social security benefit. This legislation will lay to rest once and for all the uncertainty of whether individuals are, or are not, going to continue to receive their minimum social security benefit. This legislation is the surest way to make absolutely certain that some 3 million retired Americans will not lose their minimum benefits.

At the same time, I would remind my colleagues that this bill does not provide a permanent solution to the problems of the social security system. The long-term integrity of the system cannot remain in jeopardy, and I firmly believe it would be unacceptable breach of faith with the millions of Americans who depend upon social security for this Congress not to move quickly toward development of a permanent financing solution.

Of utmost importance, however, is that any changes Congress makes in the system must be done without cutting benefits for the over 36-million Americans who now depend upon it. Further, any changes Congress makes must come in a manner that gives future retirees ample time to adjust their retirement plans accordingly. To do otherwise would be to callously disregard the millions of American workers who have counted upon social security benefits to be an integral part of their retirement years.

Social security is not welfare. Millions of Americans are now receiving social security benefits each month from a program they have helped to pay for. Many of them rely on their monthly check for essential needs such as food, medicine, and housing. We must make absolutely certain that these benefits are protected.

Social security must be above and beyond partisan politics. It is not a Republican program. It is not a Democratic program. It is our Nation's program, and all of us have a stake in its future.●

● Mr. CONTE. Mr. Speaker, I am pleased and gratified to learn that my colleagues are now recognizing and attempting to deal with the social security "notch" problem. Last month, when I cosponsored CLARENCE LONG'S concurrent resolution on the problem, I was astounded that so few of my colleagues were aware of the problems created by the 1977 amendments to the Social Security Act.

Now, I think, we are all more or less aware of the difficulties that were caused by the amendments. By decoupling wage and price increases in indexing social security benefits, the

Congress corrected a wrong that was created in 1972. That mistake would have totally bankrupted the OASI fund by 1979 if left uncorrected.

If left uncorrected, many people would have made more by retiring than if they stayed working. Is that how we encourage our older Americans to remain productive members of society?

If left uncorrected, many people would have made more money from social security than they had made in their entire lives as working members of society. Is that how social security was intended to be?

So, it was a problem that needed to be corrected. By compensating beneficiaries twice for inflation, which is what the 1972 amendments had the effect of doing, we corrected that problem in 1977 by decoupling the wage from price increases in benefits. I do not think that anyone who really understands the problem would have objected to our 1977 changes. What they are objecting to is the economic conditions since 1977.

What we should have done then, although we did not recognize it, is to phase in the decoupling provision on a transitional period. Now, anyone who has turned 62 since January 1, 1979, is a victim of the notch. And because of an inflation rate that would not go down in the latter part of the 1970's, there is a vast disparity between those who are notched and those who are not. Let us look at what this means.

Suppose someone was born on December 31, 1916, He learns how much he will get in retirement benefits if he retires at age 65 in 1981. His friend, who worked at the exact same job for all of his life, was born on January 2, 1917, and retires on January 2, 1982. He will get $110 a month less—that is $1,320 per year.

The change in the laws are not, as some would have us believe, unconstitutional. They are not a travesty of justice. They are simply unfair—unfair because inflation raced on too quickly in the 1970's and because there was no time to phase in the change. This lack of a transition period, and the high inflation, have made the notch much more acute. And so I urge my colleagues to cosponsor one of the three concurrent resolutions calling upon the Commissioner of Social Security and the Secretary of Health and Human Services to present to us a plan to deal with the issue. Let us work together to amend this problem that came about because it could not be foreseen.●

● Mr. GOLDWATER. Mr. Speaker, I rise in reluctant support of the conference report to H.R. 4331, the bill which would restore the minimum social security benefit. I do so not because I in any way oppose reinstating the minimum benefit for those truly in need who had been accustomed to receiving their $122 per month. I have said before and I will stand by my conviction that those individuals should be assured of this money.

What I had hoped we would be reviewing before the end of this session was a comprehensive reform of the social security financing system. We have to recognize that our retirement system is tottering on the edge of bankruptcy.

This bill will permit short-term borrowing authority between the old-age survivors, the disability and health insurance funds. I wish that this would provide for permanent solvency of social security. Unfortunately, interfund borrowing will provide only about 36 months' grace before there is no money left to write checks to our Nation's 36 million social security recipients. No one here today will tolerate that happening.

There are two basic long-term solutions. The first is to disregard the torpedoes and steam ahead, paying for the annual shortfall out of general revenues. This would mean, of course, adding another line item into the budget that could mean as much as $111 billion over the next 5 years. This is clearly not a realistic consideration—by the year 2020 there will be two workers trying to provide for the comfort of one retired person, as well as pay their other taxes and raise families. It would be unconscionable to levy both substantial FICA taxes on these taxpayers in addition to the hidden, crueler tax of runaway inflation and skyrocketing costs of living created by funding the social security shortfall out of the General Treasury. Similarly, directly expecting these two taxpayers to pay for a third retiree through increased FICA payroll taxes and employer contributions is unworkable.

Our other option is returning social security to what it was originally intended to be: A retirement system designed to provide supplemental retirement benefits to older Americans; in effect, to offset the cost of retiring. We can do this by a reasoned review of current benefits, needs, and available resources.

The welfare aspects of the program need to be deleted, such as aid to college students—which was abolished earlier this year—disability payments to prisoners and nonmedically disabled persons. I also would suggest to my colleagues that we are going to have to do something about the retirement age. I realize that 65 is the magic age in the minds of most Americans. However, our population is living longer than ever before and the percentage of retired is growing by leaps and bounds. Too, the "baby boom" bubble in our population demographics is only now nearing early middle age—within 30 years this group will retire. Right now, those over 65 make up only 12 percent of our total population. By the year 2020, those over 65 will make up almost one-quarter of our population. When social security was enacted, life expectancy was about 60 years. Now, it is about 74 years. Modern medicine has worked wonders—a 65-year-old today is a vital person compared to that age person 50 years ago. Different times demand different standards. I would support gradually pushing back the retirement age.

I also believe that we have to abolish the earnings limitation. We have what amounts to a confiscatory tax on earnings for those between 65 and 72. Not only would having the ability to earn money after retirement be a real boon from a supplementary income standpoint, those earned dollars contribute to the overall health of the economy.

Clearly, what would be most beneficial immediately would be to adopt some form of the President's proposed changes in disability eligibility. These involve limiting disability payments to those with long-term medical disabilities, increase the waiting period before eligibility and increase the required duration of covered employment—30 out of 40 quarters, rather than 20 out of 40. Some conbination or variation of these changes would be of immediate benefit to the system.

In any case, Mr. Chairman, although I will lend my support today to this conference report, I hope that we will see a definitive solution to this problem within the immediate future. Interfund borrowing is not the answer; nor is piecemeal tinkering with the current social security system eligibility requirements and programs. We need to give the entire system a thorough revision.●

● Mr. DANNEMEYER. Mr. Speaker, the conference report on H.R. 4331, the social security legislation, while by no means perfect, is a reasonable compromise under the circumstances and merits the support of the House of Representatives. The final version agreed to by House and Senate conferees will restore the minimum benefit for all current recipients and authorize interfund borrowing.

The minimum benefit was eliminated for all current and future recipients in the Omnibus Budget Reconciliation Act. Under that law, the minimum was ended for new recipients as of November 1981, and terminated for current recipients in March 1982. The compromise in the conference report restores the minimum benefit for all current recipients, as well as those who would have qualified between November 1 and December 31, 1981. The Senate provision to reduce the minimum benefit dollar for dollar from the checks of those with Government pensions of over $300 per month was rejected by the conferees. While new recipients

will not be eligible for the minimum benefit after the first of the year, it is important to point out that this does not mean that new recipients will not qualify for social security at all. Rather, the benefit to new recipients will be based upon past earnings and contributions to the social security trust funds.

The cost of restoring the minimum benefit will be $6.1 billion over the next 5 years. At a time when the social security trust funds are in difficult straits, and the major Old-Age and Survivors Fund would otherwise run dry as early as late 1982, the cost of restoring the benefit must be offset by other steps. While I would have preferred a complete offset of the cost of restoring the minimum benefit as advanced by the Senate, I am pleased that the conference report contains $4.4 billion in revenue increases and benefit reductions. The major item in this category is a change in the tax treatment of sick pay leave. At present, such pay is not subject to the payroll tax that funds social security. Under H.R. 4331, the first 6 months of sick leave will be subject to the payroll tax. Other offsets include administrative changes to make it easier for the Social Security Administration to terminate benefit payments to prison inmates and deceased persons.

The second major issue in this bill, in addition to the minimum benefit, concerns interfund borrowing. There are three social security trust funds—old-age and survivors, disability and health—medicare. The latter two, disability and health, are in comparatively better financial shape than the old-age and survivors trust fund which pays for the major portion of the basic retirement benefits. Interfund borrowing would allow the old-age and survivors fund to borrow from the other two, with interest, to bridge any revenue shortages that might arise. How long interfund borrowing could sustain the old-age fund depends upon how the economy develops. Some say the system could survive for a few years, others say until 1990, and the most optimistic say that the only step needed to reform social security is the interfund borrowing authority. My own view is that the most optimistic scenario cannot be sustained under the weight of the long-term economic and demographic trends that are at the root of the social security problem. The time purchased by interfund borrowing—whether it is 1 year or 10 years—ought to be used to phase in the fundamental changes that must be made. Changes should be gradual so that individuals are not affected on such short a notice that adjustments would be difficult to make. On this basis, I have voiced reservations about authorizing interfund borrowing absent other changes in the program. Accordingly, I would have preferred that Congress tackle the social security question now, rather than later. Unfortunately, the majority leadership of the House has decided to block even subcommittee hearings on the issue until next year. Under these circumstances, and mindful that it is our responsibility to save the system from possible insolvency next year, I am willing to accept the interfund borrowing in H.R. 4331 because the authority to borrow expires on December 31, 1982. This deadline will reduce the chance that the Congress will simply use the time bought with interfund borrowing to put off the tough decisions that must be made.

Conference reports are always compromises. This one is reasonable and balanced. It restores the minimum benefit for current recipients, but not for future retirees. It also puts a mechanism in place to keep the trust funds going through 1982. When we return next year, let us get on with the task of fashioning a more permanent solution to save social security.●

● Mr. KILDEE. Mr. Speaker, we have before us today legislation of urgent national concern—the restoration of the monthly minimum benefit for social security recipients. This benefit was eliminated earlier this year by a proposal initiated by the Reagan administration. I strongly opposed the administration's elimination of this benefit, which reduced the income for at least several million elderly Americans, thousands of whom are 80 or older. It was among several proposals made by the administration which, for the first time in the history of the social security system, cut benefits for current recipients. The House of Representatives recognized the injustice of taking away this benefit. On the same day the Omnibus Reconciliation Act was passed eliminating this benefit, the House voted 404 to 20 to totally restore the minimum benefit for current and future beneficiaries.

Two months after the House actions, President Reagan finally began backing away from his original social security cutback proposals. He called for the partial restoration of the minimum benefit. Unfortunately, the Senate chose only to restore the minimum benefit for certain recipients rather than for all current and future retirees. The Senate also used this measure as a vehicle to propose a number of additional damaging changes in the social security program. As a result, the conferees were deadlocked for more than a month, and those persons who became eligible after October 31, 1981, were deprived of the minimum benefit. Although the bill before us does not contain some of the highly objectionable provisions which were in the original Senate bill, it nonetheless takes an unprecedented action by subjecting the first 6 months of sick pay to the social security tax.

I am opposed to this tax on sick pay. It is my firm belief that the restoration of the minimum benefit should not have been linked to this question of the taxation of sick pay, and that each should have been considered separately by the Congress.

I am supporting this bill to restore the minimum benefit to most of the elderly who lost it because of this cut by the Reagan administration. This is the only bill we can expect from an administration which has repeatedly shown its insensitivity to the needs of our elderly and the average worker. I object, however, to the process by which we are not permitted to separately consider the various major changes in the social security program included in this bill. Each of the elements of this package is important enough that it should be considered individually.

Again, Mr. Speaker, I support the full restoration of the minimum benefit to all, and regret that this bill does not provide for future retirees to receive this benefit except under very limited circumstances. I strongly object to the packaging of this partial restoration with the social security tax on sick pay benefits to which I am opposed.●

● Mr. WEISS. Mr. Speaker, I rise in support of the conference report on H.R. 4331, although I do so with great reservation. This compromise agreement provides for restoration of the social security minimum benefit for recipients eligible for this critical benefit for the balance of the year. However, it fails to restore the minimum benefit for equally deserving individuals whose 62d birhday falls after December 31. I believe that this partial restoration on the minimum benefit violates the intent of the original House bill which sought to redress, for all retirees, the cruel and unjust minimum benefit cut enacted under reconciliation. I intend to work with other concerned Members to restore this benefit for all beneficiaries in the coming months.

In addition, the conference agreement provides for complete interfund borrowing among the three social security trust funds until the end of 1982. While I would have preferred permanent interfund borrowing authority, I believe that this provision is critical to addressing the immediate problems in the social security trust funds.

Certainly, this conference report is far better than the devastating legislation adopted by the Senate. That version sought to enact a cap on total family benefits, an especially onerous benefit cut for many families dependent on social security, in exchange for only partial reinstatment of the minimum benefit.

The approach of the Republican-controlled Senate, like that of the President, is a poorly concealed attempt to slash benefits in order to finance an unprecedented military buildup and massive tax breaks for big business and the most wealthy in our society. Their irresponsible proposals have needlessly frightened senior citizens and shaken public confidence in the social security system. Through their actions, they have exhibited a complete disregard for the well-being of our Nation's elderly and for the social security contract that has been paid for by American workers and honored by the Government for nearly half a century.

If this compromise is approved, 3.1 million Americans currently receiving the minimum benefit will be relieved of the tremendous anxiety that has permeated their lives since the Reconciliation Act passed on July 31. It is unforgivable that many of these individuals have had to live with fear of losing their most important source of income for almost 6 months. These recipients have been victimized by an administration that has no conception of what life is like on $122 a month. The House conferees are to be commended for fighting to restore this desperately needed benefit for all current beneficiaries, despite administration pressure.

But the hardship that we will inflict on future beneficiaries cannot be justified. Next year alone, nearly 100,000 elderly persons will be denied the minimum benefit. Like current minimum beneficiaries, these individuals are predominantly women, who worked for low wages or who took time out of the paid labor force to raise children, and who have little else to count on for their livelihood. These recipients are most vulnerable to the ravages of inflation, the pain of hunger and sickeness, and the depression of inadequate housing. After a lifetime of work, these individuals deserve better.

By permitting the whittling away of social security benefits, we risk jeopardizing the progress that has been made in the past few decades to improve the economic well-being of the elderly.

Recent statistics indicate that harsh economic conditions have already begun to shake the financial status of our senior citizens. Between 1978 and 1980, a recordbreaking 700,000 elderly persons fell below the poverty level. Indeed, today approximately 6.4 million citizens over the age of 65 are at or near poverty levels. These facts should compell Congress and the administration to improve social security protection for the elderly rather than cutting benefits and condemning additional seniors to a retirement life of poverty.

Time and time again, for almost 50 years, the American people have reasserted their support of, and confidence in, the social security system. A recent Harris poll found that 92 percent of all adults oppose social security reductions for people already retired and 85 percent disapprove of benefit cuts for future retirees. In striking contrast to the administration and the Republican-controlled Senate, the American people have not lost their sense of compassion and respect for our Nation's retirees nor their commitment to guarantee the elderly a decent standard of living through the social security system.

Finally, Mr. Speaker, I want to point out a very dangerous precedent, the imposition of social security payroll taxes on sick pay benefits. It really does not belong in the law. Hopefully, serious reflection will persuade its proponents to help repeal this ill-considered provision.●

● Mr. FORD of Michigan. Mr. Speaker, as far as I am concerned, the President surprised every working man and woman in America. We were led to believe during the campaign that social security recipients would not have to fear a loss of benefits. At that time, candidate Reagan said that reports of reductions in social security were "exaggerated and inaccurate stories * * *."

Then it all changed. President Reagan proposed the elimination of the minimum benefit and it was rammed through Congress as part of the Omnibus Reconciliation Act. The President needed this minimum benefit elimination for purely budgetary reasons—to allow his administration to pay the tremendous costs of its tax cut and increase in military spending. Frightened by the political specter of a huge budget deficit caused by the failure of trickle-down tax policies and continued high interest rates, the Reagan White House had to cut social security. The White House strategy was clear: Cry loud and long about the eminent bankruptcy of the social security trust funds; steamroll the Congress by panicing earnest and well-meaning citizens; then mug another social program to balance the budget.

The opportunity to reverse the terrible decision to eliminate the minimum benefit came when the House passed a separate Democratic bill, H.R. 4331, which called for total restoration of the minimum benefit for both current and future retirees. Regretfully, the Senate version of H.R. 4331 only restored the benefit for certain current recipients rather than for all current and future retirees.

The conference report we are voting on today contains very little of the House language, and does not take into consideration what the people in this country want and deserve. I am supporting this measure, but very frankly, the only positive provision in this agreement will allow the old-age and survivors' insurance fund to borrow from the medicare and disability insurance trust funds. The old-age and survivors' insurance trust fund is the only part of the social security system facing any difficulties at all. Now, with interfund borrowing, this problem can be solved.

What this conference report fails to do is restore the minimum benefit to any future retirees. These are people who for years have counted on receiving the minimum benefit when they retired. And, they have had this taken away from them with very little warning. In 1982 alone, nearly 100,000 elderly persons who would have received the benefit prior to enactment of the reconciliation act will now not receive it. These are, more often than not, retirees with little other income.

Mr. Speaker, the minimum benefit was frozen at $122 for new beneficiaries as part of the Social Security Amendments of 1977. There is no adequate explanation for the change to a precipitous elimination which unfairly penalizes those who have counted on the minimum amount in the near future.

The action we have taken here today tells the American people that the Congress cannot be counted upon to make good on its promises; it tells the American people that the rules of the game may be changed at any time without forewarning. In addition, if Congress were asked directly if it would vote to sacrifice the aged women of this country in order to reduce the deficit, I would like to think that the answer would be a resounding "no." Yet, eliminating the minimum benefit after December 31, 1981, amounts to roughly the same result. Over 70 percent of the beneficiaries are aged women, some of them very old indeed.

The Reagan administration has trained its sights on social security in what appears to be an effort to mutilate one of this Nation's best programs of social insurance. I will continue to fight against these negative changes so that those who have worked hard all their lives to make this Nation rich and strong can enjoy their retirement with dignity and a sense of economic security.●

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. ROSTENKOWSKI) that the House suspend the rules and agree to the conference report on the bill, H.R. 4331.

The question was taken.

Mr. ROSTENKOWSKI. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 412, nays 10, not voting 11, as follows:

[Roll No. 365]

Burgener	McDonald	Vento
Burton, John	Moorhead	

□ 1230

The Clerk announced the following pairs:

On this vote:

Mr. AuCoin and Mr. Leland for, with Mr. Vento against.

Messrs. RANGEL, HILLIS, and D'AMOURS changed their votes from "nay" to "yea."

So (two-thirds having voted in favor thereof) the rules were suspended and the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed with an amendment in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 779. An act to authorize the Secretary of the Army to contract with the Tarrant County Water Control and Improvement District No. 1 and the city of Weatherford, Tex., for the use of water supply storage in Benbrook Lake, and for other purposes.

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 1976. An act to amend the act of July 31, 1946, as amended (40 U.S. C. 193a).

□ 1245

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. WRIGHT). For the benefit of the membership, permit the Chair to describe the plan upon which we will proceed.

It is the intention of the Chair shortly to recognize the gentleman from Wisconsin (Mr. ZABLOCKI) to call up the conference committee report on the foreign aid authorization bill. Immediately thereafter, pursuant to the unanimous-consent request earlier granted, the Chair would expect to recognize the gentleman from Maryland (Mr. LONG) for the foreign aid appropriation bill conference committee report.

Following that the Chair will recognize for a series of unanimous-consent business requests and then we will probably be able to take 1-minute speeches. However, the Chair intends to return to the suspension list and to conclude action on those bills scheduled for action today under suspension of the rules.

We expect to take up the rule and the conference committee report on the agriculture bill and such other conference committee reports as will be available to the House. It is possible that with diligence and attention to duty and with no dilatory tactics, the House might conclude the work of this session in time for adjournment sine die this evening.

Time permitting, it is the intention of the present occupant of the Chair, after legislative business and such other special orders as may have been permitted, to entertain a special order in honor of the 100th anniversary of the birth of former Speaker of the House Sam Rayburn. That centennial event will occur on January 6, a time at which the Congress will be out of session. So the Chair wants to give notice to those Members who would wish to enter into that kind of a discussion and certainly all those who had the privilege of serving with that truly distinguished statesman, Mr. Rayburn, during his Speakership that they might know that this would occur.

The Chair now recognizes the gentleman from Wisconsin (Mr. ZABLOCKI).

CONFERENCE REPORT ON S. 1196, INTERNATIONAL SECURITY AND DEVELOPMENT COOPERATION ACT OF 1981

Mr. ZABLOCKI. Mr. Speaker, pursuant to the order of the House on yesterday, I call up the conference report on the Senate bill (S. 1196) to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act to authorize appropriations for development and security assistance programs for the fiscal year 1982, to authorize appropriations for the Peace Corps for the fiscal year 1982, and for other purposes, and ask unanimous consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

Mr. WEISS. Mr. Speaker, reserving the right to object, I take this time under my reservation only to make this inquiry of the committee chairman: When the legislation was on the floor, I had offered an amendment regarding the sense of Congress that recommendations be made by the Secretary of State to grant extended voluntary departure status to Salvadorean refugees residing in the United States. That amendment was accepted by the gentleman as well as the ranking minority member and adopted unanimously.

I ask the gentleman, what happened to that amendment in the conference? Would the chairman of the committee apprise me of that?

Mr. ZABLOCKI. Mr. Speaker, will the gentleman yield?

Mr. WEISS. Yes, of course, I am delighted to yield to the committee chairman.

Mr. ZABLOCKI. Mr. Speaker, I thank the gentleman for yielding.

The conferees adopted substitute language in section 731 stating that it is the sense of the Congress that the administration should continue to review on a case-by-case basis petitions for extended voluntary departure made by citizens of El Salvador who claim that they are subject to persecution in their homeland and should take full account of the civil strife in El Salvador in making decision on such petitions.

Mr. WEISS. Further reserving the right to object, Mr. Speaker, does that mean that we are approving what the State Department has been doing, which is granting, I believe, one application out of 6,000 and approving it favorably? Is that the kind of thing we are approving by this language?

Mr. ZABLOCKI. No; I believe the sense of Congress language would be that the State Department give full consideration to every applicant on a case-by-case basis.

Mr. WEISS. Mr. Speaker, further reserving the right to object, I voted yesterday with the rest of the House unanimously and enthusiastically in granting that status to the Polish residents who are in this country because I thought it could be disastrous to send people back to the kind of turmoil which exists there. I urge the Members to recognize that people of El Salvador face exactly that kind situation, perhaps even to a greater extent. I hope the gentleman and his committee will be of help in providing some safety to people who would be and are being returned by us at the risk of their lives.

Mr. ZABLOCKI. Mr. Speaker, will the gentleman yield further?

Mr. WEISS. I am glad to yield to the gentleman from Wisconsin.

Mr. ZABLOCKI. Mr. Speaker, I thank the gentleman for yielding.

I will advise the gentleman that this matter is really not in the jurisdiction of the Committee on Foreign Affairs. It is the Committee on the Judiciary that would have to be addressing itself to the gentleman's request. Therefore, we agree in conference to the sense-of-Congress provision that I have just read, but the jurisdiction, as far as deportation or immigration status is concerned, is within the jurisdiction of the Committee on the Judiciary, and I would respectfully submit that the gentleman should seek his relief or a continuation of his desires with that particular committee and the chairman of that committee.

Nevertheless, I can assure the gentleman that as a Member who is interested in the fate of Salvadorans, some of whom are here, I, too, will have some oversight and will continue my interest in this regard.

Mr. WEISS. Mr. Speaker, further reserving the right to object, I appreciate the gentleman's assurance.

I just think that this Congress has to be very, very careful that we do not send out the message that we treat and consider refugees from one part of the world as being less important or their lives as being less important than those in another part of the world. I know how concerned the gentleman is, and I appreciate his expression of concern.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

The SPEAKER pro tempore. The Clerk will read the statement of the managers.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of December 15, 1981.)

Mr. ZABLOCKI (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the statement be dispensed with, since I intend to explain the report.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

The SPEAKER pro tempore. The gentleman from Wisconsin (Mr. ZABLOCKI) will be recognized for 30 minutes, and the gentleman from Michigan (Mr. BROOMFIELD) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Wisconsin (Mr. ZABLOCKI).

Mr. ZABLOCKI. Mr. Speaker, I yield myself such time as I may consume.

Mr. ZABLOCKI. Mr. Speaker, I rise in behalf of the conference report on the bill (S. 1196) to authorize appropriations for security and development assistance programs for fiscal years 1982 and 1983, to authorize appropriations for the Peace Corps for fiscal years 1982 and 1983, and for other purposes.

Mr. Speaker, this conference report is basically similar to the bill passed by the House last week. It is a bipartisan bill strongly supported by the President. It provides the authorities for the expenditure of funds necessary for proper conduct of U.S. foreign policy. It gives the President the tools he will need in the foreign assistance area, and retains an appropriate role for the Congress to oversee their utilization.

I am pleased to report that the conference accepted the House position on several important issues, and developed responsible compromises on other issues.

An issue of particular interest to Members—the question of aid to Pakistan and the revision of nuclear nonproliferation provisions in the present law—was solved in my opinion in a constructive fashion representing, principally, the House approach to this matter. The issue, of course, is a major one from a standpoint of U.S. security interests, particularly with the continued Soviet occupation of Afghanistan.

Pakistan would receive $100 million in economic support fund assistance in fiscal 1982 and $200 million in fiscal 1983. On the nonproliferation aspect, the conference report authorizes the President to issue a 6-year waiver for Pakistan of the section 669 prohibition in the Foreign Assistance Act.

It also mandates a suspension of assistance to any country which transfers a nuclear explosive to a nonnuclear weapons state, and to any nonnuclear weapons state which receives or detonates a nuclear explosive. However, if such a suspension would damage U.S. security interests, the President may delay the suspension for 30 calendar days. During this period, Congress may by joint resolution authorize the

President to continue assistance beyond 30 days. This legislation further provides that any future Presidential waiver of sections 669 or 670 of the Foreign Assistance Act, dealing with transfers of nuclear enrichment or reprocessing equipment, can be overridden by a concurrent resolution of Congress.

This agreement resulted from a bipartisan effort by Members of both Houses to meet U.S. regional security interests and to strengthen U.S. nonproliferation policy.

On other items in the conference report of interest to Members, I will refer to briefly are:

The report maintains the Clark amendment prohibiting military and paramilitary aid to forces in Angola, which was the House position;

It separates the Peace Corps from ACTION, which was also the House position as well as that of the other body;

It maintains the House conditions on providing military assistance to Argentina, with only minor modification;

It adopts Senate language lifting the prohibition on military assistance to Chile, but expands conditions under which any such assistance can be provided to include the cooperation of the Government of Chile in bringing to justice those responsible for the murder of Orlando Letelier and Ronni Moffitt;

Maintains House restrictions on U.S. assistance to Nicaragua;

Maintains House conditions on U.S. military assistance to El Salvador with only minor modification;

Under a compromise formula agreed on with the Senate, a total of $800 million in grant military assistance is provided including $550 million for Israel, $200 million for Egypt, and $50 million for the Sudan;

The President gets some added necessary flexibility in the military assistance field through the creation of a new special defense acquisition fund, which will be a revolving fund;

The food for peace program is strengthened by provisions promoting self-help by countries receiving U.S. food aid, and assuring more dependable supplies for private voluntary organizations distributing U.S. food aid abroad.

Mr. Speaker, I cannot commend too highly the efforts by the House Members of the conference on this bill. Their diligence in attending and willingness to work hard until the job was done allowed us to complete the conference in record time. We were aided by similar efforts by the Members of the other body.

The conference thus was able to produce relatively quickly a good bill which I hope will receive wide approval in the House.

□ 1300

Mr. BROOMFIELD. Mr. Speaker, I yield myself such time as I may consume.

Mr. BROOMFIELD. Mr. Speaker, at the outset I, too, want to join the chairman in paying tribute to all of the conferees, not only on our side but on the other side of the Capitol for their work on this legislation. I did not think it was possible, frankly, to complete action on this bill before the adjournment of the House this year and a lot of credit goes to the chairman of our Foreign Affairs Committee, the gentleman from Wisconsin (Mr. ZABLOCKI).

Mr. Speaker, the legislation we have before us today is vitally important to our national and collective security, and I support this conference report.

This legislation provides for international military and economic security and international stability important to U.S. national interests. It also addresses important humanitarian concerns. These programs help strengthen our friends abroad, provide U.S. access to vital raw materials, promote markets for the goods and services our economic growth requires, and maintain and create American jobs. Moreover, this conference report provides for greater flexibility in the administration of American foreign policy.

The conference report especially provides us with an opportunity to demonstrate our willingness to help our friends and maintain our security and economic interests in the Near East. In particular, the legislation helps serve our Mideast security needs by authorizing $1.4 billion in foreign military sales credits to Israel in fiscal year 1982. The conference report includes $785 million in economic support funds (ESF) for Israel and $750 million for Egypt. This assistance is essential to maintaining the economic and political stability of those U.S. friends who are at the center of the continuing efforts to achieve a peaceful long-term settlement of the critical Middle East situation.

The legislation also provides necessary support to our good friends and NATO allies. In particular, the conference agreement provides important assistance for Greece and Turkey, which are major recipients of foreign military sales credits. I would especially like to emphasize that this conference report is designed to help friendly foreign countries defend themselves. This is primarily accomplished through the foreign military sales credit program contained in this conference report.

The conference agreement also helps to meet our security requirements by providing for additional flexibility in the administration of U.S. foreign affairs. In particular, the legislation provides for added flexibility in the conduct of security assistance programs by providing for a grant military contingency fund as well as allowing the President to draw down $75 million—not $50 million as in current law—in defense articles and services from the Department of Defense to furnish emergency military assistance. Morever, the President is provided with new authority allowing for advanced procurement of defense articles for transfer to foreign countries, thus minimizing the adverse impact, which has occurred in the past, of diversions of military equipment from U.S. stocks to foreign countries. Additional flexibility is also provided by the conferees with the lifting of the commercial arms sale ceiling.

The conference report provides for important international military education and training programs with 72 countries. Also, given the importance of our Latin American neighbors, the conferees, under certain conditions, lifted restrictions on providing military assistance and sales to Argentina and Chile. Most importantly, given the unique strategic importance of Israel, Egypt, and the Sudan, the conferees provided direct foreign military sales credits to these countries.

In the economic area, the conference provided the President flexibility to respond to unforeseen situations where U.S. national interests require economic aid. The conference version includes a special requirements fund of up to $75 million in the ESF account to use in such circumstances. The conferees provided $15 million in ESF for Cyprus for each of the fiscal years, fiscal year 1982 and 1983. Of those amounts $5 million in fiscal year 1982 and $10 million in fiscal year 1983 are earmarked for scholarships for Cypriots.

The conference compromise also authorizes development assistance in such areas as health, agriculture, and nutrition. More than half of this assistance is for agriculture and rural development projects to help the rural poor, and particularly small farmers, to increase food production. Assistance under these accounts also helps the poor in Third World countries to improve their basic health conditions, to reduce staggering infant mortality rates, and enable them to lead more productive lives. Furthermore, such assistance helps to promote worldwide economic and political stability.

This legislation provides for funds for a variety of other significant programs including: The grassroots level, person-to-person, self-help assistance provided by Peace Corps volunteers, aid to American schools and hospitals abroad, and some funds for addressing refugee problems. In addition, the conference agreement provides for the separation of the Peace Corps from ACTION.

With the many security problems in Latin America, the Middle East, and

Asia, not to mention the increasing Soviet arms buildup, the situation in Poland, there is at this time a great need for the United States to join its good friends and allies in seeking new and better ways to collective security. In this regard, the legislation we have before us today contains several important provisions to better assist the security of our friends and allies in the face of growing Soviet adventurism throughout the world.

The programs and authorities in this conference compromise are an investment in our efforts to protect and promote our national interests in a dynamic, dangerous, often volatile, world. While some of us may not be enthusiastic about every provision, I urge my colleagues to adopt the conference report.

Mr. ZABLOCKI. Mr. Speaker, I yield such time as he may require to the gentleman from Maryland (Mr. BARNES).

Mr. BARNES. Mr. Speaker, I rise in support of the conference report on the foreign aid authorization. We are under strong pressure from the administration to enact this legislation before the recess. I want to say that the reason we can take up this conference report today, only a week after the House passed its bill, is because of the skill of Chairman ZABLOCKI in conducting the conference and the hard work of the committee staff in getting the conference materials together literally overnight. I hope this cooperative attitude on the part of our committee will be reciprocated by the administration in the form of faithful implementation of the provisions of this act.

As chairman of the Subcommittee on Inter-American Affairs, I want to comment on some of the major provisions pertaining to Latin America. On El Salvador, we succeeded in retaining language in the bill which will insure that our military aid to El Salvador is used only to support human rights, economic and political reforms, and a political solution to the conflict in El Salvador. Under the compromise bill, the President will be able to continue to provide military aid to El Salvador only if, 30 days after the enactment of this act, the President is able to certify the following:

First, that the Government of El Salvador "is making a concerted and significant effort to comply with internationally recognized human rights."

Second, that the Government of El Salvador "is achieving substantial control over all"—and I emphasize the word "all"—"elements of its own armed forces, so as to bring to an end the indiscriminate torture and murder of Salvadoran citizens by these forces." This condition will strengthen the hand of President Duarte in curbing abuses by his military and security forces that just drive people into the hands of the left. I would call attention to the language of the Foreign Affairs Committee report on this condition, which is governing since the conferees adopted the House provision:

> The Committee wants to make its intent clear: It expects that the President will certify that this condition has been fulfilled only if the Salvadoran Government has actually made substantial progress in gaining control over all elements of its armed forces. Neither vague commitments to enact reforms at some point in the future nor public statements by government leaders to the effect that they were trying to achieve such control would be a sufficient basis for a Presidential certification that this condition had been satisfied. What the committee is looking for is real rather than rhetorical progress.

Third, that the Government of El Salvador "is making continued progress in implementing essential economic and political reforms, including the land reform program." Although we lost the specific reference to the private sector contained in the House bill, I believe it would be in accord with the will of the Congress for the administration to include in its certification information on the Government's support for the private sector.

Fourth, that the Government of El Salvador "is committed to the holding of free elections at an early date and to that end has demonstrated its good faith efforts to begin discussions with all major political factions in El Salvador which have declared their willingness to find and implement an equitable political solution to the conflict, with such solution to involve a commitment to—(A) a renouncement of further military or paramilitary activity; and (B) the electoral process with internationally recognized observers." This is perhaps the most important condition, in that it reverses the fundamentally mistaken aspect of the administration's policy which precludes a political settlement of the conflict by opposing talks unless the left gives up and lays down its arms. Under this language, the Government of El Salvador could receive no further military assistance from the United States if it refused to enter into discussions with the left, so long as the left declared that it was willing to seek a political solution, and that the political solution would involve an end to violence and elections. This language does not require negotiations about power sharing, nor does it prejudge what topics the discussions would cover. Each party would be free to propose its own agenda. All the language requires is a willingness to talk. No one loses anything by talking.

Fifth, that the Government of El Salvador "has made good faith efforts to investigate the murders of the six United States citizens in El Salvador in December 1980 and January 1981 and to bring to justice those responsible for those murders."

All conditions except the fifth would have to be recertified every 6 months for the aid to continue.

Mr. Speaker, it is clear that the President could not make these certifications at this time. The intent of the language is to give the administration leverage with the Salvadoran military in order to induce it to cooperate with President Duarte in improving the human rights situation, furthering reforms, and achieving a political solution to the conflict. Without these conditions, the military has no incentive to cooperate, and a favorable solution to the conflict is impossible.

I want to close by talking briefly about the provisions relating to Argentina and Chile. The conferees adopted provisions repealing prohibitions on security assistance to Argentina and Chile. These sanctions were imposed as a response to massive human rights violations by the governments of those two countries and, in the case of Chile, to the murders of Orlando Letelier and Ronni Moffitt. I believe the repeal of these prohibitions represents a recognition on the part of the Members that these sanctions have served their purpose and it is time to begin to try to improve relations with these two countries. That is debatable, but it is the will of the Congress and the President and I am prepared to support it. No sanction can last forever. Sooner or later, the time comes when sanctions must be removed. It is the judgment of the Congress that, for Argentina and Chile, that time is now.

But it is very important, in removing these sanctions, not to send the wrong signal. It is important that this action be construed not as an abandonment of our human rights policy, but as a new stage in the implementation of that policy. It must be clear that we are taking this action because of improvements in human rights in those countries, and in expectation of further improvements. I have opposed removing the sanctions not because I do not believe in removing them, but because of the administration's refusal to make this clear.

I am gratified that the conferees have agreed to make clear in the language the continuing commitment of the Congress to human rights in Argentina and Chile, and our intent that the development of a military relationship with those countries should go hand in hand with human rights improvements. Specifically, under the language, before he can provide security assistance to Argentina the President must certify that Argentina has made significant progress in complying with internationally recognized human rights. In making that certification, he must consider efforts by the Government of Argentina to provide

information on the disappeared and to release or bring to justice the PEN prisoners.

To provide security assistance for Chile, the President must make the same certification with respect to human rights, and must also certify that Chile is not aiding or abetting international terrorism and has taken appropriate steps to bring to justice those indicted in connection with the Letelier-Moffitt murders. In addition, the managers state that, in determining whether Chile has made the requisite progress in human rights, the President must consider whether the Government of Chile is ending the practices of internal exile and forced expulsion and is allowing those citizens who desire to return home to do so, and whether the Government of Chile is permitting internationally recognized human rights commissions to investigate human rights abuses.

Mr. Speaker, I believe the House did well in the conference with respect to those provisions of the bill affecting Latin America, and with respect to the other provisions as well, and I urge the adoption of the conference report.

Mr. GLICKMAN. Mr. Speaker, will the gentleman yield for a brief question?

Mr. BARNES. I yield to the gentleman from Kansas.

Mr. GLICKMAN. I am very concerned that the restrictions approved in the House-passed bill on El Salvador be implemented and that we provide as much in terms of restrictions in terms of that aid as possible. Could my colleague assure me that the final product of this bill does contain responsible but affirmative restrictions on aid to El Salvador?

Mr. BARNES. I can give the gentleman such an assurance. We came out of conference I think with language that would give the gentleman such assurances.

My Subcommittee on Inter-American Affairs is going to be holding hearings with respect to the certification process that the administration will have to enter into if this legislation passes and I believe that the gentleman's concerns will be addressed in those hearings.

Mr. GLICKMAN. I thank the gentleman and want to compliment the chairman of both the subcommittee and the full committee.

Mr. BARNES. I thank the gentleman and yield back the balance of my time.

Mr. ZABLOCKI. Mr. Speaker, I yield 2 minutes to the gentleman from Massachusetts (Mr. STUDDS).

Mr. STUDDS. Mr. Speaker, I, too, rise in support, although not particularly enthusiastic support, of this conference report. It does not reflect the levels of economic aid which many of us would like to see, nor does it reflect the balance between economic and military assistance this Member would like to see.

I think realistically it is the best this Congress can produce at this time.

I also commend the chairman and the House conferees for sticking as hard as they did to the position of this House. I support this bill primarily because it will place, when it becomes law, the first restrictions of any kind on the use of U.S. military assistance to the Government of El Salvador. I think it is absolutely critical that such conditions be in law.

Mr. Speaker, if I may ask one question in that regard, the conference report now under consideration includes several provisions which will require the President to certify that certain conditions prevail inside countries which are receiving or which may be proposed as recipients of U.S. military sales or assistance. In at least four instances, Nicaragua, Argentina, Chile, and El Salvador, the certifications involved refer in whole or in part to the extent to which the governments in question respect the internationally recognized human rights of their own people.

My purpose in asking this question is simply to seek the assurance of the chairman of the committee that it is the understanding of the House that the Assistant Secretary of State for Human Rights and Humanitarian Affairs will be expected to play a significant role in providing the information and advice upon which the Presidential certifications concerning matters of human rights are based!

I agree that it may seem self-evident to some Members that the Assistant Secretary for Human Rights would be deeply involved in these certifications, but I think it prudent to put on the RECORD at this time the fact that it is the clear understanding of the House of Representatives that this will, in fact, be the case.

Mr. ZABLOCKI. Mr. Speaker, will the gentleman yield?

Mr. STUDDS. Certainly I yield to the gentleman from Wisconsin.

Mr. ZABLOCKI. I thank the gentleman for yielding. It is my understanding that the answer to the question of the gentleman from Massachusetts is "Yes".

Mr. STUDDS. I thank the chairman very much and yield back the balance of my time.

Mr. BROOMFIELD. Mr. Speaker, I yield 5 minutes to the gentleman from Illinois (Mr. FINDLEY) a member of our committee.

Mr. FINDLEY. Mr. Speaker, as everyone knows, the State of Israel is the principal beneficiary of U.S. foreign aid, both military and economic, and has been for a number of years. It is with sadness that I note that today, when we give our final approval to a measure which will provide very generously once more to the State of Israel, we have in the headlines the news of the unfortunate action by the Parliament of Israel on the annexation of the Golan Heights.

Had this action occurred a few days sooner, perhaps there would have been an opportunity to have spoken to this sorry question in the language of the legislation now before us. But as it is now it is up or down on the conference report.

In my view it would be a mistake for us to reject this conference report just because of what I think to be very serious misconduct on the part of one of the principal beneficiaries of foreign aid because a rejection of the conference report would be very harmful to other more reasonable countries which have great need for military as well as economic assistance. But I think it would be a pity if this discussion were to close without some comment by Members of this body voicing their deep regret, their deep concern, about the action of the Israeli Knesset. In fact, I feel that our Government has no choice. It must demand that the Knesset repeal this act of annexation.

I feel, furthermore, that our Government should back up this demand with an announcement that no further shipments of fighter planes or other military gear to Israel will occur until such time as the Knesset has accomplished the repeal. The annexation is defiant of international law, it is harmful to the peace process, it is contrary to the United Nations charter, it is a violation of the spirit and the letter of several United Nations resolutions that deal with the Middle East crisis. Perhaps most serious of all, it is clearly an affront to the United States because much of the world, realizing the intimate relationship between U.S. support and the State of Israel, will come to the conclusion that we are a silent partner in this act of illegal annexation.

This annexation simply must be reversed and the United States alone among the world's nations has the leverage with which to force Israel to back down.

President Jimmy Carter on two occasions persuaded Prime Minister Menachem Begin to back down from wrongful acts. One was when he persuaded Menachem Begin to order the withdrawal of U.S.-supplied military equipment from Southern Lebanon and the other was when he persuaded him to order a halt in the air attacks against Lebanon, attacks that were carried out by U.S.-supplied aircraft. President Carter got results on both occasions. When confronted with the announcement and the clear warning by President Carter that if these acts were not stopped that there would be an interruption in U.S. aid—the acts did stop.

President Reagan can accomplish the same thing. He can tell the Israelis that no fighter planes will be shipped in January as they are now scheduled to be shipped and no other military gear will be shipped to the State of Israel until the repeal of this unfortunate act has occurred.

I wish to call to the attention and commend to my colleagues an editorial in today's issue of the Washington Post entitled "A Promise Broken," and would ask unanimous consent that be included along with my remarks.

The editorial referred to follows:

[From the Washington Post, Dec. 16, 1981]

A PROMISE BROKEN

Menachem Begin got out of a hospital bed Monday and, within hours, without a word of notice or preparation, broke the fundamental Israeli promise on which all of Israel's hopes for peace hinge. That promise, repeated many times, was to exchange territory for peace. By annexing the Golan, Israel precludes peace with Syria. It is that simple.

Prime Minister Begin offered two lines of argument. First, he says, Golan is part of the historic "land of Israel." But it is part only of what he calls, and then only in his less guarded moments, eastern Eretz Israel, which stretches from the Jordan eastward to the Euphrates River. It is a stroke of sheer fanaticism to base an actual territorial claim on that fantasy.

Then, Mr. Begin says, there is security. Yes, there is. Israel needs security from attack by Syria, which sat on the Golan and poured fire down on Israeli farmers before 1967 and which has refused to accept Israel and negotiate peace ever since. Syria meets no acceptable standard of international comity. Internal tensions have made the Syrians especially nasty in recent years. Ultimately, nonetheless, security for Israel rests on waiting for Syria to come around. Certainly the answer is not to make it hard for Israel's friends to justify or support Israeli conduct.

The most damaging burden Washington carries in its dealings with Arab countries is their suspicion that the United States is an accomplice, either mindless or witting, of a manipulative Israeli expansionism. This is why the administration must leave no doubt about its rejection of the Israeli action. Defense Secretary Caspar Weinberger says it is like the Israeli attack on the Iraqi reactor. Wrong: it is worse. The attack on the reactor had a certain security rationale. This step has none.

Fortunately, it is only a political decision, changing nothing on the ground. Therefore, a political decision can rescind it. Mr. Reagan should not both tut-tutting. He should bring real pressure to bear on the Israelis to return to the position that territory is to be traded for peace. There is nothing to negotiate here. It must be, for the United States, a point of principle. What other basis is there on which the United States can support Israel?

Mr. BROOMFIELD. Mr. Speaker, I yield 5 minutes to the gentleman from California (Mr. MCCLOSKEY).

Mr. McCLOSKEY. Mr. Speaker, I would ordinarily vote for this conference report as I have voted for every foreign aid bill and for every assistance we have previously extended to the state of Israel since I was sworn into Congress 14 years ago.

But there has been a change of circumstances since the foreign aid bill was passed last week. Out of $11 billion, Mr. Speaker, $2.2 billion, one-fifth of the total economic and military assistance from the United States will be going to the state of Israel and it will be going within a day or so of Israel's action to take and annex the lands of the sovereign nation of Syria.

In my judgment we are in a situation very similar to that of 15 or more years ago as this country began to slide into the Vietnam war because of congressional acquiescence day by day to the acceleration of the steps that the executive branch was taking in Vietnam. In retrospect, as we look back at that process of gradual involvement in Vietnam, each of us can point to no specific case where acquiescence by Congress did not contribute to that quagmire which may have been the most tragic policy mistake in this Nation's history.

□ 1315

Now we are on the brink of once again giving acquiescence by an action of a friend and ally, Israel, in actions which this country cannot countenance, cannot accept, and cannot endorse. Yet the House of Representatives, if we vote $2.2 billion today to Israel immediately after Israel's aggressive action, will be viewed elsewhere in the world as endorsing that action. It is one thing to say we deplore Israel's action, but if at the same time we vote the money by which that action is implemented, we are in effect endorsing it.

I recall, back in Vietnam, when the Congress and many of us were speaking out against the actions of Presidents Lyndon Johnson and Richard Nixon, in some step of escalation like the invasion of Cambodia; yet within a few days we would appropriate the money to continue that action.

Now, I do not think we ought to make any mistake which can enhance the peril of war, a war into which the United States could be drawn, in the Mideast. That peril is at least equal to the peril of being drawn into a war with our major antagonists, the Soviets.

In Oman we have a naval base; in the adjoining nation of South Yemen, the Soviets have a nuclear submarine base. The moderate Arab States—Kuwait, Saudi Arabia, the United Arab Emirates, Oman—are confronted by radical Arab States—Syria, Iraq, Libya. Saudi Arabia is literally surrounded, with Ethiopia to the south, Yemen on their eastern border, Iraq to the north, Libya to the west.

In that kind of confrontation, where an American President, Jimmy Carter, said 2 years ago, "We will go to war if necessary, we will use military force if necessary to repel a foreign intrusion into the Persian Gulf," the action that Israel has taken is literally an invitation for the Soviets to come to the additional assistance of their ally and their proxy, Syria.

Fourteen years ago, this Nation subscribed to U.N. Resolution 242 that the Golan Heights would ultimately be returned at such time as the Arab world recognized Israel's right to be secure within Israel's pre-1967 borders.

The point that I want to make, Mr. Speaker, is that the Congress cannot continue to acquiesce in militant acts by our friends and allies without appearing to countenance and endorse those actions. In the 1950's, other allies of ours, Britain and France, went into the Suez. There was no hesitancy by the American Government to tell allies like Britain and France, "You cannot move into the Suez." Here is a golden opportunity for the Congress of the United States to say flatly to the state of Israel, our friend and ally whom we support and want to prosper and be at peace, that this is the limit. "You may have bombed downtown Beirut, and we may have only delayed F-16's for a few weeks, but when you take the lands of a foreign country and draw closer to a war in which the United States may be involved," at that point the Congress of the United States should say "stop". Let us put this issue on hold; let us return this bill to conference, let us reconsider, in light of the events of the last 3 days, what conditions we put on this $2.2 billion in military and economic assistance to Israel.

I am not saying to cut off that assistance, but I believe we should put constraints on that assistance and vote this bill down today.

Mr. ZABLOCKI. Mr. Speaker, I yield 2 minutes to the gentleman from Michigan (Mr. WOLPE).

● Mr. WOLPE. Mr. Speaker, I thank the chairman for yielding.

Mr. Speaker, I rise in support of this conference committee report. In all of the respects that were most critical to this body, the House position was effectively sustained in that conference agreement. I think the passage of this legislation and conference report will help to promote American interests abroad, as well as strengthen America's ability to pursue its foreign policy objectives.

As chairman of the Subcommittee on Africa, I am particularly pleased by the conference committee's actions on several African issues:

THE CLARK AMENDMENT

The Conferees should be applauded for this decision to retain the Clark amendment, which prohibits the United States from providing military or paramilitary assistance to dissident groups in Angola. Although the Clark amendment should eventually be

lifted, I—like many of my colleagues—believe that this was not the right time. In the context or a Namibian settlement or the normalization of relations between the United States and Angola, the repeal of the Clark amendment would make sense. Outside of that context, repealing the Clark amendment would increase Angola's reliance on the Cubans, diminish the chances for a speedy settlement of the Namibian problem, and undermine our economic and political ties with other black African states. The responsible and statesmanlike position adopted by the conferees on this issue has, therefore, enhanced American credibility in black Africa.

ZAIRE FMS

The conference also reduced foreign military sales credits for Zaire from the administration's request of $10.5 million to a compromise figure of $6 million, with the expectation that $4.5 million reduction would be utilized for economic development efforts by private voluntary organizations. In Zaire, U.S. military assistance is largely wasted due to the surrounding environment of military and governmental corruption. In addition, it reinforces the association between the United States and a government which is perceived by the majority of Zairians as repressive. On the other hand, economic aid distributed by Zairian church and other voluntary organizations can have a positive impact on Zairians' views of the United States and the well-being of many Zairians.

AFRICAN REFUGEES

I further commend the House and Senate conferees for their support for the authorization of funding for African refugees. The situation facing African refugees and displaced persons in Africa has raised critical proportions. Today, Africa has the largest population of refugees and displaced persons of any continent in the world. According to the UNHCR, Africa has approximately 4 million refugees—just under half of the world's refugee population.

The burden of caring for these refugees and displaced persons in Africa has virtually impoverished many of the host countries which house and care for them. If these nations are not given assistance to help cope with the African refugee and displaced persons populations, it will become increasingly more difficult for these countries to tackle their own development problems. The funding authorized in this legislation will not only assist the host countries in meeting the needs, long term as well as short term, of the refugees, but will demonstrate America's commitment to sustained support for Africa's most serious humanitarian and economic problems.

SCHOLARSHIP FUND

I commend the conferees for lending support to the South African scholarship program. One of the most glaring inequities in South African society is reflected in the difference between black and white education. As a result of South African law, black and white students are not permitted to attend the same schools or classes and black schools are prohibited from teaching certain courses. Not only are the educational programs different, the amount of money spent on black and white educational systems is unbalanced and unequal. According to the latest figures, the South African Government spends 10 times more on each white student than it does on the black student.

Because of these inequities, there are few black South African professionals and even fewer who occupy managerial or skilled positions in South Africa's booming economy. The funding authorized in this bill will provide for approximately 125 4-year scholarships for use in the United States by South Africans who face legal discrimination in South Africa. While the subcommittee recognizes that the United States cannot be expected to shoulder South Africa's responsibility to provide equal education for all segments of its population, this funding will demonstrate American commitment to racial justice, peaceful change, and black advancement. Moreover, these students, after training in the United States, would provide a cadre of skilled professionals who would be able to make a direct contribution to running their own country—now and in the future.

And I, too, want to join in paying tribute to our chairman and to the gentleman from Michigan (Mr. BROOMFIELD) for the tremendous job they did in developing what was a genuine bipartisan effort. I would also like to extend my own appreciation to the members of the staff who were working under very difficult time contraints to produce this final document. I hope that the final product will receive the support of this body.

Mr. ZABLOCKI. Mr. Speaker, I yield to the gentleman from New Jersey (Mr. SMITH) for the purpose of a colloquy.

Mr. SMITH of New Jersey. I thank the gentleman for yielding.

My question is this, Mr. Chairman: It is my understanding that my amendment, which would have prohibited AID moneys from being used for abortion, as well as for research on methods and techniques for abortion, was replaced in conference with language that was adopted in the Senate and proposed by Senator BIDEN.

I would like the chairman to clarify, if he would, if it is the legislative intent of this Congress through this legislation to strictly prohibit all moneys—direct or indirect—from being used to pay for the provision of abortion or for any research on abortion methods and techniques.

Mr. ZABLOCKI. If the gentleman will yield, Mr. Speaker, as the gentleman from New Jersey has stated, a similar amendment was in the Senate bill. That amendment was sponsored by Senator BIDEN. The compromise is in section 302, the population and health section of the bill. I will read the particular section, which is language similar to the amendment of the gentleman from New Jersey which we accepted:

> None of the funds made available to carry out this part may be used to pay for any biomedical research which relates, in whole or in part, to methods of, or the performance of, abortions or involuntary sterilization as a means of family planning.

So the answer is yes, the gentleman's position has been protected.

Mr. SMITH of New Jersey. Mr. Speaker, my reason for seeking this clarification stems from the regretable fact that similar language contained in Health and Human Services legislation has been broadly interpreted to include abortion payments in circumstances other than "family planning." It is my intention, Mr. Chairman, to establish a clear and unambiguous record of legislative intent that this Congress does not want any money in this legislation used to pay for the provision of abortion or for research on abortion methods and techniques.

Mr. Speaker, last night I contacted AID Director Peter McPherson, and he said that current AID policy prohibits the use of moneys for abortion in any way, including research on abortion methods and techniques. Again, I just wanted the RECORD to clearly show that the legislative intent of this Congress and the conferees is to prohibit the use of any money for abortion or for abortion research in any way whatsoever.

Mr. ZABLOCKI. There should be no question on that.

Mr. SMITH of New Jersey. I thank the gentleman.

Mr. MOFFETT. Mr. Speaker, it was with a great deal of reluctance that I supported the conference report on the foreign aid authorization bill. While I am very supportive of the $1.5 billion in humanitarian assistance contained in the bill, as well as the funds authorized to assist allies such as Israel and Egypt, there are several other provisions of the bill to which I strongly object.

I am outraged that the bill proposes to spend hundreds of millions of taxpayers' dollars to prop up repressive, often terrorist regimes. El Salvador, for example, will receive $65 million in assistance, in spite of the junta's complicity with the murder of thousands of peasants by the military and its right-wing supporters. The requirement that the President certify that

"progress" is being made in human rights is virtually meaningless—the administration has already asserted such "progress" in nations such as Chile and the Philippines, even though their human rights situation is actually deteriorating. The bill also provides $100 million in aid to the Philippines, whose human rights violations have actually escalated since martial law was suspended in January of this year.

The bill is also a victory for the petty dictators in the southern cone of Latin America, as it lifts the ban on aid to Chile and Argentina. Chile is increasingly resorting to arbitrary arrest and torture to intimidate the people and stifle political activity. Further, justice has yet to be served in the "disappearances" of over 2,000 people, and the assassination of Orlando Letelier and Ronni Moffitt on the streets of Washington, D.C. The Argentine Government has been responsible for the "disappearances" of over 15,000 people since it came to power in 1976, and anti-Semitism has become an official policy of the authorities, The resumption of aid to such governments, whose links to terrorism are indisputable, violates every principle of humanitarian aid.

Equally disturbing is the bill's emphasis on military aid. While humanitarian assistance remains roughly at last year's levels, military assistance is nearly doubled. Further, the bill authorizes over $3 billion in loan guarantees for arms sales. While some of this aid is necessary, such as aid to Egypt, Israel, and the Sudan for defense purposes, there are also provocative elements of the military assistance program which may ultimately serve to undermine world peace. We can best promote world stability by aiding economic development, and thus hitting at the roots of unrest in the poor nations, rather than shipping instability around the world in the form of weapons for shaky governments.

Foreign aid represents a noble endeavor on the part of the United States to assist those less fortunate than ourselves. It is scandalous that these honorable efforts are tainted by the provision of aid for the purpose of propping up tyranny and repression, and by the provision of aid in the form of lethal equipment which can only be used to kill and oppress, rather than to improve the quality of life. The pending vote on the foreign aid conference report places us all in the difficult dilemma of either voting against aid to the needy and to allies worthy of support, or voting for aid to repressive regimes who deserve no U.S. assistance. The importance of foreign aid, however, compels me to support this bill, although I do so with serious reservations.

● Mr. HARKIN. Mr. Speaker, I am very displeased with the outcome on Chile in the conference report on S. 1196, the bill authorizing foreign aid for fiscal year 1982 and fiscal year 1983. I do not believe this was the right time to lift the ban on arms transfers to Chile. Furthermore, the compromise language fails to acknowledge the very severe human rights problems which continue to exist in Chile. Most particularly, I believe that any compromise should have specified in law our concern about the high incidence of torture. However, I do not believe that the administration, in good conscience, can certify that "the Government of Chile has made significant progress in complying with internationally recognized principles of human rights" unless it can demonstrate that there has been a substantial decline in the routine practice of torture against people the Government of Chile does not like.

I do congratulate the House conferees for insisting that the sense of Congress language concerning the Letelier-Moffitt assassinations be made a part of the certification process. I do not believe that the Government of Chile has "taken appropriate steps to cooperate to bring to justice by all legal means available those indicted by a grand jury in connection with the murders of Orlando Letelier and Ronni Moffitt."

In that regard I would like to make two points. The President of the Chilean Supreme Court turned down the extradition request of the three Chilean nationals indicted by the U.S. District Court because it claimed that under Chilean law evidence obtained under plea bargain is not acceptable.

In October 1979, Eugenio Velasco wrote an article on the Supreme Court's decision. Mr. Velasco, a Christian Democrat and an opponent of the former Salvador Allende Government, was a member of the Chilean Supreme Court for 7 years. He was expelled from Chile in 1976 for his work on behalf of victims of human rights violations. In October 1979, he wrote:

In order to disqualify (Michael) Townley's testimony, they (the Supreme Court) characterized the plea bargain as a "negotiated confession, or a recompensed declaration," which goes against Article 323 and 460 of the Code of Penal Prodecure: 323 prohibits and provides sanctions against the use of promises, coercion or threats against the accused; 460 declares incompetent a witness who has received "from a particular accusor or from the accused gifts or benefits of such importance that, in the judgement of the court, makes it presume that the witness does not have the necessary impartiality to make a declaration." The Supreme Court stated that Townley's confession "was the result of promises and coercions prohibited by our law."

The characterization of the plea bargain is grossly incorrect because in the United States, as in any other nation, there are laws which prohibit and penalize coercions and pressures against the accused or a witness. (And in effect, Velasco writes, the application of these norms is much more rigorous in the United States than in Chile.)

The Chilean Supreme Court's fears of a lack of impartiality are without foundation. The accused (Townley) has already received his sentence and it is not linked in any way or subject to change to his declarations or persons he could accuse. In fact, he can be further prosecuted if he lies, and the prosecutor is responsible for insuring this does not happen.

Furthermore, in Chile itself, in certain crimes against the internal security of the state, some decree laws promulgated by the military junta have introduced precepts based on plea bargaining, in a crude form, without the measures of seriousness and efficiency explained above (in U.S. law), which have simply led to the total absolving of the informer.

In summary, Mr. Speaker, it appears clear on a *prima facie* basis that the Chilean Court's finding that Michael Townley's testimony was not admissible under Chilean law is without foundation. Rather, it would appear the Supreme Court of Chile bent the law to its own criteria so to be able to exonerate the defendants.

There is much more evidence than simply Townley's testimony. The Chilean Government has never commented on this evidence. The United States, for instance, has the passports issued by the Government of Paraguay for Armando Fernandas Larios (one of three men indicted) and Michael Townley. Although these passports were eventually not used, photocopies of the passports eventually broke the case.

We also have the interview by the FBI with the Paraguayan Chief of Intelligence, Col. Benito Guanes. In that interrogation he, in effect, stated that the request for these passports came personally from Gen. Manuel Contreras, the head of DINA and one of three indicted by the U.S. District Court.

The copies of the passports and the transcript of the interrogation of Colonel Guanes are just two of 157 items of evidence submitted by the United States in its extradition request.

In summary, Mr. Speaker, I believe there is convincing evidence beyond the Townley testimony. The fact that the Chilean Government has failed to comment seriously on this evidence is, I believe, a demonstration that they have not cooperated under the terms of the proposed new law covering arms transfers to the Government of Chile.

Mr. Speaker, I would like to request that the New York Times article of July 20, 1978, reporting on the deposition given to the FBI by Colonel Guanes, as well as the deposition itself, be inserted in the RECORD.

[From the New York Times, Jul. 20, 1978]

PARAGUAYAN LINKS CHILEAN GENERAL TO LETELIER CASE

(By Juan de Onis)

ASUNCION, PARAGUAY, July 19.—Paraguay's chief of military intelligence has given United States investigators sworn evidence, including a copy of a coded message, linking Gen. Manuel Contreras Sepulveda, the former chief of Chile's secret police, to the assassination of Orlando Letelier, a Chilean exile leader, in Washington.

The evidence obtained here from Col. Benito Guanes, chief of military intelligence, is regarded as a major step by United States investigators who are hoping to obtain indictments from a Federal grand jury against General Contreras and agents of the Chilean secret police for the bombing tht killed Mr. Letelier and Ponni Moffitt, an American assistant, in September 1976.

In a deposition given to an agent of the Federal Bureau of Investigation, Colonel Guanes said that he had received a telephone call from General Contreras in 1976, followed by a coded telegram signed by the Chilean secret police chief, asking that Paraguayan passports be issued to two Chilean agents for a clandestine trip to the United States.'

This kind of cooperation between the intelligence agencies of the military regimes in South America—particularly those of Chile, Paraguay, Uruguay and Argentina—is common since they exchange information and cooperate in combating left-wing guerrilla groups that are also structured on regional lines.

In the case of the passports, informed sources said, the Chilean agents presented themselves under the false names of Juan Williams Rose and Alejandro Romeral Jara. The Paraguayan passports were issued, but United States visas were refused because the two men aroused the suspicions of American officials.

A month later, the Chilean Foreign Ministry obtained visas from the United States Consulate in Santiago for two official passports issued in the names used in the Paraguayan passports. These had been canceled by Paraguay after United States visas were refused.

By photographs presented with the passports here, and evidence subsequently obtained in Chile, investigators have determined that the official passports issued in Chile were used by Michael Vernon Townley, an American electronics technician, and Capt. Armando Fernandez Larios, of the Chilean Army, to travel to the United States in August 1976.

Mr. Townley, a longtime resident in Chile, was on the payroll of the Chilean secret police, known as the National Intelligence Directorate, or DINA, at that time, and Captain Fernandez was assigned to the DINA operations department. His chief was Col. Pedro Espinoza, who reported to General Contreras.

Mr. Townley was taken to the United States in the custody of two F.B.I. agents in March after the United States Government had exerted strong diplomatic pressure on Chile's military Government to cooperate in the Letelier investigation.

According to reports in Washington, Mr. Townley has made statements that acknowledge: the placing of a bomb in the automobile of Mr. Letelier, a former Chilean Foreign Minister and ambassador to Washington during the left-wing Government of the late President Salvador Allende Gossens. After spending two years in Chilean jails following the military takeover in 1973. Mr. Letelier went into exile and became an active opponent of the Chilean regime of President Augusto Pinochet.

The evidence obtained here is considered particularly important because it involves a direct linkage of General Contreras to the case, independent of what Mr. Townley has said.

Colonel Benito Guanes Serrano, Chief of J-2 Department, Joint General Staff, was interviewed at J-2 Headquarters, Asuncion, Paraguay.

On approximately July 17, 1976, and encoded message was received at J-2, Asuncion, from DINA channels advising that Alejandro Rivadeneira would be arriving from Buenos Aires, Argentina on July 18, 1976, or July 19, 1976, and that the pertinent flight arrival time would be informed from Argentina by "Condor One." The message went on to request in the first person that J-2 cooperate with a request for assistance which would be made of J-2 by Alejandro Rivadeneira and another DINA officer. Col. Guanes stated it is understood that messages received in the first person in Condor channels are from the Director of that intelligence agency, which in this instance would have been the then Director of DINA, Col. Manuel Contreras. Col. Guanes was unable to personally receive or read the message upon its receipt inasmuch as he was away from Asuncion until July 21, 1976. Col. Guanes was apprised of the receipt and contents of the DINA message and that two DINA officers had arrived and requested J-2 to facilitate the issuance of two Paraguayan passports for the purpose of travel to the U.S. to contact the Central Intelligence Agency (CIA) and also purchase Colt silencers for small arms. On July 23, 1976, Col. Guanes met with DINA officers, who identified themselves as Alejandro Rivadeneira and Juan Wilson Silva, checked their DINA credentials under the same names, and personally questioned them on their need for Paraguayan passports.

Col. Guanes was further advised by Rivadeneira and Wilson Silva that they had come to Paraguay from Argentina where they had also made attempts to procure false Argentine passports through Argentine intelligence agencies. Their request for false Argentine passports was denied. Unsuccessful in Argentina, Rivadeneira and Wilson Silva telephonically advised DINA of their negative attempts, which prompted DINA to transmit the July 17, 1976 Condor message to J-2. This DINA message was the first notification received by J-2 of DINA's interest in obtaining false Paraguayan passports for Rivadeneira and Wilson Silva. Col. Guanes mentioned it was not uncommon for friendly security services to assist in the issuance of false passports to other friendly security agencies involved in operations of common interest such as in those areas of anti-terrorism and movements considered mutually subversive by the cooperating countries.

Col. Guanes stated that after the two passports were granted, he became increasingly worried that the stated purpose for travel by Wilson Silva and Rivadeneira was not valid. Then, in early August, 1976, then U.S. Ambassador to Paraguay George W. Landau contacted Col. Guanes and requested the passports be returned to have the visas invalidated. Col. Guanes transmitted a coded message to DINA on August 7, 1976, requesting the two Paraguayan passports not be utilized and be returned promptly to J-2. On August 9, 1976, Col. Guanes personally telephoned Col. Contreras to covey in further detail the importance of his August 7, 1976 message, whereupon Contreras assured that neither passport had been or would be utilized. Contreras was again asked to retrieve the Paraguayan passports and forward them to J-2 by diplomatic pouch.

On September 7, 1976, Col. Guanes was appraised of the delivery of the Paraguayan passports by a DINA officer. Both passports were subsequently remitted to the Paraguayan Foreign Ministry for their cancellation.

Another contact by telephone was made subsequently in September, 1976 between Col. Guanes and Contreras, before the Letelier assassination, at which time the cancellation of the Paraguayan passports was made known to Contreras. Col. Guanes was advised by Contreras during this conversation that two other DINA officers, not those known to Col. Guanes as Alejandro Rivadeneira and Juan Wilson Silva, were traveling to the U.S. bearing Chilean passports under the names of Juan Williams Rose and Alejandro Romeral Jara.

Col. Guanes recalled that when the photographs of Michael Vernon Townley and Captain Armando Fernandez Larios appeared in the newspapers, the photographs bore an excellent likeness to the DINA agents who represented themselves to J-2 in July, 1976 as Juan Wilson Silva and Alejandro Rivadeneira.

Col. Guanes additionally made available a copy of a decrypted message which he stated had been sent to J-2 by Col. Manuel Contreras Sepulveda in coded form which contains a DINA request to receive Alejandro Rivadeneira and another unidentified DINA officer and that J-2 acquiesce to the request they would make to J-2 upon their arrival in Asuncion. He said that the DINA message, although undated, probably was received on July 17, 1976. The decrypted DINA message, received at J-2, reads as follows:

"COMMANDER IN CHIEF OF THE ARMED FORCES OF THE NATION

"GENERAL HEADQUARTERS

"To: German (D-2)

"From Gillermo (Sub-Director of Foreign Intelligence)

"Serial Number V/500—X-S GH171905JUL1076

"From: Chile.

"Text: To advise that tomorrow, 18 or 19 July, will be arriving in that country from Buenos Aires Alejandro Riva Deneira with companion. Flight number will be forwarded from Condor One. I would appreciate assistance in the performance of the mission in accordance with request to be made by the above-named person."●

● Mr. RATCHFORD. Mr. Speaker, it is with reluctance that I support the conference report on the International Security and Development Cooperation Act of 1981. I supported the House-passed version of this legislation because it offered an acceptable approach both to development assistance and to restricting military aid to countries with undesirable human rights records. The conference committee, while doing a generally admirable job on this complex issue, has made changes in some of the conditions for military assistance which are much weaker than the House provi-

sions. This is an unfortunate turn of events.

Foreign aid legislation has usually contained measures for both economic development and military assistance. This year's foreign aid bill continues this trend, but I am alarmed by the marked increase in emphasis on military aid, particularly to nations with poor domestic and international performance records. I am particularly concerned with the conference committee's provisions for aid to Argentina and Chile.

The current administration views military assistance to Argentina as an absolute necessity for maintaining good relations with this supposed friend. Yet it is my recollection, Mr. Chairman, that Argentina, a major exporter of grain, did not agree to the grain embargo on the Soviet Union after that nation invaded Afghanistan. Nor is the Argentine economy a pillar of free-market capitalism, as much of its business is controlled by the Government. Finally, Argentina's human rights record is plainly atrocious. Literarally thousands of Argentines have disappeared in the last few years, and the Government refuses to account for their whereabouts. People who have suddenly vanished are almost universally critics of the Government or members of the Jewish faith.

I am hesitant to support any measure which would permit this government to receive military aid, Mr. Chairman, but I find the provisions in the conference report even more repugnant. The conditions for approving military aid to Argentina now have been reduced to a provision that the President shall consider that Argentina is making progress to provide information on the people who have disappeared and to bring to justice political prisoners now in jail. A government which stands for freedom and justice at home such as ours should not condone the atrocities committed in Argentina, Mr. Chairman, and I am reluctant to place my support behind this weak provision.

With respect to Chile, I doubt that a government which has so flagrantly violated the basic human rights of the people in that nation will take seriously a nonbinding resolution to bring to justice the Chilean nationals who so brutally murdered Orlando Letelier and Ronni Moffit on the streets of our own Capital 5 years ago. Nevertheless, the approval of military assistance to the brutal Pinochet regime hinges on this flimsy provision.

I am glad, Mr. Chairman, that the conferees decided to maintain the House bill's condition on aid to El Salvador, for any weakening of these provisions would have been an insult to the families of the American religious workers and officials who were slain in that country a year ago. Furthermore, I am pleased that the conferees have chosen not to repeal the Clark amendment prohibiting covert activities in Angola.

I am disturbed, however, that many of my colleagues have come to view this bill merely as an extension of our military security policy. This body has already approved a $200 billion appropriation for defense, and the foreign aid bill is so heavily laden with arms agreements for other countries that our entire foreign policy is beginning to take on a one-dimensional, militaristic look. Foreign policy means more than guns, Mr. Chairman, and I had hoped that this body would recognize the importance of economic development for building and maintaining good relations with other countries.

As I recently pointed out to the people of my district, economic development assistance brings both short- and long-term benefits to the United States. We can profit greatly both politically and economically from encouraging economic development through the IDA and other agencies. We will not, however, profit in the long run from continued assistance to repressive governments. I regret that this body has not learned this valuable lesson, and I support with great hesitation this foreign aid bill.●

● Mr. LAGOMARSINO. Mr. Speaker, I rise in support of H.R. 3566, foreign aid authorizations for fiscal year 1982—conference report.

Supporting the President's foreign policy requires voting for this conference report on authorizing foreign aid.

Military security assistance, as provided in the legislation, is necessary to permit other nations to help defend themselves and thus avoid possible direct U.S. military involvement.

The economic assistance is necessary to help provide growth and economic stability, essential for political security.

I suggest that such aid, military and economic, is in the best national security interest of the United States.

With regard to aid to El Salvador, I would like to make several points:

First, the bill provides three times as much economic aid as military aid, more economic aid than President Carter provided. President Duarte of El Salvador says he needs economic aid more than military, although he does need and has requested appropriate military assistance so that El Salvador can choose its own future.

Second, my colleagues should be reminded that President Carter first proposed military aid. In fact, then, U.S. Ambassador to El Salvador, Robert White, now a critic of U.S. policy, requested lethal military equipment.

Third, it is clear from the provisions in the bill that it is intended aid will be directed to the private sector.

Fourth, President Duarte has advised members of the House Foreign Affairs Committee of his commitment to achieve compliance with the certain conditions also laid out in this legislation.

Fifth, elections are to be held in March, with martial law lifted and political parties operating. This procedure was approved by an OAS resolution adopted by a 22-to-3 vote.

I do regret and am disturbed that in spite of the fact that all conferees, as far as I know, agreed to my amendment that President Reagan in certifying that El Salvador is acting in accordance with specified conditions should consider the extent to which El Salvador is supporting the private sector, that provision was omitted because of a technical objection by one conferee. I hope the President will nevertheless consider this provision in making his certification.

With regard to Nicaragua, I am pleased that the conference agreed with my floor amendment giving flexibility to the President of El Salvador, if possible, our relations with that country, while at the same time giving him tools to use to restrain Nicaragua's support of terrorism.

I am also pleased by the even-handed approach taken in the bill in lifting restrictions on Argentina and Chile. This is especially important in view of the continuing Beagle Channel controversy.

No aid is proposed in this legislation for either country.●

Mr. BROOMFIELD. Mr. Speaker, I have no further requests for time.

Mr. ZABLOCKI. Mr. Speaker, I have no further requests for time, and I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ZABLOCKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

CONFERENCE REPORT ON H.R. 4559, FOREIGN ASSISTANCE AND RELATED PROGRAMS APPROPRIATIONS, 1982

Mr. LONG of Maryland. Mr. Speaker, pursuant to the order of the House today, I call up the conference report on the bill (H.R. 4559) making appropriations for foreign assistance and related programs for the fiscal year ending September 30, 1982, and for other purposes, and ask unanimous

consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maryland?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of today.)

Mr. LONG of Maryland (during the reading). Mr. Speaker, I ask unanimous consent that the statement be considered as having been read.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maryland?

There was no objection.

The SPEAKER pro tempore. The gentleman from Maryland (Mr. LONG) will be recognized for 30 minutes, and the gentleman from New York (Mr. KEMP) will be recognized for 30 minmutes.

The Chair recognizes the gentleman from Maryland (Mr. LONG).

Mr. LONG of Maryland. Mr. Speaker, I submit for your consideration today the conference report for the foreign assistance and related programs appropriations bill for fiscal year 1982.

The conferees on both sides of the aisle worked diligently until late yesterday infashioning fair foreign aid bill. In almost every instance the Senate receded to the House position.

The foreign assistance conference report before you contains $7.495 billion in new budget authority. This is a reduction of $280 million below the budget levels requested by the administration. In relation to the budget resolution allocation, the conference report in some $545 million below the amount allocated to the subcommittee.

Mr. Speaker, this is an omnibus appropriations bill containing funding for a large portion of the foreign policy initiatives of the United States and providing for security and military assistance, bilateral and multilateral development assistance, and funding for the Export-Import Bank.

This bill contains $2.576 billion in security assistance to meet our most urgent foreign policy commitments in Africa, the Middle East, Asia, and Latin America. In addition it provides for $4.047 billion in military assistance to such countries as Egypt, Thailand, Yemen, Portugal, Turkey, Kenya, Liberia, Somalia, Sudan, and countries in the Caribbean and Central America.

This bill also includes funding of $13.6 billion for the Export-Import which provides U.S. firms with business opportunities and American workers with jobs.

Finally, this bill provides $1.47 billion for the six international financial institutions requesting funds in fiscal year 1982 and $1.295 billion for the Agency for International Development.

Mr. Speaker, I believe that the bill is a fair one and one that can and should be supported by a majority of Members I urge its adoption.

I am submitting the following table which shows the conference agreement along with other statistical information:

COMPARATIVE STATEMENT OF NEW BUDGET (OBLIGATIONAL) AUTHORITY

	New budget authority					Conference compared with—			
	Enacted	Estimates	House	Senate	Conference	Enacted	Estimates	House bill	Senate bill
TITLE I									
MULTILATERAL ECONOMIC ASSISTANCE									
Funds Appropriated to the President

[1] Funded in Continuing Resolution, 1982 (H.J. Res. 325).
[2] Budget amendment proposed by administration November 5.

Mr. KEMP. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, we have just come out of a very difficult conference on foreign aid appropriations. We were successful in making some improvements in the bill that was passed out of the House. The comment that I made during our original floor debate that the bill is not perfect still obtains, but we have made improvements.

I want to take a moment to commend the members of the subcommittee for their exemplary work on this bill. Chairman LONG's fine leadership and tireless efforts are unparalleled. I am particularly proud and privileged to have worked with an outstanding group of minority members, MICKEY EDWARDS, BOB LIVINGSTON, JOHN PORTER, and JERRY LEWIS, each of whom contributed in his own way to the formulation and passage of this bill, and perhaps more importantly to the policy debate behind each appropriated item before the House today.

I know, Mr. Speaker, that there are issues with which many of us might disagree. I mentioned, and chairman and Members on his side of the aisle have alluded to the fact that we have negotiated a very fragile balance in trying to achieve our foreign policy objectives. We have come a long way toward reconciling our differences over commitments to the international development institutions while increasing military and security assistance to nations that are in alliance with this country or are potential allies. These are the nations, friends or potential friends, strategically located in critical areas of the world, upon whose cooperation and assistance we depend in defending our own critical interests and those of the free world.

As the chairman mentioned, we increased security assistance. Military assistance was increased by $41,500,000 in budget authority and $237,313,000 in loan guarantee authority. While this leaves us $452 million below the President's request it is a significant increase over previous appropriations. In fact, the total military and economic support funds in this bill are 25 percent of the total.

For those of my colleagues who are concerned about the problems we face in northern Africa, at the entrance to the Red Sea and the Persian Gulf, in the Middle East, the problems between Israel and Egypt and their Arab neighbors, in strengthening the southern flank of NATO you should know that we have increased military and security assistance to nations in these critical areas.

Israel, of course, is the single largest recipient of security assistance from the United States. This bill provides $550 million in FMS forgiven loans and $800 million in ESF for Israel. Moreover, we have specified that these moneys will be disbursed to Israel within 30 days, which represents significant savings for the Israeli Government in terms of avoided interest payments.

We have made important increases to our economic support fund program, now at $2.5 billion, which promotes economic stability and provides balance-of-payments support to 16 countries of key strategic importance to the United States, including Israel, Egypt, Turkey, and the Sudan. ESF support for Pakistan ($100 million) was approved by the conference. (Assistance to Pakistan originally was not included in the House bill because our

markup was completed in advance of the administration's request for Pakistan.) I know I need not point out to this body that our support for Pakistan comes at a critical time in the history of South Asia, with Soviet occupation forces in Afghanistan. Moreover, we provided an additional $5 million for Poland, a small symbol of our deeply held support for the yearnings of the Polish people. And the Senate receded to the House figure of $15 million for Cyprus—double the original request—to emphasize our support for stability and tranquility on that troubled island.

□ 1330

The economic support fund was increased at a time when many nations of strategic importance to the United States do not have the basic economic development to sustain defense support levels required for their own needs or for contributing to our mutual security. It is imperative that we come to the assistance of our friends and potential allies at this dangerous time.

The sixth replenishment of the International Development Agency, over which there was a fierce debate, was reduced by $25 million, so it comes down to $700 million. Frankly, as my friends on this side of the aisle know, I wanted to go further on IDA. We spent at least 2 hours debating what this year's contribution to IDA should be, and I frankly do not think we went far enough. But, to have argued over another $10 million or $20 million would have jeopardized the whole bill.

Compared to the original request of $850 million we have made a significant reduction in IDA, but nothing that would damage or undermine the President's commitment to the World Bank and to the International Development Agency.

Our conservative friends and our liberal friends are not pleased or happy but they are willing to accept this compromise. It does not force the President to renegotiate IDA VI.

Those who like my friend from Oklahoma (Mr. EDWARDS) were deeply concerned about the proposed seventh replenishment of IDA have received assurances that IDA VII will not be negotiated without the input of our body. I continue to oppose these negotiations. They are premature and should be postponed until IDA VI is fully funded and a thorough oversight of program changes is made.

In the course of these negotiations, in reaction to the amendment offered by our distinguished colleague (Mr. LEWIS) we have received assurances from the Secretary of the Treasury that he will take immediate steps to negotiate the graduation of India and other nations out of IDA and into the hard-loan portion of World Bank.

This is a sign of definite progress in promoting the type of democratic free enterprise which we support. My colleague from California is to be applauded for the victory he has achieved.

Mr. Speaker, before leaving the topic of IDA, I would like to acknowledge the work and support of my colleague from Delaware (Mr. EVANS). His remarks during the original floor debate and his work and support have been a valuable asset to bringing this bill to passage. I value his friendship and appreciate his support.

Another question was raised by my friend from Ohio (Mr. ASHBROOK). It was an issue that I also raised. Are moneys going through multilateral agencies to countries that are hostile to everything that this Nation stands for and that are antithetical to the foreign policy initiatives of the President and the Congress? My friend offered language which would have assured that they are not.

We did not achieve the Ashbrook amendment language, for technical reasons. We did add Libya, Iraq, and South Yemen to the list of nations that are prohibited from receiving direct assistance from American taxpayers. Prohibitions are now in effect for Angola, Cambodia, Cuba, Iraq, Laos, Libya, South Yemen, Syria, and Vietnam.

Mr. ASHBROOK, Mr. Speaker, will the gentleman yield?

Mr. KEMP. I yield to the gentleman from Ohio.

Mr. ASHBROOK. I thank the gentleman for yielding.

Would my colleague in his very learned and concise form tell the Congress where we are on the matter of indirect money? Can American taxpayers' money go indirectly to those countries?

Mr. KEMP. I will answer my friend and I compliment the gentleman from Ohio for bringing this issue to the attention of the Congress.

I am sure the gentleman appreciates the sensitive nature of this issue and the difficulty of responding to him in a totally public forum.

Having said that, I will say to my friend that I am persuaded that the administration is working to prevent indirect assistance to the nations that I mentioned as well as prohibiting direct assistance. To go any further is to ask the administration to make a public statement that I do not think should be made. It would not be in our interest to do so. But I assure the gentleman that there is a very positive reaction to the intent of his amendment by the administration and that, as ranking Republican on the subcommittee, I will personally monitor compliance with the gentleman's intent.

I ask the gentleman to accept my statement and to recognize how far we have come in meeting the gentleman's goals.

Mr. ASHBROOK. If the gentleman will yield further, I appreciate his wish and I commend him for doing his best. As he has indicated so many times over the years, and as I have indicated so many times over the years, when one is talking about foreign policy, the military, the economy, you normally get where you head—and we have been heading in a direction other than what my colleague has talked about or worked for. Just as we are trying to change the direction of the economy, if we can head in a little bit different direction, a little more reasonable direction, that certainly is adequate for this Member because as we have said for so many years, we normally get to where we are headed and we headed in the wrong direction in so many ways for so long. It is gratifying to know that with the efforts of my colleague from New York and many in this body, that this administration may indeed be taking us in a little more reasonable direction than some have in the past.

We just talked about the problems of social security. We finally got where we were heading. While I oppose this bill as I have always opposed foreign giveaway programs, I applaud the gentleman from New York (Mr. KEMP) for his long, hard work in changing the direction of this program we call foreign aid.

Mr. KEMP. I appreciate my friend's attitude and conciliatory statement. I want him to know I have come to respect the attitude of people on the other side of the aisle who are deeply concerned about the economic problems of the Third World. They know that I think some of the things we are doing in the Third World are causing the very problems that we are now being asked to finance, but there is a new direction and we can learn a lot from each other on this issue. I appreciate my friend's comments.

I also want to point out that this bill contains important humanitarian relief funds. An important example of this is the $10 million targeted for earthquake relief and reconstruction in southern Italy, which was adopted, thanks to the initiative of Senator D'AMATO and our colleague SIL CONTE.

Mr. HYDE. Mr. Speaker, will the gentleman yield.

Mr. KEMP. I yield to the gentleman from Illinois.

Mr. HYDE. I thank the gentleman for yielding.

I want to say to my friend in the well he has done a masterful job with this very important and difficult legislation.

I want to congratulate him and the gentleman from Maryland (Mr. LONG), who has done a superb job in a field in which he is an acknowledged expert,

and I am very pleased to see even at this very late stage in this session this important bill with the support that it has, due in no small measure to the gentleman from Maryland (Mr. LONG), and the gentleman from New York (Mr. KEMP).

Mr. KEMP. I thank the gentleman.

I say to my friend from Illinois, I appreciate that.

Mr. Speaker, I think we have here something that meets the requirements of all of us on both sides of the aisle who voted for it. We passed a fair bill and we have made improvements in conference.

Frankly, I think we ought to pick up some votes. I do not think there ought to be anybody at this critical moment, with the Soviets aiming a gun at the head of Poland and already in Afghanistan. One who would ignore the needs of the President in carrying out the foreign policy of the United States, need not go back very long in history to recognize we cannot turn our backs on the world, especially those countries upon which we depend for mutual security efforts, for access to military facilities, and increasingly, for natural resources.

In 1935, when the Nuremberg laws were passed in Nazi Germany and Mussolini attacked Abyssinia, which is now Ethiopia, Haile Selassie went to the floor of the League of Nations to appeal to the West for support for his small country. No one listened. He was refused any assistance—economic assistance, military assistance, moral assistance, political assistance. He did not even get a vote in the League of Nations. Having been ignored by the West, Haile Selassie finished his speech by saying, "Do not weep for me, weep for yourselves."

Within 6 weeks, Hitler invaded the Rhineland, then he moved into Austria, the Sudetenland, Czechoslovakia, and the Danzig corridor of Poland. The very people who were protesting any involvement by the West in the problems of the world in the 1930's, were many of those whose sons ended up dying on the beaches of Dunkirk, Normandy, and Guadalcanal. We must not turn our backs on the rest of the world. This is not a foreign aid bill. This is an investment in the peace and the future of America and our allies. I suggest that those who want to vote against this bill are making a big mistake if they think we can hide our heads in the sand at this critical juncture in the history of our country and the West.

Mr. Speaker, I reserve the balance of my time.

Mr. LONG of Maryland. Mr. Speaker, I thank the gentleman from New York and let me say what a tremendous contribution he has made to the passage of this bill, he and the gentleman from Massachusetts (Mr. CONTE) and the other members of the subcommittee on both sides and the gentleman from New York (Mr. MCHUGH).

Mr. Speaker, I yield 3 minutes to the gentleman from Wisconsin (Mr. OBEY).

Mr. OBEY. Mr. Speaker, when the bill left the House, I voted against it for two reasons. It adopted an additional amendment on the Eximbank which I thought made the bill too high and too large, and second, I expected the conference to totally rewrite the bill and make it a quite different product than the House had produced.

Very frankly, that did not happen. I thought the conference behaved in a more moderate and responsible way than I had expected. While I certainly am not happy with the bill, and in fact, while I would disagree with the gentleman from New York who said that it was better than the bill that left the House, I think it is worse than the bill that left the House, but it is not as bad as I expected it to be. So because of that fact, I will support it when it comes to a vote, largely for two reasons.

First, I think the administration has done a more credible job than I had expected in their lobbying on the issue of economic assistance, and second, I think that on occasion they have been more restrained than I expected them to be on a number of military matters.

I think it is terribly important as a number of people have pointed out that we do have a bipartisan approach to foreign policy. In the past we have had people like the gentleman from Massachusetts (Mr. CONTE), and the gentleman from Illinois (Mr. HYDE), who have been most constructive in trying to achieve that purpose under Democratic Presidents, and I think on this side of the aisle we Democrats have an obligation to do the same.

I think that the chairman of the subcommittee did a fine job in conference. We have a bill which, while I will admit is a very close call, is a bill which one can responsibly support even while differing strongly with individual provisions.

I want to say that I think the gentleman from New York (Mr. KEMP), the ranking minority member, performed in an extremely responsible way and I salute him for that.

I also want to say that the gentleman from Oklahoma surprised me in conference yesterday by demonstrating a willingness to compromise on the issue of military assistance and IDA which again I frankly did not expect to see. I think that as much as anything demonstrated the willingness of people in that conference to give and take and to compromise with people with whom they had some very fundamental disagreements.

The gentleman from New York (Mr. MCHUGH) who was pursuing a bill that I would have been much more comfortable with did a fine job in defending the kind of programs that I think need to be emphasized in the foreign aid bill.

So, while it is certainly questionable I would say that on balance this is a bill which we can responsibly support and would urge Members to do so when it comes to a vote.

Mr. KEMP. Mr. Speaker, I yield 5 minutes to our distinguished ranking member on the Appropriations Committee, the gentleman from Massachusetts (Mr. CONTE), without whose efforts we could not have passed this bill.

Mr. CONTE. Mr. Speaker, I rise in strong support of this conference report on the fiscal 1982 foreign aid conference report.

First of all, I want to commend the dedicated chairman of this subcommittee, the gentleman from Maryland, for his patience and hard work during our 8-hour conference yesterday, and for hanging in there over the last 3 years since we were last able to bring a foreign aid conference report to the House floor. I commend all of the House conferees for their efforts to reach a delicate compromise on this difficult bill, which has been accurately described by the able subcommittee member from Louisiana (Mr. LIVINGSTON), as "the foreign policy appropriations bill."

The President needs this bill to carry out the foreign policy of the United States. The bill ranks as No. 1 in priority legislation on this final day, hopefully, of the 1st session of the 97th Congress.

This conference report includes $7.5 billion for foreign policy purposes for fiscal 1982, $280 million below the budget. Of this total, $1.5 billion is for multilateral assistance, $5.1 billion is for bilateral economic assistance, and $965 million is for military assistance. In addition, Export-Import Bank direct loans are set at $4.4 billion, and Eximbank guarantees are set at $9.2 billion.

Believe me, these levels were very difficult to reach. I do not know of any of the conferees who are entirely happy with all of the figures. But that is the nature of a conference and of the legislative function. The choice was to compromise, or not have a conference report which could pass both Houses and be signed into law. We have been operating on an ad hoc basis for foreign assistance for 3 years—it is time to make some tough choices in order to get this bill down to the White House for signature.

What happens if we do not pass this conference report? We would then operate under the continuing resolution which was signed yesterday. I happen to be quite familiar with that resolution, and I know that there is not nearly enough money in it to meet the

legitimate foreign policy needs of this Nation.

In the economic support fund, which provides important budget support for such critical friends as Egypt, Israel, Turkey, Portugal, the Sudan, Pakistan, the Philippines, Jamaica, Somalia, Kenya, Thailand, Costa Rica, Cyprus, and Spain, funds under the continuing resolution are nearly $500 million short of the amount available in this conference report. Military assistance programs, which aid many of these same countries, and which can truly be described as U.S. security programs, are funded at $326 million—or more than one-third—lower in the continuing resolution than in this bill. Multilateral assistance funds—including funds to insure the continued veto power for the United States in the World Bank—are $200 million in budget authority and $1.2 billion in callable capital lower in the continuing resolution than in this bill. U.S. bilateral assistance programs, including funds for agriculture, health, population control, education, energy, private voluntary organizations, refugees, disaster assistance, narcotics control, American schools and hospitals abroad, and the private trade and development program, are nearly $600 million lower in the continuing resolution than in this bill.

As everyone agreed during the debate last week on the continuing resolution, that is not a good way to run the Government. We need a foreign aid bill which reflects today's economic and political situation in the world, not the situation which existed 3 years ago. We need to act in a bipartisan way to assist our President to restore American credibility around the world. We cannot do that with words, although we try that around here. It takes money. It takes assistance programs which demonstrate our concern and our friendship publicly to the people of the recipient nations.

I have supported foreign aid bills and programs for nearly 24 years in this Congress—programs which were proposed by administrations of both parties. I am proud of this record, because I believe that these programs have improved the image and position of the United States in ways which military strength cannot possibly do. To be visibly active in controlling a disease which has killed or maimed for centuries, to bring education where it did not previously exist, to aid in increasing food production in areas thought hopeless only a decade ago, to train future leaders with our individual values and economic know-how, I am proud of all of these achievements of our foreign assistance programs. We have no apologies to make to the developing world—these programs should be a source of national pride and national determination to continue them, to improve them, and to expand them.

The alternative to passing this bill would be a big step—and a very visible step—backward in our efforts to assist important friends and improve our own economic and security prospects. I strongly urge you to vote for this U.S. foreign policy bill.

Mr. LONG of Maryland. Mr. Speaker, I thank the gentleman from Massachusetts who made such a magnificent contribution.

I agree with the gentleman from Wisconsin, the ranking majority Member, that this is a balanced bill. Both sides feel that they should have done better. On the other hand, looking back, they realize they could have done a lot worse. It was a compromise in the best tradition of good American Yankee hard bargaining.

Mr. Speaker, I yield 3 minutes to the gentleman from New York (Mr. McHUGH).

Mr. McHUGH. Mr. Speaker, I thank the chairman for yielding.

I wish to begin by complimenting the chairman, the ranking minority member, the gentleman from New York (Mr. KEMP), and the other members of the subcommittee, for accomplishing a very difficult job. To reach this final stage of the legislative process is not easy with a foreign aid appropriations bill.

I rise in support of the conference report. When we were before the House last week, many of us indicated that our House bill was a delicately constructed compromise, balancing economic aid on the one hand and military assistance on the other, multilateral assistance on the one hand and bilateral assistance on the other. In my judgment this conference report still reflects that kind of compromise, one which makes it possible for liberals, moderates, and conservatives to vote for final passage.

This is not a perfect bill. It is not the one I would have written if I had sole power to write a foreign aid bill. It is not a bill which the gentleman from New York (Mr. KEMP) and other Members on his side would have written, but it is essentially a fair and balanced bill. That is what makes it possible to have, for the first time in 3 years, a bipartisan coalition sufficient to enact a foreign aid appropriations bill.

There are some Members on my side of the aisle who will be tempted to vote against the conference report because they are dissatisfied with some elements of the Reagan foreign policy. I understand that. I also have some fundamental disagreements with the administration on foreign policy issues, but that is not the determinative issue here. Any President, including this one, needs the tools to conduct American foreign policy and those tools include economic and military assistance. So long as the mix of those tools is reasonably balanced, it seems to me that those of us who have reservations with some parts of the package have a responsibility to our country to support the bill.

When we took our bill to conference, those of us who are interested in maintaining adequate economic assistance and avoiding an excess of military assistance were concerned. We had real problem, because the Senate was much lower on most economic accounts and considerably higher on the military accounts. We faced the prospect of a conference report which would have upset the delicate balance we had achieved in the House bill. Fortunately, by the exercise of restraint and compromise on both sides, we were able to avoid that result.

Therefore, Mr. Speaker, I urge my colleagues on both sides of the aisle, recognizing that we still have differences in priorities, to vote for the conference report.

Furthermore, I urge the administration, in putting together its budgets for succeeding years, to bear in mind that in order to pass a foreign aid bill, it will be necessary to retain and nurture this coalition, a bipartisan coalition which for the first time in 3 years should be able to pass this foreign aid appropriation bill.

Mr. KEMP. Mr. Speaker, I yield such time as he needs to my friend and colleague on this committee, the gentleman from California (Mr. LEWIS).

Mr. LEWIS. Mr. Speaker, I thank my ranking member for yielding.

Mr. Speaker, first I would like to associate myself with the remarks of the gentleman from New York (Mr. McHUGH) and express my appreciation for his cooperation and our chairman for the fantastic job of working on both sides of the aisle to make this bill possible.

I had not intended to rise today, except for the fact that serving on this subcommittee has been a very, very educational experience for me.

I want to take a moment out to talk with my colleagues about the experience I have had watching my ranking member on the subcommittee, our quarterback from New York. We have all known about him in terms of things like Kemp-Roth and his concerns about our domestic economy; but I must say that the gentleman from New York, JACK KEMP, deserves a great deal of credit for the success we have had in bringing this bill to the floor and I think for the success we will have on the floor. His leadership, his knowledge of the subject, his capacity to learn so quickly so much have been more than impressive to me. It has been an inspiration to me personally. I want to thank the gentleman from New York (Mr. KEMP) for both his support for my own efforts in

the subcommittee, but most importantly, for the fact that we have this bill on the floor today.

This bill is a compromise in the truest sense of the word. Few are happy with the individual items in this bill, but this is surely a case where the whole—the fact that we have gotten a bill—is greater than the sum of the parts.

This bill is needed to give our President a chance to shape his foreign policy. That was the prime reason which allowed this conference report to move forward in finest spirit of bipartisanship in matters of foreign affairs.

While we should vote for this bill, let us bear in mind the importance of having Congress help resolve some of the major foreign policy problems we face.

One of these foreign policy problems is economic development.

While there has been much discussion about how much money we should spend on economic development, Congress has spent far too little time focusing on what is effective economic development. We speak of foreign aid too glibly as if all our billions of dollars flowing overseas are really aiding people and our friends. This is decidedly not the case in many instances; often our aid is counterproductive. The World Bank has been pushing concessional loans and debt on Third World countries at a far too rapid pace.

Sure, the Third World governments, rulers, and bureaucrats are eager to receive these funds, but is the life of the poor peasant in the field made better off by this international welfare? I believe Congress and the administration must take a hard look at such an issue.

It is not just the World Bank which needs oversight, but also U.S. aid. To what extent were Sadat's domestic problems in Egypt exacerbated by the flood of U.S. aid dollars to that country? Has our easy money encouraged domestic graft and corruption in developing countries which makes the common citizen cynical of his own government and American aid?

MILITARY FOREIGN ASSISTANCE

Just as serious concerns arise with our security assistance programs. Is our aid fueling an arms race between India and Pakistan? Did all our military support of the Shah of Iran result in an outcome beneficial to this country? Has the administration fully justified its case for the large increases in security assistance programs in this bill?

Frankly, I am not so sure they have. However, they have spent more time and have more information than Congress on these issues. They deserve the benefit of the doubt and they deserve a bill, and this bill is the best Congress can do.

But I, for one, will be in a far different frame of mind when next year's foreign assistance appropriations are considered by this body. If this administration fails to work with Congress to make progress on the many troublesome issues which are present in this bill, I will not sublimate my own concerns and vote another one for the Gipper.

Mr. LONG of Maryland. Mr. Speaker, let me just say that this is a bill which is in the foreign policy interests of the United States. I recognize and I agree with my Republican colleagues on that. It is certainly to be preferred to have a bill instead of continuing to try to fashion the funding of our foreign policy in a smoke-filled room with people who are sweating, late into the night, surrounded by lobbyists, without even a recording of what is being said and done.

It is time we got away from that, and this is the bill that does it. I do not think Jimmy the Greek would have given us very much chance of getting to this point, but I think we owe it to the gentlemen on both sides of the aisle who have worked so hard.

I do not always agree with the President on his foreign policy, but in the end I say to myself this—that the President of the United States is an American. I am sure he does what he thinks is best for American interests and the interests of the American people, and I am an American. I hope we will all support him in that frame of mind.

Mr. SILJANDER. Mr. Speaker, the administration has agreed to comply with the provisions within my amendment that were offered to and adopted by this body to prohibit funding for lobby promotion, recommending abortions or training individuals in abortion under the foreign assistance appropriations bill.

As reported from conference, that language agreed to had been revised. Though language was changed, the administration agrees that the content and scope regarding the amendment has not. To clarify the administration's agreement in this, I submit the following letter received by me from Mr. McPherson of AID:

DEAR CONGRESSMAN SILJANDER: I am familiar with your amendment regarding the Agency for International Development (A.I.D.) on the subject of abortion. As my General Counsel, John Bolton, indicated in conversations with you, the Agency for International Development will comply completely with your amendment. A.I.D. will not in any way lobby for or promote abortion. Moreover, A.I.D. will not finance or perform any training, here or abroad, for the purpose of performing abortions. We understand that you do not intend to preclude standard obstetrics and gynecology training.

In addition, as a reminder, I have stated on the record and elsewhere that the present policy of A.I.D. precludes this Agency from using its funds for the performance of abortion or from conducting abortion-related research.

Sincerely,

M. PETER MCPHERSON.

It is also understood that Mr. LONG and Mr. KEMP have agreed to insure the enforcement of this letter.

● Mr. SIMON. Mr. Speaker, the House will vote today on adopting the conference reports on both the foreign aid authorization and the foreign aid appropriations bills. As a strong and consistent supporter over the years of a U.S. development and humanitarian assistance program which responds to the human needs of people in Third World countries, I would like to make several observations.

First, few of us had expected even 1 week or 2 ago that Congress would pass and the President would sign both foreign aid bills. What we are witnessing is a rare display of political will applied to the foreign aid program. That is welcome.

Second, the bills are being passed thanks to the efforts of the most fragile of coalitions. It is good to have many, if not most, Republicans supporting this legislation, even if their reasons for doing so may be somewhat different from those of traditional supporters. This country needs a strong, bipartisan response to human suffering overseas.

On the other hand, the administration, having won this year's battle, should guard against reading the results wrongly and losing the war. This year's coalition will be frayed beyond repair if the administration returns to the Congress next year with supplemental fiscal year 1982 or with fiscal year 1983 requests which tip the balance even more decisively toward security and military aid and away from development and humanitarian programs.

Third, I regret that the pressure of time has meant that the conference reports on both bills have not been available for adequate review by both bodies. I understand that House conferees agreed to an appropriations of $100 million in economic support funds for Pakistan, even though the House Appropriations Committee has yet to hold hearings on the subject. I trust that the administration will not regard this conference concession as approval in principle of its $3 billion-plus aid package for Pakistan. We will all need to study in more detail the agreements reached on various key and controversial issues, even though we have not yet had time to do so.

Finally, the bills have various items which are particular grounds for satisfaction—and distress. I was pleased that the United States will now be able to provide a full $700 million for IDA, a significant sum even though it is considerably below the $850 million requested by the Reagan administra-

tion and the $1.08 billion to which the Carter administration pledged the United States. On the other hand, the provision of no funds at all for the International Fund for Agricultural Development (IFAD) in fiscal year 1982, despite authorization of $180 million for a 3-year period, seems to me a major mistake. Both of these organizations focus their efforts on helping small farmers in the world's poorest countries to grow more food.●

Mr. PORTER. Mr. Speaker, incredibly, for the first time in 3 years, we are today at the stage of passing a conference report and laying before the President for his signature a foreign assistance bill. And incredibly, the level of understanding and willingness to compromise has been high, and the level of demagoguery has been relatively low.

Perhaps this has been because the President—no friend of foreign aid in the past—has pleaded with the Congress for a bill, because without legislation supported by the administration, we will operate our foreign policy for the next year under a continuing resolution reflecting the disastrous priorities of the middle Carter years.

This report does not meet the President's full requests either with respect to substantial increases in military assistance or substantial increases in funding for the soft loan window of the World Bank, IDA VI. Both conserv- atives and liberals have had to give ground to adopt the report, and I can only commend the splendid efforts of our ranking minority member on the Appropriations Foreign Operations Subcommittee, the Honorable JACK KEMP of New York, as well as the work of our chairman, CLARENCE LONG of Maryland; the ranking minority member of the Appropriations Committee, the gentlemen from Massachusetts, SILVIO O. CONTE and my colleague the distinguished gentleman from New York, MATTHEW F. MCHUGH.

The subcommittee and the conference put politics aside and embraced our highest concern—the best interests of the United States of America—in placing this legislation before the Members, and I can only urge them to embrace that same standard and give the President the tools he needs to act in the best interests of our country in the conduct of our foreign policy.

Mr. KEMP. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. LONG of Maryland. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. ASHBROOK. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 217, nays 201, not voting 15, as follows:

[Roll No. 366]

NOT VOTING—15

AuCoin	Goldwater	Moorhead
Bolling	Lee	Russo
Burgener	Leland	Trible
Burton, John	Martin (NY)	Vento
Forsythe	McDonald	Young (FL)

□ 1410

The Clerk announced the following pairs:

On this vote:

Mr. Vento for, with Mr. McDonald against.

Mr. Leland for, with Mr. Russo against.

Mr. Burgener for, with Mr. Young of Florida against.

Mr. Goldwater for, with Mr. Lee against.

Mr. Forsythe for, with Mr. Moorhead against.

Mrs. BOUQUARD, Mr. KINDNESS, and Mr. SHAW changed their votes from "yea" to "nay."

Mr. THOMAS changed his vote from "nay" to "yea."

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

AMENDMENTS IN DISAGREEMENT

The SPEAKER pro tempore. The Clerk will report the first amendment in disagreement.

Mr. LONG of Maryland. Mr. Speaker, I ask unanimous consent that the amendments in disagreement be designated by the Clerk instead of read.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maryland?

There was no objection.

The SPEAKER pro tempore. The Clerk will designate the first amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 22: Page 7, line 4, after "Women" insert "$218,638,000".

MOTION OFFERED BY MR. LONG OF MARYLAND

Mr. LONG of Maryland. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. LONG of Maryland moves that the House recede from its disagreement to the amendment of the Senate numbered 22 and concur therein with an amendment, as follows: In lieu of the sum inserted by said amendment, insert the following: "$215,438,000: *Provided*, That no funds shall be available for the United Nations Fund for Science and Technology or the United Nations Decade for Women".

The motion was agreed to.

□ 1420

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 23: Page 7, line 4, after "Women" insert ": *Provided*, That not less than $134,500,000 shall be available only for the United Nations Development Program".

MOTION OFFERED BY MR. LONG OF MARYLAND

Mr. LONG of Maryland. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. LONG of Maryland moves that the House recede from its disagreement to the amendment of the Senate numbered 23 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following: ": *Provided further*, That not less than $126,750,000 shall be available only for the United Nations Development Program".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 24: Page 7, line 4, after "Women" insert ": *Provided further*, That not more than $38,000,000 shall be available for the United Nations Children's Fund".

MOTION OFFERED BY MR. LONG OF MARYLAND

Mr. LONG of Maryland. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. LONG of Maryland moves that the House recede from its disagreement to the amendment of the Senate numbered 24 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following: ": *Provided further*, That not more than $41,500,000 shall be available for the United Children's Fund".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 25: Page 7, line 4, after "Woman;" insert ": *Provided further*, That not more than $7,500,000 shall be available for the United Nations Environment Program".

MOTION OFFERED BY MR. LONG OF MARYLAND

Mr. LONG of Maryland. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. LONG of Maryland moves that the House recede from its disagreement to the amendment of the Senate numbered 25 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following: ": *Provided further*, That not more than $7,850,000 shall be available for the United Nations Environment Program".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 38: Page 8, line 9, strike out "$5,700,000 of this amount shall" and insert "none of the funds appropriated under this heading may".

MOTION OFFERED BY MR. LONG OF MARYLAND

Mr. LONG of Maryland. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. LONG of Maryland moves that the House recede from its disagreement to the amendment of the Senate numbered 38 and concur therein with an amendment, as follows: In lieu of the matter stricken and inserted by said amendment, insert the following: $4,000,000 of this amount shall".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 53: Page 10, line 10, after "$27,000,000" insert ": *Provided*, That of the funds appropriated under this paragraph, not less than $10,000,000 shall be used for earthquake relief and reconstruction in southern Italy".

MOTION OFFERED BY MR. LONG OF MARYLAND

Mr. LONG of Maryland. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. LONG of Maryland moves that the House recede from its disagreement to the amendment of the Senate numbered 53, and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 62: Page 11, line 11, after "Congress" insert ", not less than $100,000,000 shall be available for Sudan, not less than $5,000,000 for Poland, not less than $5,000,000 for Tunisia, and not less than $15,000,000 for Costa Rica".

MOTION OFFERED BY MR. LONG OF MARYLAND

Mr. LONG of Maryland. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. LONG of Maryland moves that the House recede from its disagreement to the amendment of the Senate numbered 62 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following: ": *Provided further*, That not less than $100,000,000 shall be available for Sudan, not less that $5,000,000 for Poland, not less than $5,000,000 for Tunisia, and not less than $20,000,000 for Costa Rica".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 63: Page 11, line 11, after "Congress" insert ": *Provided further*, That not more than $7,500,000 shall be available for Cyprus".

MOTION OFFERED BY MR. LONG OF MARYLAND

Mr. LONG of Maryland. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. LONG of Maryland moves that the House recede from its disagreement to the amendment of the Senate numbered 63 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following: ": *Provided further*, That not more than $15,000,000 shall be available for Cyprus".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 70: Page 12, after line 3, insert:

Housing and other credit guaranty programs: During the fiscal year 1982, total commitments to guarantee loans shall not exceed $150,000,000 of contingent liability for loan principal.

MOTION OFFERED BY MR. LONG OF MARYLAND

Mr. LONG of Maryland. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. LONG of Maryland moves that the House recede from its disagreement to the amendment of the Senate numbered 70, and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 73: Page 12, after line 8, insert:

USE OF CERTAIN POLISH CURRENCIES

Subject to the enactment of authorizing legislation, during the fiscal year 1982, the equivalent in currency or credit of $70,000,000 in Polish zlotys (received by the United States from the April 1981 sale of United States Government-held dairy products to Poland) shall be available for use in Poland to serve United States interests, including use for activities of common benefit to the people of the United States and the

people of Poland, such as joint programs in energy, agriculture, education, science, health, and culture, or for humanitarian activities.

MOTION OFFERED BY MR. LONG OF MARYLAND

Mr. LONG of Maryland. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. LONG of Maryland moves that the House recede from its disagreement to the amendment of the Senate numbered 73, and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 89: Page 14, line 3, strike out "$535,000,000" and insert "$473,000,000".

MOTION OFFERED BY MR. LONG OF MARYLAND

Mr. LONG of Maryland. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. LONG of Maryland moves that the House recede from its disagreement to the amendment of the Senate numbered 89 and concur therein with an amendment, as follows: In lieu of the sum stricken and inserted by said amendment, insert the following: "$503,000,000: *Provided*, That $30,000,000 of this amount shall be transferred to the Agency for International Development to be used only for resettlement services and facilities for refugees and displaced persons in Africa".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 138: Page 21, line 19, strike out "513" and insert "511".

MOTION OFFERED BY MR. LONG OF MARYLAND

Mr. LONG of Maryland. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. LONG of Maryland moves that the House recede from its disagreement to the amendment of the Senate numbered 138 and concur therein with an amendment, as follows: In lieu of the matter stricken and inserted by said amendment, insert the following:

"513. None of the funds appropriated or otherwise made available pursuant to this Act shall be obligated or expended to finance directly any assistance or reparations to Libya, Iraq, or South Yemen."

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 142: Page 22, line 6, strike out "heretofore authorized" and insert "authorized before the date of enactment of this Act".

MOTION OFFERED BY MR. LONG OF MARYLAND

Mr. LONG of Maryland. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. LONG of Maryland moves that the House recede from its disagreement to the amendment of the Senate numbered 142, and concur therein.

A motion to reconsider the votes by which action was taken on the several motions was laid on the table.

GENERAL LEAVE

Mr. LONG of Maryland. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report just considered and that the gentleman from New York (Mr. KEMP) and I may insert tabular and extraneous material.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maryland?

There was no objection.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed with amendments in which the concurrence of the House is requested, bills of the House of the following titles:

H.R. 4327. An act to amend the Immigration and Nationality Act, and for other purposes;

H.R. 4755. An act to recognize the organization known as Former Members of Congress; and

H.R. 5159. An act to amend the Internal Revenue Code of 1954 to provide a temporary increase in the tax imposed on producers of coal, and for other purposes.

The message also announced that the Senate agrees to the amendments of the House with an amendment to a bill of the Senate of the following title:

S. 271. An act to repeal section 222 of the Communications Act of 1934.

The message also announced that the Presiding Officer, on behalf of the President pro tempore, pursuant to House Concurrent Resolution 220, appointed Mr. HATFIELD, Mr. MATHIAS, Mr. D'AMATO, Mr. MOYNIHAN, Mr. RANDOLPH, Mr. FORD, and Mr. JACKSON to be members, on the part of the Senate, of the Special Joint Committee on Arrangements to commemorate the 100th anniversary of the birth of Franklin Delano Roosevelt.

The message also announced that the Senate agrees to the amendments of the House with amendments to a bill of the Senate of the following title:

S. 1946. An act to provide for the final settlement of certain claims against Czechoslovakia, and for other purposes.

The message also announced that the Senate agrees to the House amendments to the preamble, and agrees to the House amendment to the text with an amendment to a joint resolution of the Senate of the following title:

S.J. Res. 100. Joint resolution to authorize the participation of the United States in a multinational force and observers to implement the treaty of peace between Egypt and Israel.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested.

S.J. Res. 117. To authorize and request the President to designate the week of January 17, 1982, through January 23, 1982, as "National Jaycee Week";

S.J. Res. 134. To designate 1982 as the "National Year of Disabled Persons";

S. Con. Res. 54. Concurrent resolution to provide for the printing of 3,000 copies of the General Explanation of the Economic Recovery Tax Act of 1981;

S. Con. Res. 55. Concurrent resolution to authorize the Secretary of the Senate to make technical corrections in the enrollment of the bill (S. 884) to revise and extend programs to provide price support and production incentives for farmers to assure an abundance of food and fiber, and for other purposes; and

S. Con Res. 56. Concurrent resolution authorization the reprinting of the committee print entitled "Investigation of Senator Harrison A. Williams, Jr."

VALIDATING EFFECTIVENESS OF PLAN FOR FUNDS APPROPRIATED TO PAY JUDGMENT AWARDED TO SAN CARLOS TRIBE OF ARIZONA

Mr. UDALL. Mr. Speaker, I ask unanimous consent that the Committee on Interior and Insular Affairs be discharged from further consideration of the Senate joint resolution (S.J. Res. 136), to validate the effectiveness of a plan for the use or distribution of funds appropriated to pay a judgment awarded to the San Carlos Tribe of Arizona, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

Mr. YOUNG of Alaska. Mr. Speaker, reserving the right to object, and I shall not object, but I would like to have the gentleman from Arizona explain this resolution.

Mr. UDALL. Mr. Speaker, will the gentleman yield?

Mr. YOUNG of Alaska. I yield to the gentleman from Arizona.

Mr. UDALL. Mr. Speaker, Senate Joint Resolution 136 would validate the plan for distribution of funds awarded to the San Carlos Apache Tribe in a judgment award before the U.S. Court of Claims. The U.S. Court of Claims granted an award of $10 million in an accounting claim against the United States involving management of tribal lands, tribal trust funds, resources, and other property administered by the United States for a period from 1871 to 1946. The claim was originally filed with the Indian Claims Commission and subsequently transferred to the U.S. Court of Claims.

Funds to cover the award were appropriated on January 28, 1981.

As required under the Judgment Funds Act of October 19, 1973 (87 Stat. 466), the Department of the Interior submitted to Congress the distribution plan for the San Carlos judgment award on October 6, 1981. As also required under that act, the plan must lay before Congress for a period of 60 legislative days before it can become effective. The Committee on Interior and Insular Affairs has advised the Department of the Interior that December 17, 1981, is the effective date of that plan should Congress remain in session through that date.

This resolution would simply insure that the effective date of this plan will in no way be affected by when Congress chooses to adjourn. This resolution has the tribe's full support and the Department of Interior also has no objections.

Mr. YOUNG of Alaska. Mr. Speaker, I support the resolution and withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

The Clerk read the Senate joint resolution as follows:

S.J. RES. 136

Whereas, pursuant to Public Law 93-134 (Act of October 19, 1973; 87 Stat. 466; 25 U.S.C. 1401), the Secretary of the Interior or his designee submitted a plan on October 7, 1981, for the use or distribution of funds appropriated to pay a judgment awarded to the San Carlos Apache Indian Tribe of Arizona;

Whereas, such plan has not been disapproved by congressional action;

Whereas, such plan has lain before the Senate for the requisite period of sixty legislative days as provided by Public Law 93-134 but sixty legislative days in the House of Representatives will not expire until December 18, 1981, after the Congress has adjourned; and

Whereas, it is the purpose of this resolution to validate the effectiveness of the plan which was submitted to the Congress pursuant to Public Law 93-134.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the plan for the use or distribution of funds awarded the San Carlos Apache Tribe of Indians in Docket No. 22-H before the United States Court of Claims is hereby declared to be valid and effective as of the date of enactment of this resolution and such plan is declared to have been validly submitted and is exempted from any further review.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AUTHORIZING DISBURSEMENT OF TRUST FUNDS OF LAC COURTE OREILLES BAND OF LAKE SUPERIOR CHIPPEWA INDIANS OF WISCONSIN

Mr. UDALL. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 4894), to authorize the Secretary of the Interior to disburse certain trust funds of the Lac Courte Oreilles Band of Lake Superior Chippewa Indians of Wisconsin, and for other purposes, with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Strike out all after the enacting clause and insert:

That the Secretary of the Interior shall, at the request of the governing body of the Lac Courte Oreilles Band of Lake Superior Chippewa Indians of Wisconsin, pay to the State Bank of Drummond, Drummond, Wisconsin, a portion (not to exceed 20 per centum) of the funds of such tribe derived from awards of the Indian Claims Commission in dockets numbered 18-C and 18-T which are deposited in the United States Treasury to the credit of such tribe in trust accounts numbered 14x9228 and 14x9728. Such payments shall be used for the sole purpose of covering or reducing overdraft on an account (designated "general fund") maintained by such tribe in such bank which was incurred by such tribe in support of the administration of Federal contracts.

SEC. 2. In the event that the United States acts to adjust the accounts of Indian tribes or organizations administering Federal contracts for the overrecovery or underrecovery of indirect costs, the Secretary of the Interior, at his discretion, may reimburse the Lac Courte Oreilles Band of Lake Superior Chippewa Indians of Wisconsin, in whole or in part, for any disbursement made under the first section of this Act.

Mr. UDALL (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendment be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

□ 1430

Mr. YOUNG of Alaska. Reserving the right to object, Mr. Speaker, and I shall not object, will the gentleman briefly explain the Senate amendment?

Mr. UDALL. If the gentleman will yield, the Senate amendment is in the nature of a substitute, but it makes only a few technical changes in the House-passed version of the bill. In every respect, the Senate amendment does exactly what the House language intended to do. The wording changes are simply intended to clarify the provisions in the bill with respect to the trust funds of this particular band of Chippewa Indians.

I assure my colleagues there are no hookers, no nongermane amendments in this bill. It is simply an attempt to carry out what the House intended in the first place.

Mr. YOUNG of Alaska. I thank the gentleman for his explanation.

Mr. Speaker, I withdraw my reservation of objection, and I support approval of the Senate amendment.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Arizona?

There was no objection.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. UDALL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the legislation just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

HERBERT CLARK HOOVER DEPARTMENT OF COMMERCE BUILDING

Mr. FARY. Mr. Speaker, I ask unanimous consent that the Committee on Public Works and Transportation be discharged from further consideration of the Senate bill (S. 657) to designate the Department of Commerce Building in Washington, the District of Columbia, as the "Herbert Clark Hoover Department of Commerce Building."

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

Mr. ECKART. Mr. Speaker, reserving the right to object—and I do not intend to object, I cannot help but be slightly chagrined to see brought before us for our consideration today a proposal to rename our Department of Commerce Building the Herbert Hoover Building.

Was this not the same Herbert Hoover who brought us a policy that told us that prosperity was just around the corner—as our country slipped deeper and deeper into depression?

Was this not the same President who advocated similar economic policies to those advanced by this current administration which have also brought us record unemployment, near record small business failures, and rapidly rising Federal deficits?

Herbert Hoover's failed economic policy is just as doomed today as it was in the 1930's, and to better enlighten the Members as to what that failed economic policy was, I want to

insert into the RECORD a speech of our 31st President which sounds hauntingly familiar to those coming from the White House today.

Whatever the arguments made, do not be misled by those who say that we need only to tax the rich to secure the funds we need. We must face the absolute fact that the rich can be taxed to the point of diminishing returns, and still the deficit in our ordinary and necessary expenditures would not be covered even upon the basis of the utmost economy. Make no mistake. In these circumstances it is those who work in the fields, at the bench and desk who would be forced to carry an added burden for every added cent to our expenditures.

Whatever the deficit may be and in whatever manner it may ultimately be met, every additional expenditure placed upon our government in this emergency magnifies itself out of all proportion into intolerable pressures, whether it is by taxation or by loans. Either loans or taxes beyond the very minimum necessities of government will drain the resources of industry and commerce and in turn will increase unemployment. Such action can easily defeat our hopes, our plans and our best efforts for the recovery of our country and so indefinitely delay the return of prosperity and employment. We can carry our present expenditures without jeopardy to national stability. We can carry no more without grave risks.

The imperative moment has come when increase in government expenditures must be avoided, whether it be ill-considered, hasty, or uninformed legislation of any kind, or whether it be for new services meritorious in themselves. Any alternative will strike down the earnest efforts of the citizenry of our nation to start us back upon the economic paths to which we must return if we and our children are to have the destiny which everyone has the right to hope and the heart to give to them.

Although our President has called for us to "try something new" the prescription that has been written is one that has been tried and failed before.

Mr. STANGELAND. Mr. Speaker, I would just like to echo the sentiments that have been expressed in support of S. 657 to name the Department of Commerce Building in Washington after Herbert Hoover. Mr. Hoover's credentials as Commerce Secretary are noteworthy in that it was under his leadership that this Department actually became an effective and viable force in the American economy.

Mr. Hoover's accomplishments are many during his service as Secretary of Commerce. He fostered the growth of trade associations, promoted foreign trade with our international neighbors, expanded the information services of the Department and generally influenced all economic questions facing the country.

Upon his death in 1964, Hoover was regarded as this Nation's foremost elder statesman. As cosponsor of this legislation to honor Herbert Hoover, I would ask my colleagues to join with me in paying tribute to this great Commerce Secretary by designating the building he planned here in Washington as the "Herbert Clark Hoover Department of Commerce Building."

Mr. ECKART. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 657

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Department of Commerce Building at 14th Street and Constitution Avenue Northwest, in Washington, the District of Columbia, shall hereafter be known and designated as the "Herbert Clark Hoover Department of Commerce Building". Any reference in a law, map, regulation, document, record, or other paper of the United States to that building shall be held to be a reference to the "Herbert Clark Hoover Department of Commerce Building".

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

UNION STATION REDEVELOPMENT ACT OF 1981

Mr. FARY. Mr. Speaker, I ask unanimous consent for the immediate consideration of the Senate bill (S. 1192) to amend the National Visitor Center Facilities Act of 1968 to provide for the rehabilitation and completion of Union Station in Washington, D.C., and for other purposes.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

Mr. WALKER. Reserving the right to object, Mr. Speaker, I do so in order to ask a couple of questions about the bill.

I will ask the gentleman from Minnesota (Mr. STANGELAND), are we, in this bill, as I understand it, moving from a position where we now lease those facilities to a position where we are going to have the Government take over the facility? Is that correct?

Mr. STANGELAND. If the gentleman will yield, we are moving in that direction, and a savings over the life of the lease of that building of $26 million.

Mr. WALKER. So, as I understand the bill that is being brought before us today, this is a bill that is destined to save somewhere in the vicinity of $27 million over the lifetime of it. However, does that include the amount of money for operating the building during that period of time? I assume since we are now paying rental on it, we are able to have the operator assume the expenses of running the building. I assume now we will take over the expenses of running the building. Will the gentleman explain that to me?

Mr. STANGELAND. If the gentleman will yield, let me explain the operation and rental on the building.

In 1977, we paid a total of $6.2 million, of which $3.3 million was rent, and about $3 million for operation. That continued through 1978.

In 1979, that figure went down to $4.3 million, of which $3.3 million was rent, so the actual operation costs was $1 million.

That held the same for 1980.

Now the present operation cost is about $945,000, and I can assure the gentleman that the Subcommittee on Public Buildings and Grounds and the chairman of the subcommittee is going to be monitoring this—conducting oversight. The chairman of the Oversight Committee, former chairman of the Public Buildings and Grounds Committee, is going to be monitoring this and scrutinizing this, so that we get out of the mess we are in on the Visitor Center.

Mr. WALKER. Further reserving the right to object, Mr. Speaker, I also understand that some of the hope is that space will be leased in this building so that we can recover some of the operating costs through the operation of private enterprise within the Visitor Center.

Mr. STANGELAND. If the gentleman will yield, it is the intention that after a survey to determine the structural soundness of the building, and after the necessary improvements to that structural soundness are made, this will be open to developers on a competitive bid basis and there will be commercial ventures operating in the Visitor Center.

There are also plans by adjoining property owners to establish and develop commercial property on property that is at the present time undeveloped.

So there will definitely be commercial ventures that will help defray the cost of the Union Station.

Mr. WALKER. Further reserving the right to object, are the savings which accrue from that over and above the $27 million which the gentleman has referred to?

Mr. STANGELAND. Yes, it would be.

Mr. FARY. Mr. Speaker, will the gentleman yield?

Mr. WALKER. Further reserving the right to object, I yield to the gentleman from Illinois.

Mr. FARY. Mr. Speaker, I thank the gentleman for yielding so that I can make some legislative history.

I am advised by the Department of Transportation that it supports this measure (S. 1192), although not without certain reservations.

On December 10, 1981, Secretary of Transportation Drew Lewis testified on Union Station before the Subcommittee on Public Buildings and

Grounds of the Public Works and Transportation Committee. He expressed enthusiasm for the challenge this bill would present to the Department of Transportation, and assured the subcommittee that he would see that transportation needs were adequately met and that historic features were preserved. He noted, however, several concerns he had that the bill now before us does not provide DOT with total flexibility.

Certainly, we can all understand the Secretary's apprehension about DOT's budget being able to absorb the inevitable costs of rehabilitating Union Station and his concern about identifying programs or levels which may or may not be directed to this project. Secretary Lewis' caution is justifiable since we will not have a definitive estimate of these costs or a knowlege of what level of investment the private sector may make toward them before the directed studies are completed.

I think, however, that S. 1192 has been carefully crafted to provide DOT with sufficient flexibility to find necessary sources of funding. The bill does not require that any funding be set aside from the Northeast Corridor project or from any other DOT program, apart from $1 million DOT is willing to commit for studies. The bill leaves it up to the Secretary, and defers for 1 year, the decision as to what DOT program sources should be used to fund the rehabilitation of Union Station. Existing DOT authorizations should be ample as a source of Federal appropriations for this purpose, although of course, no authorizing legislation can guarantee that any particular level of funding will be available in any particular year. If, however, existing authorizations prove to be inadequate as sources of funding after DOT has completed its year of study, Congress could always entertain a legislative proposal to grant a new authorization for this purpose.

The Secretary also expressed concerns that DOT may need authority to convey at least some interest in the Union Station property to a private party, or a co-venture with a private party, as part of a development package, as well as authority to control any independent development of adjacent properties to assure the economic viability of the development package.

Although the Secretary's points are well taken and I know everyone wants the Union Station project to succeed, I do not think these matters are so essential that we need to amend S. 1192 at this time. The bill already gives DOT wide latitude in structuring the redevelopment of Union Station. The bill provides broad leasing flexibility.

We believe this is a workable approach, one that DOT can carry out without further legislation. Of course, we recognize that DOT may not be able to complete the project without further legislation. If substantial unforeseen difficulties arise that cannot be overcome within the mechanisms of this legislation, it is the intent of the committee to work with the Department of Transportation to achieve the purpose of this bill. We hope this won't be necessary.

I am sure the Secretary would agree that these concerns, although important, should not hold up passage of the most comprehensive Union Station bill likely to be approved by this Congress.

Mr. WALKER. Mr. Speaker, I thank the gentleman, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois (Mr. FARY)?

Mr. CLAUSEN. Mr. Speaker, I reserve the right to object.

Mr. CLAUSEN. Mr. Speaker, the legislation we are now considering would finally address the problems that have plagued Union Station for many years in a comprehensive fashion. This bill has passed the Senate and just last week was reviewed by the Public Works and Transportation Subcommittee on Public Buildings and Grounds. During testimony, Transportation Secretary Drew Lewis expressed the importance of finding a fiscally attractive solution to the nagging problems at Union Station and emphasized the need for private sector participation in any project to rehabilitate this landmark.

Under the proposal pending before the House. The long overdue rehabilitation and completion of Union Station would now be possible. While many may be wary of any legislation with the name "Union Station" on it, let me point out the attractive features of S. 1192 as opposed to previous legislative initiatives. First, this proposal will actually save the American taxpayer money by allowing for the expedited purchase of Union Station in lieu of future lease payments that we are now obligated to pay for the next 20 years. The amount of savings will be approximately $28 million. Second, very little "new" authorizing legislation will be needed since this bill calls for the reprograming of funds from other already authorized funding sources. Additionally, S. 1192 calls for the transfer of up to $40 million in District of Columbia interstate highway funds to complete the parking structure, a provision strongly supported by the District of Columbia government.

The well-publicized issue of the roof condition will also be addressed. During the last Congress, stop-gap legislation was passed to make emergency structural repairs and to replace the roof of Union Station, amounting to $11 million. The legislation now under consideration would not only complete the roof repair work, but also make this facility, once again, a working rail station and the southern terminus of the northeast corridor rail improvement project.

I do not think any who has been associated with this project over the years will state that mistakes have not been made. Rather, it is my hope that my colleagues in the House will join with the Senate in adopting this measure so that we can correct these problems and mistakes in a fiscally attractive manner. Such an opportunity may not present itself soon since some of these funding sources may not be available next year. For example, the $40 million in interstate highway moneys which the District is willing to commit will lapse, if not committed, at the end of fiscal year 1982.

For these reasons, I would urge this bill's passage. By passing this measure we will not only act in a responsible way but will finally correct a problem that has lingered for far too long. Moreover, this will show the American people that Congress is willing to act to save a monumentul landmark and, at the same time, excercise fiscal responsibility.

Mr. LEVITAS. Mr. Speaker, will the gentleman yield?

Mr. CLAUSEN. Further reserving the right to object, Mr. Speaker, I yield to the gentleman from Georgia.

Mr. LEVITAS. I thank the gentleman for yielding.

Mr. Speaker, I have asked the gentleman to yield to me in order to commend the Chairman of the subcommittee and the ranking minority member for bringing this important bill before us. This is the end result of many years of dealing with this troublesome problem and finally reaching what I think is a fiscally sound solution to it.

There have been other proposals which have been passed around and submitted to those of us on the Public Works Committee as alternatives, some from the private sector, some other agencies of government. I have discussed here with members of the subcommittee, as well as with the Secretary of Transportation and other officials in the administration, and it appears that after this extensive examination and discussion that this present solution presents us the best solution that can be agreed upon at this time and the one which will have the support of the administration and finally resolve the problem.

I urge the gentleman to withdraw his reservation of objection.

Mr. CLAUSEN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois (Mr. FARY)?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1192

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Union Station Redevelopment Act of 1981".

SEC. 2. The Congress finds and declares that—

(1) Union Station in Washington, District of Columbia, commissioned by Congress in 1903, designed by Daniel H. Burnham in monumental Beaux Arts style, and completed by the Washington Terminal Company in 1907, is an important historic and architectural landmark of the Nation's Capital;

(2) Union Station was built and used exclusively as a rail passenger station until Congress decided to make the historic Union Station building a National Visitor Center in 1968, allocating rail passenger operations to a replacement facility behind the historic building;

(3) the use of rail passenger service to and from Washington, District of Columbia, declining when the National Visitor Center Facilities Act of 1968 was enacted, has dramatically increased since that time with the advent of and substantial Federal investment in the National Railroad Passenger Corporation and the northeast corridor improvement project, justifying a reversal of the policy adopted 13 years ago;

(4) the historic Union Station building is now unsafe and unusable, and the replacement railroad station is inconvenient and inadequate for present and projected rail ridership demand;

(5) it is in the national interest to preserve the architectural features of Union Station and to provide in the Union Station complex a sound and fully operational transportation terminal;

(6) the Union Station complex and its vicinity present an opportunity for successful commercial development integrated with the transportation functions of the facility; and

(7) the purposes of this Act are to achieve the goals of historic preservation and improved rail use of Union Station with maximum reliance on the private sector and minimum requirement for Federal assistance.

SEC. 3. Title I of the National Visitor Center Facilities Act of 1968 (40 U.S.C. 801 et seq.) is amended—

(1) by striking "National Visitor Center" in the caption of title I and inserting in lieu thereof "Union Station";

(2) by inserting a new caption "Subtitle A—National Visitor Center" immediately after the new title I caption; and

(3) by adding at the end of title I the following new subtitle:

"Subtitle B—Union Station Redevelopment

"SEC. 111. (a) Upon the request of the Secretary of Transportation, the Secretary shall assign to the Secretary of Transportation all of the Secretary's right, title, and interest in the Union Station complex, including all agreements and leases entered into under subtitle A of this title. Such assignment may reserve to the Secretary the right to lease space for visitor services, to the extent the Secretary and the Secretary of Transportation may agree. For purposes of this title, the "Union Station complex" shall include all the real property, air rights, and improvements leased by the Secretary under subtitle A of this title, together with any property acquired and all improvements made in accordance with this subtitle.

"(b) Notwithstanding the provisions of subsection (a) of this section, the Secretary shall, not later than twelve months after the date of enactment of this subsection, complete the installation of new roofs and associated drainage systems on all existing roof surfaces of the historic Union Station building. Of funds appropriated to the Secretary under the construction appropriation for the National Park System for the fiscal year ending September 30, 1982, not less than $8,100,000 shall be available to and allocated by the Secretary for such roof work. In the event the assignment provided for in subsection (a) of this section occurs prior to completion of such roof work, the Secretary shall continue to be responsible for such roof work until its completion, except as the Secretary and the Secretary of Transportation may otherwise agree.

"(c) Prior to the assignment provided for in subsection (a) of this section, the Secretary shall permit the Secretary of Transportation to carry out or cause to be carried out the activities authorized by this subtitle or by title VII of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 851 et seq.).

"(d) After both the assignment provided for in subsection (a) of this section and the completion of the roof installation required by subsection (b) of this section, the Secretary shall be relieved of the authority and obligation under subtitle A of this title to construct and operate a National Visitor Center at Union Station. The provisions of subtitle A of this title shall thereafter be deemed superseded by any contrary or inconsistent provisions of subtitle B of this title.

"SEC. 112. The Secretary of Transportation shall provide for the rehabilitation and redevelopment of the Union Station complex primarily as a multiple-use transportation terminal serving the Nation's Capital, and secondarily as a commercial complex, in accordance with the following goals:

"(a) Preservation of the exterior facade and other historically and architecturally significant features of the Union Station building.

"(b) Restoration and operation of a portion of the historic Union Station building as a rail passenger station, together with holding facilities for charter, transit, and intercity buses in the Union Station complex;

"(c) Commercial development of the Union Station complex that will, to the extent possible, financially support the continued operation and maintenance of such complex; and

"(d) Withdrawal by the Federal Government from any active role in the operation and management of the Union Station complex as soon as practical and at the least possible Federal expense consistent with the goals set forth in subsections (a) through (c) of this section.

"SEC. 113. (a) There are authorized to be appropriated to the Secretary of Transportation such sums as may be necessary to meet lease and other obligations, including maintenance requirements, incurred by the Secretary and assigned to the Secretary of Transportation under this subtitle. The Secretary shall transfer to the Secretary of Transportation at the time of such assignment such sums as may have been appropriated to the Secretary to meet such obligations and not yet expended as of the date of such assignment.

"(b) Nothwithstanding the provisions of section 102(a)(5) of this title, the Secretary of Transportation is authorized to purchase for the United States any property that was leased by the Secretary under subtitle A of this title and assigned to the Secretary of Transportation under this subtitle. The purchase agreement for such property may provide for payment by the Secretary of Transportation over a term not to exceed six years. There are authorized to be appropriated to the Secretary of Transportation, in addition to the sums authorized by subsection (a) of this section, not to exceed $275,000 per year for not to exceed six years to carry out such purchase. Such purchase shall not be subject to the provisions of title III of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (42 U.S.C.4651 et seq.).

"SEC. 114. (a) The Secretary of Transportation shall, on an emergency basis, carry out an engineering survey of all existing structures at the Union Station complex for the following purposes:

"(1) to determine those actions necessary or desirable to preserve the long-term structural integrity of, and provide functional utility systems for, the historic Union Station building;

"(2) in cooperation with Amtrak, to determine those actions necessary or desirable to restore rail passenger handling functions to the historic Union Station building and otherwise improve rail passenger service facilities at Union Station, including improved passenger access to the trains; and

"(3) to prepare detailed estimates of the costs of such rehabilitation and improvement.

"(b) Concurrently with the engineering survey required by subsection (a) of this section, the Secretary of Transportation, in cooperation with the National Railroad Passenger Corporation, shall carry out a planning and market feasibility study to assess the commercial development potential of the Union Station complex. Such study shall also include, but not be limited to, an assessment of the feasibility and desirability of:

"(1) providing passenger transportation services from Union Station to the commercial airports in the area;

"(2) constructing a heliport at or near the Union Station complex; and

"(3) relocating to office space in Union Station the offices of Federal or other public transportation agencies.

"(c) The Secretary of Transportation shall complete the engineering survey required by this section not later than six months after the date of enactment of this section, and shall complete the planning and market feasibility study required by this section not later than twelve months after the date of enactment of this section.

"(d) Of amounts appropriated under section 704(a) (1) and (2) of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 854(a) (1) and (2)), $1,000,000 shall be available to and be utilized by the Secretary of Transportation to carry out the purposes of subsections (a) and (b) of this section.

"(e) Within twelve months following the date of enactment of this section, the Secretary of Transportation shall submit a report to the Congress on the results of the engineering survey and planning and market feasibility studies carried out under this section. Such report shall be referred to the Committees on Commerce, Science, and Transportation and Environment and Public Works of the Senate and the Committees on Energy and Commerce and Public Works and Transportation of the House, respectively. Such report shall include a specific commitment of Federal

funds for completion of the rehabilitation of the historic Union Station building, together with any necessary request for appropriations, in the amount determined by the Secretary of Transportation to be necessary in light of the survey and studies carried out under this section, from either or both of the following sources:

"(1) funds authorized to be appropriated and not yet appropriated under section 704(a) of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 854(a)) that are in excess of the amounts set out in the last sentence of such section 704(a); and

"(2) funds programed or reprogramed from any other appropriation available to the Secretary of Transportation.

Notwithstanding any other provision of this subsection, no funds from the Northeast Corridor Improvement Project and other rail or rail-related programs in excess of $29,000,000 shall be available for the completion of the rehabilitation of the historic Union Station building or other purposes determined by the Secretary of Transportation to be necessary in light of the survey and studies carried out under this section if within ninety calendar days of continuous session of the Congress after any request for such excess funds either the Committee on Energy and Commerce of the House of Representatives or the Committee on Commerce, Science, and Transportation of the Senate disapproves of the availability of such excess funds for such purposes by majority vote. For purposes of this subsection, continuity of session of the Congress is broken only by an adjournment sine die, and the days on which either House is not in session because of an adjournment of more than three days to a day certain are excluded in the computation of the period described in this subsection.

"SEC. 115. (a) In order to achieve the goals set out in section 112 of this subtitle, the Secretary of Transportation is authorized to select and subsequently enter into one or more agreements (hereafter in this Act referred to as 'development agreements') with one or more responsible individuals, corporations, or other private entities with demonstrated experience in the financing, undertaking, and managing of commercial real estate development (hereafter in this Act referred to as 'developers').

"(b) The Secretary of Transportation shall prescribe the procedures and criteria for selection of a developer for the Union Station complex: *Provided*, That no final developer selection shall be made unless and until at least two developers meeting minimum criteria prescribed by the Secretary of Transportation have submitted to the Secretary of Transportation specific design and financing proposals for the rehabilitation and redevelopment of the Union Station complex, and specific proposals for the acquisition, conveyance, or lease of real property. The Secretary of Transportation is directed to initiate discussions with potential developers as soon as possible following enactment of this section to assure the earliest possible selection of a developer or deverlopers.

"(c) Development agreements entered into under this section shall be considered cooperative agreements for purposes of the Federal Grant and Cooperative Agreement Act of 1977 (41 U.S.C. 501 et seq.). With respect to such development agreements, the Secretary of Transportation is authorized to modify or waive the application of regulations otherwise applicable to Federal or Department of Transportation financial assistance agreements, to the extent the Secretary of Transportation determines in his discretion to be necessary to accomplish the purposes of this subtitle at the lowest cost to the Federal Government.

"(d) The Secretary of Transportation is further authorized to enter into such other agreements and contracts, except any agreement or contract to sell property rights at the Union Station complex, with such persons, corporations, financial institutions, Federal, regional, or local agencies, or the Architect of the Capitol as the Secretary of Transportation deems necessary or desirable to carry out the purposes of this subtitle. Any such agreement may be made assignable to a selected developer or developers of the Union Station complex.

"SEC. 116. (a)(1) The Secretary of Transportation is authorized to acquire for the United States, by lease, purchase, or otherwise, any interest in real property (including, without limitation, interests in the nature of easements or reservations) and any other property interest (including, without limitation, contract rights) in or relating or adjacent to the Union Station complex that the Secretary of Transportation deems necessary to carry out the purposes of this subtitle.

"(2) If the Secretary of Transportation determines that property under the jurisdication of the Architect of the Capitol in squares 721 and 722 eastward of the historic Union Station building is necessary to carry out the purposes of this subtitle, the Secretary of Transportation may request assignment of such property to the use of the Secretary of Transportation, as a part of the Union Station complex, and subject to the provisions of this subtitle, and the Architect of the Capitol shall so assign such property.

"(b) Notwithstanding any other provision of law, the Secretary of Transportation is authorized to maintain, use, operate, manage, and lease, either directly, by contract, or through development agreements, any property interest held or acquired by the Secretary of Transportation for the United States under this subtitle, in such manner and subject to such terms, conditions, covenants, and easements as the Secretary of Transportation deems necessary or desirable to carry out the purposes of this subtitle.

"SEC. 117. (a) The Secretary of Transportation is authorized to use income and proceeds received from activities authorized by this subtitle, including, without limitation, operating and leasing income and payments made to the Federal Government under development agreements, to pay expenses incurred by the Secretary of Transportation in carrying out the purposes of this subtitle, including, without limitation, construction, acquisition, leasing, operation, and maintenance expenses, and payments made to developers under development agreements.

"(b) A special deposit account is hereby established in the Treasury of the United States, to be known as the Union Station Fund, which shall be administered as a revolving fund. Such special deposit account shall be credited with receipts of the Secretary of Transportation from activities authorized by the subtitle and the balance in such special deposit account shall be available in such amounts as are specified in annual appropriation Acts for making expenditures authorized by this subtitle.

"SEC. 118. (a) Notwithstanding any other provision of title 23, United States Code, and other Acts pertaining to Federal-Aid Highways, the Secretary of Transportation shall immediately approve the completion of the parking facility, and associated ramps (including any necessary pedestrian access and walkways, escalators, elevators, moving sidewalk access, and connections) at Union Station, to be financed with interstate highway funds apportioned to the District of Columbia. To the extent necessary to complete such project, such apportionment shall not be subject to any obligation limitation enacted for the fiscal year ending September 30, 1982, or the fiscal year ending September 30, 1983. The amount of such apportionment necessary to complete such project, not to exceed $40,000,000, shall remain available to the District of Columbia until expended, without regard to the provisions of section 118(b) of title 23, United States Code. The Federal share shall be 100 per centum of the total cost of such project.

"(b) Within sixty days of the enactment of this section, the Secretary of Transportation shall enter into an agreement with the District of Columbia's Department of Transportation for the Secretary of Transportation's administration of the project described in subsection (a) of this section. Such project agreement shall provide that all right, title, and interest in such parking facility shall remain in the United States. The rate of fees charged for use of the parking facility may exceed the rate required for maintenance and operation of the facility, and shall be established in a manner that encourages its use by rail passengers and participants in activities in the Union Station complex and area.

"SEC. 119. (a) The Secretary of Transportation is authorized, on such terms or conditions as he may prescribe, to release the Washington Terminal Company from any or all of its obligations under agreements and leases entered into under subtitle A of this title, including, without limitation, the obligation to construct a new railroad passenger station as provided in section 102(a)(4) of this title.

"(b) The Secretary of Transportation shall waive such statutory or contractual restrictions on the use of the parking structure and associated ramps described in section 118 of this subtitle as would otherwise be required or imposed because funds for such construction were or are provided under the Urban Mass Transportation Act of 1964, as amended (49 U.S.C. 1601 et seq.).

"(c) The Secretary of Transportation is authorized to use funds appropriated under section 704(a)(2) of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 854(a)(2)) to carry out the purposes of this subtitle without regard to the matching funds requirement of section 703(1)(B) of such Act (45 U.S.C. 853(1)(B)). Funds appropriated under section 704(a) of such Act may not be used for design, construction, or operation of a heliport at or near Union Station.

"(d) The Architect of the Capitol is authorized to enter into agreements with the Secretary of Transportation or his designee or assign to furnish steam or chilled water or both from the Capitol Power Plant to the Union Station complex, at no expense to the legislative branch.".

SEC. 4. (a) The Act approved November 5, 1966 (Public Law 89-759) and section 108 of the National Visitor Center Facilities Act of 1968 (Public Law 90-264) are repealed.

(b) Section 102(b) of the National Visitor Center Facilities Act of 1968 (40 U.S.C. 802(b)) is amended by striking the word

"title" and inserting in lieu thereof the word "subtitle".

SEC. 5. As used in section 502(a)(1)(B) of the Rail Passenger Service Act, the term "Amtrak Commuter" shall mean, with respect to the period prior to January 1, 1983, "Conrail".

Mr. FARY. Mr. Speaker, S. 1192, as passed by the Senate gives the Congress an opportunity it has long awaited. If the House passes S. 1192, it will allow the Department of Transportation to take complete control of the facility and let it become again a rail facility. Except for $1.5 million in the bill that would allow the Department of Transportation to purchase the station outright and save $26.5 million in lease costs, the bill relies on funds that have already been authorized for other transportation purposes to bring the structure of the building back into shape. After these repairs and associated studies, the Secretary of Transportation is authorized to solicit bids for commercial development from private investors thereby minimizing future Government involvement in Union Station.

This is a bill we have waited a long time for. Both the Department of the Interior, which wants out of Union Station, and the Department of Transportation, which will now be responsible for the structure, support this bill.

When Congress passed the National Visitor Center Facilities Act in 1968, there was a need for improved facilities to serve the increasing number of tourists and students who were visiting the Nation's Capital each year. As we all are aware, the facilities were functional for only a very short time. Now, according to testimony received by the Committee on Public Works and Transportation, a local private group has decided to open some visitors facilities in the Department of Commerce downtown. Hence there is no present need to reopen any Government-run visitor facility.

The Senate-passed bill goes a long way in bringing one of Capitol Hill's great landmarks and real estate assets back to life as what it was intended to be. If the House passes this bill today, in a very short time we will have a thriving transportation facility with a large commercial component where now we have an abandoned building. I hope my colleagues will support this legislation.

Mr. STANGELAND. Mr. Speaker, if the gentleman will yield, I note that section 116(a)(2) would permit the Secretary of Transportation to include land now occupied by two Senate staff parking lots in the Union Station development program. That land is a part of the Capitol Grounds and falls under the jurisdiction of the Architect of the Capitol. What role would the Architect of the Capitol play in the development of that land?

Mr. FARY. The land in squares 721 and 722 would be available to the Secretary of Transportation if he deems it necessary to promote successful commercial development of the Union Station complex. The Secretary would be permitted to lease the land to a private entity, on a long-term basis, if necessary. He would not be permitted to sell the land; it would remain the property of the U.S. Government. We would expect the Secretary to consult with the Architect of the Capitol in developing criteria for using the land, but the final selection of a development proposal would rest with the Secretary. The Architect of the Capitol generally agrees with developing this area for commercial purposes.

Mr. STANGELAND. Mr. Speaker, I rise in enthusiastic support of S. 1192 and urge my colleagues to accept this carefully drafted measure as a well-thought out and workable solution to the problems that have troubled Union Station for many years. As we are well aware, the handling of this national landmark by both the Congress and executive branches alike has been the source of much rightful criticism over the years. Due to this mishandling, Union Station has deteriorated rapidly, becoming structurally unsafe and resulting in its closing earlier this year.

As the ranking member on the Public Buildings and Grounds Subcommittee, I have had the opportunity of working closely with our Senate counterparts and the administration on this legislation. Much enthusiasm was shown regarding the new approach we are taking to this issue which will result in correcting many of our past errors and rehabilitating Union Station with minimal new Federal authorizations. However, should Congress fail to act on this measure, the situation at Union Station will only worsen and will require substantially greater amounts of taxpayers' dollars sometime in the future to deal with what will certainly be a more delapidated facility.

As previously mentioned, S. 1192 is an innovative approach that will require additional new authorizations of only $275,000 for up to 6 years for the expedited purchase of Union Station. It should be emphasized that by purchasing the station in this manner, the Government will be relieved of approximately $28 million in outyear lease payments which we now must pay through the year 2001.

While others have highlighted the key provisions of this bill, I would just like to touch upon and reemphasize a few of these. An absolutely essential part of this bill and its proposed solution is the provision authorizing the Secretary of DOT to work with private, commercial developers to enhance the rail terminal facility with minimum Federal financing. According to testimony in subcommittee, there is significant interest in the private sector for pursuing development at Union Station. Additionally, at the southern terminus of the heavily traveled Northeast rail corridor, responsibility for Union Station is more appropriately transferred to the Department of Transportation and a study of the building's structural integrity, rail passenger handling functions and the potential for private development will be authorized. Finally, the parking garage, which is already partially constructed, would be completed by the use of $40 million in Interstate Highway moneys apportioned to the District of Columbia. This money will not be available after this year, thereby requiring us to act in a timely fashion on this measure.

Let me point out that this bill is the work of both Senate committees with jurisdiction over Union Station, the Reagan administration and both House Public Works and Transportation Committee and House Energy and Commerce Committee. As a consensus measure, these committees have recognized that there may never again be an opportunity like this to finally rectify our unfortunate experience with Union Station. I would urge all Members to support this important legislation.

Mr. FLORIO. Mr. Speaker, I rise in support of S. 1192, the Union Station Redevelopment Act of 1981.

Mr. Speaker, anyone who is familiar with Washington's Union Station knows the terrible inconvenience rail passengers in the Northeast corridor have to endure. The leaking roof and other structural problems of the building, not to mention the walk of more than a quarter of a mile from the front of the building to the train boarding areas, have been well-publicized and the source of great embarrassment for the Congress as well as the executive agencies that have dealt with it.

The bill before us today is an important first step toward the restoration of this building as the major rail transportation facility it should be. Although the primary purpose of the bill is the restoration of the building for the provision of rail transportation services, a secondary goal of the bill is the commercial development of the station.

Mr. Speaker, developers, State and local officials and the public have become increasingly interested in station development, not only for Union Station but for many of the stations in the Northeast corridor. For example, Newark's Penn Station in my State of New Jersey has already begun a $21 million rehabilitation project. Prudential Insurance Co. will soon begin the construction of a $50 million office building next to the station, and another developer plans to begin construction on a second office building

sometime next year. This and other projects like Philadelphia's 30th Street Station have become the focus of major commercial development projects.

I believe these projects can be successful with proper public support. The bill before us provides that support. At the same time it puts a cap on funds from existing authorizations that may be used for Union Station improvements so that funding for other projects will not be jeopardized. In addition it provides for Amtrak's involvement in both the commercial development as well as the structural study to be conducted by the Secretary of Transportation. In this way, I feel a solid development plan can be developed and implemented.

Mr. Speaker, over the last 4 years of the Northeast corridor improvement project, the Federal Government has spent more than $1.6 billion in upgrading tracks, signaling, maintenance facilities, bridges and other elements of the 400-mile rail corridor between Washington, D.C., and Boston, Mass. With these improvements and the introduction of new Amtrak Equipment, ridership and revenues on the Northeast corridor have continued to grow. Today, the corridor accounts for more than half of Amtrak's total ridership and more than a third of its annual revenues.

Although the corridor's record of use and profitability has been truly impressive, performance promises to reach new highs with the completion of the next phase of corridor improvements—rail station development. For the 10 million passengers who use Amtrak's Northeast corridor services each year, the horrible conditions that exist at most stations are well known. Physical deterioration and inadequate services have become hardships with which rail passengers have had to contend.

An important part of assuring that the station revitalization effort is successful is the final resolution of Washington's Union Station, the southern terminus of the Northeast corridor. As many of my colleagues know, Amtrak has been operating its rail passenger services out of a temporary terminal behind Union Station. The terminal is grossly inadequate for current ridership let alone the significant increase expected when the Northeast corridor improvement project is finished.

Four million passengers annually now walk more than one-quarter of a mile from the front of the Union Station building to the location of the trains behind the temporary facility. By 1990, the Department of Transportation estimates that 9 million people will use the station each year.

While this situation is clearly unacceptable for rail users, it was not until February of this year, when the roof began to leak uncontrollably and the main terminal was declared structurally unsafe, that the public generally recognized the need to deal with the Union Station problem.

The legislation we have before us today is a good first step toward dealing with that problem. I would like to add at this point, that my committee's support of this legislation is contingent upon agreement with our Senate counterpart over future funding of the Northeast corridor improvement project. That agreement is based on the assumption that the Department of Transportation will spend $2.5 billion, the full authorization, for Northeast corridor improvement. The Northeast corridor improvement project, as authorized in Public Law 96-254, envisioned that a part of the total $2.5 billion project authorization would be spent for rehabilitation and improvements at Union Station. The Omnibus Budget Reconciliation Act of 1981, Public Law 97-35, instructs the Secretary of Transportation to complete project improvements to the extent of the full authorization, and, therefore, the expenditure of $29 million for Union Station would not jeopardize other critical corridor improvements.

This is an important point to understand. There is no money currently in the Department of Transportation's reduced corridor project for improvement at Union Station. It is, therefore, not our intent that an exception be made for Union Station providing that it should be funded while other project improvements which also are not part of the Department's reduced scope of work should remain unfunded. Instead, in reaching our agreement on S. 1192, we presume the Department of Transportation will complete as much of the project work as can be accomplished with the expenditure of the full authorization of $2.5 billion.

Furthermore, it should be noted that this legislation allows the House and Senate Commerce Committees to veto the use of more than $29 million to implement Union Station development from Northeast corridor and rail or rail-related programs under the jurisdiction of the House and Senate Commerce. This is simply a precautionary provision to insure that money Congress approved for other purposes is not spent on Union Station. In this regard, I would like to assure my colleagues that my subcommittee will look very skeptically on any Union Station development plan, if the Department of Transportation has not made satisfactory arrangements for actually completing all elements of the corridor project that can be funded with the full authorization of $2.5 billion.

Furthermore, at our committee's request, S. 1192 as reported by the Senate Committee on Environment and Public Works, has been changed to provide that the Secretary of Transportation shall cooperate with Amtrak in conducting the Union Station commercial development study. Under any development plan, the primary use of the building will be for rail passenger service as a result, the success of the Union Station development efforts from a commercial standpoint depend greatly on the successful development and use of the building as a rail facility. Amtrak as the only operator of intercity passenger service out of Union Station must, therefore, be closely involved in the overall station development plan.

Clearly, the temporary facility in the rear of the building is inadequate, and Amtrak's passenger services must be returned to the main terminal building. In addition, passengers must be given better access to the trains than the one-quarter mile hike they currently have to endure. At the very minimum, passenger access which is equivalent to that which rail users had prior to the relocation of the tracks behind the temporary replacement facility is needed.

Mr. Speaker, overall I feel the legislation before the House today satisfactorily addresses the Union Station problem and the concern of the authorizing committees. That improvements at Union Station be undertaken only if other improvements which are part of a budget that provides for the expenditure of the full $2.5 billion authorization are completed.

In addition to commercial interests who have recently shown great interest in Union Station development, the Government of the District of Columbia recently has committed up to $40 million to complete the parking garage which is only partially constructed in the station area. These commitments along with the sizable contributions from the Northeast corridor improvement project, I feel sure, will result in the successful revitalization of Union Station.

I urge my colleagues to support this legislation.

Mr. LENT. Mr. Speaker, the purpose of the bill before us today, S. 1192, is to restore Union Station as a major rail facility and to develop the station commercially. I believe it is important to emphasize that under this legislation rail service is to be given primary attention in the overall renovation of the station. In this regard, I think there is general agreement that the present replacement station located behind the Union Station building is not functional and is wholly inadequate to serve as the southern terminus of the Northeast corridor improvement project.

To address this problem, the legislation directs the Secretary of Transportation to study those actions that are necessary or desirable to provide im-

proved passenger access to the trains. Earlier plans and studies have indicated that extending the tracks to the concourse is the best way to improve passenger access to the trains.

In an effort to give the Secretary of Transportation more flexibility in developing the plan for Union Station, this legislation stops short of mandating this result. Nonetheless, it is expected that extension of the tracks to the concourse will occur unless the study conducted by the Secretary demonstrates an alternative that would provide passenger access to the trains equivalent to that provided by an extension of the tracks to the concourse.

Finally Mr. Speaker, I would like to take this opportunity to commend the efforts of the leadership of both the House Committees on Public Works and Transportation and Energy and Commerce for the development of this important piece of legislation.

Mr. FLORIO. Would you clarify the intent of S. 1192 with regard to rail passenger transportation?

Mr. FARY. First and foremost, the purpose of the legislation is to provide for a rail passenger facility in the Union Station Building.

Mr. FLORIO. I assume that the adequate provision of rail function would include a full range of rail passenger service and operational functions?

Mr. FARY. Yes. The committees would expect the Secretary to adhere to the criteria set out in the Northeast corridor station performance standards, which the Department has applied to other NEC stations. Such functions would include, but not be limited to, information, ticketing, passenger handling, staging and boarding, baggage handling, station administration and support, and public services.

Mr. FLORIO. I believe it is also the committee's intent that the facility be designed so as to address future passenger needs. The present replacement station, which has been generally termed as inadequate to handle the 4 million passengers who currently patronize Washington Union Station, has 38,000 square feet of usable space. Amtrak expects the passenger use of Union Station to increase by 35 percent when the Northeast corridor improvement project is completed in 1985. Is it the intent of S. 1192 that the rail passenger facility in the Union Station Building would accommodate present as well as future passenger and operational needs through the 1990's?

Mr. FARY. Yes. The legislation directs the Secretary to work closely with Amtrak to determine those actions necessary or desirable to restore rail passenger facility to Union Station. Such actions should include a design which would accommodate passenger needs into the 1990's.

Mr. FLORIO. The legislation requires that the Secretary's plan provide improved passenger access to the train. However, it fails to specifically direct the Secretary to provide for the extension of the tracks to the concourse.

Mr. FARY. That's correct. The legislation directs the Secretary to study those actions that are necessary or desirable to improve passenger access to the trains. Past plans and studies, including those conducted by the Department of Transportation, have indicated that extending the tracks to the concourse is the best way to improve passenger access to the trains, and in the long run represents the least costly alternative. It is the expectation of both committees that extension of the track to the concourse would be part of the Secretary's plan, unless the study conducted by the Secretary demonstrates that an alternative would provide passenger access to the trains that would be equivalent to that provided by extending the tracks to the concourse.

Mr. FLORIO. I expect the Secretary to consult with Amtrak on the commercial development of Union Station. Amtrak is already a major owner and developer of real estate property. Amtrak manages and leases commercial space in major stations in Philadelphia, New York Penn Station, Baltimore, Wilmington, Harrisburg, and other areas which, together with other holdings, brought in a net revenue of $16.5 million during fiscal year 1981.

In addition, Amtrak, in partnership with a private developer, is pursuing the commercial development of Philadelphia 30th Street Station and 50 acres of adjacent air rights. The key to beginning the project was the cooperation and participation of the city of Philadelphia and the Federal Railroad Administration.

This experience ought to be tapped by the Secretary in the development of Washington Union Station.

Mr. FARY. I concur with your views. In addition, the legislation directs the Secretary to work with Amtrak in carrying out the planning and marketing studies necessary to plan the comprehensive development of Union Station.

● Mr. MINETA. Mr. Speaker, it may have been my misfortune, but I have been involved in this project before, and I therefore have some familiarity with it.

The Federal effort to transform a magnificent but rundown railroad station into something that it was never designed to be—a National Visitor Center—gave us a decade of waste and disaster. My conclusion was that until you make this facility really work as a transportation facility in general and as a rail station in particular, nothing else you try to do there is going to work.

Unfortunately, Federal efforts in the past have made the National Visitor Center the primary objective, and the rail function was left to take the hindmost. The result has been repeated failure and embarrassment.

What this will would do is to fundamentally reverse the mistakes of the past, by making the rail function the primary objective at Union Station, by returning rail station activity to the historic Union Station Building, and by removing the Visitor Center function entirely. This is finally the total break with the past that we have needed for so long. If the Department of Transportation will use this authority to put together a plan which provides efficient and convenient transportation services as its top priority, as it is directed to do, then we may well be, at long last, on the way out of the quagmire that this project has been for over a decade.

My only concern is that the private development elements of this bill should not be allowed to do in the future what the Visitor Center did in the past, which is to push the rail station function into a second-class status.

I therefore questioned Secretary Lewis on this point during our subcommittee hearings on December 10. He responded: "We feel that the transportation needs must be met before we do anything commercially."

So with the explicit requirement in the bill that the rail station function be primary, that rail station activity would return to the historic Union Station Building, and with the assurance of the Secretary that priority will be given to the rail station function in his planning for this project, I support this bill and urge my colleagues to do the same.●

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. FARY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the Senate bills, S. 657 and S. 1192, just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

REQUEST FOR CONSIDERATION OF SENATE AMENDMENT TO H.R. 779, PROVIDING MUNICIPAL USE OF STORAGE WATER IN BENBROOK DAM, TEX.

Mr. ROE. Mr. Speaker I ask unanimous consent to take from the Speaker's table the bill (H.R. 779) to author-

ize the Secretary of the Army to contract with the Tarrant County Water Control and Improvement District Numbered 1 and the city of Weatherford, Tex., for the use of water supply storage in Benbrook Lake, and for other purposes, with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Page 2, after line 19, insert:

SEC. 2. (a) The third sentence of section 205 of the Flood Control Act of 1948 (33 U.S.C. 701s) is amended to read as follows: "Not more than $4,000,000 shall be allotted under this section for a project at any single locality."

(b) The amendment made by this section shall not apply to any project under contract for construction on the date of enactment of this Act.

SEC. 3. Section 164 of the Water Resources Development Act of 1976 (Public Law 94-587) is amended by deleting the figure "$21,000,000" and inserting in lieu thereof $23,200,000".

SEC. 4. The Secretary shall relocate the water supply intake facility on the Missouri River at Springfield, South Dakota, which facility is subject to severe sedimentation, at an estimated cost of $2,190,000.

SEC. 5. (a) The Proviso of section 2 of Public Law 84-485 shall not be construed to prohibit the storage of San Juan-Chama project water acquired by contract with the Secretary of the Interior pursuant to Public Law 87-483 in any reservoir, including the storage of water for recreation and other beneficial purposes by any party contracting with the Secretary for project water.

(b) The Secretary of the Army, acting through the Chief of Engineers, is authorized to enter into agreements with entities which have contracted with the Secretary of the Interior for water from the San Juan-Chama project pursuant to Public Law 87-483 for storage of a total of two hundred thousand acre-feet of such water in Abiguiu Reservoir. The Secretary of the Interior is hereby authorized to release San Juan-Chama project water to contracting entities for such storage. The agreements to thus store San Juan-Chama project water shall not interfere with the authorized purposes of the Abiguiu Dam and Reservoir project and shall include a requirement that each user of storage space shall pay any increase in operation and maintenance costs attributable to the storage of that user's water.

(c) The Secretary of the Interior is authorized to enter into agreements with entities which have contracted with the Secretary of the Interior for water from the San Juan-Chama project pursuant to Public Law 87-483 for storage of such water in Elephant Butte Reservoir. The Secretary of the Interior is hereby authorized to release San Juan-Chama project water to contracting entities for such storage. Any increase in operation and maintenance costs resulting from such storage not offset by increased power revenues resulting from that storage shall be paid proportionately by the entities for which the San Juan-Chama project water is stored.

(d) The amount of evaporation loss and spill chargeable to San Juan-Chama project water stored pursuant to subsections (b) and (c) of this section shall be accounted as required by the Rio Grande compact and the procedures established by the Rio Grande Compact Commission.

SEC. 5. Notwithstanding any other provision of law, no houseboat, floating cabin, marina (including any with sleeping facilities), or lawfully installed dock or cabin and appurtenant structures shall be required to be removed before December 31, 1989, from any Federal water resources reservoir or lake project administered by the Secretary of the Army, acting through the Chief of Engineers, on which it was located on the date of enactment of this Act, if such property is maintained in usable condition, and, in the judgment of the Chief of Engineers, does not occasion a threat to life or property.

Mr. ROE (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendment be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

Mr. HAMMERSCHMIDT. Mr. Speaker, reserving the right to object, I take this reservation to ask the gentleman from New Jersey (Mr. ROE) to explain his action here.

Mr. ROE. Mr. Speaker, will the gentleman yield?

Mr. HAMMERSCHMIDT. I yield to the gentleman from New Jersey.

Mr. ROE. Mr. Speaker, on June 1, 1981, the House passed H.R. 779, a bill which would enable the Corps of Engineers to contract with Tarrant County and the cities of Weatherford and Granbury, Tex., to provide municipal water supply storage space for those communities in Benbrook Lake. Today the Senate passed H.R. 779 and returned it to us with amendments.

The first of these amendments would increase the authorized level of small flood control projects, which may be constructed by the corps without specific congressional authorization, to $4 million. Under present law the limit is $2 million—or $3 million if the area to be protected has been declared a major disaster area within the previous 5 years. The last time the small flood control project authority was increased was in 1976, and a great deal of inflation has taken place since then. This amendment would raise the individual project limits, but would not raise the overall funding limit for the small flood control project program.

The second amendment would authorize the corps to relocate a water supply intake facility at Springfield, S. Dak., on the Missouri River. This same provision was included in last year's water resources omnibus bill, H.R. 4788, which we passed on February 5 of last year.

The third amendment would raise the authorization limit for the bridge from Lewiston, Idaho, to Clarkston, Wash., which was authorized by the Water Resources Development Act of 1976 and which is currrently under construction by the corps. This increase from $21 to $23.5 million is necessary due to a funding delay when the bridge was originally authorized.

The fourth amendment would allow public owners of water, such as the city of Albuquerque, to store water in the corps' Abiquiu Reservoir and Interior's Elephant Butte Reservoir in New Mexico. It would also expressly allow the Department of Interior to release water from the San Juan-Chama project to contracting entities for that purpose. This amendment would entail no increased Federal cost, because the contracting users would be required to pay any increase in operation and maintenance costs.

The fifth amendment would provide that no presently existing houseboat, floating cabin, marina, or lawfully installed dock or cabin maintained in good condition shall be required to be removed from corps projects before December 31, 1989.

Mr. Speaker, these amendments to H.R. 779 are relatively minor ones, and I urge the passage of the bill, as amended.

Mr. HAMMERSCHMIDT. Mr. Speaker, I want to strongly support this legislation. The House has previously passed the Benbrook Lake provisions, and the modifications and additions that the bill now contains are not only acceptable but desirable.

Mr. Speaker, I withdraw my reservation of objection.

● Mr. ROBERTS of South Dakota. Mr. Speaker, I rise in strong support of this bill. I am especially pleased with the provision which will authorize the Corps of Engineers to relocate a water supply intake at Springfield, S. Dak., at an estimated cost of $2.5 million. The intake has suffered severe sedimentation related to a corps project at Gavins Point.

Springfield is located on the Missouri River at the headwaters of the Gavins Point Reservoir. Because of this, the present water intake is susceptible to sedimentation as the Missouri enters this area of the reservoir and deposits its sediment. The deposition of this material is forming a delta which is forcing the Main channel to move away from the South Dakota side of the river, creating a mud flat in front of Springfield.

This siltation problem which causes unacceptable environmental impacts jeopardizing the water supply of the community is the direct result of the construction of the project. Accordingly, it is appropriate that the necessary relocation work be the responsibility of the United States rather than the community.●

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey (Mr. ROE).

Mr. FITHIAN. I object, Mr. Speaker.

The SPEAKER pro tempore. Objection is heard.

NATIONAL PATRIOTISM WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 34) to provide for the designation of the week commencing with the third Monday in February 1982 as "National Patriotism Week," and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. ANDERSON. Mr. Speaker, reserving the right to object, and I shall not object. I would like to, first of all, thank the gentleman from New York and chairman of the subcommittee for his expeditious handling of this bill. I also thank the majority of my colleagues who cosponsored National Patriotism Week.

Mr. Speaker, this is the second year that Congress has passed legislation establishing a week commemorating national patriotism. I like to think that the ease with which this year's bill gained the support of so many of my colleagues is due in part to the tremendous success National Patriotism Week enjoyed last February. Families, schools, and civic organizations all across the country invested much time and energy in developing programs to encourage and promote patriotism. What has been most inspiring about Patriotism Week is the spontaneous outpouring of feeling from the citizens of our country. It reaffirms my faith in my country, its people, and our ability to answer the challenges of today and tomorrow.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 34

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the first section of the joint resolution of October 10, 1980, Public Law 96-421, 94 Stat. 1798, is amended by striking "1981" and inserting "1982".

SEC. 2. The title of such joint resolution is amended to read as follows: "Joint resolution to designate the week commencing with the third Monday in February 1982 as 'National Patriotism Week'.".

Mr. GARCIA. Mr. Speaker, Senate Joint Resolution 34 designates the week commencing with the third Monday in February of 1982 as National Patriotism Week. This legislation will remind all Americans, especially elementary and secondary schoolchildren, of the heritage of freedom and opportunity which America provides for all its citizens.

● Mr. DERWINSKI. Mr. Speaker, I rise in support of House Joint Resolution 72 to designate the third Monday in February 1982 as National Patriotism Week.

It gives me a great deal of pleasure and a sincere sense of pride to support a resolution to set aside a week which would reestablish pride, understanding, appreciation, and patriotism for this great Nation.

This resolution would encourage our schools and numerous private organizations to promote and examine the true meaning of patriotism. It would allow time for young Americans to join in patriotic events as part of their total education as well as a week that would serve as a rallying point for all Americans to reflect a renewed confidence in our country, its principles, and its future.

I ask my colleagues to join me in supporting a resolution which would encourage our schools in the study of the Pledge of Allegiance, national anthem, our symbols, mottos, heroes, and the accomplishments of this great country.●

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

NATIONAL ENERGY EDUCATION DAY

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 84) to proclaim March 19, 1982, "National Energy Education Day", and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. SOLOMON. Reserving the right to object, Mr. Speaker, the purpose of this resolution is to proclaim March 19, 1982, as the third annual National Energy Education Day. The resolution had wide bipartisan support, with over 230 cosponsors, and has already been approved by the Senate.

The joint resolution would authorize the President to issue a proclamation calling upon American schools and public institutions to observe this day.

We have made great progress over the past few years focusing the attention of the American people upon the energy problem and National Energy Education Day is an important tool in helping the youth of America understand the nature of the energy crisis, its origins, and some possible solutions to those problems.

The first two National Energy Education Days were tremendous successes and preliminary plans for next year's celebration indicate that it will be even bigger.

Over 10,000 schools participated in the day last year and there were more than 10,000 different ways of celebrating it. The activities ranged from assemblies with guest speakers, time capsule burial ceremonies, energy symposiums, workshops with community leaders, energy museums featuring student projects, and energy fairs.

National Energy Education Day is completely voluntary and requires no appropriation from us.

Energy remains one of this country's most pressing problems and it is not a problem that is going to disappear. One of the most important things we can do is make sure the next generation is prepared to deal with energy issues and National Energy Education Day is a crucial step towards insuring that tomorrow's leaders are capable of making intelligent decisions when faced with energy questions.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 84

Whereas inexpensive and abundant energy permitted our great Nation to rise to a position of preeminence in the world community of nations; and

Whereas events of recent years have shown that our growing dependence on foreign energy supplies present a serious threat to the national security of the United States and to the health, safety, and welfare of its citizens; and

Whereas the development of new technologies to increase supplies and efficient use of traditional domestic and renewable energy resources promise to reduce our dependence on insecure and financially draining foreign energy supplies; and

Whereas these fundamental changes require the update of our educational system at all grade levels to prepare our youth to meet the new demands which are being created; and

Whereas the celebration of National Energy Education Day (NEED) will bring together students, teachers, school officials, and community members, to focus attention, during the past year, on the growth of an energy educated public, both young and old; and

Whereas NEED must also prompt additional efforts for the upcoming year which will demonstate that to ignore the plight of an energy shortfall and to fail to seek sound remedies would be an error: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That March 19, 1982, is proclaimed "National Energy Education Day" to expedite and enhance energy education programs in schools, both public and private, at all grade levels, and the President is authorized and requested to (a) issue a proclamation calling upon the general public and educational institutions of the

United States to observe this day with appropriate activities and ceremonies, and (b) to send suitable engrossed copies to all of the Nation's Governors and Members of Congress, and (c) to direct all appropriate Federal agencies to cooperate with and participate in the celebration of "National Energy Education Day".

Mr. GARCIA. Mr. Speaker, Senate Joint Resolution 84 designates March 19, 1982, as National Energy Education Day. It is important to educate the American public, especially the youth of our Nation, about the need to conserve energy in order to reduce our dependence on foreign sources of supply. Further, this country should continue to develop new means of increasing our domestic supply of energy as well as develop more efficient ways of using energy.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

NATIONAL SCLERODERMA WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 57) to provide for the designation of February 7 through 13, 1982, as "National Scleroderma Week," and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 57

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President shall issue a proclamation designating February 7 through 13, 1982, as "National Scleroderma Week", and calling upon the people of the United States to observe such week with appropriate ceremonies and activities.

Mr. GARCIA. Mr. Speaker, Senate Joint Resolution 57 provides for the designation of February 7, 1982, as National Scleroderma Week. This bill would heighten the consciouness of the American people about this little known disease in an effort to foster increased programs of research and treatment.

● Mr. DERWINSKI. Mr. Speaker, I rise in support of House Joint Resolution 197 designating February 7-13, 1982, as "National Scleroderma Week."

There are approximately 300,000 known cases of scleroderma in the United States, but exact figures are difficult to ascertain because of numerous misdiagnosed cases.

Scleroderma occurs in two major forms, localized and systemic. Localized scleroderma involves the skin and causes cosmetic and mobility problems. Systemic scleroderma affects the heart, lungs, intestines, kidneys and is therefore more serious and may be life threatening.

Since the cause is unknown and there is no cure, physicians can only treat symptoms. By designating a National Scleroderma Week, we would be creating the kind of national attention that is necessary to generate the research for a cure.

I urge my colleagues to support this legislation.●

● Mr. PANETTA. Mr. Speaker, I am very pleased that the House is considering this important measure today. As my colleagues know, it authorizes the President to issue a proclamation designating the week of February 7-13, 1982, as "National Sclerodema Week." Some 230 Members have cosponsored this resolution, a clear sign of its broad support both here in the Congress and around the country. Since the Senate has already adopted an identical resolution, Senate Joint Resolution 57, passage in the House is all that is needed to complete action on this important measure.

I originally introduced this resolution in the 96th Congress after being informed of the seriousness of scleroderma, of the surprising and distressing number of Americans and others throughout the world who suffer from it—at least 300,000—and of the fact that the cause of the disease is unknown and no cure has been discovered.

Scleroderma is a painful, debilitating disease that strikes both the skin and internal organs of the body. It hardens the body's tissues, so that in its most serious form—in the esophagus, intestines, lungs, heart, or kidneys—it causes fibrosis, inflammation, and atrophy of the tissues, and in its localized form it cases hardening and thickening of the skin, particularly of the hands and fingers, along with painful ulcerations.

Of the 300,000-plus sufferers of scleroderma, 80 percent are women in their childbearing age. A high proportion of the cases are in black women.

Mr. Speaker, a great deal of the credit for the fact that this resolution is on the floor today goes to the hard-working people associated with the United Scleroderma Foundation, which is headquartered in Watsonville, Calif. The foundation originally brought this problem to my attention, and it was very successful in informing its national membership of the existence of the resolution. In addition, I want to thank the Senate sponsor of the resolution, Senator STEVE SYMMS, who gathered the necessary 52 cosponsors in that body.

Mr. Speaker, this may not be the most momentous piece of legislation adopted by the 97th Congress. But the many sufferers of this terrible disease will be thankful for the amount of attention this resolution will bring to it and for whatever contribution it makes to bringing closer the day when a cure is found for scleroderma. I cannot imagine a more worthy cause to which we can contribute, and I thank the many cosponsors of the measure and the entire Congress for moving House Joint Resolution 197 toward final passage.●

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

BICENTENNIAL YEAR OF THE AMERICAN BALD EAGLE AND NATIONAL BALD EAGLE DAY

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 121) to provide for the designation of the year 1982 as the "Bicentennial Year of the American Bald Eagle" and the designation of June 20, 1982, as "National Bald Eagle Day," and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. DERWINSKI. Reserving the right to object, Mr. Speaker, I do so merely to advise the House that our good friend from New York has, I believe, a total of five resolutions. They all are worthy of the support of the House and in the interest of time, I would merely take this moment under this reservation to urge that the Members give their attention to the gentleman from New York and support these resolutions. They cleared our august committee in fine fashion and I commend the gentleman for the great leadership which he has displayed this afternoon.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York (Mr. GARCIA)?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 121

Whereas on June 20, 1782, the Congress adopted the American bald eagle as the symbol of our Nation;

Whereas the American bald eagle was so adopted because of its legendary strength and its single-minded commitment to the protection of its young and the defense of its home;

Whereas the American public has adopted the American bald eagle as a symbol of

strength, courage, determination, and beauty;

Whereas the seals of twelve States and the District of Columbia bear the image of the American bald eagle;

Whereas human encroachment on the American bald eagle's natural habitat has resulted in the designation of the American bald eagle as an endangered species throughout most of the United States;

Whereas Federal, State, and local governments and private wildlife conservation groups have adopted programs in recent years to increase the number and dispersal of nesting pairs in the United States;

Whereas the celebration of the Bicentennial Year of the American Bald Eagle and National Bald Eagle Day will serve to make people aware of the current plight of our country's living symbol;

Whereas such celebration will draw attention to the spirit the American bald eagle represents and the pride that it signifies;

Whereas such celebration should be conducted in a manner that encourages additional efforts to keep the American bald eagle a flying symbol of freedom: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the year 1982 is designated as the "Bicentennial Year of the American Bald Eagle" and June 20, 1982, is designated as "National Bald Eagle Day". In order to promote and enhance efforts to inform the American people of the plight of our national bird, the American bald eagle, and to encourage additional efforts to protect and increase the population of this symbol of our Nation, the President of the United States is authorized and requested—

(1) to issue a proclamation calling upon the people of the United States, including wildlife conservation organizations and educational institutions, to observe such year and day with appropriate ceremonies and activities;

(2) to send a suitable copy of such proclamation to the Governor of each State and to each Member of Congress; and

(3) to direct all Federal agencies and departments which have activities which affect the bald eagle to cooperate with and participate in the celebration of such year and day.

Mr. GARCIA. Mr. Speaker, Senate Joint Resolution 121 provides for the designation of the year 1982 as the "Bicentennial Year of the American Bald Eagle" and the designation of June 20, 1982 as "National Bald Eagle Day." This legislation would honor the bald eagle as the symbol of our Nation, and remind all Americans that this majestic eagle represents the foundation of this country; strength, courage, and determination.

● Mr. FORSYTHE. Mr. Speaker, I join my distinguished colleague from New York in supporting Senate Joint Resolution 121. As a cosponsor of companion House legislation I feel that enactment of this resolution would be most appropriate in view of the fact that we will be celebrating the 200th anniversary of the bald eagle being selected as the national symbol for our great Nation.

Since the beginning of recorded history, the bald eagle has served as symbol of power, freedom, and immortality. The Continental Congress adopted it as the central figure of the Great Seal of the United States of America on June 20, 1782, and it is appropriate that we designate June 20, 1982, as "National Bald Eagle Day" and the New Year as the "Bicentennial Year of the Bald Eagle".

As our Nation expanded from the original Thirteen Colonies, the clearing of land for agriculture and the development of cities and industries drastically reduced the nesting and roosting habitat of the bald eagle over time. Congress responded to the need to protect this species by enacting the Bald Eagle Protection Act in 1940 and this species has been listed as endangered pursuant to the Endangered Species Act of 1973. However, additional public awareness of our national symbol is still needed to supplement local, State, and national efforts to protect this magnificent species in order to keep it from becoming extinct.

For these reasons I want to urge my colleagues to join me in supporting Senate Joint Resolution 121.●

The Senate joint resolution was ordered to be read a third time, was read a third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that all Members be given 5 legislative days in which to revise and extend their remarks and include extraneous matter on the Senate joint resolutions just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

REQUEST FOR CONSIDERATION OF SENATE AMENDMENTS TO H.R. 4879, INTERNATIONAL BANKING FACILITY DEPOSIT INSURANCE ACT

Mr. ST GERMAIN. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 4879), to clarify the treatment of international banking facility deposits for purposes of deposit insurance assessments and to remove certain limitations on the mortgage loan purchase authority of the Federal Home Loan Mortgage Corporation and the Federal National Mortgage Association, with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Page 4, after line 18, insert:

"(b)(1) Section 305 (a)(2) of the Federal Home Loan Mortgage Corporation Act (12 U.S.C. 1454 (a)(2)) is amended by inserting after the third sentence thereof the following: 'With respect to any transaction in which a seller contemporaneously sells mortgages originated more than one year old prior to the date of sale to the Corporation and receives in payment for such mortgages securities representing undivided interests only in those mortgages, the Corporation shall not impose any fee or charge upon an eligible seller which is not a member of a Federal Home Loan Bank which differs from that imposed upon an eligible seller which is such a member.'.

"(2) The amendment made by paragraph (1) shall take effect on January 1, 1982, and shall aply to commitments entered into on or after such date.".

Page 4, line 19, strike out "(b)" and insert "(c)".

Page 5, after line 11, insert:

TITLE III—MISCELLANEOUS

SEC. 301. Section 625 (a) of the Depository Institutions Deregulation and Monetary Control Act of 1980 is amended to read as follows:

"SEC. 625. (a) Except as provided in section 608(b), the amendments made by this title shall take effect upon the expiration of two years and six months after the date of enactment of this title.".

SEC. 302. Section 206 of the Depository Institution Management Interlocks Act is amended to read as follows:

"SEC. 206. (a) A person whose service in a position as a management official began prior to the date of enactment of this title and who was not immediately prior to the date of enactment of this title in violation of section 8 of the Clayton Act is not prohibited by section 203 or section 204 of this title from continuing to serve in that position for a period of ten years after the date of enactment of this title. The appropriate Federal banking agency (as set forth in section 209) may provide a reasonable period of time for compliance with this title, not exceeding fifteen months, after any change in circumstances which makes service described in the preceding sentence prohibited by this title, except that a merger, acquisition, increase in total assets, establishment of one or more offices, or change in management responsibilities shall not constitute changes in circumstances which would make such service prohibited by section 203 or section 204 of this title.

"(b) Effective on the date of enactment of this title, a person who serves as a management official of a company which is not a depository institution or a depository holding company and as a mangement official of a depository institution or a depository holding company is not prohibited from continuing to serve as a management official of that depository institution or depository holding company as a result of that company which is not a depository institution or depository holding company becoming a diversified savings and loan holding company as that term is defined in section 408(a) of the National Housing Act. This subsection shall expire ten years after the date of enactment of this title.".

SEC. 303. Section 313 of the Depository Institutions Deregulation and Monetary Control Act of 1980 is amended to read as follows:

"ALASKA USA FEDERAL CREDIT UNION

"SEC. 313. The provisions of section 5 of the charter of the Alaska USA Federal Credit Union which would terminate the eligibility for membership in the Credit Union of the enrollees and employees of certain corporations shall not be effective.".

SEC. 304. The fourth sentence of section 235(h)(1) of the National Housing Act is amended—

(1) by inserting "(i)" after "except";

(2) by striking out "or" after "March 31, 1982," the second place it appears and inserting in lieu thereof "(ii)"; and

(3) by inserting before the period after "1974" the following: ", or (iii) pursuant to other commitments issued on or before September 30, 1981, where housing under this section is to be developed on land which was municipally owned on September 30, 1981, and where a local government contributes at least $1,000 per unit of funds obtained under title I of the Housing and Community Development Act of 1974 and at least $2,000 per unit of additional funds to assist housing under this section".

Mr. ST GERMAIN (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendments be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Rhode Island?

Mr. STANTON of Ohio. Mr. Speaker, reserving the right to object, I wish to explain to the House that what we have here is with one exception and a very big one, I think, legislation which passed with the overwhelming support of the House. It is extremely important legislation to the industries involved.

One title involves our new international banking facilities and sets them on a par with offshore facilities. It settles a problem with insurance coverage by the Federal Deposit Insurance Corporation. This was part of our original House bill.

The second title has to do with what we call swap mortgages. The swap program of the Federal Home Loan Mortgage Corporation and the Federal National Mortgage Association is extremely important to mortgage lenders. These two items of legislation passed this House on November 17.

What we do have is, of course, the other body adding on to this bill five amendments. What is different from this end of the session than from others, Mr. Speaker, is that before the other body passed these amendments last night, they discussed them fully with our staffs. These amendments were closely reviewed. Our staffs rejected some until they were satisfied that the language was fully acceptable to the minority and the majority. I think that we need a full explanation, of course, and under my reservation of objection, I would like to yield to our chairman to explain to the Members what the amendments are.

□ 1450

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Rhode Island?

Mr. ROUSSELOT. Mr. Speaker, reserving the right to object, how many amendments are there is this bill, I ask the gentleman from Rhode Island (Mr. ST GERMAIN)?

Mr. ST GERMAIN. There are five amendments, all five of which I am prepared to fully explain and probably will be more informative in the explanation then hearing the statutory language.

Mr. ROUSSELOT. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

The SPEAKER pro tempore. Is there objection to the original request of the gentleman from Rhode Island?

Mr. STANTON of Ohio. Mr. Speaker, reserving the right to object, I do so for the sole purpose of asking our chairman to explain, as he said he just would, these five amendments.

Mr. ST GERMAIN. Mr. Speaker, if the gentleman would yield, the first amendment would extend for 6 months the taking effect of the changes made by the Truth in Lending Simplification Act passed in 1980.

This has been requested as a result of the fact that the Federal regulations were issued after about 1 year, but then the staff interpretations of those regulations did not come out until October of this year, leaving just 3 months for the various people who were covered by this legislation to prepare the forms, and it is a physical and mental impossibility to comply. That is why we agreed on this side, the chairman of the Subcommittee on Consumer Affairs and myself, to an extension of 6 months in that first amendment.

Mr. STANTON of Ohio. Mr. Speaker, further reserving the right to object, and I will try to explain along with the chairman each one of these amendments.

This was an amendment that the industries fought for extremely hard for a long time. They were under great pressure on this 6 months extension, as I understand. I fully agree that we should permit them this additional time to comply with the requirements of the new truth in lending law and regulations.

Mr. WYLIE. Mr. Speaker, will the gentleman yield?

Mr. STANTON of Ohio. Mr. Speaker, further reserving the right to object, I yield to the gentleman from Ohio.

Mr. WYLIE. Mr. Speaker, I was not privy to the arrangement which brings this bill to the floor today or this amendment.

I might say that I do have more than just a passing interest in the truth in lending law. The gentleman from Illinois (Mr. ANNUNZIO) and I worked very arduously to get the law where it is today.

The gentleman has given the specific reason why a 6-month extension is needed at this time. But will we have some rules and regulations and some model forms at the end of the 6 months?

Mr. ST GERMAIN. Mr. Speaker, if the gentleman will yield further, the rules and regulations have been promulgated. The problem is for those people who have now to comply with the rules and regulations to draft, to draw up the forms that are necessary.

Mr. WYLIE. The model forms have not been drawn up yet?

Mr. ST GERMAIN. That is correct. There are no model forms. What is happening is that various institutions around the country have retained legal counsel to draw these forms.

I personally, and the gentleman from Illinois (Mr. ANNUNZIO) and our staff, agreed after the evidence was presented to us that it is impossible for them to complete this in the time allotted.

Mr. ANNUNZIO. Mr. Speaker, will the gentleman yield?

Mr. STANTON of Ohio. Mr. Speaker, I will be glad to yield under my reservation of objection to the gentleman from Illinois.

Mr. ANNUNZIO. Mr. Speaker, in recent weeks we have heard about legislation to bail out some ailing financial institutions in this country. The legislation before us today is designed to bail out the biggest financial institution in this country, the Federal Reserve System. If it was not for the inefficient, unproductive, and lazy Federal Reserve System, we would not need today's action. But because the Federal Reserve System ranks as one of the worst agencies of our Government, we have to have a special bill to correct that agency's faults.

When the Truth in Lending Simplification Act was passed in 1980 it had a 2-year delay in its implementation in order to allow the Federal Reserve System to issue its regulations and staff interpretation of the regulations which, in effect, are legal footnotes. The regulations were issued in April but the staff interpretation was not issued until October. That 6-month delay means that creditors do not have enough time to become familiar with the 165-page interpretation before they must comply with it.

I want to remind Members that the Truth in Lending Simplification Act is a title of the Depository Institutions Deregulation and Monetary Control Act of 1980, which I have referred to on numerous occasions as the worst piece of legislation in the history of the Congress. That is the same bill that gave us the Depository Institutions Deregulation Committee (DIDC), which has succeeded in ruining most of our financial institutions. I was a conferee on that legislation and I was the only member of the conference on either the House or the

Senate side who refused to approve the legislation or to sign the conference report. I voted against the conference report when it was taken up on the House floor. Today's action is just another example of how bad the Depository Institutions Deregulation and Monetary Control Act has turned out to be.

In order to correct the work habits of the Federal Reserve, it is necessary to grant a 6-month extension in the implementation of the Truth in Lending Simplification Act so that creditors will not be forced into a legal swamp. The legislation today would grant a 6-month extension so that creditors can understand what took the staff of the Federal Reserve an extra 6 months to write and give both creditors and consumers the full legislative picture.

It is unfortunate that through the tardiness of the inefficient Federal Reserve System that creditors and consumers would be penalized, and I want to make it clear that it is the Federal Reserve System that is the villian. While I support this legislation, my support did not come without a gentleman's agreement with the Senate.

The Senate Banking Committee currently has before it legislation which would make additional changes to the truth in lending law, and in my opinion, would greatly weaken the remaining consumer protections in truth in lending. I was concerned that that body would pass these changes and try to force them onto the statute books during the 6-month delay in the effective date of the new law. My concern was heightened because the chairman of the Senate Banking Committee has indicated that he plans to move a massive financial bill through the Senate as early as February. I consider truth in lending an important piece of legislation, but if it were coupled with a massive rewrite of all the financial laws of our country, truth in lending might get lost in the shuffle and not given its proper consideration.

Therefore, I have agreed to support the 6-month delay in implementing the new truth in lending simplification law on the condition that the Senate Banking Committee will not pass any further truth in lending legislation for 6 months. The chairman of the Senate Banking Committee, Senator GARN of Utah, has agreed to my request. It is my hope that we can now consider the financial reform package as one issue and truth in lending as another.

My fondest hope is that by the time the Senate is able to deal with a truth in lending rewrite, that the 97th Congress will have adjourned and that truth in lending will remain intact without any further weakening amendments.

I would also suggest to Budget Director David Stockman that since the Federal Reserve has clearly shown that it is not capable of performing its job, that the administration should look at the Federal Reserve when it looks toward budget cuts. Even though the Federal Reserve is an independent agency, that independency should not mean that its employees do not have to work as hard as other Government employees, many of whom are facing unnecessary losses of their jobs.

The SPEAKER pro tempore. Is there objection to the original request of the gentleman from Rhode Island (Mr. ST GERMAIN)?

Mr. WYLIE. Mr. Speaker, would the gentleman yield? I would like to ask a question on the section 235 provision.

Mr. STANTON of Ohio. Mr. Speaker, further reserving the right to object, I yield to the gentleman from Ohio (Mr. WYLIE).

Mr. ST GERMAIN. Mr. Speaker, could we take these in order?

Mr. STANTON of Ohio. We are taking these down in order.

I yield to the gentleman, once again under my reservation.

Mr. ST GERMAIN. All right. The second amendment provides a permanent exception for the Alaska USA Federal Credit Union, to include within the field of membership the Alaska Native Corporations.

The reason for this is that we a few years back gave this exception for a limited period of time, during which time it was hoped that these Alaska Native Corporations would be instructed as to how to open their own independent credit unions. It turns out that it has been a little more difficult than anticipated to complete the training process.

Second, I think everybody is aware of the fact that in this climate, opening new small facilities of credit unions is not the best idea possible.

This has been cleared by the NCUA, and to the best of this Member's knowledge, I am not aware of anyone who has any objection to it.

Another Senate amendment relates directly to the mortgage SWAP program I just described. Currently, FHLMC charges banks, mortgage banks, and credit unions a one-half of 1 percent sales fee to purchase mortgages, while the savings and loan associations and mutual savings banks that are members of Federal Home Loan Banks are not charged a sales fee by FHLMC. The Senate amendment would require FHLMC, beginning on January 1, 1982, to impose any sales fee it might assess for the SWAP program uniformly on Federal Home Loan Bank members and nonmembers alike. I want to emphasize that this change in the fee structure applies only to the FHLMC old mortgage SWAP program, and not to the corporation's other mortgage purchase activities. The broader issue of the role of the secondary mortgage market, and the fees to be imposed in that market, will be part of the Banking Committee's comprehensive hearings on the FIRE discussion principles that will resume after the House returns next year.

Another Senate amendment contains two changes in the statutory provisions regulating interlocking directorships between depository institutions and their holding companies. Those provisions, originally adopted in 1978, generally prohibit interlocks between such institutions when they are in competitive markets. The law, however, provided grandfather rights to existing directors by allowing affected individuals to retain their interlocks for a period of 10 years. Events in the last 2 years highlight some problems which have arisen with these proscriptions. Revolutionary changes are occurring in the nature and structure of our financial system which may call into question the framework established to eliminate possible conflicts of interest involving interlocks. In addition, high and volatile interest rates have threatened an increasing number of thrift institutions necessitating supervisory mergers and acquisitions by other thrifts and by nonfinancial companies. As a result of those factors the Senate amendments would relax the restrictions on interlocking directorships by allowing a grandfathered director to retain interlocks even though his institution has been the subject of a merger or acquisition or other action taken to assure the continued competitive viability of the underlying institutions. In addition, the amendments would allow officials of nondepository institutions which acquire savings and loans to retain any directorships involving other depository institutions that they held when the acquisition occurred until the expiration of the original 10-year period. These changes will allow time for thrift institution problems to be resolved without throwing unnecessary restrictions in the way. Personally, I have serious concerns about these developments but I realize that a balancing is needed on this issue. I would point out that the committee will be examining this issue in more detail during our hearings on the "Financial Institutions in a Revolutionary Era" document. One matter raised by that document is the proper manner to handle conflicts of interest and interlocking directorships of competing financial institutions given the magnitude of the changes occurring in the financial marketplace. In addition, the document raises the issue of whether savings and loan holding companies and bank holding companies should continue to be treated differently in the future. I fully intend to review these matters when the second session convenes.

Mr. STANTON of Ohio. Mr. Speaker, further reserving the right to object, will the gentleman explain the next amendment?

Mr. ST GERMAIN. Mr. Speaker, the next amendment would provide the city of New York with more flexibility to comply with changes made in section 235 housing programs in the Reconciliation Act.

To explain that a little further, the amendment would permit the HUD Secretary to enter into section 235 homeownership assistance contracts until December 30, 1983, if a local government has committed at least $1,000 per unit of CDBG funds and $2,000 per unit of additional funds to a project assisted under project 235 of the National Housing Act.

The existing law as amended by the Budget Reconciliation Act of 1981 permits the HUD Secretary to enter into section 235 contracts only if a firm commitment is issued on or before March 31, 1982, or that the project is assisted by a UDAG, funds of which were reserved to assist section 234 prior to June 30, 1981.

If a community had not fully segregated its CDBG funds by that date, it would not be eligible. This provision allows flexibility and recognizes local financial commitments made in conjunction with the federally subsidized assistance program.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. STANTON of Ohio. Mr. Speaker, further reserving the right to object, I will be happy to yield to my friend, the gentleman from California.

Mr. ROUSSELOT. Mr. Speaker, why does the chairman suppose that it is necessary to do this? Does this extension of time relate to anybody else other than this New York project?

Mr. ST GERMAIN. If the gentleman will yield further, I do not have any knowledge of any other community.

Mr. ROUSSELOT. Why should they be any different than anybody else?

Mr. ST GERMAIN. They have purchased the land. This means 2,000 housing units for the city of New York.

The change came about under reconciliation, Gramm-Latta II. You ask, what is the big rush? Well, the rush is that they made a firm commitment by that date. But in order to get that firm commitment, all the actions have to be taken and waivers granted and assented and agreed to prior to that for the firm commitment to come into play; so absent this amendment, at this time it is totally impossible for the city of New York to construct these additional 2,000 houses.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. STANTON of Ohio. Mr. Speaker, further reserving the right to object, I yield to my friend, the gentleman from California (Mr. ROUSSELOT), to answer the question the gentleman asked.

Mr. ROUSSELOT. Mr. Speaker, I would be interested in knowing, we are in effect giving a special extension of time to New York City; nobody else gets an extension.

Mr. ST GERMAIN. Mr. Speaker, if the gentleman will yield, the city of New York is the city that has the problem and came in with the problem. It is a unique problem and the city does have an opportunity to provide an additional 2,000 housing units in that community. I feel that they deeply and dearly need those housing units.

Mr. ROUSSELOT. The federally subsidized units?

Mr. STANTON of Ohio. Mr. Speaker, further reserving the right to object, I would like to expound upon what the gentelman just said.

This is the one amendment that bothered me, when it first came over there last night. The staff took a long look at this situation and we concluded that New York City should be entitled to these units.

Now, economically they could not build the units. The project is on urban renewal land, but its finances are such that these section 235 units cannot be built without other funds. The city of New York decided to continue to use urban renewal land, but added an additional $1,000 to $2,000 per unit from its community development funds.

Mr. ROUSSELOT. How much does the Federal Government put in?

□ 1500

Mr. STANTON of Ohio. The Federal Government will put in $4,000 per unit.

Mr. ROUSSELOT. Oh, is that all?

Mr. STANTON of Ohio. There are 2,000 units affected. It is an $8 million per year outlay proposition.

Mr. ROUSSELOT. Is this in your original truth-in-lending package?

Mr. WYLIE. May I say to the gentleman on this score, I was one of those who was thinking of making objection to this amendment, because of the discussion about it in the committee. The administration had also indicated some apprehension about it and this prompted my concern.

Now, the reason this amendment can only apply to New York, and New York City is not mentioned in the amendment, is because New York City will supply a considerable portion of the funds from city revenues and an additional $2,000 per unit will come from their community development block grant program. Whereas New York City is not mentioned in the bill, it is the only city that really has the problem. And New York is really the only city that can comply with the amendment in view of the amount of local money that will go to each of these units.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield further?

Mr. STANTON of Ohio. I would be happy to yield to the gentleman from California.

Mr. ROUSSELOT. Well, I just become concerned when we pass at the last minute like this, in a truth-in-lending bill that really has nothing to do with the 235 program, something that is a very special consideration for one city. I seriously doubt if Los Angeles, Calif., or Miami, Fla., or any other city came in and tried to do something like this at the last minute that it would be allowed. But because New York City is so huge, and I know they will come in and tell us how much in taxes they pay, not mindful what the rest of the country pays, and because there is a lot of other good things in this bill, I suppose we will just have to let it go. Is that right?

Mr. STANTON of Ohio. I appreciate the gentleman's great concern. I wish to tell the gentleman the 235 program is a program that is phasing out. this amendment will not slow that phase-out .

Mr. ROUSSELOT. We have been hearing that for 5 years, that the 235 program is phasing out. I have not seen anything to show it is phasing out.

Mr. STANTON of Ohio. Things are moving in the right direction. The gentleman has to admit this is especially true under this administration.

I wonder if the gentleman would go on to the next amendment.

Mr. ROUSSELOT. In other words, we are establishing a precedent here to allow one city an exemption from the deadline. Everybody else has to comply with it, but not New York City.

Mr. ST GERMAIN. Mr. Speaker, will the gentleman yield?

Mr. STANTON of Ohio. I yield to the gentleman from Rhode Island.

Mr. ST GERMAIN. We are not establishing a precedent. We have done this for different communities, States, groups, over the years.

Mr. ROUSSELOT. I noticed that. That was very meritorious.

Mr. STANTON of Ohio. I have to say, Mr. Speaker that I would ordinarily oppose this sort of an amendment. I am persuaded to accept it because the city has put in $2,000 of local funds per unit.

Mr. WYLIE. Mr. Speaker, will the gentleman yield?

Mr. STANTON of Ohio. I yield to the gentleman from Ohio.

Mr. WYLIE. Mr. Speaker, I was going to comment to the gentleman from California that we do really need the international banking facility bill, the original H.R. 4879. We also need the provision which allows FHLMC and FNMA to acquire a larger volume of older mortgages.

I do not intend to put the chairman of our full committee on the spot, but I do think it is amazing that the other body can move so expeditiously on this bill and load it up with other provisions. All of the amendments are worthwhile, but some of them should have been discussed more in our committee. Somehow, the other body does not have the time to bring over what I think is a far more important bill, to wit: the regulators bill, H.R. 4603, a far more important bill which our committee has thoroughly reviewed.

I thank the gentleman for yielding.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield further?

Mr. STANTON of Ohio. Certainly I yield to the gentleman from California.

Mr. ROUSSELOT. My distinguished chairman of this committee on which I used to serve, and I am sure he was glad when I left, would he be willing to drop this particular provision if I object?

Mr. ST GERMAIN. I do not think I am in a position to drop a provision once an agreement has been entered into. I always, attempt to do my utmost to keep the agreements that I enter into.

Mr. ROUSSELOT. I am sure the gentleman did not get committed to this when it was part of the changes or amendments to the truth-in-lending law. The gentleman certainly did not at that point. No, he did not.

Mr. ST GERMAIN. Wait a minute. Do not put words in my mouth; do not do that to me.

Mr. ROUSSELOT. There is no way I could, anyway.

Mr. ST GERMAIN. Maybe some new Member; no, no way. The commitment was made after a lot of staff bipartisan discussion with Mr. STANTON. myself, and our staffs, and I made my commitments and my agreements.

Mr. ROUSSELOT. This is a staff commitment? OK.

Mr. ST GERMAIN. My commitment.

Mr. STANTON of Ohio. We are about to the end of the explanation of this bill.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. STANTON of Ohio. I yield to my friend, the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, what I am wondering is why we had to use this procedure where we have to either accept or reject the bill on unanimous consent; why could we not have gone to, say, a suspension on this legislation? We got unanimous consent yesterday to have suspension bills here on the floor. But instead we are taking this action by unanimous consent. It does give some of us problem who might like to vote against it but do not want to kill some of the worthwhile provisions that the gentleman is talking about.

Mr. STANTON of Ohio. The gentleman from Pennsylvania really makes an excellent point.

We were caught in the schedule. The two items included in H.R. 4879, which we passed in November, are extremely important to the financial industry of our country. Similarly, the truth-in-lending extension is extremely important. We have bipartisan support for all of these amendments. With the exception of the amendment to the section 235 program, they are generally of a technical nature.

We worked hard to control this process and to limit the amendments that would be offered in the other body. People on our side of the aisle wanted to submit other amendments. I said no. We are down to the end of the session and we must strictly limit the amending process where possible. I would hope the gentleman would go along on this bill under my personal assurances it has been worked over to the best of our ability.

Mr. WALKER. Certainly I think that the gentleman's leadership on these issues has been outstanding. But as I say, the problem for us is, there are procedures available that would give the Members a chance to vote on some of these things. They are available in the House today. Instead, we come in with a unanimous-consent kind of request that accepts it in whole without even an up-or-down vote.

Mr. ST GERMAIN. Mr. Speaker, will the gentleman yield?

Mr. STANTON of Ohio. I would be happy to yield to the gentleman from Rhode Island.

Mr. ST GERMAIN. If we went on suspension with this, we would have to vote the whole thing up or down. We could not go on individual amendments.

Mr. STANTON of Ohio. May I say to my friend from Pennsylvania, I assure the gentleman I watched this. I would not be up here arguing for these amendments except that the first two titles are far more important and of far more substance than the others.

Mr. WALKER. If the gentleman would yield further, I think there are a number of people here who agree with that. What we do not understand is why we cannot bring a bill to the floor under unanimous consent that deals with those two provisions; why we have to load it up with some Christmas tree amendments under a unanimous-consent request. It is the procedure that I am questioning. I think it is an extremely poor procedure, and I think it is the kind of thing that we see far too much of on the last day of a session of the Congress.

Mr. STANTON of Ohio. I wish to assure my friend from Pennsylvania that his thoughts are the same as mine last night. I debated hard on this. It was a question of the time elements involved. I had to make a judgment on that. The procedure was as important as the substance to me. But the bill came over from Senator GARN with his request, and I felt, we are moving in the right direction. The amendments are minor in substance, so I decided to support it. I would hope the gentleman would go along with my judgment.

Mr. ST GERMAIN. If the gentleman would yield to the chairman, I would say to the gentleman further, I agree with you. I do not like legislating in this manner. I would like the bills to come back clean. If the gentleman will check the CONGRESSIONAL RECORD last night and see who put these amendments on, they are the Members you can talk to, not me.

Mr. STANTON of Ohio. Mr. Speaker, I have no further objection. The gentleman has covered the bill. I have no further objection.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the original request of the gentleman from Rhode Island (Mr. ST GERMAIN)?

Mr. JOHNSTON. I object.

The SPEAKER pro tempore. Objection is heard.

GENERAL LEAVE

Mr. ST GERMAIN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the legislation that was just called up and not passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

□ 1510

PROVIDING FOR UPGRADING OF THREE POSITIONS ON CAPITOL POLICE

Mr. MINISH. Mr. Speaker, by direction of the Committee on House Administration, I call up a resolution (H. Res. 244) providing for upgrading of three positions on the Capitol Police and for other purposes, and ask unanimous consent for its immediate consideration.

The SPEAKER pro tempore. The Clerk will report the resolution.

The Clerk read the resolution, as follows:

H. RES. 244

Resolved, That (a) there are established three additional positions on the Capitol Police for duty under the House of Representatives, as specified in subsection (b).

(b) The positions referred to in subsection (a) are—

(1) one position as deputy chief;

(2) one position as inspector; and

(3) one position as sergeant.

(c) Each appointment to a position under subsection (a) shall be made—

(1) by the Capitol Police Board, with prior approval of the Committee on House Administration; and

(2) without regard to political affiliation and solely on the basis of fitness to perform the duties of the position involved.

SEC. 2. Three positions of private on the Capitol Police for duty under the House of Representatives are abolished.

SEC. 3. Until otherwise provided by law, there shall be paid out of the contingent fund of the House of Representatives such sums as may be necessary to carry out this resolution.

SEC. 4. Any individual who, on the date on which this resolution is agreed to, is detailed to the Capitol Police from the Metropolitan Police of the District of Columbia and is serving as acting captain of the Capitol Police for duty under the House of Representatives shall receive compensation from the District of Columbia at the rate applicable to the rank of captain of the Metropolitan Police as long as such individual is so detailed and so serves.

Mr. MINISH (during the reading). Mr. Speaker, I ask unanimous consent that the resolution be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from New Jersey?

Mr. FRENZEL. Mr. Speaker, reserving the right to object, I do so only to allow the distinguished subcommittee chairman to make such explanation as he would feel appropriate.

AMENDMENT OFFERED BY MR MINISH

Mr. MINISH. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MINISH: On page 2, strike out line 16 and all that follows through the end of the resolution.

Mr. MINISH. Mr. Speaker, the first section of this resolution establishes three permanent positions on the Capitol Police Force. One position is that of deputy chief, one of inspector, and one of sergeant. At the same time, section 2 abolishes three positions of private from the Capitol Police rolls. Section 3 of this resolution provides for payment of the positions from the contingent fund until permanent funding is available.

Section 4 of the resolution will be deleted by the pending amendment which was suggested by Hon. GARY LEE, ranking minority member of the committee. The amendment has the concurrence of the Sergeant at Arms of the House and the Chief of Police.

The SPEAKER pro tempore. The gentleman from New Jersey is now debating on his amendment. The gentleman has 1 hour.

Mr. FRENZEL. Mr. Speaker, will the gentleman yield?

Mr. MINISH. I yield for debate purposes only.

Mr. FRENZEL. I thank the gentleman for yielding.

Mr. Speaker, this bill has cleared our committee with the blessings of both the majority and minority, and I think it should be promptly passed without further discussion.

Mr. ANNUNZIO. Mr. Speaker, I rise in support of House Resolution 244, as offered by the distinguished gentleman from New Jersey, on behalf of the Committee on House Administration. It is designed to protect this House. It is sensible and should be adopted.

What House Resolution 244 does is improve the supervision and leadership of our Capitol Police Force. It shortens the odds against terrorist and criminal elements who might do violence to this House.

We have come a long way toward professionalizing our police force since the day in 1971 when a bomb exploded in the Senate wing; and, further still, since that fateful day in 1954 when Puerto Rican dissidents fired from the gallery above us spilling Members' blood on this very floor.

Today we have a professional recruitment and promotional system, second only to a few big city police departments. We have a special operations unit for use in times of disturbances and disorders. We have a modern communications system. We have a patrol detail consisting of foot patrolmen, K-9 patrols, scout car patrols, as well as motorbike patrols. We have a well-trained photographic and identification section, as well as an investigation division.

I am happy to report that, after years of hard work and close attention by the Subcommittee on Personnel and Police to the needs of the force, we have raised the level of competence and professional expertise of our Capitol Police to the point that our force is close if not the equal of any other law enforcement agency in our country.

But, while the force has grown in sophistication and specialization, so too has the requirement for qualified command and supervisory positions to lead it. House Resolution 244 helps in meeting this requirement.

The price of liberty, it is said, is eternal vigilance. On this Hill, vigilance is provided by our police. In this sovereign jurisdiction they are our Army, Navy, Air Force, and Marines. We are talking about the safety of this Hill's inhabitants, and the safety of the approximately 5 million visitors who come to see us each year.

I am proud of the record of our police force. Few crimes of violence occur within its territory while all around us there is a dangerously high crime rate in the District of Columbia.

We can knock on wood. We have been relatively secure in our congressional facilities. But, if we walk 3 blocks off our Hill, we run a serious risk of being mugged. Several Members and Senators have been victims of such crimes.

Terrorist violence is an every constant danger. The recent tragic event in Egypt should be a warning. The lives of public officials everywhere are in jeopardy. The current year has been marked by a large number of assassination attempts on prominent figures around the world, including one almost successful attempt against our President. A goodly number who have been assassinated were parliamentary and other elected officials of importance to their countries.

On this Hill, because we have a completely democratic tradition, we live in a uniquely open society. All have access to our Halls and Grounds and we hope to keep it that way. The price is vigilance. The quality of that vigilance is improved by passage of House Resolution 244. I urge its adoption.

Mr. MINISH. I thank the gentleman, and I yield back the balance of my time.

The SPEAKER pro tempore. Is there objection to the original request of the gentleman from New Jersey?

There was no objection.

Mr. MINISH. Mr. Speaker, I move the previous question on the amendment and on the resolution.

The previous question was ordered.

The amendment was agreed to.

The resolution, as amended, was agreed to.

The title was amended so as to read: "Resolution providing for upgrading of three positions on the Capitol Police."

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. MINISH. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the resolution just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

AMENDING ACT TO DEFINE AREA OF U.S. CAPITOL GROUNDS

Mr. MINISH. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 1976) to amend the act of July 31, 1946, as amended (40 U.S.C. 193a), and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

Mr. FRENZEL. Mr. Speaker, reserving the right to object, I do so again to allow the distinguished subcommittee chairman to give a brief description of the bill. I yield to the gentleman from New Jersey.

Mr. MINISH. Mr. Speaker, I thank the gentleman for yielding. The bill merely formalizes the existing protective forces of the Capitol Police. It will cost no additional money and require no additional people.

Mr. FRENZEL. Further reserving the right to object, that is my understanding of the bill as well. There is no additional expense, and I therefore withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1976

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the Act entitled "An Act to define the area of the United States Capitol Grounds, to regulate the use thereof, and for other purposes", approved July 31, 1946, as amended (40 U.S.C. 193a), is amended by inserting immediately after section 9 thereof the following new section:

"SEC. 9A. (a) subject to the direction of the Capitol Police Board, the United States Capitol Police is authorized to protect, in any area of the United States, the person of any Member of Congress, officer of the Congress, as defined in section 431 of the Act of October 26, 1970 (2 U.S.C. 60-1(b)), and any member of the immediate family of any such member or officer, if the Capitol Police Board determines such protection to be necessary.

"(b) In carrying out its authority under this section, the Capitol Police Board, or its designee, is authorized, in accordance with regulations issued by the Board pursuant to this section, to detail, on a case-by-case basis, members of the United States Capitol Police to provide such protection as the Board may determine necessary under this section.

"(c) In the performance of their protective duties under this section, members of the United States Capitol Police are authorized (1) to make arrests without warrant for any offense against the United States committed in their presence, or for any felony cognizable under the laws of the United States if they have reasonable grounds to believe that the person to be arrested has committed or is committing such felony; and (2) to utilize equipment and property of the Capitol Police.

"(d) Whoever knowingly and willfully obstructs, resists, or interferes with a member of the Capitol Police engaged in the performance of the protective functions authorized by this section, shall be fined not more than $300 or imprisoned not more than one year, or both.

"(e) Nothing contained in this section shall be construed to imply that the authority, duty, and function conferred on the Capitol Police Board and the United States Capitol Police are in lieu of or intended to supersede any authority, duty, or function imposed on any Federal department, agency, bureau, or other entity, or the Metropolitan Police of the District of Columbia, involving the protection of any such Member, Officer, or family member.

"(f) As used in this section, the term 'United States' means each of the several States of the United States, the District of Columbia, and territories and possessions of the United States.".

(b) Section 1114 of title 18, United States Code, is amended by inserting immediately after "any officer or employee of the Secret Service or of the Drug Enforcement Administration," the following: "any officer or member of the United States Capitol Police".

The Senate bill was ordered to be read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

DIRECTING DOCUMENTATION OF THE VESSEL "CAPT TOM" AS VESSEL OF THE UNITED STATES

Mr. JONES of North Carolina. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 1797) to direct the Secretary of the department in which the U.S. Coast Guard is operating to cause the vessel *Capt Tom* to be documented as a vessel of the United States so as to be entitled to engage in the coastwise trade with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment as follows:

Strike out all after the enacting clause and insert:

That, notwithstanding the provisions of section 27 of the Merchant Marine Act of 1920 (46 U.S.C. 883) or any other provision of law to the contrary, the Secretary of the department in which the United States Coast Guard is operating shall cause the vessels *Capt Tom,* owned by Mr. John W. Coston of Hampstead, North Carolina, and the *Yardarm Knot,* owned by Mr. Denton Sherry of Seattle, Washington, to be documented as vessels of the United States, upon compliance with the usual requirements, with the privilege of engaging in the coastwise trade and fishing so long as such vessels are owned by a citizen of the United States.

Mr. JONES of North Carolina (during the reading). Mr. Speaker, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

Mr. CHENEY. Mr. Speaker, reserving the right to object, I do so to inquire whether or not this bill has been cleared with the minority on the committee?

Mr. JONES of North Carolina. Mr. Speaker, on November 17, the House passed H.R. 1797, a private bill. The bill directs the Secretary of the Department in which the Coast Guard is operating to cause the vessel, *Capt Tom,* to be documented as a vessel of the United States. Such documentation will entitle the *Capt Tom* to engage in the coastwise trade. The owner will use it as a fishing boat.

Yesterday, the Senate passed H.R. 1797, as amended. The Senate amendment deals with a second vessel, the *Yardarm Knot.* The Senate amendment will provide for the *Yardarm Knot* to be documented as a vessel of the United States for engaging in the coastwise trade and fishing.

The *Yardarm Knot* was sold from the National Defense Reserve Fleet with the then usual restriction precluding its use for fishing and transportation. This restriction was in compliance with section 510 of the Merchant Marine Act of 1936, as amended. Eventually, the *Yardarm Knot* was registered under a foreign flag and used for seafood processing.

Last year, in Public Law 96-260, Congress lifted the fisheries restriction for vessels, such as the *Yardarm Knot,* previously sold from the reserve fleet. However, since the *Yardarm Knot* had been registered under a foreign flag, the Jones Act now prohibits it from being returned to the U.S. flag for the purposes of engaging in the coastwise trade or fishing. Thus, the Senate amendment to H.R. 1797 allows the *Yardarm Knot* to be registered in the United States and engage in the coastwise trade and fishing.

Mr. Speaker, we have looked at the amendment and have no difficulty in accepting. I urge approval of H.R. 1797 as amended.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina to dispense with further reading of the amendment?

There was no objection.

The SPEAKER pro tempore. Is there objection of the initial request of the gentleman from North Carolina?

There was no objection.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. JONES of North Carolina. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the matter just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

INTERNATIONAL BANKING FACILITY DEPOSIT INSURANCE ACT

Mr. ST GERMAIN. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 4879), to clarify the treatment of

international banking facility deposits for purposes of deposit insurance assessments and to remove certain limitations on the mortgage loan purchase authority of the Federal Home Loan Mortgage Corporation and the Federal National Mortgage Association, with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendment as follows:

Page 4, after line 18, insert:

(b)(1) Section 305(a)(2) of the Federal Home Loan Mortgage Corporation Act (12 U.S.C. 1454(a)(2)) is amended by inserting after the third sentence thereof the following: "With respect to any transaction in which a seller contemporaneously sells mortgages originated more than one year old prior to the date of sale to the Corporation and receives in payment for such mortgages securities representing undivided interests only in those mortgages, the Corporation shall not impose any fee or charge upon an eligible seller which is not a member of a Federal Home Loan Bank which differs from that imposed upon an eligible seller which is such a member.".

(2) The amendment made by paragraph (1) shall take effect on January 1, 1982, and shall apply to commitments entered into on or after such date.

Page 4, line 19, strike out "(b)" and insert "(c)".

Page 5, after line 11, insert:

TITLE III—MISCELLANEOUS

SEC. 301. Section 625(a) of the Depository Institutions Deregulation and Monetary Control Act of 1980 is amended to read as follows:

"SEC. 625. (a) Except as provided in section 608(b), the amendments made by this title shall take effect upon the expiration of two years and six months after the date of enactment of this title.".

SEC. 302. Section 206 of the Depository Institution Management Interlocks Act is amended to read as follows:

"SEC. 206. (a) A person whose service in a position as a management official began prior to the date of enactment of this title and who was not immediately prior to the date of enactment of this title in violation of section 8 of the Clayton Act is not prohibited by section 203 or section 204 of this title from continuing to serve in that position for a period of ten years after the date of enactment of this title. The appropriate Federal banking agency (as set forth in section 209) may provide a reasonable period of time for compliance with this title, not exceeding fifteen months, after any change in circumstances which makes service described in the preceding sentence prohibited by this title, except that a merger, acquisition, increase in total assets, establishment of one or more offices, or change in management responsibilities shall not constitute changes in circumstances which would make such service prohibited by section 203 or section 204 of this title.

"(b) Effective on the date of enactment of this title, a person who serves as a management official of a company which is not a depository institution or a depository holding company and as a management official of a depository institution or a depository holding company is not prohibited from continuing to serve as a management official of that depository institution or depository holding company as a result of that company which is not a depository institution or depository holding company becoming a diversified savings and loan holding company as that term is defined in section 408(a) of the National Housing Act. This subsection shall expire ten years after the date of enactment of this title.".

SEC. 303. Section 313 of the Depository Institutions Deregulation and Monetary Control Act of 1980 is amended to read as follows:

"ALASKA USA FEDERAL CREDIT UNION

"SEC. 313. The provisions of section 5 of the charter of the Alaska USA Federal Credit Union which would terminate the eligibility for membership in the Credit Union of the enrollees and employees of certain corporations shall not be effective.".

SEC. 304. The fourth sentence of section 235(h)(1) of the National Housing Act is amended—

(1) by inserting "(i)" after "except";

(2) by striking out "or" after "March 31, 1982," the second place it appears and inserting in lieu thereof "(ii)"; and

(3) by inserting before the period after "1974" the following: ", or (iii) pursuant to other commitments issued on or before September 30, 1981, where housing under this section is to be developed on land which was municipally owned on September 30, 1981, and where a local government contributes at least $1,000 per unit of funds obtained under title I of the Housing and Community Development Act of 1974 and at least $2,000 per unit of additional funds to assist housing under this section".

Mr. ST GERMAIN (during the reading). Mr. Speaker, I ask unanimous consent that the title and Senate amendments be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman for Rhode Island?

Mr. STANTON of Ohio. Mr. Speaker, reserving the right to object, I yield to the gentleman from North Carolina (Mr. JOHNSTON).

Mr. JOHNSTON. Mr. Speaker, could we have a little explanation of this?

Mr. STANTON of Ohio. Is this the same legislation that we had previously?

Mr. ST GERMAIN. Yes, it is.

Mr. STANTON of Ohio. Identical to what we have been discussing for the last hour?

Mr. ST GERMAIN. Yes.

Mr. JOHNSTON. With the exception that there has been a withdrawal of section 5? What changes have been made?

Mr. STANTON of Ohio. There have been no changes made.

Mr. ST GERMAIN. No changes made, but I will be happy to explain any of the Senate amendments that might be of concern to the gentleman.

Mr. STANTON of Ohio. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Rhode Island?

There was no objection.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ST GERMAIN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the legislation just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Rhode Island?

HOUSE VOTES MORE FOREIGN AID BUT LESS FARM AID

(Mr. VOLKMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. VOLKMER. Mr. Speaker, Members of the House, I think we should reflect on the day's activities and what has occurred and what is going to occur in relation to the budgetary process. As we all know, we have just passed the foreign aid appropriations in which there was a 17-percent increase over 1981, $1.1 billion more than 1981.

Recently, earlier this year, we passed the agriculture appropriations bill. There was a 30-percent cut in agriculture appropriations for our farmers, and the reduction was from $3.3 billion for commodity support programs to $2.043.

So, what it means is that this House has voted to increase foreign aid for persons overseas, while voting to cut back on our own farmers. We are going to have another vote yet later this evening on the farm bill. That also does cut back on commodities and support prices at a time when prices are all depressed, and I ask each Member to vote against the farm bill when it comes up for the vote.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Saunders, one of his secretaries, who also informed the House that on December 15, 1981, the President approved and signed a joint resolution of the House of the following title:

H.J. Res. 370. Joint resolution making further continuing appropriations for the fiscal year 1982, and for other purposes.

YESTERDAY'S ACTION ON ALLOWABLE OUTSIDE INCOME FOR MEMBERS

(Mrs. SCHNEIDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mrs. SCHNEIDER. Mr. Speaker, yesterday, the House without any prior announcement and with no debate at all, approved a resolution to double the amount of allowable outside income each Member may receive.

I deplore such tactics. As an original cosponsor of H.R. 1585, a bill to reduce all Members' salaries by 8 percent until the Congress can produce a budget in balance, I strongly oppose the resolution to increase allowable outside income. Had proper debate been allowed and a vote been taken, I would have strongly opposed this resolution and voted against it.

The House, as well as the other body, is well known for its tendency to "slide" special interest legislation through in the confusion surrounding the rush of business as adjournment nears. This unfortunate and inappropriate move will only serve to lessen the quality of debate of this body and bring justifiable contempt from our constituents.

OUTSIDE ALLOWABLE INCOME OF MEMBERS

(Mr. DENARDIS asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. DENARDIS. Mr. Speaker, I wish to express my opposition to the measure approved yesterday to increase the amount of outside allowable income.

U.S. PREPAREDNESS BOLSTERED BY YESTERDAY'S ACTION ON DEFENSE APPROPRIATION BILL

(Mr. SKELTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SKELTON. Mr. Speaker, yesterday, we passed the Defense appropriation bill. This measure will help us to be better prepared—or ready—and makes significant strides toward that end.

George Washington once said "There is nothing so likely to produce peace as to be well prepared." It is no less true today. The key to U.S. preparedness is the readiness of our conventional forces. We must give immediate priority to supplies, training, spare parts, ammunition, and other items which come under the rather unglamorous heading of "Operations and Maintenance." The readiness of existing forces is our best deterrent.

We should be ever mindful that the nation that has an army that is prepared, in all probability, will not have to use it. Readiness is the bulwark to peace, and this bill takes us a step closer to that end.

□ 1520

OUTSIDE EARNED INCOME FOR HOUSE MEMBERS

(Mr. KAZEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KAZEN. Mr. Speaker, I was temporarily away from the floor yesterday when the House by voice vote agreed to House Resolution 305, amending the rules of the House of Representatives to increase the amount of outside earned income which a Member may accept. This amendment was not on the House schedule for discussion yesterday and many Members, including myself, had no way of knowing that it would come before the House when it did.

Had I been present, I would have requested a rollcall vote on the measure and I would have voted against it—as I did on the same issue last October 28 when the House defeated it by a vote of 271 to 147 and just as I have opposed on several occasions pay increase for Members of Congress.

Given the economic situation in this country, I do not believe it is proper and the American people do not accept such action by the House at this time. I believe the majority of the Members of Congress oppose this resolution and I, for one, regret the circumstances under which this resolution was adopted. Had there been a rollcall, I believe it would have been defeated, as it should have been.

TRIBUTE TO MR. EDGAR A. JONES OF HAWAII

(Mr. AKAKA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. AKAKA. Mr. Speaker, it is an honor and a privilege for me to recognize and pay tribute to a friend and an outstanding citizen who has unselfishly devoted his service and leadership to the people of Hawaii, and who has distinguished himself time and again through his volunteer contributions to the community.

Edgar A. Jones, or Ed, as he is known to his many friends, is an outstanding model of the truly dedicated community volunteer. During the past decade, he has actively involved himself in numerous community projects by taking the time and effort to promote the happiness and welfare of those around him. His contributions to society have been gratefully recognized with his appointment as Outstanding Male Senior Citizen of the State of Hawaii by the Older American Recognition Program, member of the Joe Kappler Senior Citizen Hall of Fame, Senior Citizen of the Year by the Sertoma Club of Pearl Harbor, chairman of the City and County of Honolulu Senior Citizen Advisory Committee, and honorary mayor of Kaneohe from 1970 to 1979.

I have had the pleasure to work with Ed on both a personal and professional level. Last year, as my delegate, Ed joined more that 225 other active older Americans in Washington, D.C., to participate in the annual Congressional Senior Citizen Intern Program. Along with his fellow colleagues, Ed had the opportunity to observe the legislative process first-hand as well as to attend a series of briefings on subjects of particular interest such as health care, social security, housing, transportation, consumer protection, and legislation affecting the elderly.

Ed has long been recognized throughout the community and the State of Hawaii as a dedicated volunteer and has distinguished himself through his outstanding public service. Recently our State house of representatives formally commended Ed for his many contributions to both the residents of Kaneohe, where he lives, and the people of Hawaii. Along with that award, Ed was presented with another certificate of merit, commending the Kaneohe Community Senior Citizen's Council for its effective management and operation of the Kaneohe Community and Senior Center, the only known senior center that is managed and operated by the senior citizens themselves on a volunteer basis. Ed, who is the chairman of the council, is one of the key figures who made the establishment of the Kaneohe Community and Senior Center a reality, he got the site and the funds for the center.

Thanks to the patience and persistence of Ed and the members of the senior citizen's council, a beautiful senior citizen center was approved in 1976, built in 1977-78, and dedicated on March 2, 1978. Additional buildings, one a multipurpose building and the other an arts and crafts building, were also completed and dedicated on January 31, 1981. With the expanded facilities, the Kaneohe Community and Senior Center now provides many more programs to serve the community. It has promoted an increase in senior citizen participation in community affairs, provided Kaneohe's senior citizens with excellent facilities and resources.

The Kaneohe Senior Citizen Center is just one example of Ed's contribution to the State. His list of accomplishments reaches as far back as the 1930's, when Ed first arrived here in Hawaii.

Ed is originally from the State of Georgia, where he was born on November 30, 1905. He and his wife, Tomoe, have 4 boys, 2 girls, 12 grandchildren and 1 great grandchild.

During World War II, Ed served in Europe, Korea, and Japan. Then he

settled here and adopted Hawaii as his home State. Ed spent 28 years in the U.S. Army, then retired with the rank of major on November 30, 1955, from the Tripler Army Hospital. Upon retiring, he immediately went to work for Queen's Hospital, now known as the Queen's Medical Center. Two and a half years later, he resigned to become the very first employee of the Kaiser Foundation Hospital, now known as the Kaiser Medical Center. After 13 years of service with the hospital, Ed once again retired. Shortly thereafter he continued on a full-time basis his life-long avocation as a volunteer public servant.

In addition to his positions in various community organizations, Ed is also actively involved with the Kaneohe Rotary Club, the Kaneohe Business Group, the Kaneohe Outdoor Circle, the Pearl Harbor Sertoma Club, the Kokokahi United Church of Christ, the Kaneohe's Annual Christmas Festival Committee, the Kapunahala Community Association, and the Kaneohe Community Council. He has received numerous awards for his service, and was recently named Kaneohe's Citizen of the Year and Citizen of the Decade in recognition of his long and active involvement in community affairs.

At age 75, Ed shows no sign or intention of slowing down or even taking the time out to receive the proper congratulations and thanks he so fully deserves. On behalf of the U.S. Congress and thousands of other outstanding active older Americans, I would like to extend my fondest aloha, mahalo, and congratulations to Mr. Ed Jones for his unselfish devotion and service to the community and wish him continuing success and happiness in the years to come.

1982—NATIONAL YEAR OF DISABLED PERSONS

(Mr. WINN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WINN. Mr. Speaker, 1981, as you know, was designated as the International Year of Disabled Persons. This generated a tremendous outpouring of concern and interest on the part of disabled and nondisabled persons all over the world. Not only have attitudes changed, but people working together have made progress toward their long-term goals, one of which is expanded application of technology to minimize the effects of disability.

I recently introduced House Joint Resolution 354 which would designate 1982 as the National Year of Disabled Persons. This would continue the momentum that has been building during this past year. It is important, I believe, to assure the continuity of a movement which owes its strength to self-help and private sector initiatives. It is particularly important to take note of this in light of increasing budgetary restraints when people are being called upon to do more for themselves. My legislation involves no money whatsoever.

Interest and commitment remain high among the many groups involved in the promotion of the International Year of Disabled Persons throughout the United States. While the IYDP will end officially on December 31, all indications point to a desire on the part of these individuals to maintain and enhance the themes of partnership and community-based, grassroots efforts that have dominated 1981 in improving the lives of 35 million Americans with disabilities.

Mr. Speaker, I am very pleased that over 115 of my colleagues from both sides of the aisle have signed on as cosponsors to House Joint Resolution 354. However, we need 218 in order for the House to have the opportunity to consider this legislation. I ask those of you that have so far not added your name as a cosponsor to my legislation to consider doing so. Successful passage of it would serve as a powerful symbol for those who have worked so long and hard on the behalf of disabled Americans and who want to continue what they have begun.

ONE NATION—INDIVISIBLE

(Mr. DUNN asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. DUNN. Mr. Speaker, curing the economic problems of Michigan and other northern industrial States will require both creative solutions and unprecedented cooperation. My colleague, Mr. PURSELL of Michigan, has taken a very thoughtful and pragmatic leadership role in this effort. His recent speech to the New England Society of Newspaper Editors and Publishers is an outstanding analysis of this dilemma, and I include his remarks in the RECORD, as follows:

ONE NATION—INDIVISIBLE

(By CARL D. PURSELL)

It is certainly an honor for this Congressman from Michigan to bring his message to this gathering of the distinguished New England Society of Newspaper Editors and Publishers. The topic at hand requires the critical examination, broad perspective, and practical application characteristic of editors and publishers: A group known for getting to the point and demanding appropriate action.

Ironically, it may have been one of our most well-known editors and publishers whose words are most associated with the problems of the Northeast/Midwest region. Everyone remembers the words of the New York Tribune's Horace Greeley when he said, "Go west, young man . . ." Those words were more than advisory. They were prophetic.

From now until the year 2000, the Census Bureau expects the population of the so-called "Sun Belt" to grow at a rate four times that of the 18 states of the Northeast and Midwest. The real reason, as you know, is not climate, but jobs. And while employment opportunities grow in the South and West, the capital investment that creates jobs, is lagging in our region. During the past decade, capital investment in the Sun Belt was nearly twice that of the Northeast/Midwest.

Some of the so-called experts have witnessed this trend and proclaimed it inevitable, as though it were some kind of modern extension to the concept of "manifest destiny." And seeing these developments in those terms, these experts have solemnly advised the people of our region to stop their economic suffering forthwith and move to where the jobs are. I think we would all question such advice.

You may not recall as readily another savored quote of Horace Greely—"The illusion that times that were are better than those that are, has probably pervaded all ages." I strongly believe that it is also an illusion to think that the times to be will not be better than those that are. In short, the best days for our region are ahead of us, not in the golden days of the past.

By and large, jobs are where you make them, and with the proper, balanced concern for the needs of the nation at large we can stand and act in accordance with that fact. A continental country such as ours can do no less, for it would make powerful little sense to move generation after generation of Americans across our great land mass in quest of an elusive and ever-changing job market. Such a policy would not only be economically infective, but just plain inhumane.

Our very history argues against it. Decades ago, the Federal government began to pursue a deliberate policy of investing billions of dollars in the economic revival of the South and development of the West. Massive amounts of dollars were poured into rural electrification projects like TVA, port construction, military bases, defense projects, space programs, oil subsidies, tobacco and peanuts allotments, and on and on.

The great Northeast and Midwest peoples never thought to question this policy because they were and are, above all else, Americans with the greater interest of their nation at heart. They never once thought that their own prosperity would suffer for having extended the hand of the federal government on behalf of their fellow Americans in other regions.

But the times, they are a-changing. The moment has come to realize that, in economic terms, the West has been won and the South has been reconstructed. Now it is time to draw a lesson from history and be reminded that what worked for the South and West will also work for the North and Midwest, which is ravished by an industrial complex badly in need of reconstruction and modernization.

Needless to say, our region desperately requires the industrial revenue base needed to rebuild its cities and to modernize its aging network of bridges, road, water and sewer systems. Yet despite these gaping needs, the 18 states of the Northeast and Midwest collectively sent $165 billion more of their treasure to Washington than they got back between 1975 and 1979. My state of Michigan gets back about 66 cents for every dollar going to our nation's capital.

If we continue as we have, we face an economic balkanization that will serve no one's best interests—least of all the nation's. One of the most vital tests for America today is whether we can frame a rational national economic development plan, and in so doing, avoid the terrible pitfall of creating economic upheavals that pit one region against another.

The truth is, our various regions are parts of a single, economic whole. They are dependent on one another, with each offering unique strengths and special resources the others lack. The 18 states of the Northeast and Midwest spend too much time emphasizing problems, rather than proclaiming how much we have to offer that the nation needs and can benefit from. For example:

The Great Lakes, St. Lawrence system, and other sources provide the world's largest supply of fresh water;

A vast, expensive infrastructure, including huge plant capacities and an integrated transportation system, is in place and capable of serving millions of people in large cities and smaller communities in an effective manner at far less than the cost of replacing it from the ground up;

Our varied terrain provides opportunity for a wide assortment of activities, while a continuous round of changing seasons presents excellent working conditions; (I might add at this point that the nickname "Frost Belt" is a misnomer, for our climate is among the most temperate in the world.)

Minerals, timber, and other raw materials are abundant throughout, and a varied mix of oil, gas, coal and hydroelectric energy remain in plentiful supply;

Soil, climate, and other factors enable the region to not only feed its people, but to export food and fiber throughout the world;

We have some of the world's finest schools, unparalleled research capabilities, and a strong feeling of individual pride and community loyalty that cannot be measured.

The region's greatest resource is, of course, its people—a skilled and motivated work force ready and willing to continue making productive contributions in existing industries, while ready to meet the special demands of new technologies.

In Congress, I have been working primarily through two groups in an effort to secure equitable treatment of all regions by the federal government and to promote the positive contributions our region can make to the Nation. First, the bipartisan Northeast/Midwest Congressional Coalition of which I am a member of the Steering Committee and Co-Chairman of its Budget Task Force. Secondly, an ad hoc group of Northern Republicans, commonly referred to as the "Gypsy Moths," of which I am Chairman.

Most of the efforts of these two groups this year—like those of Congress—have centered around President Reagan's Economic Recovery Program. As you undoubtedly know, I actively support the basic components of the President's program and voted for the key implementing legislation when it came before the House of Representatives. Namely, reducing federal spending so as to beat inflation and bring down interest rates; reducing individual and business taxes to provide investment capital and leave more money in the hands of workers; and working to develop a bigger national economic pie, rather than struggling over a shrinking pie that sets region against region and interest group against interest group.

While strongly supporting the President's "bottom line," I believe that a certain amount of negotiating should take place in order to avoid certain regional distortions and other difficulties. For example, I had introduced legislation to phase in the tax cut over a five-year period, rather than three years. My greatest concerns related to the regional effects of rapidly raising defense spending, while significantly decreasing domestic programs.

Meanwhile, conservative Southern Democrats, now known as the "Boll Weevils," continue their traditional demands as the price for votes on key legislation. Year after year, no matter who is President, the "Boll Weevils" fight for three basic areas of immense benefit to their region—(1) Public Works, (2) Oil tax breaks, and (3) Defense spending.

Let me give a typical example of each of these areas. (1) The controversial Tennessee-Tombigee Project—a waterway running parallel to the Mississippi River—received Administration support and the House passed its fiscal year 1982 appropriations by a vote of 208 to 198. It is estimated that this project alone will eventually cost about $3 billion. (2) Oil tax breaks in the Economic Recovery Act, including exemptions to the Windfall Profits tax, will cost over $12 billion during the next three years. (3) The Administration's "5-year defense plan" calls for $1.46 trillion through fiscal year 1986.

This is a particular boon to the Sun Belt, as 80 percent of all DoD employees are concentrated in the South and West. California and Georgia alone have more than all of the 18 states in our region combined. In fact, over the last decade, defense department employment in the Northeast/Midwest actually declined by about 30 percent.

It is our view that several billion dollars could be shifted from the proposed increase in defense to needed domestic programs of vital importance to our region, while not in any way harming national security. In fact, such a move could be helpful. Before completing his term of office earlier this year, the distinguished Comptroller General (Elmer B. Staats) identified up to $10 billion in DoD mismanagement and waste. The House Republican Research Committee has outlined "as much as $25 billion" savings through reductions in waste, fraud, abuse, along with a restructuring of the procurement process."

In addition, we are concerned that a too rapid increase in defense spending could even have a harmful effect on the military. Experts have predicted shortages of skilled labor in defense industries—especially in the South, capacity will be strained, and managerial oversight stretched thin, resulting in substantial costs overruns.

While my Coalition and "Gypsy Moth" colleagues generally agree that a responsible trimming of the defense request will focus needed attention on the best way to achieve a truly effective military and strengthen defense by strengthening the economy, there is less agreement on what domestic programs should be given the greatest emphasis. This is due to the great diversity within our region. The priorities of downtown Manhattan are often not the same as those of the hills of Vermont. We found that out when we tried to help Jim Jeffords get that tax credit for wood burning stoves.

Nevertheless, we have had modest success during the past year in negotiating for the region. For example:

President Regan personally pledged to me his support for continuation of a $3.4 billion test program targeting defense spending to high unemployment areas— the so-called "Maybank Program."

The Administration agreed to shift approximately $2.7 billion in budget priorities in the "Omnibus Reconciliation Act" enacted in August from that originally called for in the Spring. This included funds for health (Medicaid), education (student loans, vocational education, youth training), transportation (Amtrak, Conrail, and mass transit), as well as for energy conservation programs, such as low income energy assistance and weatherization projects.

Provisions were added to the tax bill to encourage rehabilitation of existing plants (rather than moving operations to the South and West), cooperative research and develop activities between private industry and universities, and special tax treatment of tools used in automobile production.

I am proud of our work and I am thankful for the progress we have made. But it is only a beginning, representing a relatively small part of the effort needed to ensure lasting success.

So much of our work has been simply to retain what I call maintenance programs, such as food stamps, school lunches, health care, unemployment benefits and others vitally important, but which do not contribute directly to our future growth and development. Needless to say, we must continue this work, but it must also be expanded. CETA positions must be replaced by productive jobs in the private sector, not welfare benefits. Health research must provide answers that replace health care benefits with preventative health practices. High technology applications must supply the jobs laid off autoworkers cannot find on the assembly line. If people are to live productive lives in the intercity they must be able to provide themselves with adequate housing, transportation, and education.

As a County Commissioner, I struggled with these issues, hoping that the property tax, along with revenues from state and federal government, would provide the resources for meeting local needs.

As a State Senator, I struggled with the same problems, but from a slightly different perspective. That time, I hoped that the income and sales taxes, coupled with Uncle Sam's contributions, would balance the budget.

Now as a Member of Congress, I find that I am looking for answers to the same problems, from yet another perspective.

While each level of government is working toward many of the same goals, there exists a profound degree of fragmentation and isolation. Particular federal programs may or may not meet the peculiar needs of a certain community, but the mayor or City Manager grabs whatever federal funds are available and works them into a patchwork of federal, state and local revenues in an effort to meet a strained budget.

State officials present their federal budget priorities, not in terms of which programs are most effective, but which ones will provide the most dollars, as they work desperately to balance their budgets. Meanwhile, Members of Congress are presented with such a vast array of demands and corresponding programs that they can hardly keep up with their content and legislative status, to say nothing of their implementation.

Unfortunately, government officials do not have a monopoly on this parochial method for dealing with problems. Competition and lack of communication are often the rule in relations between labor and management, private industry and the schools producing future employees, and, yes, occa-

sionally even between leaders of the press and the communities they serve.

Where 'O where do we stop and take a coordinated look at the needs of a particular community or region and develop a comprehensive plan for its development and operation? Instead we continue living in a vacuum from year to year with little planning on a long-term basis, and even less coordination among related jurisdictions.

In my view, if we truly are to deal with our problems in an effective manner, we must address the chaotic situation I have just described. We must do it by region within states, and we must do it by region within the United States.

In that regard, I would like to share briefly with you two proposals I have advanced.

Together with the Detroit News, I have suggested a statewide leadership conference in my home state of Michigan to serve as a catalytic mechanism for key decisionmakers to sit down together and hammer out a comprehensive agenda. It would consist of a working group of 60-75 people—large enough to reflect the spectrum of Michigan's people and interests, but small enough to allow meaningful interaction with one another. Some years ago, I organized a similar broad-based conference to set an agenda for the future of communities around my home town. It has been extremely successful in identifying goals and producing results.

Secondly, I discussed with President Reagan and subsequently presented the White House with a draft of a proposal for creation of a "Northeast/Midwest Economic Advisory Council." The general purpose of which would be to assemble Members of Congress, Governors, Mayors, and other representatives of each level of government (federal, state, and local) within the region to advise the President and Congress with respect to the federal government's role in helping meet the problems of the Northeast/Midwest, as well as in the development and use of the area's vast resources.

I see four main functions of such a council. It would—

(1) Serve as the government's focal point in considering the NE/NW's regional implications of federal policy;

(2) Gather information necessary from public and private sources for meaningful consideration of these implications;

(3) Serve as a vehicle by which representatives of the private sector, as well as public officials, can interact with federal personnel during the policy making process; and

(4) Advise the President and Congress on a continuing basis, issuing formal reports when appropriate.

This is, of course, just one proposal. And I welcome your reactions to it, as well as challenge you to come forth with any other creative ideas for affecting the decisionmaking process in such a way as to best serve simultaneously the interests of our region and the Nation as well. It is essential that this goal be met.

To everyone's good fortune, the economy of the Sun Belt will continue to thrive. But that growth does not require the continued decline of our region. Over time, the supposed advantages of the Sun Belt may pale. More growth means more population, more urban problems, increased taxes, additional pollution, etc. * * *

CANDLELIGHT PRAYER VIGIL IN WASHINGTON FOR THE PEOPLE OF POLAND

(Mr. CARMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CARMAN. Mr. Speaker, while we must always seek freedom for man, we must never pemit liberties to be taken with man's freedom. I invite you and every Member of Congress to join me in a candlelight prayer vigil at the statue of the famed Polish patriot Thaddeus Kosciusko in Lafayette Park. Please join me at some time between 8 p.m. and midnight to light a candle and say a prayer for those seeking freedom to determine their own destiny, especially the freedom loving people of Poland.

In the last year great strides have been made by Solidarity on behalf of the union and the entire Polish nation. In less than 4 days that has been destroyed. Therefore, let us take the call of this holy season of peace on Earth and extend it to all seasons. I can see no more fitting manner to begin our holiday season than to remind ourselves of our duty to our fellow man and our commitment to the principles which we hold so dear. We have only to believe in ourselves and our fellow man. Our prayers on behalf of the people of Poland can make this a season of joy, a season of hope, and most especially a season of freedom and peace.

THE UPCOMING DEBATE ON THE FARM BILL

(Mr. JEFFORDS asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. JEFFORDS. Mr. Speaker, I would like to take this 1 minute to talk a little bit about the farm bill.

Notwithstanding the fact that our count shows and our "secret intelligence" shows as to the other side shows there are more Members opposed to the farm bill conference report than in favor of it. However the Members may get a wrong impression when it comes to the debate because we that oppose the report do not control the time. I may get a couple of minutes to talk about it, even though I am one of the leaders against it and was on the conference.

I would like to stress that that is the way it stands right now. There are a lot of Members who are undecided on the farm bill, and I do not want them to get the wrong impression or to be confused by the lack of time we will have for debate. There has been a great deal of misleading information that if we vote down the report it will result in disaster for our farmers.

First, let me point out that there are not going to be a lot of farmers who will be planting corn, wheat, and peas during January when we are out of session.

Second, we are operating on an extension, holding things as they are since October 1. We can do this again. In fact, we went 2 weeks in October without any bill at all, and that was a more critical period than this one. No disaster occurred.

Nothing will happen if we turn the report down. There will be no crisis. If we wait under next year, we will have a chance to debate the issue properly and come out with a more reasonable farm bill.

Mr. Speaker, I hope the Members will listen to those who are opposed to the bill during the few minutes we will have, and that they will listen carefully to all the debate on the farm bill. I am sure you will vote down the report.

NEW LEGISLATION WOULD SUBJECT CONGRESS TO CERTAIN NATIONAL LAWS

(Mr. JOHNSTON asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. JOHNSTON. Mr. Speaker, I have today introduced legislation which would require the Congress of the United States to come under the provisions of the EEOC, OSHA, and the wage and hour laws of this country.

As a part of the continuing resolution, we saw fit to permit deductibility of our expenses in accordance with the provisions of the Internal Revenue Code, just like other businessmen. I think we should continue the process and treat ourselves like other members of the working public, and then we would have to comply with the wage and hour provisions, we would have to comply with the mandates of OSHA, and most especially, we would make ourselves vulnerable to the provisions of the EEOC when we discharge people over 40 from our employment and discharge Members of minority groups. If we were required to fill out all the forms and affidavits that we impose on the private sector then we might appreciate their problems.

Mr. Speaker, let us impose on ourselves the same rules that we apply to others. Let us treat Congress like the American people for a change. I welcome cosponsors.

SATURDAY MARKS FIRST ANNIVERSARY OF RECORD HIGH PRIME INTEREST RATE

(Mr. LUNGREN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LUNGREN. Mr. Speaker, the News Futures section of Congressional Insight is filled with a number of interesting facts.

One of these facts is the anniversary that CQ cites for Saturday, December 19. That day will mark the first anniversary of the day when, under the remarkable shepherdry of former President Carter, the prime interest rate hit a record 21½ percent.

I find this especially interesting in light of the fact that, if one were to read the popular press or listen to some of our colleagues, one would think that the present administration has created the economic woes that beset the country and that President Reagan was drawing us further down into the morass.

Such statements are puzzling because the real fact is that the prime interest rate today is at 15½ percent—for sure that is by no means an ideal but it certainly is better than the 21½-percent level.

The fact is that most of the negative economic trends of the Carter years have been arrested and are turning around.

The prime has dropped by a full 5 points during the President's first year in office. Let us give credit where credit is due and let us not let our judgment be clouded by conveniently forgetting where the economy was at just 1 year ago today.

TRUTH IN LENDING SIMPLIFICATION ACT POSTPONED BY HOUSE ACTION

(Mr. PARRIS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PARRIS. Mr. Speaker, the House just a few moments ago adopted H.R. 4879 or S. 1720, one or both of them, the International Banking Facility Act, and that was the right result.

Under the bizarre procedure under which we are operating here this afternoon, by unanimous consent, it simply requires one objection to kill the legislation. I did not object because I have the highest possible regard for the ranking member, the gentleman from Ohio (Mr. STANTON), and I want to cooperate with the committee chairman. However, Mr. Speaker, one of the amendments to that legislation would postpone for 6 months the effective date of the regulations concerning the Truth in Lending Simplification Act.

□ 1530

The truth in lending regulations which were 6 months late in being promulgated by the Federal Reserve Board is the problem here. Those regulations are the subject of considerable consternation and expense for millions of small businesses in this Nation.

I am happy to report to the House that assurances have been received that further deferral of such simplification would not be accepted. This Member of Congress for one would certainly oppose any further delay in simplification of the truth in lending laws.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. PARRIS. I yield to my colleague from California.

Mr. ROUSSELOT. In other words, we have delayed for another 6 months the putting in place of the reduction of unnecessary rules and regulations; is that correct?

Mr. PARRIS. Apparently.

Mr. ROUSSELOT. Apparently.

POLAND

(Mr. MOFFETT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOFFETT. Mr. Speaker, the Polish people need us today. They need us badly. No, it is not that we can do so much directly for them. In fact, we are frustrated by how relatively little we can actually do.

So much about the situation in Poland is unknown. The Communists are once again forced to show the failure of their system. They are being forced to show the world that crackdowns are inevitable in such a system.

It is natural that people want to be free. It is natural that sooner or later they will express that desire. There is no people more desirous of freedom than the Polish people. They have shown it throughout history, as they fought valiantly for freedom. And they have shown it during the past months through Solidarity and other freedom movements within Poland.

So now there is a ban on gatherings, on processions, on demonstrations. Even artistic, entertainment, and sporting events require state approval. It is illegal to disseminate any publications, any information. Shortwave radios are being confiscated. There is a nationwide curfew from 10 p.m. to 6 a.m.

We do not know what the reaction of Solidarity is to this martial law. We do not know the specific status of Walesa and other union leaders. Solidarity now includes over half of Poland's 19 million workers.

But we can guess what has become of these people. If they are not in custody, they are no doubt continuing to organize, to resist in some way. The point is that the authorities will pay a price for this. The Soviets will pay a price as well. There is no such thing as a free ride when you are running roughshod over freedom.

Back in my State of Connecticut and in my congressional district, Polish-Americans are worried. They are restless. They are angry. While there may be all too little we can do directly to help the Polish freedom fighters, we must begin to take steps that might be of some help in the months ahead.

To the extent that immigration laws can be made more flexible, to permit political refugees to enter America, it must be done. To the extent that diplomatic channels can be used to convince Austria and other nations to absorb more fleeing Poles, that must be done as well.

And we must clarify our country's position on aid, especially food aid. It is my belief that an abrupt cutoff of food aid is terribly unwise at this point. It sends the wrong signal to the Polish people. Some say that it is a way of punishing the government, but there is no doubt that the government officials always have food on their tables anyway. So who are we punishing with such a sudden cutoff of aid?

Mr. Speaker, perhaps somehow our words in this Chamber will be quoted in some underground paper in Poland. Perhaps Radio Free Europe or Voice of America will get through to let the Polish people know that we in this House and those we represent are not going to forget them. They have not forgotten the importance of freedom. They have dared to fight for freedom. We must in turn not dare forget them.

LOW KEY MARTIAL LAW IN POLAND?

(Mr. BETHUNE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BETHUNE. Mr. Speaker, on Monday a front page newspaper story tried to tell us that the Soviets are acting with restraint and that the trouble in Poland is really caused by the Polish people or the Polish Government and that it is an internal problem. I thought that was an interesting piece of fiction until this morning when I saw the headline on the front page of the newspaper which said that this is "low key martial law in Poland." Low key martial law? When they allow no one in and no one out of the country? When there is a total news blackout? When there are 5,000 magnificent Poles arrested and detained? When there is a midnight raid on the Solidarity headquarters? When they threaten the death penalty and crush strikes and impose curfews?

Soviet restraint? Low key martial law? That is a distinction too delicate for this country boy from Arkansas to follow.

I do not think the Soviets are acting with restraint and as far as I am con-

cerned there is no such thing as low key martial law.

CUTBACKS IN INSPECTORS RISK LIVES OF COAL MINERS

(Mr. SIMON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SIMON. Mr. Speaker, the fatality toll in our coal mines this year is the worst it has been since 1975. Coal mining is the most dangerous major profession we have in the United States. So far this year 143 coal miners have lost their lives in mining accidents, 24 of them in the last 2 weeks.

We have a good safety law on the books. That law requires that every mine be inspected four times a year. But, in fact if we end up cutting back on the number of inspectors, if we cut back on the enforcement of a law that is, in theory, a good one, we are then gambling with the lives of the coal miners of this Nation.

I hope we do not proceed down that path.

TRUTH-IN-LENDING LEGISLATION

(Mr. STANTON of Ohio asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STANTON of Ohio. Mr. Speaker, a couple of minutes ago in the well of the House our colleague from Virginia (Mr. PARRIS) brought up the subject of these changes in the truth-in-lending legislation. I simply want to back him up on these proposed and needed, vitally needed changes. It is one of the most important things we can do for our financial industry.

I assure the gentleman that this spring we will get into considering a major overhaul of these financial institutions. I cannot conceive of coming out of that process without some legislation that would address problems which exist today with truth-in-lending legislation. I compliment the gentleman for his remarks.

Mr. PARRIS. Mr. Speaker, will the gentleman yield?

Mr. STANTON of Ohio. I yield to the gentleman from Virginia.

Mr. PARRIS. As the gentleman pointed out, I mean no criticism of any kind of the committee or any Members of this Congress. The problem here is the staff of the Federal Reserve Board took 18 months to promulgate the regulations which simply cannot be complied with by the financial community of this Nation.

Mr. STANTON of Ohio. I appreciate the gentleman's contribution.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to the provisions of clause 5 of rule I, the Chair announces that he will postpone further proceeding today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

Such rollcall votes, if postponed, will be taken later today.

BLACK LUNG BENEFITS REVENUE ACT OF 1981

Mr. ROSTENKOWSKI. Mr. Speaker, I move to suspend the rules and concur in the Senate amendment to the bill (H.R. 5159) to amend the Internal Revenue Code of 1954 to provide a temporary increase in the tax imposed on producers of coal, and for other purposes.

The Clerk read the Senate amendment, as follows:

Strike out all after the enacting clause and insert:

TITLE I—AMENDMENTS TO THE INTERNAL REVENUE CODE OF 1954

Subtitle A—Black Lung Benefits Revenue Provisions

SEC. 101 SHORT TITLE; AMENDMENT OF 1954 CODE.

(a) SHORT TITLE.—This subtitle may be cited as the "Black Lung Benefits Revenue Act of 1981".

(b) AMENDMENT OF 1954 CODE.—Except as otherwise expressly provided, whenever in this subtitle or subtitle B an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

SEC. 102. TEMPORARY INCREASE IN AMOUNT OF TAX.

(a) GENERAL RULE.—Section 4121 (relating to tax on coal) is amended by adding at the end thereof the following new subsection.

"(e) TEMPORARY INCREASE IN AMOUNT OF TAX.—

"(1) IN GENERAL.—Effective with respect to sales after December 31, 1981, and before the temporary increase termination date—

"(A) subsection (a) shall be applied—

"(i) by substituting '$1' for '50 cents', and

"(ii) by substituting '50 cents' for '25 cents', and

"(B) subsection (b) shall be applied by substituting '4 percent' for '2 percent'.

"(2) Temporary increase termination date.—For purposes of paragraph (1), the temporary increase termination date is the earlier of—

"(A) January 1, 1996, or

"(B) the first January 1 after 1981 as of which there is—

"(i) no balance of repayable advances made to the Black Lung Disability Trust Fund, and

"(ii) no unpaid interest on such advances.".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to sales after December 31, 1981.

SEC. 103. BLACK LUNG DISABILITY TRUST FUND.

(a) GENERAL RULE.—The Internal Revenue Code of 1954 is amended by adding at the end thereof the following new subtitle:

"Subtitle I—Trust Fund Code

"SEC. 9500. SHORT TITLE.

"This subtitle may be cited as the 'Trust Fund Code of 1981'.

"Chapter 98—Trust Fund Code

"Subchapter A. Establishment of Trust Funds.

"Subchapter B. General provisions.

"Subchapter A—Establishment of Trust Funds

"Sec. 9501. Establishment of Black Lung Disability Trust Fund.

"SEC. 9501. Establishment of Black Lung Disability Trust Fund..

"(a) CREATION OF TRUST FUND.—

"(1) IN GENERAL.—There is established in the Treasury of the United States a trust fund to be known as the 'Black Lung Disability Trust Fund', consisting of such amounts as may be appropriated or credited to the Black Lung Disability Trust Fund.

"(2) TRUSTEES.—The trustees of the Black Lung Disability Trust Fund shall be the Secretary of the Treasury, the Secretary of Labor, and the Secretary of Health and Human Services.

"(b) TRANSFER OF CERTAIN TAXES; OTHER RECEIPTS.—

"(1) TRANSFER TO BLACK LUNG DISABILITY TRUST FUND OF AMOUNTS EQUIVALENT TO CERTAIN TAXES.—There are hereby appropriated to the Black Lung Disability Trust Fund amounts equivalent to the taxes received in the Treasury under section 4121 or subchapter B of chapter 42.

"(2) CERTAIN REPAID AMOUNTS, ETC.—The following amounts shall be credited to the Black Lung Disability Trust Fund:

"(A) Amounts repaid or recovered under subsection (b) of section 424 of the Black Lung Benefits Act (including interest thereon).

"(B) Amounts paid as fines or penalties, or interest thereon. under section 423, 431, or 432 of the Black Lung Benefits Act.

"(C) Amounts paid into the Black Lung Disability Trust Fund by a trust described in section 501 (c) (21).

"(c) REPAYABLE ADVANCES.—

"(1) AUTHORIZATION.—There are authorized to be appropriated to the Black Lung Disability Trust Fund, as repayable advances, such sums as may from time to time be necessary to make the expenditures described in subsection (d).

"(2) REPAYMENT WITH INTEREST.—Repayable advances made to the Black Lung Disability Trust Fund shall be repaid, and interest on such advances shall be paid, to the general fund of the Treasury when the Secretary of the Treasury determines that moneys are available in the Black Lung Disability Trust Fund for such purposes.

"(3) RATE OF INTEREST.—Interest on advances made pursuant to this subsection shall be at a rate determined by the Secretary of the Treasury (as of the close of the calendar month preceding the month in which the advance is made) to be equal to the current average market yield on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the anticipated period during which the advance will be outstanding.

"(d) EXPENDITURES FROM TRUST FUND.—Amounts in the Black Lung Disability Trust Fund shall be available, as provided by appropriation Acts, for—

"(1) the payment of benefits under section 422 of the Black Lung Benefits Act in any case in which the Secretary of Labor determines that—

"(A) the operator liable for the payment of such benefits—

"(i) has not commenced payment of such benefits within 30 days after the date of an initial determination of eligibility by the Secretary of Labor, or

"(ii) has not made a payment within 30 days after that payment is due,

except that, in the case of a claim filed on or after the date of the enactment of the Black Lung Benefits Revenue Act of 1981, amounts will be available under this subparagraph only for benefits accruing after the date of such initial determination, or

"(B) there is no operator who is liable for the payment of such benefits,

"(2) the payment of obligations incurred by the Secretary of Labor with respect to all claims of miners or their survivors in which the miner's last coal mine employment was before January 1, 1970,

"(3) the repayment into the Treasury of the United States of an amount equal to the sum of the amounts expended by the Secretary of Labor for claims under part C of the Black Lung Benefits Act which were paid before April 1, 1978, except that the Black Lung Disability Trust Fund shall not be obligated to pay or reimburse any such amounts which are attributable to periods of eligibility before January 1, 1974,

"(4) the repayment of, and the payment of interest on, repayable advances to the Black Lung Disability Trust Fund,

"(5) the payment of all expenses of administration on or after March 1, 1978—

"(A) incurred by the Department of Labor or the Department of Health and Human Services under part C of the Black Lung Benefits Act (other than under section 427(a) or 433), or

"(B) incurred by the Department of the Treasury in administering subchapter B of chapter 32 and in carrying out its responsibilities with respect to the Black Lung Disability Trust Fund,

"(6) the reimbursement of operators for amounts paid by such operators (other than as penalties or interest) before April 1, 1978, in satisfaction (in whole or in part) of claims of miners whose last employment in coal mines was terminated before January 1, 1970, and

"(7) the reimbursement of operators and insurers for amounts paid by such operators and insurers (other than amounts paid as penalties, interest, or attorney fees) at any time in satisfaction (in whole or in part) of any claim denied (within the meaning of section 402(i) of the Black Lung Benefits Act) before March 1, 1978, and which is or has been approved in accordance with the provisions of section 435 of the Black Lung Benefits Act.

For purposes of the preceding sentence, any reference to section 402(i), 422, or 435 of the Black Lung Benefits Act shall be treated as a reference to such section as in effect immediately after the enactment of this section.

"Subchapter B—General Provisions

"Sec. 9601. Transfer of amounts.

"Sec. 9602. Management of Trust Funds.

"SEC. 9601. TRANSFER OF AMOUNTS.

"The amounts appropriated by any section of subchapter A to any Trust Fund established by such subchapter shall be transferred at least monthly from the general fund of the Treasury to such Trust Fund on the basis of estimates made by the Secretary of the Treasury of the amounts referred to in such section. Proper adjustments shall be made in the amounts subsequently transferred to the extent prior estimates were in excess of or less than the amounts required to be transferred.

"SEC. 9602. MANAGEMENT OF TRUST FUNDS.

"(a) REPORT.—It shall be the duty of the Secretary of the Treasury to hold each Trust Fund established by subchapter A, and (after consultation with any other trustees of the Trust Fund) to report to the Congress each year on the financial condition and the results of the operations of each such Trust Fund during the preceding fiscal year and on its expected condition and operations during the next 5 fiscal years. Such report shall be printed as a House document of the session of the Congress to which the report is made.

"(b) INVESTMENT.—

"(1) IN GENERAL.—It shall be the duty of the Secretary of the Treasury to invest such portion of any Trust Fund established by subchapter A as is not, in his judgment, required to meet current withdrawals. Such investments may be made only in interest-bearing obligations of the United States. For such purpose, such obligations may be acquired—

"(A) on original issue at the issue price, or

"(B) by purchase of outstanding obligations at the market price.

"(2) SALE OF OBLIGATIONS.—Any obligation acquired by a Trust Fund established by subchapter A may be sold by the Secretary of the Treasury at the market price.

"(3) INTEREST ON CERTAIN PROCEEDS.—The interest on, and the proceeds from the sale or redemption of, any obligations held in a Trust Fund established by subchapter A shall be credited to and form a part of the Trust Fund.".

(b) REPEAL OF SUBSECTIONS (A), (B), AND (C) OF SECTION 3 OF THE BLACK LUNG BENEFITS REVENUE ACT OF 1977.—Subsections (a), (b), and (c) of section 3 of the Black Lung Benefits Revenue Act of 1977 are hereby repealed.

(c) CLERICAL AMENDMENTS.—

(1) Clause (iii) of section 501(c)(21)(B) is amended by striking out "established under section 3 of the Black Lung Benefits Revenue Act of 1977" and inserting in lieu thereof "established under section 9501".

(2) The table of subtitles for such Code is amended by adding at the end thereof the following new item: "Subtitle I. Trust Fund Code.".

(d) EFFECTIVE DATE.—

(1) IN GENERAL.—The amendments made by this section shall take effect on January 1, 1982. Section 9501(c)(3) of the Internal Revenue Code of 1954 (as added by subsection (a)) shall only apply to advances made after December 31, 1981.

(2) SAVINGS PROVISIONS.—The Black Lung Disability Trust Fund established by the amendments made by this section shall be treated for all purposes of law as the continuation of the Black Lung Disability Trust Fund established by section 3 of the Black Lung Benefits Revenue Act of 1977. Any reference in any law to the Black Lung Disability Trust Fund established by such section 3 shall be deemed to include a reference to the Black Lung Disability Trust Fund established by the amendments made by this section.

SEC. 104. AMENDMENTS TO SECTION 424 OF THE BLACK LUNG BENEFITS ACT.

(a) INTEREST ON OPERATOR LIABILITIES.—

(1) RATE OF INTEREST.—Subsection (b) of section 424 of the Black Lung Benefits Act is amended by adding at the end thereof the following new paragraph:

"(5) The rate of interest under this subsection—

"(A) for any period during calendar year 1982, shall be 15 percent, and

"(B) for any period after calendar year 1982, shall be the rate established by section 6621 of the Internal Revenue Code of 1954 which is in effect for such period.".

(2) CLARIFYING AMENDMENT.—The first sentence of section 424(b)(1) of the Black Lung Benefits Act is amended by inserting "plus interest thereon" after "attributed to him".

(3) EFFECTIVE DATE.—The amendment made by paragraph (1) shall take effect on January 1, 1982, and shall apply to accounts outstanding on such date or arising thereafter.

(b) CONFORMING AMENDMENTS.—

(1) Section 402(h) of the Black Lung Benefits Act is amended to read as follows:

"(h) The term 'fund' means the Black Lung Disability Trust Fund established by section 9501 of the Internal Revenue Code of 1954.".

(2) Section 415(a)(1) of the Black Lung Benefits Act is amended by striking "section 424 of this title" and inserting in lieu thereof "section 9501(d) of the Internal Revenue Code of 1954".

(3) Section 422(a) of the Black Lung Benefits Act is amended by striking "section 424" and inserting in lieu thereof "section 9501(d) of the Internal Revenue Code of 1954".

(4) Section 422(i)(4) of the Black Lung Benefits Act is amended by striking "section 424" and inserting in lieu thereof "section 9501(d) of the Internal Revenue Code of 1954".

(5) Section 422(j) of the Black Lung Benefits Act is amended by striking "section 424 shall" and inserting in lieu thereof "section 9501 of the Internal Revenue Code of 1954 shall"; and by inserting "section 424(a)(1)" and inserting in lieu thereof "section 9501(d)(1) of the Internal Revenue Code of 1954".

(6) Section 424(a) of the Black Lung Benefits Act is amended to read as follows:

"(a) For purposes of this section, the term 'fund' has the meaning set forth in section 402(h).".

Subtitle B—Miscellaneous Revenue Amendments

SEC. 111. ADDITIONAL 2-YEAR DELAY IN APPLICATION OF THE NET OPERATING LOSS RULES ADDED BY THE TAX REFORM ACT OF 1976.

Paragraphs (2) and (3) of section 806(g) of the Tax Reform Act of 1976 (relating to effective dates for the amendments to sections 382 and 383 of the Internal Revenue Code of 1954) are amended by striking out "1982" each place it appears and inserting in lieu thereof "1984".

SEC. 112. INFORMATION RETURNS WITH RESPECT TO SAFE HARBOR LEASES.

(a) REQUIREMENT OF RETURN.—

(1) IN GENERAL.—Except as provided in paragraph (2), paragraph (8) of section 168 (f) of the Internal Revenue Code of 1954 (relating to special rule for leases) shall not apply with respect to an agreement unless a return, signed by the lessor and lessee and containing the information required to be included in the return pursuant to subsection (b), has been filed with the Internal Revenue Service not later than the 30th day

after the date on which the agreement is executed.

(2) Special rules for agreements executed before January 1, 1982.—

(A) IN GENERAL.—In the case of an agreement executed before January 1, 1982, such agreement shall cease on February 1, 1982, to be treated as a lease under section 168(f)(8) unless a return, signed by the lessor and containing the information required to be included in subsection (b), has been filed with the Internal Revenue Service not later than January 31, 1982.

(B) FILING BY LESSEE.—If the lessor does not file a return under subparagraph (A), the return requirement under subparagraph (A) shall be satisfied if such return is filed by the lessee before January 31, 1982.

(3) CERTAIN FAILURE TO FILE.—If—

(A) a lessor or lessee fails to file any return within the time prescribed by this subsection, and

(B) such failure is shown to be due to reasonable cause and not due to willful neglect, the lessor or lessee shall be treated as having filed a timely return if a return is filed within a reasonable time after the failure is ascertained.

(b) INFORMATION REQUIRED.—The information required to be included in the return pursuant to this subsection is as follows:

(1) The name, address, and taxpayer identifying number of the lessor and the lessee (and parent company if a consolidated return is filed);

(2) The district director's office with which the income tax returns of the lessor and lessee are filed;

(3) A description of each individual property with respect to which the election is made;

(4) The date on which the lessee places the property in service, the date on which the lease begins and the term of the lease;

(5) The recovery property class and the ADR midpoint life of the leased property;

(6) The payment terms between the parties to the lease transaction;

(7) Whether the ACRS deductions and the investment tax credit are allowable to the same taxpayer;

(8) The aggregate amount paid to outside parties to arrange or carry out the transaction;

(9) For the lessor only: the unadjusted basis of the property as defined in section 168(d)(1);

(10) For the lessor only: if the lessor is a partnership or a grantor trust, the name, address, and taxpayer identifying number of the partners or the beneficiaries, and the district director's office with which the income tax return of each partner or beneficiary is filled; and

(11) Such other information as may be required by the return or its instructions.

Paragraph (8) shall not apply with respect to any person for any calendar year if it is reasonable to estimate that the aggregate adjusted basis of the property of such person which will be subject to subsection (a) for such year is $1,000,000 or less.

(c) COORDINATION WITH OTHER INFORMATION REQUIREMENTS.—In the case of agreements executed after December 31, 1982, to the extent provided in regulations prescribed by the Secretary of the Treasury or his delegate, the provisions of this section shall be modified to coordinate such provisions with the other information requirements of the Internal Revenue Code of 1954.

SEC. 113. EXPENSES IN CONNECTION WITH BUSINESS USE OF A HOME, ETC.

(a) RENTAL TO FAMILY MEMBERS AND SHARED EQUITY AGREEMENTS PERMITTED.—

(1) IN GENERAL.—Subsection (d) of section 280A (relating to disallowance of certain expenses in connection with business use of home, rental of vacation homes, etc.) is amended by redesignating paragraph (3) as paragraph (4) and by inserting after paragraph (2) the following new paragraph:

"(3) RENTAL TO FAMILY MEMBER, ETC., FOR USE AS PRINCIPAL RESIDENCE.—

"(A) IN GENERAL.—A taxpayer shall not be treated as using a dwelling unit for personal purposes by reason of a rental arrangement for any period if for such period such dwelling unit is rented, at a fair rental, to any person for use as such person's principal residence.

"(B) SPECIAL RULES FOR RENTAL TO PERSON HAVING INTEREST IN UNIT.—

"(i) RENTAL MUST BE PURSUANT TO SHARED EQUITY FINANCING AGREEMENT.—Subparagraph (A) shall apply to a rental to a person who has an interest in the dwelling unit only if such rental is pursuant to a shared equity financing agreement.

"(ii) DETERMINATION OF FAIR RENTAL.—In the case of a rental pursuant to a shared equity financing agreement, fair rental shall be determined as of the time the agreement is entered into and by taking into account the occupant's qualified ownership interest.

"(C) SHARED EQUITY FINANCING AGREEMENT.—For purposes of this paragraph, the term 'shared equity financing agreement' means an agreement under which—

"(i) 2 or more persons acquire qualified ownership interests in a dwelling unit, and

"(ii) the person (or persons) holding 1 or more of such interests—

"(I) is entitled to occupy the dwelling unit for use as a principal residence, and

"(II) is required to pay rent to 1 or more other persons holding qualified ownership interests in the dwelling unit.

"(D) QUALIFIED OWNERSHIP INTEREST.—For purposes of this paragraph, the term 'qualified ownership interest' means an undivided interest for more than 50 years in the entire dwelling unit and appurtenant land being acquired in the transaction to which the shared equity financing agreement relates.".

(2) DEFINITION OF QUALIFIED RENTAL PERIOD.—Subparagraph (B) of section 280A(d)(4) (defining qualified rental period), as redesignated by paragraph (1), is amended by striking out "to a person other than a member of the family (as defined in section 267(c)(4)) of the taxpayer".

(b) TREATMENT OF EXPENSES WHILE AWAY FROM HOME IN PURSUIT OF TRADE OF BUSINESS.—

"(1) IN GENERAL.—Subsection (f) of section 280A is amended by adding at the end thereof the following new paragraph:

"(4) COORDINATION WITH SECTION 162(A)(2), ETC.—

"(A) IN GENERAL.—Nothing in this section shall be construed to disallow any deduction allowable under section 162(a)(2) (or any deduction which meets the tests of section 162(a)(2) but is allowable under another provision of this title) by reason of the taxpayers being away from home in the pursuit of a trade or business (other than the trade or business of renting dwelling units).

"(B) LIMITATION.—The Secretary shall prescribe amounts deductible (without substantiation) pursuant to the last sentence of section 162(a), but nothing in subparagraph (A) or any other provision of this title shall permit such a deduction for any taxable year of amounts in excess of the amounts determined to be appropriate under the circumstances."

(c) PRINCIPAL PLACE OF BUSINESS APPLIES TO ANY TRADE OR BUSINESS.—Subparagraph (A) of section 280A (c)(1) (relating to certain business use) is amended to read as follows:

"(A) the principal place of business for any trade or business of the taxpayer.".

(d) REPAIR AND MAINTENANCE OF DWELLING UNIT.—The last sentence of paragraph (2) of section 280A (d) (relating to personal use of residence) is amended by inserting ", except that if the taxpayer is engaged in repair and maintenance on a substantially full time basis for any day, such authority shall not allow the Secretary to treat a dwelling unit as being used for personal use by the taxpayer on such day merely because other individuals who are on the premises on such day are not so engaged" after "paragraph".

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1975, except that in the case of taxable years beginning after December 31, 1975 and before January 1, 1980, the amendment made by this section shall apply only to taxable years for which, on the date of the enactment of this Act, the making of a refund, or the assesssment of a deficiency, was not barred by law or any rule of law.

TITLE II—BENEFITS AMENDMENTS

SHORT TITLE; GENERAL REFERENCE

SEC. 201. (a) This title may be cited as the "Black Lung Benefits Amendments of 1981".

(b) Except as otherwise specifically provided, whenever in this title an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Black Lung Benefits Act.

ELIGIBILITY STANDARDS

SEC. 202. (a) The fourth sentence of subsection (b) of section 413 is amended by inserting immediately after the words "In any case" a comma and the following: "other than that involving a claim filed on or after the effective date of the Black Lung Benefits Amendments of 1981,".

(b)(1) Paragraphs (2) and (4) of subsection (c) of section 411 are each amended by inserting a new sentence at the end of each as follows: "The provisions of this paragraph shall not apply with respect to claims filed on or after the effective date of the Black Lung Benefits Amendments of 1981.".

(2) Paragraph (5) of subsection (c) of section 411 is amended by inserting a new sentence at the end thereof as follows: "The provisions of this paragraph shall not apply with respect to claims filed on or after the day that is 180 days after the effective date of the Black Lung Benefits Amendments of 1981.".

(c) The third sentence of subsection (b) of section 413 is amended by inserting immediately after the word "affidavits" a comma and the following: "from persons not eligible for benefits in such case with respect to claims filed on or after the effective date of the Black Lung Benefits Amendments of 1981,".

(d) Section 430 is amended by striking the words "and by" and inserting in lieu thereof a comma, and by inserting immediately after the phrase "the Black Lung Benefits Reform Act of 1977" the phrase "and the Black Lung Benefits Amendments of 1981".

(e) The Secretary of Labor, in consultation with the Secretary of Health and Human Services, shall undertake a study of

current medical methods for the diagnosis of pneumoconiosis, and of the nature and extent of impairment and disability that are attributable to the existence of both simple and complicated pneumoconiosis. The study, together with appropriate recommendations, shall be transmitted to the Congress no later than eighteen months after the effective date of this title.

BENEFITS

SEC. 203. (a)(1) Section 412(a)(2) is amended by inserting immediately after the word "or" a comma and the following: "except with respect to a claim filed under part C of this title on or after the effective date of the Black Lung Benefits Amendments of 1981,".

(2) Section 412 (a)(3) is amended by striking the first comma therein, and by inserting immediately after the word "or" the second time it appears therein a comma and the following: "except with respect to a claim filed under part C of this title on or after the effective data of the Black Lung Benefits Amendments of 1981,".

(3) Section 412(a)(5) is amended by striking out the second comma therein, by striking out the phrase "of a miner" the third time it appears therein, and by inserting immediately after the word "or" the second time it appears therein a comma and the following: "except with respect to a claim filed under part C of this title on or after the effective date of the Black Lung Benefits Amendments of 1981,".

(4) Section 401 (a) is amended by striking the phrase "or who were totally disabled by this disease at the time of their deaths" each time it appears.

(5) Section 411 (a) is amended by inserting immediately after the word "or" a comma and the following: "except with respect to a claim filed under part C of this title on or after the effective date of the Black Lung Benefits Amendments of 1981,".

(6) Section 422 (l) is amended by inserting immediately before the period at the end thereof a comma and the following: "except with respect to a claim filed under this part on or after the effective date of the Black Lung Benefits Amendments of 1981,".

(b) Subsection (g) of section 422 is amended by adding at the end thereof a new sentence as follows: "In addition, the amount of benefits payable under this section with respect to any claim filed on or after the effective date of the Black Lung Benefits Amendments of 1981 shall be reduced, on a monthly or other appropriate basis, by the amount by which such benefits would be reduced on account of excess earnings of such miner under section 203 (b) through (l) of the Social Security Act if the amount paid were a benefit payable under section 202 of such Act.".

(c) The Secretary of Labor shall undertake a study of the benefits provided by the Black Lung Benefits Act, other benefits received by individuals who receive benefits under that Act, and benefits which would be received were State workers' compensation programs applicable in lieu of benefits under that Act. The study, together with appropriate recommendations, shall be transmitted to the Congress no later than eighteen months after the effective date of this title.

(d) Paragraph (1) of subsection (a) of section 412 is amended by deleting the phrase "50 per centum of the minimum monthly payment to which a Federal employee in grade GS-2, who is totally disabled, is entitled at the time of payment under chapter 81 of title 5, United States Code" and inserting in lieu thereof the phrase "37½ per centum of the monthly pay rate for Federal employees in grade GS-2, step 1".

INTEREST CHARGES

SEC. 204. Subsection (d) of section 422 is amended by adding two new sentences at the end thereof as follows: "If payment is not made within the time required, interest shall accrue to such amounts at the rates set forth in section 424(b)(5) of this title for interest owed to the fund. With respect to payments withheld pending final adjudication of liability, in the case of claims filed on or after the effective date of the Black Lung Benefits Amendments of 1981, such interest shall commence to accumulate 30 days after the date of the determination that such an award should be made.".

SPECIAL CLAIMS

SEC. 205. (a)(1) Subsection (c) of section 422 is amended by inserting "(1)" after "pneumoconiosis", and by inserting before the period at the end thereof a semicolon and the following: "or (2) which was the subject of a claim denied before March 1, 1978, and which is or has been approved in accordance with the provisions of section 435".

(2) Subsection (j) of section 422 is amended by striking out "or" at the end of paragraph (1), by striking out the period at the end of paragraph (2) and inserting in lieu thereof "; or", and by adding at the end thereof the following:

"(3) in which there was a claim denied before March 1, 1978, and such claim is or has been approved in accordance with the provisions of section 435.".

(b) Section 402 is amended by inserting at the end thereof the following new paragraph:

"(i) For the purposes of subsections (c) and (j) of section 422, and for the purposes of paragraph (7) of subsection (d) of section 9501 of the Internal Revenue Code of 1954, the term 'claim denied' means a claim—

"(1) denied by the Social Security Administration; or

"(2) in which (A) the claimant was notified by the Department of Labor of an administrative or informal denial more than 1 year prior to the date of enactment of the Black Lung Benefits Reform Act of 1977 and did not, within 1 year from the date of notification of such denial, request a hearing, present additional evidence or indicate an intention to present additional evidence, or (B) the claim was denied under the law in effect prior to the date of enactment of the Black Lung Benefits Reform Act of 1977 following a formal hearing or administrative or judicial review proceeding.".

EFFECTIVE DATE; SEPARABILITY

SEC. 206. (a) Except as otherwise provided, the provisions of this title shall take effect on January 1, 1982.

(b) If any provision of this title, or the application of such provision to any person or circumstance, shall be held invalid, the remainder of this title, or the application of such provision to persons or circumstances other than those to which it is held invalid, shall not be affected thereby.

The SPEAKER pro tempore. Is a second demanded?

Mr. CONABLE. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Illinois (Mr. ROSTENKOWSKI) will be recognized for 20 minutes, and the gentleman from New York (Mr. CONABLE) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Illinois (Mr. ROSTENKOWSKI).

Mr. ROSTENKOWSKI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 5159, the Black Lung Benefits Revenue Act of 1981 was approved by the House yesterday by voice vote. The Senate has returned the bill to us with an amendment in the nature of a substitute. As chairman of the Committee on Ways and Means, it is my recommendation that the House concur in the Senate amendment and clear the measure for the President's signature.

As passed by the House yesterday, H.R. 5159 only contained those matters regarding the black lung disability program which fall within the jurisdiction of the Committee on Ways and Means. It is important that these changes to the program take effect on January 1, 1982, in order to begin the process of returning the trust fund to fiscal solvency. These provisons include a temporary doubling of the excise taxes on coal, changes to the interest rates to be charged on payments due to or by the trust fund, some adjustments to the obligations of the trust fund, and conforming amendments to standardize and modernize the trust fund language.

The Senate amendment to H.R. 5159 first makes technical revisions to the revenue provisions of the House bill. The revenue provisions are contained in title I of the bill, and are withing the jurisdiction of the Committee on Ways and Means.

Second, the Senate amendment adds provisions which revise the present benefit structure and eligibility standards under the black lung disability program. These provisions are contained in title II of the bill, and are within the jurisdiction of the Committee on Education and Labor.

Third, the Senate amendment adds several miscellaneous tax provisions which are similar to provisions approved by the House yesterday in H.R. 4961 and H.R. 4717.

Specifically, the Senate has included, with minor modifications, the provisions of H.R. 4717 approved by the House yesterday which require the timely filing of information returns on the so-called safe harbor lease transactions entered into under the terms of the Economic Recovery Tax Act of 1981. These information returns are necessary for both the Treasury Department and the Congress to evaluate the recently enacted leasing rules. The information will permit an assessment of the economic efficiency of the

leasing provisions as well as their impact on tax receipts. Under the terms of this provision, a lease will not qualify for favorable tax treatment unless an information return is filed not later than the 30th day after the lease agreement is executed, or January 31, 1982, whichever is later. It is the intention of this provision that the information required in the return reflect the terms of the lease at the time the agreement was signed.

The Senate has also included two tax provisions similar to two sections of title I of H.R. 4961, the Miscellaneous Revenue Act, approved by the House yesterday. The first provides for a 2-year deferral of the effective date of rules enacted in the Tax Reform Act of 1976 which limit net operating loss carryovers of certain corporations that undergo a substantial change of ownership—code section 382. In the absence of this deferral, these provisions will take effect on January 1, 1982. Further delay is needed in order to resolve technical problems with the provisions.

The second Senate provision contains changes similar to those approved by the House in H.R. 4961 regarding section 280A of the Internal Revenue Code which presently restricts the ability of taxpayers to take deductions in connection with homes and other dwelling units that are used for personal purposes. As I described yesterday in connection with H.R. 4961, this provision redefines what is considered to be "personal use" and coordinates the provisions of code section 280A with code section 162 and other provisions of present law. In addition, the Senate provision addresses issues concerning the home office rules, personal use rules for maintenance and repair of rental properties, and changes the effective date of the House bill.

In the first continuing resolution, the Congress decided that Members of Congress should be treated the same as other businessmen when they are away from home overnight in pursuit of their trade or business. Taxpayers, in general, may only deduct those expenses that are reasonable and necessary in the conduct of the taxpayer's business and directly attributable to it. If a taxpayer's spouse accompanies him on a business trip, the cost of meals, lodging, and transportation attributable to her presence generally are not deductible.

When the Congress passed the amendment on Members' expenses as part of the continuing resolution earlier this year, it overestimated some of the technical problems that Members would encounter. The Senate amendment establishes a compromise between those who demand that Members be treated like other businessmen and those who do not wish to receive so great a benefit. The amendment requires the Treasury Department to determine an appropriate amount which Members may deduct, without substantiation, for away-from-home business expenses.

Mr. Speaker, I urge the House to approve the Senate amendment to H.R. 5159 so that the bill can be enacted in a timely fashion.

Mr. Speaker, I yield such time as he may consumer to the gentleman from Kentucky (Mr. Perkins).

Mr. PERKINS. Mr. Speaker, I rise in support of the motion to suspend the rules and pass H.R. 5159 with the Senate amendment. I will not repeat the remarks I made yesterday in support of the House initial passage of this bill concerning the importance of making the black lung trust fund solvent. Suffice it to say that the Senate amendment does not alter the increases in the coal tonnage tax as the bill passed the House yesterday.

The Senate amendment has added provisions transferring certain claims to the trust fund and making changes in eligibility criteria. As I have indicated on several occasions, while I support the passage of this legislation, I have some concern that some of these changes may be too stringent.

With respect to the administration's operation of the program, the Education and Labor Committee of the House will continue to monitor it very closely to determine the effect of the changes we are making by the passage of this legislation today.

I do want to stress the intent of the framers of this legislation with respect to the so-called unrelated death benefits issue.

A question has been raised regarding the proper interpretation of the provisions in the bill relating to the availability of survivor's benefits in those cases where the miner's death is unrelated to pneumoconiosis. We have been very concerned about the authority in current law to pay survivor's benefits in those situations; H.R. 5159, as amended by the Senate, reflects that concern by eliminating prospectively the authority to initiate benefit payments when that happens. The administration expressed these same concerns in Deputy Under Secretary of Labor Robert Collyer's testimony before the Senate Labor Subcommittee, December 14, 1981.

I want to emphasize, however, that it is not the purpose of H.R. 5159, as amended by the Senate, to deny survivor's benefits when complications of pneumoconiosis have caused a miner's death or where pneumoconiosis was a substantially contributing factor to that death. For example, pneumoconiosis may have been a substantially contributing cause of death in a case where the principal cause of death was pneumonia.

Of course, survivors would not be eligible for benefits in those situations where death was caused by a traumatic injury or an unrelated medical condition.

As a procedural matter, a survivor would initially file a claim for benefits. I understand that the Labor Department's claims examiners will be instructed to give all such claims the highest priority in developing the evidence necessary to reach a fair and prompt decision. Once the Labor Department has received medical evidence establishing that pneumoconiosis was the cause of death or a substantially contribtuing factor to the death, the survivor will receive benefits unless the weight of the evidence developed by the Labor Department's Deputy Commissioner or by a responsible operator establishes that the death was unrelated to pneumoconiosis. In cases involving a responsible operator, the burden would, of course, be on it to present medical evidence to rebut evidence by the survivor which otherwise would appear to establish eligibility for benefits.

It is my expectation that the Department of Labor would administer the new law in accordance with this explanation of the survivorship provisions.

At this point, Mr. Speaker, I ask that there be inserted in the RECORD the administration's explanation of the provisions of this bill as submitted by the administration to the Congress.

EXPLANATION OF BLACK LUNG AMENDMENTS OF 1981

SECTION 201

Short Title.

SECTION 202

Eligibility Standards: This section would eliminate from Part B and Part C five special provisions that we enacted to deal with a large group of miners and survivors who faced difficulty in proving eligibility for black lung benefits. These provisions were enacted to deal with claims involving periods of time when medical diagnoses were inadequate or not widely available, and poor medical and death records kept. There is no longer sufficient reason to keep these rules in place.

Subsection (a) of this section would eliminate for claims filed on or after the effective date the present restriction in Part B on the Department of Labor's authority to use a second opinion on x-rays that might indicate the absence of black lung disease. Subsection (d) would apply this change to Part C claims. This restriction was enacted as a reaction to what was considered to be an overly stringent eligibility policy in the past. Precluding any use at all of such rereadings, however, was not and is not the solution to such problems, and it in fact inhibits legitimate auditing of claim validity. This change in no way implies a policy of disapproving claims solely on the basis of a negative X-ray.

Subsection (b) would eliminate the application of 3 presumptions in Part B. Subsection (d) would make those changes applicable to Part C claims.

Paragraph (1) of subsection (b) would render inapplicable, to claims filed on or after the effective date a rebuttable pre-

sumption that a miner with 10 years of coal mine employment who died as a result of a respirable disease died as a result of black lung. The availability in recent years of better diagnosis prior to death makes continuation of this presumption unnecessary.

Paragraph (1) of subsection (b) would also render inapplicable, for all claims filed on or after the effective date, a rebuttable presumption of black lung for miners with 15 years of coal-mine employment. There remains no need for this presumption in light of the current availability of more accurate medical diagnoses.

Paragraph (2) of subsection (b) would render inapplicable, to claims filed more than six months after the effective date, a rebuttable presumption of eligibility of survivors of a miner who died on or before March 1, 1978 and who had 25 years in the coal mines prior to June 30, 1971. Few if any new claims by the survivors of miners who died before March 1, 1978 are expected in the future, and this presumption can therefore be eliminated.

Subsection (c) of this section would alter the rule set forth in Part B that a widow's affidavit shall be considered, where there is no medical or other relevant evidence in the case of a deceased miner, to be sufficient to establish that the miner was totally disabled due to pneumoconiosis or that death was due to that disease. Subsection (d) would apply this change to Part C claims. The revised rule would, with respect to claims filed on or after the effective date, accept affidavits in such cases from third parties who could not receive benefits, but would not accept as sufficient only affidavits from interested parties. Such third-party affidavits should be readily available, and will alleviate the potential for improper claims determination that exists under the present rule.

Subsection (e) would provide for a study of key eligibility criteria under the program: the existence of black lung disease, and the extent of disability that follows from that fact. The study would provide an overview of the current medical information in this regard, and would be provided to the Congress 18 months after the effective date.

SECTION 203

Benefits: This section would make several changes to the benefits provisions of the Act.

At present, survivors of miners who die while receiving black lung benefits or while totally disabled by the disease receive benefits without having to demonstrate a causal connection between the disease and the death. This section would, with respect to claims filed on or after the effective date of these amendments, limit survivors' entitlement to those cases where death resulted from black lung disease and not some unrelated event. Survivors of those miners who are currently receiving benefits, or who have filed for them, will not be affected by this change. These survivors will receive benefits even if the miner eventually dies from causes unrelated to black lung.

Some miners are able to engage in other employment while receiving black lung benefits because of the Act's definition of total disability. This section would also apply to Part C claims of miners filed on or after the effective date the Social Security excess earnings offset already applied in the case of Part B claimants. The offset provides that the benefits of a miner are reduced by a portion of other earnings during the period.

In addition, this section would require the Secretary of Labor to study benefits available to the same individual under this program and other social programs, such as workers' compensation, unemployment insurance, and so forth. Under the present law, black lung benefits are reduced by the amount of such benefits when they are awarded on account of pneumoconiosis, but not if awarded for other reasons. It would also entail a comparison of the situation were workers' compensation benefits paid in lieu of benefits under this program. The results of the study would be due to the Congress 18 months after the effective date.

Finally, this section would make a technical change to the Act's benefits provisions. Black Lung benefits are currently 50 percent of the "minimum" benefits for Federal employees in grade GS-2 under the Federal Employees' Compensation Act. Benefits under Black Lung thus equal 37½ per centum of the monthly pay for grade GS-2, step 1. Since other pending legislation may change the method of computing FECA benefits, failure to sever Black Lung benefits from the FECA system could lead to confusion about Black Lung benefit levels. This section accomplishes such severance, leaving Black Lung benefits at their present level, 37½ per centum of the monthly pay of an employee in grade GS-2, step 1.

SECTION 204

Interest Charges: operators determined by the Secretary of Labor or subsequent reviewing authority to be responsible for Black Lung payments to a clamaint are, as of the date of that determination, responsible for that debt. That means they must begin paying regular monthly benefits within 30 days, as well as pay a lump-sum award for compensation determined to be due as a result of any black lung caused disability or death from as early as 1974 to the time of the decision ("retroactive benefits"). Many operators do not, however, assume either of these obligations while they are contesting their liability, and the Fund is required to make these payments ("interim benefits") for the operator at an interest charge of 6 percent.

This section would complement changes in title I of the bill correcting this situation by raising the interest rate applicable to benefits determined to be payable by a responsible operator to claimants by the initial or subsequent decision to the same rate the Fund will charge. This provision would thus have the same effect on operator decisions to pay retroactive benefits as title I would provide with respect to prospective benefits. This would also clarify present rules by providing that such interest starts accumulating at the first point in the claims review process that a decision is made to make such award.

SECTION 205

Special Claims: This section of the bill would make amendments consistent with title I's transfer to the Fund, the liability for claims closed prior to the 1977 amendments to the Black Lung Benefits Act, and subsequently reopened and approved pursuant to the special review process and standards established by those amendments.

Together, the provisions will affect approximately 10,200 cases. This consists of approximately 8,000 cases originally filed with the Social Security Administration (1400 Part B cases approved by SSA, and 6543 Part B cases approved by DOL), and about 2200 Part C, responsible operator cases.

SECTION 206

Effective date; separability: the effective date of the Amendments is January 1, 1982.

□ 1540

Mr. SIMON. Mr. Speaker, will the gentleman yield?

Mr. PERKINS. I yield to the gentleman from Illinois.

Mr. SIMON. I thank the gentleman for yielding.

I gather that my colleague and the distinguished Chairman of the committee is saying that he is for this legislation, as amended in the Senate, but with some reluctance.

Mr. PERKINS. That is correct.

Mr. SIMON. I find myself in the same position. It contains some improvements, frankly, that we need, but it also makes it more difficult to get black lung benefits. So with very mixed feelings, I am going to be voting for this conference report.

Mr. PERKINS. Especially with the elimination of some of the presumptions, most of the presumptions, and the widows affidavits.

Mr. SIMON. Mr. Speaker, I thank the gentleman from Kentucky.

Mr. CONABLE. Mr. Speaker, I yield myself 3 minutes.

Mr. Speaker, the black lung provisions of this bill are as expected. They come back from the Senate under a rather well-rehearsed scenario that started with our sending them tax provisions and followed with their adding substantive changes in the law which constituted the compromise about which we talked yesterday at some length.

The gentleman from Illinois (Mr. ERLENBORN) will, doubtless, discuss this aspect of the bill when I yield time to him in the near future.

The other provisions of the law, as I understand it, are provisions either originally included in this measure or in other bills that we have considered here in the House at other times relating to the extension of the net operating loss carryovers, and so forth, except those provisions that deal with the deductiblity of temporary living expenses here in Washington. Those provisions that have been added simply direct the Secretary of the Treasury and the IRS to come up with appropriate per diem arrangements, something that apparently they were unwilling to do without a legislative instruction. This way 535 Members of the Congress will not have audits automatically as a result of the raising of the $3,000 limit.

I think this is an appropriate thing to do, and I urge my colleagues to support a formula which would permit a per diem determination of the deductibility of such temporary living expenses, realizing that it will always be open to Members to prove additional deductions if they can prove them.

I think it is important that we understand what is happening here. You are not going to change the law if you vote against this bill on that account. All you are going to do is make it more difficult for people to determine what is an appropriate deduction for temporary living expenses here in Washington.

So I hope my colleagues will accept this modification of a change in the law that has already been made eliminating the $3,000 ceiling on living expenses. We trust the Treasury will come up with an appropriate per diem, not more generous than necessary, but one which will remove that element of doubt which otherwise would be present if we were all required to prove every detail of our temporary living expenses here in Washington.

Mr. Speaker, I yield 5 minutes to the gentleman from Illinois (Mr. ERLENBORN).

Mr. ERLENBORN. Mr. Speaker, as I promised you yesterday, this bill, the black lung bill, is back here before us today, and I would like to outline a few reasons why the Members should, given the opportunity of a recorded vote, vote against this legislation.

First of all, the procedure that has been used. Despite repeated assurances from this administration's representatives and from representatives of the so-called coalition that they would not engage in any tricks to get this through without an opportunity for full debate and amendment, they have brought this bill up by completely bypassing the Education and Labor Committee.

A barebones tax bill was reported out of the Ways and Means Committee just Monday. It was passed here yesterday. Today the so-called compromise amendments were adopted in the Senate, and we are being asked here, again without an opportunity for full debate or chance of amendment, to accept the compromise amendments. That procedure alone should determine the Members should vote against this bill.

As to the tax provisions, I understand that the excise tax provisions are unchanged. As I pointed out yesterday, in rough terms the excise tax in the next 5 years will raise $1.5 billion. In the same terms, the transfer of claims that are now the responsibility of insurance companies and coal companies will cost $1.5 billion for a complete washout.

You would say, "Well, then, you are neither a gainer or a loser." The problem is, as the Ways and Means Committee said in their report, the excise tax is a deduction for income tax purposes, and over that same period there will be a net loss to the Treasury of about $500 million.

So this bill does not make the trust fund solvent. It does not raise revenue. It will actually cost in the next 5-year period $500 million to the Treasury. That should be adequate reason for the Members to vote against it.

If the Members think that the amendments in the Senate relative to the black lung are a reason to vote for it, let me just say that none of those amendments will apply to pending claims, and there are tens of thousands of pending claims. In one case, the case where widows can currently get black lung benefits based on their own affidavits that in their opinion their deceased husband had the disease because he coughed a lot, those amendments are not only not retroactive, but they do not take effect for 6 months and, as the United Mine Workers said in their journal, each one of these changes really will not stop benefits from being given to those who are seeking benefits. That is why the United Mine Workers are not opposed to this bill being adopted.

Who pays? As I said yesterday, the taxpayers are paying by losing one-half billion of revenue in the next 5 years.

The excise tax can be passed on, without going to rate commissions, by all of the electrical utilities, which are the prime payers of the excise tax, because they are the largest consumers of the coal. So your electrical consumers are the losers by having to pay this additional rate in their electrical bills. And I suppose you can go home and rant and rave, as so many do, against these terrible utilities for raising their rates, never telling your constituents that it was your votes on this bill that was causing thoses rates to go up. I think that is, again, adequate reason for the Members to vote against this.

For very good reasons I think this bill should be defeated. I hope we can have a record vote on it today. Yesterday I did not have a chance to ask for that record vote because it was brought before the floor at a time when I was not aware that it would be. But I hope today I will be able to generate a record vote and I hope the Members will reject this bill.

Now, in more detail let me outline the deficiencies of this legislation and what should be done.

Mr. Speaker, in 1969, when the Federal Coal Mine Health and Safety Act was reported from the Education and Labor Committee and when it was passed by the House of Representatives, I voted for it. That bill, as reported by the committee and as passed by the House, provided compensation for those who had progressive massive fibrosis (PMF), or complicated pneumoconiosis, which, under International Labor Organization (ILO) standards, is considered disabling. At the time I considered this to be the proper thing to do, because miners disabled by pneumoconiosis had not, and did not then, qualify for workers' compensation under State law. The Senate bill also provided compensation to those miners who were totally disabled. In conference, strangely, the references to complicated pneumoconiosis and total disability were removed and simple pneumoconiosis made compensable. Therein began my disenchantment with the black lung program.

The 1969 program envisioned limited Federal responsibility and was not intended to establish a Federal precedent, but was in the nature of a special compensation plan. It was promised that the program was a "one-shot" Federal compensation program until the States compensated pneumoconiosis on the same basis as other workers' compensation claims.

Despite assurances that a one-shot total disability compensation program was the intent of Congress, in 1972 amendments were enacted liberalizing the eligibility criteria providing for additional eligible survivors, providing for "unrelated death" benefits and, generally, extending the Federal responsibility for an additional period of time. The 1972 amendments so departed from the original promises that they even provided that claims could not be denied on the basis of negative X-ray evidence.

Not only were the assurances of a "one-shot" disability program violated by the 1972 amendments, but a "third shot" was fired in 1977, reaching its target March 1, 1978, when the 1978 amendments became law. Although the 1978 amendment did not contain a pension program based on years of mining service, they were actually worse.

They so liberalized eligibility criteria that compensation could be awarded to most miners and their dependents and survivors whether or not the miner had any medical evidence of the disease. These most recent amendments also—again despite the original assurances—made the program a permanent Federal program by striking the cutoff date for elimination of the Federal program and by creating the black lung disability trust fund—the fund that is presently insolvent with projected continued and exploding insolvency into the next century. The only way now to stabilize the fund is to charge the users of coal, and eventually all taxpayers and consumers, for the responsibility which should rest on the backs of responsible operators through State worker's compensation systems.

Mr. Speaker, I have repeatedly stated, and I wish to continue to emphasize, that I support without reservation the right of a coal miner, totally disabled from pneumoconiosis, to receive black lung benefits. The bill we are considering takes only one small step in this direction, but fails to reach the real problems and miscon-

ceptions of the existing Federal program.

Before I point out where I think this bill is deficient, let me review the medical and scientific history of black lung to remove lingering misconceptions. Coal workers' pneumoconiosis (CWP) is a distinct disease characterized by the accumulation of coal dust in the lungs and tissue reaction to its presence. CWP can be determined by X-ray. Simple CWP is categorized as stages 1, 2, and 3, and in those stages is not usually disabling and is not usually progressive. The complicated form of CWP is called progressive massive fibrosis (PMF) and is usually disabling and is usually progressive without further exposure to coal dust. The ILO has distributed X-rays illustrating the various categories of CWP.

Dr. W. K. C. Morgan's testimony submitted to the House Subcommittee on Oversight, Ways and Means Committee, September 28, 1981, states:

> There is a direct relationship between the coal dust content of the lungs and the X-ray category, and therefore, chest X-ray is a useful means of monitoring dust exposure.

Dr. J. Donald Millar, Director of the National Institute of Occupational Safety and Health (NIOSH), testified before that subcommittee on July 27, 1981, that:

> ". . . CWP may be diagnosed specifically by use of chest X-ray . . ."

Mr. Speaker, black lung is a legislatively defined term. The present act defines pneumoconiosis as a chronic dust disease of the lung and its sequelae, including respiratory and pulmonary impairments, arising out of coal mine employment. Consequently, the act's definition includes diseases found in the general population such as bronchitis, emphysema, and other respiratory conditions which may be caused, or aggravated, by cigarette smoking or other environmental conditions.

Over the years, certain testimony on the black lung program which has been accepted by the supporters of the present black lung program has equated CWP with total disability. That accepted testimony is simply incompatible with fact.

The facts are, I want to reemphasize, that in simple pneumoconiosis, category 1, there is seldom, if ever, any abnormality of long function. In exceptional cases, there may be minimal abnormalities of lung function in miners with categories 2 and 3 of CWP. Unlike CWP, PMF is associated with respiratory impairment, often resulting in permanent disability and sometimes premature death. PMF may progress without further exposure to coal dust, unlike the categories of simple CWP.

In 1976, the National Academy of Sciences issued a report entitled "Coal Workers' Pneumoconiosis Medical Considerations, Some Special Implications" which showed that after working 30 years in coal mines of the anthracite regions, only 14.3 percent of the miners had progressive massive fibrosis, the disabling stage, while 60 percent had some nondisabling stage of the disease. The number of miners with the disease is smaller in other regions. In the Appalachian region, only 2.1 percent of the miners were disabled, while 45 percent had simple stages of the disease. In the Midwest and West, no statistically significant number were disabled and 25 percent in the Midwest and 10 percent in the West had the simple stage of the disease.

In recent testimony before the Subcommittee on Oversight, House Committee on Ways and Means, July 27, 1981, Dr. Millar reported on NIOSH's surveillance program, round two, which showed that 94.2 percent (107,569) of the miners studied had no evidence of CWP, 4.5 percent (5,145) had simple category 1, only 0.9 percent (1,082) and 0.1 percent (114) had categories 2 and 3, and 0.2 percent (254) had PMF. Some of the results of the third round of examinations in the national coal workers' health surveillance program were also reported. In that preliminary report of round 3, over 95 percent of those examined had no evidence of the disease, over 3 percent demonstrated category 1 of CWP, and no statistically significant number had advanced stages of this simple form of the disease or the complicated form of the disease.

With these figures in mind, despite the low percentage of miners with the disabling stage of black lung, the General Accounting Office (GAO) reports that from 1969 to December of 1980, the Social Security Administration (SSA) has paid over $9 billion in benefits to almost 400,000 claimants, out of 537,000 miners and survivors who filed claims with SSA. From July 1973 through April 1981, the Department of Labor has approved over 94,700 claims out of the more than 282,500 claims it has reviewed, paying benefits of over $1.75 billion from the black lung disability trust fund created in 1978.

It is my contention that approval of these claims, while in conformity with the law, has not been based on disability or on disability related to coal mine employment. To support my contention, I refer the subcommittee to the recent GAO report entitled "Legislation Allows Black Lung Benefits to Be Awarded Without Adequate Evidence of Disability" (HRD-80-81, July 28, 1980). In that report, GAO found that in 88.5 percent of the cases where Social Security granted awards, medical evidence was not adequate to establish disability or death from CWP.

In testimony before the Ways and Means Subcommittee on Oversight, the GAO reported on its study of the Department of Labor's administration of its program. GAO concluded that in 84 percent of the cases deemed eligible for benefits, the medical evidence was not adequate to establish disability or death from CWP, although not contrary to law.

These statistics and these findings by GAO, the National Academy of Sciences, and NIOSH demonstrate the need to revise drastically the black lung program. I have introduced a bill (H.R. 4387) to bring the black lung program closer to a real disability program. However, I do not believe the bill being considered today will accomplish that result.

Although both the National Coal Association and the United Mine Workers of America are supporting this legislation, I am skeptical of its results. In the course of almost 25 years as a legislator, I have come to the conclusion that whenever business interests and the unions get together and agree on something, we should look very carefully to see if the taxpayer has been forgotten. He usually has.

First and foremost, this bill is prospective only. Every amendment to the black lung program as it affects eligibility applies only to those claims which will be filed in the future. There are areas of the bill which should be applied to present claims.

For example, to save an enormous amount of money and to be compatible with a disability program, certainly offsets should be applied to present claimants. Further, awarding future benefits to potential widows or survivors of living claimants should be stopped unless there is medical evidence of disability caused by CWP in the living miner. There are ample resources for presently living miner claimants to establish CWP and disability through the black lung medical program and free chest X-rays. This change would eliminate payment for deaths unrelated to CWP, with potential considerable savings down the road.

Furthermore, provisions of the bill should be applied to "pending claims," that is, claims already filed, but not finally adjudicated. If this bill becomes law, there will be two "classes" of claimants—those who filed before and those filed afterwards. When the two "classes" are established is relatively unimportant except that continued awards to those who are not medically disabled should be stricken as soon as possible. This could be facilitated by eliminating presumptions applicable to pending claims and allowing the rereading of X-rays on pending claims, as well as on X-rays submitted in a living miner's claim when he dies. Most important, none of these suggestions will affect a present claim or claimant who has been awarded bene-

fits, except for the offset recommendation.

By removing certain presumptions (§ 411(c)(2) and (4)), and entitlements (§ 411(c)(5)), the bill takes a step in the right direction. However, as I noted before, their elimination should apply to pending claims as well as future claims.

Particularly unnecessary is the extension of 6 months to allow widows to file claims under the 411(c)(5) entitlement provision. As the UMWA states:

Elimination of this provision is expected to have little or no impact since nearly all of the survivors eligible under this presumption already have applied.

The 6-month grace period only allows the UMWA to canvass the ranks to encourage additional filings for wholly unmeritorious disability claims.

The removal of the 10-year death presumption, 411(c)(2), and the 15-year negative X-ray presumption 411(c)(4), are mere window dressing without a change in the definitions. There is nothing in the bill to prohibit these presumptions from being published as regulatory standards by future administrations. Change in the definitions of "pneumoconiosis" and "total disability" would eliminate that possibility.

Particularly troublesome is the proposal to transfer approximately 10,200 claims from responsible operators to the trust fund. The equity theory behind the transfer provision has merit since the 1978 amendments imposed liability where it may not have been expected, but the result creates even greater inequity.

The majority of those 10,200 claims are subject to controversion by responsible operators. The trust fund cannot contest a claim. As the UMWA states:

Controversions by responsible operators against those claims, therefore, would cease upon enactment. Beneficiaries of those claims would be placed on the rolls for life.

No wonder the UMWA supports this provision!

I would not have as much personal opposition to the transfer of those 10,200 claims to the trust fund if there were some mechanism for the trust fund to protect itself or have a counsel protect it. To legislatively award those claims, where there may be some questionable validity as to their merit, only perpetuates the black lung program's concept as special interest legislation. Furthermore, operators and insurers would be reimbursed for any moneys they have paid for certain of those 10,200 claims. This, in my opinion, may result in an unintentioned windfall for operators and their insurers.

The law now allows affidavits to establish disability in the case of a deceased miner where there is no relevant medical evidence. The bill proposes to strike the use of affidavits by a potential beneficiary. This is, at most, another cosmetic change. Even the UMWA agrees that this provision accomplishes nothing of substance. They say:

This change should have little impact for two reasons: most claims in the future should have sufficient medical evidence to establish a claim and widows should have no trouble locating someone who will file an affidavit stating that her husband suffered from respiratory problems.

I agree. For the reasons stated by the UMWA, affidavits should be prohibited altogether.

Earlier, I referred to X-ray rereading. The present law prohibits the rereading of X-rays and prohibits the denial of a claim on the basis of a negative X-ray. The bill proposes to allow rereading of X-rays. The bill also proposes to do away with the presumption which encompasses the language which prohibits the denial on the basis of a negative X-ray. But the explanation to the bill promises that "This change in no way implies a policy of disapproving claims solely on the basis of a negative X-ray." The result would be that an X-ray could be reread. A negative X-ray would still not be evidence to deny a claim for CWP.

As indicated earlier, certain respiratory diseases found in the general population may cause impairment and disability, but they do not arise out of coal mine employment and they are not visible on X-ray. The best method of determining CWP is by X-ray. The proposed change would continue to allow claims based on diseases found in the general population not arising out of coal mine employment.

The use of the prohibition of a denial on the basis of a negative X-ray is an idea whose time has passed. It was originally enacted in order that claims under part B be approved expeditiously since many claims were backed up due to an unexpectedly high number of filings under social security. Under part C it is anomalous, since part C is in the nature of a workers' compensation program, and all evidence should be considered, particularly those that either prove or disprove a claim.

Another issue in the eligibility area that needs correction is the offsets. Present law only allows offsets (that is, reduction of black lung payments) for other disability awards "due to pneumoconiosis." Under part C widows' or survivors' benefits are reduced, but under part B there is no offset for death benefits. The words "due to pneumoconiosis" mean that other disability awards under State or Federal programs do not reduce the black lung awards. A miner can be getting State disability and black lung benefits without an offset. Or he may be getting State disability compensation, social security disability or social security retirement and survivors' insurance and black lung benefits without a black lung offset. There are now 91,000 persons getting some form of title II social security and part B benefits. Of that 91,000, about 63,000 are getting part B and retirement and survivors' insurance; 23,000 are receiving part B and social security disability and are under age 62; and 5,000 received both the latter benefits but are between 62 and 65 years of age.

Mr. Speaker, the offset issue is complicated because of the offsets in the social security programs. It would not be my intention to call for offsets of black lung benefits if such offsets reduced a miner's benefits below that of any other disabled employee in any other industry. My intention would be to treat all disabled workers equally: Equal compensation for equal disability. The fact that the offset provisions are complicated does not call for an 18-month study of offsets. We have the expertise in Congress, in the Finance Committee and in the Ways and Means Committee, to address an offset amendment which will treat disabled employees equally. However, I support the concept of having the excess earnings test applied to part C as well as part B, but would have that test applied to all and not just future claims.

Mr. Speaker, I earnestly believe more than cosmetic changes should be made in the black lung program. The principal reform should be to fulfill the original promise and allow the States to assume responsibility for workers' compensation for disability due to pneumoconiosis, the same as States cover other occupational diseases. I have introduced H.R. 4387 which does so. For your consideration, I will briefly summarize my bill.

H.R. 4387 narrows the definition of pneumoconiosis since the present definition has been interpreted to include such conditions as emphysema, which is not a chronic dust disease of the lung, and lung cancer, which has not been shown to be related to coal workers' pneumoconiosis. In addition, the bill excludes sequelae, thus excluding unrelated lung conditions.

The present definition of "miner" includes anyone who has worked around a mine, in transportation, or even in construction. The Benefits Review Board has allowed a claim of a laboratory analyst who worked in the lab analyzing coal. There is no evidence that these people suffer any increased likelihood of developing coal workers' pneumoconiosis. H.R. 4387 amends the law to define miners as those who have been employed directly in the mining—extraction—of coal.

In order to keep definitions in different Federal laws parallel, H.R. 4387 amends the definition of "total disability" to be compatible with that of the Social Security Act. To collect benefits for total disability, the claimant

should be unable to perform any work. The definition of total disability applied by the Social Security Administration requires proof that the claimant cannot "engage in any substantial gainful activity by reason of any medically determinable physical or mental impairment."

H.R. 4387 also restricts the use of the present presumptions in the law and strikes the 411(c)(2) and 411(c)(4) presumptions and the 411(c)(5) entitlement. It is really necessary that proof of the existence of black lung disease be required before any presumption is raised, and the bill does this. Besides, if there is medical evidence that black lung disease does not exist, the bill provides that a presumption cannot be used to establish a claim.

H.R. 4387 deletes the provisions tying the benefit level to the increase of the Federal wage level of a GS-2. The increase only contributes to the rate of inflation and the rapidly increasing costs of the program. Since the program was intended to provide a supplement to income—not as the sole income of a recipient—there is no reason to index these benefits.

H.R. 4387 removes the "unrelated death benefit" provision. Presently if a miner who is entitled to benefits dies from any cause—even a cause completely unrelated to his pneumoconiosis—his eligible survivors are entitled to benefits. This amounts to a life insurance program and not a compensation program and should be repealed, which my bill does.

Black lung benefits are presently offset only by benefits from a State black lung program. They are not offset by workers' compensation benefits from any other program. This means that for benefit purposes a worker can be disabled twice—an irrational concept. H.R. 4387 amends the statute to permit the offset of black lung benefits by any other workers' compensation benefits.

Since an X-ray is one way of proving or disproving a claim, the bill allows the denial of a claim based on negative X-rays and strikes the provision that does not allow for the rereading of X-rays. If the program is to be placed on a sound medical basis, the best available medical evidence should be sought and allowed. Presently, claims may be denied or allowed based on a totally inaccurate reading of X-rays. H.R. 4387 will correct this inequity.

The present law allows an affidavit to be sufficient where there is no medical or other relevant evidence. That means those who will benefit can submit an affidavit that a miner had a cough and can receive benefits. This provision is probably one of the most important reasons the GAO concluded that 88.5 percent of the random sample of claims are not supported by medical evidence of disability. It is a provision encouraging fraud. Because of its total inappropriateness, H.R. 4387 strikes this affidavit provision. The bill further strikes the provision requiring the Secretary to accept an autopsy report. That does not mean the Secretary cannot accept an autopsy report; it just means the Secretary does not have to accept all autopsy reports submitted.

One of the original promises of the black lung program was that it would be a temporary Federal program. However, despite vast improvements in State programs and benefits, no State program has yet been approved. This is in part because the black lung statute requires the States to adopt standards similar to the Federal law for the determination of the existence of the disease and the definition of disability, and to automatically provide widow's benefits without proof that the miner's death was the result of pneumoconiosis. Even if the Federal Government were to approve a State plan, the program would still remain federally regulated. Rather than have the Federal Government approve State plans, my bill totally terminates the Federal program from processing new claims after the fifth anniversary of the 1978 amendments (February 28, 1983). This is compatible with the original promise that the black lung program was to be a temporary supplemental program.

Presently, benefits payable from the trust fund are not subject to being contested by either operators for the trust fund. H.R. 4387 establishes a special counsel in the Department of the Treasury in order to controvert claims that are the responsibility of the trust fund. By being able to protect the trust fund from ineligible claims, it is hoped that moneys from the Federal Treasury will be saved. Although the trust fund is financed by a tax on coal, the trust fund is insolvent, with continued projected insolvency, and the trust fund must borrow against general revenue funds. Those funds should be protected and the Office of Special Counsel will do that.

The present 50 cent tax per ton on underground coal and 25 cent tax per ton on surface coal is inadequate to fully fund the trust fund. My bill changes that tax to 3 percent and 1 percent of the price at which coal is sold by the producer of underground and surface coal, respectively. Projections by the Department of Labor in early May show such a tax would make the trust fund solvent in fiscal year 1986.

In summary, I believe that a doubling of the present tax rate, which now pays benefits for the nondisabled, as well as for disabled miners, requires more than a cosmetic change. Any 100-percent increase in taxes, as proposed in this bill, demands true reform.

● Mr. RAHALL. Mr. Speaker, yesterday this body passed with little difficulty the Black Lung Benefits Revenue Act of 1981 which is an attempt to bring solvency to the black lung disability trust fund. This is commendable legislation, which I fully supported, and I believe the House acted wisely in approving it.

Today, however, we have before us the same tax-related portions approved by the House but with the addition of certain changes in the eligibility and presumption clauses enacted by the Congress through various statutes culminating with the Black Lung Benefits Reform Act of 1977.

I would like to simply remind my colleagues of the hard-fought battle we engaged in to pass the 1977 reform legislation, an effort lead by my distinguished colleague, the chairman of the Committee on Education and Labor, CARL PERKINS. Black Lung Benefits Reform Act of 1977 removed certain eligibility restrictions that had prevented many coal miners with black lung, along with their survivors, from obtaining benefits. It also expanded the definition of black lung to include other respiratory diseases due to coal mine employment, along with other provisions.

The legislation before us today proposes to eliminate certain presumptions for black lung benefits contained in previously enacted statutes. This action is being taken, we are informed by the administration, to further insure solvency of the black lung disability trust fund.

I am troubled by this measure. While I fully realize that it is a compromise bill and that the tax-related portions will not be enacted without these other provisions, in addition to the fact that this package is not opposed by the coal miners' union, I must warn my colleagues that I sincerely hope passage of this legislation does not seriously jeopardize the inherent rights of the citizens of this Nation to seek protection of their health from the Federal Government.●

The SPEAKER pro tempore (Mr. PANETTA). The question is on the motion offered by the gentleman from Illinois (Mr. ROSTENKOWSKI) that the House suspend the rules and concur in the Senate amendment to the bill, H.R. 5159.

The question was taken.

Mr. ERLENBORN. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule I, and the Chair's prior announcement, further proceedings on this motion will be postponed.

QUIET COMMUNITIES ACT

Mr. FLORIO. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3071) to amend the Noise Control Act of 1972, and for other purposes, as amended.

The Clerk read as follows:

H.R. 3071

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Noise Control Act of 1972 is amended as follows:

(1) Section 1 is amended to read as follows:

"SHORT TITLE

"SECTION 1. This Act may be cited as the 'Quiet Communities Act'."

(2) Section 2(a)(3) is amended by striking out "deal with major noise sources" and all that follows down through the period at the end thereof and substituting: "assure uniform treatment of certain carriers engaged in interstate commerce and certain equipment distributed in interstate commerce which are major noise sources.".

(3) Section 2(b) is amended by striking out "for products distributed in commerce," and substituting: "for certain carriers engaged in interstate commerce and certain equipment distributed in interstate commerce.".

(4) Section 3(5) is amended by striking out "or section 8".

(5) Section 5(b) is amended by inserting "are referred to in section 6(a)(1) and which" after "which".

(6)(A) Section 6(a)(1)(C) is amended by striking out clause (iv) and by inserting the following before the period at the end of clause (iii): "designed for use in construction or transportation equipment".

(B) Section 6(a)(1) is amended by adding the following at the end thereof: "Such regulations shall not apply to the products to which subpart F of part 205 of title 40 of the Code of Federal Regulations (as promulgated before the date of the enactment of this sentence) applies.".

(C) Except as provided in subparagraph (B), any rule or regulation under section 6 of the Noise Control Act of 1972 which was promulgated in final form before the date of the enactment of this Act and which is applicable to products referred to in section 6(a)(1) of that Act, as amended by this subsection, shall remain in force and effect after the date of the enactment of this Act until such time as the rule or regulation is amended or otherwise modified under such section 6, as amended by this Act. Nothing in this subparagraph shall be construed to validate any otherwise invalid rule or regulation under such section 6 which was promulgated in final form before the date of the enactment of this Act, and nothing in this subparagraph shall be construed to provide that any unlawful aspect of such rule or regulation shall be treated as lawful.

(7) Section 8 is repealed.

(8) Section 10(a) is amended by striking out paragraphs (3) and (4).

(9) Section 10(b) is amended by striking out "(3)," in paragraph (1) and by striking out "(1), (2), (3), and (4)" in paragraph (2) and substituting "(1) and (2)".

(10) Section 11(a) is amended by striking out "(3)," in each place it appears.

(11) Section 11(a)(2) is amended by inserting the following after "$10,000": "(reduced by the amount of any penalty imposed under subsection (f))".

(12) Section 11 is amended by adding the following at the end thereof:

"(f) The attorney general of any State may bring a civil action, in the name of such State where the violation takes place in such State, in any State court of competent jurisdiction or in the appropriate district court of the United States to impose a civil penalty against any person who violates any provision of section 10. In any such action the court may impose a civil penalty of not more than $10,000 per day of such violation (reduced by the amount of any penalty imposed under subsection (a)(2)). Any such civil penalty imposed under this subsection shall be awarded to the State in the name of which such action is brought. The provisions of section 12(b) shall apply for purposes of actions brought under this subsection in the same manner as such provisions apply for purposes of section 12.".

(13) Section 12 is amended—

(A) by striking out "(e)" in subsection (a)(1) and substituting "(f)"; and

(B) by striking out "(3), (4)," in subsection (f).

(14) Section 13(a) is amended by striking out "or section 8".

(15) Section 14(b)(2) is amended by striking out "under sections 6, 7, and 8 of this Act" and substituting "under section 6 or 7 of this Act".

(16) Section 16(a) is amended by striking out "or any labeling regulation under section 8 of this Act".

SEC. 2. Section 19 of the Noise Control Act of 1972 is amended by striking out "$15,000,000 for the fiscal year ending September 30, 1979" and substituting "$7,300,000 for each of the fiscal years 1982 and 1983".

The SPEAKER pro tempore. Is a second demanded?

Mr. LENT. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from New Jersey (Mr. FLORIO) will be recognized for 20 minutes, and the gentleman from New York (Mr. LENT) will be recognized for 20 minutes.

The Chair recognizes the gentleman from New Jersey (Mr. FLORIO).

Mr. FLORIO. Mr. Speaker, I yield myself such time as I may consume.

Mr. FLORIO. Mr. Speaker, this bill authorizes appropriations in the amount of $7.3 million for each of fiscal years 1982 and 1983 for the purpose of carrying out the noise control program at the Environmental Protection Agency. The committee has decided to scale down EPA's regulatory authority while keeping in place the quiet communities program which provides assistance to State and community noise control efforts.

I bring this bill to the floor with mixed feelings because I realize that, in spite of the committee's clear intention to continue the noise program, EPA is even now in the process of dismantling the Noise Office. Since 1972, when it was founded, the Noise Office has done a good job of advancing our understanding of the significant health and environmental problems caused by excessive noise. While it has perhaps been overzealous in some of its regulatory goals, the noise program has received high marks for its efforts to provide technical and financial assistance to State and local government noise control activities. I am also well acquainted with the valuable work the Noise Office did in helping to significantly reduce aviation noise, which impacts over 6 million people around the country.

In spite of these accomplishments, the administration has made it clear that it intends to abolish the noise program and will not request any appropriations for noise activities in fiscal year 1983.

It is important to note that the administration offered no substantive revisions to amend or rescind the Noise Act. It is its intention to do away with the program by simply providing no money for it.

The end result of this approach is that regulations which have been promulgated under the act for certain major noise sources would remain in place, with no enforcement from EPA. This is blatantly unfair to local and State authorities, who, on the one hand, would be preempted under the act from promulgating their own regulations, and, on the other hand, could expect no enforcement from the Federal Government.

The committee had a responsibility to deal with this problem and, at Chairman DINGELL's suggestion, we have included a provison which would allow the State attorneys general to enforce the noise regulations. We intend, by this mechanism, to give the States the ability to deal with noise problems which plague many communities.

The bill has entirely removed EPA's ability to regulate products and garbage truck solid waste compactors. Regulations for motor carriers, railroads, engines used in transportation, and certain construction equipment are left in place.

I believe the committee has fashioned a reasonable approach to dealing with the present EPA lack of enthusiasm for the program, and I ask your support.

Mr. LENT. Mr. Speaker, I yield such time as he may consume to the distinguished ranking minority member of the full committee, the gentleman from North Carolina (Mr. BROYHILL).

Mr. BROYHILL. Mr. Speaker, I rise in support of H.R. 3071, a bill to amend the Noise Control Act of 1972.

Briefly, the bill before us reauthorizes the Environmental Protection Agency's noise control program for fiscal years 1982 and 1983. It also amends the Noise Control Act of 1972 so as to narrow the scope of the noise control program at the Federal level. That is, this bill limits Federal author-

ity for the mandatory regulation of noise emissions to certain carriers who operate on an interstate basis and certain manufacturers who manufacture and distribute products in interstate commerce. Specifically, these are the railroads, the motor carriers, the manufacturers of trucks, cars, motorcycles, and recreational vehicles, exclusive of truck-mounted trash compactors, and the manufacturers of construction equipment. At the same time, we have provided that all of the existing regulations promulgated for the manufacturers that I have just listed shall remain in force and effect until amended or otherwise modified as authorized by this act. This also holds for the railroads and the motor carriers for whom the appropriate sections of the act, sections 17 and 18, remain unamended by this bill.

I would like to focus on our inclusion of motorcycles since its inclusion has been the subject of opposition in the other body.

My position is that the manufacture and distribution of such vehicles in interstate commerce should remain within the compass of a single Federal standard. In other words, I see no reason to subject these manufacturers to the burdensome imposition of a variety of State and local regulations while retaining Federal authority for other vehicle manufacturers. To my mind, there is no such distinction to be made among the vehicle manufacturers. At the same time, I would like to point out that we are not intending to interfere in any way with the regulation by State and localities of the use of motorcycles. Such authority remains with the States and localities under the provisions of our bill.

I would also like to focus on our inclusion of construction equipment under section 6 of the act. By so doing, we are retaining the EPA's authority to regulate the noise emissions of construction equipment. It is my understanding that the only regulations issued by the Agency to date under this authority apply to portable air compressors. The specifics of these regulations were the result of extensive negotiations between EPA staff and industry. Since they have gone into effect, the rate of compliance has been impressive. While the Federal authority to regulate construction equipment has been eliminated in committee, these manufacturers have persuasively argued that the regulation should remain in full force and effect. Their rationale is that the regulation provides cost savings with resulting lower sales prices to purchasers due to uniformity of manufacture. As they correctly point out, such Federal authority serves to preempt State and local jurisdictions from promulgating a variety of regulations which manufacturers would then have to comply with.

I would conclude by stating that this bill has the support of the committee, those members of industry who are affected, and the administration. I urge my colleagues to support this bill.

Mr. LENT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R 3071, a bill entitled the Quiet Communities Act. And I want to commend the chairman and ranking member of the Energy and Commerce Committee for their support and consideration of this legislation and particularly compliment the gentleman from New Jersey, the distinguished chairman of the Subcommittee on Commerce, Transportation and Tourism, without whose leadership and spirit of compromise this legislation would not have been brought to the floor.

Mr. Speaker, briefly, this bill reauthorizes the Environmental Protection Agency's noise control program in the amount of $7,300,000 each for fiscal years 1982 and 1983.

This also amends the Noise Control Act so as to limit the EPA's authority in this area to those carriers and manufacturers whose interstate operations and distribution of products respectively dictate the uniform Federal regulation of noise emissions.

Specifically, this bill retains Federal authority in this area for the following carriers and manufacturers:

The rail carriers, including related rail operations, equipment and facilities as currently provided under section 17 of the act;

The motor carriers, including operations and equipment as currently provided under section 18 of the act;

The manufacturers of transportation equipment which includes the manufacture of trucks, passenger cars, motorcycles, and recreational vehicles as currently provided under section 6(a)(1)(C)(ii) of the act; and

The manufacturers of construction equipment as currently provided under section 6(a)(1)(C)(i) of the act. We are making this inclusion at this time so as to encompass the manufacture of portable air compressors. These compressors have been federally regulated for noise emissions since January of 1978.

As we concluded during the course of our committee consideration of this bill, these are the carriers and the manufacturers whose interstate operations and whose manufacture and distribution of products would be the most adversely affected by the removal of Federal preemption in this area. As we stated in our committee report, these industries are already operating under substantial regulatory burdens. We saw no reason to subject them to a variety of State and local regulations by removing Federal authority in this area. Such an approach could only serve to create regulatory chaos for their interstate operation and/or manufacture and distribution of products. This approach would ultimately escalate the costs of industry compliance as well as the price that consumers would pay for such services or products.

We have also retained the quiet communities program which was incorporated into the act by amendment in 1978. This is a nonregulatory program which directs the Environmental Protection Agency to provide States and localities with technical and financial assistance for their noise control efforts. This program relies heavily on local expertise and voluntary personnel for its implementation. I might add that it has been one of the Agency's most popular programs.

Finally, I would like to point out that, by narrowing the scope of the EPA's program under the act, we have attempted to do two things: Retain an effective Federal noise control program which regulates those carriers and manufacturers who should be regulated by a single uniform standard; and second, reduce the Federal expenditure involved to meet the administration's objective of fiscal restraint. While we are not incorporating the administration's initial budgetary recommendation for this program, this reflects our decision not to phase this program out, as their figure assumed, but rather to continue it on a more limited scale.

I would conclude by urging my colleagues to support this bill.

Mr. WIRTH. Mr. Speaker, will the gentleman yield?

Mr. FLORIO. I yield to the gentleman from Colorado.

Mr. WIRTH. I thank the gentleman for yielding.

Would it be possible for the distinguished chairman of the subcommittee to fill in the members of the full committee here on the posture of EPA toward air noise pollution in general?

Mr. FLORIO. Yes; the situation we find ourselves in is trying to make the best out of a bad situation.

It is clear that in the process of dismantling EPA in general, the specific first target was the noise control unit at EPA. It is effectively gone. There is no money requested in 1983. There is about $2 million requested in 1982 for the purpose of phasing out. People are already being transferred. So it is clear there is no intention of having any Federal involvement in noise at EPA.

The difficulty is that the rules will stay in effect in certain areas. Those rules could preempt the field so that the States will not be able to respond, if they feel the need to respond, in dealing with noise generator problems.

So in a sense, the public has the worst of both worlds. We have rules in effect that are not to be enforced because there is no one to enforce them and we will preclude the localities

from responding and the States from responding under the law that preempts the field.

□ 1600

What we have done in this situation is to give to the State attorneys general the ability to enforce those Federal regulations which but for this proposal, this piece of legislation, we would have no one to implement the law.

Mr. WIRTH. Mr. Speaker, will the gentleman yield further?

Mr. FLORIO. I am happy to yield.

Mr. WIRTH. Does that mean that without this legislation, the progress that, for example, we are making in the Denver metropolitan area with Stapleton Airfield, we would not be able to continue on that track of real progress in terms of noise abatement?

Mr. FLORIO. The answer is "Yes," that EPA's involvement with FAA has in many areas resulted in substantial reductions in noise.

EPA will no longer be involved in this noise effort because EPA will no longer exist with regard to noise.

Mr. WIRTH. Mr. Speaker, I thank the gentleman for his clarification.

● Mr. PORTER. Mr. Speaker, I wish to express my support for the continued funding of the Noise Control Act of 1972, renamed the Quiet Communities Act.

Although I share President Reagan's concern for achieving budget reductions in existing programs and have consistently supported such reductions, I disagree with his recommendation to discontinue this program altogether. The Noise Control Act was adopted in 1972 to provide coordination of Federal research activities, to authorize establishment of Federal noise control standards for products in interstate commerce, and to provide the public with information on noise control methods and procedures available to local communities.

I feel that noise, especially aircraft noise, presents a danger to public health and welfare and that the Federal commitment toward minimizing that threat should not be withdrawn, even in the face of budget reductions.

I wholeheartedly support the Energy and Commerce Committee's belief that the promulgation of aircraft noise regulations has not been carried out as expeditiously as Congress had intended. Although I recognize that EPA is limited to advising the FAA on aircraft noise regulations, the committee and I agree that recommendation of such regulations should be an EPA priority. The committee urges the EPA to maintain sufficient personnel and budgetary resources to carry out this obligation under the act. The committee also notes that the FAA has been slow to respond to EPA recommendations and urges the FAA to take steps to avoid delay in the future.

Mr. Speaker, there are some 150,000 families in the vicinity of Chicago's O'Hare Airport who do not know what it is to have a peaceful, quiet day in their own homes. These people must be helped and funding for the Quiet Communities Act must be continued.●

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New Jersey (Mr. FLORIO) that the House suspend the rules and pass the bill, H.R. 3071, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

Mr. FLORIO. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 1204) to amend the Noise Control Act of 1972 as amended by the Quiet Communities Act of 1978, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1204

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Noise Control Act of 1972 is amended as follows:

(1) Sections 6 and 8 are hereby repealed.

(2) Section 1 is amended to read as follows:

"SHORT TITLE

"Section 1. This Act may be cited as the 'Quiet Communities Act'.".

(3) Section 2(a)(3) is amended by striking out "deal with major noise sources" and all that follows, through the period at the end thereof and substituting: "promote effective State and local programs and provide Federal research, demonstration, planning, technical, and other assistance for such programs.".

(4) Section 2(b) is amended by striking "to authorize the establishment of Federal noise emission standards for products distributed in commerce, and", changing the period at the end of said sentence to a comma and adding "and to assure that railroad and motor carrier equipment and operational noise emissions are controlled adequately by either State or Federal regulation.".

(5) Section 3(2) is amended by striking out "sections 11(e) and" and substituting "section".

(6) Section 3 is amended by striking paragraphs (3) through (8).

(7) The second sentence of section 4(b) is amended by striking "6," and ", other than for those products referred to in section 3(3)(B) of this Act".

(8) Section 12(f) is amended by striking out "paragraph" and all that follows down through "section 611" and substituting "a standard, rule, or regulation under section 17 or 18 of this Act or section 611".

(9) Section 10 is amended by striking subsections (a) and (b) and substituting the following: "The failure or refusal of any person to comply with any requirement of regulations prescribed under section 13, 17, or 18 is prohibited.".

(10) Section 11 is amended by—

in subsection (a), striking "paragraphs (1), (3), (5), or (6) of subsection (a) of" each place it appears;

in subsection (b), striking "any paragraph of section 10(a)" and substituting "section 10" each place it appears;

in subsections (c) and (d), striking "10(a)" and substituting "10".

(11) Section 18(a) is amended by striking "6 or section 8" and substituting "17 or section 18".

(12) Section 14(b)(2) is amended by striking "subject to possible regulation under sections 6, 7, and 8 of this Act".

(13) Section 16(a) is amended by striking "6, 17, or 18 of this Act or any labeling regulation under section 8" and substituting "17 or 18".

(14) Section 17 is repealed, and the following new section enacted in lieu thereof:

"RAILROAD NOISE

"SEC. 17. (a)(1) Regulations of interstate railroads and equipment in existence shall continue until specifically repealed or amended.

"(2) After the enactment of this section, the Administrator may promulgate additional regulations establishing standards and requirements for the design, construction, and maintenance of rail equipment or devices or controls and regulations establishing restrictions on interstate railroad operations and activities along specific rail lines or specific centers of activity, including, but not limited to, switching and marshalling yards, for the purpose of minimizing or eliminating the environmental noise emissions from such equipment or activities. Such standards, controls, limits, requirements, or regulations, if any, shall reflect the degree of noise reduction available through the application of best available technology, taking into account the costs of compliance.

"(3) Within ninety days after the publication of such regulations as may be proposed under paragraph (1) of this subsection, and subject to the provisions of section 16 of this Act, the Administrator shall promulgate final regulations. Such regulations may be revised, from time to time, in accordance with this subsection.

"(4) Any standard or regulation, or revision thereof, proposed under this subsection shall be promulgated only after consultation with the Secretary of Transportation in order to assure appropriate consideration for safety and technological availability.

"(5) Any regulation or revision thereof promulgated under this subsection shall take effect after such period as the Administrator finds necessary, after consultation with the Secretary of Transportation, to permit the development and application of the requisite technology, giving appropriate consideration to the cost of compliance within such period.

"(b) The Secretary of Transportation, after consultation with the Administrator, shall promulgate regulations to assure compliance with all standards promulgated by the Administrator under this section. The Secretary of Transportation shall carry out such regulations through the use of the powers and duties of enforcement and inspection authorized by the Safety Appliances Acts, the Interstate Commerce Act, and the Department of Transportation Act.

Regulations promulgated under this section shall be subject to the provisions of sections 10, 11, 12, and 16 of this Act.

"(c)(1) Nothing in this section shall diminish the right of a State or political subdivision thereof to establish and enforce standards, controls, limits, restrictions, or other requirements on environmental noise, including those from rail equipment and operations, in the absence of a Federal requirement pursuant to this section, or a Federal decision that no Federal, State, or local requirement is appropriate, on a specific class of equipment or operations.

"(2) Nothing contained herein shall preclude a State or political subdivision thereof from adopting and enforcing a Federal standard, control, limit, restriction, or other requirement promulgated under this section.

"(3) Any person adversely affected by a State or local requirement, or the Administrator, may demonstrate by a preponderance of the evidence the existence of conflict between the requirement of a State or political subdivision thereof and that of the Federal Government.

"(d) The terms 'carrier' and 'railroad' as used in this section shall have the same meaning as such terms have under the first section of the act of February 17, 1911 (45 U.S.C. 22).".

(15) Section 18 is hereby repealed and the following new section enacted in lieu thereof.

"MOTOR CARRIER NOISE

"SEC. 18. (a)(1) Regulations of interstate motor carriers and equipment in existence shall continue until specifically repealed or amended.

"(2) After the date of enactment of this section, the Administrator may promulgate additional regulations establishing standards and requirements for the design, construction, and maintenance of motor carrier equipment or devices or controls and regulations establishing restrictions on motor carrier operations and activities for the purpose of minimizing or eliminating the environmental noise emissions from such equipment or activities. Such standards, controls, limits, requirements, or regulations, if any, shall reflect the degree of noise reduction achievable through the application of the best available technology, taking into account the cost of compliance.

"(3) Within ninety days after the publication of such regulations as may be proposed under paragraph (1) of this subsection, and subject to the provisions of section 16 of this Act, the Administrator shall promulgate final regulations. Such regulations may be revised from time to time, in accordance with this subsection.

"(4) Any standard or regulation, or revision thereof, proposed under this subsection shall be promulgated only after consultation with the Secretary of Transportation in order in assure appropriate consideration for safety and technological availability.

"(5) Any new regulation or revision thereof promulgated after enactment of this section shall take effect after such period as the Administrator finds necessary, after consultation with the Secretary of Transportation, to permit the development and application of the requisite technology, giving appropriate consideration to the cost of compliance within such period.

"(b) The Secretary of Transportation, after consultation with the Administrator, shall promulgate regulations to assure compliance with all standards promulgated by the Administrator under this section. The Secretary of Transportation shall carry out such regulation through the use of the powers and duties of enforcement and inspection authorized by the Interstate Commerce Act and the Department of Transportation Act. Regulations promulgated under this section shall be subject to the provisions of sections 10, 11, 12, and 16 of this Act.

"(c)(1) Nothing in this section shall diminish the right of a State or political subdivision thereof to establish and enforce standards, controls, limits, restrictions, or other requirements on environmental noise, including those from motor carrier equipment and operations, in the absence of a Federal requirement pursuant to this section, or a Federal decision that no Federal, State, or local requirement is appropriate, on a specific class of equipment or operations.

"(2) Nothing contained herein shall preclude a State or political subdivision thereof from adopting and enforcing a Federal standard, control, limit, restriction, or other requirement promulgated under this section.

"(3) Any person adversely affected by a State or local requirement, or the Administrator, may demonstrate by a preponderance of the evidence the existence of an inconsistency between the requirement of a State or political subdivision thereof and that of the Federal Government.

"(d) For purposes of this section, the term 'motor carrier' includes a common carrier by motor vehicle, a contract carrier by motor vehicle, and a private carrier of property by motor vehicle as those terms are defined by paragraphs (14), (15), and (17) of section 203(a) of the Interstate Commerce Act (49 U.S.C. 303(a)).".

(16) Section 19 of the Noise Control Act of 1972 is amended by striking out "$15,000,000 for the fiscal year ending September 30, 1979" and substituting "$3,300,000 for fiscal year 1982".

MOTION OFFERED BY MR. FLORIO

Mr. FLORIO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. FLORIO moves to strike out all after the enacting clause of the Senate bill, S. 1204, and to insert in lieu thereof the provisions of H.R. 3071, as passed by the House.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title of the Senate bill was amended so as to read: "A bill to amend the Noise Control Act of 1972, and for other purpose."

A motion to reconsider was laid on the table.

A similar House bill (H.R. 3071) was laid on the table.

GENERAL LEAVE

Mr. FLORIO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

WEST FRONT ARRANGEMENTS FOR MARTIN LUTHER KING CELEBRATION

Mr. HAWKINS. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 231) to authorize the erection of certain structures at the west front of the Capitol in connection with a rally to be held on January 15, 1982, in commemoration of the birth of Dr. Martin Luther King, Jr., as amended.

The Clerk read as follows:

H. CON. RES. 231

Resolved by the House of Representatives (the Senate concurring), That, in accordance with such conditions as the Architect of the Capitol may impose, a photographic platform, two media towers, a telephone bank, sound amplification devices, a speakers platform, and related structures and equipment may be erected under the auspices of the Stevie Wonder-Martin Luther King Memorial Committee at the west front of the Capitol in connection with a rally to be held on January 15, 1982, in commemoration of the birth of Doctor Martin Luther King, Junior.

The SPEAKER pro tempore. Is a second demanded?

Mr. FRENZEL. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from California (Mr. HAWKINS) will be recognized for 20 minutes, and the gentleman from Minnesota (Mr. FRENZEL) will be recognized for 20 minutes.

The Chair recognizes the gentleman from California (Mr. HAWKINS).

Mr. HAWKINS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the resolution would authorize the erection of a sound tower and stage for a concert, to be given in honor of Martin Luther King's birthday, on January 15 on the steps of the west front of the Capitol. A memorial commission, comprised of Stevie Wonder and our colleagues, WALTER FAUNTROY and JOHN CONYERS, will supervise the activity, which will be conducted at no cost to the Government.

The Architect of the Capitol has indicated the feasibility of the proposed construction, and has stated the terms and conditions attendant to such an activity. I include his letter in the RECORD at this point:

The letter is as follows:

WASHINGTON, D.C.,
December 10, 1981.

Hon. AUGUSTUS F. HAWKINS,
Chairman, Committee on House Administration, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: By letter dated December 9, 1981 (copy enclosed), the Honorable Walter E. Fauntroy informed me that the Committee on House Administration has requested that I submit a letter to you with respect to the rally to be held on Janu-

ary 15, 1982 in commemoration of the birth of Dr. Martin Luther King, Jr., and to the provisions of H. Con. Res. 231 authorizing the erection of certain structures on the West Front of the Capitol in connection therewith.

I have no objection to the general types of structures which would be authorized to be constructed under H. Con. Res. 231 upon its approval by both Houses of the Congress. As in the past, activities undertaken pursuant to such a Resolution would be controlled by a permit agreement beween my office and the party or parties responsible for the rally, in this case apparently to the Stevie Wonder-Martin Luther King Memorial Committee referred to in Mr. Fauntroy's letter.

The permit agreement would set forth the conditions applicable to any such activity, including, but not limited to, the following: (1) standards for the construction to be performed regarding safety, aesthetics, size and location; (2) time for erection and removal; (3) providing for repair or replacement of damaged government property; (4) requirement of a bond for the protection of the government; (5) an agreement that the United States will not incur any expense or liability by virtue of the permit granted; and (6) certain other clauses normally required in all undertakings by the government; i.e., "Officials Not To Benefit" and "Covenant Against Contingent Fees", etc.

Should you require any further information, I shall, of course, be pleased to provide it; I intend to submit to you for your approval a draft copy of the permit agreement.

Cordially,

GEORGE M. WHITE, FAIA,
Architect of the Capitol.

Mr. Speaker, the resolution, I think, clearly serves a salutary purpose in that it will allow the suitable commemoration of the birthday of a great American.

Mr. Speaker, since there are no further requests for time, I reserve the balance of my time.

Mr. FRENZEL. Mr. Speaker, I yield myself 2 minutes.

Mr. Speaker, this bill was passed unanimously in the administration committee. As the distinguished chairman has already told this body, it merely provides that certain structures will be built and removed to the satisfaction of the Architect of the Capitol.

Obviously, the rally would be held in any instance. All we are doing is making sure that it is going to be held under conditions that this body would approve of and that the cleanup will be done in a responsible manner.

● Mr. MOFFETT. Mr. Speaker, last Friday the "CBS Evening News" broadcast a remarkable piece of journalism by Bruce Morton. In case any of my colleagues missed this broadcast, I am submitting the following copy of the transcript for their consideration.

Under the suspension calendar today, we are to vote on a resolution which authorizes the erection of structures on the west front of the Capitol in connection with a rally to be held on January 15, 1982, to commemorate the birth of Dr. Martin Luther King, Jr. Last year, I took part in the rally to designate a national holiday in honor of the great civil rights leader. It was a moving experience and there was a keen sense of hope in the air that 1981 would be a year when the concerns of Dr. King would come closer to fulfillment. Certainly, there was apprehension as well, for the platform on which Ronald Reagan was elected did not bode well for the bulwarks of U.S. civil rights policy—affirmative action, busing, voting rights, and more.

Now as we look forward to 1982, and another celebration of Dr. King's efforts on behalf of a better America, those of us who harbored apprehensions have witnessed them realized to an alarming degree. The President's inability to endorse the Voting Rights Act extension after the House's overwhelming approval, the turning of his back on school desegregation, his dismantling of social programs and agencies that serve underprivileged persons—these are truly damaging acts in the eyes of civil rights proponents. What is the message that these acts send to the black community? The "CBS Evening News" broadcast indicates that the message is "We don't care."

I do care—deeply. And what about the administration? I hope that President Reagan will heed the translation of those interviewed in the "CBS Evening News" story and get his administration back on the track of civil rights fulfillment. It has strayed from the path seriously.

The transcript follows:

RATHER. It has been almost a year since Ronald Reagan became President—a year in which a generation of growth in social-service programs halted and went into reverse, and the course of foreign policy also took a turn. Bruce Morton has a report tonight on the view of all this in the black communities of America; how the words and deeds of Mr. Reagan are perceived there, and whether promises made have been promises kept.

BRUCE MORTON. Candidate Ronald Reagan, the South Bronx, August, 1980: (South Bronx crowd taunts Reagan.)

MAN. What are you gonna do for us here?

RONALD REAGAN (August, 1980). I'm trying to tell you! I can't do a damn thing for you if I don't get elected!

MORTON. Ronald Reagan did get elected, of course. In the South Bronx, a year later, the question is: what did he do for them?

VERILYN HAMILTON (Bronx Community Planning Board #3). We just see a neighborhood really dying under the Reagan Administration.

MORTON. Verilyn Hamilton is not a whiner. She stayed in the South Bronx by choice. Her four kids all went to college from the South Bronx. But she is discouraged. She guides a visitor down these mean streets and talks of housing—600 applications from people who wanted to own houses here, actually wanted to. The program cut back to 85. Subsidized housing, cut back again. She shows a visitor the sign on the door that says the Youth Employment Program has been cancelled. "Jobs for the kids was the only hope," she says. Hope is being cut back. Mrs. Hamilton doesn't know whether the President means to be racist. She does know what his policies are doing.

HAMILTON. Certainly, the indications of where he's putting this appropriation is hurting the black community. So, if one would deduce from what he is doing, you would come to the fact that—that it—it's racist situation.

MORTON. Candidate Reagan accepted the nomination in Detroit, a city chosen, some thought, as a gesture to traditionally Democratic groups like blacks.

LOIS WILLIAMS (Detroit Senior Citizens Department). Crime have gotten much, much, much worse—snatching the seniors' purse, and when they come from the grocery store, they might grab that bag of groceries, you know. It's—it's just really, really rough.

MORTON. Here in Detroit's sprawling Jeffries Housing Project, there is no agrument about the effects of the Reagan budget cuts. The evidence of what they've done is all around. Lois Williams says there used to be security guards on the grounds, now there are people selling drugs; used to be maintenance men, now there's garbage; used to be furniture in the lobbies of the high-rise buildings where the old people live, it was stolen mostly. There is less to eat. Louy Walker used to be able to feed the old people—55 free meals a day. He's been cut back to 35. What happens when number 36 walks in?

LOUY WALKER (Food and Friendship Program). Have to turn them away.

QUESTION. How do you feel about that?

WALKER. Bad!

MORTON. But it isn't just the budget cuts.

MAYOR COLEMAN YOUNG (D-Detroit). I think we see an alarming dismantling of the civil-rights structure in which the federal government has been engaged for any number of years. Matter of fact, I guess the major characteristic that I would attribute to the Reagan Administration is the dismantling, a turning back of the clock.

MORTON. He's a Democrat, of course. But Harvard professor Martin Kilson, no partisan, agrees.

PROF. MARTIN KILSON (Harvard School of Government). I would have thought that even imaginative, conservative right-of-center Republicans, like those who surround the President, would recognize that the civil-rights breakthroughs are now givens. To waffle on that issue, to me, is a gross leadership failure.

MORTON. For instance? The Administration has abandoned school busing. It has lessened pressure on Southern university systems to desegregate. It has backed away from affirmative action in private and government hiring, backed away from quotas and goals. It nominated a man to run the Equal Employment Opportunity Commission whose last job was as head of an employment agency which it placed no people this year. The Administration supports a voting-rights bill in which you'd have to prove that a law was intended to discriminate, not just that it did. And in foreign policy, some blacks see a tilt toward white South Africa, away from black African states. Is the Administration racist?

MAYOR YOUNG. I don't know whether that's true or not about this Administration. But to say it harbors racists and to say it practices racism would be entirely correct in my opinion. It really doesn't matter what the intent is, if the result is negative.

MORTON. We wondered, as you may have wondered, what the Reagan Administration itself had to say about its feelings toward blacks. We asked the White House repeatedly over a three-week period to provide a spokesman we could talk to about that. They refused.

Bruce Mortion, CBS News, Washington.●

Mr. HAWKINS. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. HAWKINS) that the House suspend the rules and agree to the concurrent resolution, House Concurrent Resolution 231, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the concurrent resolution, as amended, was agreed to.

A motion to reconsider was laid on the table.

RECORD CARRIER COMPETITION ACT OF 1981

Mr. WIRTH. Mr. Speaker, I move to suspend the rules and concur in the Senate amendment to the House amendments to the Senate bill (S. 271) to repeal section 222 of the Communications Act of 1934.

The Clerk read the Senate amendment to the House amendments, as follows:

In lieu of the matter proposed to be inserted by the House engrossed amendment to the text of the bill, insert:

SHORT TITLE

SECTION 1. This Act may be referred to as the "Record Carrier Competition Act of 1981".

COMPETITION AMONG RECORD CARRIERS

SEC. 2. Section 222 of the Communications Act of 1934 is amended to read as follows:

"COMPETITION AMONG RECORD CARRIERS

"SEC. 222. (a) For purposes of this section:

"(1) The term 'primary existing international record carrier' means any record carrier which (A) derives a majority of its revenues during any calendar year from the provision of international record communications services between points of entry into or exit from the United States and points outside the United States; (B) is eligible, on the date of the enactment of the Record Carrier Competition Act of 1981, to obtain record traffic from a record carrier in the United States for delivery outside the United States; and (C) is engaged in the direct provision of record communications services between the United States and 4 or more continents.

"(2) The term 'record carrier' means a common carrier engaged in the offering for hire of any record communications service, including service on interstate network facilities between 2 points located in the same State. Such term does not include any common carrier which derives a majority of its revenues during any calendar year from the provision of services other than record communications service.

"(3) The term 'record communications service' means those services traditionally offered by telegraph companies, such as telegraph, telegram, telegram exchange, and similar services involving an interconnected network of teletypewriters.

"(b)(1) The Commission shall, to the maximum extent feasible, promote the development of fully competitive domestic and international markets in the provision of record communications service, so that the public may obtain record communications service and facilities (including terminal equipment) the variety and price of which are governed by competition. In order to meet the purposes of this section, the Commission shall forbear from exercising its authority under this Act as the development of competition among record carriers reduces the degree of regulation necessary to protect the public.

"(2) In furtherance of the purposes of this section, record carriers shall not impose upon users of any regulated record communications services the costs of any other services or facilities (including terminal equipment), whether regulated or unregulated.

"(c)(2)(A)(i) In implementing its responsibilities under section 201(a), the Commission shall require each record carrier to make available to any other record carrier, upon reasonable request, full interconnection with any facility operated by such record carrier, and used primarily to provide record communications service. Such facility shall be made available, through written agreement, upon terms and conditions which are just, fair, and reasonable, and which are otherwise consistent with the purpose of this section.

"(ii)(I) Subject to the provisions of subclause (II), if a request for interconnection under clause (i) is for the purpose of providing international record communications service, then the agreement entered into under clause (i) shall require that the allocation of record communications service between points outside the United States and points of entry in the United States shall be based upon a pro rata share of record communications service between points of exit out of the United States and points outside the United States provided by the carrier making such request for interconnection.

"(II) The requirement established in subclause (I) shall not apply in any case in which the customer requesting any record communications service between a point outside the United States and a point of entry in the United States has the option to specify the international record carrier which will provide such record communications service.

"(B) The Commission shall require that—

"(i) if any record carrier engages both in the offering for hire of domestic record communications services and in the offering for hire of international record communications services, then such record carrier shall be treated as a separate domestic record carrier and a separate international record carrier for purposes of administering interconnection requirements;

"(ii) in any case in which such separate domestic record carrier furnishes interconnection to such separate international record carrier, any interconnection which such separate domestic record carrier furnishes to other international record carriers shall be (I) equal in type and quality; and (II) made available at the same rates and upon the same terms and conditions; and

"(iii) in any case in which such separate international record carrier furnishes interconnection to such separate domestic record carrier, any interconnection which such separate international record carrier furnishes to other domestic record carriers shall be (I) equal in type and quality; and (II) made available at the same rates and upon the same terms and conditions.

The requirements of clauses (i), (ii), and (iii) shall not apply to a record carrier if such record carrier does not have a significant share of the market for record communications services.

"(2) If any request made by a record carrier under paragraph (1)(A)(i) will require an agreement under which any record communications service or facility operated by one of the parties to such agreement will be used by any other party to such agreement, then such agreement shall establish a nondiscriminatory formula for the equitable allocation of revenues derived from such use between the parties to such agreement, except that each party to such agreement shall have the right to establish the total price charged by such party to the public for any such service which is originated by such party, consistent with the provisions of section 203. To the extent possible, and consistent with the provisions of paragraph (3)(B)(ii), the Commission shall require that such equitable allocation of revenues be based upon the costs of the record communications service or facility employed as a result of such agreement.

"(3)(A) The Commission, as soon as practicable (but not later than 15 days) after the date of the enactment of the Record Carrier Competition Act of 1981, shall convene a meeting among all record carriers which the Commission determines would be parties to any agreement required by paragraph (1)(A)(i). Such meeting shall be held for the purpose of negotiating any such agreement. Representatives of the Commission shall attend such meeting for purposes of monitoring and presiding over such negotiations.

"(B)(i) In the case of any such required agreement, if—

"(I) the record carrier subject to the interconnection requirement; and

"(II) a majority of the primary existing international record carriers involved in the meeting convened by the Commission under subparagraph (A);

fail to enter into an agreement before the end of the 45-day period following the beginning of such meeting, then the Commission shall issue an interim or final order which establishes a just, fair, reasonable, and nondiscriminatory agreement which is consistent with the purposes of this section. Any such agreement established by the Commission shall be binding upon such parties.

"(ii) Such interim or final order shall be issued not later than 90 days aftter the date on which the Commission convenes the meeting under subparagraph (A). In the case of any such required agreement, if—

"(I) the record carrier subject to the interconnection requirement; and

"(II) a majority of the primary existing international record carriers involved in the meeting convened by the Commission under subparagraph (A);

reach an agreement which complies with the requirements of this section, and such agreement is entered into before the issuance of such order by the Commission under this subparagraph, then such agreement of the parties shall take effect and the Commission shall not be required to issue any such order.

"(C) Any record carrier which is not subject to the agreement entered into, or established by the Commission, under this paragraph may elect to be subject to the terms of such agreement upon furnishing written notice to the Commission and to all existing parties to such agreement. After a carrier makes such an election, the terms and arrangements established by the agreement shall apply to such carrier to the extent practicable, as determined by the Commission.

"(4) The Commission shall have authority to vacate or modify an agreeemnt entered into by any record carriers under this section if the Commission determines that (A) such agreeemnt is not consistent with the purposes of this section; or (B) such agreement unjustly or unreasonably discriminates against any record carrier.

"(5) If the Western Union Telegraph Company submits an application to the Commission for authority to provide international record communications service, the Commission shall not have any authority to take any final action with respect to such application until the end of the 120-day period following the date a written agreement is entered into between such Company and other record carriers under paragraph (3), or following the effective date of any interim or final order issued by the Commission under paragraph (3)(B) with respect to such carriers. The limitation upon Commission authority established in this paragraph shall expire at the end of the 210-day period following the date of the enactment of the Record Carrier Competition Act of 1981.

"(d) Subject to the provisions of subsection (c)(5), each record carrier may provide record communications service in the United States domestic market and in the international market. Any record carrier seeking to provide domestic record communications service may provide such service without submitting an application to the Commission under section 214 unless the Commission requires such a submission. The Commission shall act expeditiously upon any application submitted pursuant to section 214.

"(e)(1) At the end of the 36-month period following the date of the enactment of the Record Carrier Competition Act of 1981, the provisions of subsection (c), other than paragraph (1)(B) of such subsection, shall cease to have any force or effect.

"(2) The provisions of paragraph (1) shall not be construed to affect the obligation of any carrier to interconnect with any other carrier pursuant to this Act.".

COMMISSION OVERSIGHT OF DISTRIBUTION FORMULAS

SEC. 3. (a) Subject to the provisions of subsection (b), the Federal Communications Commission shall exercise its authority under the Communications Act of 1934 to continue its oversight of the establishment of just and reasonable distribution formulas for unrouted outbound telegraph traffic and the allocation of revenues with respect to such traffic, consistent with the purposes of section 222 of the Communications Act of 1934, as amended in section 2.

(b) The provisions of subsection (a) shall cease to have any force or effect at the end of the 1-year period beginning on the date of the enactment of this Act.

EFFECT OF AMENDMENT UPON CERTAIN CONTRACTS

SEC. 4. The amendment made in section 2 shall not affect the validity of the terms of any otherwise lawful contract relating to the distribution of outbound international record traffic between any domestic record carrier and any international record carrier if such contract was entered into before June 23, 1981.

AMENDMENT TO OTHER LAW

SEC. 5. (a) Section 122(a) of the Rock Island Transition and Employee Assistance Act is amended by adding at the end thereof the following new sentence: "The Commission shall have authority to authorize continued rail service under this section over the lines of the Rock Island Railroad until the disposition of the properties of the estate of the Rock Island Railroad.".

(b) The applicability of the amendment made by subsection (a) to Interstate Commerce Commission Service Order 1498 shall expire at the end of May 15, 1982.

The SPEAKER pro tempore. Is a second demanded?

Mr. COLLINS of Texas. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Colorado (Mr. WIRTH) will be recognized for 20 minutes, and the gentleman from Texas (Mr. COLLINS) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Colorado (Mr. WIRTH).

Mr. WIRTH. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, last Tuesday, December 8, the House passed H.R. 4927, the Record Carrier Competition Act of 1981, by unanimous voice vote. We then discharged the Committee on Energy and Commerce from further consideration of S. 271, a similar Senate bill; struck all after the enacting clause and inserted the text of H.R. 4927, and returned the bill to the Senate for its consideration.
